BRILL
1997
EXECUTIVE COMMITTEE:

The preparation of this volume of the Encyclopaedia of Islam was made possible in part through grants from the Research Tools Program of the National Endowment for the Humanities, an independent Federal Agency of the United States Government; the British Academy; the Oriental Institute, Leiden; Académie des Inscriptions et Belles-Lettres; and the Royal Netherlands Academy of Sciences.

The articles in this volume were published in double fascicules of 112 pages, the dates of publication being:

1995: Fascs. 147-150, pp. 1-208

1996: Fascs. 151-157, pp. 209-600

1997: Fascs. 158-162, pp. 601-920

ISBN 90 04 10422 4

PRINTED IN THE NETHERLANDS
AUTHORS OF ARTICLES IN THIS VOLUME

For the benefit of readers who may wish to follow up an individual contributor's articles, the Editors have decided to list after each contributor's name the pages on which his signature appears. Academic but not other addresses are given (for a retired scholar, the place of his last known academic appointment).

In this list, names in square brackets are those of authors of articles reprinted or revised from the first edition of this Encyclopaedia or from the Shorter Encyclopaedia of Islam. An asterisk after the name of the author in the text denotes an article reprinted from the first edition which has been brought up to date by the Editorial Committee; where an article has been revised by a second author his name appears within square brackets after the name of the original author.

ADDENDA AND CORRIGENDA

VOLUME V

Further information on the Persian Mecca-centred world-map discussed in the article AL-SAMT is included in the article AL-TASA and in the addenda and corrigenda to AL-SAMT.

P. 1169a, MAGHNA'TIS. 2, add at end: The treatise in ms. Berlin Ahlwardt 3811 mentioned on p. 1169b is in fact a late copy of the treatise by the Yemeni Sultan al-Ashraf—see AL-TASA for this and several other additional sources. The various publications by J. Klaproth and E. Wiedemann listed in the bibliography, as well as numerous others, have been reprinted in one volume as Fuat Sezgin et alii (eds.), Islamic geography, xv, Reprint of studies on nautical instruments, Frankfurt 1992.

VOLUME VII
P. 1027, NASRIDS, in genealogical table, for the date of Muhammed XI (el Chiquito), read (1451-2/1453-5), and p. 1027b, l. 7 from foot, for 949/1533-4, read 940/1533-4.

VOLUME VIII
P. 245b, SHAKAK, l. 11, for Idris Bidibi, read Sharaf al-Din Bidibi.

P. 869a, SA'DA QILANI, l. 4 from bottom, delete: his wife.

P. 1056a, AL-SAMT, add at end: In May 1995 a second Persian world-map centred on Mecca came to light and is now in a private collection. It is very similar to the first one, which became available for study in 1989, but more crudely executed. However, it still bears the paraphrasialia for a European-type universal inclining sundial. (The sundial on the first, not necessarily of the same kind, is missing.) It is clear that both maps were copied from others, the original probably bearing more geographical information than either of these.

The first map is still to be dated ca. 1110/1700 (± 20 years); the second is undoubtedly later but bears striking resemblances in calligraphy and appendages (such as screws and feet) to the first, if not in general aspect and finish. Both maps are not necessarily from Isfahan, for Khurasanian forms of the Persian ordinal numerals are found on them. However, apart from various astrolabes by Muhammad Zamân (ca. 1075/1665) of Mağhad, no other astronomical instruments survive from northeastern Persia in late-Safavid times.

The geographical data in al-Khazin's Sandjâri Zîb, which was thought to have been derived from a world-map of the same kind as the first Persian world-map—this was stated in the article AL-SAMT—was in fact derived by calculation, as research in April 1995 established. The longitude and latitude values were indeed read from a map by or in the tradition of al-Birûnî but the kibla-values are inaccurate, not because they were read from a hypothetical Mecca-centred map of al-Birûnî but because al-Khâzîn rounded them to the nearest 20° before finding the kibla. To do this he apparently used a kibla-table (with values for each degree of longitude correction from Mecca up to 60° and each degree of latitude difference up to 30°), which he mentions in the Zîb but which is not contained in any of the known manuscripts; it can further be shown that this kibla-table was carelessly computed. In other words, we must look elsewhere for the inspiration for the Persian world-maps.

The geographical data on both of them (ca. 150 localities on each, the selection being slightly different on the two maps) was taken from a Timûrid geographical table compiled in Kish [q.v.] ca. 850/1450, and the anonymous compiler of that table (extant in ms. London, B.L. Or. 7489, fols. 53a-58b, where, however, the values of the kibla and distance to Mecca for some 250 localities originally given to seconds have been rounded to minutes) is certainly a possible candidate. But the writings of Habash al-Hasib [q.v.] and al-Birûnî [q.v.] particularly with regard to the astrolabe labelled muhaffâzât (with a melon-shaped rete), indicate that already in the 3rd/9th and 5th/11th centuries Muslim astronomers were concerned with mappings preserving distance and direction to a central point (see E.S. Kennedy, P. Kunitzsch and R.P. Lorch, The Melon Astrolabe of Habash al-Hasib, in ZGAIW (1996)), a subject first broached in Europe in the 16th century and first applied to a Mecca-centred map in the early 20th century.

(D.A. King)

SUPPLEMENT

P. 229a, DIJABAL SAYS, add at end: The Arabic inscription of al-Hârîb b. Diabala from A.D. 521 mentioned here is, in fact, the third one before Islam and the only historical one; in other inscrip-
tions, including several of the early Islamic period, going up to the time of al-Walîd I, the ancient form Usays appears.

VOLUME IX

P. 370^a^, **SHâ¹L, ANWAR**, l. 4 from the foot, for the Alliance Française read the Collège A-D Sasson and the Alliance Israélite Universelle.

P. 370^b^, l. 30, for Kuṣṣat hayâtî wâdi ‘l-Râfîdayn read Kuṣṣat hayâtî fi wâdi ‘l-Râfîdayn.

P. 509^a^, **SHURAYH**, l. -23, for al-Ḥakam b. ‘Uyayna, read al-Ḥakam b. ‘Utayba.

SAN\(^3\), from ancient times the chief town of the Yemen \[q.v.\] and present capital of the unified Republic of Yemen. Its present population is reckoned to be just over half a million. The town is situated in the centre of the northern highlands of the Yemen at lat. 15\(^\circ\) 22' N. and long. 44\(^\circ\) 11' E., i.e. about 170 km/106 miles as the crow flies from the nearest point on the Red Sea and 300 km/186 miles approximately from the Indian Ocean port of Aden \[see 'ADAN\].

San\(^\circ\) is located at a height above sea level of more than 2,200 m/7,216 feet. It is all but surrounded by mountains, Djabal Nukum (2,892 m/9,486 feet) in the east, the foot of which the town lies spread, Djabal 'Aytân (3,194 m/10,476 feet) in the west, the highest peak in the immediate vicinity, and the twin peaks of al-Nahdayn (2,513 m/8,243 feet) which lie due south. Its climate is a temperate one, generally very dry and mild. Its rainfall pattern is consistent, with maximum falls in March, April, May and July, August, September (see Acres, Lewcock and Wilson, in Serjeant and Lewcock, San\(^\circ\), 13-19, in Bibl. below).

Pre-Islamic San\(^\circ\)?

Despite the current claim that the name of San\(^\circ\) is derived from the excellence of its trades and crafts (perhaps the feminine form of the Arabic adjective asna\(^\circ\)), it is highly probable that the name is Sabaic and, in keeping with the basic meaning in Sabaic of the root \(\text{sn}\), means "well fortified" (A.F.L. Beeston et alii, Sabaic dictionary, Louvain and Beirut, 1982, 143). It is certainly as a military centre that the town emerges in the pre-Islamic inscriptions, particularly as the headquarters of the Sabaean kings for their military expeditions southwards against Himyar \[q.v.\]. Inscriptions Ja 575, 576, for example, speak of Sabaean campaigns launched from San\(^\circ\) (bn/hgrm/n\(^\circ\)w) (A. Jamme, Sabaean inscriptions from Mahram Bilqis, Baltimore 1962, 64 ff.) and Ja 574, 576, 577 (Jamme, 60 ff.) announce a triumphant return to San\(^\circ\) (\(\text{sn}\)hgrm/n\(^\circ\)w) from the wars. Apart from being a "town" (\(\text{hgr}\)), San\(^\circ\) was also a mahram (\(\text{mhrm}\)) which Beeston (San\(^\circ\), 37) interprets as "a place to which access is prohibited or restricted, no matter whether for religious or for other reasons."

The palace of Qhumdân \[q.v.\] is also mentioned in the pre-Islamic inscriptions (e.g. J. Ryckmans, La Mancie par bbh, in Festschrift Werner Caskel, Leiden 1968, 263 (NNAG 12)) and see San\(^\circ\), 44. Islamic tradition also reports that the mid-6th-century Abyssinian King Abrahah \[q.v.\] built a church in San\(^\circ\) (al-\(\text{Kalas}\)) (al-Tabari, i, 954), for a study of which see San\(^\circ\), 44-9.

Unfortunately, the inscriptions do not tell us when the site of San\(^\circ\) was first settled, nor do they mention the town's ancient name of Azäl (al-Hamdân, 55). The above quoted inscriptions and a very large majority of the texts mentioning the name of the town are all to be dated to the 3rd century A.D. The site must, of course, have been settled a very good deal earlier (see Beeston, in San\(^\circ\), 36-9). Early Islamic and mediaeval San\(^\circ\)?

For the more than two centuries of the early Islamic history of San\(^\circ\), we have little more than a list of the governors despatched to the Yemen by the Prophet, the Orthodox, Umayyad and 'Abbâsid caliphs. A comprehensive list was attempted in San\(^\circ\), 53-4, and Tables 1, 4, 6, 8 and 11 of 'Abd al-Muhsin Mad\(\text{adj}\) M. al-Mad\(\text{adj}\), The Yemen in early Islam, 9-233/630-847, a political history, London 1988, should also be consulted. The remainder of the period can be divided into six as follows: the Yu'fírids, 232-387/874-997 \[q.v.\], the Sulayhids, 439-92/1047-99 \[q.v.\], the sultans of Hamdân, 493-569/1099-1173, the Ayyúbíds, 569-628/1173-1230 \[q.v.\], the Rasúlids 628-783/1230-1381 \[q.v.\] and a period in which the Zaydí Imám controlled San\(^\circ\), 783-953/1381-1546 \[see Zaydíyya\].

A detailed history of this period cannot be given here, and a few notes will suffice. The Yu'fírids, it might be noted, were the first Yemeni dynasty to take other than a purely local control of any part of the Yemen. Descended from Himyar, they regarded themselves as their legitimate heirs and moved into San\(^\circ\) from their original territory in Shibâm when they perceived the weakness of the local 'Abbâsid governors posted there. Their 150 years' rule of San\(^\circ\) came to an end in 387/997, leaving the town in anarchy until the arrival of the Fâtsimí Sulayhids in 439/1047.

Our sources are particularly silent about the Sulayhids during their San\(^\circ\) period. The zenith of Sulayhid rule came later during the period during which they were centred in Dhub Dibîla, which the dynasty settled in about 480/1087. With the death in 492/1098 of the Dâ's Saba\(^\circ\) b. Ahmad, San\(^\circ\) was lost to the Sulayhids.

During the period 492-569/1098-1173 San\(^\circ\) fell under the rule of three families of Hamdân from Yam, also İmânîlîs like the Sulayhids: Banû Hâtim (I), Banû 'l-Kubâyb and Banû Hâtim (II) (G.R. Smith, The Ayyúbíds and early Rasúlîds in the Yemen, London 1974-8, 2 vols., ii, 68, 70-5). Depending almost entirely on the forces which could be mustered from Hamdân \[q.v.\], the three families controlled San\(^\circ\) and were still there to contest authority with the Ayyúbíds after their conquest of Tihâmâ \[q.v.\] and the southern highlands from Egypt in 569/1173. It cannot be said that San\(^\circ\) was constantly in the hands of the Ayyúbíds during their period in the Yemen. Rather, the Ayyúbíds fought from time to time against those in control in the town, firstly the
Handanid sultans, later the Zaydis, and always after fairly elaborate military manoeuvres to secure Dhamar to the south of San'ā. They took over the town for a period of time, but often they also lost it all over again after an interval of time. A similar story can be told of the Rasulid period during the years 628-723/1230-1323. Despite the brilliance of Rasulid administrative and intellectual achievement in Tihama and the southern highlands, they too never succeeded in occupying with anything like permanency the chief town of the country. During approximately the last 130 years of the dynasty, 723-858/1323-1454, San'ā remained in general within the political orbit of the Zaydis and beyond the grasp of the Rasulids and indeed of their successors, the Tāhirīds [g.v.] (see Smith, Some observations on the Tahirids and their activities in and around San'ā (858-923/1454-1517), in Ihsan Abbas et alii (eds.), Studies in history and literature in honour of Nicola A. Ziadeh..., London 1992, 29-37). (See Smith, San'ā, 49-68. 

Late medieval and modern San'ā

Again, elaborate details are not possible here and the following is a very brief outline of dates and political events. From about 954/1547, when the Ottoman Özdemir Paşa [g.v.] advanced on San'ā, until 1038/1629 San'ā was the capital of Ottoman Yemen. Although he did not deal the coup de grâce—that was left to the Imām al-Mu'ayyad—the real hero of the Turks' expulsion from San'ā and the Yemen was al-Kāsim b. Muḥammad, al-Kāsim al-Kābir. Right through to the mid-13th/19th century, the Zaydi Imāms controlled San'ā and northern Yemen with more or less authority. Zaydi rule, however, seriously declined, mainly as a result of internal squabbling, allowing a second Ottoman occupation of the Yemen. The Ottomans had already begun to expand in Arabia and in 1289/1872 Ṭāhir Muhammad Paşa entered San'ā to begin the second Ottoman occupation of the Yemen until about 1337/1918. The post-1337/1918 history of San'ā and the Yemen is that of the Ṭahiri Hamīd al-Dīn house, under the Imām Yahyā, Ahmad and, for a few days only in 1382/1962, al-Badr. The house rose to prominence in Zaydi circles in 1307/1890 in the figure of al-Manṣūr bi 'llah Muḥammad b. Yahyā Hamīd al-Dīn. The Imām Ahmad (1367-82/1948-62), famed for his bravery and learning as much for his ruthlessness and toughness, died from natural causes in 1382/1962. His son, al-Badr, was proclaimed Imām and widely recognised, but was compelled to flee San'-ā after he was attacked by young army officers who had been plotting a military coup. Hamīd al-Dīn rule was brought to an end and the newly-appointed chief of staff, ʿĀbd Allāh al-Sallāl, was pronounced the new president of the Yemen Arab Republic.

The Republic needed vast numbers of Egyptians to prop it up in the face of general opposition. They left the Yemen only in 1967 at the time of the Six-Day War between Egypt and Israel and the Republican government, balanced between the Ṭahiri and ʿĀshūrī religious and tribal interests, the military and a new breed of Western-educated technocrat, continued in power and opened up talks with the People's Democratic Republic of Yemen on the question of the formation of a unified Yemen. The Republic of Yemen came into being in 1990 with San'ā as its capital (see Serjeant, in Studies in Arabian Studies, II (1993), 175-88, suggests the first construction was in 11/633, p. 184). For a detailed study of the mosques of San'ā, see Serjeant, Lewcock, Smith and Costa, in San'ā, 310-90.

The public baths (hammāmāt) play an important social role in the daily life of San'ā and there are seventeen still in operation today, some possibly pre-Islamic in foundation. The fuel burnt is human excrement (khara, which is reputed to burn giving off great heat. The fuel is collected from the "long drop" (man- tāl) found in every house in the town for this very purpose. Women have their own bath times regulated at each public bath and the baths play a particularly important role at festival times (ṣuyyād) (see Lewcock, Akwa' and Serjeant, San'ā, 501-25).

The market of San'ā

The large market in San'ā has been the subject of some academic studies (see in particular Serjeant, Akwa' and Dostal, in San'ā, 159-302) and the complexities of its administration and organisation are beginning to be understood. A 12th/18th century document entitled Kānān San'ā, which is a collection of market regulations, was published by Husayn b. Ahmad al-Sayaghl in 1964 (Maq BadRequest al- Akwa', 273-307) and it has also been the subject of a lengthy study in San'ā, 179-240. Today's San'ā market is dealt with in some detail by Dostal, in San'ā, 241-73.

The mint of San'ā

The earliest coins which can be assigned to San'ā date from 156-8/772-4, and the 3rd/9th century in particular saw a huge output from the mint, "a substantial proportion of all the gold being coined in the territories of the caliph", according to Lowick (in

SANADJĀT, weights of a balance (in full sanadjat al-mizān); also applied to balances, steelyards; also the weights of a clock (sing. sanā‘a). The forms with sād also occur (sanadjat and sanā‘a) but the former is the more chaste (see Lane, s.v.). There are two recognised plural forms, sanadjāt and sanājūt (in modern Egyptian Arabic sanaj, plural of singa). The word is Perso-Arab in origin, being connected with sān, meaning both stone and weight, since in ancient times weights were non-metallic (cf. the Hebrew of Deut. xxv, 13). According to Muslim tradition, it was a Jew named Sumayr, during the time of al-Hadjādī b. Yūsuf [q.v.], who first proposed to regulate the new dirhams of the reformed coinage of 75/694 by means of the use of fixed weights (Ibn al-Azhīr, iv, 337). Previously, the custom apparently had been to weigh one coin of good quality against another. When a large number had thus been weighed, this lot was weighed against a similar number and the surplus, if any, was carried forward. The first coins of Islam were made of bronze and are excessively rare. Weights of iron are not known: we must seek them in glass, since in ancient times weights were used since they did not change by increase or decrease (al-Dāmirī, Hayāt al-hayātsan, i, 59). This carried on the practice of Trolemaic and Byzantine times. These glass weights, however, were confined to Egypt and were in use from Umayyad until Mamlūk times. The old opinion that they were glass coins, nummi vitrei, was first exploded by Castiglioni in 1847, various collections of these sanadjāt have been published. As they generally bear inscriptions with the names of caliphs, or governors, or in some cases with the names of the minters, they are very valuable, not only for Islamic history and metrology, but also for Arabic epigraphy.

The great physicist al-Khāzinī [q.v.] paid particular attention to the weights used in his balances [see MIZÁN], in which course he achieved a very high degree of accuracy. In his introduction to his description of the Balance of wisdom, he devotes two paragraphs to a discussion of the weights specific to this machine. He does not seem to imply that the sanadjāt—always with sād in his work—can be in mixed units in weighing operations, but simply says that they are to be 'dirhams, miḥkāls or others'. Presumably the units chosen in any particular operation depended upon the mass of the objects to be weighed. For each unit there were nine different weights of sanadjāt: for unities, 2, 4, 8, 10, 20 and 30; for hundreds, 100, 200 and 500. With these values, using different combinations, any required weight could be obtained (Kitāb Mizān al-hikma, Haydārābād 1940, 108-9).

The term sanadjāt is also occasionally used for other kinds of weights such as counterweights or pellets discharged from the mouths of falcons in water-clocks (see E. Wiedmann, Aufsätze zur ärabischen Wissenschaftsgeschichte, Hildesheim 1970, i, 127). More usual terms for weights where the precise value is unimportant are miḥkāl and bayda.

SANĀ‘Ī, Magdīdū b. Adam al-Ghaznawi, Persian poet. In early sources already the kunya Abu ‘l-Magdīd is sometimes added to his name. As a pen name he used Sanā‘ī, only rarely Magdīdū or Magdīdū Sanā‘ī. The former name could have been derived from Sanā‘ī al-Milla, one of the lakabs of the Ghaznawid sultan Mas‘ūd III, but the poet’s actual relationship to this ruler is unclear, because no panegyrics directly addressed to him by Sanā‘ī have been preserved. As a matter of fact, no reliable biographical data outside the poet’s own works are available. However, the many references to the historical context to be found in his poetry, including dedications to a great number of patrons, make it possible to reconstruct his life, at least in its main outlines.

The only known dating of his birth, in 437/1045-6, which is recorded in the Mughal-i Fasihk, is highly improbable. It may be regarded as certain that he was
born at Ghazna about the beginning of the last quarter of the 5th/11th century. In spite of the reputation of the poet, expressed by the epithet hakim commonly added to his name, we know nothing about his formal education beyond the fact that in a prose introduction to the Hadīthak al-haššaš his father is said to have been a mu'allim. According to the picture of his early life sketched in the Kārāmā-yi Balkhā and the panegyrics contained in his Divān, he was during these years a minor poet who maintained connections with patrons from all social groups in the Ghaznavid residence except, as it seems, the court of the sultan itself. We find among them officials of the state bureaucracy, military men, members of the Islamic clergy as well as scholars, scribes and poets. One of his most important protectors was Thīkāt al-Mulk Tāhir b. Āli, the head of the department of correspondence, who also patronised the poet Mas'ūd-i Sa'd-i Salmān [q.v.]. According to a kī'a in Sanā'i's Divān, he prepared a collection of Mas'ūd’s poetry. There is also mention of his copying the poems of another prominent poet, Ḥūılmān Mūkhtārī [q.v.].

His relations with a few prominent Islamic scholars, belonging to the Ḥanafī school of law, foreshadowed the future course of his literary career. The celebrated story of Sanā'i’s abandoning professional poetry after a meeting with a “drinker of dregs” (īy-khā), first told by Dawlatshāh towards the end of the 9th/15th century, has no historical value, but does reflect an evident break in his career as a poet, more or less coinciding with his departure from Ghazna. First he went to Balkh, and from there to other cities in Khurāsān, which was then under the rule of the Saldžuks. As it appears from the Kārāmā-yi Balkhā, written shortly after he left Ghazna, this event took place before 508/1114-15, the year of Mas'ūd III’s death. He probably did not return to his native city before about 520/1126. During this exile, he almost completely abandoned the secular poetry of the court tradition, seeking instead the patronage of people belonging to the religious class. Of crucial importance was his stay at Sarakhs, where he established a close relationship with Sayf al-Hakk Abu 'l-Mafākhrī Muḥammad b. Maṣūr. This Ḥanafī scholar was, as his title ʿaṣūda 'l-khadīs indicates, also a person of some political weight. Besides, he was a renowned preacher (wadāʾī), who delivered his sermons in Sarakhs, which led to his bearing of the most remarkable poems for Muḥammad b. Maṣūr, addressing him both as a protector and as a spiritual guide. There are further references to the poet’s visits to Nīḥāpur and Harāt. In the latter town, he met with the descendents of Shaykh Bahā al-Anṣārī [q.v.]. This is in fact the only contact of his with a Sufi community for which there exists reliable evidence. The tradition that Sanā'i was a pupil of Shaykh Yusuf al-Makhzūmī, which left to his inclusion in the Sufi affiliations (cf. R. Gramlich, Die sächsische Denkwürden Persiens, i, Wiesbaden 1965, 8), is certainly unhistorical.

The reasons for his return to Ghazna are not known to us. However, again a remarkable change in his career can be noticed. While he was still in Khurāsān, Sanā‘ī had become a celebrated writer of religious poetry for which there appeared to exist a lively interest among the ruling classes, who hitherto had only patronised court poetry. For the first time in his entire career, Sanā‘ī drew the attention of a royal patron when the Ghaznavid sultan Bahramshāh [q.v.] invited him to the court. Although he clearly stated his determination to stay aloof from the affairs of this world, he nevertheless wrote his major maṭnawī as well as a number of short poems for this sultan. Very different dates are suggested in later sources for the year of his death. The latest date, 553/1157, known from a reference in July 1131, mentioned in a notice on the last day of his life, which became attached as an appendix to a prose introduction to the Hadīthak. The same date is mentioned in the Nafṣābāt al-uns of Dżamī [q.v.].

The works of Sanā‘ī encompass the entire range of classical Persian poetry. Though most poems deal with religious subjects, specimens of purely secular poetry are by no means absent. Even the religious poems often contain panegyric elements showing the poet’s dependence on the material support of patrons throughout his career. The Divān of Sanā‘ī is preserved in a number of ancient manuscripts, the oldest dated of which is Velieddīn 2627 (Bayezit Library, Istanbul), copied in 684/1285. They show great differences, as far as the order of the poems, variant readings and the number of verses are concerned. It is, therefore, impossible to establish which of them could be taken to represent a genuine textual tradition going back to the time of the poet himself. In one strain of the early tradition, the poems were grouped into a few sections marked by generic indications. The most important genres thus distinguished are the zuhdīyat, “ascetic poems” (most of them long kāsidas) and the kalandariyyāt, poems characterised by the use of antimonic motives referring to the debauchery of beggars and drunks. Of considerable interest is also the group of the ghazalīyat because this is the earliest sizable corpus of this kind of poems known in the history of Persian literature.

As a writer of maṭnawīs, Sanā‘ī is best known for his long didactical poem which is usually entitled Hadīthak al-haššaš wa-šārī‘at al-tarīqa, “The garden of truth and the law of the right path”. The history of this text is even more complicated than that of the Divān. To all appearances, the poet died before he could give the poem its final form. At least one early version, however, was prepared for Sultan Bahramshāh, when the poet was still alive. A copy of this version, under the title Fatḥir-nāma, has survived in the manuscript Bağdatlı Vehbi 1672 (Süleymaniye Library, Istanbul), which was copied at Konya on 7 Shawwal 552/12 November 1157. It contains about 5000 bayts, i.e. approximately half the amount of lines found in most later copies. It is not likely, however, that all the rest of the poems of this manuscript are unauthentic. The textual tradition has preserved a few documents which indicate that intensive editorial work was done on the poem soon after the first version was completed, including a rough copy (muṣawwādah) of 10,000 bayts prepared by the poet to be sent to Khūndā Būrḥān al-Dīn, a scholar from Ghazna who lived at Baghdaḍ, after the poem had come under attack for its alleged pro-ʿAlid tendencies. After Sanā‘ī’s death, Būrḥān al-Dīn copied the poems of Sanā‘ī for Muḥammad b. ʿAli al-Rafṣī to make yet another redaction. As a result of these initial rearrangements, as well as of subsequent editorial interference, the Hadīthak was transmitted in several different forms. As late as the 11th/17th century, the Indian scholar ʿAbd al-Laṭif al-ʿAbbāsī made an attempt to harmonise the various traditions of the text; he also wrote a commentary, entitled Fatḥiyyāt al-haššaš wa-šārī‘at al-tarīqa. Later a few other commentaries were composed (cf. J. Stephenson, The enclosing garden of mysticism, London: Longmans, 1945, 1978). One of the selections made from the poem, which is sometimes entitled Laṭifat al-ṭarfān, has been ascribed to Sanā‘ī as well as to Farīd al-Dīn ʿAṭṭār [q.v.], but its real author is probably Nīẓām al-Dīn Maḥmūd Husayn Shīrāzī.
a poet of the 9th/15th century also known by the pen name of Dā‘ī. The Ḥadhār al-bāḥisṭa is the first specimen of a mystical maṭnawī in Persian literature and has had a considerable impact on later writers in the same genre, notably on Djalāl al-Dīn Rūmī [q.v.], whose Maṭnawī-yi ma‘nawi was composed after the example given by Sanā‘ī. The great number of manuscripts known to exist bears witness to an immense popularity lasting throughout the centuries. It is a didactic poem conceived as a continuing discourse on a wide variety of ethical and religious subjects. In the early Fakhn-ndma version, the vague outline of an allegory, comparable to that of his earlier work Sayr al-‘ibdād tī ‘l-ma‘ād, appears when the poet tells of a meeting with a spiritual guide, who is the personification of the Active Intellect. In later redactions this feature was almost obliterated and replaced by a division of the text into chapters. The text contains numerous references to philosophy and the sciences and has therefore often been held an "encyclopaedia of Sufism". This is a misleading qualification because these elements are always subordinated to the didactic discourse. The same applies to the narratives, which take a far less important part in Sanā‘ī’s poem than they do in the works of later writers of Persian didactic maṭnawīs.

Sanā‘ī left two other maṭnawīs, of a much smaller size. The first, Kamānā-yi Bākhrī, sometimes also called Maḍīnahrā-nāma ("Book of jest"), is a completely secular poem of no more than 435 bayts. It was written at Balkh shortly after Sanā‘ī had left Ghazna. In a mixture of praise and satire, this topical poem reviews the people who were the poet’s patrons during his early years, arranged according to their social position. The second, the Sayr al-‘ibdād tī ‘l-ma‘ād ("The journey of the devotees to the place of return") is Sanā‘ī’s most interesting work. Two-thirds of its 800 lines describe the development of the narrator’s soul in the allegory of a spiritual journey. From his conception onwards, he climbs the ladder of existence, partly under the guidance of the Active Intellect. He reaches the goal of this quest when he meets with the preacher Muhammad b. Maḥṣūr, his actual patron during his stay at the city of Sarāḵš, whose praise fills the remaining part of the poem. The Sayr al-‘ibdād is written in an enigmatic style with only few explanations provided in the text. So skilfully is it constructed as to resemble to philosophical allegories in Arabic, such as Ibn Sīnā’s Ḥayy ibn Yaqūn [q.v.] and the Lughāt kābi by Miskawayh [q.v.]. An anonymous commentary is extant, the oldest version of which is contained in the ms. Nāfī Naṣa Público 410 (Süleymaniye Library, Istanbul), dated 674/1275.

All genuine maṭnawīs of Sanā‘ī were written in the metre ḍaffī, which, through his example, became one of the patterns most often used for didactic mystical poetry. In the same metre, a number of other short maṭnawīs occur in manuscripts of his works, which are falsely attributed to him. Some of these were works by other poets which were manipulated in order to pass them off as genuine texts by Sanā‘ī, e.g. Ṭabhrī-nāma, which actually is a verse commentary on the Sawā‘id of Ahmad al-Qazvīni [q.v.], and Ṣafī al-shinābī, written in imitation of the Ḥadhār by Ahmad al-Nawawī [q.v.]. It might be dated to the 14th century (on these and other poems of this group, see B. Utas, Ṭabīcī ut-tahqīc, Lund 1973, passim). Others, like Tahrīnāt al-kalām and Ṣafī-nāma, both appearing for the first time in the Velieddin manuscript of 684 A.H., were deliberately composed as pseudo-Sanā‘ī texts (cf. Of petty and poetry, 113–18). A small collection of letters by Sanā‘ī was published by Nādhīr Ahmad (Makātīb-i Sanā‘ī, Aligarh 1962). There are two prose introductions to his works containing his name as the author. One of these, which is in fact the same text as the introduction by al-Ra‘īfī, is almost certainly spurious.

Sanā‘ī’s great impact on Persian mystical poetry has given rise to the view that he was a prominent Sūfī himself. There is little historical evidence available to substantiate this view. The most important patrons of his art were Islamic scholars, many of whom were also renowned as preachers. The predominantly homiletic style of his religious poetry fits this social environment extremely well. With its characteristic blend of ethics, wisdom, mysticism and praise of the Prophet and other great men of Islam it appealed to the community of the Muslims as a whole rather than to a restricted circle of Sūfī adepts only. This also explains the varied use made by later generations of his verse.

held together with milk, in flour and in wood, in pagan Arabia" (see refs. in Fahd, op. cit., 28-9). "It was in the mid-3rd century A.D. that the Na'aman and Syro-Palestinian influences affected, in the urban centres, the evolution in form of the Arab pantheon, and it was then that the stone betyle became an idol". Wellhausen correctly affirmed this when he wrote that the images were not genuinely Arabic, since waqfán and sanam were imported words and things. See his Reste, 102; D. Nielsen, Die allarabischen Mondreligion und die mosaische Überlieferung, Strassburg 1904).

According to al-Azraki, there was no house in Mecca without its idol. Those carved out of stone and wood seem to have been those of the high-born and rich, as were imported products. Ibn Hisháms states (Síra, 303-4) "'Amr b. Dája', who was one of the sappers of the Banú Salama and one of their leaders, had taken into his house a wooden idol (sanam), called Manáit, according to the account of notables of that time; he considered it as a god, and worshipped and purified it". "Ihrizma, son of Abá Dája [q.v.], the fierce enemy of the Prophet, made idols. Traders went and offered them to the Bedouins, who bought them and placed them within their tents (al-Azraki, 77-8).

After the triumph of Christianity in the Orient, the Hijádz had remained a stronghold of paganism, where idol carvers could still gain a living. It was not surprising that, when the Prophet entered Mecca in triumph, he had 360 idols in the Ka'ba immediately destroyed (ibid., 77; Ibn al-Athlr, ii, 192; cf. Fahd, Panthéon, 3). According to a leading Arabian historian, met by the author in Kuwait shortly after the explosion and revealed a pile of statues buried below the ground; the Saudi authorities hastened to dispose of them.

Thus the religions of pagan Arabia, from betyles to carved idols, retained their primitive internal structure, and although social conditions and artistic influences might affect the actual forms of representation, this had no effect on the conceptual development of the cults there. A list of the Arab gods can be found in Fahd's Panthéon, with all the known information about some 90 of them, and showing that these Arab cults were static and characteristic of the desert and nomadic life, in which betyles, idols and sacred trees were the dominant features.

SANANDADJ, or SINANDADJ, older form SINNA, the administrative capital of the modern Persian province of Kurdistan and the general name for the district round it.

1. The town. The name Sinna came into historical prominence only from the 9th/15th century onwards, the main urban centre of the district having previously been Sisar [q.v.], as the seat of the Kurdish waíls or local rulers of Ardalan [q.v.]. Under the year 988/1580, the 10th/16th century historian of the Kurds, Sáhar al-Dín Bání Dídísí [q.v.], speaks in his Sharaf-námá (ed. V. Vallamref-Zernot, St. Peters- burg 1860-2, i, 88) of a land grant held by Timúr Khán of Ardaláín, which included Hasanábád, Sína, etc., but the local historian of Sanadzánd, 'Alí Akbar Munští Wákáyí-nígar (wrote ca. 1310/1892-3, see Storey, i, 1300, cf. also 369), in his ms. work on the geography and history of Sanadzánd, the Hadíyíkí Náisírt (Fr. résumé by B. Níkitine, in RMM, xiii, 70-104), says that Sinna was built by the wáli Sułáymán Khán on the ruined site of an earlier settlement; the Persian ta'firí or chronogram for this event is given as ghamhá "sorrows" = 1046 in aqfib (1636-7).

The wáli, being near the Perso-Turkish frontier, took an active part in the wars between the Safawids and the Ottomans, sometimes on one side, sometimes on the other; during this period, Ardáland enjoyed, like 'Arabíštán and Luríštán, a semi-independent existence. During the Afghan invasion of Persia, in 1132/1720, the Kurdish chief of Sułáymáníyyá [q.v.] seized Sinna, but the wáli of Ardalán Subhán Werdí Khán recovered it in the time of Nádir Sháh. Amán Alláh "the Great" (1212-40/1797-1825) much improved the town of Sinna, and entertained there Sir John Malcolm and J.C. Rich, but his grandson Amán Alláh b. Kháruz Aýnánání (1265-84/1848-67) was the last hereditary wáli of Kurdistan, since the central government in Tehran under Náṣir al-Dín Sháh [q.v.] in 1892 extended its direct control over the western provinces.

The town lies between the right bank of the Kishkí river (which eventually flows down to the Díyálá and then the Tigris) and Mount 'Awídar, which separates Sinna from the old capital Hasanábád. The citadel of the wáli, described by such 19th century travellers as Malcolm, Rich and Çirkov, is on a hill some 21 m/70 ft. high in the centre of the town. The town's population at that time was largely Kurdish, but with a substantial Jewish minority and a few Chaldæan Catholic and Armenian Christians, and it was a lively commercial centre, exporting oak-galls, tragacanth, furs and carpets. In modern Persia, Sanadzánd (lat. 35° 19' N., long 47° 01' E.) is the administrative capital of the province (uştán) of Kurdistan, with a population in 1991 of 244,249 (Preliminary results of the 1991 census, Statistical Centre of Iran, Population Division). Senna carpets remain a principal product of the town and its hinterland.

2. The district. The older district of Sinna corresponds with the heartland of the modern Kurdistan province, with high, treeless plateaus in the northeast and southeast, whilst its central part is intersected by
numerous valleys, sloping down to deciduous forests
in the east. The main mountain massif is ...
Süleyman was Guran. In addition to the ma-

[see MUSANNAF] like those

Islamic world, amongst the 'Irākis Yahyā b. Mašīn (d. 233/848) and Ahmad b. Hanbal (d. 241/855), two famous hadīth scholars of the 3rd/9th century. The reputation of 'Abd al-Razzāk was first of all based on his book or books. The oldest informa-
tion about his works comes from historical notices above (Ibn 'Abd al-Latīf, 'Ili, iii, 3882, Cairo 1990).

There is a difference of opinion as to the titles of his book or books. Ibn al-Nadīm (d. 385/995), for in-

stance, mentions a Kitāb al-Sunan fi 'l-fikhr and a Kitāb al-Musannaf (Fihrist, Cairo 1929-30, 318), Ibn Khayr
(d. 575/1179) claims to have known several riwayāt of a work called Musannaf—which is probably identical
with the Kitāb al-Sunan quoted by Ibn al-Nadīm—and the Kitāb al-Maghdūbi, which according to him was
originally a part of the Musannaf. He further refers to
a book annexed to the Musannaf called Dā'imī which he describes as a work of Ma'mar b. Rāghid merely
transmitted by 'Abd al-Razzāk (Fahrasa, Saragossa
1894, 127-30). Al-Dhahabi (d. 748/1347) mentions a
Dā'imī al-kabīr (Mīzān, i, 126), al-Saḍāfī (d. 764/1362-
3) a Taṣfir (Nātāt al-hikmat, Cairo 1911, 192), and Ibn Ḳaḍīr (d. 774/1372-3), finally, alongside the Mu-

Sanandadj, going up to and slightly across the frontier

dil, no. 2599; Ibn Abl Hatim, Sahība al-Djarh wa

these materials came for the most part from their books. In general, 'Abd al-Razzak’s transmission from these teachers of his seems to be reliable (see Motzki, *op. cit.*, 56 ff.). Access to the oldest compilations of legal traditions which are not limited to prophetic hadith—as ‘Abd al-Razzak’s *Musannaf* offers—opens new venues for researching both the origins of Islamic jurisprudence as well as the development of hadith in general.

(H. Motzki)

AL-ṢAN’ĀNI, DIYĀ’ AL-DĪN SHĀBĀN b. SALĪM b. ʿŪDḤMIḤ AL-ḤASĪK AL-RUMĪ, Yemenite poet and physician (1065-1145/1655-1736). His father was an Ottoman trooper from the town of Hassaka on the river Khabur [?]. P., and his mother was Yemeni by birth. Shaḥābīn was held in high esteem by his contemporaries, above all in his capacity as a panegyricist and man of letters but he was also known for his stirring sermons of exhortation. For some time, he lived by trade, but later he devoted himself to medicine and henceforth earned his livelihood out of medical practice (*tādabbaḥ*). In his fifties, he was struck by hemiplegia (*ṭālq*) which increasingly isolated him as he grew older. A poor man, he died in his home town Ṣan’ā’ī [q.v.] aged 81.

Most of Shaḥābīn’s œuvre fell into oblivion after his death, including an anthology entitled *Divān Badr Shābān*. Except for some fragments of poetry as preserved by his biographers, only two pieces from his pen have come down to us, sc. a dispute about rank (*falāḍīf*) between the poet and master-cook to Sayf al-Dawla, and an extensive didactic poem on dietetics and hygiene designed for domestic use (see *Bibi*).

(O. Kahl)

Born in Antioch before ca. 275/888 (if Ibn Abī ‘Abbās, *Divān al-Ṣanawbārī*, Beirut 1970, poem 231, v. 67 is to be taken literally), he died allegedly in Aleppo in the year 334/945. Since his chronicle is consonant with neither the *Aḥādīr* nor the *Tayīma*, very little is known about his life. He was a close friend of Kushāḥīḏī [q.v.], the poet and master-cook to Sayf al-Dawla, and eventually became his son-in-law, exchanging several verse epistles with him, as was the practice of the time (see J. E. Montgomery, *Aḥī Firās’s poetic correspondence with Abu ʿUṣayn*, in *The Occasional Papers of the School of Arabic Studies*, St. Andrews, ii [1988], 1-45). The tradition that al-Ṣanawbārī was himself a keen gardener may be aetiological, based on his fame and pre-eminence as a nature poet. As Mez, loc. cit., explains, the *lakāb* al-ṣanawbārī presumably means that either he or his father traded in pine nuts (ṣanawbārī). Al-Ṣanawbārī, however, according to Ibn ʿAṣākir, *Tādālīḥ Ta’ādāl Dimāšq*, Damascus 1329, i, 456, claimed that the name had been given to his grandfather by the caliph al-Maʾmūn [q.v.], on account of the keenness of his reasoning in disputations (?). His poems in praise of the aḥl al-bayt [q.v.] point to his ʿAbābī affiliations, but as this is not attested by any later authorities it may simply be that these poems were composed to harmonise with, or on behalf of, the ʿAbābī Handānīs [q.v.]. Among his rāzīs were Abu ʿI-Ḥasan al-ʿAdīb and Abu ʿI-Ḥasan Muhammad b. Ahmad b. Muḥammad b. ʿIssāk, in *Diwdn Badr*, Beirut 1971, poems 27-37, indicate. The *diwdn* contains the full panoply of poetic types encountered in the collections of other contemporary poets (panegyrics and vituporations [50 pieces], love poems [especially *muddakkarāt*, poems composed about boys, 80 pieces], and occasional snippets composed to order, etc.) but is justly famous for its 40 nature poems, both epigrams and ḥāṣālās [q.v.]: *rabīyyāt* (verbal poems), ẓuhāriyyāt (floral poems), raḍūriyyāt (meadow poems) and even ṭabdīlīyyāt (snow poems). Whilst al-Ṣanawbārī is heavily indebted to his poetic forebears, especially Ibn al-Muʿtazz [q.v.], he is acknowledged as the creator of the fully independent nature ḥāṣāla, doing so much for horticultural poetry as Abu Nuwās [q.v.] did for viticultural poetry. His achievement is that he not only liberated nature as a theme of the Arabic poetic répertoire, establishing it as a genre in its own right, but that he also enlarged its scope to encompass other genres, such as the ḥāṣāliyya [q.v.]. The key-note of this poetry is the striving after wonderment and effect, being very much the product of the *badd* [q.v.] style and being heavily dependent upon “phantastic” (*takhyili*) imagery, as later defined by ‘Abd al-Kahir al-Djurdjani (d. 471/1087) and became the full panoply of poetic types encountered in the collections of other contemporary poets (panegyrics and vituporations [50 pieces], love poems [especially *muddakkarāt*, poems composed about boys, 80 pieces], and occasional snippets composed to order, etc.) but is justly famous for its 40 nature poems, both epigrams and ḥāṣālās [q.v.]: *rabīyyāt* (verbal poems), ẓuhāriyyāt (floral poems), raḍūriyyāt (meadow poems) and even ṭabdīlīyyāt (snow poems). Whilst al-Ṣanawbārī is heavily indebted to his poetic forebears, especially Ibn al-Muʿtazz [q.v.], he is acknowledged as the creator of the fully independent nature ḥāṣāla, doing so much for horticultural poetry as Abu Nuwās [q.v.] did for viticultural poetry. His achievement is that he not only liberated nature as a theme of the Arabic poetic répertoire, establishing it as a genre in its own right, but that he also enlarged its scope to encompass other genres, such as the ḥāṣāliyya [q.v.]. The key-note of this poetry is the striving after wonderment and effect, being very much the product of the *badd* [q.v.] style and being heavily dependent upon “phantastic” (*takhyili*) imagery, as later defined by ‘Abd al-Kahir al-Djurdjani (d. 471/1087) [q.v. in Suppl.], imagery which involves the invention of the conventional leading to an anthropomorphisation of nature. These effects are directed at the auditor/reader’s appreciation of the poet’s display of “linguistic ingenuity ... a style in which the probable is made improbable, the familiar enigmatic, the ordinary miraculous” (S. Sperl, *Mannerism in Arabic poetry*, Cambridge 1989, 156). In modern scholarship, al-Ṣanawbārī’s nature poetry has been studied from the exclusive viewpoint of the imagination, as literary (mannerist) artifice devoid of any connection with reality. This is to overlook the nature of much of this poetry: it is not the poetic exercise of the imagination, but was presumably composed for the garden banquet-cum-*madājah* ‘when the caliph or a grandee would invite the habitués of his salon to a Sans-souci
in the gardens at the edge of town” (G.E. von Grunebaum, Aspects of Arabic urban literature, in Islamic Studies, viii [1969], 293). Hence the repeated, witty shifts in register, from the “phantastic” to the ontological, i.e. from the imaginary to the real. His influence on Andalusian poetry was such that Ibn Khašfāja [q.v.] crown the Sanawbarī of the West.

A commentary on Dhu ’It-Rumma’s Ba‘yya was also penned by al-Sanawbarī.

Sanābil, a town said to be the capital of the king in the account of the Arab traveller and littérateur Abū Dulfār Miṣ‘ar b. Muḥāṭil [q.v.] purporting to describe his participation in an embassy of the Chinese king Kālīn b. al-Shakhārīr returning from the court of the Sanāmīd amīr Naṣr b. Āḥmad (301-319/914-43 [q.v.]) at Buḫārāra.

Abū Dulfār describes it as an immense city, one day’s journey across, with walls 90 cubits high and an idol temple bigger than the sacred mosque at Jerusalem (First Risāla, Fr. tr. G. Ferrand, in Relations de voyages ... relatifs à l’Extrême Orient du VIII au XVIIe siècles, Paris 1913-14, 219-20, 221; Ger. tr. A. von Rohr-Sauer, Abū Dulfār Bericht über seine Reise nach Turkestan, China und Indien, Bonn 1939, 17, 27-30, text originally known in Yākūt, Budān, ed. Beirut, iii, 440, 444-5, cf. 275, and in al-Kazwīnī, Āḥār al-biṭāl, ed. Wiedemann, in Aufsätze zur arabischen Literatur, iii, 84-6. For primary to secondary Qalasād, mentioned in other early Muslim sources on China (the Hudūd al-‘alam, Gardżī, Marwazī), and its existence as such is dubious, given also further doubts about the historicity of this Sino-Samānid mission (see C.E. Bosworth, An alleged embassy from the Emperor of China to the Amir Naṣr b. Āḥmad: a contribution to Samānid military history, in Minovi and Afshar (eds.), Yādname-ye intīn-e Minowsky, Tehran 1969, 9-9). Marquart, Streifzüge, 84-9, idem, 58-60, sought to identify Sandībāl with Kan-chu, in Kan-su province [q.v.], which would be geographically feasible. Minowsky pointed out, Hudūd al-‘alam, comm. 222, that the name of the “large town governed from China” in the anonymous geography, tr. 85, Khābd b. Khābu, resembles in the Arabic script the S.n.dabd.1 of Abū Dulfār, especially in its last three letters, and noted that the place mentioned in the Hudūd al-‘alam’s chapter on China immediately before Khābd b. Khābu is Khāmbīt = Kan-chu. It seems impossible to take the question any further than this.

Bibliography: Given in the article.

(C.E. Bosworth)

Sandal (A., P. cânđol from Skr. cándana) is the sandal wood, coming from several unrelated trees which are mainly of Indian and Southeast Asian origin.

Both white and yellow sandalwood were, in fact, only different kinds of Santalum album L., Santalaceae. It supplies the bright, white sap-wood and the reddish heartwood. Because of its peculiar scent, probably experienced as very pleasant, it was appreciated from time immemorial and used, among other purposes, for perfumeries, and its ethereal oils against inflammations of the urinary passages. The red sandalwood, on the other hand, is the heartwood of Pterocarpus santalinus L., Leguminosae. It is totally scentless and of little value, but was popular for its beauty. It is not known how the name sandal was transferred from the white-yellow to the red wood. The Arabic authors know the same threefold distinction. Sandalwood was unknown to the Greeks. The most comprehensive account about sandal is found in al-Nu‘ayrī, Niḥayāt, xii, 39-42, tr. Wiedemann, in Aufsätze zur arabischen Wissenschaftsgeschichte, ii, 252-4, 263. The yellow, fat (al-dasīm), heavy wood, which looks as if it were painted over with saffron and is therefore also called al-zeffarānī, is accounted the best sandalwood. It has a strong fragrance and is designated as al-makāṣirī (the meaning of this nisba is not clear, cf. Dozy, Suppl., ii, 358-9). Of the white sandalwood, which is also fragrant, there exist various varieties, which incline partly to yellow, brown and red.

The use of various sandalwoods in medicine, above all of their ethereal oils, is described extensively from several sources by Ibn al-Baytār (Ǧāmī‘ī, iii, 89, 10-31 = Leclerc, no. 1418). When added to electuaries (ma‘dījūnāt), they are inter alia effective against fever and heating of the bile. If inhaled, its powder is effective against pleurisy (birṣām) and congestion (lahīb). If the electuary is applied together with rosewater as a poultice, it is effective against erysipelas (hmāra), boils of feverish gout (al-nikris al-hār) and infections of the eyelids ( alfatar).

In the Maghrib, as repeatedly stated by ‘Abd Allāh b. Sāliḥ, Ibn al-Baytār’s teacher (see Dietrich, Discoursides triomphean, iii, 31, 38, 93, and Dozy, Suppl., i, 846a), sandal indicates thyme (nammām) and the wild and cultivated mint (Tymus serpyllum L., Labiatae).

Sandal, pl. sandīḏ, the generic term for any kind of cymbal. Both al-Djawharī and al-Djawalīqī say that the word is an Arabicised one. Lane thinks that it is derived from the Persian sandīḏ or sandī and Ibn Khūrradāḏībīh (d. near the opening of the 10th century) avers that the Persians invented it (al-Maṣ‘ūdī, Marūḏī, viii, 90 = § 3214). However, the instrument was well known to the ancient Semites. We read of the sandīḏ in early Arabic literature. Al-Kuṭāmī refers to the sandīḏ al-dīnīn and Ibn Muḥīṯ [q.v.] was called the sandīḏ al-‘Arāb. The feminine form of the latter, said to express an intensive, is also to be found in the cognomen of al-ʿAlā’ī Maymūn known as the sandīḏāt al-ʿArāb and in a certain Mustarād al-sandīḏāt. Yet it is difficult to say whether the actual instrument or mere symbolism is aimed at in these instances. Further confusion is added by the fact that the word sandīḏ (< Pers. šandīḏ) was also given by some
Arabic writers to the harp, although the more general name for the latter was djank [see MICZAF].

The term sandj or sand is generally used for the cymbals in the East, although there has been more common use in the West since the Middle Ages. The instrument is played in pairs and is used to regulate the measure or rhythm in both music and dancing. That it had a definite place as a rhythmic instrument in days of old is stated by Ibn Zaylā (d. 440/1048) in his Kitāb al-Kāfī (ed. Z. Yusuf, Cairo 1964). It is to be found in several shapes and sizes. The finger cymbals used today are generally about 4.5 cm in diameter and they are usually attached to the thumb and middle finger. They are depicted by Niebuhr (i, tab. xxvi), Villoteau (pl. cc. 26), Lane (Modern Egyptians, ch. xviii), Christianowitsch (no. 36), Lavignac (1794c, 2936), and Sachsse (tab. 8, no. 36). Specimens may be found in museums, notably Brussels (no. 293) and New York (no. 383). Other names for the cymbal, according to Villoteau (980), are zīl (< Turk. zīl), kādī (probably of cup-shape form originally), and saqās (< saqāda, although probably this ought to be written sadjīda). In Syria, we have the term jākayka, and in Morocco nuswayka (dimin. of nākās) in common use, the former being a metathesis of jākayka (see below). The term sājālī (sing. sājāl) was also applied to all high-sounding clamped metal instruments, of this type. Like zīl or zīl, it is of onomatopoeic origin, the verbal root being sālā ("to sound"). There are cognates in all the Semitic languages. Saadia (d. 941) equates the Arabic root with the Hebrew κατ (kātab) and we have the Arabic musālsalītī standing for the Hebrew šērīm (cymbals) of Psalm cl. 5, in the Glossarium latino-arabicum (11th century). Small cymbals attached to a frame were also in use. This instrument was known as the ḥuqānīya or ṣaqānā (see below). It resembled a pair of metal tongs with two or three arms branching from the open ends, a small cymbal being attached to each arm. Nowadays it is called a zarī saftī ("jingling tongs"). We see it depicted in Sāsānid art, and it is mentioned by Ibn Khallīkān (tr. de Slane, iii, 491) and in the Anwār-i Ṣuhayli (ed. Z. Yusuf, Cairo 1964). It is to be found in several manuscripts, notably Brussels (no. 293) and New York (1974). At this period, however, the cymbal was called ṣafīt, and from the same root we get maṣafītā, a word which appears to denote "clappers". Labid [q.v.], the Arabic poet, places maṣafīdā in the hands of waiting women (mabīqīfā). This instrument was known as the ḥuqānīya (Villoteau, 981) says that they were called akhīgī in Egypt. Outside of Spain, where they may have been known as the kāsātīn (hence perhaps castanets), they have not been favoured.

The percussion slab known as the nābūs is dealt with separately; see NABūS.

Percussion staff. This was the kādīth, an instrument found in the hands of several of the early musicians of Islam. Its identity has long been a puzzle to both musicographers and orientalists. It was a staff which was used for rhythmic purposes either by striking it upon the ground or upon something else. Ibn Ḥadīj-al-Ḥaytami (d. 972/1565, fol. 19b) has a section entitled "Concerning beating (darb) with the kādīth upon cushions (wasāl-dī’). It recalls an incident in the "Story of the Mock Caliph" in the Aflaya wa-layā (where a cushion (mudawwara) is struck as a signal for servants to appear. But the cushion is meant, and substitutes "a circular plate of wood or metal, a gong"). We get a slight idea of the sound of the kādīth from the fact that Muhammad is said to have been averse to the tick-tack (taḥtaka) of the kādīth, and the same is said of the imām al-Shāfī‘i (al-Shālāhī, fol. 79). It is given a place in music by the Ikhwan al-Safā‘ (i, 91) and Ibn Zaylā, although later it fell into desuetude and was only to be found in the hands of the amateur and the folk. Indeed, the word maṣafītā came to mean "untrained" or "extemporised".

Bells. Ordinarily, the cup, bowl, or cone shape bell is known in Arabic as the ḥatā‘a, whilst the sphere-shaped bell is called the ḥulqul. On the other hand, ḥatā‘a also stands for a large bell (campa) and ḥulqul for an example, see Sachsse (66, tab. 8). For numbers used in military bands, see TAML-KHAN. For quite a century and a half, Turkey has been famed for the manufacture of cymbals and in the first part of the 20th century several thousands were exported from Istanbul every year. There are two other mediaeval names for the cymbal which are worth recording, viz. saffākātān and maṣafītā. The former occurs in the Kitāb al-Aghānī (v, 75), and Ibn Ḥadīj-al-Ḥaytami (Berlin ms. 5517, fol. 19b) likens it to the sandj (cymbal). Maṣafītā and maṣafīkā equate with cymbalum in the Glossarium latino-arabicum and the Vocabulary in Arabic (12th-13th century).
for a small bell (tintinnabulum), the probable reason being that the first-mentioned form was generally found in the small instrument whilst the second-mentioned form was generally found in the small instrument. Bells were used on the necks of animals in pre-Islamic days, and there is a tradition that Muhammad was averse to the sound of the caravan bells so that the fiction arose that ‘‘angels will not associate with a company where there is a āyāras’’ (e.g. Muslim, Libās, trad. 103). A collection of these bells, such as on a board or on a chain or rope, is known as a tabla. The term was probably borrowed from the Hebrew tabla which, in turn, had its origin in the Greek tάβλα, because these bells were generally attached to a tablet of wood. There is a specimen of a tabla at New York (no. 2659), the largest bell being 10 x 5.8 cm. Bells were also used to increase the din of battle so as to affright the enemy, as we are told by Ibn Zayla, and in the story of Gharīb and his brother ‘‘Ajīb in the Alf layla wa-layla (iii, 294) we read of the canoes and mutes in battle being furnished with large bells (adjrās), small bells (djuldjil), as well as jingles (kalīkīl). According to Cervantes, the Moors of Spain did not tolerate their use as martial instruments.

The small bell (djuldjil), sometimes called a pellet bell, was spherical. Like sātāl, dādbād, etc., the word is of onomatopoetic origin. Al-Khaṭīb (d in probably in 175/791) likened the sound of the small cymbals (sanaq) hanging in the rim of the tambourine (daff) to that of the small bells (djuldjil; see Khāwarizmi, Máfatih al-ṭalām, 236). Indeed, these small bells were sometimes attached to tambourines [see DUFF]. Al-Muzarritt (6th century A.D.) speaks of small (tambourine) bells (djuldjil) replying to the wind instruments (masāmīr; see the Máfatadhalsayyā, i, 165). These djuldjil were also attached to the necks of smaller animals in the form of a tabla, and in Manālīk times they were fastened to the hats of criminals (al-Makrizī, Sulakī, v, 126). They also formed part of the impedimenta of itinerant minstrels, who likewise wore them on their hats (J.S. Buckingham, Travels, i, 100), as did the fools in Talmudic Jewry (Jastrow, Dict. Targ., 518). In Persia, the large bell is called a zang or darād and the small bell a sanga or sangulīa. In Turkey they are the láng and čengrek respectively.

An elaborate type of chimes was known to the Arabs, who borrowed the idea from the Greeks. It is described in a treatise by one Muristus who, in his Travels, i, 100), the beating with reeds (akldm) under (‘‘instrument of slabs of wood’’). It comprised 35 slabs, each giving a particular note.

Bibliography: See that to tabl, and add Sachsse, in ZDPV (1927); La Borde, Essai sur la musique ancienne et moderne, 1870.

(H. G. Farmer)

SANDJA, the name of a small, right-bank affluent of the upper Uprates and of a small town on it, both coming in modern times within the northern part of Diyar Mudar (q.v.). The Sandja river runs into the Uprates between Sumaysāt and Ka‘al al-Rūm (q.v.). It was famed for its bridge, said by the Arabic geographers to have been composed of a single arch of 200 paces’ length constructed from dressed stone, and to have been one of the wonders of the world (cf. Yākūt, Balad, iii, 264-5). It was here and at nearby Baddāyā that the Artilkī Numāgīn al-Dīn II Ghāzī crossed in 513/1119 on his campaign at Tell Bashir against the Franks from the County of Antioch (see Cahan, La Syrie du Nord, 283 ff., and MARJ DĀRĪK.

Bibliography: Le Strange, Palestine under the Moslems, 331; idem, Landi, 123-4; Cl. Cahan, La Syrie du Nord à l’époque des Croisades, Paris 1940, 127, 295-6; J. Tischler, Kleinasiatische Hydronymie, Wiesbaden 1977, 156.

(S. E. Bowra)}
weapon or pointed object in the body of an enemy or in the ground (cf. Sâmi Bey, Kâmûr-i Türkî). The form sanjak found in Çaghâtay (Boudagov) and even in an old Serbian loanword (Miklosich, Die türkischen Elemente in den südost-europäischen Sprachen, Vienna 1884, ii, 50) corresponds to the verb sanâ of the Orkhoén inscriptions (see Thomsen, 42; Radloff, 132). Cf. also F.W.K. Müller, Ugarica, ii, 78, 30 and 86, 48. In Kirghiz the form used is şanğẖ (Radloff, Wörterbuch, iv, 949), and in Urantshâg şançirk and şançik (Kâtanov, Othmanli). We may add on the authority of Radloff, and the Turkish-Arabic glossary published by Houtsma, Leiden 1894, ii, 50) corresponds to the verb sanâ of the Ottoman Turkish-Arabic glossary published by Houtsma, Leiden 1894, 80, and 29 of the Arabic text, the proper name Sandjar [q. v.]. glossed safân, in preference to the usually accepted etymology from Sandjar, the name of his place of birth (see Recueil des historiens des Croisades, i, 1872, and index under Sinjar).

Sanjak has passed into a certain number of other languages; more recently into the Balkan languages (cf. the work by Miklosich quoted above and Sâmeanu, Influenta orientala, and earlier into Arabic (cf. Dozy, Supplement, and W. Marçais, Le dictionnaire arabe de Tlemcen, Paris 1902, 270, 90, 92), and into Persian where, according to the Burhân-i kâbî (see Hind-oghlu s.v. "pointe" and Dozy s.v. "pointe") or were they always flags? Sometimes (135-6) it is the besieged themselves who, ready to surrender and no doubt seeing in this banner a guarantee of protection against pillaging, asked for a sanjak to be sent. It is not, however, necessary that the sultan himself should be present and the historian (357) notes: "the Beylerbeyi setting out on an expedition with the standard of the sovereign.

For a long time the neighbouring princes and vassals of the Saljuqs respected their privilege, but the Atabeg of Mawşil, Sayf al-Din al-Ghâzi, son of İmâd al-Din Zângî (d. November 1149), was the first of the asâhîl al-alâmîl to have a sanjak carried unfurled over his head (Ibn al-Athîr, Hist. des Atabeks de Morsouf, in RHC, Hist. s. r., ii, 167). The Ayûbîds followed the example of their predecessors. In 594/1198 the sultan of Egypt, al-Malîk al-ʾAzîz, conferred on his nephew al-Malîk al-Muʿazzâm ʾIsâ, when he became prince of Damascus, "the sanjak and the tiqāât to display throughout the world" (Kitâb al-Raṣâdatayn, in RHC, v, 117). In 648/1250 Aybâk, the Turkmân, married to an Ayûbîd princess and proclaimed sultan of Egypt, took part in the setting out of Turkish forces, and unfurled the sanjak banner in front of him (al-sanâjkî al-salûtânîya, see Abu l-Fīdâî, Annales, ed. Reiske, iv, 516 of the Arabic text and 515 of the Latin tr.). Among the Mamlûks, a distinction was made between the sanâjkârîs "royal standard-bearer" and the ordinary ʿâlamâr (M. Gaudefroy-Demombynes, La Syrie à l’époque des Mamelouks, Paris 1923, p. xcvi); afterwards, in Turkish Algeria this distinction disappeared; see J. Deny, in Mélanges René Gueidan, 1, 153-162, p. 35. According to one later Ottoman tradition, not to be taken literally but nevertheless attesting to the significance of the sanjak/banner as a political symbol, at the end of the Saljûq empire in Asia Minor the sanjak became one of the insignia of investiture of new sovereigns, notably of the first Othmânîl sultan. In 679/1280, after the capture of Karadja Hisâr by Othmân, Sultan ʿAlâ al-Dîn II to celebrate this conquest sent him by the hands of Ak Timûr, "Othmân’s nephew, a grandson of his ancestors" (sandjak-yaraghi), as ʿAshîk Pasha-zâde tells us (ed. Constantinople 1332, 8-9); Neshî prefers another version (see Noldike, in ZDMG, xiii [1859], 207-9). ʿAshîk Pasha-zâde mentions in this connection that Othmân thus became sanjak beyî, and we know that it was from this time that the khatûn was read in his name (for the first
time at Karadja Hisar by Dursun Fakih). According to the same authority, the sandjaks were made of cloth produced in Philadelphia or Ala Shehir (56).

When they became independent, the Ottoman rulers appointed sandjak beyis in larger and larger numbers and the sandjak, somewhat diminished in splendour, became identified with the territory over which it waved, not as a symbol of independence but of political authority deputised by the ruler; it appears henceforth as the term for a political/administrative division. The original patrimony around Bursa remained the Ottoman bey’s [q.v.] domain; it was added by conquest, such as Karasi [q.v.] and Izmir [q.v. in Suppl.] in Anatolia or on the frontier zone in Thrace were entrusted, as newly created sandjaks, to other members of the House of Othman or to the commanders leading the conquest. In time, each of the smaller Anatolian principalities incorporated into the Ottoman state, and the successive frontier conquests in the Balkans, constituted a separate sandjak as a territory of (but sometimes as well as) cavalry troops encompassed an area of several thousand km² and a population of perhaps 100,000 on average. Usually reflecting pre-Ottoman administrative divisions and geographical realities, sandjak size and boundaries remained fairly stable through the centuries; provinces in modern Turkey, especially in western and northern Anatolia, are very similar to 15th-century sandjak divisions.

At least until the mid-16th century, sandjak maintained two distinct but eventually merging senses, military command and a provincial district: in the sense of command of a body of troops there were, in addition to the sandjak beyi of a district, sandjak beyis of Anatolian auxiliary troops, müsiyem (cavalry) and yapa (infantry). Even the sandjak beyis proper, i.e. of a district, were sometimes referred to as atal sandjak beyis, i.e. cavalry commander, in their primary role as the commander of all the dirlik-holders, i.e. those officers and cavalrymen whose living was maintained by revenue-grants in a particular district. The sandjak beyi was required to maintain his own military retinue supported by the official küiş [q.v.] revenues allocated to him, the number of his retinue being commensurate with the size of his küiş. In time of mobilisation, the sandjak beyi led his own household and the troops of his district to join the campaign, sometimes entrusted with distinct military tasks such as reconnaissance and advance or rear guard, otherwise marching into battle under the command of the beylerbeyi [q.v.] of the province. The maritime sandjak, most of them included in the kapudan pasha’s [q.v.] province of Diyaζa-rîr-Bahr-i Sinif [q.v.; literally, Aegean Islands, but also including mainland Anatolian and Grecian districts] supplied ships for naval campaigns instead of (but sometimes as well as) cavalry troops.

Eventually, the sense of district for sandjak (also lioa2, especially in documents) and district-governor for sandjak beyi (also mír lioa2) came to predominate. Sandjak can be considered the main administrative division in the Ottoman empire in various senses. For one thing, in lesser dirlik the area supplying the dirlik-holder’s income was co-extensive with the limits of his authority. For higher level officers, the dirlik, küiş, was normally wholly included within the territory, but the territory governed was much larger than the küiş. A sandjak beyi usually derived his küiş income from the main towns of his district, the percentage of urban vs. rural taxes constituting his küiş varying according to the level of town development and commercial taxes in each district; the rest of the sandjak might support a dozen or so officers’ dirlik (zeβâmet) and a few hundred timars for cavalrymen (sipâhî [see sipâhi, 1]). In other words, it is at the sandjak level that the administrative system was more clearly revenue source. The governor-general (beylerbeyi) was also the sandjak beyi of the chief district of his province. The primary administrative role of the sandjak is underscored by the fact that provincial area regulations (kânân-nâmé [q.v.]) as well as land and population surveys (tablâr) were drawn up for each sandjak.

In 1527, after the great conquests of Selim I but before Hungary and eastern Anatolia were fully integrated in the realm, there were 97 sandjaks in seven provinces, as well as 17 Kurdish sandjaks of special status (Topkapı Palace Archives, D. 5246). Later in the 16th century some larger districts e.g. Bosna [q.v.], were reconstituted as provinces; there was also expansion both in the north-west and in the east; the result is that the number of provinces and districts increased to about 35 and more than 300 respectively. Especially in frontier regions, the tendency was to create smaller provinces with just a few districts; the aim seems to have been to concentrate a larger number of higher-ranking officials in sensitive areas.

Identified very closely with the command of his district’s troops, the position of the sandjak beyi eroded as the military value of provincial cavalry declined in the 17th century. There was a relative centralisation of provincial authority at the province level in the hands of the governor-general, who very often came to depend on local notables for routine administration rather than through sandjak beyis. This process is already discerned at the end of the 16th century by the restyling of provinces as eyalets rather than beylerbeylikti. Nevertheless, both the dirlik-holding provincial cavalry and the sandjak beyi survived a long time after, though in reduced circumstances. When the dirlik were finally abolished in 1837 the sandjak became simply an administrative subdivision. The mutasarrif, the governor of a sandjak (or lioa2) or now also mutasarrifštî (chef du district, lieu de la commune) was henceforth a civil official, distinct from the mîr lioa2 who now became the modern general of the brigade. The division into sandjaks was maintained by the 1864 and 1871 laws of the vilâyets (the former eyalets). The term was finally abolished in provincial administration by the Ankara Grand National Assembly in the 1921 Constitution.

Baykara, Anadolu’nun tarihî vakfiyesi, Ankara 1954, numerous studies of individual Anatolian and European sandjaks have appeared. (J. Deny-[M. Kurt])
kept in the palace of Topkapı at Istanbul (see Topkapı Saray) together with the other holy relics of Islam (Emam-i Mabarek or Mabadek) such as the Holy Mantle (see SARAY) and the Footstep and Beard of the Prophet (see KADAM SHARIF and LIHVA-YI SHARIF).

According to a tradition recorded by Mouradaga D’Ohsson (Tableau général de l’Empire Ottoman, Paris 1788-1824, ii, 378) and the Ottoman historian Fındıklı Mehmed Ağa (Şihâb-ü Tarâhi, ed. Ahm. ed Refik [Alanya], Istanbul 1928, i, 14), this is the black banner known as Ubak used among other standards in the battles against Karamanli. It was used as a door curtain by Sâğıla as well. Ali carried it at the occasion of the departure of such sayyids led by the Ali Vizier went in a ceremonial procession to the imperial palace so that it could be kept together with the other relics of the Topkapi Palace (in the palace of Topkapi at Istanbul [see Topkapı Saray]!) together with the other holy relics of Islam (Emam-i Mabarek or Mabadek) such as the Holy Mantle (see SARAY) and the Footstep and Beard of the Prophet (see KADAM SHARIF and LIHVA-YI SHARIF).

When the Kapudan Paşa put out to sea, he offered a ceremonial salute to the Sandjak-i Sherif, exhibited for the occasion in the arsenal (Tersâne-yi Âmire [see TERSANE]) in the presence of the Grand Vizier. The sacred standard was also brought forward in times of rebellion. An exceptional occasion was M ustafa Paşa Bayrakdâr’s [q.v.] planting it in front of his troops entering the capital to depose Sultan Mustafa IV [q.v.] on 4 Bu ram 1223/28 July 1808 (General State Archives The Hague (ARA), Van Dedem Papers 2.21.049-61).

Six Grand Viziers were killed in action while the sacred standard was with them, including Kha dîm Sinân Paşa on 29 Dhu ’l-Hijja 922/1517 while defending the person of the sultan against rebel soldiery, and Şehîd Ali Paşa on 16 Sha‘bân 1128/1715 with the sacred standard in his hands in the Battle of Grosswardein/Nagyvarad, leading the counter attack against the imperial army. Count Marsi gh, describing the various banners and standards in use of the Ottoman army, mentions the standard of the Prophet. He never saw it deployed either in camp or on the march. He concludes from the event that the Ottomans were always successful in saving the sacred standard from falling into the hands of the enemy in their many defeats during the war in Hungary (1683-99) because it was always heavily escorted. After the disastrous battle of Salankamen (24 Dhu ’l-Ka‘da 1102/19 August 1691), the escort was richly rewarded for bringing it safely back home. According to the story, a miracle happened which made the banner invisible when passing through the enemy cavalry. (L.F. Marsigl, Stato militare dell’Imperio Ottomano, The Hague 1732, repr. Graz 1972, ii, 51-2).

By the end of the 11th/17th century the sacred standard was badly worn. The original black banner was replaced by three green silk banners, to each of which were attached pieces of the Sandjak-i Sherif, thus transferring its blessed powers to the new standards. One of these was handed to the outgoing commanders-in-chief, one the sultan kept with his own person when travelling outside the capital and one was permanently kept in the treasury of the Topkapı Palace. One of the banners was decorated with three green silk stripes, which conferred the most lasting respect in which the sacred standard was held by the Ottomans is exemplified by the traditional view that all men between seven and seventy years of age were obliged to join the dîjâhêd [q.v.] when the standard was brought forward. The place in front of the throne room in the Topkapı Palace where it used to be planted was held to be sacrosanct and not to be trodden by anyone’s feet. Till 1908, two soldiers with fixed bayonets stood on guard there.

The handling of the sacred standard was regulated. Texts of such regulations (kâmamûn-nâmê) of different periods are extant. When Sultan Mahmûd II [q.v.] ordered the destruction of the Janissaries (see veştî çeri) on 9 Dhu ’l-Ka‘da 1241/15 June 1826, the loyal “people of Muhammad” were called to gather around the sacred standard, which stood planted upon the minbar of the mosque of Sultan Ahmed I. The last time the Sandjak-i Sherif was deployed was on 25 Dhu ’l-Hijja 1287/11 November 1968 with the proclamation of the so-called “Holy War” (Dîjâhêd-i Ekber) against the Entente Powers.

**SANDJAR b. Malik Şûhân**

Abdul-Dawla Abd al-Dawla Abu-Tâhir Ahmad, Saldjûk malik in Khurāsân 490-511/1097-1118 and then supreme sultan of the Great Saldjûks, ruling Khurāsân and northern Persia till his death in 552/1157; he accordingly ruled for some 60 years. The name Sandjar, which occurs for other members of the Saldjûk family and elsewhere in the Turkish world, seems to mean in Turkish “he who pierces, thrusts”, cf. M. Th. Houtsma, Oeuvres posthumes, Pelliot, in Leiden 1894, text 29, glossary 78, 80, and the detailed discussion by P. Pelliot, in Oeuvres posthumes, ii, Paris 1949, 176-80; a contemporary European rendering is given by Otto of Freising in his chronicle, sub anno 1145: Samar- dos/Samiardos fratres.

He was born in either Radjab 477/November 1084 or Radjab 479/November 1086, his mother being one of Malik Shâh’s concubines. Whilst still a boy, he was in 490/1097 appointed by his half-brother Berk-yaruk [q.v.] as governor of Khurāsân after the unsuccessful revolt there and death of Arslan Arghun b. Alp Arslan. During the internecine struggles over the supreme sultanate between Berk-yaruk and Muslimmad b. Malik Shâh [q.v.], Sandjar generally took the side of his full brother Muslimmad, but from the constitutional aspect regarded himself as governor only of the eastern provinces and as subordinate to the supreme sultan in the western lands, calling himself on his coins of this time merely a malik and acknowledging Berk-yaruk and then Muhammad as al-Sultân al-Ma’âzam.

However, when Muslimmad died in 511/1118, Sandjar refused to consider himself subordinate to his nephew in the west, Muslimmad b. Muslimmad [q.v.], and as the senior member of the Saldjûk family, both his de facto power and his position under Turkish tribal custom gave him a claim to the supreme sultanate even though this had previously been held, for eighty years, by the Saldjûk who controlled western Persia and ‘Irâq. The squabbling sons of Muslimmad. Malik Shâh were too divided and militarily weak to dispute Sandjar’s position, and they had generally to place Sandjar’s name plus his title of al-saḻûn al-‘aţma on their coins before their own names and titles. The only serious opposition at the outset to Sandjar’s claims here came from Mahmûd, but in 513/1119 Sandjar marched westwards with a powerful army, whose commanders included, besides the sultan himself, four vassal kings, defeated Mahmûd at Sawa [q.v.] in northern Djibâl and marched onwards to Baghdad. When peace was made, Mahmûd agreed to Sandjar’s supremacy and was made the latter’s heir (in the event, he died long before Sandjar did), but had to relinquish to Sandjar the Caspian provinces of Mazandaran and Kûmûs and the town of Rayy, the key point for control of northern Persia, and to agree to the re-appointment of Sandjar’s shirvan or military governor in Baghdâd. It was during these years that Sandjar was again concerned with the Ismâ’îlîs of northern Persia and Khurâsân; in 497/1104, when he was malik, he had sent an expedition against these sectarians in Tabâs, and now in 520/1126 his viceroy Mu’in al-din Mâjkûs al-Mâhkûmî in Kuhistan (and also Ismâ’îlîs doubtless contributed to his death by assassination in the following year). In the 1140s, however, Sandjar and the Ismâ’îlî leaders who had succeeded to Hasan-i Sâbbâh [q.v.] came to some sort of modus vivendi.

On Mahmûd’s death in 525/1131, his brothers Masûd, Toghîrîl (II) and Saldjûk Shâh successfully disputed the succession of Mahmûd’s young son Ahsân b. Ahsân, but were unable to agree amongst themselves as to who should be sultan. They laid the question before Sandjar, as senior member of the dynasty. Sandjar’s favoured candidate was Toghîrîl, but his preoccupation with events in Transoxania at this time (see below) prevented him from providing Toghîrîl with much military support, and the latter died anyway in 529/1134, allowing Masûd to succeed in the west and to reign there for twenty years. Sandjar’s last major intervention in the eastern provinces and as subordinate to the supreme sultanate between Berk-yaruk and Muslimmad b. Malik Shâh [q.v.], Sandjar generally took the side of his full brother Muslimmad, but from the constitutional aspect regarded himself as governor only of the eastern provinces and as subordinate to the supreme sultan in the western lands, calling himself on his coins of this time merely a malik and acknowledging Berk-yaruk and then Muhammad as al-Sultân al-Ma’âzam.

However, when Muslimmad died in 511/1118, Sandjar refused to consider himself subordinate to his nephew in the west, Muslimmad b. Muslimmad [q.v.], and as the senior member of the Saldjûk family, both his de facto power and his position under Turkish tribal custom gave him a claim to the supreme sultanate even though this had previously been held, for eighty years, by the Saldjûk who controlled western Persia and ‘Irâq. The squabbling sons of Muslimmad. Malik Shâh were too divided and militarily weak to dispute Sandjar’s position, and they had generally to place Sandjar’s name plus his title of al-saḻûn al-‘aţma on their coins before their own names and titles. The only serious opposition at the outset to Sandjar’s claims here came from Mahmûd, but in 513/1119 Sandjar marched westwards with a powerful army, whose commanders included, besides the sultan himself, four vassal kings, defeated Mahmûd at Sawa [q.v.] in northern Djibâl and marched onwards to Baghdad. When peace was made, Mahmûd agreed to Sandjar’s supremacy and was made the latter’s heir (in the event, he died long before Sandjar did), but had to relinquish to Sandjar the Caspian provinces of Mazandaran and Kûmûs and the town of Rayy, the key point for control of northern Persia, and to agree to the re-appointment of Sandjar’s shirvan or military governor in Baghdâd. It was during these years that Sandjar was again concerned with the Ismâ’îlîs of
Şah Atsiz, came with their forces to Ghazna, expelling Bahram Şah to India before he returned and agreed to resume his vassalage. The northern fringes of Khurāsān, Sandjar had as vassals, in addition to the Karakhānids, the Khārazm Şahs of the line established by his father Malik Şah, sc. the line of Anūqūtūn Ḡarāčaī [see Khārażm-şahs]. The second ruler of this line, Kūb al-Dīn Muhammad, was Sandjar's faithful vassal, as was initially his son and successor ʿAlāʾ al-Dīn Atsiz, attending Sandjar's court regularly. But relations deteriorated as Atsiz built up his own military strength and began to identify himself with the particular interests of his province, until in 533/1141 he rebelled openly. Sandjar invaded Khārazm, drove out Atsiz and left there a Saldjuk prince and his atabeg; but as on earlier occasions when outside powers had endeavoured to impose their rule over the province, the Khārazmian people rose up against the occupiers and expelled them, enabling Atsiz to return and take the offensive against Transoxiana.

There now appeared a new force in the affairs of Central Asia, the Kara Khiyāt [q.v.], the Kʿi-tan or Liao of the Chinese sources. Within the western Karakhānīd principality, disaffected Karluķ [q.v.] tribesmen called in the Kara Khiyāt; Mahmūd Khān of Samarkand in turn appealed to his suzerain and kinsman Sandjar. The latter appeared in Transoxania with a large army, but was in 536/1141 defeated by the Kara Khiyāt in a bloody battle on the Katwān steppe of ʿUshrāsān [q.v.], on the middle Sīr Darya. Sandjar and Mahmūd Khān fled to Khurāsān, abandoning Transoxania, and the Kara Khiyāt went on to make Atsiz their own vassal; accordingly, whilst Sandjar's defeat was clearly opportune for Atsiz, it seems improbable that the Şah had, as some of the Islamic sources assert, incited the Kara Khiyāt to invade as an act of revenge on Sandjar for the Sultan's killing of his son Atliḡ. At this point, Atsiz raided into Khurāsān himself, but was driven back by a Saldjuk counter-invasion of Khārazm which penetrated to the capital Gurgāndj and compelled the Şah to disgorge his armies and retreat to a more defensible position. Sandjar's court, when he was not campaigning, was normally based on Marw, where he also had a fully-developed administration, headed by the diwan-i aʿlā, presided over by a series of viziers, of whom eight are known, from Shihāb al-Islam ʿAbd al-Razzāk (511-16/1117-22) to Nīzām al-Mulk Ḥasan (at some point after 547/1152). These were usually Persians or Arabs, though from 516/1122 to 518/1124 Sandjar had a Turkish vizier, Muhammad b. Sulaymān Kaghārgī Yīghan (or Toghān) Beg. We know something also of provincial administration within Sandjar's dominions, inter alia from the collection of administrative documents, the Ṭabat al-kataba, made by Muntadāb al-Dīn Bādī Djuwaynī, who was head of Sandjar's chancery, diwan-i inšahā, at Marw. This administration was exercised through centrally appointed officials with designations like wāli, nāʾīb, shībna and raʾis, although this last had an additional role as representative of the urban notables vis-à-vis the sultan [see RAʾIS].

The court at Marw was also a centre for Persian literary activity, under the patronage of the Sultan and Turkmens. These arrangements now came under severe strain because of the financial exigencies arising from Sandjar's military adventures, increasingly expensive after 529/1135; he is said to have disbursed three million dinārs for the Transoxanian campaign of 536/1141, not counting the cost of presents and robes of honour given to various local potentates. The burden of taxation in order to pay for these fell on sedentaries and nomads alike, but the Oghuz in the upper Oxus regions of Khuttal and Tūkhrāsān [q.v.] finally rebelled against the tax demands and the harsh collecting methods of the shībna over the Turkmens there, the most notable commander ʿĪmād al-Dīn Ḥumāz b. Bālḵ. Despite placatory approaches from the Oghuz, Sandjar insisted on mounting punitive expeditions against them, but he was twice defeated, forced to evacuate his capital Marw and finally captured by the nomads (548/1153). The Oghuz bands swept through Khurāsān, attacking towns there and showing particular violence and hostility towards members of the Saldjuk administration and the religious orders of the peninsula closely linked to it. In consequence, there was a general climate of insecurity created in both towns and countryside of Khurāsān, in which various other anti-social elements such as the syyārīs [q.v.] took advantage of the breakdown of authority to further their own interests.

The leaderless Saldjuk army in Khurāsān offered the throne there to the refugee Karakhānīd Mahmūd Khan who, as the son of Sandjar's sister, had Saldjuk blood in his veins, and the Saldjuk sultan in the west, Muhammad (II) b. Mahmūd [q.v.], agreed to this and sent an investiture diploma. In fact, over the next few years, real power in Khurāsān fell into the hands of Saldjuk amirs, such as Muʿayyid al-Dīn Ay Aba at Nīghāpur and Ġhiyār al-Dīn Ay Ţak at Rayy, for Mahmūd Khān was never able to establish firm control over the whole of Khurāsān; and he died in any case by 551/1156. Sandjar, meanwhile, was carried round by his Oghuz captors for three years, apparently in humiliating circumstances and enduring hunger and deprivation, until he managed in 551/1156 to escape to Tirmidj and Marw. But a year later he died, aged 71, and with him, the authority of the Saldjuk in eastern Persia ceased; to contemporaries it seemed like the end of an epoch. Sandjar's court, when he was not campaigning, was normally based on Marw, where he also had a fully-developed administration, headed by the diwan-i aʿlā, presided over by a series of viziers, of whom eight are known, from Shihāb al-Islam ʿAbd al-Razzāk (511-16/1117-22) to Nīzām al-Mulk Ḥasan (at some point after 547/1152). These were usually Persians or Arabs, though from 516/1122 to 518/1124 Sandjar had a Turkish vizier, Muhammad b. Sulaymān Kaghārgi Yīghan (or Toghān) Beg. We know something also of provincial administration within Sandjar's dominions, inter alia from the collection of administrative documents, the Ṭabat al-kataba, made by Muntadāb al-Dīn Bādī Djuwaynī, who was head of Sandjar's chancery, diwan-i inšahā, at Marw. This administration was exercised through centrally appointed officials with designations like wāli, nāʾīb, shībna and raʾis, although this last had an additional role as representative of the urban notables vis-à-vis the sultan [see RAʾIS].

resultant downfall of Saldjuk power in the east came apparently of provincial administration within Sandjar's dominions, inter alia from the collection of administrative documents, the Ṭabat al-kataba, made by Muntadāb al-Dīn Bādī Djuwaynī, who was head of Sandjar's chancery, diwan-i inšahā, at Marw. This administration was exercised through centrally appointed officials with designations like wāli, nāʾīb, shībna and raʾis, although this last had an additional role as representative of the urban notables vis-à-vis the sultan [see RAʾIS].

However, the tragic end to Sandjar's reign and the resultant downfall of Saldjuk power in the east came apparently of provincial administration within Sandjar's dominions, inter alia from the collection of administrative documents, the Ṭabat al-kataba, made by Muntadāb al-Dīn Bādī Djuwaynī, who was head of Sandjar's chancery, diwan-i inšahā, at Marw. of his great officials and commanders. Barthold's categorical assertion that Sandjar was illiterate (Turkestan, 308) requires further proof before this can be accepted since we know that some at least of his kinmen and contemporaries amongst the western Persian Saljūqs were highly literate. The Persian poet Muʿizzī (d. ca. 519/21-1125-7 [q.v.]) was Sandjar's chief eulogist during the earlier part of his reign, and it is to seek Muʿizzī's intermediacy that the anecdote Nizāmī ṣAṭrūḏī Samarkandī [q.v.] came to Sandjar's court when it was at Tūs in 510/1116-17. Also, Abū ʿAbd Allāh Ṣābirī [q.v.] served both as Sandjar's panegyrist and as a minor official, and it was in this latter function that the poet was killed by the Khūārazm Shāh Atsiz (in the mid-1140s). The great theologian al-Ghazzālī [q.v.] sent a letter to, and made a speech before, Sandjar (see Maktābāt fārsī-yi Ghazzālī bi-nām-i Faddāl al-anām min raʾīšī Ḥudhūk al-Islām, ed. ʿAbbās Ἱbīl, Tehran 1333/1954, 3-5, 6-10 (with interesting introd. by the original compiler), German tr. Dorothea Haas, in *Briefe und Reden des Abu Hāmid al-Ghazzālī*, Friburg-im-Br. 1971, 63-76.

Horst, *Die Staatsverwaltung der Grossvölker in Iran*, (1950-1221), Wiesbaden 1959 (Eng. tr. de Slane, i, 240-250). It is unknown when Islam penetrated Cham society, but this was probably at the end of the 15th century. Yet it has always remained a minority faith, and one varying a great deal from the fundamental norms [see further £AM].

**SANF** a geographical term appearing in the accounts of travel in the mid-8th-9th century and denoting at times an island, at others a kingdom of the mainland, bordering on the sea, or a sea. Study of these itineraries makes it clear that they refer to Campā or Champa situated between Cambodia and the delta of the Song Coi in Viet Nam. The information given by these authors is very laconic, and, curiously, the 13th and 14th-century texts are much less well documented than the earliest ones. There is practically nothing on the people there, sometimes described as being brown, nor on the political situation, except that Ibn al-Nadīm [q.v.] (end of the 10th century) speaks of a victorious war by the Viêt Nam which ravaged the land. All accounts stress the production there of aloes wood, considered as excellent, except for Yakūt in his Muṣqām al-balūd (end of the 12th-opening of the 13th century), who considered this product as the worst possible. Al-Idrīsī (12th century) is the fullest, speaking of stock-rearing (bovines and buffaloes) and agriculture (rice, sugar cane, coconut palms and bananas). He describes Hindu-type customs (respect for cows), whereas Ibn al-Nadīm merely mentions Buddhist temples, which can only have been rare at his time. These texts also contain tall stories, such as that in the Mukhtasar al-ʿagārīḥ (beginning of the 11th century) on the legend of the island of the White Palace, made of crystal, which Alexander the Great allegedly visited.

Sanf seems to have been a stage much frequented by Muslim merchants travelling between the Indian Ocean and the China Seas. Better known under its Sanskrit name of Cempā, the plains around the deltas were inhabited by populations of controversial origin but who belonged to the Austronesian linguistic family. In the mountains, proto-Indo-Chinese tribes (Sedang, Bahnar, Jorai, Rahdè, etc.), speaking Austronesian or Môn-Khmer languages, were more or less in a vassal status.

The ancient Cham seem to have been organised in principalities which were at first independent, stretched along between the Hoa ho’n and the Phan-rang region. The first to appear in history was the most northerly one, founded in A.D. 192 and known under the Chinese name of Linỳì. Before the beginning of the 7th century, all these principalities must have been brought together. Cempā had a very lively history. The Čam were excellent warriors and remarkable sailors, willingly turning to piracy. The land was torn apart by frequent revolts and succession wars. As an agressive neighbour, it often fought with Cambodia, occupied Angkor 1177-81, but became a Khmer province 1202-20. During 1283-5, it successfully repelled a Mongol invasion. But the main enemy was Viêt Nam. Having the advantage until the 10th century, it then fell behind, alternately suffering defeats and making counter-attacks. The king Bong Nga (1360-90) invaded the delta of the Song Coi three times. After him, decadence set in. In 1471 the Viêtnamese emperor Lê Thanh Tông crushed the kingdom, which became a vassal state, gradually nibbled away and progressively depopulated. There remained only a few enclaves and a shadow of former royalty. In 1832, the last king and part of the population took refuge in Cambodia.

Inspired by Indian culture, the Cham created a brilliant and varied civilisation whose architectural remains, for long neglected, are now being restored. Society was in origin matrilineal organically, and it adopted the Hindu system of castes and customs. At the present time, there remain few Cham in Viêt Nam, most of them preserving an impoverished form of Brahmanic rites.

The presence of colonies of Muslim merchants is known from the middle of the 10th century, and a Muslim even led two embassies to China in 958 and 960 (see Hūdūd al-ʿilām, tr. Minorovsky, tr. 86, comm. 240). It is unknown when Islam penetrated Cham society, but this was probably at the end of the 15th century. Yet it has always remained a minority faith, and one varying a great deal from the fundamental norms [see further £AM].

SANHADJA, an important group of Berber tribes who played an historical role in North Africa from the 4th/10th century onwards. They lived in the two Maghrib and in Ifrikiya; some were sedentary, whilst others had moved into the desert and become nomadic. According to the Berber genealogists, the Sanhadja were one of the seven great tribes descended from Bernès, son of Berr. On the other hand, for the Arab genealogists, like Ibn al-Kalbî, they had, in common with the Kutâma or Ketâma, a Yemeni origin, and had allegedly been sent to the Maghrib by Idrîsî, one of the kings of Yemen.

The whole history of the Sanhadja was dominated by their opposition to another great group of Berber tribes, the Zanâta, in particular, to the Mîknaâa, Maghrawâa [q.v.] and the Banû İfrîn [q.v.]. According to Ibn Khalîdûn, the Sanhadja had almost 70 branches, one of the most important being the Talkâta who occupied part of the central Maghrib. The two Sanhadja kingdoms, descendants of Zîrî b. Manâd, one of whose sons Zirî was the ancestor of the Zirid dynasty [q.v.] and the founder of their capital, Ashîrî, in the Qâqalât Titterî (324/935). As partisans of the Fâtimids, this branch of the Sanhadja had adopted Shî'ism (they were later, however, to return to Sunnism), and when the Fâtimid caliph al-Mu'izzî [q.v.] left for Egypt (361/972), he entrusted the government of Ifrikiya to the Zirids. Since then they became practically independent, the Zirids ruled in Ifrikiya and the eastern part of the central Maghrib until the opening of the 12th century A.D. (498/1105). Their break with the Fâtimids in Cairo provoked the unleashing against Ifrikiya by the Fâtimids of the Banû Hîlîl [q.v.] Arabs, who devastated the land. Another Sanhadja kingdom had seen the light in the central Maghrib, a grandson of Zîrî b. Manâd, Hammad b. Babugîn, after having built the Kafît Bani Hammad [q.v. and Hammadîns], separated from his Zirid cousins. In order to get away from the Hâllîan pillagers, one of Hammad's successors founded Bidîjâya [q.v.] (Bougie) (before 461/1068-9). But gradually, these Sanhadja of the eastern Maghrib became dominated by the Hâllî and other Arab tribes.

At the end of the 4th/beginning of the 11th century, a son of Zîrî b. Manâd, Zawi, departed for Spain, where, after having entered the service of al-Mansûr Ibn Abî 'Amîr, the regent for the Umayyad empire, he founded an independent state around Granada, this Sanhadja branch, however, abandoned Andalus in 416/1025 [see Zipris of Spain].

Within the Sahara, there nomadised a second group of the Sanhadja, the Lâmutîna [q.v.], wearers of the ihtîâm or veil, the Almoravids [see al-Murâbîtûn]. After having conquered Morocco, these last seized Temmîn, Oran and all the coastal region up to Algiers (475/1082). They clashed with their fellow-tribal brethren of the Banû Hammad and then embarked on the conquest of al-Andalus.

The two Sanhadja kingdoms, descendants of Zîrî b. Manâd, in the Maghrib and in Ifrikiya, disappeared around the middle of the 6th/12th century when a further wave of Berbers, the Almoravids [see al-Murâbîtûn], conquered the whole of Barbary as far as Tunis. As for the Almoravid Sanhadja, they were crushed by the Almoravids in Spain as well as in the Maghrib. A fraction of them, the Banû Qâhîniya [q.v.], ruled in the Balearic Islands in the 6th/12th century. They even managed to seize Bidîjâya (581/1185), Algiers, the Kâfît Bani Hammad and Gafsa, invaded the Djerdj and reached Tripoli and Tunis in 599/1203; but they ended up being defeated by the Almohads (621/1224), and Sanhadja domination of Banû Hammad was finally over.

A few tribes of the Sanhadja lived in the Maghrib al-Askâ, in the Sûs and in the Atlas, e.g. the Lamatâ [q.v.] and the Gazzûlû, nomads, and the sedentary Haskûrû. Other less important groups lived, and still live, in the Atlantic coastal plains of Morocco, the Shâwiyya [q.v.] and the Dukkûla, and above all, in the north, near the Rif [q.v.], such as the Boutûyana and the Banû Urayghûl; but none of these Sanhadja tribes enjoyed any political power.

regard to sound principles of modern legislation." Al-Sanhūrī was active in Egyptian nationalist politics and became prominent in public life from the 1930s. He was among the founders of the Sa'dist party (1937), Deputy Minister of Justice (1944) and Minister of Education (1945-6 and 1947). The pinnacle of his public career came in 1949 when he was appointed Chief Justice of the Majlis al-da'ula. He made it "a towering fortress of the protection of rights and the guardian of liberties" (Mūsīrī, 1980).

At first he supported the Revolution of 1952 and the Free Officers. Later came his concern to re-establish constitutional government and civilian rule. During the political turbulence of March 1954, al-Sanhūrī was physically attacked at the Majlis by demonstrators and never again held public office.

Thereafter, he worked on his two major treatises: 

*Muḥāṣar al-hakīm fi ʾl-fiqh al-islāmī, 5 pts. in 2 vols., Cairo 1954-9, and* 

*Waṣīf fi ʿrāḥ al-kānūn al-madāni al-djadid, 10 pts. in 12 vols., Cairo 1952-70, completed the year before he died. Both are still in print and serve as basic reference works.*

**AL-SANHŪRĪ, ABU ʿL-ḤASAN ‘ABD ALLAH (Saniyya)**

AL-SANHURI — SANTUR

**SANTUR** [see NĀ’ŪRA] (**SANTUR**, a musical instrument still surviving today in the music-making of Turkey (very rare), of Irāk (integrated with the čālgī quarter accompanying al-makām al-irākī [see MĀRĀM], of Persia and of Ḥāḍīm (played solo). It is a cithara-tympanon-dulcimer made of wood, in the shape of a flat isosceles trapezoid provided with 72 to 96 strings of metal stretched from the string-holders (left-hand side of the trapezoid) to the pegs (right-hand side), grouped into four strings and then resting on from 18 to 24 bridges. It is played with two wooden sticks (madrāb) covered with tow or cotton and held by the musician between thumb and index finger (the techniques differ according to various schools); the strings give out a crystal-like sound prolonged by lengthy reverboration.

The *santur* of Persia spans four octaves and 33 degrees in heptatonic diatonic scales. Since the bridges are arranged in two groups of nine each, the ninth bridge allows the division of a note (e.g. fa natural and fa sharp in order to change gāda, melodic model). It is therefore more a question of the soloist's virtuosity than of modulation (talwīn).

The *santur* of Irāk spans three octaves and a third, and the two groups of twelve bridges define 48 degrees. The various ways of tuning the strings provides in the same register the possibility of modulating between genres (qānta) and of passing from an individual (Bāt [A-C-D-D] to a Sabāb (A-C-D-D) and a Hīdāj (A-E-F-C-D). It thus leads more to modulation than to virtuosity.

The origins of the *santur* are unclear. It has been alleged to be Assyrian(?). It does not appear in classical miniature paintings; it may be evoked in the *K. al-Aḏawʾ* of Saḥīf al-Dīn al-Urmawī (C. Baghdād, 7th/13th century); it appears on a fresco of the Čihīl Sūṭān palace in Isfahān (11th/17th century); it is mentioned in the Commentaries of the Codex of Gobineau's *Tours an Asie*, Paris 1859; and it appears at the end of the 19th century on the "chronolithographs" of Kāḏār period Persia. At the beginning of the 20th century, it was very common in the coffee houses of Istanbul, Tehran and Baghdaad, and took on a notoriety being connected with amusement and play, before illustrating the type of music called "traditional" by the West. Its present-day most brilliant exponent is the Persian Fārāmārz Pāyvar. (Nā’ūra)

**SANTUR, A MUSICAL INSTRUMENT STILL SURVIVING TODAY IN THE MUSIC-MAKING OF TURKEY (VERY RARE), OF IRĀK (INTEGRATED WITH THE ČĀLGĪ QUARTER ACCOMPANYING AL-MAKĀM AL-IRĀKĪ [SEE MĀRĀM], OF PERSIA AND OF ḤĀḌĪM (PLAYED SOLO). IT IS A CITHARA-TYMPANON-DULCIMER MADE OF WOOD, IN THE SHAPE OF A FLAT ISOSCELES TRAPEZOID PROVIDED WITH 72 TO 96 STRINGS OF METAL STretched FROM THE STRING-HOLDERS (LEFT-HAND SIDE OF THE TRAPEZOID) TO THE PEGS (RIGHT-HAND SIDE), GROUPED INTO FOUR STRINGS AND THEN RESTING ON FROM 18 TO 24 BRIDGES. IT IS PLAYED WITH TWO WOODED STICKS (MADRĀB) COVERED WITH TOW OR COTTON AND HELD BY THE MUSICIAN BETWEEN THUMB AND INDEX FINGER (THE TECHNIQUES DIFFER ACCORDING TO VARIOUS SCHOOLS); THE STRINGS GIVE OUT A CRYSTAL-LIKE SOUND PROLONGED BY LENGTHY REVERBERATION.

The *santur* of Persia spans four octaves and 33 degrees in heptatonic diatonic scales. Since the bridges are arranged in two groups of nine each, the ninth bridge allows the division of a note (e.g. fa natural and fa sharp in order to change gāda, melodic model). It is therefore more a question of the soloist’s virtuosity than of modulation (talwīn).

The *santur* of Irāk spans three octaves and a third, and the two groups of twelve bridges define 48 degrees. SANTURIN ADASI, the Turkish name for Santorini, the volcanic island which is the southernmost of the Aegean Cyclades group, to the north of Crete.

It may already have suffered from Arab raids from Crete in the 3rd/9th century, from the Arabs of Sicily and then from Western corsairs, although it is recorded as inhabited in ca. 549/1154 by al-Idrissi (tr. Jaubert, ii, 127), the first to employ the name Santorin.*

During a stay in Algiers, he studied the hadith collections under Abd al-Rahmân al-Tha'âlibî, and then at Oran followed the teaching of the great Sufi Ibrahim bin Ahmad bin al-Mahmoud bin al-Tha'âlibî.

Being inclined to asceticism, he fasted one day out of two and rarely left his dwelling. He kept vigils for several night on end and then embarked on a period of fasting. He was famed for his practise of itikâha [q.v.], one which enabled him to give a reply to a problem obtained during sleep. Because of his gift of knowing how to interpret (lit. “read”, kana’a) his dreams and those of others, the public came to him from all over the kingdom to hear his dicta, and he gained an unequalled reputation in the religious, especially mystical, sciences. He continued to teach in the mosque until illness compelled him to slow down and in the end brought his life to an end in 894/1490.

Soon afterwards, a küba, rectangular in shape and covered with shiny green fabrics, was erected in his honour in the cemetery of al-Ubbâd (Sidi Bou-Médine); it contained the catafalques of al-Sanusi and his half-brother al-Talutl, who had died shortly after. But he allegedly had another tomb amongst the Awlad Hammû, thus gaining him the name of Bû Kabrîn (likewise amongst the Banî Bû Sa’îd, etc.). Each winter, when the corn was still green, a great communal meal (wa’âda) was given by the people of Tiemen to the poor and to strangers, near al-Sanusi’s tomb, the latter being called Dhu ‘l-Wakfa (lit. “master of the drought” because of a miracle described by Ibn Maryam in his Bustân. At the end of the meal, there was a communal prayer for rain. Sidi Sanusi was equally invoked in periods of protracted drought. At Tiemen, no less than two mosques perpetuate his memory. An apparently older one, at the gate of the Darb al-Masûfû quarter, is said to be of Ibn al-Banna* and to have been the mosque were al-Sanusi taught and worshipped. The other is said to have been built on the site of the house where he was born, in the Banî Dûjûmû quarter. Both were richly endowed with hubâs.

Al-Sanusi had numerous students, such as al-Mallâlî, author of his biography and of a commentary on the Sughrî: Abu l-Kâsim al-Zawawi; Ibn al-Abbâs al-Saghîr; Ibn Abî Madyan; and Ibn Sa’d al-Tîlîmsânî, one of the sources of Ahmad Bâbâ. They contributed to the spread of their master’s works in the West Africa, by means of the trading links established with that region, especially through the milieux of scholars, such as the family of Ahmad Bâbâ of Timbuctu, in the 10th/16th century in Mali, and Uthmân b. Fûdî [q.v.]. (Usman dan Fodio) in northern Nigeria in the 12th/18th century.

Over the centuries, al-Sanusi has remained a source of inspiration and study. His three ‘âkefâd marked the grades of primary, middle and advanced studies, with the Sughrî al-sughrî sometimes replacing the Sughrî in the first grade. In Algeria, there have been various commentaries from scholars so diverse as al-Wârîhilâni (d. 1193/1779), Abu Râs (d. 1238/1823), etc. The famous poet Ibn Ansâyiûb (d. 1190/1768) used the theme of a visit to Sûdi Sanûsî’s tomb and was buried near him. At the opening of the 20th century, Ibn Bâdîs used al-Sanusi for his Kur‘ân commentary. Morrocan scholars studied the three ‘âkefâd with the commentaries and gloss of al-Dasîkî. Thus the Fâsi al-Manjûdî studied and commented on al-Sanusi, as well as the Miskânsî al-Wâllîî, the minister al-Zayyânî and the Sûfi Ibn ‘Ajdîba. Till the beginning of the 20th century, the teaching of logic at Fâs was...
done through the Mukhtasar, kalim with the three creeds and the abridgement of the Sughrā, with commentaries; and theology with the Sughrā and the gloss of al-Yusuf on the Mushaf. Thereafter, commentaries and glosses on them began to abound in the Arabic literature of West Africa, especially the lesser, middle and greater commentaries on the Sughrā, which was most often called Umm al-barāhin.

In Egypt, al-Sanusi was taught at the Azhar, notably with the commentary of al-Fadlālī (d. 1821) and his pupil al-Badjurī (d. 1860), up to the coming of the Salafiyā [q.v.] cultural and social reform movement. Muhammad ʿAbduh [q.v.] often cites him, and it was certainly al-Sanusi who provided him with the three modalities of judgement: necessity (al-ulūghūb), impossibility (al-sītāḥā), and possibility (al-dawāʿāz), and his attitude to the Muslim community, in his Risālāt al-Tauḥīd, has reminiscences of that of the scholar of Tlemcen. In his deep, widely-connected thought, he seems clearly to be, in company with the Persian al-Dawānī, the saviour of the human being as true by the Prophet. al-Sanusi wanted the people to have a simplified access to God, leaving for an elite (khūṣṣā) the possibility of a deep study of the principles of religion, a theme which he often takes up with his pupils and in his works, notably in his division of knowledge into two branches, an esoteric (zāhir) one and an exoteric (batīn) one, for him the truest and noblest knowledge.

Finally, by his public and private life, al-Sanusi became part of the popular Sufism illustrated by Tlemcen’s patron saint, Abu Madyan: a moderate Sufism, with simple dogma and intelligible to the believers. From his independence and originality, and his deep, widely-connected thought, he seems clearly to be, in company with the Persian al-Dawānī [q.v.], the most important Muslim theologian of the 9th/15th century (Fakhrī).

2. Works.

As far as is at present known al-Sanusi’s works (apart from the five ṣaḥīḥ, al-Kubrā, al-Sawtā, al-Sughrā, Sughrā al-sughrā and Mukaddimā) comprise a large number of commentaries on many varied topics—works of logic, the Sahih of Muslim, algebra, medicine, the Kur‘ānic kiraq, ṣafir manuals, tasfīr, etc. (for details, see Brockelmann, II, 325–6, S II, 352–6, and Moh. Ben Cheneb, EP art. s.v.). Almost all of these are abridgements or works of vulgarisation.

In his Sughrā, al-Sanusi gives an exposition of the essentials of faith according to a methodical form of augument. Knowledge (ṣīm) is based on judgement bākhn, which stems from the divine law (ṭabarrī), custom (ṣāda), experience and reason (ṣākhl). Rational judgement (al-bākhn al-ṣākhl) comprises the three categories of necessity, impossibility and possibility, rational judgement, which was adhoped by al-Ghazali and his pupil al-Badjurī (d. 1860), up to the coming of the Islamic philosophy and theology. God has twenty attributes: six are divine, seven comprise real ideas (ṣifāt al-ma‘ānī) and seven are ideal ones (ṣifāt ma‘nawīyya). These are followed by the attributes of the divine messengers. Finally, he concludes that the ṣūhādā sums up in its first part all that a believer need know of God, whilst the second part involves belief in all the prophets, angels, revealed books and the Resurrection, affirmed as by the Prophet.

al-Sanusi’s doctrine, as it appears from his works, is made up of prudence (tawakkuf) and reason, in pursuit of equilibrium and salvation. It was certainly influenced by signs of a shaking-up of values in the society of his time vis-à-vis the state, religion and cultural traditions, with the faith confronted by new problems. It was open to non-Muslim theological influences, as in his interpretation of the Gospel according to St. John, xiv, 16–17, 26, 29, and of the theme of the Caracalla casket; the nature of the human race is our Lord Muhammad (rahmā li l-ʾīṣāmīn). The ideas of the various madhhābīn are set forth and discussed. It was also inspired by the works of al-Ghazālī’s teacher al-Diawardī (the former’s ideas being spread in the Magrib by Ibn Tūmart [q.v.]), notably by the Ikṣīṣād and the Shāmilī, seen both in its form and in certain concepts, such as al-Aṣghārī’s classification of the divine attributes into three sub-divisions, as in al-Djwaynāwī, and the difference between naṣīfyya or constitutantual attributes and qualitative, ma‘nawīyya, ones. Similarly, al-Ghazālī’s influence (the Ikṣīṣād) appears in the division into seven of the divine attributes of God and the prophets, whilst al-Sanusi also takes up the ʾAsghārī idea of ʿiṣāb.

However, at times he takes up a position differing from such ʾAsghārī authorities as we have, al-Sanusi himself and al-Badjurī, reacting that what is offensive against reason and dogma (Mukaddimā, 65–7). His system of ethics is inspired by al-Ghazali, especially in the ʾIḥyāʾ, where, on all occasions, he seeks out a middle position.

He condemns firmly blind acceptance (ṭaklid [q.v.]). Merely reading the Kurʾān and hadīth is inadequate for understanding the bases of faith (taim); sound reasoning (al-nasr al-ṣaḥīh) is preferable to this (Wustā), and must lead to what is sought. Judgement thus rests on proof, aided by knowledge (ṣīm) or intuition (ma‘rifa). Dogmatics is the queen of sciences and involves demonstrable proof (burḥān) to distinguish between dialectic, rhetoric, poetry and sophism (the divisions of Aristotelian logic). The truths of the Kurʾān can thereby be apprehended and anthropomorphic interpretations (taqsim) avoided. Following a tradition of the Almohad dynasty, al-Sanusi wanted the people to have a simplified access to God, leaving for an elite (khūṣṣā) the possibility of a deep study of the principles of religion, a theme which he often takes up with his pupils and in his works, notably in his division of knowledge into two branches, an esoteric (zāhir) one and an exoteric (batīn) one, for him the truest and noblest knowledge.

Finally, by his public and private life, al-Sanusi became part of the popular Sufism illustrated by Tlemcen’s patron saint, Abu Madyan: a moderate Sufism, with simple dogma and intelligible to the believers. From his independence and originality, and his deep, widely-connected thought, he seems clearly to be, in company with the Persian al-Dawānī [q.v.], the most important Muslim theologian of the 9th/15th century (Fakhrī).

al-Sanusi

was the successor of his khalifa at Mecca. As a pupil of Ibn Idris, al-Sanusi had acquired specific esoteric knowledge.

References:

al-Sanusi, Muhammad b. Ali, scholar and Sultan of Algerian origin, and founder of the Sanusiyya [q.v.].

Born on 12 Rabî’ I 1202/22 December 1787 at al- Wâsîta (or douar al-Thorch), some 40 km/25 miles to the east of Mustaghânam, he belonged to the Awdâl Sidi ‘Abd Allah, Idrisid shariaf of the Maqâdhîr, a Maqâdhîn tribe of Oran under the Turkish regime. He inherited from his family the nisba al-Khâṭâbî (from ‘Abd Allah al-Khâtâbî, the ancestor of the Awdâl Sidi ‘Abd Allah, who lived at the beginning of the 10th/16th century), and those of al-Hasâni and al-Idrîsî (which refer to the origins of his Ṣharîfîan line). The qualificative of al-Sanusi would appear to have been borrowed from a local toponym (the name of a mountain) of the region of Tilimsân (Tlemcen), where his family previously lived. This nisba implies no link of kinship with Muhammad b. Yüsuf al- Sanusi, the Tlemceni scholar of the 9th/14th century [q.e.]

Muhammad al-Sanusi studied initially within his own family and in several intellectual centres of Oran: Mustaghânam, Maâzûna and Tilimsân. At eighteen years old, in 1220/1805 (al-Dâdjâdjinî), according to King Idrîs), or at twenty-one, in 1223/1808-1809 (K. Viker, following al-Libi), he left to pursue his studies at Fez. He stayed there, according to the authors, seven years (al-Libi/Vikor) or fourteen years (Idrîs/al- Dâdjâdjinî), with major scholar of the period. In Fez, he joined several major Sufi orders, in particular the Shâdhâlîyya in its Dâjûzûliyya, Nâşrîyya and Taṣiybiyya branches, as well as several local tarûk. He appears also to have been affiliated to the Darkâwîyya and the Khâdiyya, but he does not mention them in the list of the forty tarûk, the word of which he was later to claim. He was the pupil of Aâlmâl al- Tâdjinî, with whom he studied the Kur’ân, but whose way he does not seem to have adopted.

He left Fez in 1233/1818 (al-Libi) or in 1235/1819- 20 (al-Dâdjâdjinî). According to al-Libi, he apparently made a first pilgrimage to Mecca in 1232-3/1817-18, before his final departure from the Moroccan city. After Fez, his traces are followed with some difficulty: he probably spent some time in his native region, and then he made a leisurely progress along the confines of the Sahara. But the statement of Rinn (1884), according to which al-Sanusi was crossing the Sahara at the time of the arrival of the French in Algiers, is not to be taken seriously. He had long since left Algeria and was never to return there.

After staying two to three years in Cairo, al-Sanusi arrived in Mecca ca. 1240-1/1825-6. It was there that he encountered the Moroccan scholar and Şûfî Aâlmâl b. Idrîs, who had been residing in the Holy City some twenty years. A mystical master, Ibn Idrîs claimed a brief lineage which was traced by way of two intermediaries to the mysterious Kur’ânic figure of al-Khadîr [q.e.], and hence to the Prophet, always present at the origin of these successive transmissions (whence the names of Khâdiyyiya and Muhâmmadiyya given to the Way). Ibn Idrîs was not the founder of a structured fraternity but the respected master of a circle of disciples in the Holy Cities, and later in the Yemen.

Al-Sanusi did not remain for more than two or three years under the tutelage of his master. When the latter departed for the Yemen (1243/1827-8), he became his khalifa at Mecca. As a pupil of Ibn Idrîs, al-Sanusî had acquired specific esoteric knowledge...
and had reconsidered certain areas of *tilm*. It was also no doubt under his influence that he consolidated his distinctive positions in judicial matters: the criticism of blind imitation (*taklid*), the constructive utilisation of the four *madhabs* and the recourse to *idjtihad*, which were to characterise profoundly his later positions, and which would expose him to the criticisms of the scholars of al-Azhār (in particular, of Mūhammad ʿAlī ʿIllāyah). The teachings of Ibn Idrīs were clearly distinct from those of the Wahhābīs, with whom a number of restraints polemics were held.

When Ibn Idrīs died at Ṣābiyya in 1253/1837, al-Sanūsī began a new chapter in his life: the zāwiyā of Ibn Idrīs, situated on the hill of aBū Kubās, a neighbourhood of Mecca, became by gradual and barely perceptible stages, at no date which can be specifically assigned, the centre of the new “Sanūsīyya” brotherhood. Distinctive derivations were at the same time under the influence of other disciples, such as the Mīrghānīyya which found its preferred territory in the Sudan.

Probably hindered in Arabia, by Wahhābī activity and the presence of a local religious establishment, the founder of the Sanūsīyya henceforward sought new places for settlement in the African continent. From this time until his death, the chronology of his life is one of alternation between Mecca and the new African zāwiyās: 1255/1839: departure from Mecca; 1262/1846: return to Mecca, after founding four zāwiyās, including that of al-Bayḍāʾ, in the territory of Bārka (Cyrenaica); 1270/1854: new departure from Mecca and settlement at al-ʿĀzīzīyya; then, in 1273/1856, at Diqāghbū, a “new city” created out of nothing in an inhospitable desert location on the western borders of Egypt. It was there that he died, on 9 Ṣāfār 1276/2 September 1859.

At the time of his first journey to the West, Mūhammad al-Sanūsī had entered Tunisia and approached the Algerian frontier, but the region was unstable at that time and seemed to him unfavourable for his projects, and the presence of other Sufī orders was also a hindrance. Finally, in Tripoli, he reached an agreement with the local Ottoman power, then barely reinstated in Libya, and he turned, in the course of his wanderings, towards the Ḏibāl al-ʾAkhḍar, and a salient extending across the Fezzān as far as the Algerian borders.

Mūhammad al-Sanūsī conceived his work as being primarily a carefully-structured missionary project. He thus laid the foundations of a system which his son and successor Mūhammad al-Maḥdī was subsequently to pursue energetically. In this system, the epitome of pious endeavour is the construction of a zāwiyā, a place of assembly, of teaching and of arbitration, a sedentary and agricultural centre for the diffusion of Sanūsī ideas and policies in a nomadic environment. Thus there was established across Cyrenaica and the Fezzān a network of Sanūsī zāwiyās, which guaranteed the diffusion of Islamic models and celebrated the baraka of the founder.

On the doctrinal level, al-Sanūsī is seen as a reformist (appeal to *idjtihad*). Tenacious legends notwithstanding, al-Sanūsī was not, no more than was Ahmad b. Idrīs, an apostille of *ṣiṣi had* against the Europeans. He maintained an apolitical stance, prepared to deal with the Ottoman authorities and giving priority to a “grass-roots” re-Islamisation among the disinherit populations. In terms of *Ṣūfī*, he is seen as the reviser, and to a certain extent the unifier, of the forty strains, the *aṣ̄iṣāt* of which he lists methodically. Al-Sanūsī is to be found in him, in the various domains of *ʿilm*, and more particularly in that of *Ṣūfī*, a prolific written corpus, quite apart from his numerous letters. Al-Dāḍjānī has listed 44 titles. Among these, eight of the most important have been collected and printed in al-Māḏmūʿat al-muḫṭāra at the orders of King Idrīs: al-Durār al-sanūsīyya, which eulogises the Idrīsī family; Ḳız al-waṣāin wa-ḥan Būghlīt al-maqāmī, which deals with *taklid* and *idjtihad*; K. al-Maṣḥūl al-maḥdī, which recalls his masters and his studies; Muḥaddith Maʿṣūṭa? al-ʾImām Maḥdī, which addresses questions of Maḥdī law; al-Suṣ̄aṣ̄ bi al-muʿīn, which is devoted to the analysis of forty Sufī brotherhoods; and Ṣīfī? al-sadr bi-ʿarāʾ al-maṣʿūṭ al-ṣaṣ̄ar, which concerns ten problems of cultic practice (prayer with arms folded, etc.). Some works, destroyed by the Italians, are known only by their titles.

Thus there evolves, across the 72 years of his life, the figure of a teacher versed in multiple disciplines, of a reviver of Islam and of *Ṣūfī*, of a missionary and an organiser, but also of an eminent individual, endowed with baraka, whose charisma was renowned throughout the central and eastern Sahara.

**AL-SANUSI, SHAYKH SAYYID AHMAD (1290-1351/1873-1933), Third Grand Master of the Sanūsīyya (q.v.) order of dervishes. His full name was al-Sayyid Mūhammad al-Maḥdī Ahmad b. al-Sayyid Mūhammad al-Ṣaḥīf b. al-Sayyid Mūhammad b. ʿAlī al-Sanūsī al-Khaṭṭābī al-Ḥasanī al-Idrīsī.

He was born at Diqāghbū, a grandson of the founder of the order, and received a classical education in Islamic learning from his father, uncle, etc., according to the high standards of Sanūsī tradition. He succeeded to the leadership at Kūrū (Borku, in Chad), where his uncle resided from 1899 till his death in 1902, being the eldest member of the Sanūsī family. Next to his spiritual leadership, Ahmad al-Ṣaḥīf developed a political and military organisation for the Sanūsī community against French expansion in the Sudan region, but after a defeat, he decided to withdraw from Kūrū to the old centre at Kufrā (q.v.) in 1902. In need of international recognition and support, he agreed to the establishment of direct Ottoman rule in Cyrenaica and Fazzān (1910), and the 7,000 Ottoman troops in the province co-operated now against the enemies of the faith, these being in 1911.
until Muharram 1331/December 1912. During this period the Sanusi Shaykh issued a proclamation of djihād against the enemies of Islam. After the conclusion of the Italo-Ottoman peace of Lausanne-Ouchy (10 October 1912), the Sanusi leader continued resistance against the Italians with the discreet support of the Ottoman (Young Turks’) government. The sanūl-caliph, Mehmemmed V [q.v.] approved of Ahmad al-Sharīf’s installation of a “Sanusiyya Government” in Cyrenaica and Fazzān. From 1912 till 1915 Ahmad al-Sharīf was able to defeat Italian forces at times. Apart from regular financial and logistic support, the sanūl-caliph awarded the Shaykh honours and decorations. When Italy joined the Entente Powers against, i.a., the Ottoman Empire in 1915, Ahmad al-Sharīf was secretly appointed the sultan’s representative (rahb ul-sualah) with the rank of Vizier and the title of Pasha (nâde of 6 August 1915).

During the same year 1915, from June onwards, a regular communication with Istanbul was ensured by German and Austro-Hungarian submarines carrying arms, munitions and men to the Sanusi forces, but their guerrilla attack against the British in western Egypt failed (15 Rabi’ 1 1334/22-3 January 1916).

Ahmad al-Sharīf retreated with 800 followers and was chased back to Djaghbub, from where he went on to the Sirtica region of Tripolitania. He maintained his relationship with the Ottomans, but the influence of his cousin, Sayyid Muḥammad Idrīs (the later King Idrīs I al-Sanūsī of Libya) was by now increasing. With the permission of Ahmad al-Sharīf, Idrīs opened up negotiations with the British and the Italians (1917). In 1918 the Sanusi Shaykh was made the sultan’s representative in all North Africa, but his actual influence on affairs was steadily in decline. On 13 Dhu ’l-Ka‘da 1336/21 August 1918 Ahmad al-Sharīf left Libya, for good as it turned out to be, brought by a German submarine to Istanbul. He relinquished his political leadership but remained the spiritual chief of the Sanusiyya tarīqa till his death, and his lasting influence on affairs is prolonged by the formula “in every look and every word, at home and while awake, with the Prophet, and the appeal for guidance and imitation of his model, the supreme qualities of the initiate. The shīkh of the tarīqa is constituted by a distinctive prayer, the salāt al-‘azīmiyya, a prayer for the Prophet inherited from Ahmad b. Idrīs, which takes its title from the repetition of Allāh al-‘Azīm (“God the Most Great”), and by various aḥādīth and aṣnād, including a bayātīyya the text of which is prolonged by the formula “in every look and every breath, a number of times which only the knowledge of God can apprehend” (a formula which also features in the ‘Azīmiyya).

But it is not the shīkh which constitutes the most original part of the Sanūsī programme. The principal work of Muhammad al-Sanūsī was directed in fact towards the realisation of a centralised and hierachical order based on a network of zāwiyas established in places judged to be strategic from the point of view of communication routes, of the supply of water or of the local tribal composition. The zāwiyat is thus the

ultimate act of piety, and the creation of it follows a precise protocol. The appeal for it must be made by the population concerned. The latter sends a delegation to the chief of the brotherhood, who solemnly confirms its wishes, and takes on the obligation of constructing the buildings of the zaüya and of working periodically in its service. Muhammad al-Sanusi would then appoint, from among his disciples, a shaykh, obliged to marry into the local population. Regular and prolific correspondence maintains the link between the centre and the new local outpost.

Each zaüya is simultaneously an educational centre, a staging-post and a hostel for travellers, a place of worship and an agricultural location. It is, in the desert environment, a small urban enclave, representing the sedentary values and models which are those of normative Islam. By virtue of this network, which developed in Libya from the 1840s onward, the movement in an east-west direction, following the lines of wells and the routes of the Pilgrimage. Before reaching its furthest point and establishing its niche in Cyrenaica, the brotherhood had, in fact, spent a long time in search of the right territory. The Sanusiyya often encountered the resistance of the existing local powers and the presence of other Islamic organisations and cliques. Its extension into Cyrenaica (foundation of the first African zaüya, al-Baydã, at Cyrene at the end of 1842) and, to a lesser extent, into the central Sahara, thus represents a last resource: it was only in these regions that the presence of weak and scattered authorities, and the absence of powerful religious institutions, enabled it to acquire suitable space.

During its expansion in the Sahara, the Sanusiyya came into contact with the world of the nomad. It was there, far from the major centres of power and of scholarship, that the brotherhood was furthermore more attached to the baraka of the Master than to its erudite teaching. Thus there was established between the brotherhood and the Saharan nomads a durable bond of friendship. The Sanusi made alliance with the Bedouin (Madjabra and Ouaddai (Waddai). This route, still precarious and scattered authorities, and the absence of powerful regulatory. Just as it did not then aspire to political power, the Sanusiyya had no wish to undertake economic enterprises. The benefits which accrued to it from its protection of commerce were symbolic (alliances and allegiances) or material (gifts, agricultural produce). The activity of the Sanusi idgãš, one of its major projects, envisaging first a general recognition of the baraka of the Master, from which esteem, clientele and material goods would subsequently flow.

A veritable “Maghribi multi-national” at the outset, bearing in mind the origin of the closest disciples of the Master, the Sanusiyya then began to “Libyanise” itself. The two sons of the Imám al-akbar’s middle age were born in Cyrenaica, respectively in 1262/1844 (Muhammad al-Mahdi) and 1282/1864 (Muhammad al-Sharif). Muhammad b. 'Ali al-Sanusi himself left the Hidjaz for good in 1854 and established his headquarters at Djeïhchibb, a new city in the heart of the desert and near the Egyptian border, in 1856. It was there that he died in 1859.

His son and successor Muhammad al-Mahdi, who was to preside over the destinies of the movement for more than forty years, emerges as an organiser of talent. It was he who gave to the foundations laid by his father a systematic development. It was also he who oriented the brotherhood towards the south, in the direction of Central Africa. The first sub-Saharan zaüya came into being at Chemidour (currently in eastern Niger) from 1861-2 onwards. Later, faced by increasing interference on the part of 'Abd al-Hamid II, Muhammad al-Mahdi who, like his father, had maintained amicable relations with the Ottoman authorities, abruptly transferred his headquarters from Djeïhchibb to Kufra (June 1895), then to Gouro, to the north of what is currently Chad, in December 1899, preferring a hidjra to confrontation. The attractions of Ouaddai, rich in ivory, in ostrich feathers and, additionally, in slaves, also played a role in this long march towards the south.

This southward orientation of the movement coincided with the French advance towards Lake Chad. From 1901 onwards the Sanusiyya improvised, in difficult conditions, resistance to the French assaults, establishing for this purpose a defensive system and then appealing for Turkish protection. Its destiny was henceforward to be inseparably embroiled in the game of the Great Powers. Thus on 9 November 1901, French troops attacked the zaüya of Bir 'Alali situated some 100 km/60 miles from Lake Chad. Initially defeated, the French forces took control of the place on 20 January 1902. This was the beginning of a long Franco-Sanusi war which ended with the fall of the fortified zaüya of 'Ayn Galakka (to the south of Gouro) on 27 November 1913.

After the death of Muhammad al-Mahdi at Gouro on 2 June 1902, the latter’s nephew, Ahmad al-Sharif (1872-1933 [see AL-SANUSI, SHAYKH SAYYID AHMAD]), became the third Master of the tarîqa. He immediately decided to return to Kufra and began to organise the brotherhood on more secular lines, a development which prolonged and reinforced the politicisation and militarisation which had become apparent during the confrontation with the French. When the Italians arrived in Libya (October 1911), he used all his influence to achieve the mobilisation of his followers in a djihad against the invader and allied himself with the Ottoman forces. This “djâhidist” orientation, alien to the founder of the Way, henceforward made of the Sanusiyya a politico-military organisation aligned with the Ottoman caliphate. In 1914, Ahmad al-Sharif allied himself to the Central Powers. At the latter’s insistence, Sanusi forces fought on all fronts: they attacked the British in Egypt (November 1915),
expelled the Italians from Tripolitania and the Fezzan (September 1914-April 1915), then engaged in a conflict with the French in the Sahara, which culminated in the seizure of the French fortress of Agadès (1 December 1916-3 March 1917). Already split into a number of "fiefs" according to the various branches of the family, deprived progressively of a single direction, the Sanusiyya were devastated by this war and by the defeats inflicted on it in all theatres of operation after 1916. Muhammad Idris, elder son of Muhammad al-Mahdi, promoted by the British as a useful intermediary, negotiated with the latter and with the Italians and signed an accord at 'Akrama near Tobruk in April 1917. The accord integrated the Sanusiyya into the camp of the Allied Powers in exchange for a partial recognition of the brotherhood. In August 1918 Ahmad al-Sharif left Tripolitania aboard a German (or Austrian) submarine and abandoned the supervision of the territory.

The subsequent period reflects the political history of Libya. After a long period of ambiguity in the relations between Italians and Sanusiyya, and the signing of accords which were never properly implemented, the final struggle began in the late 1920s: Italian troops entered Daghûbîm in February 1926 and Kufra in January 1931. One of the leaders of the brotherhood, 'Umar al-Mughîrî, kept alive the last embers of Sanusi resistance until he was captured and publicly hanged by the Italians in September 1931.

During the Second World War, a Sanusi force was raised to fight alongside the British. The liberation of Cyrenaica (1943) and British support for Muhammad Idris cleared the way for the inauguration of the Sanusi monarchy at the head of an independent Libya (24 December 1951). Like other Maghribi Sharifian lineages in other periods, the tanqa sanusiyya thus became, in circumstances of peril for the Muslims, a symbol of political legitimacy, but these new dispositions proved impossible to maintain or to extend. The seizure of power by the "Free Unionist Officers" under the leadership of Colonel Kadhdhafi (1946) brought some Muslim exegetical attention as it did in the mediaeval Islamic principality of Djuzdjan (justified by the idea that "rabbits laugh when they menstruate"), reflecting a popular rabbinic gloss of the verb הָעַמְלָה ("laugh") rather than "pleasure" (see M.M. Kasher, in *Encyclopedia of Biblical interpretation*, New York 1953, iii, 26).

**SARA, wife of the Biblical patriarch Abraham** [see ISKÁIM]. Sarah enters the text of the Qur'ān only in its rendition of the etiological narrative surrounding the name Isaac (Hebrew וַיַּחֲנוּ). Sarah as "the old age, but she remains unnamed and is referred to simply as imra'atuhu, 'his [Abraham's] wife.' The issue of Sarah's laughing (and thus doubting God) drew some Muslim exegetical attention as it did in the Jewish tradition (e.g. al-Tabari, Tafsir, ad 17, 17; the solution cited by al-Farra, Anbdr [C.E. Bosworth]). The issue of Sarah's laughing (and thus doubting God) drew some Muslim exegetical attention as it did in the Jewish tradition (e.g. al-Tabari, Tafsir, ad 17, 17; the solution cited by al-Farra, Anbdr [C.E. Bosworth]).
In the wider Muslim elaboration of Biblical history, Sarah plays a substantial role. The story of her beauty and her being taken by Pharaoh, leading to the proclamation of Abraham the "sahib" (beloved) by Sarah, created a great deal of discussion (see R. Firestone, Difficulties in keeping a beautiful wife: the legend of Abraham and Sarah, in Jewish and Islamic tradition, in JQR, xlix [1991], 196-214). The incident became a part of an early tradition concerning the "three lies of Abraham" (see Abū 'Ubayd, al-Khutbā wa l-mu'awātīs, ed. Ramādān 'Abd al-Tawwāb, Cairo 1986, 113) as well as creating extensive discussions concerning the true lineage of Sarah (see Firestone, "The problem of Sarah's identity in Islamic exegetical tradition," in MW, lxxx [1990], 65-71; idem, Prophethood, marriage, consanguinity, and text: the problem of Abraham and Sarah's kinship relationship and the response of Jewish and Islamic exegetes, in JQR, lxxxiii [1993], 331-47). One tradition also states that her original name was Yasāra, but this was changed to Sārah when she was promised Isaac, and the ya2 was given to John (the Baptist) whose name was changed, through this addition, from Hayā to Yahyā (see Abū Ri'āfa al-Farāisi, Bad al-khulk wa-kiyās al-anbyā, in R.G. Khoury (ed.), Les légendes prophétiques dans l'Islam, Wiesbaden 1978, 308). This may be compared with the change from Sarai to Sarah in Gen. xvii, 15, and the rabbinic comments on the status of the yod in her name (see Kasher, ii, 248, where reference is made to the change of name from Hoshea to Joshua (Num. xiii, 16) with the addition of a yod from Sarah's name is also cited).

The sacrifice of Abraham's son [see ISHAK; ISMA'IL] also brings Sarah into the accounts, especially as it ties into the understanding of her death. The concern of the son for the fate of his shirt and whether this would cause his mother grief (and lead to her death) is prominent. Also, Sarah is portrayed as a true believer in God alongside Abraham and her son, as within Judaism and Christianity (see Hebr. xi, 11), in the accounts of her resisting Satan's temptation to interfere in the sacrifice after Satan tells her about Abraham's plan (see Abū 'Ubayd, al-Khutbā, 111-12; al-Tabarī, i, 293).

Bibliography: Given in the article; see also J. Horovitz, Koranische Untersuchungen, Berlin-Leipzig 1926, 114; on the pre-Islamic use of the name; R. Firestone, Journeys in Holy Lands, Albany, N.Y. 1996 (A. RIPPIN)

SARĀ (see SARĀV)

SARĀB (.), mirage.

1. A natural phenomenon. Sarāb is specifically the illusion of water (sometimes running water, due to a sense of the verb saraba) seen at midday which appears to be on the ground, as compared to āl, which is seen early and late in the day and makes things appear to float in mid-air and quiver. The lexico-graphical tradition attempts several ways of distinguishing these two words, but the emphasis on the time of day of their appearance is the most consistent differentiation. Sarah is used twice in the Kurān, in XXIV, 39, within a simile for the deeds of the unbelievers, the value of which turns out to be a mirage before God, and in LXXVIII, 20, in reference to the last day on which mountains will vanish (into thin air), as in the experience of a mirage.

The image of a "mirage" as reflected in Kurān, XXIV, 39, runs powerful resonances in Sūfī thought, especially Ibn 'Arabi, Futūhāt al-Makhtūm, Birāq 1329/1911, ii, 105, where the verse is interpreted to suggest that God appears to people in the form of their need; pursuing that form, which is a mirage, reveals the non-being of God and leads to the true vision of the divine.

2. In poetry. The mirage or fata Morgana, in its two forms distinguished by the Arabs (sarāb and āl, see above), is very often described by pre- and early Islamic Arabic poets in brief passages rarely exceeding two lines, incorporated in their kusādas containing desert scenes. Often it is said to move, dance or "amble" (jarga, rakasa, khabba), to glitter or shimmer (tarakraka, lama), like water, enveloping hills and sand dunes that appear clothed in it, or partly hiding camels that seem to wade or move in it like ships. Its apparent movements make it seem alive, like animals or humans. Later, urban, poets remain fond of the images, the main differences being that the mirage, now become part of the poetic universe rather than an everyday reality, generally changes from a prāsam in to a secdum comparationis, and that it is increasingly used less as a potential source of strongly visual imagery than as a symbol of deceit, thwarted expectations, illusions and unfulfilled promises, to point a moral rather than adorn a scene. The frequent occurrence of this image is no doubt partly due to the Kurān, where the sarāb already stands for illusion and futility (XXIV, 39) or instability (LXXVIII, 20). For small selections of the vast but scattered material (Ahu I-Rumma's Dīwān alone offers over thirty passages), see e.g. Ibn Abī 'Awn, Taghglāt, London 1950, 71-4; Abu I-Hilāl al-Askāri, Dīwān al-maṣāni, Cairo 1532/1933-4, ii, 128-9; Shimḥāṭi, al-Anwār wa-mahāsun al-aghrāf, i, Kuwait 1977, 355-9. (G.J.H. VAN GELDER)

SARACENS, a vague term used in the West for the Arabs and, eventually, other Islamic peoples of the Near East, in both pre-Islamic and mediaveal times.

1. Earlier usage.

Saracen was one of the many terms that Classical authors and ecclesiastical writers, used for the Arabs, the other being Arabes, Skénitai, Tāyyāyēf, Isma'ilaitai and Hagarēnai. It became the most common of all these terms, although it was one that the Arabs did not use in referring to themselves. The term was a coinage composed of Sarak and the Greek suflix eno, and both its etymology and denotation are controversial. Many early etyma have been suggested for this term, such as shurk (the cast), saraka (steal) and Sawārīn (a tribe), but all of them have been weighed and found wanting. The most recent effort, one that has received a wide vogue, considers the etymon to be shurk, federation, a term to be found in the bilingual Greek-Aramaic inscription of Ḫemūd in Ruwāfa. Many serious objections were advanced against this etymology, even before a close examination of this inscription revealed that the term shurk was a misreading of shurkī (tribe), a conclusion supported by the Greek version of the inscription which has ethnos, the exact equivalent of shurkī.

The failure of all these attempts to explain Sarākēnōs calls for a return to what the Classical authors said about the term, accepted long ago by Nöldeke as the true etymology. The earliest certain attestations of it go back to the 1st century A.D. when Dioscorides of Anazarbos, a physician-pharmacologist, spoke of the Saracen tree imported through the Nabataeans, and Pliny the Elder, who spoke of the Saracenis as the Ar- cani who lived beyond the Nabataeans. Thus the two authors pinpointed the Saracenis as a people in northwestern Arabia and clearly indicated that the term was not a generic but specific one. Ptolemy in his
Geography speaks of a district Sarakene in Arabia Petraea, and Stephanus of Byzantium in his Ethnika speaks of Saraka as a district beyond the Nabataeans whose inhabitants are called the Sarakenoi; although Arab geographers know of two almost homophonous place-names in the Hijáz, a valley (Suwarík) and a village (al-Suwaríkíyya). Serious consideration should, therefore, be given to the possibility that Saraka is none other than Sará(t), the well-known mountain range in that area. It is either a dialectal version of Sará(t) or it experienced eponymity by the intrusion of the kappa. Even more important is the denotation of the term. It clearly was applied originally to a group of Arab pastoralists in northwest Arabia, but soon it became the generic term for all the Arab pastoralists within as well as without the Roman times. And so it was used by the secular and ecclesiastical historians of the 4th century, such as Ammianus Marcellinus and Eusebius respectively. The latter developed an interest in both the term and what the term stood for. For them, the Saracens were the Biblical people, the sons of Ishmael, hence the children of the bondwoman Hagar and thus "outside the promises". As some of the Saracens attacked the inmates of the monastic establishments in the Orient, such as those in Chalcidice and the desert of Judah near the Jordan, they acquired a bad reputation among these ecclesiastical historians, some of whom indulged in etymologising the term "Saracen" along pejorative lines. Such was Sozomen, who suggested that in order to avoid the opprobrium attaching to them from Hagar, the bondwoman, the Arabs started to call themselves by a name that related them to Sarah, the wife of the first patriarch. Such perceptions of the Arabs most probably explain the emergence of other Biblical terms for the Arabs, such as Ismailitai and Hagarënoi, with the same pejorative implications.

Latin authors who came to the East, such as Jerome, also etymologised the term "Saracen" along pejorative lines. Such was Sozomen, who suggested that in order to avoid the opprobrium attaching to them from Hagar, the bondwoman, the Arabs started to call themselves by a name that related them to Sarah, the wife of the first patriarch. Jerome's unfortunate experience with some marauding Saracens while he lived in Chalcidice and at Bethlehem, contributed further to the deterioration of that image in his writings. Such was also the experience of the pilgrim, the Anonymous of Placentia, with the Saracens of Sinai in the 6th century. Thus through the writings of such influential figures as Jerome, the term "Saracen" with all its pejorative implications reached Western Europe long before the Muslim Arabs appeared in the Roman Occident in the 2nd/8th century.

(Ifan Shahid)

2. In mediaeval European usage.

The term "Saracen" (Ofr. Saracijan, Saracijan, OEng. Saracene), whatever its origin (see above, 1) came into both Late Greek and Late Latin usage during late antiquity, and at that time simply meant "Arab". With the rise of Islam, and in subsequent mediaeval European times, European writers used "Saracen" to denote "Arab" or "Muslim" or both, according to context. With the contacts of the Crusaders with the Seldjuks of Rûm in the 6th/12th century and the rise of the appellation Turcia for Asia Minor, and, above all, with the appearance of the Ot- tomans, "Saracen" came to be used in the sense of "Muslim" gave place to "Turk". As the Christian reconquest in the Iberian peninsula progressed, followed by Spanish and Portuguese attacks on the North African mainland, "Saracen" in the sense of "Arab" began to be generally replaced by "Moor", since the Christian peoples of the Iberian peninsula had used *Mauri* and *Moros* for the Arab-Berber invaders of their land [see moors]. The increasing numbers of Western travellers in North Africa and the Near East also came to use "Arab" more particularly in a pejorative sense (here following the usage of the indigenous urban populations of those lands) for "Bedouins, brigands".

Hence in Western Europe, by the later Middle Ages, "Saracen" had tended to fall out of usage and to be replaced by somewhat more specific terms.

The great literary usage of "Saracen" in the European high Middle Ages was, of course, to designate the Muslim opponents of the Christians in the *Chansons de geste*, mostly set fictiously in the time of Charlemagne or his son Louis I ("The Pious") and written in the various forms of Old French. From these originals, whose genesis in time is uncertain, the views and concepts of the *Chansons* spread to other vernacular literatures, such as Spanish, Provençal and Italian, and also to English and German literature. These *Chansons* provide for us an idea of what was the Muslim opponent of the Christians in the Middle Ages, a Muslim who was sometimes identified with "Turk", sometimes with "Bedouin", and sometimes with "Moor".

The etymology of the term "Saracen" probably lasted till the end of the empire. Certainly, Ibn Ba'thûtâ addressed as such (kal li-hâdhî 'l-Sarâkinû yûnî al-Muslim) by a monk in Constantinople (H.A.R. Gibb pointed out that it was chronologically impossible, however, that this monk could have been the emperor Andronicus II when he was there, probably in the autumn of 732-3/1332 (Rihla, ii, 441-2, tr. Gibb, ii, 512-13).

**Bibliography:** The literature on Christian conceptions of Muslims as shown by the *Chansons de geste* is extensive. A useful start can be made from the detailed bibliographical information in N. Daniel, *Heroes and Saracens*. An interpretation of the *Chansons de Gestes*, Edinburgh 1984, 280-1 (studies), 320-7 (texts).
the republic of Bosnia-Herzegovina of former Yugoslavia), situated on the banks of a small river known as the Miljacka (western tributary of the river Bosna), at the outlet of a valley opening towards the west, this being the "plain of the Scaglio"—in Turkish Saray Ova or Saray Ovasi (hence the name of the city), surrounded by tall and precipitous mountains (notably those of Ozren (1,452 m/4,762 feet) and of Trebević (1,629 m/5,343 ft)), at an altitude, according to the various neighbourhoods, of between 557 m/1,830 ft and 290 m/954 ft. In the time of the Ottoman period, the name of Vrhbosna ("the Crete of Bosnia", of which the Šaja (local parochial district) of Vrhbosna, then the site of the cathedral of Saint Peter, centre of the diocese. As is shown by the travel-writing of Felix Petan-

The fertile region around Sarajevo, with its abundant water sources and forests, was inhabited from the Neolithic period (2400 to 2000 B.C.), as is proved by the excavations of Butmir (one of the principal urban centres of the Balkan peninsula in this period, the ceramics of which are renowned). Other prehistoric dwellings have been brought to light on the slopes of Trebević (as on those of Debelo Brdo), some of which may have possibly existed even before the Roman period. Towards the end of the Bronze Age (900 B.C.), this region experienced an Illyrian influx, of which numerous vestiges have been discovered. In the Roman period, the 8th Augustan Legion was based on the plain of Sarajevo, and the well-known sulphurous bathing establishments of Ilidža, a thermal station situated in the foothills of Mount Igman (today some ten kilometres from the centre of the city) were developed. Other Roman remains have been discovered within Sarajevo itself.

After the fall of the Roman Empire, the Eastern Goths were the first to establish themselves in this territory, then, in 535 A.D. the entire region was conquered by the Byzantine Emperor Justinian I. During the Byzantine period, the region belonged to the Ottoman Empire, according to some historians, from the 10th century onwards there began to be formed, in the depression between the current cities of Sarajevo and of Zenica, the nucleus of the future mediaeval Bosnian state. It is known, on the other hand, according to a document of the king of Hungary Béla IV dating from 1244, that at that time the territory of Sarajevo formed a part of the Šaja (local parochial district) of Vrhbosna, then the site of the cathedral of Saint Peter, centre of the diocese. As early as 1379, the presence was noted at Vrhbosna of traders from Ragusa, who mentioned a locality called Trgovište (meaning "the place of [open] market") situated in the territory of what is now the city of Sarajevo, at the point where the stream known as Košević (curreyly the name of a quarter of the city) joins the river Miljacka. It is also known that in 1415 a local dignitary, the voivode Pavle Radenović, was buried at Vrhbosna.

The first significant foundations date from the years 1460-1 (cf. the wakf-name of 1462 of 'Īsā Beg, son of Iskāf Beg, who was to become sandjak beg of Bosnia in 1464): initially, the governor’s palace and a wooden mosque, then a bridge over the Miljacka, a caravanserai, a bedesten, a hammām, residential houses, shops, water-mills, etc. It is said that from 1455 onward the city was surrounded by a wall, as is shown by the travel-writing of Felix Petanić, and of Benedict Kuripešić, and exchanges of letters with Ragusa (where the following forms are found: Werchbossen, Verchbosen, Verbosavia, Verbosanija, Verchbosanija, etc.).

969/1561), not forgetting the Imperial Mosque “Careva đamija” (built in 1566 at the order of Suleyman the Magnificent, to replace the former mosque of the same name destroyed in 1457 and destroyed in 1480), and many others; the tekke of the Menelewis, of the Kahlweitis, as well as that of the Kâdiris (the renowned tekke of Hâjdji Sinân Âghâ, constructed in 1638-40 and subsequently restored on numerous occasions); the bedestens (in particular the well-known “Bursa bezistan” built by Rüstem Pâsha [q. v.] in 1551); the clock tower (built at the end of the 16th century or at the start of the 17th), the madreses, the fountains, the baths, the khâns, etc. The number of inhabitants of the city, which had gained the status of şehir before the 16th century, grew rapidly as a result of the influx of the Muslim population, which settled at the outset on the left bank of the Miljacka; for a very long time, each religious group lived in separate mahalles. This population consisted above all of new converts—there had been progressive Islamisation of a significant section of the local Slav population—as well as of administrative and religious cadres, Ottoman civil servants and soldiers, of diverse origins and belonging to the most varied ethnic groups, as is demonstrated by the genealogies of some of the eminent Muslim families of the city. But the city also expanded as a result of an influx of indigenous Christian populations. It is interesting to note in this context that in 1477 there were in Sarajevo 105 Christian households, 8 households of Ragusans, and only 42 Muslim households (see Hamdija Kreševljaković, Eragni, 1958, 9, quoting an article of Nedim Filipović). The Christian population was composed of the Orthodox—whose Old Church, “Stara Crkva”, was built in 1528, then rebuilt on several occasions after numerous fires, in particular in 1616 and in 1658, subsequently reconstructed completely in 1730, then once more renovated in 1793 (the list of popes of Sarajevo from 1516 to 1804 may be found in V. Škarlić, Srpski ..., 140-1)—and of Catholics, some of whom came from Ragusa [q. v.] in the course of the second half of the 16th century and settled in a separate quarter, subsequently called “Latinhuk”. Not to be ignored is the arrival, also around the middle of the 16th century, of a relatively substantial Jewish colony. These were, of course, Jews expelled from Spain and Portugal, who settled in a quarter the foundations of which date from the time of Hâjdji Kreševljaković, the renowned “Bursa bezistan” built by Rüstem Pâsha [q. v.]. The synagogue was probably built around 1580, then completely renovated in 1821, having been twice damaged by fire, in 1697 and in 1788. The total number of hearths (in Turkish odâjük) thus apparently increased from 153 in 1477, to 181 in 1480, subsequently to 1024 in the first half of the 16th century, then to 4270 in the second half of the 16th century. Aided by geographical position and “the industries of war”, commerce and craftsmanship developed rapidly, as is clearly shown by the number of warehouses and covered markets, of traders and of types of merchandise which were sold there or which passed through the city. In fact, the city was located “on the caravan-route leading from Istanbul and from Salonica towards the West, at a staging-point where it was necessary to substitute horses and mules for camels” (G. Weinstein, op. cit., in Bibl. 92). It was linked to the Adriatic coast on the one hand by the valley of the Neretva, on the other by the route running from Livno to Split. Furthermore, in the local context, the city, situated at a cross-roads, was also an excellent outlet for agricultural markets. In a totally different domain, it may be added that in 1085/1674-5 under Mehmed IV and in 1099/1687-8 under Süleyman II [q. v.], copper coinage was struck there (these being the coins known as manâbî). This economic prosperity was naturally accompanied by increasingly intense religious and cultural activity, for Sarajevo had very rapidly become an important administrative centre. With reference to the Muslim population, there is abundant testimony (cf. for example the works cited in the Bibl. of H. Tahir-Mišić, of M. Mujezinović and of H. Šabanović); in the literary domain as such, the best known names for the whole of this period remain those of Mehmed Nergis (d. 1644/1639 [q. v.]) and of Hasan Ka’im (d. ca. 1610/1690, cf. St. Šamić, op. cit.). It should, however, be noted that the overall development of the city was thwarted on numerous occasions by various scourges: outbreaks of plague (like that of 1526-7) and of cholera (1691), fires (particularly worth mentioning are those of 1644 and 1656) and earthquakes, not to mention famines. In spite of all this, the description of Sarajevo in 1660 provided by Ewliya Çelebi (even bearing in mind the exaggerations characteristic of this author) is quite impressive: the city reportedly then comprised 400 mahalles, including ten Christian ones and two Jewish ones (it may be recalled that according to an earlier source at the end of the 16th century, the city allegedly comprised 91 Muslim mahalles and two Christian mahalles), 17,000 houses, 77 mosques and 100 medreses, a clock tower, numerous medreses and other specialised religious schools, 180 medreses, 47 tekkes, 110 public fountains, 300 wells, 76 flour mills, five hammâms, 670 private bathrooms, three caravanserais, 23 khâns, 1,080 shops, a bedesten, seven bridges over the Miljacka, an Orthodox church, a Catholic church, a synagogue, seven iâmârs, etc.

This long period of prosperity was brusquely interrupted four decades later, in September 1697, by a terrible and totally unexpected blow, the sacking and burning of the city by Austrian troops commanded by Prince Eugène of Savoy who, taking advantage of his victory over the Ottomans before Zenta, carried out an exceedingly bloodthirsty raid, leaving behind him, after a brief occupation of the city, the ruins of Sarajevo ablaze. The unsuccessful siege of Vienna attempted by the Ottomans in 1083 marked, effectively, the beginning of a totally different period, that of the vangroupia, and of the definitive withdrawal of Ottoman troops from the north of Bosnia. The city was thus once more deprived of the latter’s military power. This had immediate repercussions for the whole of the eyâlet of Bosnia, henceforward a frontier region bordering on Christian Europe, as well as for the city of Sarajevo, where
disorder and corruption became rife. In fact, the ar-
rial in the city of huge numbers of Janissaries ... the following
table, devised by one of the two most knowledgeable
historians of the city, Hamdija Kresevljakovic (the
other specialist being Vladislav Skaric). What is established is on the one hand a quite spectacular fall in the percentage of the Muslim population, and on the other an extraordinary increase in the percentage of the Catholic population (see Kreševljaković, Sarajevo za vrijeme, 38):

Seeing the occupation of Bosnia-Herzegovina as a first stage in its colonisation of the Balkans, the Austro-Hungarian government proceeded methodically towards the implementation of numerous projects, especially in Sarajevo, designed to facilitate the attainment of this objective, while at the same time demonstrating to international opinion the civilising nature of its mission: construction of railway, of a central electricity system and of urban canals; improvement of the quays of the Miljacka; construction of the Catholic cathedral (1884-9, replacing the former Catholic church, on which little information is available, as is hardly surprising when the figures in the above table are considered); building of a monumental Town Hall in pseudo-Moorish style (1896), and many other public buildings on the grand scale (such as the magnificent Zemaljski Musej (1888), modelled on the Vienna Museum, the Theatre, the Law Courts, the Bank, the Protestant Church, the Hospital, schools, hotels, etc.; not forgetting the laying-out, in 1886, of the city’s first municipal park on the site of a Muslim cemetery). This rapid Europeanisation brought to Sarajevo many soldiers and officials. Among the latter, both in administration and in education, there were to be found a large number of Orthodox (i.e. Serbs) and Catholics (predominantly Croats, who were joined by considerable numbers of new arrivals from elsewhere: Austrians, Germans, Hungarians, Poles, Czechs, Slovaks, Slovenians, Rumanians, etc.) (see Kreševljaković, op. cit., 37-9). The city was extended rapidly in a westwards direction, i.e. towards the plain, and towards Ilidža, which soon became a kind of “oriental Baden”. At the same time, as was to be anticipated, there was a decline in the craftmanship of the city, an inevitable consequence of the appearance of the first factories. The shock experienced by the Muslim population of Sarajevo, as a result of Austro-Hungarian occupation and the sudden irruption of all this modernity, was acute, as is shown by many texts of this period, and also by the emigration (although apparently of limited extent) of some of the inhabitants of the city to Turkey, or towards closer regions still controlled by the Ottoman Empire (see A. Popovic, کاتب اسلامی، 272-3). However, gradually the Muslim reacted and organised themselves into a religious community guided by an Ulema medžlis and an administration of wakfs, at the head of which was the chief of the community bearing the title of Re’s al-ulama (see EP, 1, 1273b). In matters affecting schools, and education in general, great changes took place, since the Austro-Hungarian authorities completely reformed the organisation of public instruction. In this new system, which had little effect on the various Muslim elementary schools, medreses, more or less ‘reformed’, served for the training of religious functionaries of inferior status. The best-known in Sarajevo at this time were the Kuršumlija and Hanika medreses, both dating from the time of Ghazi Kajser Beg (cf. Spomenica Gazi…). Furthermore, in 1887, a special college was inaugurated in Sarajevo with the aim of training judges for the Catholic courts and senior religious functionaries. This was the highly-renowned Štarijska Sadačka Škola u Sarajevu, which was the principal seed-bed of the Muslim religious intelligensia of Bosnia-Herzegovina between 1887 and the Second World War, and where the duration of studies was five years. Many details concerning this institution are to be found in the two volumes compiled on the occasion of its thirty-fifth and fiftieth anniversaries: in Tridesetpetogodisnji izvještaj Štarijske Sadačke Škole u Sarajevu, Sarajevo 1917, and especially in Spomenica Štarijske Sadačke Škole u Sarajevu, izdana povodom petdesetogodišnje ovog zavoda (1887-1937), Sarajevo 1937. In 1892, an academy was also founded for the training of school-teachers (Dār al-mu'allimin), where the course of study lasted three years. It should be noted that there was at first, among the local Muslims, a period of passivity, of mistrust and of defiance regarding everything emanating from the Austro-Hungarian authorities. In this context, worth citing for example is the fact that in 1887, at the time of the inauguration of the Ser. Sud. Škola which has been mentioned above, the new administration encountered obstinate resistance on the part of the Muslims, who refused to send their sons to the school, with the result that the first pupils of this establishment were recruited among orphans (cf. Abduselam Balagija, Les musulmans yougoslaves, Algiers 1940, 115). But subsequently, as a result of a gradual transformation of opinions, many Muslim children began to attend secular elementary schools and academies. Some even pursued studies abroad, especially in Vienna and in Budapest, for those to whom Zagreb was not a preferable option, to qualify as doctors, engineers, etc. Others also went abroad, but with the object of pursuing traditional studies, in Istanbul, in Cairo and in Medina, or on
During the Second World War (1941-5), the city of Sarajevo was part of the Fascist Croat state of Ante Pavelić, then, after the war, it became the capital of the Federal Socialist Republic of Bosnia-Herzegovina of Titoist Yugoslavia. In the course of this latter period (1945-92), Sarajevo experienced extraordinary growth, expanding from some 100,000 inhabitants in 1946, to 213,092 in 1961, then to about 250,000 in 1968, and passing the figure of 300,000 in 1992, henceforward comprising a large number of modern quarters, most of them extending over the plain. The city continued to be the base for the guidance of the Yugoslav Muslim community and the seat of its chief. (On relations between the latter and the Communist authorities during this period, see Popovic, Les musulmans yougoslaves.) As regards the Muslim educational establishments, they experienced several phases, which may be summarised thus. At the very beginning of the taking of power by the Communists, all the Muslim religious schools mentioned above were closed. Thus the Viša isl. šol. škola was definitively closed in April 1946, this coinciding with the abolition of the Muslim courts. Then, gradually, as a result of an extraordinary reversal of the situation, beginning with the Communist government’s decision to seek a major role in the organisation—predominantly Muslim—of Non-Aligned States, a new system was put in place. Under this system, the principal institution for the training of religious cadres became once more the renowned Gazi Husrevbeg medrese, then some time later, in 1977, there was established (still in Sarajevo) a Faculty of Islamic Theology (Islamski Teoloski Fakultet). The same period saw a remarkable flourishing of the Muslim press.

The disintegration of Titoist Yugoslavia, following the collapse of the Communist world and the resurgence of various local nationalisms, culminated in the spring of 1992 in a brutal civil war in Bosnia-Herzegovina, in which the city of Sarajevo has become one of the principal theatres of operations (on these controversial and poorly-understood issues, as well as on the Muslim community, cf. X. Bougarel, Discours d’un ramadan de guerre civile, in L’Autre Europe, 26-7 [Paris 1993], 171-197; and idem, Un courant panislamiste en Bosnie-Herzégovine, in G. Kepel (ed.), Exils et royaumes. Les appartenance au monde arabo-musulmans aujourd’hui, Paris 1994, 275-99). At present, it is impossible to see when, or how, the city of Sarajevo can regain a semblance of normality.

SARAJEVO — SARAKHS

SARAKHS, a town of northern Khurasan, lying in the steppe land to the north of the eastern end of the Köpet Dagh mountain chain. It was situated on or near the east or right bank of the Tadjjan (modern Tedjen) river, whose uncertain flow received the waters of the Hari Rud before finally petering out in the Kara Kum desert [q.v.]. According to the mediaeval Islamic geographers, the river bed only contained water at the time of floods, i.e. winter and early spring. Various channels were taken off the river for irrigation, but scantiness of water supply always limited agriculture there. In mediaeval times also the road from Nishapûr and Tus to Marw passed through Sarakhs.

The geographers record a tale that the town was founded by the legendary Turkish king Afrasiyab, but nothing seems to be known of any pre-Islamic history. The first mention of Sarakhs in Islamic history is in 22/643 when the Arab commander al-Ahnaf b. Kays [q.v.] sent one of his officers to it, but this can only have been an exploratory probe since ʿAbd Allah b. ʿAmir [q.v.] in 31/651-2 led a campaign into Khurasan, capturing Nishapûr and other towns as far as Sarakhs (al-Tabari, i, 2682, 2884, 2887-8). Sarakhs is mentioned during the fighting in Khurasan between Abu Muslim's partisans and the last Umayyad governor there, Nâsr b. Sayyâd [q.v.], and in 185/801 there took place at Sarakhs and at neighbouring Nasâ [q.v.] a rebellion against the oppressive Abbasid governor ʿAlī b. Mihrâb b. Mâhân [q.v.] led by the mawla Abu ʿIyâb b. ʿRâhîb [q.v.] of the mountain tribe and Arab majority, the size of Marw, with a Friday mosque, good agriculture, including grain grown for export to Nishapûr, and extensive pasture grounds for camels and sheep. Within the population, so al-Muqaddas states, there were two factions of the Hanâfî Ārâisiyya and the Shafiʿi Ahlîyya (see C.E. Bosworth, The Ghaznavids, 163-4). Sarakhs played a significant role in the overrunning of Khurâsân by the Turkmen in the first half of the 5th/11th century. In 425/1035 Maharâd of Ghazna allowed 4,000 Oghuz families and their herds to cross the Oxus and settle near Farâwa, Abiward [q.v.] and Sarakhs, but by 428/1039 the Oghuz were demanding a grant of the revenues of Marw, Abiward and Sarakhs. It suffered badly from the devastations of the Turkmen, so that when Masʿûd of Ghazna appeared there with his army in 431/1040, the exasperated inhabitants refused him entry, and Masʿûd had to storm the citadel, killing many of the people; it was thus from Sarakhs that the sultan set forth for his ill-fated battle with the Seljûqs and their forces at Dandânkan [q.v. in Suppl.] in the waterless desert between Sarakhs and Marw (see Bosworth, The Ghaznavids, 224, 250-1, 263). In the second half of the 5th/12th century and after the end of Sandjar's sultanate, Sarakhs was ruled by the chief Malik Dinâr, and then by the Khârazmian claimant to power, Sultan Shah b. Il Arslan. During the time of the Mongol invasions, Čingiz Khân in 618/1221 sent his son Tolûy to occupy the towns of Khurâsân, including Sarakhs; it submitted and received a Mongol gîhana, but rebelled, like other towns in the province, on hearing rumours of the Khârazm Shah Dalâl al-Dîn's successes (Nuquwayni-Boyle, i, 155-6, 162, 301). The town must nevertheless have slowly revived; after the Mongol devastations, Ibn Bâṭûta [q.v.] passed through it without mentioning anything except Sarakhs's connection with the ʿUshârâ Shâh Lûkman al-Sarakhsi (whose gunbâd or tomb still exists in the town) (Rûhâ, iii, 79, tr. Gibb, iii, 583), but Hamd Allah Mustawfî (mid-8th/14th century) describes the town as having a strong wall 5,000 paces in circumference and a flourishing agriculture, especially of melons and grapes (Nasîha, ed. Le Strange, 139, tr. 135).

During the period of Safawî-Ozbeq warfare, it had an exposed position in the frontier zone between the two rival powers. In 932/1526 ʿUbâyîd Allah Khân Shîbâni occupied Sarakhs en route for his campaign against Mashhad and Tus (Bâbar-nâmâ, tr. Beveridge, 534). The raids of the Tekke Turkmens of Marw on Persian territory did not cease until after the Persian overthrow of ʿUmar b. Kamal b. Malik Dinâr; among the urban centres, Sarakhs was occupied by Muslim forces in 1849; in 1850 constructed a strong fort at Sarakhs, on the left or western bank of the Tedjen river, shortly after which a new threat appeared when the Russians moved into Central Asia and built a military post and settlement at Old Sarakhs on the right bank (G.N. Curzon, Persia and the Persian question, London 1892, i, 195-8).

Modern Persian Sarakhs (lat. 36° 32' N., long. 61° 07' E.) is the chef-lieu of a bâdshâh of the same name in the shahrastân of Mashhad in the shahrestân-ustân of Khurâsân; in ca. 1950 it had a population of 5,000 (Razmârâ, Farhang-i dehqânî-yi Irân-zamin, ix, 212-13), which had increased by 1991 to 22,247 (Preliminary results of the 1991 census, Statistical Centre of Iran, Population Division).

AL-SARAKHSI, ABU 'L-ABBAS AHMAD b. al-Tayyib b. Marwân, the most prominent disciple of al-Kindî and, like his master, a dedicated advocate of Greek learning at the unsure early stage of its Muslim integration, but with a more pronounced inclination toward adab.

He was born around 220/835 and died early in 286/899. A fact attested for his obscure early life is his participation as the delegate of al-Kindî in a multireligious philosophical-theological debate about Christianity and the Trinity (see Moosa and Holmberg). He began his career as an educator of the future caliph al-Mu'tadid. In 271-2/885, he accompanied the prince on an unsuccessful military expedition to al-Tawhîdî in southern Palestine, keeping a journal detailing its itinerary. He became an influential nadîm [q.v.] of the caliph and, in 282/895, was appointed to the kishâ [q.v.] and other offices. This, however, may have contributed to his downfall. Already in the following year, he was incarcerated. He died, or rather was put to death, in prison three years later. Their reason for this turn in his fortunes was a mystery ever, may have contributed to his downfall. Already in the following year, he was incarcerated. He died, or rather was put to death, in prison three years later. Their reason for this turn in his fortunes was a mystery. A fact attested for his obscure early life is his inclination toward adab.

Its Muslim integration, but with a more pronounced inclination toward adab. His hilarious spoof that targeted the anti-Greek religious bias of a narrow-minded member of the Ibn Thawabî family [q.v.] as told by Abû Hâyân al-Tawhîdî, Aghlîk al-was'ta'înîn, ed. Ibn 'Tawît al-Tawâjî, Damascus 1385/1965, 235-47, may possibly have been concocted or embellished by al-Tawhîdî himself; be this as it may, its ascription to him as well as his writing on Sbîq and Sbîhq could easily have added to impeaching his orthodoxy for later generations. All his works and ideas (among them the invention of a transliteration system for foreign languages, see Hamza al-Istâfânî, Tâstîb, ed. M.H. Al Yâsin, Baghdâd 1968, 35) reveal a lively thinker and (to a degree) free spirit who probably had few equals in his time. He may well be considered as representative of intellectual currents in contemporary Baghdad. The course to change direction.

to distinguish the text and the commentary (also true of the Mabsuf), but it too demonstrates an overall concern for comprehensive coverage, development of rules and considered hermeneutical argument. Al-Saraksí represents the independent, not the Iberian Hanafi tradition represented by Abu 'l-Hasan al-Karkhi (d. 340/955) and Ahmad b. Muhammad al-Sháshi (d. 344/955) and on the usul works of al-Qasí (d. 370/980). He also refers to the Risdá of al-Sháfi‘i, the opinions and some writings of later Sháfi‘i thinkers (e.g. Ibn al-Suraydi, d. 306/918), and to the major stances of other traditions.

The Hanafi biographical tradition has little independent information on al-Saraksí’s life. It draws on and elaborates clues supplied in the works. The Introduction to the Mabsúf and the concluding formulation of a number of its sections reveal that the author dictated it from prison. The Sharh identifies Abu al-'Azíz b. Ahmad al-Hulwání as a teacher, and the Usul begins with the statement that it was dictated in Uzbek and or Qandah in 479/1086. Biographical notices emerge later e.g. in the Rásíd al-Djawdhir al-mudriyya of Abu 'l-Husayn ibn Ahmad al-Kurashl (d. 438/1046), which states that al-Saraksí died ca. 490/1096, and names three students, Muhammad b. Ibráhím al-Hajjí, ‘Uthmán b. ‘Ali b. al-Kaywání and ‘Umar b. Habíb, grandfather of al-Marghání, the author of the Hílyá, Ibn Kutubaghá expands the story of the imprisonment, adds that al-Saraksí ended his life in Farghána under the protection of the Amir Hasan, suggests a date of death about 500/1106, and gives an anecdote about a local amir and his umm walads. The anecdote is intended to demonstrate the knowledge, skills and integrity of al-Saraksí, but Heffening, in EJ, discovered in it a cause for his imprisonment. Abu ‘l-Hasanat Muhammad Abu al-Hayy al-Lakhnawi, writing in 1293/1876, summarised the Usul bimural space was crossed by two perpendicular highways (the former cardo and decumanus) which connected four gates: the Gate of the Bridge (Báb al-Kanjara), on the river Ebro; to the east, the Gate of al-Kibla, or of Valencia; to the west the Gate of Toledo, or "of the Jews" (Báb al-Yahid), and to the south the Gate of the Sinshája, indicating a settlement of these Berbers, a name still evident in the "Cinegio" Arch. In the north-west corner of the enclosed space there was a fortified compound, the seat of authority (al-Káyàr, known as al-Sudda (like the Sudda of Cordova), a name currently born by the "Torreón de la Zuda").

Sarakûsta was one of the most important cities (madina) of al-Andalus, between 95/714 and its conquest by Alfonso I of Aragon (512/1118), considered the regional capital (hídra) or the "metropolis" of the "Upper March" (al-thaghr) or northern frontier extending in principle to the north of the Pyrenees, and, after the Christian conquests as far as Pamplona (captured in 183/799) and Barcelona (captured in 185/801). This was fixed, for the duration of the three remaining centuries, in the valley of the Ebro, with the zones (kilim) of Sarakusta and of Tuda (Tullla), Huesca (Wakha), Barbastro (Barbânjíyá), Lerida (Lârida) and Salatayud (Kal-Fat Ayyûb), in addition to the eastern zone of Tortosa (Turtûhá) and the southern zone of Bâriûgha, bordering on the "Middle March" (al-thaghr al-a^la).

The zone (kilim) of Sarakusta included the districts (nâhibá) of the city itself (al-madina), and others such as Belchita (Balshád), Cazarabet (Kâsr 'Abbád), Cutan- da (Kutandá), Fuentez (Fünthîsh), Gallego (Djallik), Jalón (Shalûn), Pleitas (Balsháq), and Zazulán. It comprised the eastern parts of Alcalá and the hamlets (karnda), denominations applied not always systematically to places in these zones, such as Alcániz (Kannîh), Almenara (al-Manâra), Caspe (Kashâb), Calanda (Kalanna), Montañana (Munt Anýát), Ríclà (Rikla), Rueda de Jalón (Rûta), and Zuera (Sukhâra).

The town plan of Sarakusta included a space enclosed within a wall of stone, built by the Romans and preserved throughout the four centuries of Muslim domination; this wall surrounded an irregular rectangle of approximately 600 x 900 m where, according to the calculations of L. Torres Balbás, some 17,000 inhabitants lived. This intramural space was crossed by two perpendicular highways (the former cardo and decumanus, which connected four gates: the Gate of the Bridge (Báb al-Kanjara), on the river Ebro; to the east, the Gate of al-Kibla, or of Valencia; to the west the Gate of Toledo, or "of the Jews" (Báb al-Yahid), and to the south the Gate of the Sinshája, indicating a settlement of these Berbers, a name still evident in the "Cinegio" Arch. In the north-west corner of the enclosed space there was a fortified compound, the seat of authority (al-Káyàr, known as al-Sudda (like the Sudda of Cordova), a name currently born by the "Torreón de la Zuda").

Also within this enclosed space, the Great Mosque (al-Dzamî), which according to an improbable tradition is said to have been founded by a number of venerable individuals (sabáka or tâbi‘ûn) who were supposed to have arrived in Sarakûsta with the vanguard of the Muslim conquerors: archaeology has proved that this Great Mosque was built over a Roman temple, dating from the time of Tiberius, which became a church with the arrival of Christianity. Some Andalusian sources indicate that the Great Mosque of Sarakûsta was enlarged twice, in 242/856-7 and ca. 409-12/1018-21. Recent archeological excavations have retrieved the rectangular shape (54 x 86 m) of this Mosque, with a pillar-supported hall of nine naves, comparable in dimensions to the greatest mosques of al-Andalus, those of Cordova and Seville. All that remains of it is the lower portions of the minaret, and a few captials dating from the 5th/11th century and uncovered in excavations carried but in what is now the municipal area of del Salvador, the church constructed by the Christians on the site of the Great Mosque of Sarakûsta.

Outside the wall there were extensive suburbs (rabad), such as that known as "the Tannery" (al-
Dibdgha, currently the suburb of “Altabas”, formerly “Atabahas”, on the other side of the river), Sarakustā takes a prominent role in the history of al-Andalus, known as the “White City” (al-madīnah al-bayyādah), appeared, according to the Arab geographers, as “a white stain surrounded by the vast emerald green of its countryside”. In fact, the sources praise the quality and the abundance of its agriculture, well irrigated by the great river Ebro and its numerous tributaries. Commerce found in Sarakustā “the gateway to all routes”, according to a reference in the sources. There were salt mines and a thriving fur trade, producing some renowned furs known as sarakūštīyya.

In this space, the Muslim life of Sarakustā developed during the four centuries (2nd-8th to 6th-12th) of Islamic political domination, also during the following four centuries (from 1118 to 1614) of the well-documented presence of “Mudéjar” [q.v.] and “Moriscos” [q.v.], the “Moors”, subjected to Christian political power. The four centuries of Muslim political domination reflect the general chronology of the history of al-Andalus [q.v.]: (a) conquest and rule by amīrān dependent on the Orient and Ifriqiya; (b) the independent Umayyad dynasty of al-Andalus; (c) the kingdoms of taifa (mulāk al-ṣa’awā’ī); and (d) the Almoravids, who, according to Ibn al-Muqaddam’s account, possibly in 975/1174; Christian sources, such as the Crónica Mudebride, speak of fierce resistance on the part of the town, but two Christian churches remained in use throughout the Islamic period: the church of Santa Maria (with the pious tradition of the apparition of the “Pillar”) and the church of Las Santas Masas, centres of an active Christian presence in the town. There was also a Jewish community, to which sporadic reference is made.

Sarakustā takes a prominent role in the history of al-Andalus from the year 124/742 onwards, becoming ennobled in the struggles of the baladīyyūn Arabs against the Shāmīyyūn, and of the “South Arabs” against the “South Arabs”, the latter forming the majority in the Upper March. In 132/749-50, the governor of al-Andalus Yūsuf al-Fihri [q.v.] sent to Sarakustā as wāli a certain al-Sumayl, a “South Arab”, in the hope of exercising better control over the “South Arab” majority; the latter rose in revolt four years later, and ultimately supported the candidacy of the Umayyad ‘Abd al-Rahmān I [q.v.], but after the latter had become amīr of al-Andalus, these “Southern Arabs”, dominating the Upper March, rebelled incessantly against the central power of al-Andalus, even seeking the aid of Charlemagne, who came to Sarakustā in 778 but failed to cross the walls of the city closed against him; whilst withdrawing, the Frankish army was attacked, this constituting some of the most renowned episodes recorded in the Chanson de Roland.

These frontier regions of al-Andalus persisted in their autonomist tendencies, rejecting both dependence on the Christians and dependence on Cordova, which sent its armies there on numerous occasions, commanded in person by successive amirs of al-Andalus, who succeeded, periodically, in controlling the region by installing Cordovan governors, an unsatisfactory measure in terms of internal administration, and especially in terms of the external Christian threat. Collaboration with local families, in principle loyal to the Umayyads, was the major recourse of the central power, from the later years of the 2nd/8th century onwards. The malādī (muwallad [q.v.]) family of the Banū Kast [q.v.] were to become periodically the masters of Sarakustā, leading protagonists, probably, in the activities of the Upper March, alternating loyalty and rebellion towards the Umayyad amīr, until the decline of malādī power throughout al-Andalus, and its progressive replacement by a new power exercised by certain Arab families, who were relied upon by the Umayyads from the later years of the 3rd/9th century onwards, as happened as Sarakustā with the Banū Tujib or Tugdhibiyān [q.v.], in power between 276/890 and 430/1038, such families alternated between submission and an autonomism which was total after the civil war (fitna) of the early 5th/11th century, leading to the establishment of the first dynasty of the taifa of Sarakustā, which was replaced by the dynasty of the Banū Hūd [q.v.], from 430/1038 until the conquest by the Almoravids in 505/1110. The latter were, however, unable to maintain Muslim political domination at Sarakustā for more than eight years, until 512/1118. The Muslim inhabitants remained there after the Christian conquest, subject to the regulations imposed upon “Mudjāirs” [q.v.] and “Moors” [q.v.], until their expulsion in 1614.

Cultural life came into being very early at Sarakustā, given its status as an important urban centre, with the first manifestations in the 3rd/9th century and, with consolidation in the following century, centred on cultured families such as the Banū Fūrtigh and the Banū Thābit, among others. During these two centuries, Sarakustā was in a state of some cultural isolation from the rest of al-Andalus but maintained direct relations with the Orient and the Maghrib, especially through the journey of the Pilgrimage. The cultural flowering of the 5th/11th century was, in part, the result of the arrival of major poets and scribes from Córdoba, making their way to Sarakustā, which was replaced by the dynasty of the Banū Tujib and Banū Hūd. In the 6th/12th century, the finest flowering of the culture of Sarakustā was to be seen amongst its citizens in exile, as in the case of Ibn Bādja [q.v.], but in the city and its neighbourhood the culture of the Mudejars and the Moors also survived, manifesting itself in aljama (al-ajamiyya).

Abd al-Rahman b. Mutarrif b. Thabit b. Hazm b. c q. v. the northern Spanish town of Sarakusta complete list of their teachers is given by Ibn Harith way he pretended that his ancestors were clients of a had^ (wald^ ^aldkd) had established ties of traditionists al-Nasa^I, al-Bazzar and Ibn al-Djarud (a 914) and his father Abu '1-Kasim Thabit (217- produced into al-Andalus al-Khalil's this anecdote, the historical value of which is 313/832-925 or 314/926). The biographical sources already written books on the same genre). ...
SARANDIB, the name given in mediaeval Islamic geographical and historical sources to the island of Ceylon (modern Sri Lanka). The Arabic form renders well the Skr. Simhala "Ceylon" = *drīpa* "island"; an intermediate form is found in al-Bīrūnī, India, tr. E. Sachau, London 1910, i, 233, as *Sangalādīp.* By the time of Yākūt (early 7th/13th century), the form *Sīlān* is found (Buldān, ed. Beirut, i, 346, *Bahār al-Hind*).

Most of the mediaeval Islamic geographers, from Ibn Khurradābhī onwards, give some account of Sarandib, placing it in the Sea of Harkand (= the Bay of Bengal) between India and China and describing it as the last of the Dībadjat (an Arabised plural form of Skr. *dvipa*), i.e. the Indian Ocean archipelagos of the Laccadives, Maldives [q.v.], etc. An authority like al-Idrīsī gives an exaggeratedly large size for Sarandib, an over-estimation going back to Ptolemy and noted by Marco Polo in his account on Seilán (Yule-Cordier, *The Book of Sir Marco Polo*, London 1903, ii, 312-30, chs. xiv-xv). For the Arab and Persian writers, the most noble feature was the island's mountain, called R. *Bii* (from Skr.) in the *Akbār al-Sīn wa l-Hind* (written 236851), § 5 (a text much used by subsequent writers, e.g. al-Masʿūdī, Murūjī, i, 167-8 = §§ 175-6, etc.), regarded as the spot to which Adam descended, his expulsion from Paradise, leaving a footprint given as 70 cubits in size. At a later time, Ibn Bāṭūṭā was to note that Muslims, Hindus and Buddhists alike, considered the footprint as that of the Buddha (Rūhā, iv, 165-85, German tr. H. von Mzik, *Die Reise des Araber Ibn Bāṭūṭa durch Indien und China* (14. Jahrhundert), Hamburg 1911, 353-67).

The *Akbār* further states (§§ 5, 51) that Sarandib had two kings and that it was the custom of the island that a dead king was inomated with his wives also throwing themselves on the funeral pyre, if they wished. Sauvaget observed that the detail of the two kings was known from the time of Cosmas Indicopleustes (6th century A.D.), reflecting the frequent division of power between a Singhalese monarch and a Tamil one in the north-east of Ceylon. Also mentioned are the import of wine from ʿIrāq and Fars by Muslim merchants for the king to enjoy personally and to sell to his subjects, and, apparently, the existence in the forests of Ceylon of the aboriginal Vedda people.

Ferrand, *Relations des voyages et textes géographiques ... relatifs à l'Extrême-Orient du VIIIe au XVIIIe siècles*, Paris 1913, see index s.v. Sirandib, with trs. of the relevant texts, to which may be added Hūdūd al-S̲īlām, tr. Minorsky, 61, § 5.2, comm. 194, and *Manacit*, tr. idem, 46, 50. For Idrīsī's detailed account of Sarandib and his map, see S. Maqbul Ahmad, *India and the neighbouring territories in ... al-Shāfīʿ al-Idrīsī*, Leiden 1960, text 27-30, comm. 122-6 and Map II. For the spread of Islam there and subsequent history of the island, see *Ceylon*. (C.E. Bosworth)

SĀRANGPUR, a small town in Central India, before Partition in the Native State of Dewās, now in the Shajapur District of the state of Madhya Pradesh in the Indian Union (lat. 23° 34' N, long. 76° 24' E). It is essentially a Muslim town, founded by the sultans of Mālwā [q.v.], but on an ancient site. It was reputedly the location of a battle in 840/1437 when Mahmūd Khālṣī I of Mālwā was defeated by the forces of Mēwāt [q.v.], and, of more certain historicity, it was captured in 932/1526 from Mahmūd II of Mālwā by Rānā Sāngā [q.v.] of Cītāw. Then in 968/1561 it was seized by Akbar from the local governor Bāz Bahādūr and incorporated into the Mālwā sābā of the Mughal empire, becoming the sarkār of Sārāngpur. After falling to the Marāhās [q.v.] in 1734, it was in 1818 restored to the Dewās State. The town contains several ruined Islamic buildings, including a mosque with an inscription from 901/1496 by Ghiyāth al-Dīn Shāh Khalījī.

Bibliography: *Imperial gazetteer of India*, xii, 95-7; K. A. Nizami and M. Habib (eds.), *A comprehensive history of India. V. The Delhi Sultanate (A.D. 1206-1526)*, Delhi, etc. 1970, 790-1, 936-7. (C.E. Bosworth)

SĀRAṆDĀṆA (p., lit. "palace-curtain"), the term applied in the sources for the Great Sālджūḳs and the Rūm Sālджūḳs to the great tent carried round by the sultans, regarded, with the *fātir* or *misallā* [q.v.], as one of the emblems of sovereignty. It is described in such sources as Rāwandi, Rāghīd al-Dīn and Ibn Bībī as being red, the royal colour, and as having internal curtained compartments forming rooms.

AL-SARĀT (A. "the back"), the collective name, not particularly widespread, of the chains of mountains which run from the Gulf of ʿAkbār down to the Gulf of Aden [see al-SARĀB, ʿAṣrār, i11]. The word *sarāt* occurs quite often in the construct state, as in *sarāt al-azd*, sarāt al-ḥāt, etc. In both Saudi Arabia and in Yemen, al-Sarat separates the lowlands along the Red Sea [see al-QHAWR; THĀḤMA] from the high plateau. The commonest view in the Arab sources is that al-Sarat is identical with al-Hijāz [q.v.], "the barrier". As a whole, the chains of mountains are cut up into large and small ranges which intersect in all directions. Al-Sarat is in general treeless, with black rocky ravines, ridges, peaks and pinnacles. Breakneck paths and bridle paths, often hardly traceable on the rock, lead up to narrow gates which give access to mountain villages found on almost inaccessible heights. There are well-cultivated fields in terraces along the slopes and in the valleys, protected by a wall of large stones. The fields yield coffee, protected from the heat of the sun by shade-giving trees, grapes and sugar-canes.

The heat on the western slopes is tropical, reaching from 23° C. in January-February to daytime shade temperatures of 38° C., and frequently of 49° C., in summer (June-August). In winter some cyclones skirt the Arabian Peninsula moving southwards and providing some precipitation [see MARRA, 3. The Modern City, Floods]. At night, the temperature drops considerably, and the mountain tops are frequently covered with snow. In March and April some rains fall, normally torrential, while the rainy period lasts from the middle of June to the end of September. A further particularity of the climate of the western slopes are the Thāḥma fogs, called *umnna* or *sulḥaymāṇi*. The climate of the eastern slopes is extremely dry, but the valleys, because of the rainy seasons, have a perennial water supply and show great wealth in fruit, cereals, plants and trees.

There are only a few gaps in the al-Sarāt chains: from Yanbuʿ al-Bahār to Yanbuʿ al-Mahd, and via ʿAḍr al-Mūḥammadī to Medina. Proceeding to Damascus, one leaves from al-Shūkatyya via al-Darb to Abbā [q.v.]; in Yemen, from al-Hudayda [q.v.] to ʿAṣrār and from al-Mukhā to Taʿizz [q.v.].

Bibliography: Hamdānī, *Ṣafā*, vi, Index

**SARATĀN (A.),** masculine substantive (pl. sarātān) denoting crustaceans (kibyryāt) in general and, more specifically, those which are collected for human consumption. The root s-r-i evokes, on the one hand, the notion of eating greedily and, on the other, that of running rapidly. The form sarātān serves as a substantive, also as a verbal noun and an adjective; it is only the substantive which is considered in this article. Being applied to edible crustaceans (mābārā), it has undergone considerable distortions according to specific regions; thus the forms encountered include sarātān, saltān, saltān, saltān, saltān, saltān, and saltān. Alongside this term, each crustacean bears other names which often recur to denote other species.

1. The decapod crustaceans.

(2) The squill-fish (Scyllarus latus) and the mantis-shrimp (Stenopus hispidus): sīr al-bahr, istiṣāki al-raml.

(3) The crab (Carcinus): sarātān al-bahr and all the distortions of sarātān mentioned above, 'akrīha, kamarīn, ala kamarīn from the Spanish camarón, djamīt, djamīr, djamīr, djamīr, kamarīt, kamarīt, kazzālīt.

(4) The edible crab (Cancer pagurus or Carcinus maenas): umm dīnīt, bkhumbī, rīstīt.

The prawn and the shrimp (Penaeus caramote, Palamot serratus): abayūn, thībīyūn, urbiyūn, rubūn, garīthīl al-bahr, nūṣūn, kunūrī, kunūrī, bī kāsī, ḍjamūrī, ḍjamūmī, bī kamarīn, kaddsārī.

(5) The crayfish, river lobster (Astacus fluviatilis): sarātān nahri and all the distortions of sarātān mentioned above, ḍhanar, ḍjarād al-nahr.

(6) The crayfish, river lobster (Astacus fluviatilis): sarātān nahri and all the distortions of sarātān mentioned above, ḍhanar, ḍjarād al-nahr.

(7) The lobster (Homarus vulgaris): sarātān al-bahr, zālāfīn bahri, thībīyūn, abayūn, rubūn, ḍjamīrī, bī kāsī, ḍjamūrī, ḍjamumī, bī kamarīn, kaddsārī.

(8) The crab, spiny lobster (Palinurus vulgaris): angūt, anṣikāt, istiṣākāt 'l-sarātān al-murdiqanīya and all the names of the crab, the prawn, the crayfish and the lobster.

(9) The hermit crab, soldier crab (Pagurus bernhardus): baht, sarātān nāsīt.

2. Literature.

Few ancient authors have discussed crustaceans. Aristotle, in his Historia Animalium (see Bibli.), offers some observations regarding the ethology of these aquatic creatures; observations which later Arab authors were content to reproduce to the letter; these include al-Dībjāhī in the 3rd/9th century and, later, al-Damārsī in the 8th/14th century, in his brief article sarātān (see Bibli.) concerning the crayfish and ancient legends relating to it. Thus finding in a village a dead crayfish, lying on its back, is a mark of protection against plagues and natural disasters. If it is attached to a fruit-tree, the latter will bear an abundant crop. In the Sea of China, a marine crustacean, which comes ashore and dies of exhaustion, provides Chinese physicians with an ingredient for medicines designed to combat leprosy. In the same period as that in which al-Dībjāhī was writing, Ibn Mangill included, in his treatise on hunting (see Bibli.), a brief chapter on the crayfish borrowed from his contemporary. It is interesting to note that for all these ancient authors the crustaceans are not decapods, but octopods, the pair of pinners (minkadh, minkadh, minkadh) not being regarded as feet.

3. Permissibility of consumption.

By virtue of the Kurʾānīc verse (V, 95/96): “You are permitted the game of the sea (sayd al-bahr) and the food which is found there”, crustaceans taken alive may, once cooked, be lawfully eaten.

4. Specific qualities.

According to al-Damārsī, the flesh of edible crustaceans is beneficial in the treatment of dorsal pains and of phthisis. Bearing on one’s person the head of a crayfish prevents sleep when the moon is shining brightly, but induces sleep when there is no moon. If a crayfish is roasted and pulverised, the powder, applied to haemorrhoids, causes them to subside. If the pincer of a crayfish is applied to a fruit-tree bearing a full crop, all the fruits will fall without the slightest cause. If a crayfish is applied to a deep wound enclosing an arrowhead, the latter is easily extracted. Finally, the crayfish serves as a talisman against any bite of a snake or a scorpion.

5. Onomancy.

Seeing a crustacean in a dream is the sign of a person of great guile, strongly armed, very preoccupied, going far afield in search of possessions and of unsociable nature. One who dreams of eating the flesh of a crayfish could receive good things from a faraway place.

6. Astronomy.

Al-Sarātān, “the Crayfish” or “Cancer” is the fourth zodiacal constellation containing the two stars known as “the two Pinners” (al-zubānāyān), these being:

(a) (alpha) Cancer, mag. 4.4 (zubānā 'l-sarātān al-anqulawīyya) “the southern Pincer of the Crayfish”; and

(b) (iota) Cancer, mag. 4.2 (zubānā 'l-sarātān al-amālīyya) “the northern Pincer of the Crayfish”.

7. Medicine.

Al-Sarātān is the medical name currently given to the disease of cancer, with the synonym ʾalōla, “the devourer”, and the adjective sarātānī, “cancerous”.

(F. Viré)

**SARAWAK**, a state on the west coast of the island of Borneo and a constituent part of the Federation of Malaysia since 1963. Originally the name referred to a dependency of the sultanate of Brunei consisting of the Sarawak, Samarahan and
Lundu river basins. Through a series of treaties (the first in 1841) with the Sultan of Brunei [q. v. in Suppl.], these territories passed to the "White Rajah", the Brooke dynasty who administered Sarawak between 1841 and 1946. In 1946 the Brookes ceded their territory to the British Crown, and Sarawak, together with Sabah [q. v.], became British colonies. The wide variety of indigenous ethnic groups includes Ibans, Bidayuh (Land Dayaks), Melanau, Kayans, Kenyahs, Klemantans, Muruts and Malays. The general term "Dayak" was widely used to describe any non-Muslim peoples.

The Muslim population has generally been held to be about 20% of the total and is made up primarily of Malay-speaking riverine and coastal dwellers. Brooke policy was to give effect to native laws and customs, and Islam was but one amongst a number of recognised law systems. There was no attempt to administer the strict principles of the Shari'a until very recently (see below). Instead, it became the practice to note down the main principles of Islam as these were seen to affect public administration, and to enforce them through administrative procedures. Marriage, divorce, inheritance and conversion were all regulated in this way.

From the early years of this century, Muslim matters were governed by the Undang-Undang Mahkamah Melayu Sarawak (Laws of the Sarawak Malay Court). This document was a compendium of Malay custom and amended from time to time. It never constituted a "Code of Muslim Law" but instead was directed toward the regulation of a society whose members shared recognisably Muslim values, particularly as to relations between the sexes. No hard and fast line was drawn between custom (adat) and the Shari'a.

It has been noted that the conflict between traditional and modernist Muslims which occurred in the Peninsular Malay states was absent in Sarawak, possibly because the small number of local religious scholars studied in Mecca, not in Cairo, the centre of late 19th century reformist ideas, and because Brooke rule isolated Sarawak Muslims from contact with the international Muslim community. Also, the pondok schools [see pesantren] which on the Peninsula provided elementary training in the Muslim sciences, were not developed in Sarawak. In 1939 a group of Muslims in Kuching established the Persatuan Melayu Sarawak (the Sarawak Muslims Association) whose aims was to protect Islam. The Association was banned under the Japanese Occupation of Sarawak, although there was otherwise little interference by the Japanese in the everyday affairs of Malays (Muslims).

This rather static position has been fundamentally changed from the 1980s. A Department of Religious Affairs has been established, Muslim officials have a defined status in the administrative system of the state, a Shari'a Court system is in place and hadji and educational finances are provided. Islam has also a political voice in state affairs as in the other states of Malaysia [q. v.]. Dakwah activity has been increasingly evident.

SARAY, or SARAI, the name of two successive capitals of the Golden Horde located on the lower Volga. Of Persian origin, saray "palace" or "court", entered Turkic in the 11th century, where it was often paired with kerciye, from the Tokharian B kerciye "royal palace", to designate the principal camp of a nomadic ruler (Nadelyaev, et al., Drevnetyurskiy slovar', 429, 488 and Clauson, Etymological dictionary, 664). In the Mongolian era, 13th-14th centuries, there was a further proliferation of Sarais (see, for example Galst*an, Armanyskie istochniki, 28) and this has given rise to considerable uncertainty and debate over the nomenclature, locale and chronology of the Golden Horde capitals.

The first of these capitals, now called Old Sarai for the sake of clarity, is located along the left bank of the Akhtuba, an eastern tributary of the Volga, near the modern village of Selitrennaya, about 125 km/77 miles north of Astrakhan. Founded by Batu, the son of Djöji, Çinggis Khan's eldest son, some time after the conquests of Russia and the Kipčak steppe (completed around 1242), Sarai is first mentioned by name in 1254 when the Franciscan William of Rubruck visited the site on his way to Mongolia. He relates only that Sarai was newly-built by Batu and had a palace (Mongol mission, ed. Dawson, 207, 210). The character of the new capital is nicely evoked in Djuwayni's depiction of Sarai as both a "camp" (mughayyan) and as a "city" (qayh) (i, 222; Djuwayni-Boyle, i, 267).

According to the archeological evidence, Sarai was a large complex, about four km/12½ miles in length and covering an area of 10 km². The city had a well-developed network of streets (usually defined by drainage ditches), water reservoirs, markets and substantial artisans' quarters which housed jewellers, metal smiths and glass- and ceramics-makers. The walled villas of the wealthy were generally located on the outskirts of the city (Egorov, Istoriiceskaya geografija, 114-117; Fyodorov-Davydov, Golden Horde cities, 19-22).

The most informative literary sources on Old Sarai all date to the 1330s, just before the move of the capital upstream to New Sarai (Saray al-Djadid), and consequently there has always been some dispute over which city is described in these accounts. In most cases, however, a careful reading of the source resolves the apparent ambiguity. Ibn Battûta, for example, begins his description of "al-Sarâ" by stating that it took four days of travel to reach the capital from Hadidî Târkhân, the modern Astrakhan. Clearly, therefore, he visited Old Sarai, which is 125 km/77 miles from Astrakhan, and not New Sarai, which is a further four days' journey to the north. Moreover, the dimensions of the Sarai he depicts also confirm this conclusion; his city, like Old Sarai, is large, a half-day's ride in length (tr. Gibb, ii, 515-16), while the New Sarai, according to recent topographical studies (see below), was much smaller, barely 2 km² in area. Other contemporaneous accounts, by Abu 'l-Fidâ' and al-Ümari, also picture a large, populous city and are, in all probability, referring to Old Sarai (Abu 'l-Fidâ' Takhvim, tr. ii, i, 322-3; al-Ümari, ed. Lech, Ger. tr., 146). The city described by these authors was full of merchants and markets. European sources, such as the commercial manual of Pegolotti, correctly place Sarai on the main overland trade route leading from the Crimea to China (Yule, Cathay, iii, 147; cf. Bratianu, Recherches, 239-41). The inhabitants, as was typical of
Mongolian capitals were diverse: Muslims and Christians and numerous ethnic groups including Alans, Circassians, Russians, Kazakhs, and Greeks, each of which, according to Ibn Bāṭṭūṭa, had its own quarter and bazaar. In its early decades Sarai had a substantial Christian, mainly Orthodox, population. In 1261 a bishop was appointed to Sarai to minister to its Christian residents and visitors. This bishop also played a central role in diplomacy between the Mongols, the Russian principalities and Byzantines (Nikón chronicle, tr. Zenkovsky, iii, 37, 45, 63, 132; Byeneydorf, Byzantium, 43, 46, 78, 132, 150, 185). The Orthodox presence at Sarai is reflected in the numerous finds of metal icons and other religious objects (Poluboyarinova, Russo, 49-54). Over the course of time, and particularly during the early decades of the 14th century, the city took on a more Muslim character. Özbek, the khan of the Golden Horde (r. 1311-41), and a convert to Islam, built a madrasa in Sarai and successfully attracted Muslim scholars to his capital (al-'Umari, ed. L. A. Ger. tr. 136, Arabic text 68). By the late 1350s when the Franciscan Pascal of Vittoria reached Saray he viewed it as "a city of Saracen", and notes further that several years prior to his arrival Christian missionaries were martyred there (Yule, Cathay, iii, 82, 83).

The transference of the capital from Old to New Sarai took place, by the best available evidence, at the end of Özbek's reign. The issue is complicated, however, by the existence of contradictory information on the origin and name of the new capital. Muslim writers of the 14th and 15th centuries often refer to a second Sarai founded by Berke (r. 1257-66), the first ruler of the Golden Horde, to embrace Islam. According to a tradition related by Ibn ʿArabjāh, the historian of the Timūrid period, Berke first constructed and then peopled his Sarai with Muslim divines as a conscious means of spreading Islam in the pagan steppe (tr. Sanders, 77-9; cf. al-ʿUmari, ed. L. A. Ger. tr. 146, Arabic text 81). Moreover, Natanži, writing in the early 15th century, refers to both a Saray-i Barka and a Saray-i Bâte (ed. Aubin, 81, 97, 366). Such terminology, however, is never encountered in earlier sources. Rashīd al-Dīn, for example, speaks of Bâte's death at Saray, and more significantly, of Berke's burial at Saray-i Bátu (ed. Karimi, i, 122, ii, 744). Berke's capital, an island of the faith in a sea of paganism, is, in all likelihood, a pious fiction, one that has bedevilled many 19th- and 20th-century scholars who have sought to equate Saray-i Barka with Saray al-Djadid. In reality, Saray al-Djadid was built in the 1330s and became the new capital in the early 1340s when Djambek (r. 1342-57) came to power. Several lines of evidence point to this conclusion. First, the earliest literary reference to New Sarai, a non-Cinggisid general who attempted to control the Horde through puppet rulers, the capital became a major point of resistance to his rule. In 1361, according to a Russian source, "the Lords of Sarai" rebelled, "fortified Sarai", elevated a khan of their own, and in the following year fought a battle with the forces of Mamai (Nikón chronicle, ed. Zenkovsky, iii, 157). This threat, as Mellinger has suggested, might explain the appearance of new coins in 1349/1348-49 bearing the inscription Saray al-Mahtrasa, "Saray the preserved [of God]" (Coins of the Golden Horde, 178-80). New Sarai, from the number of metal, stone, and ceramic crosses found there, also had a Christian population, and it seems likely that the "bishops of Sarai" appointed in the latter half of the 14th century, because of the contact with Christian missionaries, was now stationed at New Sarai, near the court of the Golden Horde (Poluboyarinova, Russo, 54-72; Nikón chronicle, ed. Zenkovsky, iii, 242, iv, 14, 135, 139).

New Sarai was buffeted by the growing turmoil within the Golden Horde. Under Mamai, a non-Cinggisid general who attempted to control the Horde through puppet rulers, the capital became a major point of resistance to his rule. In 1361, according to a Russian source, "the Lords of Sarai" rebelled, "fortified Sarai", elevated a khan of their own, and in the following year fought a battle with the forces of Mamai (Nikón chronicle, ed. Zenkovsky, iii, 189). Apparently it is these events that produced the ditch and embankment uncovered by Soviet archeologists at New Sarai. Mamai later met defeat at the hands of the Moscovite Principality in 1380 and Toktamış, a Cinggisid from the eastern wing of the Qudol line, reasserted control of the Golden Horde with the support of Timúr. According to Russian and Turkish sources, he occupied "Sarai" where he was formally enthroned (Pompyaniki literatury drevney Rusi, 191, 192; Abu I'-Ghāzi Bahādūr Khān, Hisotro, tr. Desmaisons, 171). That New Sarai is probably meant here is supported.
by the fact that Toktamish issued considerable coinage at Saray al-Djadid throughout his reign. But since coins were also minted at Sarai at this time, a measure of ambiguity remains (Mukhamadiev, Monetnaya sistema, 232, 233). According to Timúrid historians, Sarai and its surrounding districts were sacked, levelled and set ablaze (Sharaf al-Din ‘Ali Yazdi, ed. ‘Abbási, i, 552; Nizám al-Dín Shámi, ed. Táuer, i, 164). Yet despite the claims of total devastation, these cities were at least partially rebuilt. In the reign of the Khán Muhammad (1421-45) Hadjí Tákhán, Saray al-Djadid and Sarai were again issuing a limited number of coins (Mukhamadiev, Monetnaya sistema, 157).

The final destruction of the Golden Horde capitals can be dated to the last half of the 15th century. Afanasí Nikitín, a Russian merchant who traversed the entire length of the Volga in 1466, mentions only one Sarai in his detailed itinerary (Nikitín, Klozhenie, 34, 53, 71). By this time, evidently, one of the two capitals had already faded into obscurity. And the other capital, whatever its identity, was soon under attack. In 1471 troops from the Russian town of Vyatka raided down the Volga, temporarily occupied Sarái, seized much booty, and successfully returned home (Iosafoskaya letopis’, ed. Zimín, 73). Another Russian raid came in 1480, and in the following year the Siberian and Noghai Tatars joined forces and systematically pillaged all the camps of the Great (Golden) Horde “between the Don and Volga” (Kazanskaya istoriya, ed. Mosiseeva, 56; Uyugskiy letopisnii vood, ed. Serbina, 93-4). The Golden Horde had been dealt a crippling blow from which it never recovered and Sarai, its long-time capital, departs from the historical stage.

Well-known and important cities in the Islamic world and Eastern Europe, the fame of the Sarais spread much further afield. Chaucer, in The Square’s Tale refers to “Sarray in the Land of Tartarye” and Sarai/Saray appears on European maps in the 1320s with anachronistic references as late as the 17th century. Fra Mauro’s world map of 1459 even registers the two Sarais, the “great” and the “small” (Tardy, Contribution, 182, 184, 185-6, 189, 190, 206, 212, 217).

(S.T. Allen)

SARY (p.) (from an Old Persian form *srāda, root šrā ‘to protect’ means) in Persian dwelling, habitation or house. The word is frequently combined with another substantive to indicate a particular kind of building. The best known example is kārwan šaray ‘caravanserais’, a roadside stopping-place for caravans [see KAR]. Similarly, the Qinnat-saray was added to the northern part of the shrine at Ar-dabil by the Safawid Shāh Tahmāsp I ca. 947/1540, is a domed octagonal building used for Sufi gatherings and prayer (A.H. Morton, The Ardabil shrine in the reign of Shāh Tahmāsp I, in Iran, xii [1974], 51-64, and xiii [1975], 39-50, no. C). The word saray was extended to refer to the seat of government and the residence of a prince. It could refer to a town. Ak Saray [q.v.], for example, is a town in inner Anatolia with a castle built by the Saldjuk sultan of Rum, Kılığ Arslan II (r. 551-59/1156-92). Seray Berke [q.v.], capital of the Blue Horde in southern Russia, takes its name from its founder Berke (r. 655/1257-67) ([q. v.] Abu Wakkas, erected at Kufa in 17/638 just after the conquest of 1 Frākh was excavated between 1935 and 1956 by the Iraqi Directorate of Antiquities. It was a square building (12, 100 m square, or 110 m on a side) enclosing a large courtyard with iwāns on three sides and a triple-aisled hall and domed room on the south. The Dār-al-Imāra erected by Abu Muslim at Marw in 129/747 is known through textual descriptions. It was also a square building, but had a central domed chamber surrounded by four iwāns that opened on to four courts.

With the founding of Sāmarrā [q.v.] by the ʿAbbāsid caliphs in the 3rd/9th century, Islamic palaces changed dramatically and became significantly broader and lower. The gargantuan 176-ha palace founded by the ʿAbbāsid caliph al-Muṭṭasim at Sāmarrā in 221/836 was known as the Dār-al-Khilāfa and later as the Dābūs al-Khākānī. Excavated by the German Sāmarra Expedition of 1911-13 and surveyed since 1983 by the Iraqi Directorate of Antiquities, the site included immense gardens and two main palatial units. The southern one, used for public audience, was a square building (180 x 200 m) with a monumental gateway (Bāb al-ʿAmma), throne halls, rooms and a large courtyard on the east. The northern one, used for private residence, had a smaller reception hall and residential apartments. This palace built by al-Mutawakkil two decades later was on a similar scale and had a corresponding division between spaces for public audience and private residence. These sprawling palace-cities with iwāns connecting closed and open spaces allowed visitors to process in an ascending crescendo towards the ruler, and the magnificent wall decoration, known from contemporary descriptions and fragmentary remains, was intended to underscore the ruler’s power and majesty.

ʿAbbāsid palaces set the model throughout the Islamic world in the mediaeval period, and other rulers copied not only the architectural units—two juxtaposed rectangular halls or four iwāns around a court—but also the sprawling spaces divided into public and private realms. The palace-city founded in 325/936 by the Umayyads of Spain outside Cordova at Madinat al-Zahra [q.v.], which has been excavated and reconstructed by the Spanish since 1911, was laid out on the eastern edge of the Guadaira Morena in a series of cascading terraces that took advantage of the site. From gardens in the lower zone, one ascended to workshops and court buildings in the middle zone and then to the Alcazur in the highest zone, which contain-
ed the dār al-mulk, the private quarters of the caliph and his close associates. The large scale (the site measured some 1500 by 750 m or 112 ha) and layout, like the rich decoration, was meant to project the Umayyad caliph's role, as had the ʿAbbāsīd palace at Sāmarrāʾ.

The two palaces built by the Fāṭimid caliphs in their new city of al-Kāhirah [q. v.] were smaller but also splendid establishments. They flanked the main north-south road through the city, which became known as Bayn al-Kasrayn. The Great Eastern Palace built for al-Muʿizz (r. 341-65/953-75) reportedly covered 10 ha and had 12 pavilions; the Small Western Palace built for his successor al-ʿAzīz (r. 365-86/975-996) was set in front of a vast garden. The Fāṭimid palaces were destroyed and the sites built over after the Ayyūbīds transferred the seat of power to the citadel. The palace and state buildings were located in the southern enclosure constructed in the second half of the 7th/13th century. The most impressive unit was the dome chamber of the Dār al-ʿtawwīd (q. v.), which served as a private chamber. These tents made of gold-on-gold material and attached by a wooden door painted in red and blue with scenes of fighting beasts and was covered with a magnificent audience hall decorated with gold and silver gem-studded vases (Rashīd al-Dīn, Ḥāwī at Mawsil between 630/1233 and 657/1259 (F. Schlumberger et alii, Lashkar Bazar. Une résidence royale ghaznevide et ghuride, Mémos. DAFA, xviii [1978]; see also the important considerations by Terry Allen, Notes on Bust, in Iran, xxvi-xxviii [1988-90]). The earliest was the small Centre Palace, erected along the river bank with a nearby pavilion and large garden to the east. It may be the kāshk erected by the Saffārid Tahir at the beginning of the 4th/10th century and is unrelated to the larger and better known South Palace, assigned to the reign of the Ghurid ruler Mahmūd (r. 390-421/998-1050). In both plans—a large rectangle enclosing a central courtyard with iwāns on the four sides—and decoration—panels of stucco carved in relief—the South Palace at Lashkar Bazar copies the Mosopotamian prototypes used at the ʿAbbāsīd palaces at Sāmarrāʾ. Its most distinctive feature is a second iwān-hall lying beyond the north iwān and overlooking the river. The grandest reception room in the palace, it had a dado painted with a frieze of attendants and attendants, each time the carved stucco panels and murals were renewed. The site, excavated since the 1960s, has yielded more than 5,000 panels and fragments of carved stucco, with an exceptionally diverse range of geometric, floral and epigraphic motifs (E. Gulyanova, Rzemy zhuk Khal′uka, Material′nye kul′tura Tadžikistana, iii [1978], 186-202).

Nothing has survived of Saldjūk palaces in Persia, but they probably provided the models for the palace parks built by the Saldjūks of Rūm in the 7th/13th century in or near Konya, Kayseri and Alanya. They had multiple pavilions commanding fine views, often over a nearby lake, and were resplendently revetted in glazed tiles. A riparian view also provided the setting for the contemporary Kara Sarāy ("Black Palace"), the palace built by the Atabeg Badr al-Dīn Luʾluʾ at Mawsil between 630/1233 and 657/1259 (F. Sarre and E. Herzfeld, Archäologische Reise im Euphrat- und Tigres-Gebiet, Berlin 1920, ii, 239-49). Almost much of the palace was destroyed in the 1980s, it was a two-storey masonry construction with iwāns grouped around a central court and had fine decoration in carved stucco. It is one of the few examples of a sarāy in the Arab lands, but in its foundation inscription (RCEA, no. 4451) it was simply called bina ("building" or "structure"), and the name Kara Sarāy is probably modern.

With the advent of the Mongols, the tent, often set in a garden, became a major form of palatial architecture [see Khayma]. These portable structures with rigid supports covered with fabric have not survived, but textual descriptions and depictions in later book paintings show that they were large and elaborately decorated ensembles. For example, the tent that Hülegü used when he ascended the throne near Balkh was made of gold-on-gold material and attached by a thousand gold nails; it included an elevated pavilion and a magnificent audience hall decorated with gold and silver gem-studded vases (Rashīd al-Dīn, Ḥāwī al-tawwīrāk, ed. and tr. É. Quatremère, Histoire des Mongols de la Perse, Paris 1836, repr. Amsterdam 1968, 159-65). The ruler's large tent supported by guy ropes (bārgāh) was often combined with a tentsill tent (ḥarşāq) which served as a private chamber. These tents were fitting palaces for rulers: a tentsill tent that belonged to the Ak Koyunlu ruler Uzun Hasan (r. 857-82/1453-78 [q. v.]) had a wooden door painted in red and blue with scenes of fighting beasts and was covered with blue cloth lined with red silk.

The tent was not the only type of palace used in the later period, however, and other palaces built of more permanent materials continued forms and decoration used earlier. The large and elaborately decorated
hunting lodge uncovered by German excavations in the early 1960s at Takht-i Sulayman, to the southeast of Lake Urmia, was begun ca. 673/1275 by Abaqa on the foundations of the Sasanid sanctuary of Shīr [q.v.]. The site where the Khānīd palaces also used the iwādn plan and had elaborate decoration. By the Mongol period, the word sarây was increasing applied to palaces, even those built earlier. The Il Khānīd historian Hamād Mustawfi al-Kazwīnī, for example, referred to the palace that the Buṭūdʿ Ādud al-Dawla (r. 367-72/978-83) had built in eastern Baghdad as sarây-i sūlān (“palace of the sultan”; Taʿāsth-i Gūzīda, ed. Nawātī, Tehran 1339, 415). An enlarged and rebuilt version of the one his father Muʿizz al-Dawla al-Dawla had founded, the palace, which is totally destroyed, had a great court surrounded by domed porticoes, halls for audience, residences, and gardens.

The Timūrids continued to use both the tent and the structural palace, and the word sarāy was also used with a qualifying adjective of colour to refer to a major palace or citadel. The most famous Timūrid example is the Ak Sarāy (“White Palace”), the palace that Timūr built between 781 and 798/1379-96 in his capital.① Mirʾūz al-Dawla al-Dawla had founded, the palace, which is totally destroyed, had a great court surrounded by domed porticoes, halls for audience, residences, and gardens.

The name, which was used in contemporary sources, cannot refer to the actual colour of the building, which was resplendent with coloured tiles, but is thought to signify “aristocratic” (L. Golombek and D. Wilber, The Timurid architecture of Iran and Turan, Princeton 1988, no. 39). The Gīk Sarāy (“Blue Palace”) that Timūr built at Samarqand ca. 905/1500 was a four-storey palace that has been destroyed. Suburban palaces were often called kāhī, meaning a park or estate with buildings and gardens; other terms used in the Timūrid period include takht, meaning a pavilion with a view, kūsānā and manzūl (“residence”), and kābūk or kāšt, some of which were larger than kiosks or pavilions (T. Allen, A catalogue of the toponyms and monuments of Timurid Herat, Cambridge, Mass. 1981, nos. 405 and 206).

The palace precinct laid out between 998/1590 and 1020/1611 by the Safawī Shāh ʿAbbās I in his new capital at Isfahān continues many Timūrid traditions, especially the unfortified exterior and the garden setting dotted with pavilions, but most of the structures were built of masonry, and not fabric tents. The precinct, sandwiched between the Maqām-i Shāh (“Royal Square”) and the Čahār Bāgh, the boulevard with trees and water channels that leads south across the Ziāndā River, was divided into two zones. A more public zone in the center contained workshops and administrative offices, while a more private residential area behind it contained gardens with small open pavilions. These were often known as hasht biḥīšt (“Eight Paradises”), from their plan—an octagon with eight rooms or apartments arranged around a large central hall. The form copies now vanished Timūrid models, known from other buildings such as the Qalʿat Kasj (“Tiled Kasj” [“Stone Courtyard”] palace (1380-98) incorporated several pillared porticoes arranged around courtyards within its 163 rooms.

Many of these Timūrid and Safawī forms were copied in the palaces built under the Mughals in the Indian subcontinent, but they were incorporated inside walled palace-fortresses and executed in local materials, particularly red sandstone contrasted with white marble. The form copies now vanished Timūrid models, known from other buildings such as the Qalʿat Kasj (“Tiled Kasj” [“Stone Courtyard”] palace (1380-98) incorporated several pillared porticoes arranged around courtyards within its 163 rooms.

Unlike the Safawīs and Mughals, who built numerous palaces in several places, the Ottomans maintained their court in a single palace, the Sarāy-i humāyūn, founded by the Ottoman sultan Mehmed the Great (r. 857-1453 and used as the primary residence of the Ottoman sultans until the 19th century. Although commonly known today as the Topkapı Saray after a shore pavilion built near a gate of that name, until the 19th century it was called in Ottoman sources sarāy-i qezdī-i ʿamir (“New Imperial Palace”) or yetī sarāy (“New Palace”) to contrast it to the eski sarāy (“Old Palace”), the first palace that Mehmed had built in the center of the city, and to the Topkapı Saray, the Byzan
tine palace (Gülru Necipoğlu, Architecture, ceremonial, and power: the Topkapı Palace in the fifteenth and sixteenth centuries, New York and Cambridge, Mass. 1991, 4). Set on a magnificent promontory on the tip of the peninsula overlooking the Bosphorus and the harbour of the Golden Horn, the palace comprises an outer precinct or park, known as the First Court, and an inner precinct of three courts constituting the palace proper. A line of three great portals leading into the First, Second, and Third Courts marks the main ceremonial axis to the audience hall (T. ʿarḍ oda) set beyond the third portal. Behind were gardens with pavilions, and to the left were several residences with courtyards, including several for the sultan's harem.
The separation of men's and women's quarters was picked up in European languages, where several loan-words from sarāy, such as the Italian seraglio and the French serail are sometimes found with the meaning ‘harem’.

The palace-city was also developed in the western Islamic lands, as at the Alhambra, built up in the 7th/13th and 8th/14th centuries outside Granada [see q. v.]. Monuments. B1. One of the best preserved and most popular examples of an Islamic palace, it is actually a series of palaces, including the more public Comares Palace with its audience hall and the more private Palace of the Lions.

In the 18th century, the arrangement seen at the Alhambra reappears in palaces built later in the western Islamic lands. The ruined Badr Palace, built at Marrakush [q. v.] by the Sa'dian ruler Ahmad al-Mansūr (r. 986-1012/1578-1603) for official receptions, for example, is an inflated version of the Court of the Lions. The palace-city was built by the Filāli ruler Isma'il (r. 1082-1139/1672-1727) at Mīnkūn [q. v.], where seven km of thick mud-brick walls with bastions enclose three separate palaces, each comprising several smaller palaces of differing arrangements as well as pavilions, mosques, barracks, prisons, stables, granaries, olive presses and huge pools to water the extensive gardens (M. Barrucand, Urbanisme princier en Islam, Mékénès et les villes royales islamiques post-médéévales, Paris 1985). The scale is far grander than that at the Alhambra, and the site was so large that the palaces were never finished. Piast, made from the ever-available earth, was the main material of construction, but other materials, such as columns and marbles, were salvaged from other sites or imported.

In the 18th and 19th centuries, palaces in the Islamic lands were often built on European models or incorporated features of Western architecture, such as monumental stairways, tall windows, engaged pilasters, and landscape murals. Dolmabahçe Palace, the Ottoman palace built on the shore of the Bosphorus in 1853-5 to replace Topkapı Palace, had an opulent double staircase with rock crystal balustrades, the first ceremonial staircase to survive since the Bāb al-'Amma at Sāmarrā'. The Kādžar dynasty of Persia continued the practice of seasonal migration that the Il-Khānids and Timurids had maintained and had palaces throughout the country. Fath 'Abd al-Shāh (r. 1212-50/1797-1834) enlarged the Golestān Palace in Tehran, a rambling series of buildings and gardens within a walled enclosure that served as winter residence and administrative centre, by adding the Taḵht-i Marmar, a columnar audience hall on the form of a traditional taḵār. To cater for his peripatetic lifestyle, he also established many summer palaces, often terraced structures set in elaborate gardens, including several in hillside villages subsequently incorporated in the northern suburbs of Tehran. His palaces were often decorated with large murals depicting the Shāh and his court. The largest was a mural painted by 'Abd al-Lāzīz Khān in 1812-13 to decorate the Nīgārān Palace; it showed the ruler enthroned in state with 118 life-size figures. The space of palace construction continued under Naṣir al-Dīn (r. 1264-1313/1848-96), but the elegant symmetry typical of Fath 'Abd al-Shāh's work was abandoned and European elements, such as pilasters and tall windows, were added to traditional features such as coloured tilework, ornately carved stucco, and mirror mosaic.

SARBADĀRIDS, the name given to the rulers of the Bayhak (Sazbāzaw [q. v.]) region of Khūrāsān and a section of their followers, in the half century between the death of Abū Sa'īd [q. v.] and the conquest of Persia by Tūmūr [q. v.]. (On the name, often also found as Sarbadal (‘refactory’), see e.g. Nawa'il, note in Samarkandī, 432.) The Sarbadārīd régime has been variously viewed as a robber state, a social revolutionary movement animated by a strong Mahdist impulse, and a type of Shī'a ‘republic’ (see Roemer, 38-9). It can most usefully be seen as an attempt at self-government among the indigenous population of western Khūrāsān, faced with the disintegration of Mongol rule.

The Sarbadārīd uprising started in Bāghtīn, in the district of Sābzawār, on 9 Sha'bān 737/13 March 1337 (Fārūyānādī, 347; cf. Samarkandī, 147). 'Abd al-Razzāk, son of a respected local notable, murdered a tax official and, in an effort to forestall the consequences, rose in revolt. The readiness of others to follow 'Abd al-Razzāk, who is painted as a rash and abusive character, and later his more sophisticated brother, Wādīj al-Dīn Mas'u'd, can and has been explained by the financial oppression of the wa'iz of Khūrāsān, 'Ali al-Dīn Muhammad (Amūli, 181-2). 'Ali al-Dīn’s exactions were driven by the need to finance the aspirations of the Čingizid pretender Tūghāy Tūmūr, whose vain efforts to impose himself as heir to the Il-Khānāte depleted Khūrāsān’s resources and caused the Mongol leaders to neglect the Sarbadārīd uprising until it was too late. 'Abd al-Razzāk was himself devoid of any great political purpose, but was able to gain control of Sabzawār (12 Safar 738/9 September 1337), where several members of 'Alī al-Dīn’s family were killed (Fārūyānādī, 347, 376). 'Abd al-Razzāk’s immoral behaviour led to his death late in 738/June 1338 at the hands of his brother Mas'u'd, who represented the wider ambitions of the rural landowners of the region, anxious to throw off Mongol rule. The growing band of soldiers, young men and 'ayyāsīs [q. v.] who eagerly joined him were rewarded by an egalitarian distribution of the spoils gained from a series of raids, directed particularly against the Dīar-al-Kūf, which culminated in the capture of Nīshāpūr (Amūli, 182).

More significantly, Mas'u'd sought to strengthen
the rather flimsy bases of his authority, and also to attract further support, by involving Shaykh Hasan-i Djiari, a disciple of the Mazarid Shaykh Khalifa, in his cause. Although there seems little doubt that Djiari had not become master of a radical underground movement, he recognised that the grievances of his adherents and of the oppressed Muslims of Khurasan in general could best be represented if he associated himself with the protests being voiced by the outlaws of Sabzawar. Thus began the uneasy alliance between the Sarbadarids and the Shaykhis in Sarbadarid domains, especially in the region that was to become the Shaykhiyya. But the alliance was weakened by the Black Death, which was a disaster, and he was killed in Dhu'l-Ka"b 752/18 December 1351 (Amuli, 1839; Faryumadi, 348). With the accession of Kh"adija "Ali, the Shi'ism of the Sabzawars first found explicit political expression. He announced his rule with a new issue of coins bearing a Shi'i formula, and instituted the practice of bearing a Shi'i formula, and instituted the practice of

One of the assassins, Yahya Karrabi, a landed proprietor of the district, resumed military hostilities and after several confrontations with Tughay Timur, whose ordas were weakened by the Black Death, he

feigned a willingness to make peace and treacherously murdered the last of the Cingizids in his camp at Pul-i Haḍrat Khayāt, near Sulṭān Dūwīn, on 16 Dhu'l-Qa'ada 751/27 November 1350. After several battles, and again in Muharram 752/18 December 1351 near the Gurgan river. Tughay Timur's army was led by aTwelver Shi'i, and, in a coalition against the Mahdists, took his army on 28 Shawwāl 752/18 December 1351 (Amuli, 1839; Faryumadi, 348). The following year, coins in Tughay Timur's name were again minted in Damghan, which had previously passed out of his control.

The leadership was now assumed by one of Mas'ud's commanders, Muhammad Aytimur, who was obliged to acknowledge once more the sovereignty of Tughay Timur. Although he had shown himself a competent ruler, he was murdered at the instigation of the Cingizids, in Muḥarram 753/1343 (Faryumadi, 348), who perhaps favoured a more aggressive policy. This inaugurated a period of instability, in which Sabzawar, but Kh"adija "Ali b. Mu'ayyad, son of a Sabzawari notable, rose in revolt in Dāmghan, sought Darwīsh 'Azīz's help and together they captured Sabzawar. Hasan-i Dāmghānī was murdered, evidently in 763/1362. With the accession of Kh"adija "Ali, the Shi'ism of the Sabzawars first found explicit political expression. He announced his rule with a new issue of coins bearing a Shi'i formula, and instituted the practice of

With the accession of Kh"adija "Ali, the Shi'ism of the Sabzawars first found explicit political expression. He announced his rule with a new issue of coins bearing a Shi'i formula, and instituted the practice of
the opportunity of preserving himself by entering Timur's service. On his death in Huwayzā in 788/1386, the Sarbadārīds realms were divided amongst several leaders, who also served Timur, particularly in the administration of Lower Trāk. In 808/1405, an attempt by a relative of Khūṭāji Allī to claim his "hereditary rights" to the former Sarbadārī lands ended in his execution and the sack of Sabzawār. Another member of the family later won fame as the poet Amīr Shāhī.

The Sarbadārīs produced a number of great poets in the 13th-14th centuries, such as Tadj al-Dīn Allī and Yahya Karrābī (Ibn Arabī), and later in the 15th century, the famous poet Firdawsī (r. 1415-1492) is recorded as having contributed to the Sarbadārī court. In the medieval period, the Sarbadārīs were involved in several military campaigns, notably against the Mongols, who occupied their territories ending in the execution and the sack of the Sarbadārīs' capital. The Sarbadārīs' most significant contribution to later Middle Eastern life was their role in promoting the traditions and practices of Persia, including the use of underground rooms called sār-dab.
Africa. To this first reason, one might add a desire to acquire the silver mines required for a bimetallic monetary system, one based on both gold and silver, and for timber for constructing ships. In Sardinia, there were silver mines in the district of Sulcis, not far from Cagliari, whilst the whole island was practically covered with forests.

The historical information.

At least eleven different Arabic sources describe, in a summary fashion and without details, a series of incursions stretching from the 8th to the 12th century A.D. and taking place at the following dates: 84/703-4; 87/706-8; 92/710-11; 114/732; 117/735; 119/737; 135/752-3; 201/816-17; 206/821-2; 322/933-4; 323/934-5; 405/1014; 406/1015; and 446/1054.

The sources in question are 1. the K. al-Imāna of Ps.-Ibn Kutayba, attributed to Ibn al-Kutiyya (d. 367/977); 2. al-Dabībi (d. 599/1203); 3. Yākūt (d. 626/1233); 4. Ibn al-Athir (d. 630/1233); 5. Abu 'l-Fida (d. 732/1331); 6. al-Nuwayri (d. 732/1332); 7. Ibn al-Tabba (d. 750/1350); 8. al-Dhahabi (d. 748/1348); 9. Ibn Kathlūn (d. 808/1406); 10. al-Makrizi (d. 845/1442); and 11. Abu 'l-Maḥṣin Ibn Taghrībīrī (d. 874/1467).

On the Sardinian side, the sources provide no details at all on an Arab presence in the island except for general statements that the Sardinians always fought with great courage against the invaders. One fact only is reported in detail by sources worthy of credence, such as the Venerable Bede and Paul the Deacon, author of the Historia Langobardorum. This is the transfer of the body of St. Augustine from Cagliari to Pavia, in northern Italy, at the intervention of the King of the Lombards, Liutprand, who between 721 and 726 purchased the relics of the saint so as not to leave them in the hands of the Saracens.

Surviving traces.

Epigraphy. In the Cagliari Archaeological Museum there are three Kūfic inscriptions. The first is a funerary stele of the prismatic type called mkabriyya in the Maghrib, which comes from Assemini, a small town to the north of Cagliari. On it there is the name of a certain Maryam, daughter of Abū Sirr-Assemini, which could mean in Arabic “8th”, and which invites reflection. The etymology of Alghero, which was not transported about and which no-one could suggest the existence of colonies which are not, unfortunately, confirmed by other sources.

SARDĀR (P.), often Arabised as SIRDAR, “supreme military commander”, literally “holding or possess the head”, i.e. chief or leader. It was borrowed in the military sense by the Turks, who, however, sometimes derive it in error from sirr-ādār (“the keeper of a secret”). Through Turkish it has reached Arabic, and in a letter written in 989/1581 by “one of the princes of the Arabs (of Yaman)” occurs the phrase uṣū-‘ayyana sardār “dala’ l-sākir” (“he appointed a commander over the troops”), on which Rutgers comments “Vocabulum sardār, quod Persicæ originis est, duæm exercitus significat”. The abstract substantive sārdāryaţ in the sense of the post or office of commander of an army also occurs; and it was doubtless owing to the familiarity of the Arabic-speaking people of Egypt with the borrowed word that it was selected as the official title of the British commander-in-chief of the Egyptian and Sudanese armies in the periods of the Protectorate and the Condominium, which word was used by the early 20th century applied to the valet or body-servant of a European; it was also applied to the head of a set of palanquin-bearers, and it was still in the early 20th century applied to the valet or body-servant of a European. In India, as a term applied to a servant of the British, it was used by the early 19th century also as a title, as in “Sardār-i Zafar” and “Sardār-i Dāng.” It is clear from the usage in the early and middle 19th century that it was applied to any Indian who achieved prominence, and in the British army it was applied in the 19th and early 20th centuries to the heads of the army of the princes or states, and it was also used in the 19th century applied to the valet or body-servant of a European. In the British army it was used generally of the Indian commissioned officers of the army as a class. Sardār log meant “the (Indian) officers of a corps or regiment”. It was formerly applied to the head of a set of palanquin-bearers, and it was still in the early 20th century applied to the valet or body-servant of a European. The term “sardār” in India was thus used in the mid-19th century to denote the head of a set of palanquin-bearers, and it was still in the early 20th century applied to the valet or body-servant of a European.
It achieved fame in the later 18th century, when Walter Reinhardt, called Sombre or Samru, ... forms, on Gesellschaft rather than Gemeinschaft. Indonesia's links with the heartland of Islam had also greatly

Afghanistan and his family. In 1961, Sardhana had a surviving within British territory as a distinct entity This became, after his death in 1778, the centre of a family estate until her death in 1836, when it was

Khan, formerly leader of the Sayyids of Paghman in Afghanistan and his family. In 1961, Sardhana had a population of 16,563, and the tahlil (in whose rural areas the Muslims are especially represented) one of 361,063.

SAREKAT ISLAM, a Muslim movement in the Netherlands East Indies which flourished 1912-27.

The establishment in 1912 of Sarekat Islam opened a new era for both Islam and political mobilisation in the Dutch East Indies. It actually grew out of an association with more limited aims, the Sarekat Dagang Islam (“Association of Islamic Traders”), set up in 1909 by Raden Mas Tirtoadi, a Javanese aristocrat and merchant whose trading company was then being liquidated. He and other Javanese merchants set this up as a co-operative trading association to counter Chinese economic dominance; from the late 19th century, the Chinese had begun to take over even those small industries (such as the production of batik cloth and kretek cigarettes) which had till then been Javanese-dominated. The association organised successful anti-Chinese boycotts and propaganda, leading to government action against it. One of its members, the batik manufacturer Hadji Samanhoedi, consequently turned to Hadji Omar Said Tjokroaminoto to rebuild the association. Tjokroaminoto, born in 1882, was the son of a relatively minor official in the colonial Javanese bureaucracy, and had himself been trained at the training school for native officials (OSVIA, Opleidingsschool van Inlandschen Ambtenaren). However, he spent only three years in the bureaucracy before moving on to other occupations which led him to travel widely across Java. He now established a re-formed organisation, called Sarekat Islam, on 10 September 1912. The original commercial orientation and anti-Chinese element remained and are evident in the association's newsletter, Oostersch Hindoë ("The Indies Messenger"). But Sarekat Islam soon became a mass movement whose membership went far beyond the elite group responsible for its foundation. It grew phenomenally and drew in diverse elements: not only the small group of Muslim entrepreneurs from whom the founders had been drawn, but also Muslims from the world of the mosque school, Islamic reformists, and, increasingly, the peasant masses. Already by 1914 it had over 360,000 members, and by the time of its first national congress in June 1916 it had recruited more than 80,000 members outside Java.

Islam had had a leading role in large-scale political mobilisation for many centuries. Yet this mobilisation had been pre-modern in its organisational form, being led by traditional elites such as the hereditary aristocracies of the Indies or the elites associated with mosque schools and tarekats. In Java, mobilisation in the name of Islam had been led by princes, and Islam had been largely subordinated to pre-Islamic Javanese political values. Many Islamic concepts had been redefined to accommodate to a highly monarchocentric policy in which service to the ruler (ngawula) was the supreme moral virtue, and Javanese rulers claimed to be endowed with both wabiy [q. v.] and the Light of Prophecy. From the foundation of Sarekat Islam it is clear that Islam had freed itself from the old royalist ideology and paternalism of the sultanate and had done much to make possible an indigenous political life based on associational forms, on Gesellschaft rather than Gemeinschaft. Indonesia's links with the heartland of Islam had also greatly

strengthened since the late 19th century through a large increase in those making the Pilgrimage, who re-formed a sort of intern party within Sarekat Islam norms and also brought back a better knowledge of political and military developments overseas. At the local level, the modernising aspect of Sarekat Islam was less evident, indeed was sometimes replaced by a protest against the cost to the peasantry of economic modernisation under the colonial aegis, or against the Chinese money-lenders to whom indebted or tax-burdened peasants had to turn. The years 1913-14 saw a peak of anti-Chinese violence. To say "I am a Muslim" at this period was a way for those at the bottom of the colonial racial hierarchy (below Dutch, Eurasians, and Chinese) to claim a more positive identity than that allocated to them by the Dutch term inlanders (native). Sarekat Islam by its very name tapped this sense of identity and grievance. In addition, Tjokroaminoto was a charismatic leader who became a focus for the messianic beliefs that had been a prominent feature of traditional movements, whatever their core aspirations, whether liberal or socialist. The role of Islam in introducing more modern concepts into political mobilisation in the Indies was certainly not uncontested. Socialist ideas first developed a significant presence in the Indies just at the time Sarekat Islam was established. The Dutch Socialist Sneevliet founded the ISDV (Indische Sociaal-Democratische Vereniging, Indies Social Democratic Union) in May 1914 and, after a lack of success with the Eurasian community, turned his attention to Sarekat Islam. From 1916, the Semarang branch of Sarekat Islam was the centre of the Socialist wing, led by the 17-year-old Semaun. Semarang was then the most progressive and liberal city in the Indies, the centre of an embryonic proletariat (associated with the railways and service industries) and of trade union activity. At the second Sarekat Islam conference in 1917, the Semarang group moved to insert into the organisation’s programme the combating of “sinful” (i.e. foreign) capitalism, later to be extended to capitalism in general. The position of the Semarang group was strengthened after the October Revolution in Russia (which led to a dramatic rise in membership of Sarekat Islam), and they were joined by two central Javanese aristocrats, Darsono and Surjopranoto. An opposing group was led by Abdul Muin and Hadji Agus Salim (who had originally joined Sarekat Islam as a government spy but had been converted to its cause) were branded as tools of the colonial government. At the third Sarekat Islam conference, Tjokroaminoto succeeded in reconciling the two factions.

1919 was a turbulent year on Java, with sugar plantations set on fire and peasants refusing to perform their duties. In mid-year there occurred local incidents first in Sulawesi and then in West Java. The latter case ended in the slaughter by government troops of a Garut landowner, Hadji Hasan, and members of his family, after they had shut themselves into their house and refused to hand over the rice tax. It was claimed that there was within Sarekat Islam a clandestine “Section B”, dedicated to the overthrow of colonial rule. As planters and others in the European community panicked at the spectre of a Muslim uprising, the government reacted sharply, leading to a series of mass sentences and trials. It was also found that many of the middle-class Muslims who had founded Sarekat Islam to leave the organisation. The relatively liberal attitude to Islam initiated by Snouck Hurgronje’s policy advice to the colonial government was under serious challenge. In May 1920 the ISDV changed its name to Perserikatan Komunis di Indeia (“Indies Communist Union”), later “Party”) and in July 1920 the Communist Party of Indonesia was established. The latter now published the book Islam and Socialism (Islam dan Sosialisme) which represents a hardening of his attitude to Marxism. In it he attempts to demonstrate that Islamic socialism is the most perfect kind, not only by reference to Muhammad’s teachings but also by a reconstruction of society under the Orthodox Caliphs. He says that the state owned land, which was the same as ownership by the people; that society was neither autocratic nor bureaucratic; and that the army was a people’s army. Among the socialist regulations in force were prohibition of ribā, the institution of zakāt in lieu of the traditional taxes, the abolition of the traditional feasts and commemorations, the prohibition of communal prayers and during the Pilgrimage. As planters and their families panicked at the spectre of a Muslim uprising in 1919, the government reacted sharply, leading to a series of mass sentences and trials. It was also found that many of the middle-class Muslims who had founded Sarekat Islam to leave the organisation. Among the socialist regulations in force were prohibition of ribā, the institution of zakāt in lieu of the traditional taxes, the abolition of the traditional feasts and commemorations, the prohibition of communal prayers and during the Pilgrimage. In this book, Tjokroaminoto strongly attacks historical materialism as denying God, and deifying material things. He condemns Bebel’s famous dictum to the effect that it is not that God created man, but that man has invented God. Much of the work is organised not around specifically socialist ideas but around the ideals of Liberty, Equality, and Fraternity, in the context of Islamic thinkers of the period felt the need to justify Islam in terms of Western political ideals, whether liberal or socialist.

December 1927 saw the first federation of Indonesian political parties (PPPKI: Permusyawaratan Perhatian Politik Kabangsaan Indonesia, “Union of Indonesian Political Associations”), subsequent to the elimination of the Communist Party after an unsuccessful localised uprising in 1926. This began a phase in which there was pressure on all political parties to define or re-define themselves in terms of the nationalist focus indicated by the use of the word “Indonesia”. Sarekat Islam duly changed its name to Partai Sarekat Islam Indonesia (“The Sarekat Islam Party of Indonesia”). After Tjokroaminoto’s death in 1934, PSI lost much of its influence, and from 1937 on-
wards, a number of breakaway movements left to establish separate parties, adding to the plurality of Islamic organisations, which already encompassed the social movement Muhammadiyah (set up in the same year as Sarekat Islam) and the Nasyiriah (also known as the association of Ulama”) set up in 1926. In an evermore repressive colonial situation, it was impossible for any movement to replicate the early success of Sarekat Islam in mass mobilisation: in 1939, PSII, though still larger than any other political party, had only 12,000 members left. PSII was dissolved at the beginning of the Japanese Occupation, and in November 1943 the Nahdatul Ulama, ("Indonesian Muslim Council" or Masjumi) as a single organisational vehicle for Islam. This unity lasted until 1952, when the Nahdatul Ulama split off, and Indonesia’s first elections in 1955 were contested by a number of Islamic parties which, though they jointly obtained a majority of the votes, were unable to co-operate to form a government based on Islam.

Sarekat Islam is thus paradigmatic of that of political Islam in Indonesia, exhibiting a tremendous capacity for mass mobilisation, the necessity to address powerful competing ideologies both traditional and modern, and the effect of continuing internal divisions in preventing the translation of mass appeal into political dominance.

**ANN KUMAR**

**ŠARF (a.), a term of Arabic grammar. Literally meaning “averting”, “divergence”, this term became in later grammar the current indication for the science of “morphology” as a synonym for *tasrif* [v.]. In the early stages of Arabic grammar this term was used in completely different senses. In Sibawayhi’s Kitab, šarf is almost always connected with the verb *insarf* in the sense of “to be fully declined”, said of a noun. In Sibawayhi’s theory of grammar the normal situation for a noun is to have three case-endings to indicate the three cases (in Western grammars of Arabic such words are said to be triptotic in contrast to words that have only two endings, which are said to be diphtotic). This normal situation obtains when the noun is as near as possible to its lightest, i.e. most flexible form, the triliteral masculine noun. Such a noun is said to be completely *mutamakkin*, i.e. having full freedom of movement (synonym *mutanarj*). When a noun is diverted from this normal pattern it runs the risk of losing its full declension. This at least is the way the later grammarians (as for instance al-Zadjadi’s K. mā *yanšari* *tta*-*mā lā *yanšari*) view the behaviour of these forms. But it is clear that the Kitab šarf matters are somewhat different; here the emphasis is on the absence or presence of nunciation. The lightness of a word (i.e. its unmarked use with maximum syntactic freedom) enables it to carry nunciation, but when it deviates from its normal pattern, it becomes heavier (i.e. more marked) and as a consequence, loses the nunciation and full declinability (*tark al-*šarf, e.g. Kitab, i, 163.11; ii, 2.11 and many other examples, cf. Troupeau, 1976, 123, who translates šarf with “conversion”). It is difficult to explain this use from the lexical meaning of the word, since it is precisely the adherence to a certain pattern that brings nunciation and thus šarf, and only when a word is diverted from its normal pattern (*mašruf an al-*šafi) *lā lā al-*wa* is *mašruf* as al-Khalil says, *apud* Sibawayhi, Kitab, ii, 14.5.11, who himself uses the term *mašruf* an (in the same passage) it loses the šarf (for a detailed analysis of the treatment of this issue in the Kitab, see Reuschel, 1939, 41-7).

One explanation for application of this rule may be the behaviour of a word like *amīs* “yesterday”. Normally, this word has no nunciation and only two endings, since it is used as a temporal adjunct (*šarf*), i.e. in a more restricted construction than the syntactically free words. But when it is diverted from its usual category and used as a proper name it becomes fully declinable with nunciation (*mašruf*; Kitab, ii, 43.6 *la*a 9-*amīs* ḥanāna *layla* *āla* *l-hadd*). Perhaps this is the origin of the term: whenever words are diverted from their own category to another and then they acquire nunciation and full declinability. If this explanation is correct, the original meaning of the term has been generalised to all words receiving nunciation (and full declinability). In later grammar, the theory of full declinability was expressed in a canonical list of factors that cause words to lose one of their endings (the so-called *mašruf* or *šarf*): two factors from this list in combination (e.g. when a word is both feminine and used as proper name) cause a word to become diphtotic (cf. e.g. in al-Zamakhshari’s *Mufassal*, 9-10).

The discussions in this part of the Kitab are typically morphological problems, in which the test of the proper names is used as a device to find out what the status of a word is and to which category it belongs (cf. Carter, 1983). These problems have nothing to do with the syntactic relations within the sentence, since diphtotic words, even though they have only two endings, are syntactically used in all three cases. This may explain why in later grammar šarf was used as a synonym for *tasrif* and became one of the normal terms for “morphology”.

The lexical meaning of *šarf* “to divert, avert” is much clearer in the other sense in which šarf is used in early grammar, in particular by al-Farrā’. Here it means the divergence or non-identity between two constituents of the sentence. In the sentence *la*-*tal-*šarf *al-*samaka tasqarba *l-habana*, for instance, the sub-junctive of *tashraba* is explained by al-Farrā’ by a principle of “divergence” between the two verbs. This construction may be compared to the use of the accusative indicating referential non-identity in a sentence such as *zaydun khafjaka*, as against the sentence *zaydun sabhuka*, where the nominative indicates the identity of the two nouns. According to Carter, 1975, this is Sibawayhi’s theory (he uses the verb *šarf* in connection with this construction, Kitab, i, 418-19), but it became associated with Kūfān grammar under the name of *šarf*, which continued to be used in this sense in later explanations of the construction (cf. e.g. Ibn al-Anbārī, *Inṣāf*, 229-30; Owens, 1990, 157 f.; Baalbaki, 1981, 22). The term is, indeed, fairly frequent in al-Farrā’ *Mā’tān* (e.g. i, 33; other instances in Carter, 1973, 298, n. 1).
SARF — SARI

SARF, a term of Islamic law [see Suppl.], a general geographical term specifically applied in southeastern Persia to the mountain region in the modern Persian province of Bulkūstān and Sistān adjoining the frontier with Pakistan-8.

In modern Persia, Sari is the ninth metre, and the first metre of the fourth circle. The modern Persian province of Baluchistan and a general geographical term specifically applied in north-west to southeast, and include the volcanic (still partially active) Kuh-i Bazman (3,489 m/11,478 feet) which connects the Sarhadd with the Djabal outliers, such as the Kuh-i Taftan (4,042 m/13,262 feet), any note is Khwāṣ or Vashī, in a broad and fertile valley on the western slopes of the Sarhadd mountain chain and situated on the road linking Zāhīdān (Zahedan) with Irānhār and Cāhāhār on the Makrān [q.v.] coast.

The Sarhadd's role in history has been mainly as a refuge area e.g. for the Mīhrabānī Malik of Nimruz in the 9th/15th century (see C.E. Bosworth, The history of the Saffarids of Sistan and the Maliks of Nīmrūz (247-861 to 949/1542-3), Costa Mesa, Calif. and New York 1994, 463-5). By the later 19th century, the region had become largely depopulated, with irrigation and agriculture abandoned, because of endemic banditry; this last provoked in 1916 a punitive expedition of the Indian Army mounted from British Balūchistān into the Kūh-i Mārofī (see R.E.H. Dyer, The raiders of the Sarhād, being an account of a campaign of arms and bluff against the brigands of the Persia-Baluchi border during the Great War, London 1921).

(C.E. Bosworth)

SARHANG (p.), a term denoting a rank of officer or commander in mediaeval Persian armies and paramilitary groups (cf. Vuller, Lexicon persico-latinum, ii, 261-2, 293; dux exercitus, praefectus). Thus the sarhangs were leaders of bands of 'ṣayyārs [q.v.] or Sunni orthodox vigilantes combating the Khāridzhīs in the 3rd/9th century Sīstān, and Yaḵūb b. al-Layth, founder of the Saffārī dynasty [q.v.], embarked on his power to rise by becoming a 'ṣayyār forces of a local leader in Būst, Šāhī b. al-Nadār al-Kinānī (Tāvšīq-i Sīstān, ed. Bahār, passim; Gardīzī, Zayn al-ḥāvrār, ed. Nazim, 11, ed. Habībī, 139; see the discussion by Bosworth in BSOAS, xxxi (1968), 539-40).

In modern Persia, sarhang denotes the rank of colonel.

Bibliography: Given in the article.

SARĪ, Arabic form Sarīya, a town of the Caspian region of Persia, in mediaeval Islamic times within the province of Tabaristān, now in the modern province of Mazandarān [q.v.] (lat. 36° 33' N., long. 53° 06' E.). It lies some 52 km/30 miles from the Caspian Sea on the Tūzīn river (Hudūd al-ṣām, tr. 77: Tūzīn-Rūḏh) and in the hot and humid coastal plain; the surrounding region has always been famous for its silk production and its fruits.

Whether Sarī had any pre-Islamic history is unclear, though Islamic lore asigned its foundation to the legendary Fiṣḥādīd [q.v.] figure, Tahmūrīlah. Details are lacking of the first appearance of the Arabians there; this may have been in the time of 'Uṯmān's governor of Kūfah, Saʿīd b. al-ʿĀṣ [q.v.]. Sūlāyman b. ʿAbd al-Malik's governor Yazīd b. al-Muḥallāb [see Muhallābids] temporarily occupied the town, but was compelled to withdraw by the Dābūyīd [see Dābūyā] Ḳịpsābāh Farrūkhān. The first Islamic building erected there was a congregational mosque built by the first ʿAbbaṣīd governor of Tabaristān, Abu ʿ1-Khūdāb, in 430/1040-5. It remained generally the capital of the indigenous Ṣipāḥbāhs, with the Arab governors installed at nearby Amūl [q.v.], although in the 3rd/9th century the Tāhirīd governors and the local ʿAlīdīs moved their capital to Sarī, and the Bawandīds remained there till the 7th/13th century. The town was flourishing in the 4th/10th century, according to the geographers, with a citadel surrounded by a moat and rampart and a flourishing textiles industry.

There is little mention of Sarī in later Islamic times. It suffered on Mongol times and was sacked by Timūr's troops in 795/1393, yet recovered and remained the capital of Mazandarān till the Zands, who transferred it to Bārūrūfīsh. Āghā Muḥammad Kāḏār Kāḏārī brought it back again to Sarī, but in the 19th century the town declined in favour of Amūl and Bārūrūfīsh-Bābul and only revived in the 20th century with the advent of the railway and of better road communications during the Pahlāvī period. It is now the capital both of a shahrestān or canton of the same name and of the province (ustān) of Mazandarān; in ca. 1950 the population was 25,000, but this has now risen to 185,844 (Preliminary results of the 1991 census, Statistical Centre of Iran, Population Division). See further, Mazandarān.

(C.E. Bosworth)

SARĪ, an Arabic metre with the following three main types, each consisting of six feet to the line and differing in the last foot (darb) only:

(a) -__-__- -__-__-__- -__-__-__- -
(b) -__-__- -__-__-__- -__-__-__- -
(c) -__-__- -__-__-__- -__-__-__- -

(in which = represents an overlong syllable i.e. consonant + long vowel + consonant). The first and fourth foot come in three variants: - _ _ _ _ _ and - _ _ _ _ _ - . The second and fifth foot have either - _ _ _ _ _ - or - _ _ _ _ _ - . In the work of Ibn al-Rūmī (221-76/836-96 [q.v.]), the distichs 36° 33' N., long. 53° 06' E.}

In Khālīlīan theory [see ʿarūf], sarī is the ninth metre, and the first metre of the fourth circle. The
scansion of the circle metre is mustaf'ilun mustaj'ilun
mqf'dtu (twice). Types (a), (b) ... and other
patrons. Al-Sarî himself was, however, not immune to
the accusation of sarika: Ibn al-Nadîm—amidst a
awwal al-sari*, thdnî 'l-sari*, thdlith al-sari*.

In practice, however, types (d) and (e) are called ra'djaz
qua by many authorities (cf. Ibn Râshîd, *Umda,
308, 323, 675, 798, 801, 802, 808; but note
that the fact of the metre which begins on p. 297
is said to be min mashtur al-ra'djaz).

A different system is found in al-Djoharî (d. 308/921[?]). He does not recognize the sarî
as an independent metre, but considers the six-
foot types as sub-forms of a barîid from which the second foot of each hemistich has been left out ('ârid
er-awrâka, 23-4; Ibn Râshîd, *Umda, i, 137, ii, 303).
The three-foot or maqûrî types, sc. (d) and (e) above,
are, according to him, sub-forms of ra'djaz ('ârid
er-awrâka, 46 n. 15).

For further statistics and a discussion of the growing
importance of the metre in 'Abbâsid times, see J.
Bencheikh, Poétique arabe, 203-40.

AL-SARÎ B. AHMAD B. AL-SARÎ AL-RAFFÂ

He was born in Mawsil, where his father apprenticed
to the clothes-menders/jobbing tailors (raffâ‘un), hence his nickname, which is, however, not yet used by the contemporary source Ibn al-Nadîm (Fihrist, 169). In spite of his lowly occupation he acquired his nature to them to appropriate (ghasabd) verses they lik-
ed (Fihrist, 169, i, 12), but he is otherwise said to have been uneducated. After achieving a certain fame as a poet, he went to the Hamdânîd court in Aleppo in 345/956-7 (for the year, see Ibn d-Adîm, *Bughâya, ii, 428) and found ac-
ceptance among the court poets of Sayf al-Dawla.

The main feature of al-Sarî’s life as depicted in the sources is his constant feud with the two Khâlidî brothers, Abu Bakr Muhammad b. Hâshîm and Abu Uthman Sa’d b. Hâshîm (see al-Khâlidîyyân).

They too came from Mawsil and it seems that already early on al-Sarî accused them of stealing his own as well as other poets’ poetry. Ibn al-Nadîm, in his paraphrase on the Khâlidîs, concurs that it was second nature to them to appropriate (ghasabâ) verses they lik-
ed (Fihrist, 169, i, 21-3). To make the accusation stick, al-Sarî used the devious method of making copies of the dîwân of Kushadjim (d. 350/961 [q.v.]), whom he admired and emulated, and including the best poems of the Khâlidîs in them (al-Thâ’alîbî, *Yatîma, ii, 118; Yâkût, *Irshad, xi, 185). For the time of the Muhallabi’s successor al-Abbâs b. al-Husayn al-Sîrâzî (appointed vizier in 356/967, d. 362/973 [q.v.]) we have an anecdote related by Mu-
hâssîn b. Ibrâhim al-Sâbî (d. 401/1010; see al-
sârî, no. 8), according to which al-Sarî must have been a man of the most stated means at the time (apud Ibn d-Adîm, *Bughâya, ii, 429-30).

The main feature of al-Sarî’s life as depicted in the sources is his constant feud with the two Khâlidî brothers, Abu Bakr Muhammad b. Hâshîm and Abu Uthman Sa’d b. Hâshîm (see al-Khâlidîyyân). They too came from Mawsil and it seems that already early on al-Sarî accused them of stealing his own as well as other poets’ poetry. Ibn al-Nadîm, in his paraphrase on the Khâlidîs, concurs that it was second nature to them to appropriate (ghasabâ) verses they liked (Fihrist, 169, i, 21-3). To make the accusation stick, al-Sarî used the devious method of making copies of the dîwân of Kushadjim (d. ca. 350/961 [q.v.]), whom he admired and emulated, and including the best poems of the Khâlidîs in them (al-Thâ’alîbî, *Yatîma, ii, 118; Yâkût, *Irshad, xi, 183; Ibn Khullîkan, ii, 360). The feud between al-Sarî and his adversaries was a long-lasting one; in the account of al-Khâjî al-Taghîbdî, the first of this feud is described in detail (al-Mu‘âsharât, ii, 30-1). In the second passage, al-Sarî’s nemesis, who succeed in poisoning his relations with Sayf al-Dawla, al-Wâzîr al-Muhabbî, and other patrons. Al-Sarî himself was, however, not immune to the accusation of sarîka: Ibn al-Nadîm—amidst a
string of admiring epithets—calls him a man "of many thefts" (kathir al-sarika, Fihrist, 169, 1. 28). It is, however, important here to distinguish between two kinds of plagiarism, (a) taking possession (musa'ada) of other people's poems (musa'ada, for the term see e.g. Yatima, ii, 119, 1. 5), and (b) taking up, and playing with, existing and attributable motifs. Both play a role in al-Sari's literary life. On the one hand, Ibn al-Nadim mentions that al-Sari is said to have appropriated the poetry of his teacher Ibn Abi Barrak (Fihrist, 169, 1. 12), and al-Tha'alibī writes that he discovered a number of identical poems in the collection of poetry of the other Khalidīs in the handwriting of Abū 'Uthmān, the younger of the two poets, and the collection of al-Sari's poetry in the poet's own handwriting, both belonging to the bibliophile Abū Nasr Sahl b. al-Marzubān (Yatima, ii, 118-19; one of the poems he quotes in this regard is actually also included in Kūshādīm, Diwān, ed. Khayriyya M. Mahfūz, Baghdād 1390/1970, 230, no. 210, and has even a fourth avatar in an unattributed appearance in al-Sari's own anthology K. al-Muḥādib [see below, iv, 326, no. 717]. Al-Tha'alibī declares himself unable to decide whether the duplication of poems is due to tawārīḍ "two poets having the exact same idea" or musā'ātā "appropriating another poet's poems" (Yatima, ii, 119, ll. 4-5). If theft is involved, it is still unclear who is the thief and who the victim. In his chapter on the Khalidīs brothers, al-Tha'alibī thus uses the term tawārīḍ "two-way theft" to characterise the cases of strong similarity between the Khalidīs and al-Sari which he presents to the reader (Yatima, ii, 184-6 [Abū Bakr], and 199-201 [Abū 'Uthmān]). He also makes an important observation concerning the reason that made the free copying, or malicious stealing, of so many poems possible: there is, between al-Sari and the Khalidīs, "an amazing agreement and a close similarity in handling the reins of the rhymes and fashioning the adornment of the motifs" (Yatima, ii, 119, ll. 5-6). The only way of redress that a poet had to combat an infringement of his "copyright" was to complain (tazallum) about this injustice to the authorities, most commonly to the recipients of their poetry. A fair amount of al-Sari's poems contain such complaints against the Khalidīs.

The other type of plagiarism is the more regular and—in an age of mannerist poetics—hardly reprehensible type of adopting and, if possible, imitating the motives of other poets. Al-Tha'alibī gives a list of 44 such cases and praises al-Sari for his skillful "plagiarism" (huwa al-sarika wa-daydut al-akhlī, see Yatima, ii, 120, penult.). The "victims" are almost all "modern" poets, led by al-Mutanabbī who serves as a model twelve times. Al-Sari al-Raffāī has left three works, two of which, the Diwān and al-Mushūb wa l-mashārīf wa l-maṣāhīr, have been preserved. The latter is an anthology of the maṣārin-catalogue type, i.e. a topically arranged selection of poetic fragments with descriptions of the various parts of the beloved, of the lover, of spring, and of wine. The majority of the poems are "Moderns", but Umayyad poets have their fair share, while pre-Islamic ones occur very rarely. The Diwān was, according to Ibn al-Nadim (Fihrist, 169, penult.), edited by the poet himself shortly before his death on ca. 300 leaves which then added more material to it. It was also edited by an unknown "modern" adīh in the alphabetic arrangement according to rhyme letters. This may mean that the poet's edition was not alphabetical. If so, the situation may be reflected in the surviving manuscripts, some of which are alphabetical, while others are not the description of the ms. in Diwān, i, 188-208). However, the situation was very likely more complicated: al-Tha'alibī enumerates three sources for his knowledge of al-Sari's poetry: the Diwān as brought to him from Baghdād, a number of outstanding poems recited to him and given for copying by the famous poet and epistolographer Abū Bakr al-Khāṣāzmī (d. 383/993 [q.v. under al-Khāṣāzmī]), and a volume (muqallada) in al-Sari's own hand-writing in the possession of Abū Nasr Sahl b. al-Marzubān and containing many additions to the Diwān. But still, he says, he found in the secondary literary fragments of poems by al-Sari that he could not trace in his sources. Ibn al-'Āṣim lists nine people, among them Abū Bakr al-Khāṣāzmī, who are said to have transmitted al-Sari's poetry (Baghya, i, 428). The details of the early transmission of al-Sari's poetry are thus still obscure.

The opinions about al-Sari's stature as a poet were generally very high. He is even called "next in line" (nādi) after al-Mutanabbī and superior to him in tenderness (riṣāla) (on the title-page of the Diwān ms. Laleli 174, ed. Misbah Ghalawundī [?], 4 vols. [vol. 4, ed. Māqīūd Ḥasan al-Dhāḥabī, Damascus 1306-7/1987 (the ms. Vienna 359 bearing the same title is not al-Sari's work; the ed. has identified it as a rearranged version of Ḥalībat al-aṣmā' by al-Nawādīq [q.v.], see introd., n. 34]). The index of poetically described objects in the recent Diwān edition lists 150 items (!).

Not all of them yield monothematic poems, many are integrated into larger frameworks. Some of these seem to be unusual polythematic structures, possibly created by al-Sari. Thus poem no. 353 (Diwān, ii, 464-5) starts with a description of the morning and a rooster, leads on to a wine song, and ends with a panegyric on Sayf al-Dawāl. An interesting subgenre with al-Sari is his descriptions of his own poetry, of which al-Tha'alibī gives a small collection of examples (Yatima, ii). A close literary study is still lacking.

W. P. HIEHILSCHER

ṢĀRĪ AL-SAKĀTĪ, Abu 'l-Ḥasan b. al-Mughallax, important Sūfi of the second generation of Sūfīs in Baghdād, 155-253/772-867.
Biography

Born as the son of a pedlar (sakati) who had settled at an early date in the Karkh [q. v.] quarter of Baghdad, Sari rose to be a distinguished wholesale trader, known for his honesty (Ta'rikh Bagdad = TB, ix, 189). Like other merchants, he devoted himself to hadith studies which, as the names of his teachers indicate, must have brought him from Baghdad via Kufa to Mecca (Hilya, x, 127).

At the age of ca. 35-40 he encountered the saint Ma'ruf al-Karkhi (d. 815 [q. v.]), which brought him from his homeland (ibid., ix, 117). His wandering years ended around 218/833 with his definite return to Baghdad. Probably already before his journeys he had won there Bishr al-Hafi (d. 840 [q. v.] as a paternal friend. For his views he was also indebted to Fu'dayl b. 'Iyad (d. 803 [q. v.]), whom he did not, however, come to know personally. He does not seem to have maintained close relations with al-Muhâsibi (d. 857 [q. v.]), who was very closely connected to him as far as Sufi ethics and self-education were concerned (cf. J. van Ess, Gedankenwelt, 10).

Sari in his statements as well as in the accounts about him, Sari appears as a noble, unselfish, helpful and dynamic personality who, as a member of the Islamic community, felt himself responsible for the well-being of many a Kur 'ân reader on the ground of his piety and religious knowledge, which he misuses for this, Luma', 201, l. 3; Meier, Abû Sa'id, 304; on a higher one, he censures the claim to social authority from that from which the hands are free" (Hilya, x, 116). From a certain moment onwards he withdrew completely into his own world of experience and permitted only intimates to attend to him. For this fourth period of Sari's life, too, people in Baghdad had a concrete explanation. Once he was teaching in his circle when the misanthrope Abu Dja'far al-Sammâk passed and marred the holding of further sessions by remarking: "Abu 'l-Hasan, you have become the resting-place of the idlers" (TB, xiv, 411).

Sari's character

In his statements as well as in the accounts about him, Sari appears as a noble, unselfish, helpful and dynamic personality who, as a member of the Islamic community, felt himself responsible for the well-being of his fellow men (cf. TB, ix, 188). This attitude had already won him the favour of Ma'ruf al-Karkhi and made him later responsive to the futuwwa [q. v.] of Ibrahim b. Adham, who did every kind of work for others but would himself never lay claim to their help. The after-effects of his influence also sharpened Sari's sensitivity towards good manners (adab, cf. Hilya, x, 120, l. 20-1, 122, l. 18-20). Like Ibn Adham, Sari was a man of action and not a theoretician. Knowledge ('ilm) interested him only in so far as it could be turned into deed ('amâl). He shared Bishr al-Hâfi's scepticism of knowledge of the hadith; according to him, it was "no provision for the hereafter" (ibid., x, 127). Consequently, he transmitted only traditions which were illustrated by his own attitude on which he would support the latter. He was no less at a loss with theology, even if occasionally he knew how to gain a Sufi aspect from a theologumenon (cf. Muhtasar Ta'rikh Dimashq = MTD, ix, 227 in the middle). There was only one knowledge for which he had a burning interest, namely, the paths to self-knowledge and self-education; as a protagonist of this field of knowledge, he particularly esteemed al-Mu'âshibî (Kû 'û al-Salih, ii, 35, l. 11-12 = Gramlich, Die Naturwissenschaft, 1, 6).

Like Ibn Adham, Sari was a man of action and not a theoretician. Knowledge ('ilm) interested him only in so far as it could be turned into deed ('amâl). He shared Bishr al-Hâfi's scepticism of knowledge of the hadith; according to him, it was "no provision for the hereafter" (ibid., x, 127). Consequently, he transmitted only traditions which were illustrated by his own attitude on which he would support the latter. He was no less at a loss with theology, even if occasionally he knew how to gain a Sufi aspect from a theologumenon (cf. Muhtasar Ta'rikh Dimashq = MTD, ix, 227 in the middle). There was only one knowledge for which he had a burning interest, namely, the paths to self-knowledge and self-education; as a protagonist of this field of knowledge, he particularly esteemed al-Mu'âshibî (Kû 'û al-Salih, ii, 35, l. 11-12 = Gramlich, Die Naturwissenschaft, 1, 6).

Other main features of Sari's character were his sincerity and veracity. Bishr al-Hâfi had trained him in the freedom not to fool others in anything (Luma', 373, l. 5-8), and Sari himself demanded that nothing should be done or left out "on behalf of people" but only on behalf of God alone (Sifat al-safa, ii, 213), in other words, that there should be practised what in 'Irâk was understood as ikhlas [q. v.] and which Sari, in association with al-Djurtdjânî, still called tâdâl al-irâda "purification of intention" (al-Sulâmî, 51; for al-Djurtdjânî, see Hilya, x, 112). In the method of carrying through this attitude against all impulses of hypocrisy (rija'), he largely followed al-Mu'âshibî (cf. ibid., x, 125, and van Ess, Gedankenwelt, 149 f.).

Above all, he fought a particular case of hypocrisy, which one might qualify as "business by means of religion". On a lower level he condemns "eating thanks to one's religion" (Hilya, x, 117, l. 7-10; see for this, Luma', 201, l. 3; Meier, Abû Sa'id, 304); on a higher one, he censures the claim to social authority from that from which the hands are free" (Hilya, x, 116). From a certain moment onwards he withdrew completely into his own world of experience and permitted only intimates to attend to him. For this fourth period of Sari's life, too, people in Baghdad had a concrete explanation. Once he was teaching in his circle when the misanthrope Abu Dja'far al-Sammâk passed and marred the holding of further sessions by remarking: "Abu 'l-Hasan, you have become the resting-place of the idlers" (TB, xiv, 411).

Sari's character

In his statements as well as in the accounts about him, Sari appears as a noble, unselfish, helpful and dynamic personality who, as a member of the Islamic community, felt himself responsible for the well-being of many a Kur 'ân reader on the ground of his piety and religious knowledge, which he misuses for this, Luma', 201, l. 3; Meier, Abû Sa'id, 304; on a higher one, he censures the claim to social authority from that from which the hands are free" (Hilya, x, 116). For this fourth period of Sari's life, too, people in Baghdad had a concrete explanation. Once he was teaching in his circle when the misanthrope Abu Dja'far al-Sammâk passed and marred the holding of further sessions by remarking: "Abu 'l-Hasan, you have become the resting-place of the idlers" (TB, xiv, 411).

Sari's character

In his statements as well as in the accounts about him, Sari appears as a noble, unselfish, helpful and dynamic personality who, as a member of the Islamic community, felt himself responsible for the well-being of his fellow men (cf. TB, ix, 188). This attitude had already won him the favour of Ma'ruf al-Karkhi and made him later responsive to the futuwwa [q. v.] of Ibrahim b. Adham, who did every kind of work for others but would himself never lay claim to their help. The after-effects of his influence also sharpened Sari's sensitivity towards good manners (adab, cf. Hilya, x, 120, l. 20-1, 122, l. 18-20). Like Ibn Adham, Sari was a man of action and not a theoretician. Knowledge ('ilm) interested him only in so far as it could be turned into deed ('amâl). He shared Bishr al-Hâfi's scepticism of knowledge of the hadith; according to him, it was "no provision for the hereafter" (ibid., x, 127). Consequently, he transmitted only traditions which were illustrated by his own attitude on which he would support the latter. He was no less at a loss with theology, even if occasionally he knew how to gain a Sufi aspect from a theologumenon (cf. Muhtasar Ta'rikh Dimashq = MTD, ix, 227 in the middle). There was only one knowledge for which he had a burning interest, namely, the paths to self-knowledge and self-education; as a protagonist of this field of knowledge, he particularly esteemed al-Mu'âshibî (Kû 'û al-Salih, ii, 35, l. 11-12 = Gramlich, Die Naturwissenschaft, 1, 6).

Other main features of Sari's character were his sincerity and veracity. Bishr al-Hâfi had trained him in the freedom not to fool others in anything (Luma', 373, l. 5-8), and Sari himself demanded that nothing should be done or left out "on behalf of people" but only on behalf of God alone (Sifat al-safa, ii, 213), in other words, that there should be practised what in 'Irâk was understood as ikhlas [q. v.] and which Sari, in association with al-Djurtdjânî, still called tâdâl al-irâda "purification of intention" (al-Sulâmî, 51; for al-Djurtdjânî, see Hilya, x, 112). In the method of carrying through this attitude against all impulses of hypocrisy (rija'), he largely followed al-Mu'âshibî (cf. ibid., x, 125, and van Ess, Gedankenwelt, 149 f.).

Above all, he fought a particular case of hypocrisy, which one might qualify as "business by means of religion". On a lower level he condemns "eating thanks to one's religion" (Hilya, x, 117, l. 7-10; see for this, Luma', 201, l. 3; Meier, Abû Sa'id, 304); on a higher one, he censures the claim to social authority from that from which the hands are free" (Hilya, x, 116). From a certain moment onwards he withdrew completely into his own world of experience and permitted only intimates to attend to him. For this fourth period of Sari's life, too, people in Baghdad had a concrete explanation. Once he was teaching in his circle when the misanthrope Abu Dja'far al-Sammâk passed and marred the holding of further sessions by remarking: "Abu 'l-Hasan, you have become the resting-place of the idlers" (TB, xiv, 411).
The idea of narrowing what is permitted by means of wara* in such a way that zuhd practically loses its object goes also back to this heritage. This was in any case the topic in which Sarî proceeded (TB, ix, 190). When sure of their irreproachable, he was at least as well known for his humble and sincere behavior as by all means open to worldly titbits (MTD, ix, 217 below). But he followed Ibn Adhâm's ideas of wara* also in another aspect; not only did he not want to eat anything which might burden him before God, but neither should food render him indebted to any God (cf. ibïda [q.v.]), excessive service of God as practised by Das Sendschreiben, Kushayri, 59, 11. 9-10 = Gramlich, Das Sendschreiben, 41).

All along there had been a latent conflict between excessive service of God ('ibâda [q.v.]), as practised by the ascetics, and social requirements. Initially, Sarî had clearly decided in favour of the latter. He transmitted to his pupils (al-Sulâmî, 165, ll. 9-10) the relevant hadîth, taken over from Ma'rûf, "He who fulfills a wish of his Muslim brother is rewarded in the same way as one who has served God during all his life." (Manâtib, 626-7). In the last period of his life, however, he recommends as "the direct path into paradise" that "one should occupy oneself with the service of God, turn only to Him in such a way that there does not remain anything else inside oneself." (Hîyâ, x, 119). Ascetic piety expressed in works is certainly not at stake any more here, but it was on the one hand a matter of the delight of being alone with God (cf. ibïd., x, 117, l. 14, 253, l. 10) and on the other a matter of avoiding temptations, no less important for Sarî (al-Sulâmî, 50, l. 6-7).

With the conviction of his own depravity, Sarî enters the field of hyperbolism. This conviction may have been furthered by continuous self-criticism and by examination of his conscience, but it also corresponds to an old praxis of exercise in humility (cf. van Ess, Gedankenwelt, 158): one forces oneself to the notion that one is worse than everybody else. Fudayl b. 'Iyâd [q.v.] held the same view (Hîyâ, viii, 101). To the alarm of his pupils, Sarî did not even wish to have preference over homosexual boys (al-Sulâmî, 49, l. 10 ff.) and continuously squinted at the tip of his nose in order to investigate whether his face had not already become black because of his depravity (Hîyâ, x, 116; this passage became famous, cf. Ta'âarruf, 31, l. 8).

Sarî also gives a new turn to another ascetic motive, namely ostentatious and continuous mourning as it was practiced by the bakkâ'ûn and later by Fudayl b. 'Iyâd. Sarî still allows for this attitude when he mentions "weeping about one's sins" as the first of the "five most beautiful things" (al-Sulâmî, 54). Later, being mournful becomes for him the characteristic of someone who loves God (as in Hîyâ, x, 125, l. 24), and when he explains before al-Djunâydan "I should wish that the mourning of the entire mankind be thrown upon me." (ibïd., 118); this may conceivably have an altruisch meaning, but certainly not the former ascetic one.

Finally, a word on the primal ascetic motive of fear of God and His Judgement. It is true that reminiscences of both the absolute and the polarized fear of God are not lacking in Sarî's thinking (e.g. Hîyâ, x, 118, ll. 2-4, and al-Sulâmî, 53, l. 5), but the starting point of his reflections is a well-considered balance between fear and its counter-force, namely, hopefulness (for this problem see Massignon, TA, 116, 118). He perceives fear of God as a psychosomatic phenomenon. While speaking about this, he tried to extend the skin of his forearm, and when this proved to be impossible, he said, "If I were to assert that this skin had dried up on this bone out of love for Him, I would speak the truth" (al-Kushâyri, ii, l. 11 = Gramlich, Das Sendschreiben, 41-2). Elsewhere, too, he depicts the love of God as an inner burning (TB, ix, 191, ll. 7-10) and does not get tired of quoting corresponding verses on profane love (Lûmûa, 251, ll. 4-6). It is, therefore, no wonder that he also transmitted the famous-infamous hadîth al-šâkûk (al-Kushâyri, 112, l. 23 = Gramlich, Das Sendschreiben, 317; for the hadîth itself, see Massignon, Essai, 195-6).

Sarî represents here the well-known conviction that lovers of God would be tested by Him in the hardest possible way, so that the truthfulness of their love might prove itself. In a dream he hears God telling them: "I want to bring down upon you as many proofs as you have breaths, which not even the solid mountains would stand. Will you bear them patiently (a-tašûrinâ)" They answer: "If it is You who tests us, do whatever You wish!" (Sîfât al-šâfa'a, ii, 216, ll. 15 ff.) Sarî himself did not advance any further opinion on this, but we possess a vivid description by al-Djunâydan of the torments in question, where he depicts the desperate endeavours with which the mystic tries to win back the situation of bliss, caused by the union, after he has awakened from his ecstasy (Kushâyri, Cup, 34-8 = Gramlich, Islamihe Mystik, 19-22). Perhaps the linguistic virtuoso that the pupil was, retained here his master's experiences.

Sarî was indeed very well acquainted with the ecstatic heights of mystical experience. Al-Djunâydan does this with the help of a surmounting third notion: firstly, it is the shame (haya') before God's eye (Hîyâ, x, 117), which takes the place of the mere fear of His punishment; secondly, the longing for His APPROACH (Manâtib, ii, 253, l. 14-15, 247, l. 20 ff.); secondly, Sarî introduces here as a fourth binding force, after the example of Shâqîl b. Bâllîkhi (Adâb al-šâbâdat, 20-1), the love of God, which outshines the elementary experiences of fear and hope. On the other hand, he refines fear and hope into feelings of reverence (haya') and intimacy (uns) (Sîfât al-šâfu'a, ii, 215, ll. 7-8). All "new" notions are characterized as personal feelings towards God and therefore indicate that we find ourselves already in the sphere of mysticism. In the "five things next to which nothing else rests in the heart", Sarî gives a summing up, namely "fear of God alone, hope in God alone, love of God alone, shame before God alone, and intimacy with God alone" (Hîyâ, x, 124-5).

Sarî's mystical experiences

We are extremely badly informed about what Sarî made public of his mystical experience (cf. al-Sulâmî, 48, l. 3-2; al-Kushâyri, 10, l. 2 = Gramlich, Das Sendschreiben, 41). It is certain that this experience was completely under the imprint of the love of God. The impulse might go back to Ma'rûf al-Karkhî who, after his death, could only be imagined in paradise as being drunk with the love of God (Manâtib, 675-6) and who is said to have been moved by the love of God to that form of renunciation of the world which he also knew how to provoke in Sarî (Kât., iii, 82, l. 4 ff.). In fact, it is to al-Djunâydan exclusively that we owe all information on Sarî's love of God, and so it dates only from the third or fourth periods of his life.

Here, too, in the most authentic field of his mysticism, Sarî is seen as the practical man who is averse from all forms of speculation. He does not want to have anything to do with the Sûfî theory of love; on the contrary, he wants to understand love of God as a psychosomatic phenomenon. While speaking about this, he tried to extend the skin of his forearm, and when this proved to be impossible, he said, "If I were to assert that this skin had dried up on this bone out of love for Him, I would speak the truth" (al-Kushâyri, ii, l. 11 = Gramlich, Das Sendschreiben, 41-2). Elsewhere, too, he depicts the love of God as an inner burning (TB, ix, 191, ll. 7-10) and does not get tired of quoting corresponding verses on profane love (Lûmûa, 251, ll. 4-6). It is, therefore, no wonder that he also transmitted the famous-infamous hadîth al-šâkûk (al-Kushâyri, 112, l. 23 = Gramlich, Das Sendschreiben, 317; for the hadîth itself, see Massignon, Essai, 195-6).

Sarî represents here the well-known conviction that lovers of God would be tested by Him in the hardest possible way, so that the truthfulness of their love might prove itself. In a dream he hears God telling them: "I want to bring down upon you as many proofs as you have breaths, which not even the solid mountains would stand. Will you bear them patiently (a-tašûrinâ)" They answer: "If it is You who tests us, do whatever You wish!" (Sîfât al-šâfu'a, ii, 216, ll. 15 ff.) Sarî himself did not advance any further opinion on this, but we possess a vivid description by al-Djunâydan of the torments in question, where he depicts the desperate endeavours with which the mystic tries to win back the situation of bliss, caused by the union, after he has awakened from his ecstasy (Kushâyri, Cup, 34-8 = Gramlich, Islamihe Mystik, 19-22). Perhaps the linguistic virtuoso that the pupil was, retained here his master's experiences.

Sarî was indeed very well acquainted with the ecstatic heights of mystical experience. Al-Djunâydan
reports about a trance of the master, in which his face radiated in such a way that the bystanders could no more stand the sight (Lumã, 307, 12, 13 ff.). Moreover, Sari confirmed his ecstatic experiences (maw'addât hâdît') and intensive thoughts of God (adhkâr ka'tûyâ) could lead the mystic so far that “his face might be beaten with a sword without him being aware of it” (ibid., 306, 6-12).

He served as tezâkiîî (private secretary) to Khalîl Pasha when, in his second vizierate, the latter was given command of the troops in the Persian campaign, and of the army in the 1038/1628 campaign (q.v.) in place of Mehmed Efendi, who had just died, but was soon dismissed at the same time as his patron. After the latter’s death in 1038/1629, he remained out of office until 1040/1638 when he was appointed to the imperial rûdâb (q.v.). He accompanied Murâd IV on his Baghdad campaign and then became re'sî l-kâtûb for the second time. He continued in various positions until 1065/1655 when he retired from public life and devoted his remaining years to writing. His tomb is in the cemetery of Maltepe outside the Top Kapî (Gate of St. Romanus) in Istanbul (Gibb, HOP, iv, 79).

A member of the Bayrâmiyya tarîkh, Sârî ‘Abd Allah Efendi had a close relationship also with leaders of the Mawlawiyya (q.v.), and most of his works (in Turkish and Arabic) were connected with mysticism. His five-volume Djevâhir-i bewdîrî-i Melûmâni, written 1033-41/1625-31 and dedicated to Murâd IV, is a Turkish translation of the commentary on the first volume of Mawlawâni’s Persian Muthâhâr (q.v.), but has been described as an “encyclopedia of mysticism” (Akûn, loc. cit.), containing as it does information about various orders and legends of saints. The interpretation is closely related to Sârî ‘Abd Allah’s knowledge of Ibn al-‘Arabi’s (q.v.) doctrines. Although stylistically the work is part of the high culture, with sections in rhymed prose, it also contains sentences that are short and simple, and close to the spoken language (Banûrî, op. cit.). It was printed at Istanbul in 1288/1871. Among his other works are: Nasihatâ l-îmûlak, a Mirror for Princes and discussion of death and the hereafter; Themelât l-tâcîd, a discussion on mystical topics with Ismâ’il Kiranwâ (q.v.), which also refers to various orders and personages; Djevâhîrutâ l-tîdâya, another mystical work but dedicated to Murâd IV, with an introduction describing his recent conquest of Baghdad; and Dastûrâ l-tînqâh, a collection of official correspondence and other documents (some of his own composition), interesting from the aspect of foreign relations. He also wrote poetry and songs of a mystical tenor under the makîtâs ‘Abdi.

Bibliography: For further details and bibl., see Akûn, op. cit.

He also wrote reports about a trance of the master, in which his face radiated in such a way that the bystanders could no more stand the sight (Lumã, 307, 12, 13 ff.). Moreover, Sari confirmed his ecstatic experiences (maw’addât hâdît') and intensive thoughts of God (adhkâr ka’tûyâ) could lead the mystic so far that “his face might be beaten with a sword without him being aware of it” (ibid., 306, 6-12). It may be that what Sari once indicated as his nightly “experiences” (jau’âdâ'î) (Hilya, x, 121, 11. 20-1) were such states of trance, and that what he called his ahrâî (see wroko) were corresponding dhikr exercises. But since he considered ecstasy as a charisma (kardmâ), he did not (or course want to talk about it (cf. his postulate of the siyânât al-kardmâ, Hilya, x, 120, l. 13).
intimate terms with Bâyâezid II, since the only incident in his career to enter the Ottoman historiographical tradition is his embassy on behalf of this sultan to his son Prince Selim (Selim I [q. v.], 917/1511). (The Altasmanischen Annalen Chroniken, ed. F. Giese, Breslau 1922, 130; Ahmet Uğur, The reign of Sultan Selim I in the light of the Selim-nâme literature, Berlin 1985, 160, 171, 177; Djeffâl-zade Mustafa, Selim-nâme, ed. Ahmet Uğur and Mustafa Çuhadar, Ankara 1990, 258, 295). By the year 917/1511, Bâyâezid had also appointed him kâdi of Istanbul, a post which he held until 919/1513 or later (for wakifîyes which he validated in these years as kâdi of Istanbul, see E. H. Ayverdi, Istanbul vakiflari tahrir defterleri, 935 (1534) tarihli, nos. 2107, 906). Selim I appointed him successively kâdi 'asker [q. v.] of Anatolia and kâdi 'asker of Rumelia. It was he who in 920/1514 issued the fatwâ sanctioning the opening of hostilities against the Safawids [q. v.] and the massacre of their adherents in Anatolia (for text and facsimile of the fatwâ, see Tekindâg, op. cit.). Taghâkörü-zade reports that Selim eventually dismissed him as kâdi 'asker of Rumelia “because of something that happened between them”, and re-appointed him to one of the Eight Madrasas. He seems to have ended his career as kâdi of Istanbul, since he validated wakifîyes in Istanbul in 924/1518 and 927/1521 (O. L. Barkan and E. H. Ayverdi, op. cit., nos. 917, 2163). He died, Taghâkörü-zade says, “in 928 or 929/1521-3, and was buried “next to his mosque in the city of Constantinople”. The mosque in question must be the mosque of “Sari Kez”, which Ewliya Celebi [q. v.] (Seyyah-nâme, i. Istanbul 1314/1896-97, 310) places “in the ‘Ali Pasha market, near [the mosque of Mehmedmed] the Conqueror”. The mosque gave its name to a quarter in the Fatih district of Istanbul, known variously as Sari Kez or Sari Güzel (Semavi Eyice, TJ, SHEHRI, DEFTERDAR (?-1129/1717), Ottoman statesman, born in Istanbul (hence: Şehrî), a son of a Muslim Turkish grocer. He styled himself El-Hâjjî Mehemmed ed-Defterî in the preface to his chronicle. He made his career in the financial department of the Porte [see Mâlîvîr]. In 1081/1671 he was employed in the office of the rûznâme-yi evvel kâlemi [q. v.]. He won the patronage of the defterdâr Kâmil ‘Ali Efendi, bashdefterdâr (in function 1102/1691-2) and was promoted to mektûbî (mekûtî) [q. v.], head of the secretariat of the principal defterdâr. The Grand Vizier Râmî Mehemmed Paşa [q. v.] appointed him principal defterdâr (17 Dhu 'l-Hijja 1114/5 May 1703). This was the first of his seven appointments to this high office. At the time of the Edirne Revolt he was dismissed (15 Ramadan 1115/23 August 1703). The new Sultan Ahmed III [q. v.] reinstated him soon at the behest of the rebels, who demanded Sari Mehemmed’s financial acumen to produce the necessary funds for their “Accession Fee” (gülüs bâkhusühî). Dismissed after this operation, he was relegated to the rûznâme-yi evvel office. Dismissed again on 23 Shawwal 1116/29 February 1704, he lost the position after eleven months. Re-appointed 14 months later, he remained in function for one year and 5 months. The next turn of office lasted from 20 Dhu 'l-Ka‘da 1119/12 February 1708 till 3 Qumâzîd 1121/10 August 1709, when he lost favour with the Grand Vizier Çorlulu ‘Ali Paşa [q. v.] and retired into private life at his konak in the Kumkapî quarter of the capital. The Grand Vizier of 1129/1717 succeeded him from the centre of power by appointing him (titular) maşulîrî of Salonica, ranking as a paşa of “two tails” [q. v.] and sending him as military governor to the frontier fortress town of Bender (Bessarabia) [q. v.]. Later, he was given the government of Izmid as well. Sari Mehemmed Paşa became defterdâr again in 1123/4-1712 for five months. After the conclusion of peace with Russia at Edirne (1125/1713), he was appointed a member of the boundary commission which settled the new border in Podolia. Upon their return to Istanbul, the sultan awarded caftans of honour to inter alio Sari Mehemmed Paşa, who soon was made defterdâr again (1126/1714). He appears to have been a client of the kapudanpaşa Hâджî Mehemmed Paşa “Djanîm Khodja” [q. v.]. Next year he joined the campaign in the Morea led by the Grand Vizier Damâd ‘Ali Paşa [q. v.]. His task was the provisioning of the army via Egîbbo [q. v.]. After the Grand Vizier’s death in the battle of Peterwardein, Sari Mehemmed Paşa received the rank of vizier (4 Ramadan 1128/22 August 1716). He had been hoping for the grand vizierate, but he loyally served under the new Grand Vizier, the aged Hâджî Arnavîd Kâhil Paşa [q. v.], fighting Prince Eugene of Savoy and the Imperial army near Belgrade. He seems not to have become member of the faction of the sultan’s favourite, Damâd Newshâhîrî Ibrahim Paşa [q. v.]. Sari Mehemmed openly vented his disappointed ambition and lost the confidence of the sultan. In 1129/1717 he was recalled to the Porte, and his new appointment as military governor of Salonica meant his disgrace. He received the order to organise a force of 3,000 to be recruited from the Evlâd-î Fâtihân (originally Anatolian Turks settled in Rumelia) at his own expense and to join the main army at Nîsh to take up the guarding of the “Iron Gate” of the Danube. He failed to comply, and openly criticized the sultan’s policy. His behaviour led to his downfall; he was accused of incitement to revolt and of previous misconduct in the field before Temesvâr in 1716, where his force of 10,000 dâlîk-serengeli volunteers withdrew without fighting. A kapûvânî bâkhusühî sent from the Porte had him executed in the castle of Kawala [q. v.]. His possessions in Istanbul, Salonica, Bender and Siwâs were confiscated. At least one son survived him, Mehemmed Emin, âlebeyî at Siwâs in 1139/1727 (see above, vol. I, at 295 a). Bibliography: Nasîrî ul-wuzerî we'l-umrî u seydî Kiştî ul-Gâldâste, ed. and tr. W.L. SARI MEHMED PASHA — SARI SALTUK DEDE

Turkish warrior-saint of the 7th/13th century.

The sources on his life are extremely meagre. The earliest surviving work in which he is mentioned is Ibn Baṭṭuta’s Rihla. The author states that when he passed through the town of “Baba Saltuk” in the 14th century, he was considered to be a Bektashf saint (F.M. Köprüli, The Seldjiks of Anatolia, tr. and ed. G. Leiser, Salt Lake City 1992, 81 n. 82). Next, he appears as an able and valiant warrior who was driven off by the Ottoman historian Yazidji-oghlu (or Yazidji-zade) Ta̲rikh-i &utm-l-i Saldjuk, written by the same time, legendary stories related to Sari Saltuk had entered the Bektashi vilayet-names. The first two works were central to Ottoman historians links Sari Saltuk with the Bektashis. Yet by the 9th/15th century Sari Saltuk appears in Bektashi tradition as a shepherd whom Hâddji Bektaş sends, via Sinope, to Georgia, where he converts the Georgians. Then he goes to Dobrudja, where he kills a dragon which had captured the daughters of a king, at the fortress of Kafakra (Kılıçara). Afterwards, he calls the people to Islam and builds a teke (Köprüli, The Seldjiks, 54-5).

The earliest surviving work in which he is mentioned is Ibn Baṭṭuta’s Rihla. The author states that when he passed through the town of “Baba Saltuk” in the 14th century, he was considered to be a Bektashf saint (F.M. Köprüli, The Seldjiks of Anatolia, tr. and ed. G. Leiser, Salt Lake City 1992, 23-3). Indeed, Köprüli considers Sari Saltuk to be one of a series of legendary or semi-legendary Salijs who, as heroes in the pastoral folk-tale, become the focus of local traditions, and are replete with fabulous elements (including stories common to Muslim or Turkish traditions, it also reflects many other legendary or semi-legendary sources, it is generally held today that there actually was a saint named Sari Saltuk and that he was a disciple of Hâddji Bektaş. Moreover, the heterodox dervish Barak Baba [q.v.] claims, in turn, that he was a disciple of Sari Saltuk (Köprüli, Islam in Anatolia, tr. and ed. G. Leiser, Salt Lake City 1993, 113). Still, it is unclear if this Sari Saltuk and the one who accompanied the Turks to Dobrudja in the 7th/13th century were the same person.

In any case, by the mid 9th/15th century, it was the legendary Sari Saltuk who, as an heroic figure in the epic Saltuk-nâme, supplanted the vague historical personage in the Turkish consciousness. In 878/1473 when Prince Djiem [q.v.] was in Edirne guarding the Balkan borders while Mehmed II was on campaign against Uzun Hasan, he heard many stories about Sari Saltuk from various places in Rumelia and commissioned one Abu ‘l-Khayr al-Rûmi to compile a book about him. Abu ‘l-Khayr collected material for seven years, visiting all the places associated with Sari Saltuk in Anatolia and Rumelia, and then wrote his Saltuk-nâme. This work followed, but was superior to, the Batâl-nâme and Davâhmand-nâme as the last in the cycle of epic romances concerning the conquest of Anatolia and Rumelia. The first two works were centred on Anatolia, while the Saltuk-nâme focussed on Rumelia. In this epic, Sari Saltuk was a great Saint who had close relations not only with Hâddji Bektaş, but also with Djielal al-Dîn al-Rûmi, Abu Isḥâk al-Kâzarûrî and even Naṣr al-Dîn Khodja [q.v.]. He commanded miraculous powers and defended Muslims and converted unbelievers from China to Andalusia. He first lived in Sinope, then in the Crimea, then along the Danube, and finally in Edirne. He was often associated, initially, with the northern Anatolia. The Bolu sal-nâmâ of 1334/1915-6, 226, for example, states that the region of Bartin north of Bolu near the Black Sea had previously been referred to as “Saltuk ili,” the province of Saltuk.

His major objective was to Islamise Rumelia, and he predicted the conquest of that region in the time of the sons of Oθmân. Although the Saltuk-nâme is replete with fabulous elements (including stories common to those in the Bektashi vilayet-names), and blends numerous local traditions (he was often identified with such Christian personalities as St. George), his role with Muslim or Turkish traditions, it also reflects many historical events that occurred between 1200 and 1400, such as the struggle of the Anatolian Saldjûks and beyliks against the Mongols, Byzantines and other
Western powers; the relations of the Golden Horde with the West and Byzantium; the struggle of the Christian and the Moslem, and the establishment of the Ottoman State.

The Sârîkân-nâme was written, in fact, much like the first anonymous Ottoman chronicles. It is especially important for describing the psychological state of the unbelivers created by the Ottoman invasion of the Balkans (Köprülu, Th. Seljûk i, 43-52). It even sheds light on social life in Anatolia under the Ikhâns and in the Crimea under the Golden Horde.

Ewliyâ Celebi (d. ca. 1055/1648) reports the existence of two works, now lost, on the legendary Sârî Saltuk: a târîkâ from Yazdî-i oglu Memeh Medehi Celebi (d. 855/1451) and a Sârîkân-nâme by Kenân Pascha (d. 1069/1659) (q.v.) (Sehâhat-nâme, Istanbul 1896-1935, iii, 366/Tophaki Sarayı Bağdat Köşkü ms. 305, fol. 127b). Ewliyâ claims that his real name was Muhamm-ad Bukhârî, that he was girded with a wooden sword by Ahmad Yasawi (q.v.) and sent to the assistance of Hzâdji Bektaşı, who then sent him to Dobrudja; that he lived in Arpa Çukurci, Siwâs and Tokat; and that he was the patron saint, pîr, of the bazaar makers (q.v., ii, 334/Bağdat ms. 304, fol. 266a, and i, 659/Bağdat ms. 304, fol. 212b). Ewliyâ also relates the story that Sârî Saltuk instructed his disciples to bury him in seven coffins in remote towns in Rumelia (indeed, as far away as Sweden) “so that the ignorance of where the body really was would produce the story that Sârî Saltuk instructed his disciples to bury him in seven coffins in remote towns in Rumelia” (op. cit., i, 133/Bağdat ms. 304, fol. 266a ff.). This indicates, of course, that the legendary Sârî Saltuk was not only a strong symbol of the Islamisation and Turkification of Rumelia, but that he was also probably a composite of many of the warrior dervishes who went to that region after the original Sârî Saltuk’s death. Certainly, the fact that most of the followers of the original Sârî Saltuk eventually converted to Christianity is strong evidence that the legendary person was much more important and influential in this respect than the original. In addition to his burial sites in Rumelia, he had resting places as well in Anatolia. The latter are revered even today; Iznik, Bor near Niğde, and Dıyârbakır (G. Smith, Some turbesi namâms of Sârî Sal-ãoq, an early Anatolian Turkish gdzî-saint, in Turcica, xiv [1982], 216-25). Nevertheless, his “true” burial place is generally considered to be in Babadagi (q.v.) in Dobrudja just south of the Danube delta. This site was often the centre of Türkmen, gdzî, and heretical dervish activity. While on campaign, Bâyêzeêli II visited Babadagi in 889/1484 and built there a great mosque and zaviye dedicated to Sârî Saltuk. According to Ewliyâ, he also rebuilt the saint’s turbe, which had become an object of pilgrimage, and endowed a mosque and a madrasa on the site. He also repaired and humble reminder of a thriving Ottoman architecture, this had already been introduced in the days of paganism by al-Wâlid b. Muqghira (Nöldeke-Schwally, Gesch. d. Qur’an, ii, 285) (forte cut off) method of punishment may be of Persian origin (cf. Lette des Tan-sar, ed. J. Darmesteter in J, 4, Series 9, iii [1894], 220-1, 525-6; Sad Dar, 64, 5 = Sacred books of the East, xxiv, 327). In pre-Islamic Arabia, theft from a fellow-tribesman or from a guest was alone considered despicable, but no punishment was prescribed for it; the person had himself to see how he could regain his property (G. Jacob, Altarabisches Beduinenleben, 217-18; cf. J. L. Borchhardt, Bemerkungen über die Beduinen, Weimar 1831, 127 ff. 261 ff.). In the beginning of the 1st/7th century, the right or left hand was cut off; there was no fixed rule. The Kûrân leaves the point obscure, and one tradition says that Abû Bakr ordered the left hand to be cut off (Muawwâzât, Sarîka, bâb 4; al-Shâhî, Kitâb al-Umm, vii, 117). Cf. the variant of sûra V, 42, aynmusahum, transmitted by Ibn Mas‘ûd.

According to the teaching of the fâkhût, the thief’s right hand is cut off (for a second crime the left foot, then the left hand, then the right foot) and at the wrist; the stump is held in hot oil or fire to stop the bleeding. The Hâfîz and Zaydîs, however, put the culprit into chains (1) Theft and (2) Embezzlement.

The hanafis and zaydis, however, put the culprit into chains (1) Theft and (2) Embezzlement.

The jurists define theft for which the punishment is prescribed as the clandestine removal of legalliy recognised property (māl) in the safe keeping (hizâr) of another of a definite minimum value (nîsâb; among the Hâfîzis and Zaydîs 10 dirhms, among the Mâlikis, Shâhî’s and Shî’is ¼ dinár or 3 dirhms) to which the thief has no right of ownership; it is to be distinguished from usurpation (ghâsh) and embezzlement (khiyâna). By hizâr is meant guarding by a watchman or the nature of the place (e.g. a private house). Thus theft from a building accessible to the public (e.g. shops of the market, in the open air, baths) is not

Islamic legal theory distinguishes between al-sarîka al-sughrâ (theft) and al-sarîka al-kubrâ (highway robbery or brigandage), each with different hadd punishments.

(1) Theft (sârîka) is punished by cutting off the hand, according to sûra V, 42. This was an innovation of the Prophet’s; but, according to the Ausî’l literature, this had already been introduced in the days of paganism by al-Wâlid b. Muqghira (Nöldeke-Schwally, Gesch. d. Qur’an, ii, 285) (forte cut off) method of punishment may be of Persian origin (cf. Lette des Tan-sar, ed. J. Darmesteter in J, 4, Series 9, iii [1894], 220-1, 525-6; Sad Dar, 64, 5 = Sacred books of the East, xxiv, 327). In pre-Islamic Arabia, theft from a fellow-tribesman or from a guest was alone considered despicable, but no punishment was prescribed for it; the person had himself to see how he could regain his property (G. Jacob, Altarabisches Beduinenleben, 217-18; cf. J. L. Borchhardt, Bemerkungen über die Beduinen, Weimar 1831, 127 ff. 261 ff.). In the beginning of the 1st/7th century, the right or left hand was cut off; there was no fixed rule. The Kurân leaves the point obscure, and one tradition says that Abû Bakr ordered the left hand to be cut off (Muawwâzât, Sarîka, bâb 4; al-Shâhî, Kitâb al-Umm, vii, 117). Cf. the variant of sûra V, 42, aynmusahum, transmitted by Ibn Mas‘ûd.

According to the teaching of the fâkhût, the thief’s right hand is cut off (for a second crime the left foot, then the left hand, then the right foot) and at the wrist; the stump is held in hot oil or fire to stop the bleeding. The Hâfîz and Zaydîs, however, put the culprit into chains (1) Theft and (2) Embezzlement.

The jurists define theft for which the punishment is prescribed as the clandestine removal of legalliy recognised property (mâl) in the safe keeping (hizâr) of another of a definite minimum value (nîsâb; among the Hâfîzis and Zaydîs 10 dirhms, among the Mâlikis, Shâhî’s and Shî’is ¼ dinár or 3 dirhms) to which the thief has no right of ownership; it is to be distinguished from usurpation (ghâsh) and embezzlement (khiyâna). By hizâr is meant guarding by a watchman or the nature of the place (e.g. a private house). Thus theft from a building accessible to the public (e.g. shops of the market, in the open air, baths) is not
liable to the hadd punishment. This is further only applied to one who (1) has attained his majority (bāligh [q. v.]), (2) is compus mentis (‘ākil) and (3) has the intention (niyya) of stealing, i.e. is not acting under compulsion but freely (mukhtār). No distinction is made between free or slave, male or female. The punishment is not applied in case of thefts between husband and wife and near relatives nor in the case of a slave robbing his master or a guest his host. Views are divided on the question of the punishment of the dhimmī and the protected alien (musta‘min) with the hadd, and on the punishment of accomplices and accessories; in any case, the total divided among the latter must reach the nisab for the former. It is not theft to take articles of trivial value (wood, water, wild game) and things which quickly go to waste (fresh fruit, meat and milk), or articles in which the Shari‘a does not recognise private ownership or things which are not legitimate articles of commerce (mā‘il), like freeborn children, wine, pigs, dogs, chess-sets, musical instruments, golden crosses (the theft of a full-sized golden cross, something from the common good to the value of the share), also copies of the Qur‘ān and books (except account books), as it is assumed the thief only desires to obtain the contents. The conception of literary theft is unknown to fiqh.

The charge can be made by the owner and legitimate possessor (or depository) but not by a second thief. The legal inquiry has to be conducted in the presence of the person robbed. For proof two male witnesses are necessary or a confession (ikrār [q. v.]), which can, however, be withdrawn. It is recommended to plead not guilty if at all possible [see ‘Adīhā]. If the thief, however, has given back the article stolen before the charge is made, he is immune from punishment (ṣūra V, 43).

(2) Highway robbery or robbery with violence (mahrāba, kaf‘ al-tarīq) occurs when anyone who can be dangerous to travellers falls upon them and robs them when they are distant from any possible help or when someone enters a house, armed, with the intention of robbing (cf. Roman Law; Justinian, Novellae, 134, ch. 13). The Šī‘īs consider any armed attack, even in inhabited places, as highway robbery. The same regulations hold regarding the person and the object as above, especially the nisab. On the authority of sūra V, 37-8, the culprit is liable to the following hadd punishments. If a man has committed a robbery which is practically a theft to be punished with hadd, his right hand and left foot are cut off (the next time, the left hand and the right foot). If, however, he has robbed and killed, he is put to death in keeping with right of reprisal (kisā‘) and his body publicly exposed for three days on a gibbet or in some other way. The punishment of death is here considered a hadd punishment; the payment of blood-money (diya) is therefore out of the question. If the criminal repents, however, before he is taken, the hadd punishment is omitted; but the claim of the person robbed of the article for compensation and the taloī remain. All accomplices are punished in the same way; if one of them cannot be held responsible for his actions, the hadd punishment cannot be inflicted on any.

All these laws hold only for the hadd punishment which the judge can only inflict when all conditions are fulfilled. In all other cases the thief is punished with ta‘zir [q. v.], i.e. at the discretion of the late owner of the article or to make reparation. It is the same with the thief who comes secretly but goes away openly (mukhalta‘) or the robber who falls upon someone and robs him at a place where help is available (muntahib). Special laws were therefore frequently passed in Islamic states to supplement the Šari‘a, in Turkey, for example, by the Ottoman sultans Mehemmed II (Mitteilungen zur Osm. Gesch., i [1921], 21, 35), Süleyman I (1552), Mustafa II (1572-74), Ahmad (1617-17), Mehemmed IV and ʻAbd al-Meṣjīd. These laws endeavoured more and more to replace the hadd punishment by fines and corporal punishment. The Turkish criminal code of 1858 still only recognised fines and imprisonment for theft, although the Šari‘a was not officially abolished thereby [see Medjelle].

The punitive prescriptions of the Šari‘a regarding sarika, which have been either abolished or largely mitigated during the course of the 20th century, except in such countries as Saudi Arabia and the Sudan, seem likely to regain ground at the dawning of the third millennium in several parts of the Islamic world with the rise of Islamic fundamentalism.

SARKĀR AKĀ (p.), a term used for a number of heterodox religious leaders within the broad Šī‘ī tradition. It appears to have originated in the 19th century, possibly in recognition of links between the title’s bearers and the Kāḏār court. The title (meaning something like “lord and chief”) was used for the first Akā Khan (Hasan ʻAli Shah, 1804-81 [q. v.] and several of his successors, as heads of the Nizāri Ismā‘īlīs (sometimes as Sarkār Akā Khan); it is, however, not in current use. Leaders of the Shāvhī branch of the Twelver Šī‘a [see ŠAVKHIYYA] have been termed “Šarkār Akā” since the time of Hājjī Mirzā Muḥammad Karīm Kirmānī (1809-70 [q. v.], as referred to as Šarkār-i Kirmānī [1895], a great-nephew of Fath-ʻAli Shah and a son-in-law of Nasir al-Dīn Šāh. The title passed to his Kirmānī-based lineal successors within the Ibrāhīmī family until quite recently, and was particularly used of the leader of the latter part of the movement within the Bahā‘ī movement see BAHA’I] the title is reserved for ʻAbbās Effendi “Ab al-Bahā” (1844-1921), the son of Mirzā Husayn “Āli Nūrī Bahā” ʻAllāh [q. v.], whose
family had a variety of marital links to the Kadjars. In English usage, Bahāʾis refer to them as the "Master", which is both a partial translation of Sārkār Ākā and an echo of Persian terminology. (D. MacEoin)

SARKHAD [see SARKH.]

SARKHUD, a site 10 km/6 miles to the southeast of Ahmadābād [q.v.] in western India, capital of the sultans of Gujrat [q.v.] in the 9th-10th/15th-16th centuries.

Its fame arises from the complex of buildings built around an artificial lake, all of them still standing and excellent specimens of 9th/15th century Gudjarat architecture. They include the tomb of the saint Shīkh Ahmad Khattu "Gandji Bahā" (585/1186) and a mosque of sultan Muhammad Shāh (846-55/1442-51). It became a favourite retreat of Sultan Fath Khān Mahmūd Shāh Begā (862-917/1458-1511), who built the large tank, palace buildings and two mausolea for himself and his family.

SĀRLIYYA, the name of a group of Kākāʾis or Aḥl-i Ḥakk [q.v.] living in northern Īrāk, in a group of six villages, four on the right bank of the Great Zāb and two on its left one, not far from its confluence with the Tigris and 45 km/28 miles to the south-south-east of Mawsil. The principal village, where the chief lives, is called Wardak, and lies on the right bank; the largest village on the left bank is Suifya. The Sārlis, like the other sects found in northern Īrāk (Yazīdis, Ṣabaks, Bāḏjūrān), are very uncommunicative with regard to their belief and religious practice. The Sārlis themselves said that they were monotheists, believing in certain prophets, and have in the past attributed abominable rites to them. They believed that their chief had the power to sell terras as he could pay for; the dhīraš was not granted. The chief gave a medjidiyye.

The Sārlis were polygamous. They were said to have a sacred book written in Persian. These statements should be taken with considerable reserve. The Sārlis themselves said that they were simply Kurds and belonged originally to the Kāke Kurds who have some villages near Kirkūk. But the Kāke Kurds also had a mysterious reputation. A characteristic feature noticed in one of the Sārli villages (Suifya) was an ornament with triangular holes in the walls of the principal buildings of the village. Like the Yazīdis [q.v.], the Sārlis used Muslim names, and their chief in the early part of this century was one Tāhā Koča or Mullā Tāhā.

The present (1994) status, or even the continued existence, of these Sārlis, is unknown, given the present impossibility of western scholars undertaking ethnological field work in the Kurdish areas of northern Īrāk.

SARLP-I DUGHĀB ("bridgehead of Zhōb"). a place on the way to the Zagros Mountains on the great Baghdad-Kirmāngāh road, taking its name from the stone bridge of two arches over the river Alwand, a tributary on the left bank of the Diyalā. Sarpl in the early 20th century consisted simply of a little fort (kūr-khānā = "arsenal") in which the governor of Zōbāb lived (the post was regularly filled by the chief of the tribe of Gūrān), a caravanserai, a garden of cypress and about 40 houses. The old town of Zōbāb, about 4 hours to the north, is now in ruins. To the east, behind the cliffs of Hazār-Djārīb, lies the little canton of Beshīhe (Kurdish = "below") in a corridor running round the foot of the Zags giving access to the famous col of Pā-Tāk, on the slope of which is the Sāsānīd edifice called Tāk-i Girār. In the west, the heights of Mēl-Ya'kūb separate the verdant plain of Sarpl from that of Kaṣr-i Shīrin [q.v.]. Sarpl is the natural halting place for thousands of Persian pilgrims going to the atābāb [q.v. in Suppl.] (Karbalā) and other Shīf sanctuaries. When the pilgrimage season is at its height (in autumn and winter), a hundred tents may be seen near the bridge. They belong to the Kurdish gipsy tribe of Szūmānī (Fīyīd), the women of which are professional dancers and singers noted for their light morals. Sarpl corresponds to the site of the ancient Khalmānu of the Assyrians, Hulwān [q.v.] of the Arabs. The earlier name survived as the Kurdish name of the Alwand, i.e. Halawān. Traces of the old town are found mainly on the left bank (Pāwpal) where the land is level and beautiful.

Sarpul is noted for its antiquities: (1) the bas-relief of Pahlavi inscription on the cliff on the right bank of the Alwand; (2) two steles on the cliffs of Hazār-Djārīb (on the left bank) of which two are Sasanian (Parthian) and the third represents Anu-Bānīnī, king of the Lulubi; (3) two miles away, to the south of Hazār-Djārīb, is an Achaemenid tomb cut out of the rock and venerated at the present day under the name of Dukkān-i Dāwūd (David's workshop) by the Aḥl-i Ḥakk [q.v.], who have a cemetery at the foot of the rock.

Modern Sarpul-Dughāb is the chief-locus of a bakhsh of the same name in the shahristān of Kaš-ī Shīrin in Kirmāngāh. It contains (1975) a village (with a moustache). The Sārlis were polygamous. They were said to have a sacred book written in Persian.
ever by the influx of transhumants from their yaylaks or summer pastures in the mountains.

(V. Minsorsky)

**SARRADJ [see Sardj]**

**SARRADJ, BANU 'L [see IBN AL-SARRADJ, in Supplement IV]**

**SARRADJ, ABU MUHAMMAD DIAFAR B. AHMAD B. AL-HUSAYN AL-KARI**

(d. 500/1106), known as Dja'far al-Sarradj, or al-Sarradj al-Baghdadi, a Hanbali traditionist from Baghdad, noted for his poetry and author of the famous *Mandsik* al-habash (al-suddn), sibydn.

By mediaeval authors as "remarkable", and, in modern studies, has raised questions as to the underlying teaching on love and its connection with the Hanbali school of thought. Neither the origin of his texts, nor their presentation, which is void of any moralising, commentary, demonstrates a Hanbali character of the work (Bell), but the edifying effect of memorisation (dhikr) and the impersonal perspective prevalent in most of the narrations (Vadet) denote a moralistic attitude. In this vein, the work is comparable to earlier collections of edifying narrations or "reports", which were composed by representatives of the *Ahl al-Sunnah wa l'-Djamah", such as Ibn Abî 'l-Dunya wa l-zamam, Ibn al-`Amr b. al-Mubtaddi.

**SARRADJ, ABU NASR ABU AL-LAHN B. 'ALI, SUTTON**

author originally from Tüs in Khurâsân, who lived towards the middle of the 4th/10th century and died in his home town in 378/988.

The bio-bibliographical and hagiographic literature (*Aštâr, Tâbâhil*, ed. Nicholson, ii, 182-3; al-Dhâhâbi, *Ta'rikh al-Islâm*, cited by Nicholson in *The Kitâb al-Luma* 2, p. III; Ibn Taghribirdi, *Nuddim*, i, 152; *Djiâmî, Najâhât*, no. 353; Ibn al-`Imâm, *Shabharât*, iii, 91) gives hardly any precise information about his life and upbringing. We do, however, know the names of some of his teachers and sources of information e.g. amongst others, Dja'far al-Khuldi (d. in Baghdad 348/960) and Ahmad b. Muhamad b. Sâlim of Basra (d. 356/967), the leading light of the Sâlimiya school. The fact that he frequented the company of this last and that he cites him does not, nevertheless, allow us to count him amongst the partisans of the Sâlimiya [q.v.] (see Nicholson, op. cit., pp. XI-XIV); the lively discussion which he had with Ibn Sâlim on the validity of the *ghabâtî* attributed to Abu Yazid al-Bistamî (Luma*; ch. Tafsîr al-ghâfitiyat), testifies all the same to his independence of mind.

From the text of the *K al-Luma* it appears that al-Sarradj travelled widely, since he cites, on occasion, conversations which he apparently had not only in Persia but also in 'Irâk, Syria and even Egypt. Above all, our sources mention the remarkable consequences of his spiritual elevation. Thus, invited during Ramadan to the presentation of the sermon in the *Shûmithiya mosque* at Baghdad, he is said not to have touched for a month the food which was brought to his cell (*Tadhkira*, ii, 182; *Najâhât*, no. 353; Hûjîwirî, *Kashf al-nahdhût*, ed. Zhukovski, 417).

'Âtîr, and Dja'îmî following him, further report that
al-Sarradj, carried off by a moment of ecstasy, plunged his face into a flaming brazier without suffering any pain or leaving any trace on his face; on the contrary, we know hardly anything further on his life and, in particular, have no information at all on his possible successors on the mystical path. As for his disciples, we know only one name, that of Abu 'l-Fadl of Sarakhs, the future master of Abū Sa‘īd b. Abī 'l-Khayr [q. e.]. (Muhammad b. al-Munawwar, Asār al-ta‘āshid, ed. Dh. Šafā, 27; Naṣafat, no. 354). This is a remarkable dearth of information about one who was called "the peacock of the poor" (fārsī al-du‘ūl), and whose authority and competence were widely recognised.

In fact, the personality of al-Sarrāḏj is completely hidden behind the K. al-Luma‘ ‘Book of shafts of light’, his main and probably only work, since, despite an affirmation of existence by Q̄āmid, no other title attributed to him is known to us. This work involves a treatise of considerable value, both from the richness of its documentary information on the Sūfism of the first Islamic centuries and also from the quality of the religious thought which informs it. Al-Sarrāḏj presents there the bases of knowledge understood in a mystical sense, contrasted with the Islamic religious sciences known at the time. He details in it the main stages and states of the mystical path; underlines the importance of the revealed sacred text and the prophetic example by highlighting the ways of interpretation followed by the Sūfis; describes the customs (ādāb) of Sūfī and cites the particularly significant texts of the great masters. The precision of his definitions in the technical lexicon of Sūfism is most valuable. He also deals with the tangible and controversial aspects of the Sufī life, such as the status of miracles (karamāt), the nature of ecstasy, the lawfulness of listening to music (qanṣ), the orthodoxy of the paradoxical utterances (muḥallah) attributed to certain maṣḥoḥiyya, and the doctrinal errors of several currents of thought claiming a connection with Sūfīm. Each chapter forms a little, autonomous treatise, in which the author cites abundantly hadīth and, especially, the dicta of the great masters of Sūfīm. His own points of view are not concealed at all but are fitted in fairly discreetly behind the teachings of the great figures in the tradition.

The importance of the Luma‘ was appreciated as soon as it appeared. Subsequent authors, like al-Kudūsī and the Riḍāa, found in it substantial bases of documentation, as did even Abū Hāmid al-Ghazālī, who drew upon it for several elements in his writings on the behaviour of Sūfīs (see esp. the Ḥyā‘, Book ii, K. Ādāb al-samā‘ wa ‘l-wa‘īqīd). The Luma‘ also contributed to the legitimisation of Sūfism as an Islamic science in its own right. Al-Sarrāḏj showed himself quite firm about the essential point: true Sūfīs are not merely in complete conformity with Islamic orthodoxy but they themselves make up its spiritual élite. It is not, then, a question of an apologia, in the strict sense of the term, or of a purely defensive justification of Sūfīsm, but it goes beyond that to an argued and assured statement of the harmonious integration of mysticism within the bosom of Muslim religious life. Being moderate and aiming at a consensus of opinion, al-Sarrāḏj’s language in the Luma‘ thus forms a particularly clear and vivid example of the conception which the Sūfīs had of themselves towards the end of the 11th/18th century.

(PI. LORY)

SARRUF, Ya‘qūb, a personage of the revival of Arabic culture and literature or nhāda [q. e.] (b. al-Hadīth, 18 July 1852, d. Cairo, 9 July 1927). Of Maronite origin, he was part of the first wave of graduates from the Syrian Protestant College in 1870 and taught for two years in American missionary schools. Little is known about his conversion to Protestantism. From 1876 onwards, together with Fāris Nimr [q. e.], his name was, for half a century, attached to the journal al-Muktaṭaf, which published 121 volumes over its life-span of 75 years. In order to make the first ever archival office of the Jesuits of the journal al-Muktaṭaf, which he founded in 1885 to Egypt, with his journal. Unceasingly remaining as close as possible to contemporary issues, he translated and popularised the latest scientific discoveries, defended freemasonry, and clashed with the Jesuits of the journal al-Maṣḥir and the reformists of the journal al-Manār [q. e.], since he was only interested in religion (as a Christian within an Islamic society) or politics (thus he did not take up a position against the British occupation of Egypt) from the scientific viewpoint. He championed Darwinian evolution, even though his lack of a specialist scientific training did not allow him fully to understand the philosophical bases of that doctrine. As well as numerous translations, he published three novels as separate volumes, Fāṭāt Mīr, Amtir Luhbān and Fatāl al-Fayyām, as well as biographical collections and works on natural history (Fusūl ‘l-ta’āhīt min mamlakatay al-bayārām wa ‘l-nahāṭ) and astronomy (Basā‘ū l-im al-falak wa-sawwar al-samā‘). As a journalist pre-occupied with science, he not only invented words to translate new English and French concepts into Arabic but also endeavoured to express himself in his own writings in a clear language. He proposed a theory of his own practice in this regard. His work shows the limitations of a person who acted as a channel of translation for a modern field of knowledge without taking part in its elaboration.

SÄRT, a term found in the history and ethnography of the Persian and Central Asian worlds. Originally an old Turkic word for ‘merchant’, it in the 4th/10th century, in fact, with this meaning, in the 11th-century sources, such as Mahmūd al-Kāhghā’ī’s encyclopaedic dictionary Dīwān lughāt al-Turk (Compendium of the Turkic dialects, tr. R. Dankoff and J. Kelly, 3 vols., Cambridge, Mass., 1982-5, i, 269), and the
Evidently a loan-word from the Sanskrit for “caravan leader” (śrāvastī), it is attested in the Uighur translation of the *Saddharmapundarika sutra* as *sartavā*, which is explained as “head of the merchants” (*satikhaśgarī ulughī*) (*Kuansī im pāsar*, ed. and tr. Ş. Tökin, 1960, repr. Ankara 1993, 11), and in the Manichaean and Buddhist Uighur texts from Turfan (*W. Baüger and A. von Gabain, *Die turkischen Turfan-Texte II* and *Die turkischen Turfan-Texte V*, in Sprachwissenschaftliche Ergebnisse der deutschen Turfan-Forschung*, 3 vols., repr. Leipzig 1972-85, ii, 34 and n. 16 and n. 857, the latter in the form *sartuvaqšī*, which was also a designation for the Bodhisattva. See also Bartold’ı, ii/1, 162, 196-7, 253). It may have come into Uighur through Sogdian (*G. Clauson, *An etymological dictionary of pre-thirteenth-century Turkish*, Oxford 1972, 846), stated that it was in the Sogdian language, the latter in the form *sartuvaqšī*, which is obviously derived from the same root (*e.g. ibid.*, ii, ed. E. Blochert, Leiden 1911, 541), occurs in Ibn Muhannā’s late 14th-century polyglot glossary with the meaning *al-muslimun* (P. Melioranskiy, *Al-muslimun vei Caghatay sozliigu*, ed. B. Atalay, Ankara 1970, 264-5, for other instances of its use by Nawā’i in the *Magāhis al-nafa’īs*, etc.; also Pavet de Courteille, *Dictionnaire turc-oriental*, Paris 1870, 334). In his description of Farghana, Babur referred to the population of the northern Fergana Valley as *iktarikh*, such as Muinis, Agahl and ThanaTi, although some of the pre-Uzbek Turkic tribes had already made the transition to sedentarism. Abu ’l-Ghażāli, the 17th-century *Caghātay* Turkish author of the *Sīra-i yu Turk*, frequently employed the expression “Uzbeks and Sarts” when referring to the entire population of *Khe‘izeram* (*Histoire des mongoles et des tatars par About-Ghāzi Behādūr Khān*, ed. and tr. P. I. Desmaisons, 1871-4, repr. Amsterdam 1970, 231, 236). The same usage survived until the 19th century, as attested in the works of historians of Khwāja, such as Mu‘nis, Āghā and Thana‘ī, although it also took on political significance (Bregel, 123-5; Bartold’ı, v, 223), as well as of Khokand (see T. K. Beisembiev, “Tajik-i shakhrukhi” kā tajriāsīkī istočnik, Alma-Ata 1987, 93).

The introduction of a critical mass of Turkic and Turkicised Mongolian nomads into Transoxiana as a consequence of the Uzbek invasions strengthened the general trend toward Turkicisation of the pre- and indigenous Iranian population. The degree to which Turkicisation and Uzbek sedentarisation had progressed by the 19th century is vividly indicated by the fact that the name Sār, which had first been applied to sedentary Iranians and then to both Persian and Turkic-speaking urban dwellers, began to be used chiefly for Turkic-speaking or bilingual town-dwellers, while the term Tājik, which had earlier been synonymous with Sār, was reserved for Persian-speakers only (Subtelný, 49-50; Fragner, 22). Moreover, it was now Kazaq (or Turkmen) in the case of *Khe‘izeram* who as nomads were contrasted with the Sārts as urban dwellers and agriculturalists in Bukhāra and Khokand (Bartold’ı, ii/1, 462, v, 223; Bregel, 123).

Although 19th- and early 20th-century European and Russian scholars adopted the use of the term Sārt for urban Turkic-speakers, who were regarded as the “native inhabitants” of Central Asia (Bartold’ı, ii/1, 462, ii/2, 305-5, L. Budagov, *Srnitel ‘niy slovar’ turk-soslovno-tatarskikh naroci*, St. Petersburg 1869, i, 612), Bartold’ı himself remained sceptical about this use, since he found no direct proof for it in the historical sources (ii/1, 462). No serious attempt was ever made to determine the dialectal differences between Sārts and Uzbeks either in Bukhāra or in Khwāja, although they certainly existed and historians of Khwāja, such as Mu‘nis, Āghā and Thana‘ī, had already made the transition to sedentarism. Abu ‘l-Ghażāli, the 17th-century *Caghātay* Turkish author of the *Sīra-i yu Turk*, frequently employed the expression “Uzbeks and Sarts” when referring to the entire population of *Khe‘izeram* (*Histoire des mongoles et des tatars par About-Ghāzi Behādūr Khān*, ed. and tr. P. I. Desmaisons, 1871-4, repr. Amsterdam 1970, 231, 236). The same usage survived until the 19th century, as attested in the works of historians of Khwāja, such as Mu‘nis, Āghā and Thana‘ī, although it also took on political significance (Bregel, 123-5; Bartold’ı, v, 223), as well as of Khokand (see T. K. Beisembiev, “Tajik-i shakhrukhi” kā tajriāsīkī istočnik, Alma-Ata 1987, 93).
popular etymology “yellow dog” (sari it), which reflected the traditionally contemptuous attitude about the term and it had in fact been used by the Sarts as a self-designation (ii/1, 462, ii/2, 314; B. Kh. Karmishewa, Oeckri etn- nizkoykit istorii yuzhnik rayonov Tadzhikistana u Uzbekistan, Moscow 1976, 147). Soviet historiography never dealt adequately with the term or with the Sarts as an ethnico-linguistic group (for an overview, see Bregel, 121-2), although rich ethnographic material exists for its study (see e.g. the bibliography in F.A. Voznesenskaya and A.B. Piotrovskiy, Mestnost, dina, toponymicheskaya, Mertvyi dlya bibliografii po antropologii i etnografii Kazakhstana i sredneaziatskikh respublik. Trudi Komissii po izucheniyu plenennogo sostava naseleniya SSR i sopredelnykh stran, iv, Leningrad 1927, 181-99).

(W. Barthold [M.E. Subtelny])

SART, the form of the name in Ottoman Turkish of the small village in Lydia in Asia Minor, the ancient Sardes (al Xapage of the classical authors, which makes Sами Bey write Sard), capital of the Ly- dian kingdom, situated on the eastern bank of the Sart Qay (Paktolos) a little southward to the spot where this river joins the Gediz Qay (Hermos). Although in the later Byzantine period Sardes had lost much of its former importance (as a metropolitan see) and been outflanked by Magnesia (Turkish Maghna [q. v.]) and Philadelphia (Aла Şehir [q. v.]), it still was one of the larger towns, when the Saldjuk Turks, in the 5th/11th century, made incursions into the Hermus valley. At the time, they were expelled by the Byzantine general Phocales (1118), but at the end of the 7th/13th century, Sardes had been by the Saldijkids (q.v.) for some time under a combined Greek and Turkish domination, until the Greeks were able to drive away the Turks a second time (Pachymeres, ed. Niebuhr, Bonn 1835, ii, 403). In the beginning of the 8th/14th century the city was surrendered to one of the Saldjuk amirs, and the town probably belonged during the remainder of that century to the territory of the Sarukhan [q. v.] dynasty, whose capital was Magnesia. So when in 752/1352 the principal Sart town had been burnt by the Turkmen ruler Bâyazid I, it had been in the congregation of the then Greek town Philadelphia, took possession of the Sarukhan country, Sardes was probably destroyed and never recovered again.

The modern settlement of Sart (lat. 45° 3’ N., long. 30° 42’ E., alt. 284 m./920 ft.) lies between the Sart Qay and the citadel hill. This hill is 5 km/9.2 miles to the north of the acropolis hill. At the other side of the Gediz Cay is situated the big necropolis of Sarde, a large plain of mounds called Bin Bir Tepe. North of this plain is the Mermer Lake, the ancient Lake of Gyges. The railway from Izmir to Alasehir runs along the southern Gediz Cay bank and has a station at Sart. Administratively, Sart now comes within the nahiye of Salihli in the  ilçe or province of Manisa.

Excavations at the classical, Roman and Byzantine site of Sardes have been undertaken, especially by American archaeologists since the early part of the 20th century. In recent decades, these have been associated with G.M.A. Hanfmann. See, in particular, his Sardis und Lydien, in Abb. Ak. Wiss. zu Mainz, geistes- und sozialw. Kl., Jhg. 1960, 499-536; idem (ed.), Archaeological exploration of Sardis (1958-1975). Sardis from prehistoric to Roman times, Cambridge, Mass. 1983. See also PW, 1, A.2, cols. 2475-8 s.v. Sardes, and Der kleine Pauly, iv, cols. 1551-2.

(1. H. KRAMERS*)

SARÜDJ, a town in Diyar Bâlak [q. v.], on the most southerly of the three roads from Biregîk [q. v.] to Urfa [see AL-RUKH] in 36° 58’ N. lat. and 38° 27’ E. long. As the name of the town is also that of the district, its relation to the ancient names An- thenhisia and Batnae is disputed; see Bibl. On account of the fertility of the district in which the town is situated, and its central position between the Euphrates on the one side, and Urfa and Harrân [q. v.], from each of which it is a day’s journey distant, on the other, the traffic through it brought it a certain degree of prosperity, especially as it was also important as a post-station between al-Ra’ka and Sumaysa. According to Ibn Khurradädibih, it was 29 farsaks from the former town and 13 from the latter. The principal occupation was settled by the natural suitability of the soil or growing fruit and the vine, as all the geomorphists tell us. Within the town itself Ibn Dubayir (late 6th/12th century) found or- chards and family-owned water.

Sarûdj—an ancient centre of Syriac Christianity, and the birthplace of Jacob of Sarûdj (d. 521) was captured, with the rest of al-Djazîra, by the Arab commander ɬiyâd b. ɬâmîn in 198-239. Three cen- turies later it came within the possessions of the Ham- dâns [q. v.] of Mawâtî and Aleppo, and then of the resurgent Byzantines. Towards the end of the 5th/11th century, Diyar Bâlak was recovered by the Arabs, and in 1241 fell to the Franks held Sarûdj, in the face of attacks by the Ar- tukid Il-Ghazî and the Turkish governor of Mawsil, Mawûtî, until in Radjâh 1274 it was captured by the Christians and was granted by the Franks held Sarûdj, as part of the Frankish County of Edessa. The Franks held Sarûdj, in the face of attacks by the Ar- tukid Il-Ghazî and the Turkish governor of Mawûtî, Mawûtî, until in Radjâh 1274 it was captured by the Christians.
Sarudj was already in ruins. Nineteenth-century travellers described it much as did the mediaeval writers, but with the delimitation of the frontier, came around the same time, the amirate acquired a common frontier with the Ottomans, who annexed the amirate of Karasi [q.v.].

An important part of the fleet of Sarukhan was destroyed by the Crusaders of Amalfi, producing one of the usual raids organised in collaboration with Umur Aydîn-oghlu and directed against the Christian territories (1347). The exact year of Ilây's death is not known. In 1357 the amirate was governed by his son Ishâk Celebi, who was closely connected with the derwish order of the Mevlevîs or Mawlawiyya. It was probably Ishâk Celebi who established relations with the Byzantine emperor John V Palaeologus when the latter sailed to Phocaea in 1358 in order to liberate his son the son of the Osman, Ishâk, and had been held as prisoner by the Genoese. The emperor concluded a new treaty with the Sarukhan-oghlu and, furthermore, he took the amir's children as hostages to Constantinople. Ishâk Celebi probably died in 1388 and was succeeded by his son Khiîdr Şah, in whose days the amirate was annexed by Bayezid I [q.v. (1390)]. Khiîdr Şah was sent to Bursa where he died.

Immediately after the battle of Ankara between Timûr and the Ottomans (804/1402), the amirate was restored by Timûr to Orkhan Sarukhan-oghlu, who had followed him in his Anatolian campaign. It was taken by the Ottomans again in 1410 to become one of the important sanqâds of their state, while Maghîna became the residence of one of the heirs to the throne. Nomads of Sarukhan were transported by the Ottomans to Rumelia, and several soldiers were granted timars (the Sarukhanlı). In the territory of Sarukhan and, especially, in Maghîna, besides the important emigrants erected by the Sarukhan-oghullaris, new ones were added by the Ottomans to honour the residence of the Ottoman princes there: among them is the Murâdiyye mosque (after Murâd III), which was built by the great architect Sinân [q.v.].

(ELIZABETH A. ZACHARIADOU)

SARWISTAN, a small town in the Persian province of Fars (lat. 29° 16' N., long 53° 13' E., alt.
1,597 m/5,238 ft.), some 80 km/50 miles to the southeast of Shiraz on the road to Nayriz [q.v.]. It seems to be identical with the Khawristân of the early Arab geographers, but first appears under the name Sarwistan ("place of cypresses") in al-Mukhdasdi as the end of the 4th/10th century.

It is notable for the tomb and shrine of a local saint, Shaykh Yusuf Sarwistanî, dated by its inscription to 682/1283, and for a nearby mysterious building situated on the Shiraz-Fasa road 12 km/7 miles south of Sarwistan, first noted in 1810 by the English traveller Win. Ouseley and described some 30 years later by Flandin and Coste. This has traditionally been taken by western scholars as a Sâsânid palace, but building on the vague resemblance to the Emperor Ardashir's palace at Firûzâbâd [q.v.] and on the fact that al-Tabâri, i, 870-1, tr. Nödlke, Geschichter der Perser und Araber, 111-12, says that Bahram V Gûr's minister Mîr Narsê laid out gardens near Firûzâbâd, including one with 12,000 cypresses (sârs). Recently, however, a detailed architectural study by Lionel Bier has shown that it is more likely to be post-Islamic and is probably a tomb. The source for the name is Sarwistan, a study in early Iranian architecture, Persia and the Persian questions, London 1986, with all the earlier bibl. given.

(C.E. Bosworth)

Sâsâni, Banû, the blanket designation in mediaeval Islamic literature for the practitioners of begging, swindling, confidence tricks, the beggar's jargon (munâgî, lughêt Bânî Sâsân) composed by the 4th/10th century traveller and littérateur Abû Dulaf al-Khazrâji and by the 8th/14th century poet Saâfî al-Dîn al-Hillî [q.v.], in which many of their tricks and scabrous practices are described. (The mediæval Islamic underworld. i. The Bânû Sâsân in Arabic life and lore, ii. The Arabic jargon texts. The qâsîda sâsânîyyas of Abû Dulaf and Saâfî al-Dîn, Leiden 1976.)

The origin of the name Bânû Sâsân is shrouded in mystery. The sources give several explanations, some of them implausible. A mythical Shaykh Sâsân is often mentioned as the founder of the fraternity of crooks and beggars. One oft-repeated story found in the sources, from the time of the Persian author and translator from Pahlavi into Arabic, Ibn al-Mukaffâ [q.v.], is that Sâsân was the son of the legendary Persian emperor of the Kayânûn line, Bahman b. Islandiyâr, but was displaced from the succession to his father, hence took to a wandering life amongst, as some sources state, the nomadic Kurds (a people notorious in mediaeval Islamic times for banditry and violent ways of behaviour). Other stories hold that the Persians as a whole took to begging in the Arab conquest of the 1st/7th century, and aroused pity and commiseration by claiming to be scions of the dispossessed Sâsânî royal house. The process whereby the name of a fallen dynasty is applied ironically or satirically to a later group seems psychologically possible; but some modern authors have supplied further etymologies for saâsân from Sanskrit or Persian (see Bosworth, op. cit., 1, 22-3).

Bibliography: Given in the article, and see also that to al-Mukawwârî; it should be noted that the critical text of the Kashf al-asrâr promised by the author of that article has regrettably not yet appeared. (C.E. Bosworth)

Sâsânîds, a pre-Islamic Persian dynasty that ruled a large part of western Asia from A.D. 224 until 651. In Arabic and modern usage, the dynastic name is derived from Sâsân, who is mentioned as a "lord" in the inscription of Shapur I [q.v.] on the Kašâb of Zoroaster (SKZ). The inscription of Narseh at Paikuli also refers to the royal clan of Sâsânân. Theophoric names in the Parthian period suggest that Sâsân may have been a minor deity or perhaps a deified ancestor. According to the late Sâsânî Kârnâmâg, Sâsân was the son-in-law of Pâpâk, who gave him his daughter in marriage because Sâsân was descended from Dârâ, the last Achaemenid king. Ardashir I [q.v.] was their child, although he is afterwards regarded as the son of Pâpâk. In the account of al-Tabâri (i, 814), derived from the late Sâsânî Xwaday-nâmâg, Sâsân was custodian of the fire temple of Anâhitâ at Išâkhr [q.v.], married to a member of the Bazrângid ruling family in Fârs [q.v.], and the father of Pâpâk.

The rise of this family to power was aided by Parthian (Arâsacid) preoccupation with their own civil war and conflict with the Romans. In about 205-6 Pâpâk overthrew the last Bazrângid ruler of Fârs and ruled at Išâkhr; he was succeeded by his son, Shâpûr, in about 209. Shâpûr's younger brother, Ardashir I, succeeded him in about 216, expanded his rule over the rest of Fârs, Khusûzân [q.v.] and Kirmân [q.v.], and, allied with the rulers of Adiabene and Gar- makan, defeated and killed the Arâsacid Artabanus V in battle on the plain of Hormizdagân, probably in western Media, in about 224. He commemorated his victory in a rock inscription at Firûzâbâd near Gûr and Kâhlâî (see KAHLÂÎ), as well as those of the maâmân genre [q.v.] and of the hâmar [q.v.]. He was succeeded by Ardashir II, who was posthumously anointed by the people. (The mediæval Islamic underworld. ii. The Bânû Sâsân in Arabic life and lore, ii. The Arabic jargon texts. The qâsîda sâsânîyyas of Abû Dulaf and Saâfî al-Dîn, Leiden 1976.)

The present writer has studied in detail this material and also two long poems written substantially in
in 226, but failed to take Hatra (al-Hadr [q. v.]), conquered Media, and was turned back from Armenia (Arminiya [q. v.]) by the sons of Artabanus in about 227. In the east, he occupied the rest of the Parthian empire by force and intimidation, extinguishing the royal fires of local rulers. He also occupied coastal Babylon (Urfa [q. v.]) in Arabia. In 230 he invaded Roman Mesopotamia, claiming everything as far as Ionia and Caria by ancestral right from Cyrus to Darius, the last Persian king, whose kingdom Alexander had destroyed. Hatra went over to the Romans, whose counter-invasion of Armenia and Media by the generals of Alexander Severus was beaten back by Ardashîr with heavy losses on both sides. After the death of Alexander Severus in 235, Ardashîr was able to take Nisibis and Carrhae (Harrân [q. v.]) in 238. In 240 his son, Šâpûr, was crowned as co-ruler, possibly to secure the succession. Hatra fell to them in 240, and they appear to have been victorious in Armenia before Ardashîr died early in 242.

Ardashîr I was the real founder of the Sasanid monarchy. This was initially based on a cult of divine kingship that continued from the Arsacids, so to 227 it has been called the <i>theopator</i> (<i>God of divine descent</i>) and represented as receiving a diadem from Tyche on their coins, and had a royal, dynastic fire dedicated to them as to the other gods. On his coins Ardashîr's earliest crown resembled that of Mithradates II, he was called "the Mazda-worshipping god, Ardashîr, who is descended from the gods", and the reverse bore the image of a throne mounted on a column with the inscription "the fire of Ardashîr". His royal fire was kindled at the beginning of his reign in 224-5. In rock reliefs, he was shown receiving a ring-like object from Ohrmazd, who was also portrayed as a king, probably to show the divine nature of royal authority, and/or that Ardashîr ruled the world on behalf of Ohrmazd. Later tradition credits Ardashîr with having the Avestan teachings collected and adding the five Gatha days to the Zoroastrian calendar.

The Achaemenid legacy was also important for the early Sasanid monarchy, beginning with the irredentist claims of Ardashîr (also made by the late Arsacids) reported by the Greek and Latin writers (who called him Artaxerxes). This legacy may be seen in the Sasanid dynastic roots at Istâghâr, the use of architectural motifs from Persepolis in Ardashîr's palace at Fīrūzâbâd, the choice of the major Achaemenid site of Naksh-i Rustâm for his rock reliefs, inscriptions, and fire temples, and the later claim of their descent from Dârâ. Under Šâpûr I this is seen in his use of an Achaemenid building at Naksh-i Rustâm for his inscription and in the interest of some of his officials in viewing the paintings of Esther and Ahasuerus (Artaxerxes) in the synagogue at Dura.

The structure of the Sasanid state under Ardashîr was outwardly similar to that of the late Arsacids with various elements from the Achaemenid, and Parthian heritage. Ardashîr founded his capital, Ctesiphon, at the junction of the Euphrates and Tigris rivers, creating the province of Mesopotamia, and attacked Babylonia (Asterozan). Šâpûr defeated and killed Gordian at Massice on the middle Euphrates, which he renamed Péroz-Šâpûr ("victorious is Šâpûr", also called al-Anbâr [q. v.]). Philip the Arab made peace with Šâpûr for 500,000 denarii and promised to help in the campaign against Armenia, which stabilised the frontier for about ten years.

In 252 Šâpûr had the Arsacid king of Armenia, Khusrav, assassinated. The latter's son, Tiridates, fled to the Romans, while the sons of Tiridates joined Šâpûr. One of them, Artavazdes, ruled Armenia from 252 until 262. Claiming Roman harm to Armenia, in 256 Šâpûr attacked the Romans on the Euphrates, destroying a Roman army at Barbalissos, taking Dura, occupying Mesopotamia, and invading Syria, where he took Antioch (Antâkîya [q. v.]) with the help of a local senator called Cyriades, who took the imperial title with Persian backing. Šâpûr campaigned up the Orontes valley as far as Emesa (Hims [q. v.]) and returned to Mesopotamia. The Persian garrison in Syria was massacred in 257, Cyriades was murdered by the people of Antioch, and Dura was reoccupied by Roman-Palmyrene forces between 256 and 260. Between 256 and 258 Šâpûr I settled his Syrian captives in Khûzistân at a new city called Weh Antioch Šâpûr ("the Better Antioch of Šâpûr"), which became Dündâyshâbûr (Gondeshâhpûr [q. v.]).

Between 258 and 260 Šâpûr besieged Edessa and Carrhae and defeated a Roman relief army near Edessa, taking Valerian captive. According to Kirdîr, who was with the army, Šâpûr then pillaged, burned, and destroyed Antioch and Syria, Tarsus and Cilicia, Caesarea and Cappadocia, as far as Greece, Armenia, Georgia (al-Kurdj [q. v.]), Albania, and Balasagan up to the Gates of the Alans. Except for Magians (Magi [q. v.]), who were not harmed, Šâpûr deported tens of thousands of captives to Fars, Parthia, Khûzistân, and Babylonia. He was harrassed on his return by Odatâin of Palmyra, who retook Carrhae and Nisibis, besieged Ctesiphon, recovered the booty (although Kirdîr claims the booty was returned), captured Šâpûr's concubines, and restored the Roman frontier between 262 and 267. Šâpûr's settlement of his captives was part of the economic development of his state through the use of captive labour, and a denial of those labour resources to the Romans in the provinces from which they came. They were used to build dams, bridges, and irrigation works in Khûzistân, and to build Šâpûr's palace at Bishapur in Fars. They also introduced eastern Mediterranean cultural influences where they settled.

Šâpûr commemorated his achievements in at least seven rock reliefs, and left a major inscription (SKZ) on the eastern wall of the Ka'ba of Zoroaster at Naksh-i Rustâm in Parthian, Middle Persian, and Greek sometime after 262, when he replaced Artaevazes with his own son, Hormizd-Ardashîr, as great-king of Armenia (262-72). In his inscriptions Šâpûr was called "the Mazda-worshipping god, Šâpûr, king of kings of Iran and non-Iran, of divine descent." There was a royal fire at Bishapur; Šâpûr's coins were the first to have the fire altar flanked by two attendants (in the 3rd century sometimes the king and queen) on the reverse; he founded many Bahrâm fires, of the god of victory, in every land; he gave benefits to many Magians; he established name-fires for his own soul and for members of his immediate family and daily sacrifices of sheep, bread, and wine for twenty-nine members of the royal family, living and dead. Several of his sons had the names of deities. Such royal patronage of the Magian cult, with fires possibly beginning to replace cult...
images, should be balanced by Shapur’s reputation for tolerance, his patronage of both Kirdir and Mānī (who converted some members of the royal family), and his toleration of Christian and Jews. The latter were largely unaffected by their persecution for respecting Persian law and paying taxes. According to Eliseas Vardapet, in the 5th century, Shapur issued an edict that people of every religion should be left undisturbed in their belief. According to the Denkard (DKM, 412-13) he collected Magian literature which had been dispersed in India, the Byzantine Empire and other lands, that dealt with medicine, astronomy, and philosophical subjects, added them to the Avesta, had a copy put in the royal treasury, and considered bringing all systems into line with the Mazdayasian religion. There has been modern speculation that Shapur favored a universalizing religious syncretism corresponding to his imperial ambition.

In his inscription (SKZ) Shapur described his empire as consisting of Fars, Partījava, Khūzestān, Maysān, Asōrāstān (Babylonia), Adiābān, Arabia (Bēth ‘Arbāyē), Aḏgarbāyrgān, Armenia, Iberia, Maxelōnia (Lazica), Alřan, Balāṣagān up to the Caucasus mountains and the Gates of the Alans, the Elburz mountains, Media, Gurgān [q.v.], Marw, Harāt [q.v.], Aḵahrāsh, Kirmān, Sīstān, Tugrān, Mākrān [q.v.], Pārdān, Hind and the land of the Kuḥāns up to Pasḵābūr (Pāḵwār?), to the borders of Keš, Sogdiana and the mountain of Shāhs (Tashkent [q.v.]), and Mazon (‘Umanā) on the other side of the sea. The only definition of the difference between Iran and non-Iran is given by Kirdir, according to whom Iran included Mavsārān, Aḏgarbāyrgān, Isfāhān [q.v.], Rayy [q.v.], Kirmān, Sīstān, Gurgān, Marw, and as far as Pasḵābūr in the east. Non-Iran was the territory in the northwest including Armenia, Iberia, Maxelōnia and Balāṣagān up to the Gates of the Alans.

Centralising tendencies under Shapur were expressed in three ways. Members of the royal family participated in rule from the beginning of the dynasty and their appointment as sub-kings began the process of converting client kingdoms into provinces. By the end of Shapur’s reign five of his sons, who did not start local dynasties, ruled Sīstān, Gīlān, Kirmān, Maysān and Armenia as kings. Second, he continued Ardashir’s policy by founding at least eleven cities out of the expanding royal domain (dašt-āğerdārē), and appointed governors (dāḏbars), with a staff of scribes, a treasurer, and a judge, for at least eight to ten new and existing cities. None of these cities were in the territory of sub-kings and thus constituted the core of directly administered territory in Asōrāstān, Khūzestān, Fars, Media and Aḵahrāsh (Khorāsān). Third, administration was centralised at an increasingly hierarchic and elaborate royal court, attended by members of the Varāz, Sūren and Kāren families, who had Sasanid dynastic names but no ad- ministerative positions. (Two princes called Sāsān were also raised by the Farrāgī and Kidūḡān families.) Court officials included the bidāxī (or pitāxī, viceroj regent?), hazārābed (commander of the royal guard), framādār (steward of royal property), chief scribe, chief judge, treasurer, and market inspector (wuzūrd̄, agoranāmā). From the third century the Sāsānīd ruling classes were organized into a hierarchy in descending order of kings and queens (shahābd̄ārē), princes (waspat-hrāgān), grandees (wuzurgd̄, wuzurgd̄ān), including powerful senior officials and court officials, and the minor nobility (āzādān).

When Hormīdz-Ardashīr (Hurmuz [q.v.], 272-73) succeeded his father, his brother, Narsēh, the Sakān-šāh, became king of Armenia (272-93). Hormīdz-Ardashīr was the first to be called “king of kings of Iran and non-Iran” on his coins. He allowed Mānī to preach, but he promoted Kirdir to Ohrmazd-mowbed (mobadh, [q.v.]), and put him in charge of ritual and sealing contracts. The third century was a transition period between the Hellenistic tradition of expressing political allegiance through the cults of deified rulers and the emergence of confessional religions with mass memberships that became identified with states. By the mid-third century Manicheanism, Christianity, and an early form of Mazdean Zoroastranism were all spreading in Sasanid territory. The success of the Mazdean presence in the late 3rd century was related to the career of Kirdir, the proliferation of Bahrmār fires, and the need of the family of Bahram I [q.v.] (273-76) to legitimise their succession against the claims of his brother Narsēh. Bahram I had been king of Gīlān under Shapur; he was shown being invested by Ohrmazd in a rock relief at Bishāpur; he wore the solar crown of Mithra on his coins; and enjoyed fighting, hunting, and feasting. When Mānī heard of his accession, he set up fourteen rock reliefs up to the Gates of the Alans, and claimed to have destroyed idols and established the place of the Yazads. He also claimed to have suppressed Jews, Buddhists, two kinds of Christians, “baptists”, and Zan-
diks (probably Manichaeans). Manichaeans were persecuted under Bahram II, their leader, Sisinnios, was killed, but they were protected and patronised by Amr b. 'Adi, the amir of the Lakhrūm (Lakhrūmids [q.v.]) at al-Hira [q.v.]. Kirdir's claims may have been exaggerated, but they mark the first recorded attempt to create a mass constituency for Magianism and an affirmation of the Mazdaean identity by opposition to other religions in the late 3rd century.

These developments also contribute to the thesis that the Sasanids persecuted non-Mazdaeans when the monarchy was weak and needed support from the Mazdaean priests. In addition to the Bahram's problem with legitimacy, Bahram II had to fight two fronts. In 283 a Roman army under the emperor Carus reached Ctesiphon, but Carus died and the army withdrew. However in 287 Bahram II made peace with Diocletian in order to deal with the revolt of his brother Ohrmazd in the east. According to the terms, the Sasanids ceded their claims to upper Mesopotamia and western Armenia, and an Arsacid prince was enthroned in western Armenia as Tiridates IV, leaving Narseh with eastern Armenia. By the end of his reign Bahram II had defeated Ohrmazd, conquered Sistan and made his heir Sakanshāh.

The death of Bahram II in 293 set off a dynastic civil war. One noble faction, led by Wahān, and joined by the king of Maysan, Ādurfarnbāg, supported the succession of the Sakanshāh as Bahram III. Other nobles rebelled, gathered in Asorestan, and sent for Narseh, the last son of Shāpūr, who came from Armenia to Iran and met them at Paikuli north of Khānkīn [q.v.]. There Narseh was proclaimed king by an assembly of nobles that included Shāpūr the tax collector (haragbūd), Pāpak the bidaxār, Ardāshīr the hazārāh, Rakshī the spāhīd and the heads of some of the great families. This event was commemorated by a stone monument bearing a major inscription in Middle Persian and Parthian, that includes events later than the meeting in 293. In this inscription Narseh proclaimed his legitimising propaganda that "Shāpūr willed that this one [Narseh] should be lord over Erān-tahr, because he was the best, the most just, and the most vigorous after Shāpūr." He also recorded his recognition by twenty-seven rulers, who either acknowledged him as king of kings, according to Āvaknīn and others, or acknowledged his right to the throne, according to Frye. If the first, it would indicate that the state was being reorganised around a new, loosely-organised state; if the second, it would indicate a significant contraction of the state since the time of Shāpūr, and the revivals of local rulers. Narseh then defeated the king of Maysān and rival forces in Khūzūstān, captured and executed Wahān (the fate of Bahrām III is unknown), and replaced the name of Bahrām I on the relief at Bíshāpūr with his own.

He was called the Mazdaean, divine Narseh, king of kings of Iran and non-Iran. By descent from the Gods' [q.v.] on his coins, which had his own face in the flames of the fire-altar on the reverse. In a rock relief at Nakhš-i Rūstām he is depicted receiving a ring from a female figure, usually identified as Anāhītā, and at Paikuli he claimed to have recovered Armenia for the land of Iran through Ohrmazd, all the yazads and the Lady Anāhītā. Beneath the common veneration of Ohrmazd one can see a shift from one yazad to another, from Verehrāghna to Anāhītā, associated with the new branch of the dynasty. Narseh, worth the policies of the Bahrams, neglected fire temples, perhaps in favour of his own royal fire (his eldest grandson was called Adur-Narseh "the fire of Narseh").

In 296 Narseh conquered Armenia, invaded Mesopotamia, and prepared to invade Syria. Diocletian sent the Caesar Galerius, whose forces were crushed by Narseh. Galerius regrouped at Antioch and invaded Araman, and defeated Narseh in 297. Narseh defeated and captured his family, while Diocletian advanced to Nisibis. In 298 Narseh secured the return of his family by ceding several districts on the upper Tigris to the Romans and setting the frontier at the Tigris. Tiridates was restored in Armenia, which was enlarged in the east to the frontier of Media. The king of Iberia was to be invested by the Romans, and Nisibis was to be a place of commercial exchange. The treaty of Nisibis thus marked a return to the balance of power at the end of the 3rd century with the recovery of the late Roman empire under Diocletian.

Narseh was succeeded by his son Hormizd II (302-9), who continued his father's policies and was represented in combat in a rock relief at Nakhš-i Rūstām. It was during his reign that Armenia became Christian under Tiridates IV, making Christianity a political issue for the Sasanids, especially after the conversion of Constantine in 311, and dividing Armenia henceforth between pro-Roman Christians and pro-Sasanid nobles.

Hormizd II had several sons; the eldest, Adur-Narseh took the throne briefly when his father died in 309, but the officials and priests at court made a posthumous son, Shāpūr II (309-79), king and enthroned him as an infant. Shāpūr II's minority lasted for fifteen years; his reign lasted for seventy years, the longest of any Sasanid king. The survival of the Sasanid state during Shāpūr II's minority indicates the strength of ruling institutions by the 4th century and the fact that the monarchy had become more important than the monarch as a focus of loyalty for nobles, officials and priests who had a vested interest in the system. The state was held together by its administrative structure, and a glimpse of local officials going back and forth to court is provided by two inscriptions on a doorpost at Persepolis from 311 and 327. According to post-Sasanid accounts, the main problem during Shāpūr II's minority was the incursion of Arabs from Eastern Arabia into ʿIrāq [q.v.], Khūzūstān and the coast of Fārs. At his majority in 324 Shāpūr II drove them out of ʿIrāq, began to build long walls and a trench (ʿAbdād Sābūr) along the desert frontier in the south-west to keep them out, sailed from Fārs to al-Baḥrayn, defeated the Arabs there, made eastern Arabia a province with garrisons and officials and may have built the Sasanid fort at Sirāf [q.v.] as a naval base. He resettled Arabs in Khūzūstān, Fārs and Kirkūm.

The resumption of war with the Romans over Armenia and Mesopotamia from 337-8 to 350 coincided with the first persecution of Christians in the Sasanid state and support for Shāpūr by anti-Christian pro-Sasanid Armenian nobles. In about 350 Shāpūr II had the Armenian king Tirān killed and may have made the latter's son, Arshak (ca. 350-67), king. At about the same time, Christians rebelled at Susa; Shāpūr II had the city razed and trampled by elephants and built the new city of Šīrāz (Shiraz) nearby. The persecution lasted until the end of his reign, encouraging the thesis that henceforth Christians tended to be persecuted during wars with Rome.

At mid-century Shāpūr was driven eastwards by the invasion of Central Asia by Chionite Huns. Iranians mixed with Huns were driven south and attacked eastern Iran. In the 350s Shāpūr II campaigned in the east against the Chionites and Kuhāns. The Kuhāns
were conquered and their territory governed into the early 5th century by a series of nine Sasanid royal princes with the title of Kuhshangshah according to Lukeinos and Gobha, although historians put this in the 3rd century. Shapur II came to terms with the Chionites, concluding a treaty of peace and alliance with them and the people of Gilan (Gelanii) in about 358.

He then returned to the Roman front with Chionite, Gelanii, Albani and Segestani allies. In a letter to Constantius he revived Achaemenid irredentist claims to territory as far as the river Strymon and the border of Macedonia, as saying that it was his duty to recover Armenia and Mesopotamia, which had been taken from his grandfather, Narseh, by the Romans, by defeating them. He took Adrian in 359 and Singara in 360, deposing the population to Persia. In 363 Julian marched down the Euphrates and invaded Babylonia, while Armenian forces marched east from Carrhae. Julian's rebuilding of the temple in Jerusalem encouraged Jews at Maoba (Wet-Ardeghur, across the Tigris from Ctesiphon) to believe the Messiah had come to return them to Palestine; thousands of them marched out of the city and were massacred by Shapur's troops. Ammianus Marcellinus, who was with Julian's army, has left a first-hand account of his campaign and a description of Babylonia. He described wall-paintings of hunting scenes in a palace near Ctesiphon, an annual fair at Batnae in Fars at the beginning of September to buy goods brought by Indians and Syrians by land and sea, and cities and villages all along the coast of the Gulf where many ships sailed back and forth. He also described the battle-order of the Sasanid army at Ctesiphon with mail-clad cavalry in front, infantry behind them and elephants in the rear. The Romans won the battle at Ctesiphon in 363, but Julian was killed, and Jovian secured the retreat by ceding Nisibis, Singara and the trans-Tigris districts that Narseh had lost, and abandoning Armenia. Between 368 and 370 Shapur took Armenia by a combination of diplomacy and force, won over some nobles and satraps, invited the king, Arvagah, to a banquet, blinded, imprisoned, and killed him, pillaged Armenia, drove the Roman protégé out of Iberia and enthroned his own son. Roman counter-measures left Iberia divided and Armenia under a son of Arvagah as a Roman protégé, whom they had killed in about 376.

The reign of Shapur II marked the beginning of a shift in royal legitimising ideology from being of divine nature and descent to being human and descended from the Kayanid (q.v.) kings mentioned in the Avesta. Shapur II was the last Sasanid king to be called "of divine descent" on his coins. In his letter to Constantius, in 358, he called himself "king of kings, partner with the stars, brother of the sun and moon. The translation was symbolised by emphasis on the royal fortune, Hvarnah (xwarrah, faur), as a yazad the subject of a Yagi, represented by a ram with a bow around its neck. At the siege of Arvad, in 359, Shapur wore a gold ram's head set with gems. The garrison of Maoba, in 363, extolled in song the justice and good fortune (justitiam felicitatemque) of their king. He ordered the Christian, Pósi, to venerate the "fortune (god) of Shapur, king of kings, whose nature is from the gods." According to Lukeinos, the dynastic myth of Kayanid descent through Dara was invented in about 350 by a Christian, Kayanid, who wrote a chronicle telling how the Hvarnah of the Kayans had watched over Ardašir I in the form of a ram with a bow around its neck, ensuring his victory over the Parthians.

The 4th century also saw a shift from rock reliefs to royal silver objects with hunting scenes. The metal came from a single source and the objects were probably produced in a royal workshop beginning with Shapur II, such as that run by Pósi at Erangshahr-Shapur (Kardhe dhá Ladhain). Shapur II was also associated with royal banqueting customs and court protocol.

This same century was a period of sharpening religious conflict, inter-faith polemic and the consolidation of religious identities. The polemic lines were drawn among Magians, Manicheans, Christians, Jews and Manichaics, Magians and Christians opposed Manicheans and Manichaics; Magians and Jews opposed Christians, probably indicating who felt threatened by whom. According to the Dékard (iv, 26-7) Shapur II (who may have been Zurvanite) issued an edict defining true belief and condemning false belief, but does not say what they were. Under Shapur II the rad, Mahrapsar, sanctioned the confiscation of the property of Manicheans for the royal treasury. The latter's son Ardabur was involved in royal financial decisions in the formulation of Mazdaean doctrine, remembered and quoted in later tradition. He stood for judicial procedure, an ethical reduction of the sphere of life controlled by fate and the embodiment of the spiritual in the material, and he opposed Manicheans. The spread of popular piety was reflected in the motto "reliance on the yazad" on personal seals, although the meaning of yazad was beginning to shift from the divine beings in general to a term for Christ and the cross.

The organisational structures of Magians, Christians and Jews underwent elaboration in this century. The earliest references to a supreme moubed and to a priestly hierarchy with territorial jurisdictions corresponding to secular administrative divisions belong to the reign of Shapur II. As part of the ruling class, Magian priests and the attendants of fire-temples were exempt from paying the poll tax. Christians formed an ecclesiastical structure under the primacy of the bishop of Ctesiphon from the early 4th century, which made it easier for the state to deal with them. Shapur II required the bishop of Ctesiphon, Shem'on bar Sabbā'ē, to collect a double poll tax and land tax from Christians because they were living in peace. Jews were ruled indirectly through their exilarch in return for taxes, loyalty and defence. Subordinate officials of the exilarch administered justice, collected taxes for the government, supervised markets, preserved order and defended Jewish towns. The 4th-century exilarch, 'Ukba bar Nehemiah, established the principle that the law of the government was to be obeyed just as the Torah. By the end of the 4th century, there was an alliance between the exilarch and the rabbis, who staffed the religious courts, where they applied religious law to the life of the community, acting as local administrators, collected the poll tax and enforced dietary laws as market inspectors. By this century world-affirming doctrines were being used by the representatives of authority in the new order: Mazdaean priests, Jewish rabbis and the Christian clergy, who used ritual and law to exercise social control.

Under the successors of Shapur II a three-way power struggle emerged among the monarchy, the vazāngān or nobles, and the Magian priests, while the pressure from steppe peoples increased. The Sasanids were generally successful in warfare in the east until the mid-5th century. Ardašir II (379-83) was most probably the brother of Shapur II; an investiture relief at Tāk-i Bustān near Kirmāngāh (q.v.) is usually
The Sasanid dynasty was founded by Ardashir I, who overthrew the Parthian empire and established a new dynasty in Persia. Ardashir and his successors, including Shapur I, ruled over a vast empire that extended from the borders of the Roman Empire in the west to the borders of the Huns in the north. The Sasanid empire was characterized by its religious tolerance and its respect for the traditions of Zoroastrianism. The Sasanid kings were known for their patronage of the arts and sciences, and their patronage of learning and scholarship was instrumental in preserving and developing the traditions of Persian literature and culture.

In the late 5th century, the Sasanid empire faced numerous challenges, including invasions by the Huns and the thiếupagh, who threatened the security of the empire. However, the Sasanid kings were able to resist these challenges and maintain their power through the use of their military and political resources. The Sasanid empire declined in the 7th century, and was eventually replaced by the Arab conquest.

Overall, the Sasanid dynasty was a period of great cultural and political growth in Persia, and its legacy continues to shape the history and culture of Iran today.
to be purified and converted to Magianism, and he is said to have visited this shrine on the feasts of Sada (the midwinter fire festival) and Nawruz [q.v.].

Tradition also associated Bahram V with importing Indian musicians, who secured peace with the Hephthalites in return for tribute, gave Armenian Christians religious freedom and made Armenia a royal province. By the late 5th century, Sasanids began to have dates in the regnal year of the king. The desire of Balash to build a new fire temple as slaves. In 470 two rabbis and the son of the exilarch were imprisoned and executed, and in 474 or 477 Babylonian synagogues were closed, schools destroyed, Jews were made subject to Persian law and Jewish children were turned over to Magians to be raised. When Fruz died fighting the Hephthalites in 484, the uzurgdn enthroned his brother Balash (484-8), who secured peace with the Hephthalites in return for tribute, gave Armenian Christians religious freedom and made Armenia a royal province. By the late 5th century, Sasanids began to have dates in the regnal year of the king. The desire of Balash to build a new fire temple for sinfulness and assigned to the royal domains for several years. In 455 Yazdajird II is said to have outlawed the Jewish Sabbath.

The death of Yazdajird II was followed by a dynastic civil war between two of his sons, Hormizd III (457-9) and Fruz (459-84), who defeated and killed his brother. During the civil war the Albanian king rebelled and allied with the Huns north of the Caspian. After war with the Albanians, Fruz made peace, permitting Albanians and Armenians to remain Christian, and the Byzantines subsidised the defence of the Caucasus passes. Upon consulting with Marbut, the mowbedan mowbed, the title of the chief judge and supporters of his religion in the Avesta and in the development of the myth of the Kayanid descent of the Sasanid kings included in the Book of Kings (Xwaday nāmag) that contained material from at least the 5th century. Drought, famine and the decimation of the Hephthalite and civil wars may have created an agricultural and demographic crisis in the state, while the uzurgdn engaged in local oppression under a weak monarchy. Kubadh I allied with the Zaradush tagan, that captured the Sasanid state at the end of the century and survived as a sectarian form of Magianism. Contemporary with the Monophysite movement in the Byzantine empire, this was related to political support for some particular form of the dominant faith, the enforcement of religious conformity for political reasons, the popularisation of Magianism through forced conversion and the impact of the Avesta, which sanctioned the sharing of wealth, women, and wisdom. Drought, famine and the decimation of the uzurgdn in the Hephthalite and civil wars may have created an agricultural and demographic crisis in the state, while the uzurgdn engaged in local oppression under a weak monarchy. Kubadh I allied with the Zaradush tagan and their leader Mazdak [q.v.] as a means of popular support against the uzurgdn and the priests. He tried to force the Armenians to convert, permitted or ordered the sharing of women and redistributed land. The sharing of women and property may have been intended to undermine the uzurgdn, break down social barriers to marriage between nobles and commoners, repopulate the state and restore agriculture, but people were allowed to help themselves, causing disorders in 494-5. In 496 the uzurgdn deposed Kubadh over his policy toward women and held an assembly to decide what to do with him. Procopius reports that it was not legal to enthrone a commoner unless the royal family was extinct and that the majority were unwilling to kill a member of the royal family, so they imprisoned Kubadh and enthroned his brother Qamasp (496-99).

Kubadh escaped to the Hephthalites, whose army restored him to the throne in 499. Qamasp was blinded and imprisoned because, according to Procopius, no-one with a physical deformity could be king. Kubadh's second reign began with a series of natural disasters: in 503, famine, and in 505 the Hephthalites crossed the Oxus, and in about 469 defeated and captured Fruz, who lost Harat to them, agreed to pay them tribute, left his son Kubadh as a hostage to guarantee its payment and levied a general poll tax over his entire state to ransom him. The great drought and famine led him to remit taxes, but together with the beginning of persecution under Yazdajird II, may have encouraged械elizations among Jews in 468, four hundred years after the destruction of the Temple. About that time, the Jews of Isfahan are said to have flayed two hirbeds, and Fruz ordered half the Jews of Isfahan killed and their children to be turned over to the Sro ADuran fire temple as slaves. In 470 two rabbis and the son of the exilarch were imprisoned and executed, and in 474 or 477 Babylonian synagogues were closed, schools destroyed, Jews were made subject to Persian law and Jewish children were turned over to Magians to be raised. Byzantine refusal to pay for the defence of the Caucasian passes served as a pretext for predatory war against them. In 503 Kubādh took Armin and carried off the survivors as slaves. The Byzantines made war against them. In 503 Kubādh took Amid and carried off the survivors as slaves. The Byzantines made peace in 506 and paid an indemnity to Kubādh, who returned the conquered territory and the captives from Armin. The internal situation was stabilised with the Mazdakites in control for thirty years. After his restoration, Kubādh required the Arab ruler of al-Hira al-Mundhūr III (ca. 505-54) to become a Mazdakite. When the latter refused, Kubādh got the Arab ruler of the Kinda [q.v.], al-Hārīth b. ‘Amr, whose kingdom was at its height in the early 6th century, to impose Mazdakism on the Arabs in Nadjel and the Hitjāz [q.v.]. In 525 al-Hārīth defeated al-Mundhūr and occupied al-Hira until his death in 528.

Apart from the suppression of the wuzurgān, who never recovered their power in the state, the Mazdakite period was less of a break with than a continuation of 5th-century developments. The interests in conversion and spreading Magian observance in this period were renewed also by the emergence of herēbāts as Magian missionaries, according to Chaumont, who were encouraged to return to their villages to instruct people and establish schools, where they taught children to recite the Yaṣīṣh. Mazdak is said to have persuaded Kubādh to extinguish all but the three original sacred fires, which were associated with Avestan ideology, and the Mazdakites may have contributed to their elevation in the late Sasanid period. Kubādh’s reputation does not seem to have suffered, and he was credited with a reform of the Magian calendar. Kubādh gave his sons Kayānīd names and was called “Kay” on his coins along with increasing astral symbols.

Kubādh also began the reforms associated with the recovery of the Sasanid state in the 6th century. He instituted the use of an official seal for marzbdn to use on documents, many examples of which are attested from the late Sasanid period. He began the survey of agricultural land in lower ‘Irāk for tax purposes, and began the creation or reorganisation of administrative districts later called in Arabic kuswar, and subdistricts called tāṣīg, which became the basis of late Sasanid local government.

The same period saw a schism in the Christian Church in Sasanid territory with the introduction of a Nestorian majority and Monophysite minority, but actually involved the adoption of the diophistie christology of Theodore of Mopouzestia, favoured by Bar Sawmā, bishop of Nisibis, who convinced Fīrūz that, if the Sasanid Church adopted Theodore’s doctrine, there would be less reason to fear Christian collusion with the Byzantines. He was excommunicated in 485 by his own cathedral, Acraeus (484-96), who favoured the adoption of Chalcedon (451). The doctrine of Theodore was institutionalised at the school of Nisibis, founded under Bar Sawmā’s patronage in 496, and that year Mūsā, the Christian court astrologer of Ḏūmān, got royal permission (for the first time) for the election of his relative Babā in as catholico (497-515), who removed Bar Sawmā’s excommunication at a synod in 499. By the 6th century, Nestorians controlled the Church and spread Theodore’s doctrine while those opposed to them tended to become Monophysite. The Armenians reacted against the Council of Chalcedon in 491, adopted a christology close to that of the Monophysites and broke completely with the Byzantine Church by 609.

The late Sasanid state emerged in the 6th century, to assume royal power. They were assembled, a document was read declaring Khusraw to be Kubādh’s successor and they declared Khusraw king. This is the first attested example of such a procedure, which was the basis for theoretical generalisations in the Testament of Ardashir and the Letter of Tansar, both 6th-century works.

Khusraw I (531-79) purged his rivals among the royal family and the wuzurgān, suppressed the Mazdakites, and ruled fairly unopposed. There are recurring references to assemblies during his reign, where policies were approved. In 532 he made peace with the Byzantines by evacuating fortresses in Lazica, while the Byzantines resumed their subsidy to defend the Caucasian passes. Khusraw I fortified the pass at Darband and built a long wall to defend the Gurgān plain. He was famous for his justice and support of Mazdaean religion, was remembered as Anūshirwān [q.v.] (“orthographic lion”) and is the model for the Messengers of the World in Sasanid legend. His coins were the first to have stars between the horns of crescents, and from 535 had the slogan “may he prosper” (ahžīn). The capital at Ctesiphon-Weh-Ardashīr grew into a metropolis (al-Madā’in [q.v.]) of several cities, and it was most likely Khusraw I who built the great audience hall (Īwān or Tāk-i Kišā) there.

The distinction between nobles and commoners was restored, the property of Mazdakite leaders was confiscated and given to the poor, and property taken by force was returned to its former owners. Wuzurgān kept their status but lost their power to a bureaucratic élite of royal officials who collected taxes directly. A new class of military landlords (dahāqān, dīkhān [q.v.]) was created from the azaqān, who were given land by the treasury in return for military service and forwarding taxes, as a basis for the army and support for the monarchy.

The state was divided into four quarters, of the South, West, North and East, each under a military governor (ṣabīḥād), and divided into districts and subdistricts, with marzdāns in frontier districts. An elaborate central administration run by officials (kār-dārān) was divided into departments with parallel
hierarchies reaching down into the provinces along vertical lines of authority with overlapping checks at the local level and books on the duties of officials and mobeds. Confidential officers were used as internal spies and messengers, and there was a royal post for communication. The heads of departments were members of the royal court along with the grand chamberlain, grand counsellor, head steward, head of servants, royal warden, royal astrologer, head physician, chief of craftsmen and chief of cultivators; these titles were sometimes combined and may have been honorific. There were at least seven departments: the chancellery, the registry department to seal documents, the finance department to collect taxes, the department to administer the royal domain, the judiciary, the priesthood, including the office of judicature, the priesthood, including the office of wuzurgdn, which was a digest containing the opinions of jurists, and the office of the royal family, which was produced for the expanded system.

Khusraw I finished the cadastral survey in the Sawaïd and replaced the agricultural tax as a proportion of the harvest by a tax per unit of area under cultivation according to the type of crop, computed in cash, but paid in cash or kind. He also established a regular, annual poll tax of 4, 6, 8, or 12 dirhams, to be paid in three instalments, on the male population between the ages of 20 and 50. Members of the royal family, wuzurgdn, soldiers, priests and royal officials were all exempt and agreed to its imposition.

A highly developed legal literature was produced in the late Sasanid period covering legal procedures and social, economic and criminal activity. The Dādestān nāmag was a collection of judicial decisions; the Mādagān was a digest containing the opinions of jurists and royal rescripts from the 5th century until the twenty-sixth year of Khusraw II (616). Based on Magian ethical principles and religious requirements, the application of this legal system helped spread a Magian way of life.

The late Sasanid social ethic emphasised order, stability, legality and harmony among the theoretical four estates of priests, soldiers, officials and workers, so that each would perform its specific duty toward the others. These estates were supposed to be hereditary, but in practice were overlapped by a vertical social hierarchy of the royal family, wuzurgdn, provincial governors, small military landholders and local officials, freemen and slaves. There are scattered references to organisations of artisans and merchants.

The Sasanids monopolised the transit trade, exchanging goods with the Byzantines at markets along the western frontier at Nisibis and Dubios in Persia and Armenia. Procopius describes how numerous merchants from all over Persia and some under Byzantine rule came to Dubios and traded for goods from India and Iberia.

Khusraw I was famous for his love of literature and philosophy; works were translated from Greek, Syriac and Sanskrit into Middle Persian, a set of royal astronomical tables (Zīgīs-i Shāhī) was produced for him and there were philosophical discussions at his court. Paul the Persian, a Nestorian theologian and Aristotelian philosopher, in a Syriac introduction to logic addressed to Khusraw, argued that knowledge was better than belief based on the relativity of religious belief. These resulted in a variety of opinions.

War was resumed with the Byzantines from 540 to 561 over the control of Armenia and Lazica, encouraged by Ostrogothic ambassadors, for plunder, and to divert and employ the military aristocracy. In 540 Khusraw I invaded Syria, took Antioch, burned the city and deported the survivors, and seized or extorted huge amounts of gold and silver there and from other cities on his way. He was then sent against the Byzantines in Syria with public baths and a hippodrome and put under the charge of a chief of artisans (karubad) as a manufacturing centre. In 541 the Lazies offered Khusraw I the prospect of attacking the Byzantines by sea through their land, and he invaded Lazica with Huns as allies and established direct rule there. In 542 he invaded Syria up the west bank of the Euphrates as far as Commagene. Finding nothing left to plunder or extort, he deported farmers from Callinicus on his return. He defeated the Byzantines in Armenia in 543 and invaded Mesopotamia in 544; the Byzantines agreed to a five-year truce and paid 2,000 pounds of gold. The truce was broken in its fourth year when the Lazies allied with the Byzantines to expel the Sasanids. The fall of Petra to the Byzantines in 545 was reported as the worst important five-year truce, and negotiations for a peace treaty were begun in 556. Khusraw turned to the east, where the Western Turks invaded Central Asia and defeated the Hephthalites. In about 557-8 Khusraw took the Hephthalite territory south of the Oxus. A fifty-year peace was concluded with the Byzantines in 561, by which the Sasanids evacuated Lazica in return for an annual payment of gold, religious freedom was guaranteed for Christians under the Sasanids and Magians under the Byzantines, and Nisibis and Dara were confirmed as centres for the silk trade. Khusraw's gold coins of 564 contained universalist slogans: "he who makes the world without fear" and "may he cause the world to prosper". In 564 a member of the Suren family was made governor of Armenia, who built a fire temple at Dvin (Dvin [q. v.]) and killed a leader of the Manichaeans, provoking an Armenian revolt in 571. The Byzantines withheld their payment and indecisive warfare was renewed over Armenia and Mesopotamia from 572 to 582. There was a war with the Turks in 569-70, and between 575 and 577 a Sasanid naval expedition conquered al-Yaman [q. v.] from the Ethiopians. The Armenian revolt ended with a general amnesty in 578.

The conflict between the crown and the wuzurgdn resurfaced in the reign of Hurmizd IV (579-90), who had been on his way to India to follow in Khusraw's footsteps. Hurmizd I. Hurmizd IV is said to have favoured the common people against the wuzurgdn, possibly as a basis of support for the crown, killed some 13,000 Persian notables, executed the Jewish exilarch in 581 and closed the schools, and reduced the pay of the army. He also suppressed the priestly order of mobeds, for the rest of the Sasanid period and into early Islamic times, khoras. He also represented the imperial, not the princely, power, and in the 588-90 persecution of Jews and Christians. In 588 Hephthalite subjects of the Western Turks invaded the east, reaching Bādghīs [q. v.] and Harāt. Bahram Cübin [see BAHRAM], of the Mihrān family and spābed of the North, defeated the Western Turks at Harāt in 589, crossed the Oxus and defeated the Eastern Turks, and was then sent against the Byzantines in Albania, where he was defeated. Jealous of Bahram's popularity, Hurmizd IV deposed him on the pretext that he had held back the troops protecting Bahram IV rebel in the trans-Caucasus, according to Theophylact, or in the east, according to the Syriac Khuzistān chronicle. Towards the end of 589 Bahram marched against al-Madâzin, where the nobles rebelled early in 590, led by Bindoc and Bistām, brothers-in-law of Hurmizd.
who released the nobles from prison, deposed, blinded and killed Hurmizd IV, and enthroned his son Khusraw. Bahram defeated them in Adharbaydjan, promised to return conquered territory and promised peace. One army marched through Armenia, reinforced by 12,000 Armenians and awaited in Adharbaydjan by Bindoe with 8,000 Persians. The other went through Mesopotamia and defeated Bahram in Trak; Bahram headed for Adharbaydjan, was defeated by Bindoe near Lake Urmia, and fled across the Oxus to the Turks, where he was assassinated a year later. When Khusraw returned to al-Madâ’in, his generals and the Christians killed him. Many of the Jews of Mahoza for supporting Bahram.

Khusraw II (591-628) returned Dara and Mayyâfarikin [q.v.] to the Byzantines in 591, and ceded Armenia up to Lake Van and Tiflis. He remitted the half land tax, put one uncle, Bindoe, in charge of the administrative bureaux and treasuries, and the other, Bistâm, over the north-east. Bindoe was soon executed, and Bistâm rebelled in the north-east, striking his own coins at Ravy from about 592 to 596. In 598 an expedition annexed al-Yaman as a province. Khusraw II established his rule over the entire state by 601.

The reign of Khusraw II was the most extreme expression of late Sasanid political absolutism and imperial ambition. In a letter to Maurice, he called himself “king of kings, master of those who have power, lord of peoples, prince of peace, savour of men, good and eternal man among gods, most powerful god among men, most honored, victorious, ascended with the sun and companion of the stars.” He was represented as the cosmoconor. His image was observed in 624 on the inside of a dome on a building at Ganzak enthroned in the heavens with the sun, moon and stars around him. He is said to have had a celestial throne with a canopy of gold and lapis lazuli on which the stars, signs of the zodiac, planets and Harûn al-Rashid (?—656) were represented. He is also said to have been surrounded by over 360 astrologers and magicians, whose advice he sought constantly. He was called Aparwâz (Patwiz [q.v.] “the triumphant”), and the slogan “may he make Iran prosperous” occurred on some of his coins. The rock reliefs in the large grotto at Tak-i Bustân are probably his, as are the remains of a palace at Kasr-i Shirin [q.v.] near Dastgerd (Daskara) Christians. He amassed a huge royal treasure, accumulated from the time of Firuz, reorganised the state into 35 administrative districts and built 353 fire temples, where 12,000 hêrbêla recited rituals.

He eliminated all rival sources of power, probably in compensation for insecurity at the beginning of his reign. The Jewish exilarchate was suppressed; after 590 there was no exilarch for the rest of the Sasanid period. Jewish schools were closed and the rabbis became the de facto leaders of the community. In 596 he had his own candidate elevated as “Nestorian catholicos, but being deceived by a group of physicians, astrologers and Christian courtiers over the elevation of a successor in 604, after the latter died in 609, he refused to allow the election of a catholicos for the rest of his reign. In about 602 the Lakhmirids were suppressed and their last king, al-Nu’mân III b. al-Mundhir [q.v.], was executed. After a Sasanid army was defeated by the Banu Shayhân at Dhu Kâr [q.v.] between 606 and 611, al-Hira was put under a marzubân and the desert frontier restored.

In 602 Maurice was deposed and killed, giving Khusraw the opportunity to regain territory ceded to the Byzantines by posing as his avenger, starting the last and greatest Sasanid-Byzantine war. Between 604 and 610 Sasanid armies under Shahin, spâhel of the West, and Shahbarzâz conquered Armenia and Mesopotamia, and invaded Syria and Anatolia. Byzantine weakness during this phase of the war was due to their lack of local support and the occupation of their forces putting down local disturbances and revolts, that destroyed their own manpower in Syria. The second phase started with the accession of Heraclius in 610; Khusraw now intended to conquer the entire Byzantine empire. In 611 with Shahin’s army covering in Anatolia, Shahbarzâz invaded Syria, taking Antioch, and Damatbas (813). Then marching down the coast taking the towns to prevent Byzantine reinforcements by sea, he turned inland, conquered Galilee and the Jordan valley and besieged Jerusalem in May 614, joined by tens of thousands of messianic Jews. When Jerusalem fell, tens of thousands of Christians were killed, 300 monasteries and churches burned, 35,000 captives, mostly craftsmen, deported to Sasanid territory along with the Patriarch of Jerusalem and the relic of the True Cross, and a Bahram fire established there. The Jewish alliance broke down in 617, their administration of Jerusalem was ended and they were expelled from the city. The treatment of Christians in Palestine was moderated by the influence of Christians at the Sasanid court; some prisoners were freed, money was sent for relief, and the rebuilding of churches and monasteries was allowed. Chalcedonian bishops were expelled from Mesopotamia and Syria, and their churches turned over to Monophysites. From 616 to 620 Shahbarzâz conquered Egypt as far as Ethiopia in the south and Libya in the west, and installed a Coptic Patriarch in Alexandria. Meanwhile, an Armenian army under Sembat Bagratuni defeated Hephtalites north of Lake Helmand and looted as far as Balj [q.v.]. During this phase of the war, the Sasanids were inconsistent in responding to local support from Jews and Muslims as Monophysites, and may have played them off against each other; they also failed to develop a navy, and Khusraw II was unwilling to consider peace while he was winning.

Instead of trying to reconquer lost provinces, the Byzantines took the war to the Sasanids in its third phase. In 622 and 624 Heraclius invaded Armenia, faced by Khusraw II himself in Adharbaydjan. Burnig towns and villages, Heraclius drove Khusraw II out of Ganzak and Shâz. Khusraw II fled to al-Trak, while Heraclius wintered in Albania. In 625 Heraclius defeated three Sasanid armies in Adharbaydjan and Armenia. With the war going badly, Khusraw II turned against the Christians, executed Nestorians in upper Trak, deported Monophysites from Edessa to Sîstân, raised taxes and took treasures from churches to finance the war.

In its fourth phase, the war escalated in 626; the Sasanids allied with the Avars in eastern Europe, while the Byzantines allied with the Khazars [q.v.] north of the Caucasus. The joint Sasanid-Avar siege of Constantinople failed in 626, as did the Byzantine-Khazar siege of Tiflis. In 627 plague broke out in Palestine, and Heraclius invaded Armenia with Greek, Laz and Iberian troops, and with Khazar
cavalry. Descending to the Tigris valley, he defeated Sasanid forces at Nineveh, marched down the east bank of the Tigris, took and demolished the royal palace and magazine at Damascus, and took the royal treasures. Khusrav II fled to al-Madāʾin and set up a defensive line along the Nahrawān [q. v.]. Unable to find a ford due to disastrous flooding of the Tigris and Euphrates in the winter of 627-8, Heraclius returned to Ganzak, and waited for political developments in the capital. Khusrav II suspected and feared everyone, arrested all officers who had fled by the Byzantines and ordered them to be executed, imprisoned thousands of people and executed the workmen who failed to close the Tigris breaches. Furious at his behaviour and rejection of peace proposals, in February 628 a group of generals and high officials entered the capital, opened the prisons, proclaimed his son Kubād II king, arrested and imprisoned Khusrav II and insisted that Kubād execute him, because there could not be two kings at once.

Kubād II reigned for eight months (February to September 628), was called Kubād Firūz (“victorious”) on his coins and was popularly called Shīrūya/Shīroeq. Persians called him “the unjust,” and he was identified as the Antichrist in apocalyptic literature. He was remembered as a parricide and fratricide; he killed all of his adult brothers, leaving only sisters and children, creating the subsequent dynastic problems. During his reign, one-third to one-half of the population of Irāk perished from plague, probably brought back from Syria by Sasanid armies. He also began peace negotiations with the Byzantines based on mutual evacuation and the freeing of prisoners of war and deportees. He reduced taxes and allowed the election of a Nestorian catholicos.

Kubad II was succeeded by his seven-year-old son, Ardāshīr III (September 628 to April 630), with Mah-Adur-Gushnasp as regent. Shahrbaraz seems to have broken with Khusrav II by the end of 626, and had refused to recognise Kubad II or evacuate his provinces. In the summer of 629 he negotiated with Heraclius on his own, evacuated Egypt and Syria, returned to al-Madāʾin, purged his enemies and those responsible for the death of Khusrav II, and made himself regent. He returned the True Cross to Heraclius, but was defeated by the Khazars. On 27 April 630, he killed Ardāshīr III, made himself king and reigned for 42 days until he was killed by his own guard on June 9.

This was followed by an extreme dynastic crisis, with eleven rulers in two years. Burān (630-1), daughter of Khusrav II and wife of Kubād II, struck coins, built bridges, and completed the peace negotiations with the Byzantines before being deposed and killed in the fall of 631. In the latter part of 632, a grandson of Khusrav II, Yazdajurd III [q. v.] (632-51), was proclaimed king at Istābkār at the age of sixteen or twenty-one and brought to al-Madāʾin. Yazdajurd III was the last Sasanid monarch. The Sasanid position in the Arabian peninsula had already been lost; their system of military colonies and tribal alliances in al-Yaman, Umān, and al-Bahrān collapsed when defeated by the Byzantines followed by a four-year dynastic crisis (628-32) made them unable to support their garrisons and Arab proconsuls. The treaty of Ḥudaibiyah [q. v.] in 628 enabled the Muslims to take control of the local rulers. The Sasanids were expelled from Sīn and Badghīs, to defeat Yazdajurd’s followers. Yazdajurd III fled to Irāk, was killed in a miller nearby in 631. His son Firūz took refuge in T’ang China, while Magians and Hadjar acknowledged the Prophet Muhammad and converted to Islam, while Magians in al-Bahrān and coastal Umān were allowed to pay tribute. The ra’id of Khālid b. al-Walid [q. v.] in 633 destroyed most of the Sasanid system of fortresses along the desert frontier of Irāk, crippled their Arab allies there and provoked a major Sasanid effort to restore the border. But they were unable to follow up their victory over the Muslims at the Battle of the Bridge in 634 because of factional conflict at al-Madāʾin. The Muslim victory at al-Kādiṣiyya [q. v.] in 636 resulted in the loss of Irāk to the Sasanids; Yazdajurd fled to Ḫulwān [q. v.] and then to Rayy. The fall of Irāk affected the subsequent conflict because the Sasanids had lost the heart of their state: the administrative centre at al-Madāʾin, the tax base, that amounted to one-third of the total revenue, the royal treasure, substantial military forces and the leadership of many nobles. The Muslims now held these resources, assisted by former Sasanid soldiers and officials who defected to them. The caliph ‘Umar I [q. v.] had intended expansion to stop there, but attacks on lower Irāk by Sasanid forces in Khuzistān provoked the Muslim conquest of that province from 639 to 642. Yazdajurd III raised a major army and sent it to Nihawand [q. v.] in order to block any Muslim advance and possibly to retake Irāk. The defeat of this army by combined Kūfīan and Baṣraṇ forces in 642 was a second military disaster for the Sasanids; it secured Khuzistān and Irāk for the Muslims, ended organised resistance in the Dībāl [q. v.] and opened the Iranian plateau to the Muslims. Yazdajurd III fled to Ḫisāfah and then to Ḫisāfah, where he tried to organise the defence of Baṣra. But the Baṣraṇ army conquered Fārs in 649-50; Yazdajurd III fled to Kirmān and Sītān, pursued by Muslim forces, and arrived at Marw. Resenting Yazdajurd III’s financial demands, the marsūbān of Marw allied with Nizāk Tarḫān [q. v.], the Hephthalite ruler of Bāḏghīs, to defeat Yazdajurd’s followers. Yazdajurd III fled from Marw, and was killed by a miller nearby in 651. His son Firūz took refuge in T’ang China, but he and his son Narseh were unsuccessful in getting Chinese help to restore their dynasty. The fall of the Sasanids did not mean the Muslim conquest of Persia, which took several more decades [see IRAN. v. History]. The Sasanid Book of Kings (Xwaday nēmāq) achieved its final form in the reign of Yazdajurd III, and, because he had no successor, his regnal years continued from 632 as the era of Yazdajurd. Magians took that year as the end of the millennium of Zoroaster, and the beginning of the millennium of Oshēdar.

The significance of Sasanid history lies in providing an example of a late antique state and society that broadens the understanding of that period, in the development of monarchic and religious institutions, and the formation of religious communities, that created precedents for religious groups as political minorities. The Sasanids left a legacy of royal absolutism and bureaucratic administration, and Sasanid motifs continued in the art and architecture of the Islamic period and spread to the east and west. Branches of the dynasty survived long afterward as local rulers. The Bawandids (Bawand [q. v.]) of Tabaristān [q. v.] claimed descent from Kāwūs, the son of Kubad I, and ruled until 750/1349. The Dāwawīyids (Dabuwa [q. v.]) also claimed descent from Ibn Firūz, and ruled in Tabaristan and Gilan in the 11th century. The Bādūsbanids [q. v.] claimed descent from them, and branches of this dynasty lasted until 975/1567 and 984/1574.

Bibliography: The literature on subjects related to the Sasanids is huge; only an updated selection is given here. General treatments and introduc-

On seals and bullae, for Sasanid coins, see Gobi, Sassanian coins, Bombay 1924, repr. 1976; R. Gobé, Sasanian numismatics, Brunswick 1971; M. Mitterchen, The mint organization of the Sassanian Empire, in Numismatic Circular, lxviii (1986); R. Curiel and R. Gyselen, Momma les fossiles de Bishapur, in Str xvi (1987), 7-43. Other works on coins are given below by period.

On Kubâdh and Mazdak, in addition to the literature cited in the article mazdak, see O. Klimäk, Early 7th century Persia: From the Chosroean to the Khusruan dynasties, Prague 1977; H. Gauhe, Mazdak: historical reality or invention?, in Stlt, xi (1982), 111-122; Tafazzoli, Observations sur le soi-disant Mazdak-Nâmag, in Acta Iranica, xxiii (1984). For a thought-provoking reassessment, see P. Crone, Kavâd’s heresy and Mazdak’s revolt, in Iran, xxix (1991), 21-42.

936/1529 built by a saint Sayyid Djamal al-Din Husayn b. Sayyid Fāqir al-Dīn, an immigrant from the Caspian coast town of Āmul (see Shamsuddin Ahmad, Inscriptions of Bengal, v, Rajshahi 1960, 24-7, 28-9, 34-5). Satgaon was an important mint town since the beginning of the 8th/14th century. The earliest coin discovered so far is dated 729/1328, while the latest is 957/1550.

The first European contacts with Satgaon date from the 1530s when Portuguese ships started using its port. Unfortunately, due to the violence often practiced by the Portuguese in the area, the population of this grand city—once called Porto Piqueno or the little Heaven by the early Europeans—started dwindling. The final ruin of Satgaon seems to have been brought about by the silting of the river Sarawati, as the port almost lost its navigability towards the end of the 10th/16th century.

SATĪH b. RABI'A, a legendary diviner (kāhin) of pre-Islamic Arabia, whom tradition connects with the beginnings of Islam; in reality, we are dealing here with a quite mythical personage like the other demoniacal monster in appearance like a man cut in two (ghūl al-insān: cf. van Vloten, in WZKM, vii [1893], 157-8, and Sgūk). Satīh, whose name means "flattened on the ground and unable to rise on account of the weakness of his limbs" (Lisan al-’Arab, iii, 312), is described as a monster without bones or muscles; he had no head but a human face in the centre of his chest; he lay on the ground, on a bed of leaves and palm branches, and when he had to change his position "they rolled him up like a carpet"; only when he was irritated or inspired did he inflate himself and stand up. His close resemblance to Shīkh is accentuated by legend which makes them both be born without the intervention of a father in the night before the death of the kāhin Turayfa (the wife of ‘Amr Muzayyiyā, ancestor of the tribe of this name, who is said to have foretold the catastrophe of the breaking of the dam of Ma’ārib in the Yemen). She is said before dying to have made the two newborn monsters come to light; a few months later spitting in turn the classic method of transmitting magic power), declared them her successors in the art of kāhina.

In spite of these characteristically mythical features, Arab genealogical tradition has not refused to give Satīh a place in its system, but gives him a name and a paternity (Rabi‘ī b. Rabi‘a b. Māzīn b. Dhib) which connect him with the Ghassānid branch of the tribe of Azd (just as it connects Shīkh with the Banū Sa‘b, a branch of the Banū Murra and more precisely with the Banū Dhibi (Ibn Durayd, I:67, 286; Wüstefeld, Genealog., i11, 11; according to others, the Banū Dhibi belonged to the ‘Abd al-Kays, a tribe belonging to the Rabī‘a group); there (even) if he became to have been in historic times an Azd clan claiming descent from Satīh (Abū ‘Hātim al-Sidjestānī, Kitāb al-Mu‘ammarin, 3, in Goldziher, Abhandl. zur arab. Philologie, Leiden 1896-9, ii).

Among the legends associated with the name of Satīh some are connected with the pre-historic of Arabia and others with Satīh as an archer, interpreter and judge (kāhin) without any regard for history or chronology, being totally fictitious; sometimes we find him dividing among the sons of Nisār (Mudhar, Rabī‘a, Lyād and Anmār) their father’s estate (Ibl, ii, 46, 47; al-Dhahabī, ed., ii, 39); sometimes we find him consulted with Shīkh by al-Zarbī al-Azdāni (Wüstefeld, Gen. Tabellen, D, 13) regarding the real position of Qasī, the ancestor of the Żarbī tribe, to whom al-Zarbī had him forced to promise his daughter in marriage (Aghānī, i, 75). In al-Ya‘qūbī ( Та‘Rākīh), i, 288-90, it is he who decides the difference which arose between ‘Abd al-Muṭṭalib, the Prophet’s grandfather, and the two Kaysi tribes al-Kilāb and al-Ribāb, regarding the ownership of the well of Dhu ‘l-Harm discovered by the former in the vicinity of al-Ta‘if; but the parallel versions of the same story either do not mention the name of the arbitrator or give him that of another kāhin, Salama b. Abī Haya al-Kudrū (al-Maṣṣādī, Amīthāl, ed. 1284, i, 36 = ed. 1310, i, 30; Yākūt, iv, 11, 829; Lā‘î, xiii, 283).

Two other legends, on the other hand, have a completely Islamic stamp; according to the first, given by Ibn Ishāq, who does not give his sources, Satīh consulted— as always, with Shīkh— by the Lāhmidt chief Rabi‘a b. Nsār regarding a dream which had terrified him, reveals to him that South Arabia will be invaded by the Abyssinians and that after the expulsion of the latter and the brief dominion of the Persians it will be conquered by a Prophet (Muhammad); as a result of the oracle, Rabī‘a b. Nsār sends his son ‘Arr at the head of the tribe to the king of Persia who settles at al-Hira; this is the "South Arabian" version of the foundation of the Lāhmidt dynasty (cf. G. Rothstein, Die Dynastie der Lahmiden in al-Hira, Berlin 1899, 39). The second and most widely disseminated legend goes back to a certain Hānī al-Maqhdūmī, who is said to have lived to the age of 150 years and about whom Muslim historiographical tradition knows nothing (see Ibn Ḥaḍjar, Ḥaṣba, vii, 279, no. 8, 929). It forms part of the cycle of the al-lām al-nubahwa, that is, of the miraculous signs which confirm the truth of the prophetic mission of Muhammad. In the night when the latter was born, remarkable phenomena occurred throughout the kingdom of Persia. The king (Kisrā Anūṣhirvān), not being able to get an explanation from his magicians, asked the king of al-Hira, al-Nu‘mān b. al-Mundhir (an anachronism!), to send him someone who could explain it. Al-Nu‘mān sent ‘Abd al-Masīh b. Bukayla al-Ghassānī (on whom see al-Sidjestānī, Kitāb al-Mu‘ammarin, 38; Caetani, Annali dell’ Islam, xvi, 1905, 14. A.H., i, 1906, § 328), who, not being able to explain these marvels himself, went to Satīh, his maternal uncle, who lived in the desert. He found him at the point of death, and his appeal was unanswered; only after his nephew had addressed him in verse, did the kāhin predict to him the coming fall of the Persian Empire and its conquest by the Arabs, etc. Having delivered this oracle, his uncle Satīh died.

Satīh claimed to receive his knowledge of the future from a familiar spirit (nāgī, see kāhin), who had overheard the conversation of God with Moses on Mount Sinai and had revealed part of it to him. Here we see the influence of the Kur‘ānic passage (LXXII, 1) about the djinn who overhear God’s utterances.

The calculations of the Arab historians on the age reached by Satīh are naturally completely fanciful, those of them who place his birth at the time of the bursting of the dam at Mārīb and his death at Muhammad’s birth, give him a life of 600 years. It should be observed that Abū ‘Hātim al-Sidjestānī (see above), whose version is markedly different from the others (he does not speak of his monstrosity, puts his home in al-Bahrāyn, etc.), makes him die in the reign
of the Himyartic king Dhu Nuwas and therefore does not know of his prophecy to Kisra Anushirwan.

G. LEVI DELLA VIDA. [T. FAHID]

SATPANTHIS, adherents of a group in India that broke away from the main Nizari Ismaili da'wta in the Subcontinent in the 10th/16th century. Also called Momin or Imam Shahn, these followers of the Satpanth (the true way) gave their allegiance to Muhmmad Shahn, the son of Imam Shahn, a Nizari Ismaili da'is and son of one of the major pirs of the tradition, Hasan Kabir al-Din. They continue to preserve their own version of the ginans, literary expressions of devotion and religious teaching common to the da'wta tradition in India, and do not acknowledge the Imams of the Nizari line. Their main centres are at Pirana in Gujurat and Burhampur [q. v.] in Khandesh.

SATYA PIR, literally "the true saint", the name of a cult which flourished in Bengal and claimed both Hindu and Muslim adherents. Islam's entry into Bengal gave birth to some important socio-religious trends which expressed themselves in cults like the Vaishnavite, the Dharma and the Satya Pir ones. According to the Shkk Subhodhaya, many local sadhus, who were mostly Tantric Gurus, embraced Islam and adopted devotion to Pir, to whom they attributed supernatural powers. Cults like Satya Pir, Panpir, Manik Pir, Ghora Pir and Madari Pir centred round Pir and attracted both Hindus and Muslims to their fold.

Tradition ascribes the origin of the Satya Pir cult to a Brahmin youth of Mymensingh, Kanka by name, who accepted a Muslim saint as his spiritual preceptor. At the behest of his Pir he composed during the reign of the Bengal Sultan `Ala al-Din Husayn Shahn in ca. 907/1502 an epic poem Vidyasundara kahini to pronounce the spiritual glories of the Satya Pir. Originating in northern and eastern Bengal, the Satya Pir cult became popular all over the province. The first Bengali poet to compose verses on Satya Pir was Shawkh Fayd Allah, the Satya Pir kama was composed at some time between 952-83/1545-75. Since Fayd Allah was an expert in music and had written Ragmala, the first book on music in Bengali literature, the cult of Satya Pir spread through music and song also. Later on, considerable literature appeared on Satya Pir in Bengali. Viyapati, a Hindu poet of the 16th century, composed his poem Satya Pir anvait, which further popularised the cult in Bengal. In the later part of the 19th century, the cult lost its earlier popularity due to the opposition of Muslim reformist movements. The view that Sultan Husayn Shahn (989-1549) was the originator of the Satya Pir cult lacks contemporary evidence, though the possibility of the sultan encouraging the cult, from mixed motives of superstition and policy, cannot be ruled out.

The followers of the Satya Pir cult make special offerings on the day of the full moon. They place a wooden plank which they consider to be the seat of the Satya Pir, and put food and comestibles on it and distribute them as tokens of blessing. The Satya Pir Bhia (dwelling) stands on the site of the famous Buddhist monastery at Paharpur in Râjdshahi district. Its custodian still enjoys rent-free lands, though, barring a few areas in Bengal, the Satya Pir cult is non-existent now.

SAUJ-DI-BULOK [see SAWJ-DI-BULOUK]

SAUL [see TALUT]

SÄWA (older form Sawaij, cf. the nisba Sawaij, found at the site of Säwï), a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran, a town of northern Persia some 125 km/80 miles to the southwest of Tehran. It was formerly on the Kazwin-Kumm road used in mediaeval times but now replaced by the modern paved roads-system centred on Tehran, and on the main caravan and pilgrimage route from southwestern Persia and lower Tir to Rayy and Khurásan, but this too has been replaced by the modern highway from Khözistân to Arák and Kurn and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran, through the Kerman plain and then to Tehran. The town has thus lost important modern times and the agriculture of the surrounding district has been affected by decreasing water supplies and the encroachment of salt desert. Säwa itself is situated in the northwestern corner of a plain watered by the Kara Cay (the mediaeval Gâwmâh river) which rises in the mountains between Hamadhan and Säwa and waters out eastwards into the Great Desert.

1. History.

Säwa is not known before the Muslim period. W. Tomasek (Zur historische Topographie von Persien, in SB Ak Wien, cii [1883], 154-7) connects its name with the Avestan word sava, Pahlavi savâka, "advantage, utility" (?). The Persian dictionaries gives "pieces of gold" for sava. According to Tomasek, Säwa corresponds to the Sevavina or Sevavina of the Tabulae Peutingerianae.

The medieval geographers placed Säwa within the province of Dibâh, but they state that it was attached administratively both to Hamadhan and to Rayy at various times. It was often linked with the town of Aba or Awa [q. v.] to its south on the Gâwmâh river. The geographers describe Säwa as prosperous because of the transit traffic, its camels and camel-drivers...
being famous, and as having a Friday mosque, baths and fortifications. The people were strongly SunnI, hence often at odds with their neighbours in Awa who were fervent Shi'i (see Hudiid al-šalam, tr. Minorsky, 133, §31.22; Le Strange, Lands of the Eastern Caliphate, 211-13, 228-9; Schwarz, Iran im Mittelalter, 539-42). Ibn al-Azhir, ed. Beirut, viii, 512, mentions an attack of Kurds on the Pilgrimage caravan near Sawa in 344/955-6. In ca. 420/1029 the lord of Sawa is recorded as one Kārnūr al-Daylamī, who allied with the incoming bands of Ghuzz [q.e.] to besiege Rāy (ibid., ix, 320). It suffered badly from sacking by Čingiz Khiin and the Mongols in 617/1220, who burn down a library there of what Yākūt calls unparalleled richness and which also contained, according to al-Kazwini, scientific and astronomical instruments. By the next century, however, it had revived, and Hamd Allāh Mustawfī describes it as within a fertile agricultural district and as flourishing. Its walls were 8,200 ells in circumference, having been rebuilt by a local magnate, Kāmrān Zahtīr al-Dīn Alī b. Malik Shīr al-Dīn Sāwadjī. The people of Sawa were still Sunnīs of the Shi'i madhhabs, but the surrounding villages had become largely Shi'i; the whole district of Sawa produced revenue of 25,000 dinārs (Yākūt, Buldān, ed. Beirut, iii, 179-80; al-Kazwini, Athār al-bilād, ed. Wüstenfeld, 258; Mustawfī, Naẓa, 62-3, tr. Le Strange, 67-8).

Among the European travellers, Marco Polo mentions Sāwa ("Saba") as the town from which the three Magi kings set out for Bethlehem and where they are buried in a square sepulchre. This Persian-Christian legend must be based on a local popular interpretation of the Biblical incident, and with its minaret naming as builder a local vezier, vizier of several Il-Khanid rulers of the 13th century (see Mustawfī, Naẓa, 221). The barrage is said to have been restored under the Safawids; it is known as band-i Shāh 'Abbās. It occupies the passage between two hills and is about 65 feet high, 100 long and 45 thick. Beside it on the left bank, the road rises in a kind of spiral; caravans were thus able to ascend the dam, which was used as a bridge, and descend on the west side by a gradual slope on the right bank.

(ii) The fortress of Kiz-kaf'a on a rock in the centre of an amphitheatre of hills not far from the dam.

(iii) The mosques and minarets of the town itself. The Friday Mosque on the south side of the town, rebuilt in the Safawid period by Shāh Tahmāsp I, may well occupy the site, so Minorsky thought, of the Friday Mosque mentioned by al-Mukaddasī, 392 n. 1 ("distant from the market"); it incorporates an ancient structure, and Būyid period inscriptions (so far unpublished) have recently been uncovered there. Adjacent to it, but free standing, is a brick minaret, which may well occupy the site, so Minorsky thought, of the Friday Mosque mentioned by al-Mukaddasī, 392 n. 1 ("distant from the market"); it incorporates an ancient structure, and Būyid period inscriptions (so far unpublished) have recently been uncovered there. Adjacent to it, but free standing, is a brick minaret, which may well occupy the site, so Minorsky thought, of the Friday Mosque mentioned by al-Mukaddasī, 392 n. 1 ("distant from the market"); it incorporates an ancient structure, and Būyid period inscriptions (so far unpublished) have recently been uncovered there.
SAWA — SAWAKIN

87

3. The town's role in Muslim legend.

Sawa plays an important part in the legends of Muhammad. According to a frequently quoted tradition (for details see A. Sprenger, Das Leben und die Lehre des Mohammed, i, 134 ff., and Th. Noldeke, Das Leben und die Gesinnung des Mohammed, i, 134 ff.), it is the island where their children were born, and from which the Prophet was born. The site was still pointed out to al-Kazwini in the 7th/13th century. According to a later version of this tradition quoted by al-Firdawsî, the islander who shaved Saad's beard and thus corresponded to the movable capital of the caliphs is preserved the Sasanian name Sawa, which may be heard as s-wa’d, “market” (Bedawyet name is derived from u-suk, “market”).

The king sent them back to this harbour, a coral island (DjazArt Sawakin), 360-450 m/1,200-1,500 feet in diagonal, rises ca. 2 m/6½ feet above high water mark. Another two small and one larger island (DjazArt al-Shaykh ‘Abd Allâh al-Djabarti, marked on British maps variously as Condenser-, Hospital-, or Quarantine Island) are connected to the mainland today by silt and salt-pans and no longer recognised as islands. DjazArt Sawakin is the site of the old town, a typical Arab-Islamic Indian Ocean merchant settlement. Its houses, built mainly of coral, are up to four storeys high; most have tumbled down today. A causeway built in 1878 links the island to the mainland (al-Kayf; Bedawyet: u-Gef). There, the dwellings are mostly Bedja [q. v.] huts built of Reed, palm mats, driftwood, and more recently, scrap metal or sackcloth. Much of al-Kayf is surrounded by the remnants of a fortified wall erected 1887-8. Outside the wall a number of suburbs have grown, in particular around the water storage basin al-Fula and the salty wells at al-Shata. The mainland settlement has been more populous than the island town since at least the early 19th century; in 1814, the number of its inhabitants was estimated at 5,000, compared to 3,000 on the island. The population grew only slightly during the century and fell to ca. 3,500 during the Mahdist wars. After a brief recovery (1904: 10,500) it dwindled to around 4,000 during 1937-67, but rose again in the 1970s. The local census of 1979 gave a figure of 13,714 inhabitants (all on the mainland). Sudanese Bedja and refugees (often from Eritrea) each constituted about 40%.

Popular etymology has inspired several legends concerning the island. The best-known story tells of seven virgin slave girls sent from Ethiopia to a northern king. Upon arrival they were found to be pregnant and explained that during an overnight stay on the island of Sawakin they had been visited by seven djinn (‘ab’a djinn), and that “the djinn had done it” (sawâ’i djinn [sic]), for it was “the djinn’s dwelling” (sakan al-djinn). The king sent them back to the island where their children were born, and from them descended the inhabitants of Sawakin (‘ab’a Sawakin). The lexicon, 1852-1940: “Sawakin” is the name of a town on the island in his Kâmis s.v. ’aj-k. Roper argued that the name is derived from sâk “market” (Bedawyût u-rak, construct form i-sâkib, which may be heard as i-sowkim; Correspondence, in Sudan Notes and Records, xxii [1939], 293-4).

The port, one of the few sheltered anchorages with a fairly reliable supply of water on an otherwise inhospitable coast, has probably been used since Antiquity. Attempts to identify it with place names collected by Greek and Roman geographers from the heterogeneous information brought back by merchants have, however, remained inconclusive. Most likely candidates are Λυχνη Εὐγενείας "port of good tidings", Αἴτης "round shield", and Σάκχο Λυχνη (all from Pтолемей; the latter is found on Tabula XV, Codex Urbanus Gracac II, fols. 87 (86)-88 (87)), and Sacc/Sacca/Suche of Plinius. The name Sawakin is first mentioned in the 4th/10th century as a minor port in the country of the Bedja with trade connections to Djudda and Nubia (al-Hamdani, 41, 133; Ibn Hawkal, 55; Yâkût, iii, 182; Ibn Sulaym al-Uswâni, Akhâr al-Nuba, in al-Makrizî, K. al-Mawdât, ed. G. Wiet, Cairo 1922, iii, 257, 272). The export of grain and animal products from its hinterland to the Hidjaz was probably the earliest and most stable source of Sawakin's income, but its natural harbour also gave it a certain significance as an anchorage on the trade route between Egypt and the Yemen, even while 'Aydâbî [q.v.] was still the largest port on the Sudanese coast. This significance increased in the 6th/12th century after the decline of Bâdi', and Sawakin subsequently became involved in the struggles for control of the Red Sea trade between Dahlab [q.v.], Egypt, and the Meccan Sharifs. The Fatimids established a special fleet to protect the ships of the Kârîmî [q.v.] merchants threatened by pirates while travelling between 'Aydâbî and Sawakin. On occasion, Sawakin and Dahlab went to war over control of the islands lying between them. Sawakin's local rulers (Muslims since at least the 7th/13th century) collected customs from the ships calling at the port; they had, however, to acknowledge the suzerainty of the rulers of Egypt and to pay them tribute. In case of insubordination they faced punitive expeditions.

By the early 8th/14th century the Sharifs of Mecca [q.v.] gained control over Sawakin (Ibn Battûtâ, ii, 161-2, tr. Gibb, iii, 362-3), perhaps driven by a desire to secure a trade route that reduced their dependence on grain imports from Egypt. They were only able to establish a foothold on the African coast by cooperating with the Bedja, whose rulers (the Hadârîb) maintained direct control of the more important port of 'Aydâbî. Both sides had to acknowledge a measure of Egyptian sovereignty.

Following the decline of 'Aydâbî, Sawakin became the largest northeast African port north of Masawwâ [q.v.], serving as an entrepôt for the upper Nile basin and as the major point of embarkation for pilgrims from the Sudanic belt. Through the commercial networks of the Banyâ (Hindu and Jain merchants from India) Sawakin partook in the lucrative (but fluctuating) Indian Ocean trade. Towards the end of the 8th/14th century, the Hadârîb moved their capital to Sawakin. Egyptian pressure continued; Sawakin was sacked in 843/1439-40 and had to submit to the authority of the Mamlûks (who used it as a place of banishment) until the end of their rule.

The 10th/16th century saw two major changes in the geopolitical situation. The Ottomans became the leading military power in the Red Sea after their conquest of Egypt and the defeat of the Portuguese, and they succeeded the Mamlûks of Sawakin. Their first landing there occurred around 1520, and in 962-4/1555-7 Özdêmir Pâsha [q.v.] established the Eyalet of Habesh [q.v.], with Sawakin as its administrative headquarters. The residence of the beylerbeyi was transferred several times between Sawakin, Maşawwâ [q.v.], and Djudda until 1113/1701, when the province was finally united with the sandîq of Djudda and the port of 'Abd al-Hamam of Mecca, with Djudda as the seat of the administration of the kitâb makâm of the sandîq of Sawakin was appointed by way of annual tax-farming.

Secondly, the Funj sultanate of Sinnâr [q.v.], the new political centre on the Nile, tried to gain control over the port, which led to fighting with the Ottomans. Neither of these outside forces was able to maintain complete authority over Sawakin, however; they had to come to terms with the Bedja amir who resided on the Kafî (the families monopolising this office became known as 'Artegâ'). In theory, the amir shared the revenues of the port (customs and a poll-tax for pilgrims) with the Ottomans; in practice, he only paid if he felt they were strong enough to pose a threat.

The diversion of the trade route from India to Europe around Africa caused a depression of Sawakin's international trade in the 17th-18th centuries. But its function as a trans-shipment centre for African trade continued, and as the major point of embarkation for pilgrims it became subject to Egyptian domination (though not sovereignty) even before the conquest of the Sudan. In 1830 the Ottoman Sultan officially recognised this situation, but when Egypt had to evacuate most of her acquisitions in 1841, the Red Sea territories were nominally returned to the Ottomans. They were unable to exert effective control, however, leaving Sawakin and Maşawwâ practically independent. Late in 1846, the Ottomans leased both ports to Muhammad 'Ali for the duration of his lifetime against payment of an annual tribute of 5,000 purses (the amount suggests that Egypt had strategic rather than economic interests). In 1849, they reverted to the Ottomans, though an actual Ottoman presence was not re-established until 1851. Egypt continued her efforts to gain control of Sawakin, which many regarded as an easier outlet for the increasing Sudan trade than the Nile route. In both cases the Ottomans were unable to outdo the Indian and Arab competitors; the latter were increasingly left with smuggling and the slave trade (formally illegal since 1855). Nevertheless, the export of ghee and grain to the Hidjaz remained the largest and most stable part of Sawakin's trade.

Political stability and the economic opportunities attracted a large and cosmopolitan population, and the building boom of the 1870s effaced much of the earlier architecture. The over-ambitious modernisation projects devised by the Egyptian administrators largely failed, however, and the exaction of forced labour, heavy taxation, and increasing "foreign" control did
SAWÅKIN — SAWDA BT. ZAMÁ

not help the government's popularity. A significant part of the local population left the town during the Mahdiyya [q.v.], and from 1884-91 Sawakin, the only Sudanese town never conquered by the Mahdiists, was the chief base for British military operations in the eastern Sudan. This was shoreward of Sawakin, though it never stopped. The important route to Berber was reopened in 1891, and for a brief time Sawakin flourished again as an import centre for the new Condominium authorities.

Natural deficiences made it unfit for modern shipping, however, and after 1905 it was replaced by the newly-constructed Port Sudan which, apart from having more room for expansion, was better situated for the British greater control over maritime commerce by limiting the role of Sawakin's indigenous urban population and of the Egyptians. By 1910, the administrative and economic centre of gravity had shifted to the new port, and after most merchants transferred there (1923-5), Sawakin fell into disrepair. In the mid-1940s, over 80% of its houses had collapsed. The customs were finally closed in 1946, and Sawakin was left only as the pilgrimage traffic which was officially restricted to the old port during 1908-52 and lingered on until 1973.

The relocation of the Sudan's official dhow harbour to Sawakin in 1968-72 gave the town a new function as a centre of boatbuilding, dhow trading, and fishing. Its social composition was radically altered by the influx of drought and war refugees during the 1970s; the island town remains deserted, and Sawakin now consists of a collection of villages on the mainland. A new impetus has been given by the large container port opened in 1991 to relieve pressure on Port Sudan.

and humorous. 'Aisha used to say: “There is no woman in whose skin I would rather be ... town, a fine sanctuary, dedicated to the local god Athtar dhu Risaf (Athtar d-Risaf) has been almost wholly preserved by...
the sand which has covered it. It was partially excavated by the French Archaeological Mission in the Yemen Arab Republic in the winter of 1988-9 (Breton, 1992), and is notable for the quality of its architecture, inscriptions on the supports of the lintel of the entrance porch, as well as the monolithic pillars supporting the stone covering. The main figures of this décor are young women on a podium (which the people in the Djawf call "Daughters of Ad", referring to the mythical tribe of that name [see Attar]), ibexes in movement, ostriches, snakes interwined in pairs, bulls' heads and geometric motifs. The very ancient inscriptions carved on the pillars of the entrance porch (SW/BA/I/1-4) and carbon-5 analysis of the wood found in the mortar of the enclosing wall allow us to date the oldest parts of the temple to the 8th century B.C.

The Irrigated perimeter of the wall round the tell is now hardly discernible. The traces of a tamarisk thicker (aft) which struck the discoverer of the site, Hayyim Habshush (ed. and summary tr. Goitein, Arabic text, 1992, 31 ff.; for a complete list of these, see Avanzini, 1995).

Al-Sawdā' is the ancient Nṣ'nn, shown by four inscriptions at the site containing this name (al-Sawdā' 52 = CIH 440/4; al-Sawdā' 75 = RES 2902 = M 126/1; SW/BA/I/5 and 6); the vocalisation of the name was probably Nashāhān, if one relies on the above-mentioned toponym of Al-Arabī in Arabic, a poem of the 12th century A.D. (Madeung, 1992, 37). This last was the capital of a small independent kingdom, equally called Nashāhān, in the 8th century B.C. and at the beginning of the 7th century. The only person with the title of king is known: Sumhuyafa Yarsān, son of Luba'ān, king of Nashāhān (S'mdh'f Y'rn bn Lm mlk Nṣ'nn, in SW/BA/I/5 and 6; see also RES 3945/14-17 and al-Sawdā' 4, where the same person is mentioned without a title). The kingdom's territory included the town of Nashāhān, that of Nashāhān (Nṣ'nn), in the modern al-Bayda, and a district called Ayk (Ydp), with numerous settlements. At the beginning of the 7th century B.C., the kingdom of Saba', which already dominated the basin of the Adhanat (Ydp, modern Ḍhana) river and the northern sector of the Djawf, undertook to impose its protection over Nashāhān, probably fearing that the latter would unify the Djawf and become a threat to Sabaean supremacy in South Arabia. Led by a muqarrab (a sovereign superior to the kings, whose name means "unifier") Karib'il Watār, son of Dhamar al-Sawa', Saba' launched two successful campaigns against Nashāhān, which emerged from the struggle seriously weakened, losing territory to Saba' (Nashkh'm and Ayk'm) and suffering under severe conditions (destruction of the royal palace called Aflar (frat) and the enceinte of the capital, installation of a Sabaean garrison and the building of the temple of Almahak (Smkh), the great god of the Sabaean, in the centre of the town [see on this war: Robin, forthcoming]). Its independence was thus compromised, and it was soon annexed by the kingdom of Ma'ān (attested from ca. 700 B.C. to 120-100 B.C., with its capital Karnaw, Knw, in the lower Djawf), and then some decades before the disappearance of Ma'ān, by Saba' (sec al-Sawdā' 52 - CIH 440, the oldest Sabaean language text found at the site). This was the time when the Arabs, notably the tribe of Amir (mlm or 'mr), settled in large numbers in the Djawf (Robin, 1992, 59-60, 158); a Madhābi text from Nashāhān, whose ductus dates from around the 2nd century B.C. (al-Sawdā' 80 - RES 2917 = M 139), mentions precisely "the war of Amir" (dr 'mr) (l. 2).

At the time of his South Arabian expedition, the Roman Aelius Gallus, who reached Mārib [q. v.] in 25 B.C., seems to have taken Nashāhān, for amongst the towns of the Djawf which he legends took by storm, Pliny mentions Nestum (vars. Amnestum, Hanesum) (von Wissmann 1976, 317, 401). Around A.D. 80-90, Nashāhān was a Sabaean stronghold with a royal garrison when the kingdom of Hadramawt invaded the Djawf during the reign of Karib'il Bayān, king of Saba' and Dhū Raydān, son of Dhāmar Mārth (Ja 643/22). A 3rd-century inscription shows that one of the great Sabaean families, the Banā' (Uṭqilū'àn 'Āṣiīn, attested in the expression "the temple of Banā' at Nashāhān (Es 76/7)). Only one inscription from the site of al-Sawdā' goes back to this period, al-Sawdā' 51 = IH 604, a decree pronouncing upon it, appears, the inalienability of the crown's landed property, palm groves, vines and fields of various kinds. Nashāhān passed under Himyaritic control when Himyar [q. v.] annexed Saba' at the end of the 3rd century, and the last mentions of the place date from the 4th century. The site was abandoned between the end of the Himyaritic period (6th century) and the 10th century, for the Yemeni scholar al-Hamdānī [q. v.] mentions it as a ruin (al-khârbah al-Sawdâh bi l-ishâkiyya, ed. Müller, 1976/12, see also tr. Faris, 1938, 64, 66, Faris, 1940, 104, 106) belonging to the Nashkiyyān (ed. Šahrīb, 12).

Our knowledge of the religion of Nashāhān is confined to two lists of deities and the names of some temples. The official pantheon of independent Nashāhān, given in two texts (al-Sawdā' 3 and 5), includes in the protocolary order 'Aḥtar Šahrīkān, Wadd, Aranyada, 'Aḥtar Dhū Garāb and 'Aḥtar Nashk. The inscriptions further mention other gods, such as 'Aḥtar Matab Khamīr, 'Aḥtar Dhū Kabd and Rahṣ (al-Sawdā' 3 and 5). Four temples are known from the texts: Riṣāf, consecrated to 'Aḥtar (this temple, whose name is attested solely in the compound 'Aḥtar Dhū Riṣāf, may possibly be identifiable with the one excavated by the French Mission outside the town); Saywad, the temple of 'Aḥtar Matab Khamīr, to be located in the eastern part of the town, according to al-Sawdā' 3 which mentions it; Garb'tum, the temple of 'Aḥtar, attested in the expression "the temple of 'Aḥtar Dhū Garb'tum", whose building is commemorated by al-Sawdā' 5 = CIH 420 but whose exact localisation is unknown; and Nasab, the temple of Wadd, mentioned in al-Sawdā' 4/2, whose localisation is equally unknown. To these temples should be added that of Almakāh, built "in the centre of the town of Nashāhān", after the Sabaean victory (RES 3945/16). Finally, several dedications to 'Aḥtar Dhū Kabd from the Minaean period (al-Sawdā' 24-6) lead one to think that there was also a temple dedicated to this deity.

The first description of the site of al-Sawdā' is owed to the expedition of Joseph Halévy, a Jew from Adrianople, of Hungarian nationality, who became a naturalised French citizen after the expedition, and his Yemeni Jewish guide Hayyim Habshush, in the spring of 1870 (Halévy, 1872, 82-5, 200-14, who writes the name as "Es-Soud"; Habshush, ed. and tr.
The history of the Kurdish tribes of the district is only really known from Safavid times onwards. During the 19th/16th century, the Mukri chiefs pursued an opportunistic policy between the rival powers of the Ottomans and Safavids. Safavid and Ottoman forces fought several battles, the latter's at Dūnūm challenging and defeating in battle Shāh Ismā'īl in 912/1506-7 and then later sought investiture of his lands and military help from Sultan Selīm I. His successors variously sought the aid of Shāh Tahmāsp I and Sultan Süleymān the Magnificent. Towards the end of the century, Sārim's great-great-nephew Amīrā Beg (II) adhered to Sultan Murad III, who added to his hereditary lands in Mukri Kurdistan the vilayet of Shāhrbābār and the sangāak of Mawāli. But after the Ottoman conquest of Adhārbarbādjun during the Perso-Turkish War of 986-98/1578-90, the Ottomans were in a stronger position, and Amīrā Pāša (as he now was) made subordinate to the Ottoman governor in Tabriz, reduced to authority only over his hereditary lands and compelled to pay an annual tribute of 15 000 £ of gold. In the early 11th/17th century, the historian Iskandar Beg Munṣū (q. v.) was an eyewitness of Shāh 'Abbās I's expedition against the Mukris and Brādost Kurds (see his Ta'rīḫ-i Ālamārā, tr. R. M. Savory, Boulder, Colo. 1978, ii, 1009-19, years 1018-19/1609-10), and the episode of the siege of Dūnmūn (south of Urmiya on the Kāsimlu river) became a favourite theme of later Mukri heroic ballads.

In the early 19th century, the Turkish governor for the Kādžīs in Marāḡa, Ahmad Khān Mukaddam, took strong measures against the Mukris by massacring several of their chiefs. In the last decades of the century there was fierce sectarian fighting between the Sunnī Kurds of Sāwj-būlak and the Shi'is of the Marāḡa district. After 1905 the Sāwj-būlak district was gradually taken over by Ottoman forces under Meḥmed Fāḍil Pasha, until 1914 the old frontier between Turkey and Persia was restored through its delimitation by Russian and British representatives. The region was the scene of fierce Russo-Turkish fighting in the First World War, beginning with the assassination of the Russian Consul at Sāwj-būlak, Colonel A. Iyās, at nearby Mīyāndābād. After the War, under Rīḍā Shāh Pahlavī (q. v.), the name of Sāwj-būlak town was changed to Mahābād. For the subsequent history of the modern town, and especially its role as capital of the short-lived Kurdish Republic of the Azerbaijan, see chapter 14 of this article. Bibliography: Sir R. AL-SAWDÄ' — SĀWDJ-BULĀK

Goitēn, 45-6). Finally, the site was visited by the Egyptians Muhammad Tawfīk in 1944-5 (Tawfīk, 1951, pl. 1, marking the itinerary followed) and Abūm Fakhrī in 1947 (Fakhrī, 1951, i, 147), then by the Russian P. A. Griažnevič and the Italian Paolo Costa in December 1970 (Griažnevič, 1978, 220-1), and finally by the French Mission from September 1980 onwards (Robin, 1980, 192-3).

(CH. Robin)

SĀWDJ-BULĀK, a Persian corruption of soghuk bulāk "cold spring", Kurdish Sāb-lākh, the name of a district in southwestern Adhārbarbāyān, to the south of Lake Urmiya, and also the former name of its chief-loc, the modern Mahāhad [q. v.]. The district comprises essentially Mukri Kurdistan, inhabited by the sedentary Mukri and Debokhā tribes of Kurds, speaking the Kurmāndī form of the Kurdish language (classically described by O. Mann in his Die Mundart der Mukri-Kurden, in Abh. f. d. Kunde des Morgenlandes, 1880, 208-10; H. Schindler, Reisen im nordwestlichen Persien, in der Zeit von 1882 bis 1887, Berl. Berichte xvi (1883), 331-43; Mrs. Bishop (Isabella Bird), Journeys in Persia and Kurdistan, in the Geogr. Journal, London 1891, ii, 207-10; J. de Morgan, Miss. scient. en Perse, Etudes géogr., ii, Paris 1895, 1-44 (photographs, maps); W. B. Harris, From Batum to

Die Mundart der Mukri-Kurden. Kurdisch-persische Forschungen, 4th ser. vol. iii/1-2; Berlin 1906-9. Cf. Minorsky's bibliography on Kurdistan in EP, art. KURDS. E. Language, and confessionally being Sunni Muslims of the Shafi school, the modern Mahāhad [q. v.]. There were formerly a Neo-Arami-speaking Jews in the town of Mahāhad. For a detailed geographical and topographical description of the Sāwj-būlak district, see Minorsky's EP art. s. v., on which the present article is based.

SAWDJI, SAWDJI, the name of three Ottoman princes.

The name would appear to originate in the Old Turkish (especially, Eastern Turkish) word saw ‘‘word, piece of discourse, utterance’’, found as early as the Orkön inscriptions, then in the Turfan Uyghur texts, in the late 5th/11th century Kutadghu bulg [q.v.] and up to the 8th/14th century, after which it is not attested as a separate word (Chlauson, An etymological dict. of pre-thirteenth century Turkish, 782-3). Cf. also the name of the slave commander of the Saljuq sultán Alp Arslán Sawdji. Sawdji would accordingly be ‘‘purveyor/conveyor of a message > prophet’’. In the later 8th/14th century it appears in onomastic in Sawdji Ağha, head of a contingent of troops in Murăd I’s army against the Karamänds, and it is about this time that it is attested in the Ottoman royal house itself (see below).

(1) Sawdji Beg, in the old Ottoman chronicles also called Sawl Vart or Sawl Ball, etc. was one of the younger brothers of ʿOṯmân [q.v.], the founder of the Ottoman dynasty, and a son of Ertogrul. He supported his brother on his campaigns and fell (684/1285-6) in the battle at a place which the Byzantine writers call the field against the two princes. After an unsuccessful battle at a place which the Byzantine writers call ‘ʿAkbilgin’ (Chalc., 43,4), Sawdji fled to Didymotichon, where he was surrounded and forced to surrender to his father. He was blinded and then beheaded.

The execution took place in 787/1385-6 and the body was brought to Bursa and buried there. Murâd I had apparently made up his mind to get rid of Sawdji, as he had appointed his son Bâyezid to watch his movements. Nevertheless, in a letter to Bâyezîd in Ferîdûn, Münzûr-i sölâîn, i, 107 (of the beginning of Rabîʾ I 787/1385-6), with Bâyezîd’s answer, op. cit., esp. 108 above, according to which the Kâdi of Bursa must have passed a death sentence on Sawdji. The execution of Sawdji was the first of a long series of similar cases, in which princes dangerous to the Ottoman heir-apparent were put out of the way.

SAWḵ (A.) is a food preparation of some antiquity, and one widely known throughout the mediaeval Middle East. Al-Thaʿlabî attributes it first appearance to Alexander the Great, and in the physicians’ works of both eastern and western Islamic lands. It was recommended for travellers and was used to feed armies in the field. For all its fame, it rarely appears described in the extant culinary manuals, although some recipes are found in the earliest (4th/10th century) work by al-Warrâq (K. al-Ṭabikh, ed. K. Öhrnberg and S. Mrroueh, Helsinki 1987, 37-6). Preparation was chiefly from wheat and barley, the former preferred among the lower urban classes which could afford it. The wheat grain was first washed and then soaked in water overnight. Discarding the water, the wheat was next fried thoroughly until brown. When cooled, it was ground, sieved and then stored for use when it could be eaten by adding sugar. An alternative, more complicated method was to husk and dry the grain before frying. This basic preparation could then be used in other types; for example, in sawîk ramûmn three portions of wheat sawîk to one of pomegranate (ramûmn) seeds were mixed together, cooked, sieved and sugar added. Sawîk was also added to the dough in making the pastry, kaḵ. According to al-Râzi (K. fi Ḟaṣ ṭuḥbūt al-agḥidhyâ, Cairo 1888, 7), pomegranate and apple sawîk were intended only for medicinal purposes, while wheat and barley types were for nourishment. Plain sawîk was considered a nourishing substitute for fresh fruit when it was unavailable. Medicinal preparations made from barley are described by Isaac Isrâ’îlî (K. al-agḥidhyâ, facs. ed., Frankfurt 1986, ii, 72-8), and clearly physicians envisaged different ways in which it could be used to achieve different effects within a regimen of health.

SAWM (A.), a term of Islamic law, denoting the bargaining involving both vendor and purchaser that occurs before a sale. Sawm is a classical term which, although pre-contractual, influences the formation of the contract and has a legal effect upon it. Sale is prohibited if a higher bid is offered by a third party during the negotiation leading to the sale agreement. Al-Bûkhârî and Muslim record the prohibition of making a sale after what is known as a ‘‘successful battle’’ at a place which the Byzantine writers call ‘ʿAkbilgin’ (Chalc., 43,4). Sawdji fled to Didymotichon, where he was surrounded and forced to surrender to his father. He was blinded and then beheaded.
enter into the latter after the manifest approval of the vendor. The prospective purchaser can take the commodity for examination, even if he proposed a lower price than the vendor requested. If, during this period, the commodity is damaged, then the full price requested by the vendor becomes liable. It is interesting to compare bay6 and sawm with ḥāliba and nikāk [q.v.] since they represent parallel sequences. Ḥadīth often refers to the two types of contract together. This indicates the personal aspects of bay in Muslim society as well the formal dimension in marriage.

SAWM (a.), with Siyām, meaning from the root r-w-m; the two terms are used indiscriminately. The original meaning of the word in Arabic is "to be at rest" (Th. Nöldeke, Neues Beiträge zur sem. Sprachw., Strassburg 1910, 36, n. 3; see previously, S. Fränkel, De vocab. ... in Corano peregrinis, Strasbourg 1908, 20: "quiescere"). The meaning "fasting" may have been taken from Judaean-Aramaic and Syriac usage, when Muhammad became better acquainted with the institution of fasting in Medina; this is the sense of the word in the Medinan suras.

Origin of the rite. That fasting was an unknown practice in Mecca before Muhammad's time cannot be a priori assumed. Why should not the ḥanafī [see HANIF] also have used this religious custom? In the Meccan suras, as above mentioned, there is a reference to sawm in XIX, 27: a voice commands Mary to say "I have made a vow of sawm to the Merciful, wherefore I speak to no one this day". Observing silence as a Christian fasting practice (cf. Afrāhāt, ed. Pariso, in Patr. Syriaca, i, 97) may have been known to Muḥammad. In the year 2/623-4, according to unanimous reliable Muslim tradition (cf. A.J. Wensink, Mohammed en de Joden te Medina, Leiden 1908, 136-7, contra e.g. A. Sprenger, Das Leben und die Lehre des Mohammed, iii, 53-9), the revelation of the sūra II, 179-81, abolished the 'Āsha' a fast as an obligation by the institution of the fast of Ramāḍān. On the question why Muḥammad chose this particular month, various opinions have been expressed. The most plausible is that of A.J. Wensink, who has called attention to the particularly sacred character of the month of Ramāḍān even in pre-Islamic times (on account of the hayyat al-kadr in his Arabic Neue-Jahr und the Feast of Tabernacles, in Verh. Ak. W. Arst., N.S. [1925], xxvii, 1-3; see also M. Th. Houtsma, Oor de Israëlische Vastendagen, in Versl. en Med. Ak. Wetensch., Afd. Letterk., Series 4, ii [Amsterdam 1898], 3 ff.).

The first regulations concerning the manner of the Muslim fasting are given in sūra II, 179-81, which probably belong together (Nöldeke-Schwally, 178, contra Th.W. Juynbo, Handbuch des islamischen Gesetzes, Leiden-Leipzig 1910, 114, who considers v. 181 at a later revelation; al-Bayḍāwī also assumes that it was revealed in separate parts). The fast is also mentioned elsewhere in Kur′ān II, 192; IV, 94; V, 91, 96; Fasting in the month of Ramadan is the fourth pillar of Islam; whoever denies the obligation to fast is a kafir, except for the recent convert or one who has not been in contact with the 'ulumā'. Whoever omits to fast without good cause, without, however, denying the compulsion to fast, may be imprisoned. The general obligation to fast ('alā sabīl al-'umān) begins on 1 Ramāḍān, after 30 Shābān, or after 29 if the ḥākim (kādī) has pronounced the evidence of one or more witnesses. If, during this period, the commodity is damaged, then the full price requested by the vendor becomes liable. It is interesting to compare bay and sawm with ḥāliba and nikāk [q.v.] since they represent parallel sequences. Ḥadīth often refers to the two types of contract together. This indicates the personal aspects of bay in Muslim society as well the formal dimension in marriage.

The law permits relaxations in the following circumstances:
(a) Such as have reached a certain age (men 40; not men 20 in Tbatīyī and al-‘Umm, Beirut 1403/1983, iii, 92; Ibn Kudama, al-Mughni, ed. Hüvul wa Turkī, Cairo 1409/1988, iii, 305-8).

I. Obligatory (waqdīb) fasting. Fasting in the month of Ramāḍān is the fourth pillar of Islam; whoever denies the obligation to fast is a kafir, except for the recent convert or one who has not been in contact with the 'ulumā'. Whoever omits to fast without good cause, without, however, denying the compulsion to fast, may be imprisoned. The general obligation to fast ('alā sabīl al-'umān) begins on 1 Ramāḍān, after 30 Shābān, or after 29 if the ḥākim (kādī) has pronounced the evidence of one or more witnesses. If, during this period, the commodity is damaged, then the full price requested by the vendor becomes liable. It is interesting to compare bay and sawm with ḥāliba and nikāk [q.v.] since they represent parallel sequences. Ḥadīth often refers to the two types of contract together. This indicates the personal aspects of bay in Muslim society as well the formal dimension in marriage.

The first regulations concerning the manner of the Muslim fasting are given in sūra II, 179-81, which probably belong together (Nöldeke-Schwally, 178, contra Th.W. Juynbo, Handbuch des islamischen Gesetzes, Leiden-Leipzig 1910, 114, who considers v. 181 at a later revelation; al-Bayḍāwī also assumes that it was revealed in separate parts). The fast is also mentioned elsewhere in Kur′ān II, 192; IV, 94; V, 91, 96; Fasting in the month of Ramāḍān is the fourth pillar of Islam; whoever denies the obligation to fast is a kafir, except for the recent convert or one who has not been in contact with the 'ulumā'. Whoever omits to fast without good cause, without, however, denying the compulsion to fast, may be imprisoned. The general obligation to fast ('alā sabīl al-'umān) begins on 1 Ramāḍān, after 30 Shābān, or after 29 if the ḥākim (kādī) has pronounced the evidence of one or more witnesses. If, during this period, the commodity is damaged, then the full price requested by the vendor becomes liable. It is interesting to compare bay and sawm with ḥāliba and nikāk [q.v.] since they represent parallel sequences. Ḥadīth often refers to the two types of contract together. This indicates the personal aspects of bay in Muslim society as well the formal dimension in marriage.

The first regulations concerning the manner of the Muslim fasting are given in sūra II, 179-81, which probably belong together (Nöldeke-Schwally, 178, contra Th.W. Juynbo, Handbuch des islamischen Gesetzes, Leiden-Leipzig 1910, 114, who considers v. 181 at a later revelation; al-Bayḍāwī also assumes that it was revealed in separate parts). This indicates the personal aspects of bay in Muslim society as well the formal dimension in marriage.
exactly defined for women) and sick people for whom there is no hope of recovery, if they are unable to fast, may omit the fast without being bound to the kada\textsuperscript{3} which focuses on the investigation of how the Arabic is described on the basis of its phonetics, Him al-aswdt, which considers the investigation of how

When the justification for relaxing the rules appears, it is sunna to pass the rest of the day fasting. II. Voluntary or supererogatory fasting (saum al-tajawwus\textsuperscript{3}). This falls into the category of what is recommended (mandib li\text{ashri}). For a woman, it may only be done with the consent of her husband. It may be broken without any penalty. The niyyah, which can be formulated any time up till midday, need not be explicitly made, although certain of the fukad\textsuperscript{2} consider it desirable in certain cases.

It is recommended for anyone who has to fast (as a substitution) for three days during the hajdzi and seven days afterwards, to choose as the three days the 7, 8 and 9 Dhul-Hijjah. For the supererogatory fasting of six days in Shawwal, it is preferable to choose the six consecutive days immediately after the festival, i.e. 2-7 Shawwal (see Juynboll, Handbuch, 132).

The following days are further recommended for voluntary fasting: the day before 'azhar\textsuperscript{5} and the one after; the saum al-mi\text{v\textsuperscript{r}d\textsuperscript{2}} (27 Radjab); and the Monday and the Thursday (sunna mu\text{a}\text{a}\text{kada\textsuperscript{2}}, according to al-B\text{a}\text{d\textsuperscript{2}}ri\textsuperscript{2}), days when actions are offered to God, and others which are describable as "by way of routine".

Fasting is forbidden (kar\text{\textsuperscript{2}}m) on the days of the two great festivals, on the tahr\text{\textsuperscript{2}}m days and for a woman during menstruation; also in definite cases when danger threatens, as already mentioned above. IV. It is blameworthy (makruh) to fast on Friday because it distracts the attention from the Friday worship, and on Sunday or Saturday, at least if one has no particular reason for fasting, because the "holy days" and those are observed as holy days.

The other mudh\text{\textsuperscript{2}}h\text{\textsuperscript{2}} divergence from the Shafi\textsuperscript{2}i one on minor questions only which it would be tedious to enumerate (see "Abd al-Wahhab al-"Sha\text{\textsuperscript{2}}ri\textsuperscript{2}, K. al-Miz\text{\textsuperscript{2}}, Cairo 1279/1862-3, ii, 20-30).

The Shi\textsuperscript{2}i prescriptions diverge from the Sunni ones on some points of detail, of which the following are some examples (see A. Querry, Recueil de lois concernant les Musulmans Chyrtes, Paris 1871-2, 1, 182-209, ii, 75-7, 197-9, 203-5, following Nadjim al-Din al-Muhaddith, Shar\text{\textsuperscript{2}} al-isl\text{\textsuperscript{2}} fi mas\text{\textsuperscript{2}}h\text{\textsuperscript{2}} al-bad\text{\textsuperscript{2}} wa l-\text{haram}; the niyyah is not considered as a "pillar"; smoking is not considered as one of the muf\text{\textsuperscript{2}}rr\text{\textsuperscript{2}}; it is forbidden to blaspheme against the Shi\textsuperscript{2}i Imams; the man and woman guilty of sexual relations during the Ramad\text{\textsuperscript{2}}n fast are to be flogged for the first offence, with the death penalty for persistent offences. Regarding the relaxations, fasting is not required for a sick person unless authorised by the physician; dispensation is only given to pregnant women if they are in final phase of pregnancy; fasting is not generally required of travellers, but compensation must be made.

Voluntary and supererogatory fasting may begin before midday. Shi\textsuperscript{2}ism adds to the days recommended by the Sunnis the great dates of Shi\textsuperscript{2}i tradition (ghad\text{\textsuperscript{2}}t Khumm, m\text{\textsuperscript{u}\text{b\textsuperscript{2}}hala, anniversary of al-Husayn's death on 10 Mu\text{h\textsuperscript{2}}ra\text{at}; see Querry, op. cit., 37, notes).

Al-Ghazz\text{\textsuperscript{2}}i gives, at the beginning of his Kit\text{\textsuperscript{2}}b A\text{\textsuperscript{r}t}\text{\textsuperscript{2}} al-sa\text{\textsuperscript{2}}m in the Ihy\text{\textsuperscript{2}}\text{\textsuperscript{2}}, some considerations on the value of fasting. He points out, referring to some well-known traditions, the high esteem in which fasting stands with God. He gives as a reason for this that fasting is a passive act and no one sees men fast except God; secondly it is a means of defeating the enemy of God, because human passions, which are Satan's means of attaining his ends, are stimulated by eating and drinking. Fasting is therefore the "gateway to the service of God." After having enumerated, in the manner of a fikih, the regulations regarding fasting, he declares that these do not constitute what is essential. He distinguishes three steps in the fast. The first step is that of the fikih, the third that of the Prophets, the y\text{\textsuperscript{\textsuperscript{2}}d\text{\textsuperscript{2}}f\text{\textsuperscript{2}}k\text{\textsuperscript{2}} and those who have been brought into the proximity [of God] (al-mukarrab\text{\textsuperscript{2}}n), whose fast separates them from all worldly desires. But the second step suffices for the pious; it consists in keeping one's organs of sense and members free from sin and from all things that detract from God. Subjection of the passions is the real object of fasting, not mere abstinence.

The ethical conception of the fast which al-Ghazz\text{\textsuperscript{2}}i gives in this second fikih supplements, he says, the barren law of the fukad\text{\textsuperscript{2}}. In the Hadd\text{\textsuperscript{2}} they find already various traditions with ethical tendencies and al-Ghazz\text{\textsuperscript{2}}i does not fail to quote them in support of his view. A mass of traditions on fasting, grouped according to the various aspects of the topic, will be found in Wensinck's Handbook of early Muhammadan tradition, 71-6, s.v. Fast, Fasting. It is a very widespread opinion today that fasting, especially during Ramad\text{\textsuperscript{2}}n, forms the most appropriate expiration for offences committed during the year. This is why the law on fasting is still in general strongly observed, in varying degrees of strictness.

**Bibliography** (in addition to works cited in the article): A sketch of the legal prescriptions according to the Shi\textsuperscript{2}i law school was given by Th.W. Juynboll in his Handbuch des islamischen Gesetzes, Leiden-Leipzig 1910; see the bibl. to the 1925 ed. The main sources are the chs. on fasting in the collections of hadith, fikih and sh\text{\textsuperscript{2}}ab\text{\textsuperscript{2}}l, to which should be added Ghazz\text{\textsuperscript{2}}i, Ihy\text{\textsuperscript{2}}\text{\textsuperscript{2}}, ch. on saum. For the traditions, see Wensinck, op. cit., and idem, Concordances et indices de la Tradition musulmane, Leiden 1936 ff. See also K. Wagtendonk, Fasting in the Koran, Leiden 1968; K. Lech, Geschichte des islamischen Kultus, i. Das ramadan-Fasten, Wiesbaden 1979; and, above all, the bibls. to HAD\text{\textsuperscript{2}}TH, HAD\text{\textsuperscript{2}}DJ, MUT\text{\textsuperscript{2}}A,PUASA in Suppl., RAM\text{\textsuperscript{2}}DJAN and 'UMRA.

(C.C. Berg-[Ed.])
sounds are produced by speakers and perceived by listeners and on its phonology, ʿilm al-sawtiyya. The word sawtiyya is a relative adjective derived from the verbal noun, sawt (pl. aswād), meaning sound or speech sound. The phonological analysis renders a description of the processes that set sounds into organised and systematic patterns. These are governed by the phonological rules operating in the system that make the distinction between the sounds. The phonemic inventory of Arabic is established, not only on the basis of detailed phonetic information, but also on the patterning of the sounds. As a result of the impact of the Kurʾān on Arabic, the literary language has maintained continuity in its sound system and grammatical structure. The Arabs and Muslims have rendered a meticulous investigation of this system. Their original contributions, in theory and practice, result in precise phonetic descriptions and terminology. Pioneers in this field are such scholars as al-Khādīj and his disciple Sibawayh [q. vv]. However, most linguistic changes have occurred within the dialects. The description of sawtiyya here focuses on the modern al-fushā (literary Arabic) sound system.

2. Description of the sound system. There are 29 consonants and six vowel phonemes or distinctive sound units in Arabic. Consonants are produced with either partial or complete obstruction of the airstream in the vocal tract and are described by their manner and points of articulation. The vocal cords and their function also play a definite role in the classification of the phonemes into voiced or voiceless. Sounds produced with the vocal cords vibrating are called voiced while those produced without vibration are voiceless. The major subgroups of consonants are: (1) Stops: These sounds involve a closure of the airstream at some point in the oral cavity. The stops are: /b/ voiced bilabial; /t/ voiceless dental; /s/ emphatic voiceless postdental; /d/ voiced dental; /d/ emphatic voiceless postdental; /k/ voiceless velar; /q/ voiceless unaspirated uvular. (2) Fricatives: These sounds are produced with a partial closure of the oral cavity, where the airstream passes through a narrow passage, creating friction or a hissing sound. The fricatives are: /f/ voiced labiodental; /v/ voiceless interdental; /v/ voiced interdental; /θ/ emphatic voiced interdental; /z/ voiceless dental /s/ emphatic voiceless postdental; /z/ voiced dental; /l/ voiceless palatal; /r/ voiceless velar; /r/ voiced postvelar. (3) Affricates: There is only one affricate /θ/. This sound, phonetically, is composed of two phones—a stop [θ] immediately followed by a fricative “[z] like” sound. (4) Nasals: In the production of the nasals, /m/ and /n/, two cavities, oral and nasal, are involved and it is this unique combination that distinguishes nasals from other sounds. The /m/ is voiced bilabial nasal and the /n/, voiced dental nasal. (5) Trill: The sound /r/ is a trill voiced alveolar or post-dental. (6) Lateral: The sound /l/ is a lateral voiced dental. The /r/ and /l/, when occurring in the vicinity of the vowels /a/ or /aa/, may be characterised as emphatics. (7) Semivowels: /w/ is a bilabial semifricative and /y/ a palatal semifricative. They form two diphthongs: /ay/ and /aw/ as in bayt (house) and thawb (dress). (8) Pharyngeals: The sound ʿayn /i/ is described as a voiced fricative pharyngeal, however, it is also described as a voiceless stop as pronounced in ʿIrāk and the Arabian Peninsula. The sound /h/ is a voiceless pharyngeal. (9) Glottals: The sound /h/ is a voiceless oral fricative and the hamza /ʔ/, a glottal stop. (10) Lateral: The sound /l/, a voiceless lateral fricative is also identified as the retraction of the tongue as well as the contraction of the pharynx. This phonetic phenomenon was recognised by the earliest Arab grammarians and has always been a point of attraction and fascination for Western linguists and Arabists. Emphasis is not limited only to this particular group as there are other consonants, on a marginal basis, which demonstrate emphasis or pharyngealisation. Emphatics are found in modern Arabic dialects, to varying degrees, depending on geographical areas and social levels of speaking. The emphatic consonants condition neighbouring sounds, and often dominate the whole syllable. This conditioning is referred to as “spreading”, which can be either progressive or regressive and may even cover a syllable or more. The acoustic effect of the emphatics is to lower the frequency of neighbouring sounds. The dotted line of the shape of the tongue on the diagram below shows the portion of the tongue for the emphatic /h/ as in the syllable /iʔ/ that contrasts with the broken line that represents the non-emphatic /h/ as in /iʔ/.

The sound /h/ exhibits some changes in its pronunciation. It is predominantly pronounced as /h/ , an interdental emphatic fricative, in ʿIrāk and Arabia. However, in the sedentary Levant regions, it is pronounced as /ʔ/. Likewise, the sound /h/ is pronounced either as /h/ in ʿIrāk and Arabia, or as /ʔ/ in sedentary regions (see further on this, ʿʔād).

3. Emphatics. The feature of emphasis is traditionally called tāfkhim (“thickness”). There are four emphatic consonants: /t/ d, s, /`. These sounds, in addition to their primary points of articulation, are characterised by a secondary articulatory feature identified as the retraction of the tongue as well as the contraction of the pharynx. This phonetic phenomenon was recognised by the earliest Arab grammarians and has always been a point of attraction and fascination for Western linguists and Arabists. Emphasis is not limited only to this particular group as there are other consonants, on a marginal basis, which demonstrate emphasis or pharyngealisation. Emphatics are found in modern Arabic dialects, to varying degrees, depending on geographical areas and social levels of speaking. The emphatic consonants condition neighbouring sounds, and often dominate the whole syllable. This conditioning is referred to as “spreading”, which can be either progressive or regressive and may even cover a syllable or more. The acoustic effect of the emphatics is to lower the frequency of neighbouring sounds. The dotted line of the shape of the tongue on the diagram below shows the portion of the tongue for the emphatic /h/ as in the syllable /iʔ/ that contrasts with the broken line that represents the non-emphatic /h/ as in /iʔ/.

The sound /h/ exhibits some changes in its pronunciation. It is predominantly pronounced as /h/ , an interdental emphatic fricative, in ʿIrāk and Arabia. However, in the sedentary Levant regions, it is pronounced as /ʔ/. Likewise, the sound /h/ is pronounced either as /h/ in ʿIrāk and Arabia, or as /ʔ/ in sedentary regions (see further on this, ʿʔād).

However, in the sedentary Levant regions, it is pronounced as /ʔ/. Likewise, the sound /h/ is pronounced either as /h/ in ʿIrāk and Arabia, or as /ʔ/ in sedentary regions (see further on this, ʿʔād).

This diagram is a tracing of a frame from an Xray sound film of the author’s vocal tract. It is superimposed over a diagram of the vocal tract made by the phonetician Peter Ladeopedog.

4. Vowels. Vowels are produced with the airstream passing fairly freely through the oral cavity. There are two types of vowels, long and short. The short are: /a/ ʿaṣra, short high front unrounded vowel; /i/ ʿaṣra, short high front unrounded vowel; /a/ ʿaṣra, short high front unrounded vowel; /u/ ʿaṣra, low short central unrounded vowel. The long vowels are: /aː/ ʿaṣra + ʿaː, long high front unrounded vowel; /iː/ ʿaṣrap
ma + waw, long high back rounded and /aa/ fatha + alif, low long central unrounded. Length is phonemic and is always a vowel, short or long. There are six possible syllable types. By postulating a “C” to represent consonants and a “V” to represent vowels the syllable types are: CV, CVV, CVVC, CVVCC, and CVVCC. These are divided into short CV; long CVV, CVVC and heavy CVVCC and CVVCC. With respect to the frequency of occurrence the first four syllable types, CV, CVVC and CVVCC, are considered the dynamic force behind the formation of all the grammatical phonological patterns of non-pause utterances. The last two types, CVCC and especially CVVCC, have very limited distribution. They occur only in words, phrases and sentences in final pause forms, as does CVVC.

Consonant clusters occur medially and finally. All syllables and words start with a single consonant. In the Arabic writing system whenever a word starts with an alif, the alif, which is used as a kurti (‘char’ for the hamsa), has no phonetic value. Consonants that are produced in the front section of the oral cavity, form bilabial to palato-alveolar, form clusters with the remaining back consonants. Restrictions exist on the formation of consonant clusters, primarily among consonants that have the same manner or adjacent points of articulation. Gemination involves the clustering of identical consonants. Lengthening of the vowels does not create vowel clusters, as it is only a quantity difference that results in phonemic length for the long vowels.

6. Stress. Stress placement rules are determined by the loudness or prominence of a specific syllable relative to other syllables within the utterance. Loudness is not the sole feature responsible for stress; length and pitch also contribute. Syllable structure, types and their distribution play a definite role in the placement of stress. The word-stress rule patterns that operate in Arabic are as: (1) when a word consists of a string of CV types the first syllable is stressed as in dâra-sa, CV-CV-CV, “he studied”, (2) when a word contains only one long syllable that syllable (but not the final one) is stressed as in mu-dâ-râ-su-hu, CV-CV-CV-CV-CV, “his teacher”; (3) when a word contains two or more long syllables the long syllable nearest the end of the word is stressed as in mu-dâ-râ-sa-tu-hum, CV-CV-CV-CV-CV-CV-CV, “your teachers” (fem.); and (4) final heavy syllables are stressed as in ki-tâb, CV-CVVC, “book”.

These rules stress encounter some variation depending on the geographical region that an Arabic-speaking person comes from.

SA’I (‘ay), from the root s-q-y, used 30 times in the Kur’ân in such senses as “to work, apply oneself to, denounce, seek to earn one’s living, run after s. th.” etc., but in the sense concerning here denoting the pilgrim’s running between al-Sâfâ and al-Marwa. These are two hills to the south and north-west of the Ka’ba respectively, linked by a mas’â, course, which the pilgrim follows after having made the sevenfold circuit of the Ka’ba, at his or her arrival and his or her departure. This following of the course, the sa’î, is likewise sevenfold; it starts in al-Sâfâ, and goes to al-Marwa, ca. 300 m away. In the first part of the course is a smaller course of about 80 m, marked out by four green columns, which the men—but not the women—have to make whilst running, the remainder of the course being made at a normal walking pace. From al-Sâfâ four trips are made to al-Marwa, and from this last three trips back are made, the seventh trip ending at al-Marwa, the whole amounting to a little more than two km (see M. Hamidullah, Le pèlerinage à la Mekke, in Sources orientales, iii, Paris 1960, 109).

Sa’î is the term reserved for this travelling along the course, the other ones (the tawaf around the Ka’ba and those between ‘Arâfa-Muzdalîfah-Minâ) being termed fajîd or ifâlu (course made in an enthusiastic manner). It is obligatory at arrival and superogatory at departure for the pilgrims who perform both the Greater (hadîdî) and Lesser (‘umma) Pilgrimages (see HADJ DTJ). The first Muslims, and especially the Anânî, hesitated to make this sacred course, because of its pagan character. On the two hills were the idols Isâf and Nâ’s (p. e.), two sacred stones, on which the victims’ blood was poured. They must have had a vaguely human form which, under Syrian influences and because of their proximity to each other, were assimilated to a divine pair, as with a Ba’il and a Ba’îla. But an edifying legend developed around them, that they were a man and woman who had fornicated in the Ka’ba and had therefore been transformed into stone (see T. Fahd, Le pântêhon de l’Arabie Centrale à la veille de l’hégire, Paris 1968, 103-9).

The question of this obligation of the sa’î was put to the Prophet, and the reply was revealed that “al-Sâfâ and al-Marwa are part of the rituals (shârîy) of pilgrimage to the House of God. Whoever accomplishes it (hadîdî) or visits it (‘umma) will never commit a sin, if he makes the course between the two hills” (Kur’ân, II, 158). Some recent constructions have been made to facilitate the sa’î, involving two superimposed tracks, one for the outward journey and one for the return (see the monthly journal al-‘Arabi, Kuwait, no. 1971).

Gaudefroy-Demobyns, Le pèlerinage à la Mekke, Paris 1923. (T. FAHĐ)
Arabic authors often link them with the Zutt [q.v.] or Jhats [see DJAT] from northwestern India (see e.g. al-Tabari, i, 1661, 3125, 3134, 3181), although two distinct ethnic groups are in fact involved here.

De Goeye was the first to discuss the Sayabidja at length, in his Mémoire sur les migrations des Tsiganes à travers l’Asie, Leiden 1903, 18-19, 86-91, in the latter place giving a résumé of an earlier article of his devoted to them. He noted that, already in pre-Islamic times, there are mentioned Sayabidja settled on the Gulf coasts and Zutt in lower lIrâk (al-Baladharga, Futâh, 373), and that in Abû Bakr’s time there were 20,000 of Sayabidja and 12,000 of Khat (q.v.) along the coasts of al-Kâfif and Hadjar (al-Tabari, i, 1661). Both these peoples must have been planted there, or induced to settle there, as guards and frontier auxiliaries, by the Sâsânîd emperors. At the opening of Islam, both groups followed the example of the Asâwîrî or cavalrymen of the Sâsânîd army (see C.E. Bosworth, El, art. Asâwîrî), and became Muslims on various favourable conditions; the Zutt and Sayabidja attached themselves as maufî (see MAWLA) to the Arab tribe of Hanâza of Tanîmîn, and Abû Mâsî al-Asâ’îrî (q.v.) then settled them at Bâdra (cf. al-Baladharga, Futâh, 373-5; al-Tabari, i, 2562 f.).

Other Sayabidja elements seem to have found their way to Kûfah and possibly elsewhere, since the Kûfan forces which joined Ali at Dhu Kâr (in 656-67) included a detachment of Zutt and Sayabidja (al-Tabari, i, 3180-1).

Sayabidja troops fought in Kûhârûsân under ʿAbd Allâh b. ʿAmîr (q.v.) against the remnants of Persian resistance there and, in the time of al-Ḥadîjîd b. Yûsuf (q.v.), some of them were to be found in the ranks of Ibn al-Asâ’îrî’s (q.v.) rebel forces (al-Baladharga, 374). The caliph Muâwiya had further transplanted Zutt and Sayabidja in the naghîr (q.v.) of northern Syria and at Antioch (loc. cit.). Within the misr of Bâdra, a corps of 40 or 400 Sayabidja under one Abû Sâhîma al-Zuttî is mentioned as guarding the state treasury there in 36/656-7 (al-Baladharga, Futâh, 375-6; al-Masîdît, Murudî, iv, 307 = § 1629, and cf. Pellat’s Index généraux, vi, 403), and a verse in a poem of the Basran poet Ibn al-Mufârîrî (d. 69/656) (q.v.) mentions “the uncouthly-speaking Sayabidj barbarians who loaded me with fetters in the morning” (Ibn Kutayba, Shârī, 212). It would accordingly appear that the Sayabidja were a rough and tough element who were employed on police and custodial duties. The Sayabidja of Bâdra are mentioned at the time of Ibn al-Zubârî’s anti-caliphate, in 64/683-4 (al-Baladharga, Aṣâb al-aṣâ’îrî, ivb, 106). In 159/775-6, al-Mahdi’s caliphate, 4,000 of the Asâwîrî and Sayabidja, together with volunteer troops (mu‘tawwîrîn [q.v.] from Bâdra, were brought together for a naval expedition against the coasts of northwestern India; in the following year, 700-706-7, this expedition reached Goggarat and the town of the [river] Nîrîbâda”, probably Broach near the mouth of this river [see BHAROS] (al-Tabari, iii, 461). After this time, however, the Sayabidja fade from mention and were no doubt assimilated into the general mixture of population in the high Sâsânîd period.

The etymology of the term Sayabidja, and the ultimate origin of this group, were discussed in detail in de Goeye, loc. cit., and G. Ferrand in his El art. s.v., and the validity of their conclusions has not subsequently been challenged. Arabic lexicographical scholars have described this term as a mercenary recruited from Sind, and give as the term’s singular the form Saybidjî. De Goeye and Ferrand therefore connected this with Zâbâdji/Zabâdi, going back to a Sanskritised form Dvâvaka and a South Indian/Dravidian one Shâvaka, a term used to designate the Indonesian islands of Java and Sumatra [see ZABAD]. The early Islamic Sayabidja would thus have been Indian/Dravidian origin who were brought to western India and who then, in the late Sâsânîd period, found their way to the Persian Gulf shores in company with the Zutt. The famed seafaring expertise of the Malay-Indonesian peoples would have ensured their usefulness to the Middle Eastern powers in such matters as the policing of the Gulf and the protection of its trade against piracy, etc.

SAYD (A.), a masc. noun and noun of action from the root S-D-Y of which, as in Hebrew, evokes both the idea of the pursuit and capture of wild animals, by earth or sea which can be eaten as game, and also these animals themselves, i.e. all game, whether caught by hunting or fishing. In all its acceptations, the root k-n-s is its exact equivalent.

The ineluctable need for daily sustenance has led mankind, like all other living beings, from the time of appearance on earth, to practise both hunting and fishing together with the gathering of wild fruits and grain, and mankind has accordingly ceaselessly exercised its ingenuity in finding the best methods here for achieving the maximum return for effort. Thus there has been a constant striving towards perfection in methods of hunting and fishing.

For hunting game by land, the methods of capture (masâdî, mîsâdâ, mîsâdâ, pl. maṣâyîd) are numerous. A passive mode costing the least effort is the setting of nets (shabak) and snares with draw-nets (khibâla, uhbulâ, pl. babûsîlî); and there is also the covered-over pit-trap (kûfah, ughwûswî, mukhawswî, ughdîla, dafîna). Then comes the method of hunting with a bow (rây, rîmâyâ) or, otherwise, with a cross-bow or blow-pipe and, at present, with firearms. But out of the various procedures, in the Islamic world and during mediaeval times, one of the most favoured by princes and nobles was the chase (task, mûtârada, tirâd), on foot or on horse-back, with the aid of domesticated or tamed carnivorous animals (dârî, pl. dâbûsîr, sayâdî, pl. sayâdî), such as the gazelle-bound or sa’dîkî (q.v.), the cheetah [see FAHO] and the caracal lynx (‘anâk al-arîd). These precious hunting auxiliaries were launched against the gazelle [see GHÂZÂL], antelope [see MAHÂT], wild ass (hûmâr al-wa’ilûkh), ibex (uwa’îl) and ostrich [see NÂ’ÂM]. According to the region, they sometimes served for tracking down wild beasts with furs, such as the panther, leopard [see SAMIR] and even the fennec fox [see FANAR]. Parallel with hunting by the chase, hunting by the air, i.e. by raptors [see BAYZARA], was always a favoured pastime for all social classes in the Muslim lands, whether high-flying with falcons or low-flying with hawks for the capture of small, furry game, such as the hare [see ARNAK] and of that with feathers, such as the partridge (hadjâf), sand-grouse [see KÂT], bustard (kubâra), wild geese (tiawza), duck (buat) and teal (hadjaf). Certain falcons were also trained to tie down and blind antelopes and wild asses, thus facilitating their capture by the hunting hounds. The smallest-sized birds like blackbirds and thrushes were taken by means of snares and nooses (sharâk, pl. aqhrâk) placed in lines on a taut cord.

For fishing and fish, both in sweet waters and in the seas, see SAMAK.

According to Islamic law, the hunter and fisher
SYAD — SAYDA

(sayyad, kannas) were subject to rules regarding the ritual slaughter of captured game in order to preserve the lawfulness of their consumption; all these rules are set forth in the writings of al-Damiri in his Kitab al-dawāsir.

The population, which had reached a total of 5,000 inhabitants in the 18th century but was little more than 15,000 in 1946, the same number as in 1914, was to experience a veritable explosion in 1948, with the influx of Palestinian refugees. It quadrupled in 15 years, reaching a total of 117,000 in 1980, half of these being Palestinians. With this reinforcement the share of the Sunni Muslims in the population of the city exceeded 80%.

From 1970 onward, Saydā and its camps were to become a nucleus of Palestinian resistance to Israel. The civilian population paid a very high price, enduring aerial and naval bombardments, even before the Israeli invasion of June 1982, which had the object of destroying the camps and driving the Palestinians towards the north. In February 1983, Israel was obliged to withdraw, but its role was taken over by the Lebanese forces, the militia of the Christian Right, which pounded the camp of 'Ayn al-Halwa for a whole month. The Christians of Saydā were then forced to abandon the city.

Palestinian organisations administered the camps, and it was not until June 1991 that the Lebanese Army took over control of their access points. But while the Palestinians have lost their capacity for political and military intervention, the Sunni community of Saydā has found itself in a position of strength on the Lebanese chess-board, with the choice of one of its own, the multi-millionaire Rafik Hariri, as Prime Minister in 1993.

The current conurbation is composed of numerous very distinct areas:

The old town occupies the site of ancient Sidon, sheltered by a peninsula which encloses the port. Near the entry a small island, linked to land by a stone bridge, bears the castle of St. Louis. To the south of the town, on an artificial hill, stands the Citadel, Kal'at al-Mu'izz. Overcrowded and insalubrious, the old town has been in an advanced state of delapidation since the earthquake of 1956; it accommodates 25% of the population, the poorest, Lebanese or Palestinian, and immigrant workers from Syria and Egypt.

A new town, with modern concrete buildings, containing 46% of the population of Saydā, extends beyond the ramparts: the al-Dekamer quarter, where public services are concentrated and which is the centre of cultural life, and the al-Wastani residential quarter, to the north, interspersed with green spaces.

The Palestinian camp of 'Ayn al-Halwa, opened in 1949 by the Red Cross 3 km to the south of the city, accounts for 34% of the population of the conurbation; more than 40,000 people are crammed in there.

The city has expanded alongside arterial routes, particularly towards the east, and it has obliterated the orange groves which used to surround it. In fact, it has benefited from the fate which dogged Beirut between 1975 and 1990, establishing itself as regional centre of the south.

Saydā's influence extends over the entire region between the rivers of Damur and of Litānī. Its 362,000 inhabitants (in 1980), are divided, besides Saydā, between three small towns and 140 villages.

The coastal plain has been devoted since the 1950s to market gardening and citrus production, irrigated by the al-Kasmiyya canal, which serves 3,700 ha from its starting-point at the mouth of the Litānī, and by

Sayda — Al-Saydana
hundreds of individual wells and bore-holes. Since the 1980s plastic greenhouses have proliferated, as a result of the capital funds invested by citizens of Sayda, and by emigres.

The mountain suffers, however, from lack of water, especially to the south. Various irrigation projects have been examined, such as that of the Awali, in abeyance since 1987, or that of the Djoun tunnel, which uses a diversion of the Litani for hydro-electric production. A pilot project has already succeeded in irrigating 1,000 ha in the region of Leebah, above the small Palestinian camp of Miye wa-Miyé.

Cereals and olives are cultivated all over the plains and on the mountain. But this agricultural activity has not obviated the need for daily work journeys to Sayda or Beirut, nor has it prevented Sayda and Beirut and by emigres.

The construction sector is active, and light industry very diversified: plastics, nylon, cardboard boxes, lavatory paper, oils, soap and leather. The local economy. Its development has been aided since 1978 by the influx of Palestinian manpower expelled from Lebanon. One may assume—al-Biruni continues—that the Persians, when looking for sandalwood, came in contact with the Indians and called their merchant of sandalwood "merchant of sandalwood". Sandalwood is not a medicinal plant but one may assume—al-Biruni continues—that the Persians, when looking for sandalwood, came in contact with the Indians and called their merchant of sandalwood the Arabs would then have taken over this term, and Arabised it because they did not know a name for it. And since sandalwood was not counted among their perfumes, and since they were hardly able to distinguish between a perfume merchant and a sandalwood merchant, they identified the two terms, both terms indicate also the merchant of spices and aromas [see Adwiyah, in Suppl.].

The classical definition of pharmacology is found in al-Biruni's [q. v.] highly important Preface to his unfinished K. al-Saydana [fi t'hibb], written in his old age. He classifies al-Saydana as a sub-discipline in the field of medicine. According to him, it is the first of the stages of the medical art and for many it counts only as the latter's preliminary stage because it is a tool for practising medicine, not a part of it. As far as the word saydana is concerned, al-Biruni first refers to the well-known fact that the Arabic yd^ corresponds with Indo-Iranian ēm. He approvingly quotes Hamza al-Isfahâni [q. v.], who is said to have explained saydana as an Arabeisation of landanâni "merchant of sandalwood". Sandalwood is not a medicinal plant but one may assume—al-Biruni continues—that the Persians, when looking for sandalwood, came in contact with the Indians and called their merchant of sandalwood the Arabs would then have taken over this term, and Arabised it because they did not know a name for it. And since sandalwood was not counted among their perfumes, and since they were hardly able to distinguish between a perfume merchant and a sandalwood merchant, they identified the two terms, both terms indicate also the merchant of spices and aromas [see Adwiyah, in Suppl.].

This economic development depends on a young population, at a rapid rate of growth, and Sayda contained in 1980 some thirty educational establishments, public and private. As a result of the policy of partition which was powerfully advocated during the war, four centres of higher education have been opened in Sayda: a branch of the Lebanese University in 1977, of the University of Saint-Joseph in 1978, a Makassad Centre of Advanced Studies in 1979 and the University of Kfar Fâlû in 1980. There was a total of 3,400 students in 1981-2.

The city, although no more than 40 km/25 miles from Beirut, is thus well equipped to play the role of a regional centre. But the potential instability resulting from the presence of more than 100,000 Palestinian refugees continues to cast a dark shadow over the future.

Al-Saydana (al-Saydala) (A.) is pharmacology, in the meaning of pharmacognosy. The druggist is called al-saydanî or al-saydani. Al-Biruni defines him as follows: "He is someone who occupies himself with gathering medications according to their most commendable sorts and with selecting their best kinds; he is a knowledgeable researcher who has been prepared according to the most excellent compositions, which have definitely been determined for that purpose by medical authors". Elsewhere he says "al-saydana therefore is the knowledge of simple drugs according to their selected sorts, kinds and forms, as well as the knowledge of the mixture of medications composed in conformity with their written prescriptions or other things of what has been worthy and righteous researcher strives for. The highest rank, however, is held by the knowledge of the effects of the simple medications and their specific qualities" [see Adwiyah]. Besides, saydana indicates the druggist's actual store of drugs, and also (with or without a preceding kitáb) the handbook of drugs, the pharmacopeia. Al-saydana is practically synonymous with al-sâtâr [q. v.], almost everything said there is also valid for al-saydana. To the druggist, they identified the two terms, both terms indicate also the merchant of spices and aromas [see Adwiyah, in Suppl.].

As an oriental synonym of al-saydana, al-Biruni also mentions al-dârî, with which the Arabs in the old days indicated the perfume merchant, because the ships from India brought their goods to the port of Dârîn, lying in the area of al-Bahrâyn. Al-Biruni substantiates the meaning of the word with examples taken from ancient Arab poetry.

A general theory of pharmacology is given by al-Majûsî [see Aâlî b. al-Abbâs al-Majûsî] in his Kâmûl al-sinâ'a al-tibbiyya, Bûlây 1294/1877, ii, 84-100. The section is comprehensively analysed by Müller, Islamic medicine, Edinburgh 1978, 104-6.
Bibliography: The most important study on saydana is that by M. Meyerhof, Das Vorwort zur Drogenkunde des Bûnâî, in Quellen und Studien zur Geschichte der Naturwissenschaften und der Medicin, iii, Berlin 1932, fasc. 3, esp. Arabic text 3-8, tr. 25-37. Meyerhof took the Arabic text from the unique manuscript Bursa, Kursunluoğlu (composed 678/1278). A Turkish translation of the Preface was made by Şerefeddin Yaltkaya, Birinci Ede Reyhan Kitaibusuydu fütütte mukaddimâesi, in Istanbul Üniversitesi Tıp Tarihi Enstitüsü, x, Istanbul 1937. An edition of the complete Arabic text, with an English tr., has been given by Muhammad Saâîd, Birûnî, K. al-saydana fi 'l-tibb. Al-Înâmû's Book on Pharmacy and Ma'tûd Ma'tûüda, Karachi 1973. There exist a Russian tr. by U. I. Karimov, Abu Rayhân, Farmakognostiya i medicine (K. al-Saydana fi 'l-tibb), issledovaniye, perevod, primenânya i ukażeteli, and a Persian tr. by 'Abbâs Zârâ'î, Birûnî, Kitâb al-Saydana fi 'l-tibb, Tehran 1369/1949 (A. Dietrich).

AL-SAYDÂWI, Šams al-Dîn Muhammad al-Dimâşkî, outstanding musician and writer on music in Syria in the second half of the 9th/15th century. Born in Saydâ at an unknown date, he later lived in Damascus where he died on 16 Dhu 'l-Ka‘a‘ 911/10 April 1506.

Al-Saydawi composed an extensive didactic wûqûţa of nearly 250 verses on the musical modes (angâjam) of the Syrian tradition, entitled K. al-Inâmû (or A'tâmû) fi ma‘rîfî al-suyyâmî. In addition to the twelve main modes (four labelled Подробный и eight farû‘î) and the six so-called âdâzî modes he describes another seven secondary modes called buhâr (sing. bahr). To illustrate their melodic development, al-Saydawi uses stave systems of seven coloured lines representing the degrees of one octave. Within the stave he marks the principal notes, the direction of melodic motion and some other details of performance by using coloured symbols and abbreviations derived from musical terms such as ma‘rîfî and râżû‘ (initial and final note), qulî‘ and habûrî (ascending and descending motion), slow motion (bi ‘l-tartîb; “step by step”), quick motion (sur‘û‘îm), sustaining of notes (maddî), and places of “jumping” towards higher notes (matâfirâ, sing. mâfîrâ). The whole range of three octaves is represented by abglâd letters in the colours of the basic octave. As far as we know at present, al-Saydawi’s musical notation was not taken up by Persian (and later Turkish) music literature. It has, however, cognates in the stave systems of the Graeco-Latin Musicae mchirades (9th century) and in those given by Vincenzo Galilei (1581) and Athanasius Kircher (1630). The “little Arabic book on music” aroused considerable excitement when it reached Paris in 1634. It figures in Diderot’s Encyclopédie (Planches, vii, 3-4) and in d’Herbelot’s Dictionnaire historique et moderne, Paris 1780, i, 180-90; H.G. Farmer, Historical facts for the Arabian musical influence, London 1930, 323-6; A. Shiloah, The theory of music in Arabic writings, Munich 1979, 83-6 (corr. name and dating); A. Shiloah and A. Berthier, A propos d’un “petit livre arabe de musique”, in Revue de musicologie, lxvi (1985), 164-77. (E. Neubauer)

Known in numerous manuscript versions, of which the earliest dates from the 11th/12th century, the story was probably composed in Mamlûk Egypt between the 9th/10th and 10th/11th centuries; the identity of the hero’s traditional antagonist, Sayf (Sayf), a Turk and emporer of Ethiopia from 1344 to 1372, rules out an earlier date. As for the attribution of the story to Abu ‘l-Mâ‘älî (Muhammad b. ‘Abd al-Bâkî, d. 991/1583-4), mentioned in numerous versions, this should be treated with caution, even though this author may have played a role in the composition of the work. The narrative material seems very composite; contrary to what might be expected, the old Yemenite historico-legendary tradition is in fact not much in evidence. On the other hand, a number of themes are perceptible which belong to the Midrashic tradition centered especially on the figure of Moses (A. Chraibi, Dialectique de la surdetermination dans le Sirat Sayf ibn Dîlî Yâzân, in Arabica, forthcoming), also themes and motifs relating to international folklore, as well as foundation legends which seem typically Egyptian; also to be observed are convergences with shorter stories belonging to the genre of the Thousand and One Nights, in particular the Tale of Aqîb and Qarîb. It should be stressed that, until the present time, a meticulous narratological study of the novel in its entirety has yet to be undertaken; the same applies to a systematic comparison of the different manuscript versions, which might give a clearer impression of the process of composition of the story. The present article will be based essentially on the analysis of the printed version, which is characterised by the abundance of fantastic and remarkable themes, often with a parodic intention.

Unlike other major Arabic popular romances, such as the Sirât ‘Antara, the Sirât Dîlî al-Hîmna, the Sirât Baybats, even up to a point the chronicle of the Bûnî Hilîl, which are all located in a definite and recognisable historical framework in spite of numerous anachronisms, the Sirât Sayf is situated in a mythical universal universe, where men and jîmms associate together on familiar terms, where sorcerers, wizards and enchanters engage in dogged combat, competing for power or for the mastery of natural forces. This universe is steeped in impiety and the worship of false gods; only a few sages and a few anchorites observe and cherish the “Law of Abraham”, which will be the hero’s task to propagate among the jîmms of Mount Kaf. From the point of view of the novel, it is the romantic, the major parts, a “Yemenite cycle” and an “Egyptian cycle”, between which are interspersed various adventures following the classical pattern of the “quest”. The Yemenite cycle, after a prologue evoking the conquests of Dîlî Yâzân, the father of the protagonist, and the foundation by his vizier Yâqbîr of what is to become Medina, destined to be the refuge of the future Prophet, follows a familiar theme. Sayf, abandoned in the desert on the orders of his mother, the sorceress Qarîb, who intends to steal into her own hands, is rescued by the king Afaž. Falling in love with the latter’s daughter, the beautiful princess Shâmâ, he is obliged to undergo various tests, in the course of which he establishes himself as the greatest warrior of his time, discovers the secret of
his birth, converts to monotheism and regains the throne of his fathers, having obtained the hand of his beloved (this marriage being only the first of a long series, the "Law of Abraham" being considered to allow unlimited polygamy). As well as to the courage of the hero, his success is owed to the help which he received from a group of loyal companions, among whom there appear numerous female characters, in particular the djinniya 'Akisa, daughter of the White King and foster-sister of the protagonist, as well as the sage and magician 'Akila. Among the enemies of Sayf, besides Kamariyya, who is executed after committing innumerable treacheries, figure the powerful Abyssinian emperor Sayf Ar'ad and the two wizards Sakardls and Sakardiyun. The latter recognise in Sayf the hero whose destiny it is to implement the curse laid by Noah upon Ham and his descendents, dooming them to fall under the domination of the sons of Shem; however, the conflict seems to be primarily religious, with the Yemenite "Muslims according to the religion of Abraham" opposing the Abyssinian "worshippers of stars" and, more generally, pagans of all allegiances. The first of the two "quests", which link the second cycle takes up the familiar folkloric theme of the search for a supernatural spouse who has disappeared (J. E. Bencheikh, Cl. Bremond and A. Miquel, Mille et un contes de la nuit, Paris 1991, 193-233). The second is constituted by an amalgam of various adventures, linked by a somewhat tenuous theme: to fulfill a promise made to the djinn 'Ayyrid, who has fallen in love with 'Akisa, Sayf sets out in search of the wedding jewellery of the Queen of Sheba, preserved among Solomon’s treasure. A secondary "mini-cycle", possibly of Syrian origin and evoking the adventures of Dummar, elder son of Sayf, leads into the second section of the novel: returning from his quest, Sayf finds that his capital has been destroyed by Sayf Ar'ad during his absence. On the advice of 'Akila, he decides to lead his people into Egypt, which is still a desert and inhospitable land: the Nile, halted by a powerful spell, is blocked at the level of the Cataracts. Thanks to numerous supernatural helpers, Sayf succeeds in "liberating" the waters of the river. The remainder of the story recounts the foundation and the organisation of the new kingdom (numerous foundation legends), then the hero’s final revenge on Sayf Ar'ad as well as on Sakardls and Sakardiyun; in the printed version, this is pursued through various episodes which are clearly later additions.

Despite some tedious passages and occasional clumsiness of style, the romance, which is of great interest for the study of Arabic narrative traditions, is not without appeal on account of its unrestrained exploitation, not devoid of irony, of marvellous and fantastic themes, which form the basis of a genuine literary work.

J. P. Guillaume

SAYF b. ‘UMAR, a compiler of historical nar-

rations on early Islamic history. Virtually nothing is known about Sayf or his life, except that he lived in Kula and probably belonged to the Usayyid clan, part of the ‘Amr branch of the tribe of Tamim. Various sources, however, attach him—probably erroneously—to other tribal groups: accounts stating that he was a member of the bedouin tribe of Madinat Dimashk and belonged to the tribe of ‘Asadi, or that he was a member of the tribe of Dabba and Dubay’a, or to the Baradid, a group of five Tamim clans (not, however, including Usayyid). According to the 8th/14th-century scholar al-Dhahabi, Sayf died in the time of al-Rashid (r. 170-193/786-809), but this may be merely al-Dhahabi’s guess, deduced from Sayf’s position in various insâds. Sayf’s importance rests on the fact that his Kitâb al-futûh al-kabîr wa ‘l-ridda was chosen by the famous historian al-Tabari (d. 310/923) as his main source for the ridda and the early Islamic conquests. Sayf is also one of the few sources of information about the structure of the early Muslim armies, early Muslim government, and settlement in the garrison towns. The reliability of Sayf’s narrations has long been contested: the first modern scholar, ‘Askari, put fabricated accounts (maudulâ’ât) in the mouths of trustworthy narrators. Many modern scholars, after examination of both the content and the insâds of Sayf’s accounts, have expressed similar doubts. Already de Goeje and Wellhausen pointed out the implausible chronology of Sayf’s accounts when compared to those of Ibn Ishâq, al-Wâkiti, etc. The fanciful quality of many of Sayf’s narrations, which are frequently fitted out with gratifying but suspect detail, and the tribal chauvinism of many accounts, in which leaders of his tribe of Tamim engage with suspicious frequency in battlefield heroics, have also provoked critical comment. Sayf’s insâds have also been seen as problematic; his informants frequently cannot be traced in the available literature on traditionists. This has led at least one modern scholar, Murtaḍâ al-‘Askari, to condemn Sayf as a subversive who invented his accounts and the names of his informants with the intent of spreading confusion and doubt in the bosom of the Muslim community.

On the other hand, Landau-Tasseron has pointed out that Sayf’s accounts frequently do not contradict other accounts, but merely provide different information, and has argued that we cannot expect many of Sayf’s informants to appear in the traditionist literature since most were not specialists in hadîth. Furthermore, Sayf retains not only pro-Tamim traditions, but also accounts that highlight other tribes, suggesting that he may have collected various tribal traditions from Kûfa. Many of his accounts display syntactic and lexical peculiarities that may be reflections of archaic tribal dialects. Close inspection of Sayf’s accounts conveyed from Abû Uthmân Yazid b. ‘Asid al-Ghassâni, an informant identifiable in no other source, suggests that they are not fabricated wholesale by Sayf, but represent selections from two different written sources, one compiled by Abû Uthmân himself, the other by an intermediary informant who drew on Abû Uthmân, each work having a different topical focus.

Comparison of the accounts from Sayf found in al-Tabarî with those found in Ibn ‘Asakir’s Ta’ârâkh madnat Dimashk suggests that Sayf’s original compila-

tion on the ridda and conquests may have consisted of a long, sustained narrative with occasional insâds.
Sayf b. 'Umar — Sayf al-Dawla

(rather than the short pieces, each prefaced by an isndd, that are found in ... also M. Ca-

work of Sayf featured frequent poems, most of which selections). Comparison also reveals that the original ... persists about the reliability of his narrations of the ... morally divided the Companions of the Prophet. A definitive study of the historiographical complexities of all Sayf's traditions remains an important desideratum.

Sayf al-Dawla, Abu l-Hasan. Abu l-Haydja. Abu Allâb âhamd b. Hamdân b. al-Hârîth Sayf al-Dawla al-Tâlgîbi (17 Dhû l-Hijjah 303-24 Safar 356/22 June 914-9 February 967), amir of Aleppo and of northern Syria, also of Mayyâfârîkin and of western Djazira (Diyar Bakr and Diyâr Mu'dar), from 333/945 until his death. From his time until the present day, he has personified the Arab chivalrous ideal in its most tragic aspect. A peerless warrior, magnanimous vanquisher of rebellious Syrian tribes, he led with audacity, and for a long time with success, the dhâdât against the Byzantine enemy. A prince of great wealth, he spent large sums of money on the ransom of Muslim prisoners. An enlightened poet and philologist, he maintained a literary tradition of authorship which preserved the literary and moralising qualities of Sayf's interpretation of Islamic history, which smoothed over the conflicts that historically divided the Companions of the Prophet.

gin; and Ef, under the writers mentioned). The accounts concerning al-Sari, Bughya, 4202-10, 4403, describe in a number of instances the assemblage of poets waiting in the vestibule, al-dilh, to be received at the court of Sayf al-Dawla, in the hope of being awarded a few hundred dirhams. The influence of this court extended far afield. The poet Sari, having been obliged to leave Sayf al-Dawla on account of the jealousy of the al-Khadid brothers, lived miserably in Baghdad, hounded by their hatred; hence his jubilation, recounted by Ibn al-Adim, when he received much later from a wa'zir a gift of 3,000 dirhams. He felt able to show himself in the street, wearing fine clothing and a turban five cubits in length, followed by magnificent slaves, then he died of happiness. In all the Islamic capitals of the time, the parasitism of the courtier-intellectuals was justified by the propaganda which their works disseminated to the advantage of the local prince. The poets, in particular, competed fiercely for the attainment of glory and wealth, bearing witness to the glory and the wealth of the prince. At Aleppo, the major official poets such as al-Mutanabbi maintained in their turn a court of secondary poets around them (Bughya, 4514-15), which did not prevent the latter from abandoning Sayf al-Dawla for Kâfir in 346/957, the year of the great conspiracy.

On the other members of the family, see Hamdâni. The nisba al-Taghlibi links this family to an Arab tribe, living in Diyar Rabija and at Mawsil of Nasir al-Dawla. In Muharram 333/September 944, the Ikhshid presented himself in his turn at Rakka before the caliph al-Muttaki, to whom he offered his services; obtaining no definite response, he returned to Egypt.

Early military career of the young Hamdânid

While in Baghdad, the political authority of the 'Abbâsid caliph was subordinated to that of the amir al-umarat? Ibn Râ'ik, in Dîyâr Rabi'a and at Mawsil the governor was al-Hasan b. Abd Allah b. Hamdan, later renowned under the nisba of Nâṣir al-Dawla. In 324/939, the latter promised his brother, 'Alî b. Abd Allah, the future Sayf al-Dawla, aged 21 lunar years, the gift of Dîyâr Bakr in exchange for his aid in confronting the Daylamî b. Djâfar, governor of Mayyâfarîkân, who was in revolt. 'Alî b. Abd Allah succeeded in preventing 'Alî b. Djâfar from receiving the assistance of the feudal chiefs of Armenia and obtained from them that the persons who did not pay the tax of the local prince would be soldiers, one of whom exercised no supreme authority (Hâmad., 426, Hilâl al-Sâbi', Rûsusm dâr al-khâliifa, ed. Mkhadâlî 'Awadât, 127-8).

Sayf al-Dawla was then apparently appointed to the post of wa'iz al-barb wa 'l-salat at Wâsît, which led to his confrontation with Muhammad b. 'Alî al-Kufî, formerly the wa'iz in practice of Ibn Râ'ik and fiscal administrator of the same province, in regard to the duty to be levied on a barge. The attitude of the two protagonists reveals the depth of the corruption which was then rife in Īрак, involving financiers, private sector traders and the holders of civil or military power. In 331/943, Sayf al-Dawla encountered opposition on the part of Turkish officers and soldiers under his command over the issue of pay; this opposition was led by Tûznûn. Nâṣir al-Dawla was powerless to rescue him, being himself in difficulties in Baghdad, the Sâmânîd amîr of Transoxiana and the Ikhshîd of Egypt, who coveted Mawsîl (Hâmad., 445), having refused to help him. Sayf al-Dawla reached Baghdad and then joined his brother, who had taken refuge at Mawsîl after the nomination of Tûznûn as amîr al-umarat?.

The seizure of Syria

In 328/942-40, Ibn Râ'îk had detached northern Syria from the control which the Ikhshid of Egypt had exercised there since 324/955-6, but in 329/941 he left Damascus with the aim of regaining supreme power in Baghdad and in Radjab 330/April 942, he was assassinated at Mawsîl. Nâṣir al-Dawla wanted to return to northern Syria, which the Ikhshid was intent on re-occupying, to the direct control of the Īrâkî caliphate. His troops easily took possession of the valley of the Balkhân, from Harrân to Rakka, but certain of his officers sided with the Ikhshid, and the Hamânids who had remained loyal were confronted, in the region of Khâbûr, by the governor of Rahba, 'Adl al-Bakdjami, and by the Banû Numayr. With the sureruptious support of the Ikhshîd, and supplied with Turkish and Daylamî contingents, 'Adl marched on Nasîbin, where he took possession of the treasure of Sayf al-Dawla. 'Abû 'Abd Allah al-Husayn b. Sa'id b. Hamdân, the brother of the poet Abû Fîrâs, captured 'Adl, who was executed in Baghdad in Shabân 331/May 943. Nâṣir al-Dawla then entrusted this cousin, Abû 'Abd Allah b. Sa'id, with the task of taking control of northern Syria, of Dîyâr Mudar and of the frontier posts. Having been obliged to take Rakka by assault, Abû 'Abd Allah occupied Aleppo without difficulty in Radjab 332/943-4.

Sayf al-Dawla was then apparently appointed at this time to take control of Syria himself; it was an idea born of resentment when, having returned to Nasîbin, he found himself under-employed and badly paid. He campaigned against the Banû Numayr in the region of al-Dâliva but, betrayed by his Arab troops, he was defeated in the winter of 332/943-4 on a number of occasions by Tûznûn, and he joined the caliph al-Mutâqî at Rakka, hoping to have himself recognised in his turn as amir al-umarat?; but he encountered the caliph's hostility in this matter and had his royal, Muhammad b. Ênlâ al-Turja'dumân, assassinated (various accounts concerning this topic, Hâmad., 497). Having agreed to recognise Tûznûn's sovereignty over Īrâk, from Sinn to Basra, his brother Nâṣir al-Dawla had officially renounced his claim to the title amîr al-umarat? in exchange for recognition of his authority over Dîjazîra and northern Syria, from Mawsîl to the limits of Syrian territory.

During the summer of 332/944, the Ikhshid arrived at Aleppo, which was hastily abandoned by 'Abû Fîrâs. Mu'âharrâm 333/September 944, the Ikhshîd presented himself in his turn at Rakka before the caliph al-Mutâqî, to whom he offered his services; obtaining no definite response, he returned to Egypt.
Nāṣir al-Dawla was alleged then to have said to Sayf al-Dawla, with whom he was reconciled: “Syria lies before you, there is no one in this land who can prevent you taking it.” His cousin Husayn b. al-Sa'd having renounced his Syrian ambitions in his favour, Sayf al-Dawla decided to take control of Aleppo and Damascus.

Sayf al-Dawla made his entrance into Aleppo in Rabī‘ I 333/October 944, in the company of Abu l-Fath ʿUgāmān b. Sa`d b. ʿAbbāb al-Walīd al-Kilābī, a tribal chieftain whose brother Abu l-ʿAbbās Aḥmad was then governor of Damas and who had held the post on behalf of the Ikhshīd. Having regained the capital of northern Syria, the Hamdānī and the Kilābī toured the region from the crossing of the Euphrates riding in the same ammāriyya, with the aim of observing at first-hand the condition of the villages.

The Ikhshīd was not readily prepared to accept the loss of northern Syria and of the frontier towns facing the Byzantines. He opposed the cession of Damascus to the Ikhshīd, and the next year, in Dhu ‘l-Hijjah 335/July 947, he ravaged the region from the crossing of the Anti-Lebanon, he sent to the inhabitants of Damascus a letter which was read on the minbar of the Great Mosque (Th. Bianquis, Les derniers gouverneurs ikhshīdides à Damas, in BEO, xii (1970), 186). The Ikhshīd left Egypt at the head of an army in Ramadan 333/April 945. He proposed to accept Sayf al-Dawla’s authority over northern Syria, the djunds of Hims and of Kinnasrin, and over the frontier sites. Sayf refused, but was obliged to leave Damascus as a result of the hostility of the populace, and joined battle with the Ikhshīd in Shāwāl 333/May-June 945. Defeated by means of a strategic ruse, Sayf al-Dawla withdrew to Rakka. The Ikhshīd army ravaged the neighbourhood of Aleppo and maltreated the population. In Rabī‘ I 334/October 946, a treaty on the basis of the Ikhshīd’s former proposals was negotiated by the intermediary of the Husaynid ʿAbd al-Ḥasan al-Ḥasan b. Tābir b. Yahyā al-Nassābī (Hāmad, p. 584, details of the negotiations in Baghthā, 2408-12, and Ibn Sa‘d’s Andalusī, al-Mughribī fi ḫulā al-Mughrib, Cairo 1955, 194). A partition of Syria was agreed: to the south of the new frontier, the Hamdānīs were to function in an al-Azīmī (ibn al-Azīmī, Taʾrīḫ Ḥalab, ed. Za`rūr, 291, henceforward abbr. to al-Azīmī).

In Dhu ‘l-Hijjah 335/July 947, the Ikhshīd died in Damascus. Sayf al-Dawla immediately marched on this city where he tried in vain to confiscate the minor estates of the Ǧuštā (Ibn al-Azīmī, Zubda, ed. Sāmī Dāūd, Trans, 1951, b. al-Azīmī, 116-17, henceforward abbr. to Zubda). He left for Palestine, but defeated by Kāfur, the black eunuch leading the armies of Ḥunayr b. al-Ikhshīd, in Diyar Mādār I 335/ December 946, the Hamdānī withdrew to the region of Damascus, where he was unobtrusively reunited with his mother, then retreated towards Hims, following the eastern route by way of Ǧurā, a difficult route in winter. In the spring of 335/947, having rallied troops among the inhabitants of Uṣāfīn, Nurayn, Kalb and Kilāb, Sayf al-Dawla advanced on Damascus and was once more defeated by the Ikhshīd army which entered Aleppo in Dhu ‘l-Hijjah 335/July 947. In the autumn of 336/947, Sayf al-Dawla re-occupied Aleppo, this time definitively.

Pursuing the Ikhshīd’s policy of appeasement, Kāfur negotiated with Sayf al-Dawla. The previous treaty was ratified, but the Egyptians withdrew Damascus definitively and no longer paid tribute to the Hamdānīs (topographical details of the Hamdānī possessions in northern Syria, Zubda, i, 164-5, on the occasion of the signing of the armistice between Karghūya and the Byzantines in 359/968). This frontier between northern Syria, inclined towards ʿIrāq, the Dājrīya and Anatolia, and southern Syria, closely linked to Egypt and Arabia, was to function in an almost conditioned manner when the Mamlūk seizure of the province in 658/1260.

During the remainder of his life, Sayf al-Dawla had no further confrontations with the Ikhshīds. The Egyptian power, threatened at this time by the Fātimids installed in Ǧīrṣiyā, gave up its claims to northern Syria, according to the judicious principle whereby abandoning a peripheral province was less costly than maintaining an army on a war-footing and less dangerous for the authority of the amir. Master of a large territory, the traditional glacies of Egypt, comprising the Mediterranean coast from Ḥarb to Ǧarūbūl al-Šām, and the Red Sea as far as Yemen, the son of the Ikhshīd retained the greater part of his father’s former power and wealth, leaving to the Hamdānī the costly defence of the frontier facing resurgent Byzantium.

Sayf al-Dawla was henceforward the master of northern Syria, of the western and eastern frontier posts of the Diyār Muḍjar and Diyār Bakr. Mayṭāfīrīkīn, at the junction between these two western provinces of the Dājrīya, was his second capital. The embellishment of the city and the reinforcement of its defences were to be continued under the Kurdish Marwānīd dynasty [q.e.], which made it its capital, in the 5th/11th century. Sayf al-Dawla built at Mayṭāfīkīn municipal and defensive constructions, on a considerably larger scale than his earlier buildings in Aleppo (on the Palace of Ǧalba constructed by Sayf al-Dawla outside Aleppo and traversed by the Kuwayk, Baghthā, 349-50, 4489, Canard, Sayf al-Dawla, recueil de textes, henceforward abbr. to Recueil, 204-5, Hāmad, 642-4).

For Diyār Muḍjar and Diyār Bakr, Sayf al-Dawla remained theoretically the delegate of his brother, the prince of Dājrīya, resident at Ǧawṣū. For northern Syria and the frontier regions, a less clearly defined chain of vassality existed since the Ḥabbūsī caliphate, despite the sending of an envoy to Sayf al-Dawla in 335/946, seems from 332/943-4 onward to have recognised only one provincial authority, Nāṣir al-Dawla, receiving “in appannage” all the territories to the north and north-west of ʿIrāq as far as the Mediterranean and the Byzantine frontier. On the other hand, functioning in a Kurdish and Daylamī environment, the Hamdānī family had embraced the rule of the new masters, and Sayf al-Dawla always showed great respect towards his elder brother, although the latter’s real power was much inferior to his own (well known “unbooting” episode, Zubda, i, 128-9, Baghthā, 2433-7, Hāmad, 621-2). Furthermore, he appointed numerous Hamdānīs, including sons of
Nasir al-Dawla, to posts of authority in his states (H*amd., 395-7, supplies the list).

After 336/947 he visited Diqâira on several occasions. The first, in 338/950, travelled by way of Rakka to Mayyâfarîkîn, where in turn his mother, Nu'mûn and his son, Abu 'l-Haydâr', Abu'l-Allâh had recently died, and returned to Aleppo via Âmîd. This expedition, at the head of 7,000 troops, was an opportunity to display his wealth and the power of his army.

Since 332/943, the Kurd Dayûm had resided in Aleppo as a guest of Sayf al-Dawla. In 344/955 he left for Adharbaydjan, where he established the ghulûm in both of the Hamdanîd but, defeated by Mardûkâh and handed over to the latter by the Armenian prince of Vaspurakan, Derenîk/Îbn al-Dîrânî, he was put to death. Sayf al-Dawla lost his influence in Armenia until 354/965 when, following the revolt of his ghulûm Naḍâ, he inherited the Armenian places which the latter had appropriated from Abu 'l-Ward/Apeltart II b. Abu Sâlim, in the region of Lake Van. The fate of these places when Âbû Taghlib, the nephew of Sayf al-Dawla, took possession of Diyar Bakr, is unknown.

Suppression of the tribes

Sayf al-Dawla was obliged to assert his authority in northern Syria by confronting the Arab tribes, whose aggressiveness had been increased by a very positive demographic situation. At the time of his arrival, the region of Hîmûs had been controlled since the Umayyad period by the Yemeni tribes of Tâyi'î and Kalb, semi-urbanised. To the north, the Kaysî tribes, U'lâyûn, Nûmânî, Kîlîbî, Kâbî and Kühçârî, still nomadic, held the plain between the Orontes and the Euphrates and beyond the river, in Diyar Mudar, threatening longer-established Arab communities. Taghlib had been repulsed to the north and east of the Diqâira (attempt at devising a map of the tribes in Banûqis, Râbbah et le Diyar Mudar, ... in BEO, xi-xii [1989-90, publ. 1993], 23-53). The region of Ma'ârrat al-Nu'mân was the fief of the Yemeni Tanûkh, formerly converted to Christianity and entirely sedentarised. The coastal positions between Tarabuls and al-Ladhîkîyâ were inhabited by the Yemeni Bahra and by Kurdish groups.

In 336-7/947-8, after a difficult siege, Sayf al-Dawla took possession of the fortress of Barzûyâ, held by a Kurdish brigand who controlled the lower valley of the Orontes and the route joining Aleppo to al-Ladhîkîyâ. He campaigned throughout the littoral range and on the coast, as well as on the slopes of the valley of the Orontes where his primary objectives were to defend the interests of the Hârâb and to protect the Kalb, who were his allies against the Kîlîb. At the end of the winter of 337/948-9, a Karmaṭî agitator by the name of Ibn Hirrat al-Ramûd al-Khârdîfî, who had claimed the titles of al-Hâdî and of Sâhîb al-khâl al-Mu'ârâkât, incited the Kalb and the Tâyi'î of central Syria to revolt, and imprisoned Abu Wâ'il, the governoir of Hîmûs (H*amd., 603). Sayf al-Dawla crushed the rebels, killed the Karmâtî and freed Abu Wâ'il. The following year, another revolt associated with the Karmâtî took place in the region of Damascus; this time, the rebels were ʿUkâyîlîs, i.e. Kayûsîs.

The Kayûsî tribes regularly caused instability in northern Syria between 338/950 and 343/954, provoking limited campaigns of repression on the part of the Hamdanîd (H*amd., 602-18). The Bedouin refused to return to the arrangement whereby they were kept away from the cultivated zones, where they wanted to pasture their cattle and extort ransoms from the villagers. The revolt of winter and of spring 344/955 erupted to the south-east of Aleppo, in the region of the lake of Ḍâbbûl and of Kinnâsrîn. This was not a tribal movement but a protest against social conditions since it united Bedouin, Yemenis, Kalb and Tâyi'î, and Kayûsî, ʿAmîr b. Ṣâṣâ'î, Kâbî b. Râhî, ʿAḍînî b. ʿAbd Allâh, Kîlîbî, Nu'mânî and Kühçârî, by grouping them against the Fâtimids of the following century. The repression imposed by Sayf al-Dawla in the course of June of the same year is known to the smallest detail, as a result of the analysis by Canard of the poems of al-Mutanâbî and of Âbû Fîrâs, as well as of commentaries on their work. This was a desert policing operation perfectly planned and rigorously executed. It could have ended with the total extermination, through war and thirst, of all the tribes, women and children included, between Ṣalâmîyâ, Tadmûr and the Euphrates, if Sayf al-Dawla had not been influenced by his feelings of solidarity and his sense of Arab honour. Later, the heavy armies of the Fâtimids, composed of Berber horsemen and Turkish ghulûms, had neither the same ability to win battles with minimal loss of life nor the same sensitivity in avoiding unnecessary civilian casualties. Sayf al-Dawla never again had to face Bedouin revolts. The Numârî had been expelled to the north of the Euphrates, to the Diyar Mudar around Harrân, where they were to form a principality in the following century, the Kalb migrated towards Tadmûr and into the plain between Hîmûs and Dimâšq, the Tâyi'î took refuge in the Diqâlî and on the plateaux of Transjordania. The small Kayûsî tribes having been either eliminated or banished to the north of the Euphrates, the Banû Kîlîb were left as the only powerful formation of northern Syria. Wisely, they became reconciled to the Hamdanîd and sent armed contingents to serve under him. They pursued a policy of assistance to the official power and of peaceful penetration of the urban milieu which was to assure the success in the following century of the principality of the Banû Mîrdâs [p. 180-1]. Once security had been restored, Sayf al-Dawla entrusted to relatives or to close associates the delegation of local powers based on fortified sites (al-ʿAţmî, 192). The central administration at Aleppo and at Mayyâfarîkîn was limited, being confined to fiscal issues and the conduct of war.

The war against Byzantium

Sayf al-Dawla was motivated throughout his life by the desire to be a ghâzî, a knight of the djîhâd, who confronted the Byzantines in more than forty battles. Numerous texts, prose or poetry (Bûghya, 4682; Recueil, passim) reveal the extent to which the period was marked by a well-founded fear of a Byzantine offensive against the Muslim lands of Cilicia and of Diqâira and by a militar-religious brand of piety which induced professional soldiers and young civilians, from all over the Muslim East, to risk their lives on the frontier facing Byzantine troops. The significant role of Tarsus in the ideology of religious asceticism and of the military efficacy of the frontier djîhâd against the Byzantines, is developed in Bûghya, 180-1, which mentions Sayf al-Dawla (see also C.E. Bosworth, The city of Tarsus and the Arab-Byzantine frontiers in early and middle Abhâsid times, in Ōrens, xxxiii [1992], 268-86).

A detailed description of the frontier military operations of Sayf al-Dawla having no place here, mention of the most important dates will suffice. In fact, Canard has compiled a complete account of combats between Byzantines and Muslims from the time of the patient analysis of a very large corpus of Arabic, Greek, Syriac and Armenian texts, as well as on his vast erudition regarding historical geography (H*amd.,
715-862, including for the period of Sayf al-Dawla, 741-828). Few new texts have been published since then, although recent works dealing with the strategy, tactics, arms and military training of the Byzantines deserve mention (G. Dagron, Guerilla, places-fortes et villages ouverts à la frontière orientale de Byzance vers 950, in Castrum, iii [Madrid-Rome 1984]. In the Arab domain, no comparable recent study exists to this writer's knowledge.

Unlike the Byzantine basileis who, supported by the substantial resources of an extensive empire were equipped to pursue, after 314/926, a project of reconquest of the Near East, by their failure to organise a powerful army to pursue, after 314/926, a project of reconquest of the Near East, by their failure to organise a powerful army, the success of Turkish forces in the Near East was the result of the constant threat of Turkish attacks. The victories of the Turks were due to their military training, tactics, arms and military training of the Byzantines then, although recent works dealing with the strategy, tactics, arms and military training of the Byzantines deserves mention (G. Dagron, Guerilla, places-fortes et villages ouverts à la frontière orientale de Byzance vers 950, in Castrum, iii [Madrid-Rome 1984]. In the Arab domain, no comparable recent study exists to this writer's knowledge.

The triumphant years

In the thirty years which followed, Sayf al-Dawla was able to avenge the capture and destruction of Tarsus and to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8). The summer and autumn of 346/957 because he discovered a conspiracy of his senior officers in Aleppo to deliver him to the Byzantines in the course of a campaign; he ordered the execution of 180 ghulams and more than 200 others had hands, feet and tongues amputated and torn out (Zubda, i, 127-8).
was challenged even at Aleppo. From the autumn of 350/961 to the spring of 963, Nicephorus Phocas, returning victorious from Crete, led the offensive into Muslim territory. Sayf al-Dawla, who had the latter's absolute trust, then attempted to incite his administrative charge to rebel in favour of Nāṣir al-Dawla (Miskawayh and Ibn al-Aḍṭir, cited in Recueil, 247-52). At the approach of Najdā, whom Sayf al-Dawla had sent to oppose him, Hibat Allāh sought refuge with his father. On his own account, Najdā extorted compensation of a million dirhams from the inhabitants of Harrān and set out, in his turn, to attack Mayyāfārīkīn, with the intention of placing Diyar Ḑakr under the control of Muʾizz al-Dawla, the Büyūd amīr of Baghdād. The wife of Sayf al-Dawla defended the city successfully, Najdā took possession of towns in Armenia, around Lake Van, and in the autumn of 353/964 he was obliged to abandon a second siege of Mayyāfārīkīn, a revolt having broken out in his Armenian dominions. Having returned to Mayyāfārīkīn, Sayf al-Dawla set out for Armenia, where personally and without fighting he obtained the spectacular submission of his favourite lieutenant (moving scene in Zubda, i, 145); Najdā was killed at the end of winter 354/965 in Mayyāfārīkīn, no doubt at the orders of Sayf al-Dawla's wife whom he had publicly insulted. He was buried in the Handānid mausoleum.

Sayf al-Dawla had suffered a personal blow in 352/953 with the death of his sister, Khawla Sitt al-Nās, a woman of considerable political skill. She bequeathed to him 500,000 dinārs which he is said to have devoted to the ransom of prisoners (Sīra, 16, 188). In 354/965 his sons Abu l-Makārīm and Abu l-Barakāt died. He was affected then by depression but continued to protect his father. During the last phase of his life, he resided mainly in Mayyāfārīkīn, entrusting the defence of the western frontier to his senior ghulāms. Kinnāsrīn was abandoned by its inhabitants, and commerce, the principal source of revenue of this cross-roads region, was hampered. The civilian populations of the region of Aleppo accepted their fiscal burdens with increasing reluctance, while the armies of the amīr proved themselves incapable of protecting them from the Byzantine enemy. In 354/964, to prevent the acquisition of iron by the Karmātīs of al-Absā, who intended to re-arm themselves in preparation for eventual action in Syria and Egypt, he destroyed the ironworks at Manbij, and then on Aleppo and on Antioch before returning to Byzantine territory at the end of 355/966. Two months later, Sayf al-Dawla died in Aleppo.

Military reverses, domestic revolts and physical weakness

Since 346/957, Sayf al-Dawla had not had to contend with internal revolt. In 350/961, the rebellion of Muhammad b. al-Husayn Ibn al-Zayyāt, amīr of Tar- sus, in favour of the Khalīfahūd al-Abār, was quickly suppressed (Bagha, 1490, 3419-21). In 352/962, the brief occupation of Aleppo by the Byzantines cost him his military prestige, at a time when he had recently been stricken by hemiplegia. From this time onwards, handicapped by the after-effects of this attack, aggravated by increasingly serious intestinal and urinary disorders, Sayf al-Dawla remained bed-ridden. He was transported on a litter, but he retained his reason and continued to direct the policies of the principality and, when necessary, to conduct warfare. However, his political position was fragile. The leading ghulāms were impregnated with the notion dominant in the Muslim East, according to which political power was legitimised solely by success in battle. In 352/963, Hibat Allāh b. Nāṣir al-Dawla, governor of Harrān, whence he had been expelled by a populace resentful of his fiscal greed, killed at Aleppo Abu l-Husayn Ibn Danāh, a Christian secretary of Sayf al-Dawla who had the latter's absolute trust, in 354/965, died in Aleppo. From this time onwards, his political position was fragile. The leading ghulāms were impregnated with the notion dominant in the Muslim East, according to which political power was legitimised solely by success in battle.
SAYF AL-DAWLA

revolt, see Bughya, 3656-8, 4592-3; Descr., 240-1.) After partially occupying the lower town, Rashlk was killed in battle. He was replaced as leader of the rebellion by a Daylamí, Dizbar, who defeated Khuyl, and entered Aleppo but then abandoned the town with the intention of taking control of all northern Syria. Sayf al-Dawla was then carrying out an exchange of prisoners with the Byzantines at Sumaysat, and he joined the ranks of the Daylamí rebel. At the beginning of the summer of 355/966, Sayf al-Dawla had himself carried in a litter to Aleppo, where he spent the night and then set out to crush the troops of Dizbar, in which he was helped by the defection to his side of the Banú Kulláb. Reprisals were severe, although the new governor appointed to Antioch by Sayf al-Dawla, Tašl al-Din Muḥammad b. Mūsā, joined the ranks of the Byzantines with the public funds of the city. The attack by Nicephorus Phocas on northern Syria forced Sayf al-Dawla to take refuge at Ṣuyuz, until Safar 356/February 967, the date of his death (Dizbar, 112, 113, 131, 152). The shāfī Abū ʿAbd Allāh al-ʿAḵsāṣī prayed over his body, pronouncing tahlīb in the Shīʿī fashion (Bughya, 4517).

The Shīʿī sympathies of Sayf al-Dawla are demonstrated by the al-Dakkā maḏḥab which he had built on the Djabal Djuṣhan alongside the Christian monastery of Mara Marūthā (Bughya, 412, 2726). After the murderous invasion of Aleppo by the Byzantines in 349/960, and his son Abu ʿAl-Ḥusayn ʿAbd Allāh (or b. Abd al-Malik) al-Dakka, had spent the night and then set out to crush the troops of Dizbar, in which he was helped by the defection to his side of the Banū Kullāb. Reprisals were severe, although the new governor appointed to Antioch by Sayf al-Dawla, Tašl al-Din Muḥammad b. Mūsā, joined the ranks of the Byzantines with the public funds of the city. The attack by Nicephorus Phocas on northern Syria forced Sayf al-Dawla to take refuge at Ṣuyuz, until Safar 356/February 967, the date of his death (Dizbar, 112, 113, 131, 152). The shāfī Abū ʿAbd Allāh al-ʿAḵsāṣī prayed over his body, pronouncing tahlīb in the Shīʿī fashion (Bughya, 4517).

Al-ʿAḵsāṣī, who had been used in manuscript form by M. Canard; these principal texts which have appeared since 1951 had been supplemented by the bibliography at the end of 171 Le siècle, in REMMM [1992], no. 62, 49-59. Furthermore, this prince as well as his brother, Nāṣr al-Dawla and later, his nephew al-Qaḍaṭan, princes of Mawsil, had a policy of monopolising fertile agricultural lands and appropriating extensive domains, with the aim of devoting them to monoculture, in particular the growing of cereals, a decidedly profitable enterprise in view of the demographic growth of the 5th/11th century, in which the new governor appointed to Antioch by Sayf al-Dawla, Tašl al-Din Muḥammad b. Mūsā, joined the ranks of the Byzantines with the public funds of the city. The attack by Nicephorus Phocas on northern Syria forced Sayf al-Dawla to take refuge at Ṣuyuz, until Safar 356/February 967, the date of his death (Dizbar, 112, 113, 131, 152). Hasan 'Ali b. al-Husayn al-Daylamî, see Bughyâ,
2531. The sources used by Ibn al-'Adim for the 4th/10th century have not been listed to this writer's knowledge, see Eldad, Sources arabes des XIR et XIIIR siècles pour l'étude de la jurisprudence de Ibn al-'Adim, in Itinéraires d'Orient, Hommages à Claude Cohen, Bures-sur-Yvette 1994, 293-307. A few volumes of Ibn 'Asâkir, Ta'rikh madinat Dimashq, have also appeared, but the rate of publication by the Arabic Academy of Damascus remains regrettably slow. See also Ibn Abî Usâybi'a, 'Uyun al-anbâ fi ta'baqat al-âlîmâ, ed. Tahbân, Cairo. The editions of Sibt Ibn al-Dawâtî, Mirât al-zamânî, for the years 350/963 and of Dihâshî, Ta'rikh al-Islâm, for the 4th/10th century, have not been available for consultation.

Sayf al-Dîn, the honorific title of two members of the Shansabanî or Ghûris [q.v.] dynasty which ruled in Afghanistan and adjoining lands during the 6th-early 7th/12th-early 13th centuries: 1. Sayf al-Dîn Surî b. 'Izz al-Dîn Husaynî, succeed- ed his father as ruler in Ghûris 540/1145-8, killed in battle with the Ghaznavid Bahramşah (see Gûrîsî, 1. at II, 1100). 2. Sayf al-Dîn Muhammad b. 'Alâî al-Dîn Husaynî, ruler in the Ghûrisî capital of Fırozkuh [q.v.] 556-8/1161-3 [see ibid., 1. at II, 1101].

Sayf al-Dîn BAKHARZÎ, Abu 'l-Ma'âlî Sa'dîn b. MuTabarr b. Sa'dî b. 'Alî (586/1189-1201/1261), known honorifically as Shaykh-i 'Alam and, more familiarly, as Khâdîya-i Fathabad; the statement of his eminence was acknowledged by Sûfis of other lineages, such as Khâdîya Qarib and Hasan Bulghârî of the Khâdîya (Fakhr al-Dîn 'Ali Sa'îf, Rasqâbât 'ayn al-âhûd, ed. 'Ali Asghâr Mu'âniyî, Tehran 2535/1978, i, 34-5). When Sorkâtâni, mother of Mongke, the Mongol Great Khan, donated 100 silver bâlâq for the construction of a madrasa in Bukhara, despite her own allegiance to Christianity, it was to Bakharcî that she entrusted her supervision, as well as the administration of the endowments that settled on it ('Atâ Malik Djuwaynî, Sârhdî - Djuwan-gush, ed. Kazwini, iii, 8-9). Sorkâtâni further provided for the establishment of Bakharcî's khânâkah at Fathabad; the statement of Ma'sûm 'Ali Shah (d. 1344/1926) that the khânâkah of Bulgharî of the Khâdîya that was built by Timur in 780/1386 must be taken to refer to a restoration or expansion (Târîkhi - Khânânah, ed. Muhammad DînfarMahbub, Tehran n.d., ii, 242-3). Bakharcî evidently regarded himself as obliged, by virtue of his prominence, to influence the Mongol rulers in favour of Islam; this is suggested by the verified letter he addressed to Kûb În Hâbash 'Amîd, vizier to Çaghatay Khan, one line of which reads, "You are entrusted, in this government, with promoting the truth (nusrat-i hakk); should you fail to do so, what will be your excuse on the Day of Gathering?" (cited in V.V. Bartold, Turkestan ve epoku mongol'skogo nashestviya, in Sücînîneîa, i, Moscow 1963, 541). Bakharcî was visited by Bulgharî by Berke, the future ruler of the Golden Horde, and either converted him to Islam or strengthened him in the affirmation of the faith (J. Richard, La conversion de Berke et les débats de l'islamisation de la Horde d'Or, in REL, xxxxy [1967], 173-84). For all his prestige, Bakharcî's zeal for Islam sometimes led him into conflict with the Mongols; thus he was once abducted while praying to the Mongol camp outside Bakhurî and detained for a while (Abû 'l-Ma'alîghir Yahyâ Bakharcî, Astarâd - abâbâ wa-فزûs al-âdâb, ed. Iradj Afshâr, Tehran 1538 Sh./1979, 270). Similarly, one of his disciples, Burma'dân al-Dîn Bakharcî, sent to Kabulây's capital of Khân-Bâlîk to propagate Islam, found himself exiled to Mâ'inî, i.e. the realm of the southern Sung, where he soon perished (Khâzîn, Hâshîyâ, ed. 'Abd allâh al-Dîn Hâmûsî, Tehran 1338 Sh./1960, 275-80).

Bakharcî's influence extended beyond Bakhurî to Kirmân. Kutlugh Türkân Khatûn, the Kutlugh-
Khanid ruler of Kirmān (r. 658-81/1258-82) requested him to send her one of his sons, and he accordingly dispatched Burāhn al-Dīn Ahmad (d. 696/1297), his middle son, bearing with him the gift of a sword from the Persians. The ḥāndakā she established for him in Kirmān became a centre for the temporary expansion of Bāgharzī’s branch of the Kubrawi order in southern and south-eastern Persia. The prestige Bāgharzī thus acquired in Kirmān is reflected in the panegyric kāṣīda addressed to him by Khaḍījū Kirmānī (Dīwān, ed. Ahmad Suhaylī, Tehran 1336 Sh./559, 590-600). Bāgharzī, his youngest son, also visited Bāgharzī in Konya, not, however, to spread the Kubrawi path, but to pay homage to Djīlāl al-Dīn Rūmī, samples of whose verse had reached Bāgharzī from a follower in Shīrāz (Ahmad Aflākī, Manākīh al-‘arīfīn, ed. Tahsin Yazıcı, Ankara 1959, i, 143-5).

Bāgharzī’s khānākāh at Fathābād flourished for at least a century after his death and burial there in 659/1261. His eldest son, Dījāl al-Dīn Muḥammād b. ‘Abd al-‘Azīz, who, like his father, is mentioned in Mīhrābīn’s Ma‘ājilīs al-nafdīs, Babur’s autobiography, Dawlatshāh and later authorities.

696/1297), his middle son, bearing with him the gift from the Persians. Bāgharzī cannot have played a significant role in this regard, for he was killed a mere two years after the death of his father, in the course of factional strife among the Mongols. It was rather Abu ‘l-Ma‘āfikīrī Yahyā (d. 736/1335-6), the son of Burāhn al-Dīn Ahmad, who, coming to Būkhārā from Kirmān in 712/1312-3, succeeded in consolidating the affairs of the khānākāh (Ahmad b. Muḥammad Mu‘īn al-Fuṣūkī, Tārīkh-i Millūč-zāda dar ḥākīm-i maskūrāt-i Būkhārā, ed. Ahmad Gulīnī-Ma‘ṣūrī, Tehran 1339 Sh./66, 40). Still-extant documents from 726/1326 and 734/1333 record an augmentation of the endowments settled on the khānākāh; of particular interest is the earmarking of funds for the purchase and manumission of slaves who, converted to Islam, were to work on the lands belonging to the wa‘lif (O. D. Čekhovskij, Buhurktīe dokumentī XIV veka, Tashkent 1965). Ibn Baṭṭūṭa visited the khānākāh during Abu ‘l-Ma‘āfikīrī’s tenure; he remarks on the lavish hospitality which he received and on the singing of poems in Persia and Turkish by the assembled dervishes (Rihāb, iii, 27-8, tr. Gibb, iii, 554). The esteem in which rulers continued to hold Bāgharzī is illustrated by the burial in his proximity of the Čaghatayī Buyan (or Bayan) Kūl Kāhān in 760/1359 (E. Knobloch, Turkestān, Munich 1973, 212). Indeed, gifts by rulers continued to enrich the wa‘lif as late as the 12th/18th century, but by the time of the Persian dervish Ma‘ṣūrī Allī Shāh visited Fathābād in 1316/1898-9, the shrine was in an advanced state of dilapidation, many of its tiles having been stolen for sale in the markets of Būkhārā (Tārīkh al-ḥākīm ‘īk, ii, 242).

Long before this architectural decay set in, the Bāgharzī line of the Kubrawīya had vanished from Būkhārā, supplanted—like all other Central Asian branches of the order—by the Nakshbandīyya. The tomb of Bāgharzī came to function simply as a site for popular pilgrimage (as happened also with the shrine of the Caghatayī Buyan or Bayan) and on the singing of poems in Persia and Turkish by the assembled dervishes during Abu ‘1-Mafakhir’s tenure; and the menstrual cycles of his wives and concubines. The journal is lost but portions of it were included by Abu ‘l-Ma‘āfikīrī Yahyā in his Avsrāl al-ḥābīb wa-fūṣīs al-‘āẓād, an account of the litanies and practices of the Bāgharzī branch of the Kubrawī order.

**Bibliography:**  

**Sayfī Ṭūrūdī Būkhārī:**  
Sayfī Ṭūrūdī Būkhārī, a Persian prosodist and minor poet at the Timūrid court in Harāt during the second half of the 16th/16th century. He is remembered for his text-book of Persian prosody *Ṭūrūdī Sāfī*, which he completed in 896/1491; this has been published several times in India, notably with an English translation and extensive commentary in H. Blochmann’s *The prosody of the Persians according to Sayfī, Jams, and other writers*, Calcutta 1872, a work which played an important role in making Persian poetical theory accessible to European students. But now that older and more detailed works on the same subject are available (especially the early 7th/13th-century *Ma‘ṣūmīn Shamsīyān*) Sayfī’s largely derivative work is only of limited interest.

“Sayfī” was the pen-name of several other Persian poets, the earliest being ‘Ali b. Ṭūrūdī Sayfī al-Naysābūrī, whose poems are quoted by ‘Awfī, Shamsīyān, and Jādirīmī, and of whom Dāwlatshāh says: “I urge my readers not to be deterrned by the name of Sayfī Zāhr al-Dīn Tekīhī (568-96/1472-1560). *Bibliography:* Sayfī Ṭūrūdī is mentioned in Mir ‘Ali Shīr Nāwīī’s *Ma‘ṣūmīn al-nafa‘īs*, Bābur’s autobiography, Dāwlatshāh and later authorities.

SAYFI HARAWI (Sayf b. Muhammad b. Yaḵūb), poet and historian of Harāt in the Mongol period. Born in ca. 681/1282, he gained access to the court of Fakh ṝūr- al-Dīn Muhammad (d. 706/1307), the third malīk of the Kart (q.v.) dynasty of Harāt, in whose honour he claims to have written 80 ḵāṣīdas and 150 ḵīrās. In 706/1306, when Harāt was besieged by the Mongol army of the Il-Khan ʿOlqīyūr, led by Dānjīgīdīn Bahādūr, Sayfī composed a ṭasrīḥ, the Sām-nāma, in praise of Dīmāḏ al-Dīn Muhammad Sām, who conducted a vigorous defence on behalf of the absent malīk. On the city’s fall, Sayfī narrowly escaped execution by Dānjīgīdīn’s son Būdījī, whose father had been treacherously killed by Sām; and for a time his fortunes underwent an eclipse. It was some years before he gained the favour of the new malīk, Ghīyāth al-Dīn Muhammad (d. 729/1329-30), to whom he had previously dedicated a mathnawī, entitled ʿAbd al-Dīn al-Muḥammad, and who commissioned him to write a chronicle of Harāt. Sayfī’s Taḵk-i Harāt (or Taḵk-i malīk-i Kart), his only surviving work, covers the period from Harāt, made extensive use of Sayfī’s (or Taḵk-i Harāt, Taḵk-i muluk-i Kart) Taḵk-i Harāt (q.v.), as the earliest extant history of Harāt, is extremely valuable: his only surviving work, covers the period from Kārt, ca. 702/1302-3), and utilises Sayfī cites lost sources, notably the Kāt-nāma of Raḥīm-ī Būshandji (ca. 702/1302-3), and utilises documents in the Kārtīd chancery. Both Ḥāfiz-ī Abrū, in his historical works and in his geography, and Isfīzārī (d. 903/1498), the later chronicler of Harāt, made extensive use of Sayfī’s Taḵk-i Harāt. Bibliography: Storey, i, 354-5; Storey-Bregel’, ii, 1042-4; Abdul Mukhtar, Notes on a unique history of Herat, in JASB, N.S., xii (1916), 165-84; I.P. Petrushevsky, Trūd ṣīf, kak istońich po istorii vostochnogo Khurasana, in Trūd Yezīno-Turkmenistanskoy arkhitegitekstov komplikon ekskpeditsii, v, Aškharbād 1955, 130-62; edn. of Sayfī, The Taḵk-nāma-i Harāt, by M. Az-Siddīqī, Calcutta 1944, repr. Tāqī, ʿAlī, Tāqī, K. Aṣfīzārī, Hīyīār II is a rare geographical and historical information on this region (Byzantine occupation, from the end of the 9th century until around 1172, with the intrusion of the Lesser Armenian Kingdom of Sis 1080-1375 and the Crusaders). The crossing of the Arpa River (a.k.a. the modern Zamanti, see Honigmann, Oszmenez, 65-6), then in Armenian territory (biltēd al-ʿArman) until Adana (i, 379-80).

From Salduq times onwards Turkish tribes occasionally pushed into the Taurus region, occupying the yayla or summer pastures and valleys; the Ramaḏān-ḡullārī (q.v.) were later prominent here. Remnants of nomadic life have survived down to the recent past, and the ‘idās and popular poets (eṣnān) of the 19th century in this region were famous, including Dadaloghlu and Karadjaoghlan, singing of social tensions and of the natural beauties of the mountains and riverside.

The region and the geography of the river were forgotten in Mamlūk and Ottoman times, in spite of the continuing use of routes via the Cilician pass (Gülek Boğazı) and along parts of the Zāmāntī and its tributaries. Sayfī, who was born in Adana (Adana on the Sayhān, but not consistently, i, 333, 336-40, already like the Byzantine sources, see al-Māṣṣīṣ). Foreign travellers like Marco Polo in 1270, Bertrand de la Broquière 1432, Kāḥīb ʿCelbi, Paul arm of which is the Taurus Çayı, and into the sea at Deli Burnu. Avoiding the bad climate of the flood plain, the main harbour of the region, Mersīn (q.v.), lies 25 km/15 miles to the north. Health and agriculture have been greatly improved by the construction of the dam, though cotton production was known in the Cilician plain from the Middle Ages and, together with orchards, had already been organised on industrial lines under Mīšrīl ʿĪbrāhīm Pāša (mutasarrīf in Adana on behalf of Meḥmēned ʿAli 1833-40) and during the 1860s. The first railway connection of Adana with Mersīn was built in 1886. The only antique monument preserved along the river is the old bridge in Adana with 14 of its originally 21 arches still in use (length: 319 m/1,046 ft), erected under Hadrijān, with restorations, according to inscriptions and literary sources, in the 4th century, under Juṣṭiniān (Procopius, De aedific., 5 § 5); under al-Māḏī in 165/781-2; in 225/840; by Meḥmēned IV in 1072/1661-2 (Ewliyā ʿCelbi, i, 338); by ʿAḥmed III; twice in the 19th century; and in 1949. It is described in Dījār al-Walīd II (II), constructed between al-Māṣṣīṣ (on the Dijāhān) and Adana in 125/743 (al-Baladhūrī, 161-6), though the latter was situated on the western bank. But the region to the west of the Dijāhān remained a no-man’s-land between Arabs and Byzantines until the early ‘Aḥbasīd period, when under al-Māṣṣīṣ in 141 or 142/758-9 Adana was ‘founded’ (rebuilt) and populated by Khūrāsānīs, and in 165/781-2 a fort was begun next to the bridge by ʿḤārūn al-Rashīd as governor of the thughuq; according to another tradition the city was [re]established only in 194/809-10 (al-Baladhūrī, 166-7). The early history is retailed by Ibn al-ʿĀdīm (d. 660/1262, Bugāya, i, 169-71, also quoting several hadiths for identifying the Sayhān with that river of Paradise having water (against three others with honey, wine and milk), 389-92; cf. al-Maṣṣūdī, Marāḏī, i, 145 § 289, ii, 66 § 773; Hamd Allāḥ Mustawī, Nuzha, ed. Le Strange, 209, tr. 201-2, explicitly states that these rivers were intended, and not the parallel Sayhān and Dijāhūn of Transoxania). He adds valuable geographical and historical information on this region (Byzantine occupation, from the end of the 9th century until around 1172, with the intrusion of the Lesser Armenian Kingdom of Sis 1080-1375 and the Crusaders). The crossing of the Arpa River (a.k.a. the Zamanti, see Honigmann, Oszmenez, 65-6), then in Armenian territory (biltēd al-ʿArman) until Adana (i, 379-80).

From Salduq times onwards Turkish tribes occasionally pushed into the Taurus region, occupying the yayla or summer pastures and valleys; the Ramaḏān-ḡullārī (q.v.) were later prominent here. Remnants of nomadic life have survived down to the recent past, and the ‘idās and popular poets (eṣnān) of the 19th century in this region were famous, including Dadaloghlu and Karadjaoghlan, singing of social tensions and of the natural beauties of the mountains and riverside.

The region and the geography of the river were forgotten in Mamlūk and Ottoman times, in spite of the continuing use of routes via the Cilician pass (Gülek Boğazı) and along parts of the Zāmāntī and its tributaries. Sayfī, who was born in Adana (Adana on the Sayhān, but not consistently, i, 333, 336-40, already like the Byzantine sources, see al-Māṣṣīṣ). Foreign travellers like Marco Polo in 1270, Bertrand de la Broquière 1432, Kāḥīb ʿCelbi, Paul
Lucas 1706, Kinneir 1813 and Texier 1835, rarely mention more than the route stages and towns.

(C.P. Haase)

**Sâyîgh, Fath Allâh (1700-?),** still alive in 1847, son of Anthony, a Christian of the Latin rite who was a native of Aleppo and was the clerk, dragoman and biographer of Lascaris de Ventimille, Napoleon Bonaparte’s agent. In Lascaris’s company, he made a “commercial” tour through different French and English territories, and itineraries, resources and watering places, of unifying their tribes, of placing them under a single chief, of block the route to India for British commerce.

Sâyîgh and Lascaris left Aleppo on 18 February 1810. They succeeded in reaching Palmyra and in placing themselves under the protection of Muhannân Fâdîîl, the sha’îkh of the Hîsaana. But the policy of Muhannân’s elder brother, Nâsir, was contrary to Lascaris’s aims. The latter therefore set his sights on the ummî Duraîyî b. Shârîfân, the sha’îkh of the Kûwâlî [q.v.]. It was at that point that he revealed to his companion the journey’s real aim, and Sâyîgh henceforth threw all his energy into realising Lascaris’s projects.

The exploration of the deserts of the Arab East occupied the two of them for several years. Sâyîgh made by himself a journey to Dîribîyya [q.v.] in 1813, and the Odyssey only came to an end after Napoleon’s fall.

After Lascaris’s death at Cairo in 1817, the result of the British bombardment, the survivor Sâyîgh went back to his mother’s home in Lattakia, where he found a merchant and a woman to marry. He spoke with his friends about his numerous adventures and told them of a collection of notes which he had put together, at Lascaris’s request, during his life as a Bedouin. At the time of his travels in Syria, Alphonse de Lamartine became interested in Sâyîgh’s memoirs (written in a semi-dialectal Arabic, negotiated their rebellion against both the Turkish occupying power and also the Wahhâbîs, and of preparing the way for a French military expedition which would block the route to India for British commerce.

Sâyîgh’s poetry, which is devoid of rhyme and metre, comprises the following volumes: Thalâgîn kasîda (1954), al-Kasîda kif (1960) and Mu’llâlakat Tawfîq Sâyîgh (1963) (all of them reprinted in al-Madîmû’al-âsh’îyya, London 1990). His other writings include essays on Arabic and English literature and translations of English verse (e.g. 50 kasîda min al-shârî al-amîrîkî al-mu’âsîr, and T.S. Eliot, Rubâ’âyyât arba’sî (= Four Quartets), both London 1990).

(W. Stoetzer)

Sâyîmah, a town of mediaeval Persia, in what later became known as Luristan [q.v.], and the chief-lieu of the district of Mihrâjân-kâhdâsh. A tributary of the Kârkhân, which flows into the Kârin river [q.v.], is still today known as the Saymara.

The district passed peacefully into the hands of Abbâ Mustàsî al-Adârî’s Arab troops (al-Baladurî, Futûh, 507), and in mediaeval times prospered as a meeting-place of Arab and Persian tribes and was from the devastations of a severe earthquake in 258/872 (al-Tabarî, iii, 1872-3). The valley which comprised the district was fertile and could even produce dates, but by Hârd Allah Mustawî’s time (8th/14th century), Saymara was falling into ruins (which can still be seen today). A notable scholar and
humorist from the town was Abu 'l-Anbas al-Saymari, d. 275/888 [q.v. in ... The History of the Rulers of Kashgaria, a work of Mulla Musa ben Mulla Aysa, the Sayramite, edited by N.N. Pantusov"), Masadir Nahd al-balagha, judge in Ikhshidid Egypt. Abu Bakr Muhammad b.

AL-SAYRAFI, ABU 'L-ANBAS [see ABU 'L-
AL-SAYRAFI, MUHAMMAD B. BADR, a prominent judge in Ikhshidid Egypt. Abû Bakr Muhammad b.
Badr b. Abd Allâh (or 'Abd al-'Azîz) al-Sayrafi was born in Egypt in 264/877-8. His father was a client of
Umar al-Kindi, who had changed his name to Abu Badr al-Sayrafî. He was a money changer (jarrif) for whom Abu 'Umar al-Kindi composed his Kitâb al-Mawdlik. A Hanafi by madhhab and a reporter of traditions, al-Sayrafi studied under Abu Dja'far al-Taâbî as a Hanafi jurist and heard traditions from 'Ali b. 'Abd al-'Azîz al-Baghwâi in Mecca and from other Meccan and Egyptian teachers. Ibn 'Asîkî briefly refers to al-Sayrafi in his Ta'rikh madinat Dimashq, stating that he stayed in Damascus for a while and transmitted hadith there, as well as in Egypt, on the authority of 'Ali b. 'Abd al-'Azîz al-Baghwâi.
Al-Sayrafi held different judicial posts before succeeding to the judgeship of Egypt (kadîa 'Misir) under the Ikhshidids. For a while he was a deputy to Muhammad b. al-Hasan b. 'Abî 'Shawarîb, who had been designated as the chief judge of Egypt by the 'Abbasid caliph al-Radi. According to Ibn Hâdjâr al-Ashkâlânî, al-Sayrafi himself held the judgeship of Egypt on three occasions, from Sharâbîb 322/September 934 to Sharâbîb 324/July 936, and secondly from Dhū 'l-Hijjah 327/October 939 to Safar 329/December 940. Muhammad b. Tughdî al-Ikhshid appointed al-
Shawwâl 329/July 941, a post he held until his death in 'Abd al-Haqq (Turk. "Old Sayram") as an "old and great city", one day's journey in length, with 40 gates, inhabited by Muslim Turks. It is frequently noted in Timurid (Timur gave it to his grandson, Ulyug Beg, see Yezd, in the empire of the Uzbek Turks. For a while it was the principal town of the region, which was gradually increased in size by the rulers of the Yuan and Ming eras describe it as a well-populated Muslim town with extensive agriculture (see Bretschneider, Researches, for references). The agricultural productivity, based on irrigation canals, is remarked on by later Muslim authors as well (see Piskulina, Pishculina, for references). The area was described as a well-irrigated and Shayanbânid sources, with often-shifting overlordship according to the fortunes of war (Barthold, Hist. of the Semirechye).

SAYRAM — SAYYID

viii, 213-19; idem, Histoire des Turcs d'Asie Centrale, Paris 1945; idem, History of the North-Western Semitic, written on the Syriac text of the towns of Kazakhstan of the XIV-XVII centuries); in B.A. Tulupaev (ed.), Srednevekovaya gorodskaya kul'tura Kazakhstana i Sredney Azii ("The medieval urban culture of Kazakhstan and Central Asia"); Alma-Ata 1983, 165-77; Ç. Valikhanov, Sobrannoe soevemennyi o jazyk tomakh (=coll. works in 5 volumes), Alma-Ata 1984-5.

SAY'UN (Arabic: SAY'yân, a town in Wadi Hadramawt [q. v.], situated about 16 km/10 miles east of Shibam [q. v.], and 24 km/15 miles west of Tarim [q. v.]). In approximate 480 km/300 miles north of the port of Hadramawt, al-Mukallâ (q. v.) (see H. von Wissmann (ed.), 1988, 335). Landberg, at the turn of the century (1913, 1820) discusses the spelling of the name, Sayʿûn and Saywûn, etc., concluding that the former is the more ancient spelling and that the ūn ending is Mahri (cf. names like Khu'dûn, Dammûn, Kaydûn etc.).

The area is famed for its fertility and, in particular, for its date growing. Although it has nothing like the renown of Tarim in this regard, some accounts of Sayʿûn mention the town as a centre of Islamic scholarship (hidrat 'ilm) (Ibrâhîm Ahmad al-Makbâfî, Muṣâqal al-bâlîd wa 'l-kabîr al-Yamaniyya, San'â 1988, 335). Landberg, at the turn of the century (1913, 160) writes of the temporary decline of Tarim as a centre of scholarship and religion with the closure of its school (ribaṭ) and the resultant rise of the discipline in Sayʿûn. Here a rich benefactor of the school, al-Ḥâbîb (the usual Hadrami title of a sayyîd) 'Alî al-Ḥâbîb al-ʿAlâwî, was its rector, providing for all the needs of poor students entirely free.

Sayʿûn, it should be said, is not of great antiquity. The name of the town appears along with the Kaṭhîrî sultans from about the 9th/10th century. They conquered Hadramawt from the east, from Zafār [q. v.] from where they originally hailed. The town continued in their hands and was the capital of the Katbîrî sultanate in 1967 when the British left the Aden Protectorates and independence was granted.

(G.R. SMITH)

SAYYID, SAI'd (a., pls. asy'd, sâda, sâdat, abstract nouns asy'da, sa'lda, etc.), originally, chief, e.g. of an Arab tribe, and then, in Islamic times, a title of honour for descendants of the Prophet Muhammad, being in this respect in many ways coterminous with the term ḥâfî." Sayyid was used in ancient South Arabian, where it appears as sā'ld "chieflain" (A.F.L. Beeston, etc., Sabac dictionary, Louvain-Beirut 1982, 129), but the root seems to be largely absent from North-Western Semitic, being only dubiously attested in Elephantine Aramaic (J. Holtzicker and K. Jongeling, Dictionary of the North-Western Semitic written in the Syriac texts of the towns of Kazakhstan of the XIV-XVII centuries), in B.A. Tulupaev (ed.), Srednevavekovaya gorodskaya kul'tura Kazakhstana i Sredney Azii ("The medieval urban culture of Kazakhstan and Central Asia"); Alma-Ata 1983, 165-77; Ç. Valikhanov, Sobranne soevemennyi o jazyk tomakh (=coll. works in 5 volumes), Alma-Ata 1984-5. (P.B. Golden)
his peers within the tribe, underpinned by his unflagging ability to preserve his people's fighting reputation and to secure pasture for its herds. Hence chiefship could often be a burden than a source of exploitation, reflected in the popular saying sayyid al-a'wam khadimuhum "the chief is the tribe's servant". 

Whether, as Chehloed surmised, the chief originally had a sacral role, one effaced by the advent of Islam, is uncertain, but in his function as tribal orator and spokesman one might conjecture an attribution of magical powers similar to those attributed to the ancient poets [see 4(5). 1. A.].

2. In Islamic socio-religious usage. See for this, Sharif, especially section 3.

Sayyid Hasan Ghaznavi, Abu '1-Muhammad b. Muhammad al-Husayn al-Ashraf, Persian poet who died presumably in 556/1161. He spent the greater part of his life in Ghazna as a panegyrist of the Ghaznavid Sultan Bahram Shāh (512-47/1118-52), to whose campaigns into India he dedicated several kasidas. During the latter's reign he made the Hadifad, in all probability a problem poems by this mamduh and intended as a search for a new one. Our oldest source on Hasan, the Persian polmalizm Zahir al-Dīn Abu '1 Hasan al-Bayhaqi [q.v.], mentions in his (Arabic) Lubāb an-nasīb (written in 555/1160) that he met the poet, who was on his way to Mecca, in Nihāyāt in 544/1149 (Mudarrisi-rādāwi, introd. to the Diwa'n, 357). During his journey he associated with members of the Saldjuk dynasty: he mourned their death in a tardi4-band (in 546/1151) and dedicated a kasida to the accession to the throne of Malik Shāh III (in 547/1152). After this journey he seems to have resided in Khurāsān at the court of Sandjar. Following Sandjar's capture by the Ghuzz in 555/1160 (in addition to references in the article), he composed rubā'iyāt. The kasidas are mostly wasf, and more than half of them lack a tashi and begin directly with the muddāb. A large part of the remaining kasidas, whose campaigns into India he dedicated, is a description of spring and taghazzul. Some kasidas, however, stand out both by subject matter and quality. Memorable are no. 57, a complaint kasida with the title safr al-adamīr, no. 59, which echoes a kasida by Mas'ud-i Sa'd-i Salmān [q.v.] combining complaint with fakhūr, and no. 60, an ascetic kasida. In no. 72, a sawgund-nāma ("oath-poem"), the poet tries to repudiate an accusation. Some kasidas have long passages devoted to wasaf. A case in point is the original no. 46, which has a description of fourteen lines of the eyes, which leads to a gurīzgāh where the gaze is oriented towards the mamduh. Other examples are the description of the night in nos. 62 (as well as of the horse) and 67 (with separate attention to each of the planets). Already in 1958 Braginski paid attention to the ghażalīyyāt of Hasan. More than a third of them end with a panegyrical dedication; in this he follows Mas'ud-i Sa'd-i Salmān and Mu'izzī [q.v. and prefigures his later contemporary Sanā'ī and ultimately Ḥāfiz.

Sayyid al-Ḥimyārī, Abu Ḥāṣim Ḥusayn, b. Muhammad b. Yaẓīd b. Rābīh b. Ṣafar, a Shīʿī poet and a grandson of the poet Ibn Mufarrigh al-Ḥimyārī [q.v.]. He was born to Ibadī parents about 105/723, grew up in Baṣra, and died in Baghdad or Wāsiṭ between 173/789 and 179/795. At a young age, he adopted with great fervour the doctrine of the Kaysāniyya [q.v.], believing in the imāmate and occultation of Muhammad b. al-Ḥanafīyya [q.v. and his return as the Mahdi [q.v.]. Twelve Shīʿī authorities, both mediaval and modern, claim that the book of Islam is divided into ten parts (sajir al-nāma), but the proof-stories they cite are anachronistic, contradictory, or legendary, and his tajjalas poems have been judged of old as forgeries. Despite his well-known Kaysāni Shīʿī beliefs, though, he maintained good relations with the ʿAbbasid caliphs al-Saffāh, al-
Al-Sayyid Al-Himyari

Mansür, al-Mahdi and al-Rashid, whose praises he sang and whose gifts he accepted. Al-Sayyid is considered a leading and prolific muhâdîq poet of the class of Baghîšar b. Burd and Abu Ṭāṭîhya Ḥaqq. Although several known people (including four daughters) transmitted his poems, no one could collect them all, due to their large number—allegedly over 2,300. Of these, only 221 poems and fragments have survived; and, of the many books written about his akhbâr, only one is extant also. Clearly, his poetry was shunned very early, since it contained vehement invectives against the Companions, the Prophet's wives, and the enemies of the Shi'îs, notably the Umayyads. Most of his poetry praises the Banû Ḥâshim and recounts Ḥâli's virtues and extraordinary exploits. Though this poetry is generally lyrical, melodious, easy-flowing, and idiosyncratically narrative in style, Al-Sayyid's most tender are perhaps his Kaysanî poems, depicting Ibn al-Hanâfiyya's state and his long-awaited return to earth. These latter poems have been a major source for the modern Muslim Sunnîs on the Kaysaniyya and have often been attributed to the earlier Kaysani poet, Kuthayyir Ḥazza. [q.v.]

Sayyid Kūṭb, Ibrahim Husayn Shaḥdîlî, Egyptian writer, prominent member of the Muslim Brotherhood and main ideologue of modern Muslim Sunnî fundamentalism, born 9 October 1906 in Maṣāh near Asyût, executed 29 August 1966 in Cairo.

Life. In 1920 Sayyid Kūṭb moved from his native village to Cairo for his secondary education. From 1929 till 1933 he studied at Dâr al-Ui'm. He worked as a teacher for approximately six years, became a functionary in the Ministry of Education (Wizârat al-Ma'ârîf), and was sent on an educational mission to the United States where he spent two years. He returned to Egypt in August 1941.

Sayyid Kūṭb joined the Muslim Brotherhood [see al-Irshāwâl al-Muslimîn] probably only after his return from the United States. The exact date on which he joined is still disputed. It is usually assumed that he became a Brotherhood member in 1951.

In October 1952 he left the Ministry of Education after nineteen years of service. When the July 1952 revolution took place, he was in close contact with the Free Officers. He served, so we are told by several sources, as the cultural adviser to the leaders of the revolution. Nevertheless Sayyid Kūṭb parted with the new leaders because of ideological differences, for he believed that Islam should serve as the basis for the new Egyptian régime.

He became the editor of the newspaper of the Muslim Brotherhood just before he was arrested for the first time, together with the leadership of the Muslim Brotherhood, in early 1954, and remained behind bars for three months.

His second arrest took place on 26 October 1954 in the wake of the Manṣûhyya incident, supposedly an attempt to assassinate the then President, Djamâl Ţâbî al-Nâṣîr [q.v. in Suppl.], in Alexandria's Manṣûhyya Square. In 1955 he was sentenced to fifteen years in prison.

Thanks to mediation by the Irâkî president Ţâbî al-Sâlâm Ārif, Sayyid Kūṭb was released from prison in 1964. Sayyid Kūṭb's first and last volume of poetry appeared in 1964 he published his Maşâ'im fi 'l-tarîkh, "Landmarks". In this book he accuses present Muslim societies of being not Islamic but gâhîî. This word originally simply means "pre-Islamic", but in this new context it has no limitations to a period but means first of all "pagan", "barbaric", "anti-Islamic", "vicious" and "wicked". The accusation of being gâhîî implies apostasy from Islam, which is punishable by death.

On 9 August 1965, Sayyid Kūṭb was arrested again. He was accused of attempting to assassinate Djamâl Ţâbî al-Nâṣîr, of treason, and of planning a coup d'état. His trial was presided over by the notorious military judge Fu'ad al-Dîdîwî who, in the words of Gilles Kepel, "offered the accused all the guarantees of fairness characteristic of a military court in a dictatorial state trying defendants broken by torture." Sayyid Kūṭb was sentenced to death on 21 August 1966 and executed one week later.

Autobiographical writings. Two of Sayyid Kūṭb's novels are generally believed to be largely autobiographical: Thorns, 1947, and Ashwârî, 1946. In the same year his novel Shâri'a, published under the title al-Mâkhtûl al-mashura, appeared. Moreover, several letters, autobiographical articles, and court or police proceedings have been preserved.

Writings on Islam. Ideas. Sayyid Kūṭb's most important work is without doubt his commentary on the Kûr'ûn, Al-Muṣâra', literally "the shadows of the Kûr'ûn", in 30 volumes. When Sayyid Kūṭb was arrested in 1954, 16 volumes had appeared. The remaining volumes were written from prison, with Shaykh Muhammad al-Ġâzialî acting as government-appointed censor.

In 1960, a revised edition of this commentary
started to appear. Volume xiii of the revised edition (up to sura XIV) appeared in 1964. Arrest and execution preempted the revised edition, from being completed. It is this revised edition which is often characterised as tafsir haraki "activist exegesis".

In the general introduction to this commentary, the layman Sayyid Kutb carefully explains that he "had heard God speaking to [him] in this Qur'an", even though his training had been literary, non-theological, and even though he had never been a recognised Aq حارث "activist exegesis".

There is, however, more to fundamentalism than a mere rejection of modernity. The non-fundamentalist Şüftis, as well as other groups, equally reject modernity, but they do not accept the grave political consequences which the fundamentalists attach to this rejection.

Amongst the collections of articles that appeared as separate books under the name of Sayyid Kutb, Maar'ākatun maṣa'ī 'l-Yahud, "Our struggle with the Jews", deserves individual mention. The essay which gave this volume its title was probably written in 1950-1. In its present form, it contains footnotes referring to the spurious document known as The Protocols of the elders of Zion that were added in 1970 by a Saudi editor, one Zayn al-Dīn al-Rakkabl. There is an English translation of the essay by Ronald L. Neiter, including an elaborate introduction and commentary, see Bibl. below.

A complete list of Sayyid Kutb's writings can be found in Salah 'Abd al-Fatrāt al-Khālidī, 1991, 517-80. This valuable list supplies ample information on the origins, first date of appearance, reprints etc. of Sayyid Kutb's articles and books.

campaigns against the Khokars and face the revolt of the sons of Sayyid Sallm (Shawwal 833/June-July 1430). In Djuumâd II 834/February-March 1431, he had to deal with the incursion of Shaykh Allâ of Kabul.

On 9 Rajjab 837/19 February 1434, Sultan Mubârak Shâh was assassinated when he was preparing to go for his Friday prayers. During the 17 years of his reign, he had to undertake ceaseless military operations in Katehr, Mêwât and the north-eastern region, and had to deal with rebellious maliks in and around the capital. Corrupt and treacherous officers added to his problems. When Jâhâr died, he left his son to his entire charge. His administrative shortcomings apart, he was (as Firâghta says) a "cultured prince".

Immediately on his father's death, Muhammad Shâh (son of Farid b. Khîdr) ascended the throne "with the assent of the amirs, maliks, imams, Sayyids, grandees, people, 'ulamâ and the kâtids" ('T.-i Mubârâk-Shâh, 256). The next day he called the high amirs and slaves of Muhammad, who enjoyed the privilege of the mahi marâdî (fish banner), on the pretext of giving bayât (allegiance), and had some of them killed and put others in confinement; he thus brought many of the regicides to book. At a time when anarchical tendencies were getting out of control, some 'ulamâ and amirs invited Mahmûd I Khâldî [q.v.] from Malâvâ. In utter distress, Muhammad Shâh sent for Bahlûl Lodî and his troops from Shâmâna. The stern battle of the first day convinced Mahmûd that the conquest of Dîhilî would not be an easy task. He therefore readily accepted Muhammad Shâh's proposal for peace and turned back. When he was on his return journey, Bahlûl Lodî plundered some of his equipage. Pleased at this, Muhammad Shâh addressed Bahlûl officially as his son.

In 845/1441 Muhammad Shâh handed over Dipalpûr and Lahore to Bahlûl and commissioned him to chastise Qajarâkh Khôlăr. But Bahlûl turned hostile and marched against Dîhilî. This undermined the position of Muhammad Shâh, whose nobles "even within twenty karâhs of Dîhilî" turned against him. On Muhammad Shâh's death in 847/1443, his son 'Alâî al-Dîn 'Alâm Shâh was raised to the throne. According to Abu 'l Fadl, he "possessed no share of rectitude and abandoned himself to licentious gratifications" (ii, 313). On his accession, attacks on the central authority and the disloyal attitude of the nobles created a difficult situation for him. In 1448 he abandoned Dîhilî and settled in Bâdâ'ûn, where earlier he had lived as governor. Bahlûl Lodî took possession of Dîhilî but allowed him to rule over Bâdâ'ûn till his death (883/1478). Subsequently, Sultan Husayn Shârîf integrated Bâdâ'ûn into his kingdom of Djuwpârûn. Families which traced their origin to him were known in Bâdâ'ûn as Khârdh-Khânî Sayyids (Fadl Akrâm Sidîkî, 'Alâî al-Dîn Bâdâ'ûnî, 1915, 70).

Emerging as the principality of Mûltân, the Sayyid dynasty ended as the principality of Bâdâ'ûn. Looked at in the context of the Dîhilî Sultanate, the Sayyid dynasty forms a watershed in the history of mediaeval India, indicating a stage in the dismemberment of centralised monarchy. Its rulers were devoid of any ideal of establishing an empire; their political vision was confined to a radius of some 200 miles round Dîhilî. Their writ worked only from "Dîhilî to Pâlam" (az Dîhilî tâ Pâlam), as the saying went. They undertook innumerable punitive campaigns but these were mainly directed against their own maliks. There was neither administrative coordination nor uniformity in the areas under their control. Even in the agrarian sphere there was "diversity of practice in assessment and collection" (Moreland, 67). Group assessment seems to have gained ground at the expense of Sharîf or Medieval. In reality the Sayyid kingdom of Dîhilî—with their nebulous title of rûşâjat or râshid were nothing more than glorified iṣkâdî-dârs and, as Tripathi has remarked, "were never seriously considered as sovereign rulers". Their political outlook, their theory of kingship, and even their ethnic origin, was born of the exigencies of the situation. The numismatic evidence on which E. Thomas and Nelson Wright based their conclusions about inscriptions on the Sayyid currency is not borne out by information recorded by Bihâmid Khânî and other Persian chroniclers. According to Bihâmid Khânî, the orders of Shâh Rûkh were enforced here for about 40 years. Robes of honour and standards were received from Harât, while the sikka (currency) was issued and the khotâb was recited in the name of Timûr and his son. It appears from the Ta'rîkh-i Muhammadi and the Maţa' al-sa'dîyân that the Sayyid rulers regularly paid allegiance to them. Muhammad Shâh's claim to be 'Ali b. Amîr al-Mu'mînîn should be interpreted in the context of Shâh Rûkh's "ambition of being recognised as Khaïla and overlord of other Muslim princes" (Arnold, The Caliphate, 12).

Despite all the political turmoil and unstable conditions that prevailed in their shrunken kingdom, the Sayyid rulers displayed a keen interest in the founding of new cities. Khîdr Khân founded Khîdrâbâd and Mubârak Shâh Mubârâkshâb on the banks of the Djuumâd (Sir Sayyid Ahmad Khân, Aghâr al-sa'âdât, ed. Khâlid Andjâm, Delhi 1990, i, 102). No archaeological remains of these cities have survived. 'Alâî al-Dîn is said to have populated A'âptûr in the Bâdâ'ûn district (Râjî al-Dîn Bismîl, Kamâ al-tâ'rikh, Bâdâ'ûnî 1907, 232). He laid out a pleasure garden also (Mansûrî, Aghâr wa'dayyî-i girdîr-i Bâdâ'ûnî, Agra 1338/1920, 25). The architecture of the Sayyid period is, however, expressive of dissolution. Only the tombs of the period have survived; it has been rightly designated as the Makbara architecture. According to Percy Brown, 26, "in the course of time the country around the capital was converted into a vast necropolis". More than fifty tombs of considerable size and importance belonged to noble. No large congregational mosques were built during this period. The architecture of Bâdâ'ûn is best typified by the Sayyid currency, 'Aghâr al-sa'âdât, Ta'rîkh-i Mubârâk-Shâhî, Bibl. Ind., Calcutta 1931; Mir Khâ'and, Rawdat al-sa'âfî, Lucknow 1270/4-1853-7; Hindû Shâh, called Firishta, Ta'rîkh-i Firishta, Nawal Kishore 1281/1864-5; Sharaf al-Dîn Yâzdi, Zafr-nâma, Bibl. Ind., Calcutta 1885-8, ii; Haydar b. Abu 'l Ali Ewoghlu, Mânîsâ al-îmâhî B.L. Or., 3482, fols. 38a-39a; Nizâm al-Dîn, Tabâkât-i Akhârî, i, Calcutta 1927; Bihâmid Khânî, Ta'rîkh-i Muhammadi, B.L. Or., fol. Kâhî 312a; Abu 'l Fadl, 'Aqîn-i Akhârî, tr. H. Blochmann, delhi 1989, ii, 312; 'Abd al-Kâdir Bâdâ'ûnî, Munṭakâbb al-tawârîkh, Bibl. Ind., Calcutta 1864-9; 'Abd al-Razzâk Samarakandi, Maţa' al-sa'dîyân, ed. M. Shâfî, Lahore 1940-9; Khûurâshâ b. Kubâd al-Husayni, Ta'rîkh-i Khojî, ed. S.M.H. Zâidi, Delhi 1963, 186-7.

SAYYIDS — SAZ

(K.A. NIZAMI)

SAZ, Ottoman form säz, the Turkish lute. Säz, with various meanings in Persian, including "musical instrument" in general, may be applied to stringed instruments (the qı̄dr in Ağaţbarbı̄yın, the vı̄sıl, sגרd, in Balı̄çı̄stān), to wind instruments (the ṭı̄n̄ar in Persia) or to the musical band itself; in effect, in Balı̄çı̄stān (where the local language often reflects the ancient stages of Persian), this word also means the tuning of instruments.

If in Turkey säz still denotes, in a rural environment, any musical instrument, the term is generally applied to the lute with a long neck and a semi-pyramidal body, with three groups of strings comprising two or three strings, and this has become over the course of the 20th century a real symbol of national unity.

1. History and structure of the instrument.

There are representations of lutes with long necks on Akkadian cylinder seals of the third millennium B.C. The same type of instrument was spread, in the second millennium B.C., all over western Asia and Egypt. Later, there are Byzantine pictures of long-necked lutes (pandoura), attesting the presence of such instruments in Anatolia before the Turkish conquest. The question of the origin of these lutes can be discussed at length, but it is clear that, although such stringed instruments may have existed in Western Asia before the Turks' arrival, it nevertheless seems that the Oğuz brought into Asia Minor their own lute, the ancestor of the present säz, with the name of kopuz. In descriptions of the 14th-15th centuries A.D. (in Yûnus Emre and the Ded Korkut epics), it seems to have been a lute with three strings, with a long neck and a sound-board of hide. The present form of the säz could thus be the result of a synthesis between the autochthonous, Anatolian instrument and the Turkish kopuz.

In our time, the säz has several names, corresponding to different sizes respectively; thus, in increasing order, curo (between 50 and 70 cm), curo-bağlama or tambara (ca. 95 cm), bağlama (ca. 110 cm), bozuk (115-20 cm), divan säz (130 cm) and meydan säz (140 cm or more). The length of the neck compared with the sound is such that one can play an octave and a fourth. One should mention a sound-board variant, originally from eastern Turkey and Ağarbarbı̄yın, characterised by a shorter neck (an octave + a tone) and with a total length of about 100 cm; this is called curo-bağlama or divan säz. It is also possible that the most archaic säz may be the little curo with three strings, called in the western parts üçeti baglama or kopuz, and by the nomads of the Taurus, bulgarı.

Each fret is a nylon thread (in former times a piece of gut or a copper thread), wrapped three times round the neck and tied at the back; this may be the origin of another name currently used for the säz, sc. baglama (from baglamak "to attach").

The strings, of metal since the 18th century, are in origin two (şītelı̄, corresponding to the Persian doṭır) or three (şītelı̄, şı̄telı̄, şı̄telı̄). On the biggest säz, the cords are doubled or triples in unison, in order to increase the dynamic or to create sympathetic resonances (dürtelı̄, altetelı̄, etc.). At the present time there is a deep-toned threaded string, tuned to an octave. The strings at the top and at the base are of a similar trim (.18 or .20 mm), and that or those of the middle is/are lower (.30 mm). In our context, we shall speak about the lower, middle or top string in the singular, even though a group of strings may be involved.

2. Evolution and playing techniques.

It is important to distinguish instruments of rural origin from those of musical instrument workshops of the towns. The latter, meant for playing in all styles, have 24 frets and can sometimes claim the same perfection as the classical lutes. A säz made by a peasant or nomad, with 10 to 18 frets, will be adapted to a more rapid, popular style.

In the countryside, the säz is still played with the fingers, with trimmed finger nails; with one finger, or with rasgueados; but a plectrum may also be used, now made of a piece of plastic with an equivalent flexibility.

The different sizes of instruments, the placing of the frets and the numerous strings of the three groups display the main traits of the Anatolian musical system. At the outset, the longer the instrument, the more the left hand is forced to make long movements, played on the first string, with the other strings acting as a drone. The säz is in this case essentially a monodic instrument, subordinated to the voice which it accompanies. If it is of small or medium size, it will be played on the three strings; the slenderness of the neck allows in effect the thumb to block the upper string, whilst the other fingers press indifferently the lower or middle string. If the hand grips round the neck, the third finger may even press the upper string at the same time as the thumb. From this there results the possibility of varying the drones and of producing chords of three sounds, so that the art of the rural säz is often characterised by a tendency to polyphony, which sustains an invariably monodic melody.

As many as 14 different tunings (diōnten) of the säz are enumerated. The ones most used today are:

(from top to bottom)
G-D-A (kara dioun or bozuk dioun)
E-D-A (asyk dioun or bağlama dioun)

The first allows all the modes of rural Anatolian music to be played, and leaves the choice between several base notes (A, G, B or D). For this reason, it is considered as the most suitable to represent the logical and systematic coherence put forward by the teachers in the conservatories of traditional music in contemporary Turkey. The second, the tuning of the minstrels (ışık [see ışık], is more limited since it only allows one base note (E), but is nevertheless very esteemed, and considered as more "hot" (yanık). Since the base note is situated on the middle string, the polyphonic tendency mentioned above is displayed there necessarily, in the shape of chords of parallel fifths very characteristic of minstrels' art.

Other tunings are used in the countryside, and are called domino modes, and are practiced either in a special region (e.g. misket dioun, G-F-D-A, in the region of Ankara) or by a group (e.g. abdal dioun, G-A-A, characteristic of the Abdal Turkmen).

3. Ideology and society.

In present-day Turkey, after the coming of modern ways of transmitting music—radio, tape recorder—
and taking into account the more frequent movements of population and migration to the big towns, several practices of the saz exist together.

Despite the change brought about by modern life, for marriage celebrations, saz musicians of the village, knowing the traditional and local repertoire, are still resorted to. They often play in small groups e.g. saz, viol and a wind instrument. They are gradually being replaced by youths playing the urban repertoire on an electric saz.

The saz, then, continues to accompany the singing of the aşık or açaç [q.v.]. These poet-musicians come either from the mainly Sunni regions of Kars and Erzurum, or from the Alevi-Bektashi communities of the Sivas and Erzincan regions. In this latter case, internal emigration, to Istanbul or Ankara, or external, to Germany, has perpetuated the tradition of the aşık, which owes its popularity in the urban milieu to the political echoes of the texts of the songs, as expressions of a minority often persecuted in Ottoman history, and to a social ideal and art of living. Furthermore, the saz is the essential instrument for the ceremony of the Alevi sama‘ [q.v.]. For all these reasons, it has become the main symbol of Alevi culture, in contemporary Turkey and in the diaspora, in the form of the şörgü tuned according to the baglama or ask düzi.

In addition to these practices, of a local or religious nature, since the first years of the Republic there has come into being a national music, whose diffusion has been assured by the Turkish radio and the state conservatories. The repertoire is collected from all the provinces of Turkey and interpreted by orchestral groups using traditional instruments. In this framework, the saz embodies the national identity in more than one way: at the outset by its suitability for representing all the regional styles; then by the fixness of its system fretting and the proportions which determine its making; and finally, by the inherent system and logic in learning the practice of the saz and often underlined by its teachers, these last give pride of place to the kara düzi, in fifths, assimilated to the ‘rational’ order. From this point of view, one can say that the two tunings mentioned above are seen today as entailing two distinct ideological contents: the baglama düzi is associated with the voice of the aşık, to despite the change brought about by the heterodoxy of Bektashism [see Bektashiyya], or even with social confrontation, in the eyes of official circles, who set up against it the ‘secret’ baglama tuned according to the aşık düzi.

After his death, Sebük'tigin acquired a reputation amongst the Ghaznavids as the just ruler, amir-ı Çatiil, but little of his real personality in fact emerges from the sources.

Bibliography: For the sources, see Bosworth, Early sources for the history of the first four Ghaznavid sultans (977-1041), in IQ, viii (1965), and for the Pand-nama, M. Nazim, The Pand-Nämah of Subuk'tigin, in JRASt (1953), 605-28. Of studies, see Barthold, Turkestân düzen to the Mongol invasion, 261-5; M. Nazim, The life and times of Sultan Mahmud of Ghazna, Cambridge: 1931, 28-33; Bosworth, The Ghaznavids, 36-44.

SAGEHATNAME [see SAFDR].
SEGBAN [see Suppl.].
SEGSTAN [see SİSTAN].
SEGOVIA [see SAYABÜYÜSYA].
SEGU or Segou, a town of the present Mali, situated on the banks of the Niger and the historic capital of the Bambara kingdom of Segu from the 18th century onwards, and then of the empire of al-Hâdjji 'Umar.

There exist four villages with the name Segu, all on the river’s right bank, at more than 200 km/124 miles to the north-east of Bamako. These are, from upstream to downstream, over a distance of a dozen or more kilometres, Segu (the village of agricultural cultivation), Segu-Kura (“new Segu”) and Segu-Sikoro, transformed into a royal residence by Ngolo Jarra (ca. 1750-87).

It was around 1710 that Biton Mamari Kulibali asserted his power, as war leader and founder of a new system of authority, over the Bambara peoples, who were sedentaries, animists and users of the Mandingo language, of this part of the Niger valley. Having become the leader of a group of young men, all of the same age band (ton), he built up his power through the extensive acquisition of slaves from all origins, who became “slaves of the ton” (ton jon). In this way, a centralised, military state, based on Segu, developed, which spread out in all directions. Over two centuries, two dynasties succeeded each other at the head of this empire, the Kulibali and the Jarra.

The basic social institution of the Bambara empire of Segu was the ton jon or group of subject persons, who made up the army and a good part of the bureaucracy. Through loyal service and acts of bravery, certain jon could attain to positions of command. It was these ton jons who, in the middle of the 18th century, exterminated the Kulibali family and raised to power one of their own number, Ngolo Jarra, founder of the new dynasty.

The bases of Segu’s prosperity rested on the lasting
alliance between an industrious (cotton, indigo, food production) Bambara peasantry, the military régime of the "ton jon", who accumulated captives and booty, and the Marka, a specialist Muslim merchant group, who lived in the coastal towns and engaged in international trade and other commercial operations. The Bambara themselves were strongly attached to animist cults (the dynasty protected a whole network of temples and priests), but tolerated the practice of Islam in the quarters of the town enclaves of the Marka.

At the approach of al-Hadžić ʿUmar, in the midst of the 19th century, the ruler of the time, Bina ʿAli Qarra, tried in vain to ally with the Dina of Măsina, the neighboring Islamized Fulani town. Al-Hadžić ʿUmar entered Segu on 26-7 Şebābīn 1277/9-10 March 1861, and proceeded immediately to the gathering-together of all the idols and their destruction. Designated as ḥalīfa by his father, Ahmad (Abūd al-Kabīr), ʿUmar's son, took over the succession on his father's death in 1864. It was at this time (1864-6) that the French traveller Mage lived in Segu, of which he has left a lively and well-informed description, estimating the population of Segu-Sikoro at that time at 10,000 persons. Ahmad al-Kabir reigned in this town for almost thirty years, at grips with the opposition of some of his brothers and with the conquered population. In this same period, the French advanced progressively from Senegal. On 6 April 1890 Colonel Archinard entered Segu, whilst Ahmadu fled eastwards. In the course of the ensuing months, Archinard sent to the Bibliothèque Nationale in Paris—which has preserved them ever since—the rich library of al-Hadžić ʿUmar and of Ahmad.

(J.-L. Traïaud)

SEHĪ BEY, Ottoman poet and biographer of poets of the 10th/16th century, b. 874/1470-1 and died 955/1548-9.

1. Life.

His original name is unknown, and the historian ʿAli dubbed him "Abd Allāh" and considered him as stemming from the Dewshirmé (q.v.). He was certainly from Edirne and a close associate of the poet Negdārī Bey (d. 914/1508-9 [q.v.]), also from that town. Already when Bāyezīd's son Mahmidd (d. 913/1507) was appointed governor of Manisa, Sehī was the companion of Negdārī and several other poets in the Prince's entourage (see Latifi, Tedhkire, Istanbul 1314, 196, 329; ʿAghīl Čelebi, ed. Meredith Owey Lorenzo, Londres 1978, fol. 130b-131a; ʿ Ālāʾ b. Abū ʿAllāh Muḥīyy al-Dīn Abī Ḥajar al-Dīnī, Istanbul 1325, 76, 41; Fāʾīl Resḥād, Tedhkire-yi Sehī, ed. Mehmed Şūrki, Istanbul 1325, 76, 41; Günay Kut, Hest bihišt, the Tedhkire by Sehī Beg. An analysis of the first biographical work on Ottoman poets, with a critical edition based on Ms. Süleymaniye Library, Ayasofya 0. 3544, Sources of Oriental Languages and Literatures 5, Cambridge Mass. 1978, pp. 423, at p. 1).

Through a misunderstanding of ʿAlī's Kānī al-ālāʾ (Ewdšt Čelebi) wrongly states that Sehī was Negdārī Bey's son-in-law, and that he married Negdārī's daughter in order to lay claims to his poems after Negdārī's death (Seyhān-nâmē, Istanbul 1314, i, 343, 347), a mistake later repeated by F. Babinger in his E̱1. Art.; it was corrected by Resḥād, in op. cit., 316, see also Akūn, op. cit., and Kut, op. cit., 2. Also, Babinger, following Leunclavius and Şevket-i ʿOthmānī, iii, 115, also wrongly states, according to Akūn and Kut, that Sehī was the Secretary (kā̄bi) of Bāyezīd's youngest sons Mehmed, and accompanied this last to Kaffa [q.v.], where he became for a time sandjak beg; most sources, however, connect Sehī with Prince Mahmidd and Manisa (see above). Sehī's close connection with Negdārī continued till the latter's death, and on Sehī's own tomb is a chronogram couplet of his mourning Negdārī's death (see Akūn and Kut).

Later, Sehī served as a secretary to the prince Süleymān in Manisa and also with the latter at Edirne when Süleymān was commander there for Rumelia. After Süleymān's accession as sultan, Sehī recalled in his poems former favours no longer vouchsafed, but he seems in fact, from other poems, to have remained in favour with the royal family, and held office in the Morea [see mora]. Finally, he served as administrator (müātevvel) of various "mâres" in Edirne and Ergene, dying at the former place; while it was acting as an administrator of a waqf there he wrote his Tedhkire (see below).

2. Works.

Encouraged by the Kādī ʿAshker Muḥiyī al-Dīn Čelebi Feniārī [see FENARI-ZADE], Sehī put together his poems into a disvān, the unique ms. of which is in Paris, B.N. suppl. turc 360. This contains kāsai̇s, ghazals and other lesser genres of poetry, but Sehī does not seem to have been considered in his own time as a noteworthy poet. This may explain why he is hardly quoted in the anthologies of the 10th/16th and 11th/17th centuries and why only one ms. of his disvān survives. On the basis of chronograms in some poems, Akūn concluded that Sehī completed the collection between 942/1535 and 944/1537. The dedicates of his poems include the sultans from Bāyezīd II to Süleymān and a large number of Grand Viziers, and it seems that there are two sections to his Tedhkire (q.v.) and two to Şafi dedes, indicating a possible connection of Sehī with a dervish order.

Sehī's real fame sprang from his Tedhkire, finished in 945/1538 and called Ḥeṣb bihišt “Eight paradises”, the first literary biographical work in Ottoman literature (for detailed discussion, see Kut, op. cit., 17-18). Sehī states in his preface that he followed the examples of the collections of biographies by Djāmī, Dāwūdat Şāhā and ʿAllā Shīr Nēwā, and following their example, divided his own work into eight tabākas. These include (1) the life of Sultan Süleymān; (2) the other sultans and the princes who wrote poetry; (3) high officials like viziers, nīshāngīs, etc.; (4) poems from the ʿulmā'; (5) the poets who had died by the time Sehī was writing (for which he seems to have gathered his own research; he has valuable details about early poets such as Ahmedī [see AHMDĪ], Ahmed-i Dāvī and Şevket-i [q.v.]); (6) poets whom Sehī knew personally in his youth, some still alive; (7) his contemporaries and the newcomers (including two poetesses); (8) young and talented poets who had just started on their careers. An epilogue eulogises Sultan Süleymān.

Following his Persian and Çaghatay Turkish
SEHI BEY — SELANİK

predecessors, Sehi gives concise information about his poets, with full details of names and education, but rarely giving dates of birth or death; he then ends with selections from his subject's poetry. This procedure was adopted as a model by future biographers. His work is the best preserved of the genre; for shortly afterwards came the similar works of Latifi, ‘Ashik Celebi and several others.

There exist 18 mss. of the Tekhirké scattered through the library collections of Turkey and Europe (see Kut, 12-14). Ms. Ayasofya 3544 is the basis for Kut's edition; it was probably presented to Sultan Süleyman and was subsequently owned by Prince Mehmed. An earlier printed copy was published by Mehmed Şükrü, İstanbul 1325-1907, with the title Akhri-i eslaban tekhir-yi Sehi (but his printed version contains only 218 poets, see Kut, 12-14), to which is appended a study on Sehi by Fâik Reghâd; this print was based on ms. Millet, Ali Emiri, Tarih 768, copied by ‘Ali Emiri himself. Finally, the Tekhir was translated into German by Necati Lugul and O. Reşer as Sehi Bey’s Tézkere, Türkische Dichtenbiographien aus dem 16. Jahrh., Tübingen 1942. Kut's critical edition is based on six mss.; see her Heth bihişet and also her Heth Bihişet in yeni bir nüshâ ve bir dâzîme, in Jnl. of Turkish Studies, vii (1984), 243-301. In recent years, Dr. Muğan Cumbur and a group of scholars have been working on a serial edition of all Ottoman biographical works, starting with Sehi’s.

Bibliography: Given in the article. For the older bibl., see F. Basinger's EF art. (G. A. Tekin)

SELÂNLİK (v.), the Ottoman Turkish term for the outer, more public rooms of a traditionally-arranged house, used e.g. for the reception of guests and non-family members; it thus contrasted with the inner rooms which constituted the harem or harem for the womenfolk. The term selânlîk dârâsî is also found. A further use of the word selânlîk is in the expression selânlîk âdâyî to denote the sultan’s ceremonial procession from the palace to the mosque for Friday worship, a practice kept up by the Ottomans up to and including Mehmed V Reghâd [q.v.] in the second decade of the 20th century.

Bibliography: Pakalin, iii, 153-5. (Ed.)

SELÂNLIK, the Ottoman Turkish name for classical and early Byzantine Thessalonike, modern Greek Thessaloniki, conventional form Salonica; the largest city of Macedonia, on the gulf of the same name, to the east of the Vardar river mouth. The city has always possessed a large and secure port, which was then linked to Constantinople only by sea. Ottoman activity in the area began under Murad I, with nomads from the western Anatolian principality of Saruhan [q.v.] settling in the area. Ottoman forces once conquered the city, but returned it to the Emperor John V Palaeologus; Yildırım Bayezid conquered it in 1369, but after his defeat and capture in the battle of Ankara (804/1402), his son Süleyman returned it to the Byzantines (805-6/1403). Many details of this sequence remain unclear. However, after the siege of Constantinople by Murad II in 826/1423, the governor of Thessaloniki, Andronikos Palaeologos, sold the city, which then supposedly held about 40,000 inhabitants, to the Venetians. While the sultan recognised this transfer in the capitulations granted to the Venetians in 830-1/1428, in 833/1430 he conquered the city nonetheless. In the meantime, many inhabitants had abandoned the city because of the prevailing insecurity. Johannes Anagnostos, a Byzantine chronicler, has left a detailed account of these events. He claims that 7,000 persons, including himself, were taken prisoner. Yet in some cases, the sultan himself paid the ransoms of the captives and promised that those who had fled the city would have their properties restored in case they returned. Two or three years later, Turkish settlers were brought into Selanlk from Yeşil-i Vardar, and the church of the Acheiropoietos and the monastery of the Prodomos were taken into mosques.

A tax register (tablir) was also prepared at this time, but has not survived. We do, however, possess a tax register dating from 885/1478 and a fragment from the reign of Bayezid II (r. 886-1402-1512) (Başbakanlık Arşivi Osmanlı Arşivi, İstanbul Tapu Tahrir 403 and 723). The earliest tabîr enumerates 862 Muslim and 1,275 Christian householders. From their regular distribution among the pre-existing town quarters, it can be assumed that the Muslim inhabitants had been settled in the city by order of the sultan (sûrgûn). By the beginning of the 10th/16th century, Selanlk had about doubled in size, as apart from 1,715 Muslim households, there were now 1,688 Christians and 754 Jews. A high point was reached in 925/1519, when a more or less complete register (sûrgâh) recorded 1,374 Muslim, 1,387 Christian and 3,143 Jewish households. By about 967-8/1560, a significant drop in population had occurred (773 Muslim, 1,047 Christian and 2,645 Jewish households). This decline was even more pronounced by 1022/1613, when the relevant figures were 1,090, 561, and 2,033, showing a relative increase of the Muslim and a decline of the Christian element. Thus Selanlk seems to have held about 10,000 inhabitants in 885/1485 and to have oscillated between 18,000 and 30,000 thereafter. Ewliya Çelebi claims 33,000 houses for 11th/17th-century Selanlk, which would give a population of over 150,000. But European travellers indicate that during its years of prosperity in the second half of the 12th/18th century, Selanlk possessed a population of about 60,000 to 70,000, 28,000 to 30,000 of whom were Turks.

Among the revenue sources of Selanlk and other towns of the area which the 9th/15th-century Ottoman state attempted to exploit, were the salt pans, supplemented by a fishing weir in the vicinity of Selanlk itself. Accounts begin in 873/1468-9, but show that the enterprise was in constant difficulties. Several
tax farmers were executed for their failure to pay, while the most prominent of them, a member of the Palaeologi family, managed to escape. The early tax farmers were Christians; but a Muslim mültezm, recorded around 1076/1668, is the earliest cited mültezm. This situation indicates considerable disorganisation among sheepbreeders and fishermen, and possibly a crisis in the Macedonian village economy as a whole.

Among the Ottoman monuments of the city, the most prominent is the White Tower, built probably in 942/1535-6 upon the order of Sultan Süleymán. Mî'mâr Sinân may have been responsible for its construction. Ewliya Çelebi, who visited Selânik about 1078/1668, has left a detailed description of the fortifications, including the castle of Kalamarya; he was greatly impressed by their size, but felt that they had recently been neglected. Among the mosques that were built by Hâfîz Khatûn, the daughter of Hamza Beg, was a new building (872/1467-8, enlarged in 1000-1/1592 and repaired in 1029/1620). This structure had come to be known by the late 10th/16th century as the mosque of Hamza Beg. It is one of the few mosques not founded by a sultan to possess a colonnaded courtyard, albeit of irregular shape. The reconstruction around 1029/1620 is documented by a waqfâ-name penned by the stylist Mehmed Nergisî, while the donor was a kâpûülü by the name of Mehmed Beg son of Seyyid Ghâzi. The second mosque constructed at this time is known as the Ağa'îmârât; it was built by the former Grand Vizier Ineğollı Ishâk Paşa in 892/1486-7. It is of the T-shaped type, and its side chambers originally may have been meant to house dervishes. The mosque was associated with a public kitchen. Next to the building there once stood a minaret ornamented in multi-coloured stone, which gave the whole complex its name. Other major mosques were converted Christian churches; since Selânik had been taken by assault, the transformation of churches into mosques was legally possible at any time. Many churches were taken over either around 905-6/1500, when refugees from Spain caused a wave of anti-Christian feeling, or in the ten years surrounding the millennium of 1000/1591-2. The church of St Demetrius was converted into a mosque in 898/1492-3 and thenceforth known as the Kâşiîmîye, while in 927/1521 local conflicts resulted in the confiscation of the Hagia Sophia, at that time the metropolitan church of Selânik. The funerary monument of Galerius, converted into a church in Byzantine times, was turned into a mosque on the initiative of the dervish Shaykh Khortadji, with the support of the Grand Vizier Sinân Paşa (998 or 999/1589-90 or 1590-1).

In 883/1478, the Selânik tax register had not shown any Jewish inhabitants, probably because the city's Romanioi community had been transferred to Istanbul by Sultan Mehmed II (r. 848-50/1444-6 and 855-86/1451-81). This move probably formed a part of the latter's not unfounded fears of tax evasion to repopulate his new capital. But after the Jews had been driven out of Spain in 1492, and out of Spanish possessions in Italy shortly afterwards, Bâyesîzî II invited them to settle in the Ottoman Empire. Many of these refugees were established in Selânik. A summary (igîma) register of 925/1519 records the presence of about 16,000 individuals; this figure included refugees from Germany and Italy as well.

The Jewish immigrants continued to use Spanish in visual commerce and, although a language was committed to writing, the Hebrew alphabet was employed. A small number of Judeo-Spanish speakers exists to the present day; but centuries' long isolation from Spain has resulted in many expressions archaic in standard Spanish. A number of Hebrew, Ottoman and Greek loanwords have also been incorporated, and at one time there existed a second more "literary" version of Judeao-Spanish, often called Ladino, which contained many expressions closely modelled on Spanish.

The new settlers engaged in the manufacture of woollen cloth, using water-powered fulling mills located outside the city. This manufacture of medium-quality cloth (îuka) supplied the market as well as the Janissaries. According to samples sent from Istanbul, the cloth was woven, dyed and fullled. Originally this service was paid for; but after the middle of the 10th/16th century, the Salonica Jews were required to pay part of their taxes in the shape of raw woolen cloth. Their supply of raw wool was ensured by the privilege of purchasing whatever they needed from Balkan producers before any other customers could be supplied. A rabbinical regulation, pronounced around 946-7/1540, threatened all Jews who exported raw wool and the indigo needed for dyeing with excommunication. However, the cloth manufacturers, prosperous in the 10th/16th century, ran into trouble thereafter. Raw wool prices increased, first because of Venetian demand, and when the Venetian woolen industry steeply declined after 1008/1600, French purchasers prevented a fall in prices. Civilian demand for the finished product also fell away as English cloth appeared on the Ottoman market in large quantities after the 990s/1580s. Due to the need to supply the Janissaries, the manufacturers were not able to change their trades. In consequence, a large number of Salonica Jews emigrated in the 11th/17th century; some went to other Rumelian towns, but the burgeoning Anatolian port of Izmir was a favourite destination.

Nevertheless, at the same time, immigrants continued to arrive, particularly from Livorno and other Italian commercial centres. Due to the contacts which these immigrants (Francois) brought with them, many of the most prosperous Jewish merchants of Selanik down to the 13th/19th century came from this group. But even though certain traders continued to be successful, on the whole Jewish merchants and financiers were eclipsed by other groups. An increasing orienta-
ing to regard Shabbatay Sebi as the Messiah led to the involvement of the Ottoman authorities, and Shabi was assigned to forced residence in Galibolu (1076-7/1666). But after continuing effervescence among Ottoman Jewish communities, Shabbatay Sebi was brought to the sultan's court in Edirne and offered the choice between death and conversion to Islam. He chose the latter (1077/1666). While some of his adherents returned to the established communities, others followed his example and were converted; this process continued over a number of years and led to the formation of a group known as the donum [q. v.] (today Donmeci) Dönemecis. Donmeci names and followers followed Muslim ritual including the pilgrimage to Mecca; but down into the present century, they married only among themselves and had the basic features of rabbinic law taught to their children. Certain well-known rabbis of Selanik who did not convert also retained sympathies for the movement of Shabbatay.

In the 12th/18th century, Selanik's trade expanded after a period of relative stagnation, as the port became the centre of a lively import and export trade, particularly with France and various Italian states. Foreign consuls and vice-consuls became more numerous (at the beginning of the century, the French consul had been the only foreign representative), and an increasing number of non-Muslim merchants purchased the "protection" of foreign consuls, often acquiring more or less fictitious positions as translators. In Istanbul administration, one of the key personalities was the principal customs farmer. Both the wealthy agbas of the area and European merchants maintained good relations with him, often lending money to a person of their confidence so that he could acquire the position. Another powerful figure was the commander of the local Janissaries, who controlled a force of about 7,000 men.

Among the goods exported, wheat occupied an important place, even though this was mostly contraband, agbas with çiftlik in the Macedonian countryside supplying the exporters. Grain speculation was widespread, landholders holding back supplies until prices had increased or else making deals with exporting merchants. Grain riots were not unknown. Raw wool often went to France, while cotton and cotton thread gained in importance with the growing mechanisation of communities in England, and also supplied looms in Germany. Tobacco and raisins were also exported. Imports consisted of manufactured goods, particularly French woolen fabrics, but also of Venetian silks, which all but monopolised the local market until, during the last quarter of the 12th/18th century, silks from Lyons became important. With the increasing production of coffee on the Caribbean islands, le café des iles began to compete with Arabian coffee, and sugar brought in by European merchants with Egyptian sugar.

For distribution, the pre-existing network of Balkan fairs was available, at which even rural consumers were able to purchase the cheaper imported goods. An active internal trade existed, linking Selanik with Izmir, Egypt, Crete and the Aegean islands. Soap, linens and citrus fruits were brought to the city from these areas, while luxury goods often came from Istanbul. Greek merchants were particularly active on the overland route linking Selanik to Vienna and the fair of Leipzig. Greek merchants, often based in Selanik, were so active in the Hapsburg Empire that Maria Theresa and Joseph II took measures to limit their business, forcing rich Greeks established in the Hapsburg domains to concentrate on banking. But due to the foreign "protection" which many wealthy merchants had acquired and to the resulting tax evasion, the payment of taxes and duties was often a heavy load on the "ordinary" Greeks of Salonica, and the community owed large sums of money to wealthy Ottomans.

The decline of Selanik as an international port toward the end of the 12th/18th century was due partly to political conflict within the city, but also to international conjunctures, as the revolutionary and Napoleonic wars interrupted established trade routes. The general downturn in the Ottoman economy during the last decades of the 12th/18th century probably constituted a contributing factor. The abandonment of the Janissary corps in 1241/June 1826 had political and economic repercussions on the local level; the Jewish accountant of the Janissary oğak was even one of the victims of anti-Janissary repression. The disappearance of the Janissaries led to the final eclipse of woolen cloth manufacture by Jewish artisans, and aggravated pauperisation.

In the course of the 13th/19th century, certain notables from the community developed an interest in the creation of new enterprises, particularly the processing of tobacco and later the manufacture of cigarettes. Due to the overall expansion of trade, the need for commercial employees with training in accounting and foreign languages also made itself felt. In the eyes of the notables it was necessary to train both a literate blue-collar workforce and specialist white-collar employees. This meant a thorough restructuring of the established Talmud-Torah schools, which down to this period had imparted basic literacy to boys only. Reform of the school system became a major bone of contention in the struggle for control of the community between the established rabbinical elite and the lay notables, a struggle not without its parallels in other Ottoman minority communities of the 13th/19th century. After 1276-7/1860, the notables were able to muster the support of the Alliance Israilite Universelle, an association based in France by which mainly francophone Jews supported French-language schooling among Jewish communities of the Mediterranean basin. The Alliance sponsored not only schools for both boys and girls, but also (no more than partially successful) efforts to apprentice children, in addition to a network of social organisations. In the early stages, the Alliance schools were also organised by the notables, but the schools were opened to students, and in the early 20th century, when the annexion of Selanik by Greece was increasingly viewed as a possibility, began to reach Modern Greek as well. The reports of the Alliance schoolteachers to their employers in Paris constitute a valuable source for the social history of late Ottoman Selanik.

At the beginning of the 20th century, Selanik was one of the centres of the Committee for Union and Progress (Ittihad ve Terakki Diyeti [q. v.]). The backbone of this group were officers frustrated by the manner in which the war against Macedonian rebels was conducted—in 1903 there had been a series of attacks against public buildings in Salonica itself. Mustafâ Kemâl (the later Atatürk), a native of Salonica but at the time stationed in Syria, visited his home town and helped found a branch of the Oğulmali Hurriyiet Dïyeti [q. v.]. This organisation, based on small cells, under the leadership of the Salonica telegraph official Ta'ifat Bey, expanded rapidly among officers and bureaucrats in Macedonia. Contacts were established with the İttihat ve Terakki exile group in Paris, but the Salonica group retained its political and organisational independence and played a key role in the events which led to the restoration of the Ottoman Constitution in 1908.

Around 1900, Selanik possessed one of the largest
concentrations of factory labour in the Ottoman Empire. Much of this labour force, particularly in the tobacco industry, was female, and consisted of teenage girls put to work by their families in order to earn their dowries. But among the male labourers, organisations midway between guilds and trade unions began to appear at this time. Particularly among the minority group of Bulgarian labourers, socialist tendencies showed themselves. A local group was recognised by the Second International. In 1909 Abraham Benaroya brought out a socialist paper in Ottoman (Ottoman Turkish title: 5amet e Gazetesi), Greek, Bulgarian and Judeo-Spanish. While the Ottoman and Greek versions soon had to be given up due to lack of reader interest, the Bulgarian and Judeo-Spanish versions did attract readers. Official repression followed, including Benaroya's banishment to Bulgaria (1911).

The Ottoman history of Selanik ended with the First Balkan War, which began with an occupation of northern Albania by Montenegro, followed by an ultimatum on the part of several Balkan states against the Ottoman Empire (October 1912). While the Bulgarian army advanced as far as Catalca on the outskirts of Istanbul, the Serbian and Greek armies entered Macedonia, with the Greeks occupying Selanik on 8 November 1912. The Ottoman government ceded Selanik in a peace treaty with Greece in March 1914, to the great distress of the city's Jewish population, whose spokesmen had strongly favoured the continuance of Ottoman rule. Salonica was rapidly transformed into a Greek city, particularly through emigration of the Turkish-speaking population, the reconstruction following the great fire of 1917 and the settlement of large numbers of Anatolian Greeks entering the country as a result of the Turco-Greek population exchanges of 1923.

cessors and his own views on affairs. Amongst the many official posts which he held were muhtesebegi of the Haramayn (till 988/1579); he was a davuddar; he was secretary of the silahddrs and then of the Sipahi [q.v.] (till 989/1589); in 999/1591 the Grand Vizier Ferhâd Paşa appointed him nizâmedji [q.v.]; he became muhâdelbegi of Anatolia (1007/1599); and shortly thereafter he disappears from recorded history.

The Ta'rihi Selanîki begins with events of 971/1563 and closes with the escape of the Vovode Kâsim from custody in Shaghâl 1008/May 1600, thus touching on four reigns up to that of Mehmed III. It is more a diary of events which came to the writer's notice than a formal chronicle, the composition of which he might have intended to do later. It becomes progressively more detailed from the end of Murâd III's reign (1003/1595). Rather than consulting other histories, Selanîki seems to have relied on his contacts with the leading men of state and on official documents from the Dîvân-i Humâyûn and elsewhere for his information; a feature of Selanîki's work is that he not only relates events but also includes criticisms of these events and of what he perceived as the general decline of the Ottoman state; the ups-and-downs of his own official career, with its frequent appointments and dismissals, may have affected his attitude here.

The History was partially printed at Istanbul in 1281/1664-5, but no complete, critical edition existed till that of Mehmet Ispîrilî, pp. LXXXV + 1,008, Istanbul 1869. Bibliography: Von Hammer,GOR, iii, 750, iv, 168, 181, 185d, 243, 435; Babinger, GOW, 136-7; Ispîrilî, Mustafa Selanîki and his History, in Ta'rihi Esittitü Dergisi, ix (1978), 417-72; IA, art. Selanîki (Bekir Kütûköçü).

Selinîki — Selim I

In official documents Selimâh, nicknamed Yavuz or the Grim, ninth Ottoman sultan (reigned from 7 Safar 918/24 April 1512 to 8 Shawwâl 926/21 September 1520), conqueror of eastern Asia Minor, Syria and Egypt, and the first Ottoman sultan entitled Khâdîm al-Haramayn al-Shârîfîn or Servitor of Mecca and Medina. The struggle for the throne, 1509-13.

To comprehend the circumstances and nature of the fierce struggle for the throne between Bâyazid's three sons Korkud, Ahmed and Selim, we have to keep in mind that Turco-Mongol peoples firmly believed that sovereignty was granted exclusively by God and no human arrangement could determine who is going to be next on the throne. In fact, when the throne became vacant, the prince who was able first to reach the capital city and take control of the treasury had the best chance to be recognised as ruler. So each of the sons of the reigning sultan tried to get the governorship nearest to Istanbul. Although respected as an intellectual versed in Islamic law and the fine arts, Korkud was thought to be less apt for an Ottoman ruler. Described as just and generous in Ottoman sources, Ahmed was at the beginning the most popular of the princes, and the many of the great men of state, including the Grand Vizier 'Ali and the 'ulmâ, wanted him to succeed. The youngest of the three princes, Selim was born in 875/1470-1 in Amasya from prince Bâyazid (Bâyazid II) and 'Aycî Khânî [q.v.], the son of Persia, who was the Kadîrâd ruler 'Ali al-Dawlâ. When the rivalry for the throne began in 1509, Ahmed was governor of Amasya, nearest to Istanbul while Korkud was the governor of the distant sanjak of Antalya and Selim that of Trebizond, the farthest of all.

In 1509 Bâyazid II [q.v.], an ailing old man, was believed incapable of leading the empire's armies against Shah Isma'îl of Persia, who had become a serious threat to the Ottomans, not only on the eastern frontiers of the empire but also within Anatolia through the activities there of his Turkoman sympathisers.

In 1507, the Shâh's invasion of the Dhu 'l-Kadr [q.v.] principality, during which he passed over the Ottoman lands and enrolled in his army Turkomans who were Ottoman subjects, was considered a daring act against the empire, and Shah Isma'îl's interventions motivated the Ottomans to avoid any open conflict, Selim from Trebizond took the initiative and in retaliation raided the Shâh's territory as far as Bayburd and Erzincan. In Istanbul, this was interpreted as insubordination and caused the first rift between the sultan and his son. While, by his submissive attitude, Prince Ahmed was favoured by the sultan and the Grand Vizier, Selim became the symbol of an aggressive policy. Selim, however, declared that his concern was not to secure the throne but to save the empire from the havoc in which it had fallen. Openly criticising his father's inactivity, he showed himself as a champion of the warfare against heretics as well as Christians. Already from Trebizond he had organised raids into the neighbouring Georgia. His ghazz activities, used as political propaganda, won him the favour of the Janissaries, the timarît Sipâhis and Akgâfs [q.v.] in Rumeli. It was the military campaigns that gave opportunity to these military classes to get promotion, more valuable timars or booty. In reality, for Selim this was a struggle for survival since his and his son Süleyman's lives would be at stake should one of his brothers become sultan. Since there was little chance for him to reach Istanbul when the throne became vacant, he insisted that his governorship be exchanged for one in Rumeli.

In this strategy, his first success was to secure the governorship of Kefe [q.v.] or Caffa for Süleyman (August 1509). When the news reached him that Bâyazid was ill and was prepared to abdicate in favour of prince Ahmed, Korkud and Selim suddenly left their seats, the former moving from Tekke to Manisa and the latter from Trebizond to Caffa. In fact, Bâyazid favoured Ahmed as his successor, and openly expressed this at a meeting. From Caffa, Selim insisted that he be appointed to a sanjak on the Danube, optimistically to fight against the 'unbelievers'. When this was denied, he crossed the Danube at the head of about 3,000 men and marched toward Adrianople (March 1511). 'Ali Paşa had the sultan declare Selim a rebel, and Bâyazid led an army of 15,000 to Adrianople, ordering at the same time all the Rumelian troops to join him there. At this juncture, one of the khedîfs of Shâh Isma'îl in Tekke [q.v.], taking advantage of the anarchical conditions in the empire, rose up with his forces from the Dhu 'l-Kadr and other followers and others, defeated the imperial troops sent against him (early March 1511). Korkud and Ahmed were held responsible for this critical situation, which strengthened further Selim's position. Under these conditions, Bâyazid eventually yielded and agreed to
give Selim the governorship of Semendere [q. v.] or Smederovo. The sultan also vowed that "while he was alive he would not allow any of his sons to replace him in the sultanate and said that, at his death, it will be God's decision who would succeed him." Believing that he had pacified Selim, Bayezid returned to Istanbul (24 August 1511). When Ahmed learned of the agreement between his father and Selim, he feared that Selim would become powerful enough to seize the throne, so he himself threatened to rebel in Anatolia. In Rumeli, Selim, trying to muster under his banner the troops of Rumeli at Eski-Zaora, heard that Bayezid and "Ali had actually decided to invite Ahmed to Istanbul and place him on the throne. But the Grand Vizier then had to cross in haste over to Anatolia, with 4,000 Janissaries (May 1511), in order to suppress Şah-Kulu, who was threatening to capture Bursa. Confident in eliminating Şah-Kulu, the Grand Vizier and Ahmed deliberated how, after victory, they would go to Istanbul and proclaim Ahmed sultan. Informed of this plan, Selim suddenly turned and occupied Adrianople (Rabbâ II 917/June 1511) at the head of the Rumelian army of 30,000, acting there as sultan. This was open rebellion, which could not be tolerated, and at the head of an army of 40,000 men and artillery, Bayezid hastened to confront his rebellious son on the battlefield near Çorlu (8 Dümâdâ II/3 August 1511). Selim, defeated, joined, his son Süleyman at Caffa. Almost at the same time, both "Ali Pasha and Şah-Kulu fell in a bloody combat in central Anatolia. With the death of the Grand Vizier, Ahmed lost his principal supporter for the sultanate. Ahmed now threatened to occupy Bursa with the Anatolian troops and to confront Selim. The empire was on the brink of a civil war. Ahmed's supporters pressed the sultan to invite him as soon as possible to Istanbul. However, the new Grand Vizier Hereke-oghlu Ahmed [q. v.] did not agree. Angry with Selim, the old sultan invited Ahmed to Istanbul, to march at the head of the army against Selim (26 Dümâdâ II 917/21 September 1511). But the Janissaries rebelled in favour of Selim, and the sultan had to yield, ordering Ahmed to return to his sandâk. Now in open rebellion, Ahmed occupied the governorship of Karaman, where the anti-Ottoman Turcoman tribes were promising their support. Pro-Safavîd Turcomans, now under the commander Nür-"Ali sent by the Şah (March 1512), rebelled in the Tokat-Sivas area and in the Taurus mountains. Passing over to Anatolia at the head of his army, Selim expelled Ahmed's son "Ali-al-Din from Bursa (15 Dümâdâ 918/29 July 1512) and moved to Ankara, from where his forces expelled Ahmed and his sons, who then fled to Şah Isma'îl for aid.

Now, in order to be able to confront the Şah in a major campaign in the east, Selim had to eliminate in his rear all possible rivals for the sultanate. Hence he ordered the execution of all of the five sons of his deceased brothers between the ages of 7 and 21 who had taken refuge in Bursa. Next, at the head of 10,000 men, Selim surprised his brother Korkud in his palace in Manisa, finally capturing and killing him. In the meantime, Ahmed had returned to Amasya, and in the winter of 1512-13, confronted Selim's army on the plain of Yenisehir (27 Muḥarram 919/15 April 1513). Ahmed was defeated, decimating the Shah's cavalry with salvos of fire, and routed the Rumelian divisions in mid-August 1514. The two armies met at the plain there (2 Radjab 920/23 August 1514); in a furious assault with his forty thousand heavy cavalry, the Şah overpowered the "âzeqs, Ottoman light infantry in the first line, and routed the Rumelian divisions on the left wing of the Ottoman army, then turning, attacked the centre where Selim was standing with his Janissaries. The stiff resistance of the Janissaries, decimating the Şah's cavalry with salvos of fire, and the war chariots tied with chains forming an impregnable stronghold, determined the outcome of the battle. Wounded by a bullet, the Şah barely escaped capture. His defeat has been attributed to a lack of fire-proofs in his army (the earliest reference to his possession of muskets dates back to the year 1515: TKSA 6320; Tansel 88). After the victory, Selim's plan was to pass the winter at Karabagl and to resume the campaign against the Şah next spring (for faṭḥ-nâmes, see Ferîdûn, i, 386-9; Ibn Tulûn, ii,
But the insurgent Janissaries forced the sultan to return to Istanbul (for the Shah's embassies to Selim after Câldîrân and his attempts to find allies against the Ottomans, declared the Shah's sultan and Mâri, the son of the former ruler of the Dhu 'l-Kadrids). On 15 Radjab 920/5 September 1515, Selim entered Tabriz. After nine days, he left the city, taking with him about one thousand citizens, artists, artisans and rich merchants for Istanbul. On his way back to Amasya, where he spent the winter, Selim annexed the cities of Bayburd, Erzincan, Karahisar and Canik.

One important consequence of the Ottoman victory was the Turkish conquest of all of the Shah's possessions in eastern Asia Minor, from Erzincan southwards to Diyarbakr and northern 'Irak. The Kizîlbâşh fortress of Kemâh (see KEMAKH), a key stronghold on the crossroads of Erzincan and the Euphrates valley was taken by Selim on 5 Rabî' al-Awal 921/19 May 1515. The Shah's Kizîlbâsh Turcoman governors and garrison commanders put up a stiff resistance to the Ottomans, while most of the Sunnî Kurdish beys, who under the Kizîlbâsh domination had lost their hereditary patrimonies, submitted. Through the activities of Idrîs Bîldî (q.v.), a former Ak Koyunlu state secretary with close acquaintance of the Kurdish beys, Selim followed a conciliatory policy to avoid these Kurdish lords to his side, recognising with official diplomas their hereditary rights. Idrîs's list of the submitted Kurdish lords included those of Soran, 'Îmâmîyye and Bukhtî, who now began to attack the Persians and their allies. In the same regions, the Ak Koyunlu princes expelled by Ismâ'îl also cooperated with the Ottomans. The population of Diyarbakr rose against the Shah, offering submission to Selim and appealing to him for aid, which he was only able to provide after the campaign against the Dhu 'l-Kadrids (summer 1515) under the able command of Bîlîklî Mehmed Paşa (q.v.), who entered Diyarbakr in Şâh'hân 921/mid-September 1515. Following Bîlîklî's unsuccessful siege of Mârdîn (q.v.), the Persian forces came back and besieged Diyarbakr; Ottoman control over the Diyarbakr region was only achieved after Bîlîklî, reinforced with the army of Anatolia, had won a decisive victory over the Turcomans at Kargan-Dede. Thereupon, the fortresses of Ergani, Sinjâr, Cermik and Birecik surrendered, although it had become commercially dependent on the Bursa market, while it had become evident that the Mamlûks were powerless to protect Arab merchants in their trade with India against the Portuguese, who now were in the Red Sea threatening to capture Mecca and Medina. In 1510 Kânsûh himself had appealed to the sultan for aid to build a fleet at Suez, and Ottoman experts and mercenaries (see kûnî) were already in Suez. Dîjânberdî Ghazâlî, governor of Damascus, both established secret relations with the Ottomans, and later, Selim won over by promises of rewards many other Mamlûks with promises of employment in the future Ottoman administration.

The Mamlûks feared that the Ottomans were going to invade Egypt from the sea. In fact, Ottoman activities for the construction of new warships at arsenals were intensified in 1513. Always declaring that his preparations were aimed at the heretic Shah, Selim claimed that by allying himself with Ismâ'îl, Kânsûh was attempting to impede the Ottoman sultan in his efforts to extirpate heresy in Persia. The fatwa sought by Selim to legitimise his campaign against this Sunni Muslim ruler laid emphasis on Mamlûk oppression and injustices committed against Muslims. Kânsûh countered that the Ottoman sultan was using Christian soldiers in his army against Muslims. Upon Kânsûh's formal demand for the evacuation of Dhu 'l-Kadrid territory by the Ottomans, war was declared. Selim entered Mamlûk territory in Malatya (end of July 1516), and the two armies confronted each other at the plain of Mardj Dâbik (q.v.) 40 km north of Aleppo on 25 Radjab 922/24 August 1516.

Here, too, the Ottoman waggonberg tactics with the 300 chained war chariots and Ottoman superiority in firearms determined the outcome of the battle. Kânsûh was among the dead. Khâılır Bey surrendered Aleppo and served the Ottomans faithfully, dying as Ottoman governor of Egypt in 1522. Selim left Aleppo after eighteen days, and reached Damascus on 1 Ramadan 922/28 September 1516, where he spent the winter months. Although his viziers were not in favour of a campaign against Egypt, Selim was urged on by KhâİR Bey and other Arab beys against the newly-elected Mamlûk sultan, Tûmânâbây, and he ordered preparations for the invasion of Egypt. An order was sent to Istanbul for the imperial fleet's departure for Egypt. The crucial problem was how to get the Ottoman army through the Sinai desert to Egypt, and to provide a water supply, 30,000 water bags carried by 15,000 camels were prepared. Declaring his decision to take all Muslim lands under his protection, Selim invited Tûmânâbây to recognise him as his suzerain, but this was naturally refused. In the end, Selim captured the town of Qalâzah against the Mamlûk forces under Dîjânberdî (27 Dhu 'l-Ka'da' 922/21 December 1516). Leading Bedouin chiefs submitted to Selim. To confront the Ottoman army, Tûmânâbây had prepared a strong line of defence reinforced with artillery and ditches at-
Raydāniyya. On 29 Dhū 'l-Hijjah 922/22 January 1517, while his main forces attacked in front, Selim surprised the Mamluks by circumventing Tūmān-bāy's fortified encampment. In the first hours of the combat, the vehemence of the attack on the heavy Mamluk cavalry shook the Ottoman lines. But here, too, the outcome of the battle was determined by Ottoman superiority in fire-arms, foiling Mamluk cavalry attacks. The first Ottoman forces entered Cairo on 3 Muharram 923/26 January 1517. Tūmān-bāy and those Circassians who were able to escape resumed fighting in the streets of Cairo, refusing an offer of aman [q. v.] by Selim. Tūmān-bāy mustered his troops on the west bank of the Nile, until Selim decided to cross the Nile and crush resistance. Tūmān-bāy was captured and executed (15 April 1517). The Cairo forces recognised Selim as their legitimate ruler, but only when he believed it was safe did he enter the city (23 Muharram 923/15 February 1517). In the clashes in Cairo and outside the city, the number of Circassians killed or executed was estimated at 50,000 to 60,000 (see ūsūl-nāmeh in Ferīdūn, i, 427-49; Ibn Ṭūlūn, ii, 44-7).

Following the fall of the Mamlūk sultanate, the independent Arab lands, including the Şarifs of Mecca and the Yemen, recognised Selim. Selim appointed Khaʾīr Bey as Ottoman governor of Egypt, who succeeded in reconciling the remaining Mamlūk and Arab shaykhs with the Ottoman administration. Before his departure from Cairo on 26 Şaʿbān 923/13 September 1517, Selim sent by sea to Amasya, who were thought “to cause trouble”, including the last ʿAbbāsid caliph al-Mutawakkil and many artisans. During long stays in Damascus and in Aleppo, he busied himself with organising Syria as a typical Ottoman province. He appointed governors and surveyors to register the population and revenues. He appointed Dānjberdi governor of al-Šāhām (5 Safar 924/16 February 1518), and Nāṣir al-Dīn Muhammad Ibn al-Hanāgh was appointed Khaʾīr Bey as Ottoman governor in Damascus. Selim's name was mentioned in contemporary Arab and Persian sources, including the titles of amīr, amīr al-Muḥāsin, and amīr al-Hāshimyyah, and assumed their title of Khalīfah al-Ḥaramayn al-Sharīfayn. The historian Ibn Ṭūlūn witnessed this at a Friday khaba in Damascus. Selim's name was mentioned with the titles of al-Imām al-ʿādil and of Sulṭān al-Ḥaramayn al-Sharīfayn. But no contemporary source has confirmed the alleged account that, in a ceremony, al-Mutawakkil officially transferred his caliphal rights to Selim. In contemporary Arab sources, al-Mutawakkil is always mentioned as al-Khaʾīfah, Amīr al-Muṭawakkil, and Amīr al-Sharīf, and his death is recorded as Mālik al-Rūm (in 926/1519; Ibn Ṭūlūn, ii, 78, 91). According to the tradition and the interpretation of the īlāna, the Mamlūk sultan or Selim himself could not claim to replace al-Mutawakkil because they did not descend from the Prophet's tribe Kuraŷš. However, as successor to the last Mamlūk sultan, Selim claimed primacy in the Islamic world; in a letter to the Shīr-wānah [q. v.] he claimed that God had charged him to fight against heresy, to bring order to the true laws of Islam and to protect the pilgrimage routes for Muslims (Ferīdūn, i, 439-45). At a time when the Portuguese had entered the Red Sea and were threatening possibly to capture Mecca and Medina, the protection of Islam had become a crucial issue for all Muslims and the Arabs in particular. Presenting themselves as the “foremost of ẓahīzīn” Selim, and his successor Süleymān, claimed to be the protectors of all Muslims in the world. In 1526, the latter used the title wārīr al-ṣilfīs al-kubrā “inheritor of the supreme caliphate”.

At the time when developments in the east kept him busy, Selim was careful to maintain peace with Christian nations in the west, in particular with Venice and Hungary. On 17 September 1517 he renewed the Venetian capitulations in Cairo, with the additional stipulation that the Venetian tribute to the Mamlūks of 8,000 gold ducats for Cyprus was to be paid thereby to the Ottoman sultan. Selim's diplomacy toward Christian nations was altogether successful; but Pope Leo X's increased efforts to organise a European crusade, and the Şāh's and Kansū's diplomatic relations with Western states against the Ottomans, did not in the end result in any hostile activity (K. M. Setton, The Papacy and the Le- vant, ii, 135-45, 168).

The outbreak of a new Kızılbaš Turcoman rebellion in the Amasya province in the spring of 1519 under a dervish called Djelāl, declaring himself Şāh Weli and a Mahdī [q. v.], showed that Şāh Ismāʾīl was still the principal threat to the empire. The rebellion was suppressed with difficulty (April 1519). At the time of his accession to the throne, Selim was advised to make the conquest of the islands of Rhodes and Chios one of his most urgent tasks. In 1519 extraordinary naval preparations, the construction of one hundred galleys, were believed in Venice to be the signal of a campaign against Rhodes (von Hammer, iv, 247-9). But the following year, Selim died on his way from Istanbul to Edirne near Ćoroš on 8 Shawwāl 926/21 September 1520. His only son Süleymān [q. v.] succeeded him without difficulty.

Well-educated, the author of a collection of poems in Persian, an admirer of Muḥyī al-Dīn Ibn al-ʿArabī [q. v.], Selim was at the same time an uncomprising autocrat, and a quick-tempered, merciless man.

SELIM I — SELIM II

SELIM II, the eleventh Ottoman sultan (r. 974-82/1566-74), the third son and the fourth of the six children of Kanuni Süleyman I and Khurrem Sultan [q.v.]. He was born in Istanbul on 26 Radjab 930/30 May 1524, during the festivities accompanying the marriage of Süleyman's sister Roxelana to Bahlil Paşa [q. v.]. Together with his elder half-brother Mehemd and his elder brother Mehemd, Selim was one of the three princes in whose honour was held the sünet dünign (circumcision feast) of 1530, one of the major dynastic spectacles of Süleyman's reign. He remained in Istanbul until appointed in 1542, at the age of 18, to his first provincial post in Konya as sanjak-begi of Şahsavan, to his first provincial post in Konya as sanjak-begi of Şahsavan, in 951/1544, following his brother Mehmed's death, Selim was transferred to the latter's more prestigious sanjak of Şarkhan [q.v.] at Manisa, remaining there until his transfer back to Konya in 1558. In 955/1548 Selim was temporarily assigned to Edirne to guard the European front, whilst Süleyman was on campaign in the east against Safavid Persia. Following the deaths in 960/1553 of Mustafa and another brother Djehingir, Selim and his younger brother Bayezid were the only surviving sons of Süleyman. On the death of their mother Khurrem in 966/1559, forcing Bayezid to take refuge in Persia. After lengthy negotiations between Süleyman and Shah Tahmasp I [q.v.], Selim defeated Bayezid's provincial forces at the battle of 966/1559, forcing Bayezid to take refuge in Persia. With the aid of troops sent by Süleyman and Shah Tahmasp I [q.v.], Bayezid and his sons were assassinated, and their father Mehemd, Sultan Selim defeated the princely Szëk of Şarkhan [q.v.] at Manisa, remaining there until his transfer back to Konya in 1558. In 955/1548 Selim was temporarily assigned to Edirne to guard the European front, whilst Süleyman was on campaign in the east against Safavid Persia. Following the deaths in 960/1553 of Mustafa and another brother Djehingir, Selim and his younger brother Bayezid were the only surviving sons of Süleyman. On the death of their mother Khurrem in 966/1559, forcing Bayezid to take refuge in Persia. After lengthy negotiations between Süleyman and Shah Tahmasp I [q.v.], Selim defeated Bayezid's provincial forces at the battle of 966/1559, forcing Bayezid to take refuge in Persia. With the aid of troops sent by Süleyman and Shah Tahmasp I [q.v.], Bayezid and his sons were assassinated, and their father Mehemd, Sultan Selimdefeated the princely Szëk of Şarkhan [q.v.] at Manisa, remaining there until his transfer back to Konya in 1558. In 955/1548 Selim was temporarily assigned to Edirne to guard the European front, whilst Süleyman was on campaign in the east against Safavid Persia. Following the deaths in 960/1553 of Mustafa and another brother Djehingir, Selim and his younger brother Bayezid were the only surviving sons of Süleyman. On the death of their mother Khurrem in 966/1559, forcing Bayezid to take refuge in Persia. With the aid of troops sent by Süleyman and Shah Tahmasp I [q.v.], Bayezid and his sons were assassinated, and their father Mehemd, Sultan Selimdefeated the princely Szëk of Şarkhan [q.v.] at Manisa, remaining there until his transfer back to Konya in 1558. In 955/1548 Selim was temporarily assigned to Edirne to guard the European front, whilst Süleyman was on campaign in the east against Safavid Persia. Following the deaths in 960/1553 of Mustafa and another brother Djehingir, Selim and his younger brother Bayezid were the only surviving sons of Süleyman. On the death of their mother Khurrem in 966/1559, forcing Bayezid to take refuge in Persia. After lengthy negotiations between Süleyman and Shah Tahmasp I [q.v.], Selim defeated Bayezid's provincial forces at the battle of 966/1559, forcing Bayezid to take refuge in Persia.
tion in the extreme north and south of the empire replaced the prominence given in Suleyman's reign to the extreme north and south of the empire. Replacing the prominence given in Suleyman's reign to the extreme north and south of the empire, Selim's childhood entourage included many individuals such as Abu Bakr Ratib Efendi and many others, the historian Mustafa Ali (although no diary of his survives), and a discriminating patron of, amongst others, the historian Mustafa Ali, the poet Baki (q.v.), and the gahnamoglu Lokman (see e.g. F. Çağman, Şahname-i Selim Han ve miniatürleri, in Sanat tarihi yiliği, v [1972-3], 411-43). He was the first Ottoman sultan to honour members of the 'ulumâ' with accession donatives. Among his major architectural projects were the repair of the Mecca water supply system and the re-roofing of the great mosque, the addition of two minarets and extra buttresses to the Aya Sofya mosque, and the building of a canal between the rivers Don and Volga (1566-70), and against Zaydi threats to Ottoman control in 1569-70. The weather conditions, unrest amongst the troops involved, and over-extended lines of communication led to the abandonment of the project with only a third of the canal excavated (cf. H. Inalcik, The origins of the Ottoman-Russian rivalry and the Don-Volga canal, in Annales de l'Univ. d'Ankara, 386b; SelanikT, ed. M. Ipşiri, Istanbul 1283, i, 43-98. 2. Further Ottoman sources, published documents, and secondary works other than those cited in the text are given in §. Turan, IA, art. SELIM II. See also C. H. Fleischer, Bureaucrat and intellectual in the Ottoman empire (1541-1600), Princeton 1986, esp. 33-9; M. T. Gökkâlbîn, IA, art. Mehmed Paşa, Sokollu; J.-L. BacquÈ-Grammont, in R. Mantran (ed.), Histoire de l'Europe ottomane, Paris 1989, 155-8 and also index. For additional bibl., see S. J. Shaw, History of the Ottoman empire and modern Turkey, Cambridge 1976, i, 318-19. 3. SELIM III, the twenty-eighth sultan of the Ottoman empire (1203-22/1789-1807), first son of Mustafa III and grandson of Ahmed III (q.v.), was born in Istanbul on 27 Dümâdâl I 1175/24 December 1761. Considered one of the ablest of the 18th century sultans, Selim III's early upbringing may account for his later perspicacity in reforming the empire. His father's more liberal outlook allowed Selim considerable freedom of action, including the observatory complex by the architect Sinan (q.v.) in Edirne. SEHBÔ, Istanbul 1283, i, 438-504. The most ambitious project of Selim's reign, the building of a canal between the rivers Don and Volga (attempted 1569-70), was unsuccessful. It was promoted by Sokollu Mehmed Paşa with the three-fold object of protecting the pilgrimage route from Central Asia, of curtailing the southward advance of Muscovy (which had captured Kazan in 1552 and Astrakhan in 1556), and of establishing the potential to attack Persia from the north. It would also have served to extend Ottoman control over the khans of the Crimea. Adverse weather conditions, unrest amongst the troops involved, and over-extended lines of communication led to the abandonment of the project with only a third of the canal excavated (cf. H. Inalcik, The origin of the Ottoman-Russian rivalry and the Don-Volga canal (1569), in Annales de l'Université d'Ankara, i [1946-7], 47-110). Selim II died aged 50 on 28 Şa'bân 982/13 December 1574 in Istanbul (the first sultan to die there) following a fall in the palace hamnamâ, and was succeeded by Murâd III (982-1003/1574-95 [q.v.]), his eldest son by his Venetian hahsef Nûr Bânû (q.v.). Five younger sons were executed and buried with him in the courtyard of the Aya Sofya mosque. Three daughters were married to prominent viziers in a triple wedding in 1566: Ismâkhân to Sokollu Mehmed Paşa, Gewherkhan to Piâyê Paşa, and Şehb to Hasan Paşa (re-married later to Dâl Mahmûd Paşa). This network of dâmâd (son-in-law) connec-

Gouffier encouraged Selim to correspond with Louis XVI, letters which demonstrate his powerful anti-Russian sentiments and wish for revenge. Choiseul-Gouffier supported the sending of Ishak Bey, one of Selim’s companions, to France, in an effort to encourage the French link with the Ottoman heir-apparent.

On 11 Rajab 1203/7 April 1789, at the age of 27, Selim III was proclaimed Sultan, ascending the throne at one of the most difficult moments in the history of the dynasty, succeeding to an empire at war with both Russia and Austria and riven by internal rebellions. The previous autumn, the Russians had made deep inroads into Ottoman territory, capturing Khotin [q.v.] on 9 September and routing the Ottoman army at Slatina later that same month. In spite of the evidence of Ottoman military exhaustion, Selim vigorously supported the war effort, immediately confirming Khodja Yusuf Paşa in his position as Grand Vizier and Commander-in-Chief of the battlefield, glorifying past Ottoman successes, reinstating the ace-in-the-hole, the Fantazis [see FAYZ], which had lapsed with ‘Abd al-Hamid I, and generally boasting the morale of his people (Enwerl; Shaw, 32).

Khodja Yusuf, the bellicose initiator of the war, had demonstrated some success in maintaining the Ottoman position on the southern shores of the Danube, and in winning the loyalty of his soldiers, in spite of the Ottoman losses. He was opposed by Djeza’irli Ghazi Hasan Paşa [q.v.], sole hero of the 1770 Češme [q.v.] naval disaster, reformer, reformer, of the war, and Grand Admiral of the Navy upon Selim’s accession. Selim replaced the experienced admirals Hasan with his boyhood friend Küçük Hüseyin Paşa, ordering Hasan to command the fortress of Ismā’īl [q.v.] in an effort to recapture Özü [see ÖZ], placating the advocates for continuing the war, consolidating his own power base, and managing to maintain the services of a valued commander. The new campaign season proved a disaster, however, culminating in the battle of Martinesti on 22 September 1789 against combined Austrian and Russian forces, a total rout for the Ottomans. Thereafter, the Austrians occupied Belgrade [q.v.] and Bucharest [see BUREST], and the Russians Ak Kirman [q.v.] and Bender [q.v.].

An Ottoman treaty with Sweden to distract Russia, which was concluded on 11 July 1789, resulted in little, but it is noteworthy. From 14 January 1790, and the death of Joseph II of Austria and Austria, the threat posed by the Napoleonic invasion of Egypt, a second regiment was installed in the new Selimie barracks in Uskudar, a force drawn largely from the unemployed of the streets of Istanbul, and Turkish peasants from Anatolian villages, whose enlistment was encouraged by high salaries and tax exemptions. By 1801, the force numbered 9,263 men and 27 of officers and men, attached to the old imperial Bostandi corps [q.v.], as its riflemen branch. By 1800, as a result of the threat posed by the Napoleonic invasion of Egypt, a second regiment was installed in the new Selimie barracks in Uskudar, a force drawn largely from the unemployed of the streets of Istanbul, and Turkish peasants from Anatolian villages, whose enlistment was encouraged by high salaries and tax exemptions. By 1801, the force numbered 9,263 men and 27 officers, increasing to three regiments and almost 23,000 by the end of Selim’s reign (Shaw, 131-4). During the 1798-1801 confrontations with France in Egypt and against ‘Olmam Paswan-oglu [see PASWAN-OGHLU] of Vidin [q.v.], the new army was put to the test. The result was encouraging, with some small successes, hampered always by the refusal of the Janissaries to serve with them. Reform in the navy was more successful, under the direction of Grand Admiral Küçük Huseyn Paşa, who saw to the construction of new warships and technical schools during the same period.

To finance his reorganisation of the military and
navy, Selim established the İrad-i Djedid, a new attempt at a centralised budget, with revenues from state tax farms set aside for its use. At the same time, vacant, absentee or poorly managed military fiefs of the less distant provincial timar system were seized and revenues from them added to the new treasury. While significant revenue was generated, the provincial upheaval such measures induced exacerbated the growing disaffection of local notables, one of the significant causes of Selim's downfall.

The War of the Triple Alliance (1799-1802) pitted the Ottomans against Napoleon, and forced a reluctant Selim into agreements with Britain and Russia to counter the French invasion of Egypt. During these confrontations, the sultan was forced to rely on the private armies of local notables such as Ahmad Dizazdar Pasha [q.v.] in Acre [see 'AKKA] and Sider [see ŞAYDA], Ali Pasha of Yanina and Oğlu Musa Paswan oglulu, which both extended their power and increased the privations of the countryside, especially in the Balkans. The Treaty of Amiens in 1801, negotiated without an Ottoman presence, so angered the sultan that he signed a separate peace with France on 25 June 1802, restoring that country to all its pre-war privileges and ignoring the question of war indemnities which both Russia and Britain were demanding.

Peace, however, meant the renewal of internal revolt, often encouraged by the empire's erstwhile allies, especially the Russians, who had made tremendous gains in the Treaty of Amiens. A serious revolt in Serbia against Janissary and the auxiliary Yamak abuses broke out in 1802, developing rapidly into a revolution under the leadership of Kara George after 1804, and influencing much of the diplomatic manoeuvring of the period. War between France and England broke out again in 1803, and intense diplomatic pressure by the resurrected Anglo-Russian alliance in Istanbul forced Selim to sever relations with France in 1805. Further French victories over the European allies, however, persuaded Selim to grant formal recognition to the emperor in 1806, and to declare war on Russia in December after the Tsar ordered the occupation of the Principalities and was continuing to support the Serbian rebellion. Britain sent warships through the Dardanelles [see GHALATA in Suppl.], and friend and patron of Shâykh Ghâlib Dede [q.v.], the well-known poet-mystic and partisan of the reform programme of the young sultan. Aside from the new buildings constructed for the Nizâm-i Djedid, Selim completely restored the mosque of Fâhih.

**Bibliography:** The Taşrih of Wâsîf as well as those of Enveri and Aşım Aymed [q.v.] form the chief historical sources on Selim's reign. For general information on the period of Selim III, see the work of one of his advisors, Mouradgea d'Ohsson, Tableau de l'empire ottoman, Paris 1788-1820. The diary kept by his private secretary, Ahmed Efendi, from 1791-1807, is a unique source by an individual who accompanied Selim almost everywhere. III. Selim in Sırkâşî Ahmed Efendi tarafindan tutulan rövâne, Ankara 1993; Abû Bakr Râhî, Şahîd Selim’in Veliahtları, Istanbul 1873; E. BOGHAZI [see ŞAHÎD], a last moment of victory and accord between the sultan and his people. The British fleet occupied Alexandria in 1807, but found that Muham- mad Âli Pasha [q.v.], governor of Egypt since 1805, had subdued the Mamlûks [q.v.], forcing the British to head back home.

Selim's failure to create a broad coalition of supporters for his reform agenda, however, finally overwhelmed him. A general call to arms for Nizâm-i Djedid troops in March 1805 had precipitated an open revolt among the Yamaks in the Balkans, bringing the final series of confrontations between the traditional forces and Selim's reformers. Quelled temporarily by Selim's capitulation to the conservatives, the rebellion moved to Istanbul in May 1807, when another attempt to force new uniforms on the unruly Yamaks stationed on the Bosphorus incurred an open call for Selim's removal, a conspiracy spearheaded from the palace itself by the Kâ'âm-înâm(140,657),(274,689) Mûâs Paşa and the Şâykh al-Islâm 'Atâ’ Allah Efendi. The janissaries joined in the revolt, forcing Selim to abandon the Nizâm-i Djedid programme and sacrifice its architects and partisans to their demands, rather than testing the mettle of the new troops, who were confi- scated to their officers. Selim himself was deposed on 92 Rabî’ I 1222/29 May 1807 and as he boarded the Inkerman, he had his eldest son replaced by Muștafa IV [q.v.], eldest son of 'Abd al-Hamîd I. Retiring into the palace, he was executed by Muștafa a year later on 4 Dümâdâd II/28 July 1808 during the attempt by Muștafa Bayrakdar Pasha [q.v. of Rusuk] and the Grand Vizier Çelebi Muștafa Paşa [q.v.] to rescue and restore him to the throne. In the confusion, Mahmûd, brother of Muștafa IV, escaped the same fate as Selim, and was brought out of hiding by Muștafa Bayrakdar at Mahmûd II [q.v.], proving later to be an apt student of his cousin in the matter of reform.

While it is generally conceded that Selim faltered in the matter of leadership and continuity, changing Grand Viziers ten times in the course of his reign, he inaugurated a process of reform which could no longer be halted if the Empire was to survive. Other initiatives included his attempts before France to win the support of prominent Ottoman ambassadors to Europe, to London in 1793 and Berlin, Vienna and Paris in 1795, an avenue for information on European affairs, although diplomacy of the period continued to be conducted largely by the influential foreign presence in Istanbul (Kuran). A notable poet and musician, many of Selim's compositions are still performed. He was a frequent visitor to the Mawlawîyya [q.v.] tekke in Galata [see QALATA in Suppl.], and friend and patron of Shâykh Ghâlib Dede [q.v.], the well-known poet-mystic and partisan of the reform programme of the young sultan. Aside from the new buildings constructed for the Nizâm-i Djedid, Selim completely restored the mosque of Fâhih.
In his childhood he lost his father and was committed to the care of Mirzah Agla, of the Ablan family. At the same time, Adil Giray tried to kill him, but Selim sought refuge among the Shem family and escaped being killed. In 1671 he became the Khan of the Crimean Tatars. The Tatars living in Poland asked Selim for protection and help to settle in the Budjak [q. v.] region, i.e., southern Bessarabia. Their request was not granted by the Ottoman authorities and Sultan Mehmed IV called upon Selim to help in the battle for Kamanica [q. v.] (Kamyanitsa), as a result of which the Polish army was defeated. Soon Selim was again summoned to war against Tatar and later a siege. Kamaniita and nearby fortresses were conquered by the Muslims. After the fighting, Selim became the mediator in peace negotiations between Poland and the sultan; then he fought against Russia and Poland for possession of the fortress of Chirin, but after his failure here, the sultan accused him of ineffectualness, and he was deprived of power and deported to the island of Rhodes. In 1684 Selim was again raised to the throne of the Khans of Crimea in Bakhchisaray because of the ineffectiveness of Hadjigiri I, who had reigned before. During this time, the Russians approached the Crimean territory and surrounded fortresses situated on the shores of the Sea of Azov and the Black Sea. Selim defeated superior Russian forces, preventing the Russians from entering the Crimea. In 1689 Selim was called upon to help Turkey in the war against Austria, and the Muslim forces won a battle near Skopje. In 1691, after receiving the information that Polish and Russian forces were about to attack, and after being informed of his son's death, Selim abdicated the throne.

He then went on the pilgrimage to Mecca and obtained the honorific title of Haidigiri. The sultan assigned him estates at Silivri. Due to the efforts of the nobles of the Giray dynasty, faced with a rebellion of Tatar troops, in 1692 Selim was appointed to the throne for the third time. At that time, the war against Russia and Austria started. In 1695 Peter I launched an expedition against the Crimea, and in 1696 the Russians conquered the fortress of Azov. Because of that Selim could not properly help the sultan in his war against Austria. He was a signatory to the 1689 peace treaty between Karlowitz (Karlovasi) on the Danube. By virtue of this treaty, the Crimea obtained independence, and was relieved of paying tribute to the sultans. In the same year, 1699, Selim, by now very old, abdicated in his son Dewlet Giray's favor, and the sultan awarded Selim a pension of 8,000 gold coins per year. Intrigues at the sultan's court and the necessity of pacifying the rebellious Tatars led to Dewlet Giray's deethronement and Selim was for the fourth time appointed to the throne of the Crimean in 1702; but, after a short reign, died in December 1704 and was buried in Bakhchisaray. During his occupancy with state affairs, he was interested in literature and the sciences, and left behind a precious library.

SELIMAN RE'IS (d. 923/1527), a Turkish mariner and naval commander in the Red Sea and Indian Ocean.

famous seaman, Khayr al-Din [q. v.], he became active as a corsair in the Central Mediterranean (J.-L. Bacqué-Grannont and Anne Kroell, Mamlouks, Ottomans and Portugeois en Mer Rouge. L'Affaire de Djidja en 1517, Cairo 1988, 76). At an unspecified date (at the latest in 1514) he entered the service of the Mamluk sultan Khansaw al-Ghawri [q. v.] who was endeavouring to resist the recently-arrived Portuguese in the Indian Ocean. This may have happened in the framework of Ottoman suzerainty to Egypt, well-documented between 1507 and 1514. This ceased, however, by July 1514, the year in which the Mamluk sultan launched a major campaign to build up the Turkish arsenal and fleet in Suez, with Selman Re'i's as its director and commander of 2,000 mercenaries or marines (Ibn Iyās, Badī'āt al-zubār fī vāsīṭāt al-duhār, ed. M. Muṣṭafā, Cairo 1960, iv, 466-7; Bacquè-Grannont, ep. cit., 5). Under what seems to have been a joint command of Selman Re'i's and Husayn al-Kurdi, this new fleet sailed late in 921/1515 on a campaign launched partly in response to the appeals of Mu'azzar Shah II of Gudjarat [q. v.], and which was thus meant to be the first Mamluk expedition against the Portuguese in the Indian Ocean, however, the expedition concentrated on building a stronghold on the Red Sea island of Kamarān [q. v.], near the Bāb al-Mandāb [q. v.] against an expected Portuguese irruption into the Red Sea and on operations in Yemen, culminating in a siege of Aden or 'Adan [q. v.] held by the governor of the ruler of Zabīd (Bacquè-Grannont, 8). The siege failed, and Selman Re'i's withdrew to Dji'dja [q. v.] in anticipation of a Portuguese attack on that port. Meanwhile, the Ottoman sultan had conquered Egypt, and immediately after his triumph he summoned Selman to appear before him in Cairo. In a reply dated 25 Rabi'i I 923/17 April 1517, the Turkish captain pleaded for a delay on the grounds that he could not in good conscience leave the port just as the infidel was going to attack and while the inhabitants were beseeching him to defend them. A minimal note added one day later states that the attack has occurred, Selman has repulsed it, but that it might be renewed and he still cannot leave under these circumstances (S. Tekindag, Süveys'te Türkler ve Selman Re'is'in anması, in Belgeterle Türk Tarhi Dergisi, ix [1968], 77-80; the same document published by M. Yakub Mugul, in Belgeter, ii/5-4 [1967], 465-70).

The events of the next several months are of crucial importance not only for our understanding of Selman's career, but also for our interpretation of the Ottoman sultan’s attitude towards the struggle against the Portuguese and towards the more specific place the defence of Islam’s sanctuaries received in Selim’s mind. Lopo Suares, the Portuguese viceroy of India, withdrew with his fleet by the end of April 1517, but Selman was present in the sultan's hand only on 18 Shawal 923/28 August 1517 (Feritbīn Beg, Mushe'tt, i, 491). He seems at this point to have suffered arrest and imprisonment in Cairo and Damascus.

Eventually pardoned, Selman Re'i's returned from Istanbul to Suez, which now was the base of what would become the “Ottoman Indian Ocean Fleet” and of which he may have been the first commander. The fleet accomplished little in the period of his tenure. In 1525, after an undetermined rupture between the Bāb al-Mandāb strait, a second attempt was made to seize Aden, but a report that a Portuguese fleet was approaching persuaded the Turks to raise the siege and sail back.

These failures may have been due to the low priori-
ty which the Ottoman government attached to the Suez base and fleet. This policy contradicts Selman’s own efforts to alert Istanbul to the challenges from the Portuguese and possibilities in the Indian Ocean; his efforts received an eloquent expressional support from Æliyha or memory duhup da’dul 10 Shab‘a 931/2 June 1525 (Topkapı Palace archive, N.E. 6455; see M. Lesure, Un document ottoman sur l’Inde portugaise et les pays de la Mer Rouge, in Mare luso-indicum, iii [1976], 137-60).

Although anonymous, the report’s internal evidence strongly argues for Selman’s authorship. It is an analysis of the strength of the Ottoman fleet in the Red Sea, a description of the main ports in the Arabian Sea and the Indian Ocean, and an assessment of Portuguese and their ships in those waters and of the chances for an Ottoman fleet to oust them from there. In the final year of his life, Selman Re’is was charged with the mission to eliminate Mu斯塔fa Beg, an subordinate governor of Yemen; he did so and assumed the administration of the province himself. Shortly afterwards, Kहयr al-Din Beg, an aide who had assisted him in the assignment, gained the local legends on his side, rebelled in turn and assassinated Selman Re’is towards the end of 1527.

Selman Re’is’s career has received conflicting interpretation. Some historians view him as proof of Ottoman intentions to assume a leading role in the defence of the Indian Ocean and the Muslim world whose trade and pilgrims’ routes were under assault by the Portuguese (Palmina Brummett, Ottoman seapower and Levantine diplomacy in the Age of Discovery, Albany 1994, 115-21); others draw the opposite conclusion, based on such circumstances as the treatment he received in Cairo despite his merit of saving Diu—thus averting a danger to Mecca—from the infidels, and the limited encouragement and means he received after his rehabilitation (Bauqué-Grammont, 19-20).

SELWI, the Ottoman Turkish name for the Bulgarian town of Sevlievo, now in the Gabrovo province of Danubian Bulgaria (population in 1985, 26,440). From the 16th century till 1878 it was the centre of the nahiya, later kadılik, of Hutaļči/Selwi in the sandžak of Nigbolu. In the 17th and 18th centuries, the town and its district were predominantly inhabited by Muslims of Turkish, as well as of Bulgarian, origin. The town is situated in a vast plain 200 m/656 feet above sea level, surrounded by both of the littoral rivers Rosulit and the Yantra. Most of the 33 villages of the cada are situated in the hills around the plain. The town is the indirect successor of the mediaeval Bulgarian castle of Hutaļči, the ruins of which were discovered in the 1980s, 9 km/5 miles to the south-east of the present town at the edge of the plain, in the formerly wholly Turkish village of Hisar Beyli (later, Serbegi, since 1934, Javorets). The Hutaļči castle is mentioned in a 13th-century inscription.

The nahiya of Hutaļči is first mentioned in the Imanal Defter from 884/1479, having 24 villages with Bulgarian names and Christian inhabitants besides two villages with Turkish names and Muslim inhabitants (Cădărăli and ‘Ali Faqhih). Selwi itself is mentioned for the first time in 922/1516, as a newly-founded place ‘not mentioned in the previous registers’ and having 18 Muslim Turkish households. In the course of the 16th century, this village, due to its central location, became the centre of the district and in the course of the late 17th century developed into a town. In 922/1516 there were, next to the old villages, eight new Muslim villages with Turkish names and in 1579-80 fourteen. At this time, the number of the Muslim population rose from 214 to 838 households, whereas the Christians largely remained stagnant because of the re-population of the old villages gradually Islamised. In 1751 Selwi was a small town of 301 households, with two mosques and a weekly market. Through further Islamisation, 71% of the district was now Muslim.

In the course of the late 18th and early 19th centuries, the town as well as the district slowly lost its predominantly Muslim character, the Christians having markedly large families. In 1845, 52% of the district was Muslim, in 1873 46%, the town then having 2,345 Muslim inhabitants and 3,864 Christians. Selwi had in 1873 ten mosques, a few hamams and dervish convents and a large and monumental church for the Christian community, rebuilt in 1834 on older foundations, with the support of the local Muslim notables and written permission of Sultan Mahmud II. After Bulgaria became independent, most of the old Turkish colonists, as well as the bulk of the Muslims of local origin, left the villages of Selwi and migrated to Anatolia. Those remaining in the town more than halved in numbers by 1887. According to the census of 1928, only 811 Muslims were still living in the town. After the Second World War, during which time the town saw a rapid development, almost all Muslims left, and their mosques and other buildings were desecrated. The church from 1834 and the Clock Tower, first erected in 1777, remain standing as officially recognised monuments of culture.

Only in the large village of Akindjiler (now Petko Slavejkov), until 1878 wholly Turkish, a majority of the population remained Turkish-speaking Muslims, having one small mosque. The same is valid for the village of mixed origin, Rahova (Rahovite). In Malkoĉlar (now Burja) and Adiller (Idilevo), some families remained, partly with Alevi inclinations.

Throughout the Ottoman period, the nahiye/kada was known by both the names of Selwi and Hutaļči.

SEMA' KHANE [see SAMA']

SEMEDIREK, SEMADIREK, the Ottoman Turkish name for Samothrace, modern Greek Samothraki, a mountainous island of the Thracian Sporades group in the northeastern part of the Aegean Sea, now part of the Greek Republic and at present included in the nomos or department of Evros. Its area is 178 km², and in 1981 the declining population stood at 2,871. In mediaeval times it was famous for its honey and its goats, and the Latins called it Sanctus Mandrachi.

The island, which lies de I'empire byzantin, 8 e e E. Malamut, [q.y.] and in 1863 the French consul Champoiseau was allowed by the Ottoman authorities to transport the inhabitants from neighbouring areas. Amongst those granted by Mehemmed to his father-in-law, the vanquished Despot of Morea Demetrius Palaeologus [see MORA]. Apart from a brief Venetian occupation, Samothrace and the neighbouring islands passed by the Turco-Venetian treaty of 1479 definitively into Ottoman hands; by 1470, the island was recovered by the sultan Mehemmed Fatih's fleet (on 4 June 1456, according to a Byzantine short chronicle), provoked a western counter-attack by a papal fleet under Cardinal Scarampo, but in 1459 the sultan recovered Samothrace, Lemnos (Limni [q.v.]) and Thasos (Thâshoz [q.e.]), and their revenues were amongst those granted by Mehemmed to his father-in-law, the vanquished Despot of Morea Demetrios Palaeologus [see MORA]. After a brief from Venetian occupation, Samothrace and the neighbouring islands passed by the Turco-Venetian treaty of 1479 definitively into Ottoman hands; by 1470, the island had been left with barely 200 inhabitants because of the incessant raiding.

The Ottoman period (1479-1912) is insufficiently documented. A Venetian raid is recorded in 1502. Soon afterwards, Pir Reis called the island seu'litel makāmi "abode of saints", perhaps echoing earlier descriptions of it. In 1698 the Venetian admiral Dolfin forced the Ottoman fleet to retreat to the Dardanelles, so that the Italians could gather taxation from the northeastern Aegean islands. In the early stages of the Greek National Revolt (1821), the island was raided by the fleet of Kara Ali, which slaughtered almost all the male Greek population and enslaved the women and children (see Finlay, History of Greece, i, 192), and only after 1827 did the survivors begin to resettle the island from neighbouring areas. Archaeological excavations were begun on Samothrace in the 19th century by the French and the Austrians, and in 1863 the French consul Champigneul was allowed by the Ottoman authorities to transport the statue of the Winged Victory to the Louvre. The island was occupied by the Greek navy on 19 October 1912 in the course of the First Balkan War; during World War II it was under Bulgarian occupation from Western Thrace 1941-4.

SENEGAL, the name of a former French colony, an independent republic since 1960. Senegal takes its name from the river which rises in Guinea and discharges into the Atlantic Ocean near Saint-Louis after describing a broad curve, a section of which constitutes the frontier with Mauritania [see MœURTANIYa].

The origin of the word "Senegal" is disputed. According to some, the term is said to derive from the name of the Sanhadja (or Zenaga), a Berber people who occupied the northern bank of the lower reaches of the river. The first forms of these names are to be found in the accounts of travellers of the 16th century. Duarte Pacheco Pereira uses the phrase "rio de Çanagua" to denote the river; Zurara, Valentim Fernandes, Ca da Mosto and Diogo Gomes call the river the "river of the Lebu of the Cape Verde peninsula (less than 2%).

French, the official language of the Republic, is
known by approximately one-third of the population. Since 1978, the constitution has furthermore recognised six national languages: Joola, Malinke, Pular, Serer, Soninke and Wolof. Due to its centrality, the number of Wolof speakers, and its historical and political role, Wolof, although little used in the press and in literature, has tended to become, in fact, the principal national language of Senegal. On the other hand, the existence of a public and private network engaged in the teaching of Arabic, and the use of Arabic characters in the transcription of certain national languages, have tended to confer upon Arabic, for religious reasons, the status of a major cultural language, in spite of the relatively small number of those who use it.

The total population of Senegal was 7 million in 1988, representing a density of 35.7 inhabitants per km². The capital, Dakar [g.o. in Suppl.], has a population of over a million. The scale of urbanisation is one of the highest in sub-Saharan Africa: more than a third of the inhabitants. In 1988 the G.N.P. was $510 per head of population, and the overseas debt, in 1989, was $288.25 per inhabitant. The vast majority of the population is Muslim. There also exists a Catholic minority (about 5%) in the south of the country ("Little Coast").

2. Economy.

The economy of Senegal, which depends for almost half of its exports on a single agricultural product, the ground-nut, is fragile. Despite efforts towards liberalisation, the Senegalese state remains the principal employer, importer and investor, a fact which increases the risks of corruption and nepotism in the administrative apparatus. The Senegalese economy is, furthermore, deeply dependent on foreign nations for the provision of capital and of technology. For a long time France, the former colonial power, has occupied a dominant position, which is currently shared by the U.S.A.

Since independence, the value of ground-nuts on the international market has declined considerably (in competition with the oils of the soy-bean and the cole-seed). The ground-nut, which represented 80% of the value of exports until 1967, represented no more than one-half fifteen years later. This collapse is also accounted for by the development of new products for export: phosphates, fresh and preserved fish, cotton. On the other hand, the state has given priority to the extension of rice production, as well as the construction of a dam at Diama (near Saint-Louis), to facilitate mounds of sea-shells on the coast, numerous megalithic monuments, dating from the first millennium of this era, between Gambia and Ferlo (in particular the stone circles of Sine-Saloum) and metallurgical sites prove the antiquity of human occupation in these regions.

In the earliest stages of its history, Senegal was a cul-de-sac, backed by an ocean which, until the 15th century, played no part. Essentially, what constitutes its current territory was outside the zone of domination of the kingdom of Ghana, the first political formation of any size in the region. It was also situated at the furthest limits of the Muslim world of the time. It is precisely from this zone of contact with Arabo-Muslim trans-Saharan commerce, at the approaches to the valley of the Senegal river, that the first information filters through, beginning in the 9th century A.D.

The history as such of Senegal really begins with the description of sub-Saharan itineraries by the Andalusian geographer al-Bakri (writing in 460/1068). Proceeding along the course of the Senegal river, al-Bakri gives us detailed descriptions of the river's banks, of Sunghâna (or Sangâna), of Takrûr and of Sîllâ (or Silli). Situated some 200 km from the estuary of the Senegal river ("six days journey between it and the land of the Godala"), Sunghâna is composed of two towns, located on either side of the river. Down-stream, between Sunghâna and the Atlantic Ocean, "the inhabited places follow on from one another". This zone corresponds to the lower valley of the river, known historically by the name of Wialo. Up-stream, at a distance which is not given precisely, are located Takrûr, then Sîllâ, itself situated at "twenty stages" (more than 600 km) from Ghâna. Sîllâ, too, is composed of two towns, separated by the river.

The middle valley of the Senegal represents the first centre of Islamisation of the entire region. The king of Takrûr, Waar Diabâ (d. 492/1046) was converted, calling on his subjects and on the neighbouring city of Sîllâ to accept the new religion. His son, Labi, supported Yahya b. Umar in 448/1056 in the first conflicts of the Almoravid movement [see Almûwâ Batânû]. The king of Sîllâ, for his part, made war on his non-Muslim neighbours, such as those of "Kalânbi" (Galam), another city on the river.

From this period onward, the sources of gold, which constituted the principal magnet for Arabo-Berber merchants, were logged by travellers and geographers. The best gold was then obtained from a site known as Ghiyaru (Gunjuru ?), situated at "eighteen days’ journey" (less than 600 km) to the south of Ghâna. This is in the major auriferous region of Bambuk, which is located on the right bank of the Faleme (a tributary of the Senegal) and is divided today between the modern states of Senegal and Mali. In the following century, according to al-Idrîsî (writing in 549/1154), Takrûr, which seems to have gained by the enfeoffment of Ghâna, possibly by the Almoravids, exerted its authority as far as the approaches to Bambuk, thus controlling exchanges between the salt of the coast and the gold of the interior.

The kingdom of Takrûr was subsequently supplanted by other regional political formations, but the toponym survived and was to acquire great significance. In all probability it is the origin of the name "Toucouleurs" (Duarte Pacheco Pereira, Valen-
tim Fernandes, in the 16th century), then, in French writing, of "Toucouleurs". On the other hand, until the 19th century, the word Takrûr denoted in a loose fashion, throughout the Arab East, the Muslim regions of the extreme west of Western Africa, more
specifically, the lands which are currently Senegal and Mali.
(2) A Senegalese political matrix: the Grand Jolof.
In the participation of Takrūr in the Almoravid movement, the exploits of the Murūbūtin had few repercussions in the region of Senegal. On the other hand, their memory has been magnified to the point of representing the birth of the Islamic history of the land. This sense of identification with the Almoravid ḥiḍāḍ finds its best known expression in the genealogy of the kings of the Jolof, the first great historical Senegalese kingdom. The oral sources, which concentrate on the achievement of the founding hero, claim, in anachronistic fashion, that the first sovereign of the Jolof, Njajaan Njaay, was the son of the Almoravid Abū Bakr b. 'Umar, or one of his descendents and successors. But this is a late genealogy, no doubt fabricated after the 12th/18th century by Muslim scholars anxious to validate the Islamic legitimacy of the dynasty, in competition with other traditions according to which the founder was, on the contrary, renowned for his animist powers.

The “Grand Jolof” was, between the 13th and 16th centuries, the crucible of new Senegalese political identities, more particular those of the Wolof language. But the reconstruction of the process remains in part conjectural. After the legendary account of the foundation of the kingdom by Njajaan Njaay, the oral sources remain virtually silent regarding the latter’s successors, only providing dynastic lists without commentators. These unclear materials make it impossible to establish a firm chronology. At the most, by means of connections and cross-checking it is legitimate to locate the origins of the kingdom at the earliest towards the end of the 13th century. In the Jolof as in the Waalo, the dynasty claimed descent from Njajaan Njaay: these were in all probability the central territories of the new hegemony. On the other hand, the other dynastic unities, Kajoor (Cayor) and Bawol (Baol) are given distinct, even earlier origins (references to the Soninke of Ghana) and therefore needed to be attached subsequently to the great totality. Similarly, the “Wolofisation” of these two countries was accomplished, after some delay, under the influence of the Grand Jolof. Later still, there took place the integration of the southern kingdoms of Sine-Wolof language, of Sine (Sine) and of Saalum (Saloum).

The process of extension of the political range of the Jolof was overshadowed by the expansion of the empire of Mali [q.e.] At its zenith (first half of the 14th century), this empire gained a foothold in the valleys of the Senegal and the Gambia, defeated the sovereign of the Jolof, if the Malinke tradition, and it alone, is to be believed, and radiated, in a fashion difficult to determine, over the rest of the region. Political titulature bears numerous traces of this period of Malinke control. The titles of sara (chief) or of far-ba (great chief), which came to be widely used in Wolof hierarchies, are directly borrowed from the Malinke language. Genealogical connections with the dynasty of Mali also appear throughout the Senegambian zone. At the time of the arrival of the Portuguese, the Jolof was at its zenith, its territory extending as far as Férul, towards the Futa Jallon, whereas Takrūr continued to exert its power further to the east, from the central valley of the Senegal to Bambuk. At the same time, Mali, in a process of decline, nevertheless maintained its pressure, particularly in the Gambian valley.

But the empire of the Jolof was weakly centralised and the subsidiary kingdoms enjoyed considerable autonomy, sometimes engaging in dissidence. The sovereign (baudi) directly governed only the province of Jolof as such, an inland region separated from maritime traffic. As a means of surmounting this handicap the Crown Prince (bauni), Jelen, ousted in a war of succession, made his way, in 1488, to Lisbon, converted to Catholicism and having regained his throne, played an active part in the control of imports (horses, iron, weapons, fabrics, leather and glass objects, etc.).

The coast of Senegambia were discovered by the Portuguese around 1445. The Wolof lands represent in this context the first “morsel” of Black Africa explored by the Portuguese. The testimonies of these navigators, superseding the somewhat limited Arab sources, provide considerable new material for the understanding of Senegalese societies in the 15th century.

By combining these elements of information with those assembled later, it is possible to trace the essential character of these societies. They are first of all marked by a very strict hierarchisation of social classes: the gee (free men), the teeto (considered inferior, of low “caste”, consisting of members of endogamic groups specialising in the practice of certain artisanal occupations, smiths, millers, etc.) and the jaam (slaves and dependents). Power belonged to members of the ruling gee families. In the Senegambian zone, kinship is established both in the maternal and the paternal line; matrilineages are called men and patrilineages gene. The inheritance of goods and positions exposes, in variable proportions according to dynasties and periods, this double filiation. Thus transmission in the dynasty of the Jolof, from the outset until the end, is predominantly patrilineal. On the other hand, the Waalo, the Kajoor and the Bawol practised a bilineal system from the 16th to the 19th century, and previously, in certain cases, possibly a matrilineal system. In the entourage of these Wolof kings, a lady of the Court (mother, aunt or elder sister), theingeer, exercises a substantial authority which underlines the role of matrilinearity in these complex systems.

The diffusion of Islam in these kingdoms is still very uneven. The Portuguese texts speak of animist practices and evoke the propensity of the Wolof for the abuse of alcohol. They also illustrate the important role played by foreign preachers, the majority of them (from neighboring Zanaga groups (contemporary Mauritania)). These are known by the name of bissërin or bissërin (in contemporary Wolof, seri, equivalent of shaykh). From the early 17th century onwards, the term “marabout” comes into general use and is substituted for the latter. As in the rest of western Sudan in the same period, Islam is the faith of elites and of merchants, an Islam of the court, which does not exclude, on the part of the sovereigns of the respective subjects’ behest, recourse to instruments of legitimacy borrowed from ancestral cults (feasts, dancing, sacrifices etc.).

(3) The turning-point of the 16th century: a new political landscape.

The years following 1500 saw a significant turning-point in the history of the region: the accession to power of a Peul or Fulbe dynasty in neighbourhood of Takrūr, and the autonomy of the subordinate kingdoms, destabilised the unity of the Jolof.

The history of the interior of Senegambia is marked, during the second half of the 15th century, by a hostile campaign of great breadth instigated by Peul originating from the border regions of the Sahel, in a double movement, north-south and then south-north. Between 1460 and 1480 the Peul crossed the central
valley of the Senegal in the direction of the Gambia. Soon afterwards, a Peul state was founded by Tengela in the Fuuta Djaloo (Fuuta Djalon, currently in Guinea [see FUTA DJALON]), while Peul forces confronted those of Mali. From 1490 onward, Tengela and his son Koli campaigned along the current eastern frontier of Senegal. Tengela was killed in 1512 in a confrontation with troops of the Songhay empire (an empire centred on the loop of the Niger) and Koli (son of Tengela undertook the occupation of Takrur, where he founded a new dynasty, that of the Deniyakoobe [pl. Deniyankoobe]). The Peul power exerted pressure on the Senegalese frontiers of the Jolof, in particular through the occupation of the Ferlo.

The same period witnessed the increasing power of the Kajoor, annexing the peninsula of Cape Verde, a strategic commercial area, between 1482 and 1515, then, between 1530 and 1550, defeating the Jolof in battle (the victory of Danki). The Kajoor seceded, followed by all the other tributary kingdoms.

After the breakdown of the Gran-Jolof provisional equilibrium was established between the four Wolof kingdoms (Jolof, Waalo, Kajoor, Bawol) and, more broadly, between the Senegambian states (besides the afore-mentioned, the Fuuta of the Deniyankoobe—formerly Takrur—to the north, and the Sinn and the Saalum, to the south). A new disposition of forces was progressively brought into being, marked by the ambitions of the Fuuta, the power of the Kajoor and the economic growth of the Saalum.

In the second half of the 16th century, the buurba of the Jolof passed for some time under the protectorate of the Fuuta. The brak of the Waalo followed, after some delay, and in its turn paid tribute to the Fuuta. The Deniyakoobe dynasty reached its zenith at the beginning of the 17th century under the reign of the satigi Samba Lamu. In confrontation with this regional power, a new hegemony was established under the leadership of Amari Ngoone, the architect of the victory over the Jolof, who united the Bawol and the Kajoor under his authority, but this union collapsed at the end of the 16th century. Henceforward, the Wolof found themselves divided on a lasting basis between the four independent political entities, which were to continue in operation, within virtually stable frontiers, until the colonial conquest, although the memory of their lost unity was not to disappear. For the Senegalese, the Islam of the court, the monopoly of the powerful, was to an increasing extent, not only the trade but also the political and social life of the region.

(4) The period of the slave trade.

The first Portuguese incursion took place, around 1445, at Arguin, on the coast of what is now Mauritania. From there, the Portuguese proceeded along the course of the Senegal and the Gambia to the object of reaching the sources of gold, thus diverting the internal commercial routes towards the Atlantic. From this time onwards, the traffic in slaves began to flourish. Senegambia constituted in fact the primary source of slaves embarked directly for Europe by sea and it continued to be the principal exporter throughout the 16th century, until the Gulf of Guinea and Angola took over this role in the following century.

After the beginning of the 17th century, the Portuguese commercial monopoly was shattered by the successive arrival of the Dutch, the British and the French. The new powers divided the coast into rival zones of influence. The Dutch established themselves on the island of Gorea in 1621. After temporary Por-
tuguese re-occupations (in 1629 and 1645), they were obliged to cede the territory to the British (1667), then to the French (1677). In 1659, the French built the fortress of Saint-Louis, at the mouth of the Senegal river, and organised an active network covering the whole of the river valley. For their part, the British established themselves, in 1651, at the mouth of the Gambia.

This European implantation had profound effects on political and social dispositions. The hunt for slaves led to violence and exacerbated the tensions between Senegalese kingdoms and European traders, and within the Senegalese kingdoms themselves. A social revolution was created, under the flag of Islam, as a reaction against the extortions of the ruling aristocracies. It is known in the European texts of the period as the “war of the marabouts” or “Toubenan movement” (from Arabic tawba “conversion, repentance”).

Initially, a qiyāh born among Berbers of Mauritania, is the initiative of a religious upstart and reformer named Nāṣir al-Dīn. As a reaction against the double pressure of Arab Ḥassānīq warriors moving towards the south and of the Europeans installed at the mouth of the Senegal river, erupted in the river valley, where it acquired aspects of supplementary significance. The desire to convert the populace to Islam was combined here with opposition to the European slave trade. Between 1673 and 1677, the qiyāh was victorious in the Waalo, in the Fuuta, in the Jolof and in the Kajoor. But this victory was everywhere ephemeral. In Mauritania (where this war was known by the name of Shar Bubba), the men of religion (zwāya) were forced to recognise the supremacy of the warriors. On the Senegalese side, the local dynasties re-established their authority everywhere, with the military and material aid of the French traders of Saint-Louis. This restoration was accompanied by an anti-Islamic reaction on the part of the warrior aristocracies, who delivered the defeated survivors into slavery. In these circumstances, adherence to Islam took on a different meaning: from being the distinguishing sign of an elite in mediaeval Sudanese societies, it became the symbol of an ideology of dissidence and revolt against pagan tyrannies (in particular the power of the ceddo warriors, “slaves of the crown” in the service of the ruling families) and the foreign occupation. “Islam which had hitherto been the object of reaching the sources of gold, thus diver-
ing dynasties. In confrontation with the powers of the ceddo, Islamic teaching was seen as a possible response to the general crisis.

Within the Senegalese states, the Muslim communities consolidated themselves under the leadership
of influential religious families, who were not averse to invoking occult means to intimidate their adversaries. These Muslim enclaves, linked together by regular contacts and expressions of solidarity, organised themselves, either to snatch an ever more extensive autonomy, or to unleash Islamic revolutions. Their leaders, "graduates" trained in the same schools, in particular the religious centres of Pir and of Kokki in the Kaajor, in direct contact with the Berber zaouia masters, shared the same culture and exchanged information and plans.

From the end of the 17th century, around 1690, the Bundu, a zone situated to the south of the Senegal river in the east of the country, which had attracted numerous Muslims of the Fuuta Tooro fleeing from repression, had been the epicentre of a Muslim revolution led by a Fuutanke scholar by the name of Malik Sii (Sy), who had studied at Pir and was directly inspired by the model of Naisir al-Din. The Muslim party was thus assured of control of the valley of the Faleme, doubly rich on account of agricultural resources and gold deposits (Bambuk). Like Naisir al-Din, Malik took the title of almami (al-Imâm) and laid the foundations of a régime which was to evolve in dynastic fashion.

The Bundu was a ladder towards the Fuuta Jaaloo, a mountain range recently colonised by the Peul, where other partisans of Naisir al-Din fleeing repression had also taken refuge. In 1725, a second Islamic revolution erupted in this region of what is now Guinea. In its turn it was to serve as the model for a movement of the same nature which was victorious in 1776 in the Fuuta Tooro and led to the fall of the Deniyanke dynasty. The religious party, known by the name of toorodo (from a Peul root which signifies, according to the hypotheses proposed, "to beg" or "to pray") was led by two former pupils of the schools of Pir and of Kokki, Sulayman Bal and Abd al-Kadir, the first almami and amir al-mu'minin of the Fuuta. Abd al-Kadir opposed the sale of Muslims at Saint-Louis and blocked the communications and the supply-routes of the French fortress.

The toorodo party attempted at the same time to extend Islamic power to the neighbouring Wolof kingdoms, but it encountered determined resistance on the part of the sovereign (daml) of the Kaajor, Aminu NDjek, of Ndeela, whose forces crushed the Fuutanke army at Bungoy in 1790. The Islamic revolution was brought to a definitive halt. In the Fuuta, the new aristocracy of the Toorodo appropriated land and dominated the country, while the régime of the almami, consumed by internece rivalry and struggles over succession between families, was in dire need of stability (between 1806 and 1854, 20 candidates came to power on 45 occasions, which, taking account of interregnums, represents an average of less than a year per reign). As in the Bundu and Fuuta Jaaloo, the leaders of the victorious party, trained originally as scholars, progressively yielded power to a new warrior aristocracy which had no direct links with religious studies. However, the Islamic character of the state was reinforced by a network of schools and of kadaas, which had the function of diffusing and promoting the Islamic teaching.

In the Wolof kingdoms, the Muslim groups maintained their cohesion and, sometimes, emigrated towards more hospitable regions (such as those from the province of Njambur, to the north of the Kaajor, who went into exile in huge numbers in the peninsula of Cape Verde.)

(5) The rivalry between the three powers: the warriors, the religious, the French of Saint-Louis.

At the Congress of Vienna (1814), Britain imposed on the European powers the suppression of the slave trade. Although "illicit commerce" continued for some time, the entire balance of Atlantic trading was comprehensively overturned. The Congress of Vienna also restored to French its warehouses in Senegal, which had been occupied by the British. After lengthy research, the ground-nut was identified by the French as the product providing the best substitute for the slave-trade (the British opting, for their part, for palm-oil). From 1840 onwards, the ground-nut was the miracle crop which could rescue French commerce in Senegal from stagnation. This choice led in its turn to a policy of intervention and more resolute territorial expansion. It was Faidherbe, governor of Senegal between 1854 and 1865, who inaugurated this process of colonial conquest: occupation of the Waalo (1855), construction of new posts in the valley of the Senegal river, political and military interference in the Kaajor, and victorious intervention in the Saalum (1859). These campaigns accentuated the fragility of the Senegalese kingdoms.

There was only one force, originating in the cast, which could represent an alternative to the French hegemony. It was embodied by a toorodo of the Fuuta, a veteran of the Pilgrimage, endowed with the title of khaliifa of the new Tjajunnya brotherhood, named al-Hadjdji Umar al-Futi. The latter, also inspired by the model of the caliphate of Sokoto (northern Nigeria) where he had lived for several years and taken a wife, sought to revive the toorodo tradition of Islamic reform. Establishing himself to the north of the Fuuta Jaaloo, he attracted to his cause thousands of "social juniors" from his native territory, in search of adventure and social advancement, and anxious to escape the crisis of power in the Fuuta Tooro. In 1846, 'Umar undertook his first tour of preaching and recruitment in eastern Senegambia and in the Fuuta Tooro. He was faced by the opposition both of the existing hierarchies in the Fuuta and of the French, worried by this new source of instability.

'Umar proclaimed the djihâd in 1852. At the end of 1854 he occupied the Bambuk, invaded the Bundu and established himself in the upper valley of the Senegal. But in 1857, he instigated the siege of the French fortress of Mediouna, adjacent to the upper valley, but was unable to complete it successfully and suffered heavy losses. Henceforward, al-Hadjdji 'Umar withdrew from Senegal and directed his efforts against the Bambara animist hegemonies which then dominated the entire western zone of what is now Mali. But he continued to draw the bulk of his forces from the human reservoir of the Fuuta Tooro, thus contributing to the phenomenon of large (emigration), which had profound effects on the riparian societies.

Taking up the legacy of al-Hadjdji 'Umar (who died in 1864 and whose empire survived for a further generation on the territory of what is now Mali), some Senegambian leaders, influenced by the 'Umarî djihâd or by the toorodo model, revived in their turn a militant and radical programme. In Senegambia, the principal figure was a disciple of al-Hadjdji 'Umar by the name of Ma Bâ Jaaxu, who dominated the stage in Senegal from 1861 to 1867. He took the title of almami and founded a state covering the land between the Saalum and the Gambia and extending, for a brief period, as far as the Senegal river. Ma Bâ Jaaxu was killed in 1867 while attempting to subdue the Siin, who remained resolutely animist.

Some of his companions were to persist in the struggle for Islamic reform and against French expan-
sionism. These included Lat Joor (Lat Dyor), damel of the Kajoor, and al-Bun Njay, his nephew, buurba of the Jolof. Other lieutenants of Ma Ba maintained positions of power along the entire length of the Gamb- bia. But the most significant figures in the long term were to be non-combattant marabouts. The change in emphasis was embodied in particular, a little later, by Abdul Bokar Kan, in the upper valley of the Senegal, Confronted by a warlord, Abdul Bokar Kan, who, between 1860 and 1890, attempted to re-establish the unity and the independence of the Fuuta and to oppose the large-scale drain of the human resources of the region in the direction of the post-13 Umari empire, other religious figures called for the restoration of tawødø ideals: these were Cerno Brahim, a pupil of the Moorish záýya of Tràrza, in the eastern Fuuta, and Amadu Seexu, son and disciple of an influential religious personality, closely linked to the school of Kokki, who was proclaimed Mahdi in the western Fuuta in 1825. Seexu took on the mantle of the "followers of the Mahdi" (given to the movement). Cerno Brahim, for his part, was defeated by allies of Abdul Bokar Kan, in the upper valley of the Senegal, in 1869. The same year, at the time of a devastating cholera epidemic, Amadu Seexu followed his father's example in calling for a movement of reform and of purification. The mobilisation of forces, and the tension which ensued, led to a direct confrontation with the French. Amadu Seexu allied himself temporarily with Lat Joor, the former companion of Ma Ba, and pretender to the throne of the Kajoor, and won numerous victories over the French. For his part, Abdul Bokar Kan avoided any direct confrontation with the Madyankooobe whose leader, powerless to rally the entirety of the Fuuta and being much more respected in Wolof circles, emigrated with all his forces to the Jolof. Having become a threat to the Wolof dynasties, Amadu Seexu found himself progressively isolated. Along with hundreds of his supporters he was killed by a French expeditionary force in a bloody battle in 1875. A final large-scale religious movement was launched, in the upper valley of the Senegal river, by Mamadu Laamin Daraame, a Soninke of the Galam community of Bordeaux, Faidherbe, who had been trained in the Arab Bureaux in Algeria, directed his efforts towards the interior of the country and the Senegal river. He was divided from operations nearer the coast by the separation of Goree into a distinct entity belonging to the "Marine". Protected by the Parisian administration, Faidherbe received the necessary funds and reinforcements. He also knew how to cultivate an image of distinction in influential French circles, showing himself receptive to scholars, publicists and journalists. Like Bonaparte in Egypt, Faidherbe surrounded himself with young officers, graduates of military schools. Combining diplomacy with firmness, he encouraged the signing of treaties of protectorate with African chiefs, but he also organised the Senegalese Tirailleur, an African force in the service of the colonial power, later to enjoy a great fortune. To train an African élite for the role of intermediaries between the Senegalese people and the French authorities, he founded for this purpose the "École des Otages" (1855-1871), which was later to become the "École des Fils des Chefs et des Inté- prétés" (1893). With the annexation of the Waalo (1856), a collection of dispersed trading posts was replaced by a single and continuous tract of occupied territory, the first of its kind for the French in West Africa. On 26 February 1859, the island of Goree and religious zealots, both groups being themselves wrack- ed by internal divisions, there was superimposed to an ever-increasing extent that between African and French interests. This situation accounts for the instability of alliances and counter-alliances. Caught between two fires—the French of Saint-Louis and the religious reformers—the monarchs, who were also dependent on their céddo entourages, made alliances, according to circumstances, with one party or the other. Following the suppression of religious ini- tiatives, in which they collaborated in numerous cases, they hoped to find some common ground with Saint-Louis, but were in their turn eliminated at the end of the century: Lat Joor was killed in battle in 1886, al-Bun Njaay was forced into exile in 1890, and Abdul Bokar, powerless to prevent the occupation of the Fuuta, was killed by Moors acting on behalf of the French in 1891. The last efforts at resistance were those mounted, in the non-Islamised south, by the Joola of Lower- Casamance, to the south of the Gambia. The French administration, reduced to a few coastal warehouses, sought to take control of the Casamancian coast with the aim of developing there the production of rubber. But the Joola took advantage of the inaccessible nature of their villages and of the localised nature of their power to impede French penetration. From 1885 onward, organised on a village-based structure, they resisted the French with some success, and their movement was to remain active until the First World War. The conquest of Senegal by France responded to a double objective: strategic, providing a base of depar- ture for the advance on the Sudan (Segou, the Umari capital on the Niger, fell in 1890), and economic, for the development of the cultivation of the ground-nut, especially in the Kajoor. In 1885, the ground-nut repre- sented 70% of the colony's exports and was poised to become its sole crop. Beyond the various legal constructs, the true founder of the colony of Senegal, reduced to a few isolated trading posts at the time of the French return in 1817, was the governor Faidherbe (1854-1865, with a brief interruption in 1861). At his own initiative, and with the active support of the commercial com- munity of Bordeaux, Faidherbe, who had been train- ed in the Arab Bureaux in Algeria, directed his efforts towards the interior of the country and the Senegal river. He was divided from operations nearer the coast by the separation of Goree into a distinct entity belonging to the "Marine". Protected by the Parisian administration, Faidherbe received the necessary funds and reinforcements. He also knew how to cultivate an image of distinction in influential French circles, showing himself receptive to scholars, publicists and journalists. Like Bonaparte in Egypt, Faidherbe surrounded himself with young officers, graduates of military schools. Combining diplomacy with firmness, he encouraged the signing of treaties of protectorate with African chiefs, but he also organised the Senegalese Tirailleur, an African force in the service of the colonial power, later to enjoy a great fortune. To train an African élite for the role of inter- mediary between the Senegalese people and the French authorities, he founded for this purpose the "École des Otages" (1855-1871), which was later to become the "École des Fils des Chefs et des Inté- prétés" (1893). With the annexation of the Waalo (1856), a collection of dispersed trading posts was replaced by a single and continuous tract of occupied territory, the first of its kind for the French in West Africa. On 26 February 1859, the island of Goree and
the southern trading posts were placed under the authority of the governor of Senegal. The Kajoor, the major source of ground-nuts, all the outlets for which were controlled by French commerce, was progressively encircled. A display of force in the Kajoor and the replacement of the damel (January-May 1861) overcame all resistance. The retreat of al-Hadjjdi 'Umar (Treaty of Medina, August 1860), removed the threat of djihadi and consolidated the structure. If these impressive achievements are supplemented by the organisational work conducted on the ground (administrative institutes, French Muslim courts, Muslim tribunals, modernisation of Saint-Louis, foundation of the Bank of Senegal, etc.) it is evident that, without substantial means, Faidherbe had transformed—twenty-five years before the great colonial partition of Africa—a network of trading posts of mediocre importance into a colony of 50,000 km², to which should be added the zone of influence created in the interior by the various treaties of protectorate and by settlements along the river or on the coast. Guided by the Algerian experience, Faidherbe conducted a rather Islamophile policy, using Muslim institutions as an arm of the French domination. This period saw the beginnings of a phenomenon which was to persist for several generations, the privileged status enjoyed by representatives of Muslim élites of the region of Saint-Louis and of the river: Shaykh Siddiya Baba (1862-1926), a Kâdiri Moorish dignitary of Trarza, Shaykh Sa'âd Bûh (1850-1917), another Kâdiri (and Fadili) Moorish figure, the interpreter Bûh al-Mogdad, drawn from the same circles, Amadu Muğhûr Sakho, kâdi of Boghe (Fuuta) from 1905 to 1934, and a number of prominent citizens and merchants of Saint-Louis (Hamat Njaay/Ndiaye, etc.).

A decree of 16 June 1895 created the ‘Gouvernement Général de l’Afrique Occidentale Française’ (A.O.F.), whose titular head, based at Saint-Louis, combined his duties with those of governor of Senegal. A decree of 1902 separated the two functions: the Governor-General took up residence in Dakar, while the Lieutenant-Governor of Senegal remained in Saint-Louis. A decree of 18 October 1904 established the definitive organisation of the A.O.F. and presented Senegal as a colony composed of ‘territories of direct administration’ (the four communes of Muslim schools, Goree, Rufisque, Dakar, and their suburbs, and the coastal zone traversed by the Dakar-Saint-Louis railway) and the ‘protectorate lands’ of the interior.

The ‘Four Communes’ represented an exceptional case in the French colonial system in Africa. A decree of 10 August 1872 had accorded to Saint-Louis and Goree-Dakar the status of fully functional communes. In 1880, this status had been extended to Rufisque, while, in 1887, Goree and Dakar had been separated into two distinct communal entities. Between 1872 and 1887, the Four Communes were endowed with an organisation copied from the French model. The decree of 4 February 1879 created an elected General Council, on the model of the practice followed in the French departments. On the other hand, since 1848 (with an interruption under the Second Empire) the inhabitants of Saint-Louis and of Goree had elected a representative to the French Chamber of Deputies. This right was extended to nationals of the Four Communes. This example of very close assimilation to the metropolitan régime was not extended further; until the Second World War, it never covered more than 5% of the Senegalese population. The other nationals of the territory were, as in the other colonies, ‘French subjects’, subordinated, by a decree of 20 September 1887, to the local colonial régime, by which they could be regularly requisitioned for works in the public interest, while at the same time their right of movement was limited and they were subject to the discretionary power of the administrators.

The Four Communes, on account of their privileged status, witnessed the emergence of the first black élites, whose claims, throughout the early years of the century, were directed towards total assimilation. The first land-mark event took place in 1914 with the election, on a huge majority (1,900 votes against 671) of a negro customs official, Blaise Diagne, competing with a candidate of mixed parentage supported by the administration. Blaise Diagne had benefited, especially, from the support of the Murid brotherhood. For the first time a Black African sat in the French Parliament. A law, sponsored by Blaise Diagne and promulgated in 1915, enlarged the constituency of French citizens, stipulating that all the nationals of the Four Communes and their descendants should enjoy citizen status. As a valued representative of the French government, with the title of Commissioner of the Republic and the rank of Governor-General, Blaise Diagne contributed actively to the recruitment of African troops for the fields of the First World War. He was convinced at this time that the shedding of blood would accelerate progress towards assimilation. After the war, he became Under-Secretary of State for the colonies, the first African to serve a French government in a ministerial capacity. On his death in 1934, Galandou Diouf was elected deputy and pursued the same programme, of populist oratory and co-operation with France, although with less skill. The founding of the Senegalese Socialist Party in 1935 and its affiliation to the French Socialist Party (S.F.I.O.) in 1938 marked a new phase. The leader of the new party, Lamine Gueye, was defeated by Galandou Diouf in the elections of 1934 and 1936, but he dominated Senegalese political life after the Second World War.

Senegal was affected in numerous ways by the global conflict. Pierre Boisson, Governor-General of the A.O.F., remained loyal to the government of Vichy and offered military resistance to an attempted landing by General De Gaulle, supported by British naval forces at Dakar (15-23 September 1940). After the Allied landing in North Africa, Boisson negotiated an accord with Admiral Darlan and with General Eisenhower (7 December 1942) which brought the A.O.F. back into the war, but not into alliance with Free France (this was not to be achieved until June 1943).
citizenship on all nationals of the overseas colonies. In 1948, Senghor resigned from the S.F.I.O., which he considered too assimilationist, and founded his own party, the "Bloc Populaire Senegalais" (B.P.S.). Henceforward, the two organisations were to compete for control of the electorate, actively soliciting the religious leaders (the marabouts), who now enjoyed the status of electoral brokers and were the recipients of all kinds of favours from politicians. In spite of his Catholic allegiance and the attacks levelled at him on account of it, Senghor emerged from this confrontation the victor. Lamie Gueye, as a city-dweller from Saint-Louis, was not at all familiar with rural issues. Intellectual though he was, Senghor paid more attention to the problems of the “bush” and gained the support on this basis of numerous “marabouts” who had a direct interest in agricultural problems. He also manipulated with skill the internal conflicts within the brotherhoods. Thus he supported the head khala of the Murids, Fallou M’Bâcké, against his nephew and rival Cheikh M’Bâcké, a friend of Lamie Gueye. Told by the members of the moderate socialists, he won over to his side one of the great historical figures of the Tidjaniyya, Seydou Nourou Tall, grandson of al-Hadjdj Umar, a man of influence, who, from his stronghold in the Fuuta Tooro, had served all the administrations and now put his considerable expertise at Senghor’s disposal.

Senghor won the elections of 1951, and continued to consolidate his power at subsequent polls. The frame law of June 1956 (the “Defferre Law”) established a régime of internal autonomy and gave rise to an autonomous executive and a “Republic of Senegal”. Elections intended to put this autonomy into effect took place on 15 March 1957. The party of Senghor (which had become, through the unification of small parties, the “Bloc Populaire Sénégalais”) secured 78.1% of the votes, as against 11.1% for the Socialists (limited essentially to Dakar and Saint-Louis). Senghor’s principal assistant, Mamadou Dia, became Vice-President of the Council of Government (the functions of President being reserved for the French representative, the territorial chief), while Senghor continued to sit in the French National Assembly. The Council of Government was to be established in Dakar, promoted to the status of capital of Senegal, to the detriment of Saint-Louis and the old political weight of the latter town. Senghor’s political strategy was consolidated by the fusion of the Socialist Party and the B.P.S., forming the Union Progressiste Sénégalaise (U.P.S.) in April 1958.

The year 1958 was dominated by the referendum on the “Communauté”, which gave the African electors a choice between independence by stages, within a “Commonwealth” retaining unified defence and foreign policy (“Yes” vote) and immediate independence (“No” vote). The question of the marabouts and religious leaders, uneasy at the direction proposed by Dia, expressed public support for Senghor. A new constitution, abolishing the bishops, was adopted by referendum on 3 March 1963 (99.4% of the votes cast). The consolidation of power was pursued with the establishment, through the integration of some and the exclusion of others, of the U.P.S. as a “unified”, i.e. single party. This aggressive policy of presidentialisation, in a context of economic stagnation, provoked movements of discontent and strikes. On 22 March 1967, supporters of Mamadou Dia attempted to assassinate Senghor as he was leaving the Great Mosque, on the occasion of the feast of Tabaski (Id al-Kabir). In the face of increasing pressure and the demand for local autonomy, 1 May 1968; 1 May 1969; 22 July 1969; 1 May 1970; 22 July 1970) and a constitutional revision restored in 1970 the functions of Prime Minister and extended the powers of the Assembly. Four days after the referendum which confirmed the revision with 94.9% of the votes cast, on 26 February 1970, Senghor called upon one of the younger senior civil servants, Abdou Diaf, to serve as Prime Minister.

A new constitutional revision took place in 1976, restoring, on a distributive basis, the multi-party principle: three parties were authorised, on condition that one was to espouse “liberal democracy”, another Marxism-Leninism, and the third “socialist democracy”. The U.P.S., claiming the latter label for itself, was admitted to the Socialist International in November 1976 and adopted the name of Parti Socialiste in December. This “democratic awakening” of 1976 was accompanied by a veritable explosion of new titles in the press. This burgeoning of a press catering for political discussion in the French language, which had no equivalent in the rest of Francophone Africa, was to continue throughout the 1980s.
On 31 December 1980, President Senghor took a decision of a kind hitherto unknown in sub-Saharan Africa, resigning from his functions and withdrawing entirely of his own accord from public life. He thus illustrated once again the extent to which he differed from the leaders of other African régimes, among others President Houphouët-Boigny who, encouraged by the results of the “Ivory Coast economic miracle” of the 1970s, was eager to wrest from Senegal its former role as the leading nation of Francophone West Africa. In conformity with the Constitution, Abdou Diouf of the PDS (Parti Democratique Senegalais—right-wing liberal) was elected President of the Republic on 1 January 1981. On 24 April 1981, on the recommendation of the new President, a law was introduced, abolishing the limit on the number of parties. On 27 February 1983, Abdou Diouf was elected President with more than 83% of the votes cast, while the Parti Socialiste obtained some 80% of the votes in the legislative elections. Out of fourteen officially recognised parties, eight participated in the legislative elections and five submitted candidates to the presidential elections: Abdou Diouf (P.S.): 83.5%—one percentage point higher than the vote obtained by Senghor in 1978; Abdoulaye Wade (Parti Démocratique Senegalais—right-wing liberal): 14.79%; Mamadou Dia, the former detainee (Mouvement Démocratique Populaire—internal autonomy): 1.39%; Oumar Wone (Parti Populaire Senegalais—nationalist): 0.20% and Mahjmount Diop (Parti Africain de l’Independence—communist): 0.17%. The results were vigorously disputed by all the defeated parties, with allegations of corruption, as had previously happened in 1978. Shortly after his retirement, Léopold Senghor was elected a member of the Académie Française (May 1983).

As regards the most recent period—which has been marked, internally, by a consolidation of socialist power (in spite of recurrent political crises, in particular with the P.D.S. of Abdoulaye Wade), an extension of freedom of opinion, but also an aggravation of economic and social problems, further accentuated by the devaluation of the C.F.A. franc—the principal events to be noted are the failure of the Senegambian confederation (Senegal + Gambia) which had been proclaimed on 1 February 1962 and was dissolved in September 1989, the gravity of the crisis which for several months paralysed Senegal (economic and social crisis): 1989, and the emergences of an independence movement in the isolated southern region of the country, the Casamance, whose indigenous populations (Joola and others) showed themselves hostile to agricultural colonisation by Wolof migrants (armed confrontations in September 1989 and September 1990, provisional cease-fire in July 1993). In the course of the 35 years which have followed independence, Senegal deserves credit for having been in the vanguard of democratic evolution in Francophone Black Africa, but the paucity of its natural resources and the circumscription of its territory, since it ceased to be the “centre” of French West Africa, render its position fragile. The laboratory of African democracy (it is one of the few countries of sub-Saharan Africa which has not experienced a coup d’état or a military régime) Senegal is also, and even more so, a laboratory for the study of contemporary Islamic trends.

4. Religious and intellectual life.

Islam is both an ancient and a recent phenomenon in Senegal. The first contacts date back to the 11th century, with the conversion of the king of Takrûr (before 1040), then the rise of the Almoravid movement in the second half of this century. But Islamisation was a long-term process which, under the triple influence of Soninke dynasties, inheritors of the empire of Ghana, pioneers of Sahelian commerce and first transmitters of the faith, of institutions originating in the empire of Mali, and of the education conveyed by learned Moorish scholars hailing from the right bank of the Senegal, henceforward to be the guides of Senegalese Islam, developed very slowly from north to south.

In the early modern period, the Portuguese noted the general presence of religious Muslims (the “hissiru” or “hissiru”) in the entourages of chieftains. But the same authors also report the existence of altars and of animist sacrifices. Adherence to Islam, when it took place, was therefore superimposed upon more ancient cultural and religious traditions, still very much alive. As in the other Sudano-Sahelian formations of the period, Islam was at first a sign of social distinction, valued by the aristocracy, associated as it was with literacy and with trans-Saharan commerce. Islam was thus a superior knowledge reserved for élites. The lower classes, for their part adhered to ancestral traditions. European observers thus had difficulty establishing a firm distinction between Muslims and non-Muslims.

This “Islam of the court”, complainant towards princes and wealthy merchants, which did not disappear entirely, was succeeded, following the “war of the Marabouts” (1673-7), by a militant Islam, more aware of itself and taking advantage of major social issues, in particular, the extension of the Atlantic slave trade, to question the legitimacy of the ruling dynasties and to call for an Islamic revolution, presented as the reign of the law and of justice. After the defeat of the “marabouts”, Islam tended to be concentrated in enclaves partially exempt from the direct authority of the sovereigns and attracting pupils and students, as well as refugees anxious to escape from exploitations practised by those in power. The scholastic centres of Pir and Kokki, in the Kajoor, illustrated this new brand of Islam which laid emphasis on the higher education of students drawn from all the neighbouring regions. This “populist” Islam, nourished periodically by weekend pilgrimages, and committed to the triumph of the shari‘a, established a firm tradition, with recurrent manifestations, in the Senegambian regions.

The success of the Islamic revolution in the Fuuta Tooro (1776) and the pioneering role then adopted by Peul and Toucouleur scholars, as a new “chosen people” bearing the divine word (“Arabs of Black Africa” as they called themselves), reinforced the hopes of the Muslims of the region, but the Wolof monarchies, still attached to the old tradition, were not ready to experience its most rapid progress. It has been stated above to what an extent, in the wake of al-Haqqi ‘Umur and under the influence of various local preachers (Ma Bâ, Cerno Brahim, Amadou Sene and Mamadou Sene), in the 19th century was a century of religious effervescence, with competition between different types of claimant to political power: military, religious, and foreign. The French feared, in what they called the “Tidjani league”, a “holy alliance” of all the Muslim forces opposing their penetration. However, not all the
religious actors were necessarily Tidjani or 'Umari. This “djihadist” 19th century also saw an intensification of Muslim pressure on the southern regions of Senegal (Sereer kingdoms of Sen-Saloum/Sine-Saloum, Joola societies of Casamance), which had remained largely animist. For centuries, the Wolof had been moving towards the south, in search of better irrigated land. In these foreign regions, they willingly united around religious figures. It was in fact in a zone of Wolof colonisation situated to the north of the Gambia (the Badibu, or Rip), that the movement of Ma Ba first flourished. Saloum, caught between French and Islamic threats, fell into a state of total instability and experienced widespread conversion to Islam in the following decades. Finally, it was the other Sereer kingdom, that of Siin, politically stable and far less receptive to Islam, which brought about the downfall of Ma Ba (1867). However, the lieutenants and companions of Ma Ba subsequently continued his policy in their respective districts. Ma Ba had failed to establish a lasting empire, but he had dislocated the existing traditional societies and opened the door to the way companies of Islamisation, which, on the basis of the occupation of land, has continued into the present day. In the following generation, further to the south, yet another Malinke “marabout” and warrior chieftain, Fode Kaba, appeared on the scene, and between 1877 and 1893 he defeated and forcibly converted the Bainuk and made war against the Joola. When he concluded a peace treaty with the French, in 1893, more than half of the population between Saloum and Casamance, had, as a result of his exploits, embraced the Muslim faith either voluntarily or under duress.

At the turn of the 19th and 20th centuries, another phenomenon, much further to the north, is observable in the border regions between Senegal and Mauritania, which, as noted above, had maintained privileged connections between France and a series of Muslim dignitaries, the emergence of a whole galaxy of scholar-personalities, such as Sire Abbass Soh, Yoro Dyao (1847-1919) and shaykh Musa Kamara (1864-1945), a native of Ganguel (Fuuta), a gifted and prolific writer and historian (the author, in particular, of Zahr al-basatin fi ta’riff al-sawadim), who contributed in a very active fashion, in French, in Arabic or Peul, to the creation of a Senegalese historiography.

But the most characteristic movement of this period was the emergence of the major Senegalese dervish brotherhoods or Shi'ite orders, which began to establish themselves at this time. By filling in a very visible fashion the political void created by the defeat of the princes and the collapse of the Senegalese states, the orders presented themselves as structures of substitution and of refuge. They were the catalyst for the promotion of a Muslim élite which had long been obstructed and frustrated by the exertions of political authorities. On the other hand, they gave the signal for a radical change of strategy: frontal attack upon the colonial occupier was superseded by an attitude of prudent restraint, where the emphasis was on the peaceful rallying of the faithful around their charismatic leaders. The formation of these new associations was at first a cause of concern to the French power, but a series of negotiations ensued, progressively transforming the brotherhoods into influential elements of the colonial, and later the post-colonial order.

The tarika which best illustrates this new trend is the Muridiyya [q.v.] or Muridism. At the end of the previous century, Ahmad b. Muhammad b. Habib Allah, better known by the name of Amadu Bamba, whose father Momar Anta Sah, a regular frequenter of the courts of the Wolof princes, was affiliated to the Kadiriyya, brotherhood, which contributed to the flowering of the Tidjaniyya under French domination. Coming to terms with colonial constraints in the interests of establishing an associative and pedagogic space tolerated by the administration, al-Hadj Malik Sy devoted his efforts in particular to a "grass-
roots Islamisation”. He was especially committed to the struggle against what he considered the deviations of Sufism and adopted the stance of a defender of a “Sunni taqwawiy” in the tradition of al-Ghazâli. After the First World War, his brother Seydou Nourou Tall, grandson of al-Hâdjî ‘Umar, who pledged him his allegiance and proceeded to develop useful contacts with the authorities. After the death of al-Hâdjî Malik Sy in 1922, the Sy family retained control of Tivaouane, while an annual pilgrimage (the gamu), gave the fraternity an opportunity to advertise the scale of its membership. The Tijânîyya of Tivaouane has been distinguished, since the colonial period, by the wealth of juridical recruitment: free peasants, senior bureaucrats and officials.

The second “House” is that of the Niassé family, at Kaolack. Although without the local network of the Tivaouane branch, the “Niassene” zîwiyat of Kaolack has ramifications throughout West Africa and beyond. It was founded by a former disciple of Ma ba Jaxu, named Abdoulaye Niassé (ca. 1840-1922). Initially a refugee in the Gambia, before coming to terms with his master in French, the frail Abdoulaye Niassé went to Kaolack in 1910, Abdoulaye Niassé had performed the Pilgrimage at an early stage (1887) and he enjoyed close contacts with the “mother-houses” of the Tijânîyya (Ayn Madi in Algeria; Fez in Morocco; and the tribe of the İdâw ‘Ali in Mauritania). In his lifetime, a kind of separation of tasks was operated with al-Hâdjî Malik Sy, with whom excellent relations were maintained. Al-Hâdjî Abdoulaye Niassé exerted the most influence in the Sine-Saloum, where he encouraged the cultivation of the ground-nut, laying more emphasis than did the Murîds on small-holding and free agricultural enterprise. On his death, his younger son Ibrahim Niassé (b. 1902) who showed himself a better religious “entrepreneur” than the elder, Muhammad, the official heir, gave a new impetus to the Kaolack branch, conferring on it an autonomy and a particularism which both distinguished and detached it from Tivaouane. On account of his close links with the North African centres of the order, the Niassene House henceforward claimed primacy: around 1930, Ibrahim Niassé declared himself ghâith al-zamân (“saviour of the age”), a major title which placed him directly in the line of succession of Ahmad al-Tijânî, the founder, and of al-Hâdjî ‘Umar al-Fâti. A spiritual vision, accompanied by the attribution of a number of fayda (emanation of grace) and of aifâ (emanation of light), consolidated this claim. At the end of 1936, Ibrahim Niassé performed the Pilgrimage to Mecca. This was the opportunity, on his part, for a new leap forward in the community of Madina-Gounass, renowned for its abâds (patrons). By dint of religious figures, it was committed to the agricultural exploitation of the inhospitable valleys of Upper Casamance. But, since the mid-1970s, the “communal ideal” of Madina-Gounass, divided by conflicts between Toucouleur and Peul adherents, has been gradually absorbed by the surrounding Senegalese society.

Other Sufi tendencies exist in Senegal, such as the Kâdrîyya, but they are of less importance. Mention should be made of a small brotherhood, strongly ethnic in membership and, at the outset, syncretist, that of the Layennes of the Cape Verde peninsula, principally belonging to the Lebu ethnic group. Although it numbers no more than 20,000 to 30,000 adherents, its powerful presence in Dakar ensures its disproportionate visibility. The founder of this order, Limamou Laye (1843-1909) was an illiterate from a fishing village who, unlike the founders of the other groups, left no written legacy. Beginning to preach in 1883, and for a brief time suppressed by the French administration, he claimed to be a Mahdi and a black reincarnation of the Prophet Muhammad (while his son and successor was that of Ɨsâ/Jesus). In spite of its syncretist aspects (iconography celebrates the legend of alliance with a djinn-fish), the new order marks a departure from Lebu traditions (alcohol, dancing, cults of possession, etc.) and manifests the conversion of the majority of the group, men in particular, to Kurzanic monotheism. The later evolution of the movement in an orthodox direction was to confirm this trend.

Outside the domain of the brotherhoods, the most significant movement is the Union Culturelle Musulmane, of reformist tendency, which was influential in some parts of West Africa. Founded by certain brotherhoods, and took a vigorously anti-colonial stance. After independence, the Senegalese branch of the U.C.M. gradually passed under the control of the state, and this resulted in the departure of Cheikh Touré and his colleagues in 1979.

The 1970s saw an acceleration of the trend towards the establishment of Islamic associations. The Fédération des Associations Islamiques du Sénégal (F.A.I.S.), founded in 1977, and the Union pour le Progrès Islamique au Sénégal, created in 1973, itself a member of the F.A.I.S., both of them closely associated with the state, united a number of them. Also to be found are the “Al-Falâdî” movement (created in 1956), more entrenched among the commercial classes, close to Wahhâbî positions, which laid stress upon Arabo-Islamic education; the “Jamaatou Ibadou Arrahman” (founded in 1978 by a companion of Cheikh Touré), composed primarily of intellectuals

Senegal has a strong identity to a long past and a singular history. In contact with the French since the 17th century, “headquarters” of French West Africa for two generations, Senegal has retained from these privileged links a substantial Francophone legacy. The ancientness of Islamic culture and the power of the Sufi orders represent another recognisable element, making this country a model for the study of Islamic phenomena to the south of the Sahara. Despite periodic internal crises, Senegal is remarkable both for constitutional stability and for a fertile discussion and debate which has existed for a longer time than in any other part of Francophone Africa. The prestige and the influence of this country, which has produced numerous men and women of cultural distinction, are thus considerably greater than would be expected, on the basis of its demographic and economic resources alone.

Sumerian, Old Babylonian and New Babylonian kings. Up to the recent intervention of the United Nations into 1stāri affairs, the site has been regularly excavated.

The two largest buildings to have been identified are the “White House” which was the temple of the god Šamaš, and the royal palace of Nur-Adad, an Amorite ruler of the 19th century B.C. The early chapters of the Bible refer to the site as Elarra, and it is clearly an example of a very important ancient city abandoned after Hellenistic control was imposed on the area and never revived.

SEVENERS (see sa'Biya).
SEYCHELLES, a group of islands in the Indian Ocean to the north of Madagascar and east of Tanzania and Kenya, successively a French and British colony (1756-1976), and an independent republic since then (Republic of Seychelles, République des Seychelles, and Republik Sesel in its three official languages, English, French and Creole). The population of over 80,000 souls is mainly of African descent (brought there by French and British colonists as slaves), the minority consisting of Indian, Chinese and European elements. The prevailing religion is Roman Catholic, while Muslims form a minute portion of other confessions. The archipelago received its name in 1756 after Morceau de Selèches, one of Louis XV’s ministers.

Unlike the Comoros [see rūmrk] and Maldives [q.v.], the closest comparable archipelagos, the Seychelles had received little attention from Muslims, and the earliest existing mention of the Portuguese began to notice them in the first years of the 16th century. It seems, though, that the islands called Zarin in the sailing directions by Sulaymān al-Māhri [q.v.], dated 866/1462, were the Seychelles (G. Ferrand, L’Empire Sumatranas de Cireyoga, Paris 1922, 141-45; see facs. of the ms., B.N. Paris, fonds arabes 2292, published by Ferrand as Instructions nautiques et roteurs arabes et portugais des XV° et XVI° siecles, Paris, 1925, fols. 205-73b). This suggests that Muslim mariners did occasionally visit these islands situated not far from their routes between eastern Africa and western India; the etymology of the name of the westernmost island, Aldabra, is believed by some to be a distortion of the Arabic word al-Khadrā ("The Green [Island]"), while Zarin (Pers. zarrīn "golden") may go back to the legend of a gold-bearing island in the Indian Ocean ultimately identified with Sumatra (Ferrand, L’Empire, 145). The small Muslim cemetery at Anse Lascar on Silhouette Island reported by P. Vine (see Bibl.) probably dates from recent centuries, but only a closer examination of the tombstones may answer this question.

SEZA'I, Hasan Dede (or Efendi) (1080-1151/1669-1738), also known as Sheyh Hasan Efendi, a member of the noble family of the Ghalshinya (see Ghalshin, Shams). He was born in Morea (see Morea) where his paternal grandfather Kurbey-zade Hasan was a well-known figure. Tahsin Yaziçi (1A, art. Seza') disagrees with Björkman (1E, art. Seza') that he was of Greek origin. He was brought up in Morea, his later achievements indicating a good education. In 1097/1685, after the Venetians conquered Morea, he migrated to Istanbul, but leaving the capital he moved on to Edirne, from where Mehmed IV was attempting to stem Austrian and Venetian attacks on the Ottoman Empire, and entered the Sultan's service in the mukabale kalmesi.

Many details about his life and thinking, and of his opinions concerning his contemporaries, emerge from a collection of his letters published, with a six-page biography, under the title Melekbah-i Seza' (Istanbul 1829/1879). Those to whom they were written include family and followers, as well as statesmen and leading figures of the day.

Seza'i's interest in mysticism is shown to have developed from an encounter with a sheikh of the Chalwatiyya aboard the ship going to Istanbul and, in Edirne, he was to become a murid first of Mehmed Şirri at the khanak of Sheykh Aşılık Mûsa (a follower of İbrahim Ghalsheni) and on Mehmed's death, of Mehmed Lahi Fenâ'i (Shemsedd-in Sami, Kamâs al-šâdîm, iv. 2562). The latter charged Seza'i with the collection of rents from the khanak's waqf properties, giving him thelab of Iqlîbi (rent collector) Dede Efendi. He then became pîst-îzîyan of the Sheykh Wehi Dede Efendi khanak, but when Mehmed Lahi Fenâ'i died in 1112/1700-1 (and his successor in turn died shortly afterwards), Seza'i took his place. The khanak became known as the Seza'i kâtêk, and on his death he was buried at his own wish close to it in a shop (later converted into a türbe) alongside that of his predecessors. His son Mehmed Şadîk succeeded him at the Sheykh Wehi Dede Efendi khanak. Seza'i's writing, his letters and poetry in both diwas and folk style (see Vasti Mahir Kocaturk, Tekke şiri antolojisi, Ankara 1968, 400-2), show him as a man of religion first and a poet second. The main tenor of his diwas is mystical, and although he had been brought up to the demands of the Ottomans, his second volume of Şir-i Şevke (Yasân, 349) he is not generally considered very highly, lacking the occasional burst of poetic inspiration as regards mystical thinking or style (loc. cit.). Kocaturk (Turk edebiyatı tarihi, Ankara 1970, 554-5) points to a resemblance between himself and both Neslml and Yunus Emre [q.v.] in addressing the wider folk masses rather than the upper, intellectual classes, a trait that Seza'i shares also with Niyazi Misn (see L4, art. Seza'). His preoccupations centre round the Islamic makhls of art and society's sake and of romanticism and realism. Son of the statesman-author Sâmi Paşa, Seza'i was born in Istanbul, tutored in the family mansion and encouraged by visiting prominent writers. He started publishing

journalistic articles when aged 14, learned Arabic, Persian, French and German, and came under the influence of Nâmîk Kemâl [q.v.]. In 1879 he published Şir-i "The lion", a prose tragedy meant more for reading than staging. From 1880 to 1884 he served as Second Secretary at the Ottoman Embassy in London and later in the Foreign Ministry in Istanbul.

Seza'i's principal opus Seriçeb ("The adventure"), his only novel, came out in 1889. Influenced by Victor Hugo and Alphonse Daudet, it broke new ground with its realism notwithstanding its ornate, maudlin and occasionally poetic style. The tragic story of a slave girl, it is an indictment of slavery and of injustice against women. In 1892 Seza'i published Kûcük şepler ("Little things"), a collection of eight stories notable for his mastery of the genre and for a new sophistication in psychological analysis. Rumûz ul-edebl ("Symbols of literature"), a compilation of his essays, critical pieces, short stories, recollections and travel notes, came out in 1896.

Seza'i fled the Hamidian oppression in 1901 and lived in France. In 1902 he was a founder of the Committee for Union and Progress and writing for its periodical Şirâ-vi ummet ("Council of the nation") until 1908, when, with Constitutional government proclaimed, he returned to Istanbul. In 1909 he was appointed Ambassador to Madrid, serving until 1921. His last work İqlîl (a threnody for his beloved niece, to which he appended a miscellany of articles, letters, short stories, discourses, etc., appeared in 1923. He died in Istanbul in 1936.

Seza'i's literary work is generally viewed as significant in the transition of Turkish fiction into its realist phase.

SHABAN ROBERT (1909-1962) was the foremost Swahili poet of his generation, if not of the past three centuries. He also had a profound influence on contemporary Swahili prose writing. He was born at Machui, a village south of Tanga on the Tanzanian coast, the son of a Yao settler from Malawi and a local Digo mother. His only formal education in the western sense was in Dar es Salaam from 1922 to 1926, which enabled him to gain employment as a government clerk and later in the Colonial schools, and, as truly an autodidact, classes in traditional Swahili poetry, of which he had an encyclopaedic knowledge. A.C. Gibbe (see Bibli.) gives a bibliography of his collected poetry and of his prose works. His preoccupations centre round the Islamic religion and its moral teaching, in a manner that a European critic found comparable to the work of Dante. He is greatly concerned with the teaching of marriage, of the education of children, and particularly of girls. The Second World War was to him essentially a struggle between the forces of good and evil; he had little or no interest in politics.

SHABR. 1. In pre-Islamic South Arabia this term (spelt zæb in the musnad script) denotes a unit of social organisation for which there has grown up among specialists a convention of using the translation "tribe"; but this can be misleading for non-
specialists. The South Arabian sz'b was antithetic on one hand to the term Vr ( = Arabic ^ashd^ir] applied by the South Arabian sedentary communities to the nomad bedouin of central Arabia; and on the other hand, within the South Arabian sedentary culture itself, to the "house" (byt), a family group based on kinship whether real or fictitious. The former of these dichotomies was still current in 'Abbasid Arabic usage, when (as exemplified by al-Dschâbî in his R. al-
Atâkh) sz'hâb al-'Adîam denoted Persian sedentary communities and contrasted with sz'ha\b\ in al-'Arab, the Central Arabian nomads. The South Arabian sz'b was in no way kinship based, but rather a functional entity engaged in some common enterprise. The term has a certain fluidity, to the extent that it had no fixed place in an ordered hierarchy of comprehensiveness: in one instance, that of Ma\'în [q.v.] it was co-extensive with the kingdom, its subdivisions there being termed shi. It seems probable that in some cases it designated a group based on membership of a profession, or on religion (in the 4th century A.D. the more specific connotations are called sz'ab). But by far the commonest application was to a territorially-defined group of agriculturalists, whose functional unity rested on having shared responsibility for the irrigational installations of the specific area. A typical feature of these territorial groups was the possession of a "town" (khr) as centre for local trade, communal business, and a communal cult. In a few cases, such as Shâyân to the south-east of San'â\', town and "tribe" had the same name. Another feature of the sz'b is that the nisba formation, with terminal -i-n (pl. always of the pattern sz'b-i-n, e.g. šrub-y-ni z'ar-i-n "the Siwräheit(s')") tends to imply "tribal" membership, not membership of a byt. But it has been pointed out that in the 5th-6th centuries A.D. the plural nisba could denote the vassals of an influential family whose actual members were adîbâ [q.v.]; thus sz'ab-na are vassals of the Yazan (Ye\'ân) family [q.v.], while a family member was Dhu Yazan.

(A.F.L. BEESTON)

2. In modern political parlance, sz'ab is one of many Arabic terms which, used in modern social and political contexts, acquired new meanings alongside or instead of the old. On the eve of the modern era, however, the term was still devoid of such novel implications, retaining the old meaning of an exogamous group based on an ethnic or a people. When applied to Muslims, sz'ab sometimes carried a slightly negative sense, recalling separatist trends from early Islamic periods [see sz'ub\'un\']. Used with reference to non-Muslims, it was often tinged with the disparagement reserved for unbelievers. A pliant term, comparable to "people" in the broadest sense, sz'ab was applicable to groups of different scope and nature, an application it would retain even after assimilation to the modern state.

As so often, it was in references to developments in Europe that the notion of "people" first took on a new political sense. In early Arabic accounts of the French Revolution and Napoleon's era, sz'ab was used to denote the rulers—as opposed to the rulers—struggling to attain their deserved political rights. Evidently inspired by foreign sources, these reports referred to the sz'ab "rising in total revolt" against Louis XVI, and to the "French people's will" (iridat sz'ab\'anâ) which subsequently brought Napoleon down (Nikûlâ al-Turk, Mâdhikkarât, ed. Gaston Wiet, Cairo 1950, 2-5, 11-12, 195-6; Haydar al-Sz'hâbî, Lubnân fi 'sdh al-umârâ al-'zhâbihîyân, Beirut 1933, 214-15, 218-19, 320, 430, 602). Such usage became more frequent with the emergence of private Arabic newspapers which, reporting international affairs from the late 1850s on, discussed such ideas as "public opinion" (nây al-shâb\'), "people's will" (iridat al-shâb\'), and the relationship between the government (hzûma) and the sz'ab. The modern concept of popular sovereignty was also reflected in the compound wzkalât al-shâb\' "people's representatives" (and modilîs wzkalât al-sha\b\ "assembly of people's representatives"), in texts discussing parliamentary life in the West (cf. many examples and references in A. Ayalon, Language and change in the Arab Middle East, Oxford and New York 1967, 49 and n. 22). In the same vein, the Lebanese-Egyptian journalist Adîb al-Isâhî [q.v.] in 1877 defined "republic" as hûkumat al-sha\b\ bi û-sha\b\ "government of the people by the people", echoing Abraham Lincoln's phrase (al-
Dusrâ, Alexandria 1886, 49).

Being largely irrelevant to Ottoman political realities for much of the 19th century, the idea of popular sovereignty was at first discussed in foreign contexts only. But as the century drew to a close, it began to appear in texts specifically dealing with Ottoman political events and political ideas. The name al-Sha\b, owner of the Egyptian weekly al-Musîr, proudly defined himself as "one of the sz'ab\", warning the Ottoman sultan, "Woe to him who tries to withstand the sz'ab once it unites, makes a decision and sets out to achieve a noble goal" (al-Musîr, Alexandria, 2 May 1896). Mustafa Kemal [q.v.], the eloquent leader of early Egyptian nationalism, stated around the turn of the century that "every sz'ab has sacred rights in its homeland, which no one can infringe ... the sz'ab is the only true power" (Mustafa Kemal fi 34 rabi\'î, ed. 'Ali Fahmi Kemal, Cairo 1910, 288-91). Such application of the term, recurring with increasing frequency, gradually turned the word into a battle cry in the community's rightful struggle against those seen as encroaching on it, whether the government at home or a foreign force.

By the end of World War I, sz'ab had become a common item in Arabic political vocabulary, particularly that of nationalism, along with (but somewhat less frequent than) umma and watan [q.v.]. Capable of evoking strong popular emotions, it appeared in names of political parties (hzûb al-sha\b\)—in Syria (1925, 1947), Iraq (1925, 1946), Egypt (1930) and Lebanon (1945)—as well as of newspapers throughout the Arab world, implying a claim for public legitimacy by those leading the struggle for national independence and other political battles. In another part of the Ottoman Empire, the Republic of Turkey, populism (Turkish halkçilik) was adopted as a central principle in the state's official ideology, signifying recognition of the people's sovereignty. Thus it was incorporated in the 1924 Turkish constitution by Mustafa Kemal Atatürk [q.v.], who had established the "People's Party" (Kûlîk Partiyâ) the previous year as a vehicle of popular mobilisation. The notion's growing public attraction gave birth to another phenomenon: its abuse by autocratic or aristocratic politicians seeking to benefit from alleged popular support. Egypt's rigid Prime Minister Ismâ'îl Siîlî, who in 1930 founded a party and a paper bearing the name al-sha\b\', offers a conspicuous example of this cynical practice, which continued in later years there and elsewhere.

During the first half of the 20th century, reference to "the people" was made in a different sense, by thinkers advocating socialist and communist ideas. In their teachings, sz'ab (and its equivalents) signified the common people, the deprived lower classes, rather than the whole community. This was its sense in the
parlance of such leftist organisations as the 'Irāk Ahlī group of the early 1930s [see iṣāṣ], which label-
led its ideology al-shā`bīyya (Maḥdī Khadduri, Independent Power in the Middle East, 2, 1963-1975) and managed to form splinter groups calling themselves tabāri al-shā`bīyy ("people's liberation") and al-talīfa al-shā`bīyya li 'l-
tabāra ("popular vanguard for liberation"), which formed in the following decade (Rифāṭ al-Ṣaʿīd, Ta`līfa al-harakah al-shā`bīyya al-miṣriyya, Cairo 1987, iii, 196-9, 203 ff.). At that stage, however, the discus-
sion of such notions in Islamic countries was still on the sidelines of public political debate, and the ap-
plication of "the people" with such meaning was marginal.

By mid-century, with the struggle for national in-
dependence in most Arab countries won, the focus of political discourse had begun to shift to other issues, primarily sociopolitical reform. New leaders—in Egypt, Syria, 'Irāk, Algeria, Yemen, Sudan, Libya—having seized power, claimed to be acting on the basis of their own politics and corrupt order. In the revolutionary ideologies which they preached, leftist ideas, hitherto marginal, came to play a major role, and "the people" were given a prominence unprecedented in their societies' tradi-
tion. The shā`b was now identified as the common masses, primarily workers and peasants (equally often referred to as джама`ат "masses"), those who previously had been outside the circle of power, and were now hailed as the mainstay of reform. Thus in the Egyptian National Pact (al-使之lāh al-waṣām al-waṣām) of 1962, the shā`b was the hero whose will and resolve ac-
counted for the success of the 1952 revolution and guaranteed its future. Its objectives were social justice, military might and "healthy democratic life"; its enemies were imperialism, tyranny, feudalism and monopolism (al-Dżumhūrīyya al-`Arabīyya al-Muttahida, ماجد al-mishrīyya, 21 mayy 1962, Cairo n.d., 3-6 et passim). Likewise, in Baθth ideology, which the régimes in Syria and 'Irāk adopted in the 1960s (if in different versions), the sha`b is regarded as the leader of renaissance, battling domestic and foreign oppression, and striving for social and popular democracy (Mīḥāl `Allāk, Fi sabīl al-baθth, Beirut 1959, 172-85; Hizb al-baθth al-`Arabīl `Allāt al-Ightirākī, al-Manḥaj al-manḥaj li-`l-qaṣar al-`Arabī min ād, London 1965, 72-4; and the Egyptian Marxist ideolo-
gy, al-Ma`ṣūr, Dar al-Šīrā`īyya (al-Manḥaj, Cairo 1965, esp. 9, 21-9). This is also the sense of the notion in the con-
struct ma`ṣūlī al-shā`b "People's Assembly", used to designate legislative bodies in the revolutionary régimes of Egypt, Syria, South Yemen and several other places. Two states even incorporated the word, in adjectival form (sha`bīyya), in their official names: "The People's Republic of South Yemen" (1967, renamed as "The People's Democratic Republic of Yemen" in 1970), reflecting its leftist doctrine and pro-Soviet orientation; and "The Arab Libyan People's Socialist Dżumhūriyya" (1976, to which the adjective "the Great" was added in 1986), underscor-
ing the popular nature of its political structure. Leftist ideas also inspired the foundation of many "people's fronts" of political action, fashionable in the late 1960s and the 1970s, namely, groups purporting to advocate social reform along with other, often more important objectives—e.g., "The Popular Front for the Liberation of Oman and the Arabian Gulf", "The Popu-
lar Front for the Liberation of Arab Canterbury", etc.

Shā`b has thus come to imply a variety of concepts. In addition to its use in the broad sense of "people" or "nation", it also means the governed people as op-
posed to the government and, still more narrowly, the lower classes striving to recover their derived

political rights. The distinction between these mean-
ings is often blurred, sometimes intentionally so, as in the rhetoric of revolutionary leaders who, appealing to "the sha`b", seek at once to speak for the whole nation and to voice concern for the deprived classes' grievances. In the second half of the 20th century, this last phenomenon had become a prominent aspect of the application of sha`b.

(A. Ayalon)

SHABA [see Katanga].

SHABADHA, شهادتا (also with final َd for ُd) (...) preparation, sleight of hand, and from it, mushāb/ţadh, magician, trickster. The word is paraphrased by the lexicographers, following al-Layth (b. al-Muzaffar) [g.v.], by kaṣīf al-yaḍ and ʿalbdh (pl. of ʿalbdha), see al-Azhari, Taḥāib, i, 405. Fihrīst, 312, mentions as "the first to perform sha`baddha in Islam" a certain `Abīd/Ubayd al-Kayyis who also wrote a Kitāb al-shahabaddha, and another mushābīd nicknamed "Mill Shaft" (Kurṭ al-rāhah), about both of whom unfortunately nothing further seems to be known.

According to al-Djawbarī [g.v. in Suppl.], among all the fraudulent practices of the large underclass of crooks and swindlers, the activity of the mushābīd is distinguished by its innocuousness; his tricks are performed as harmless entertainment. Ibn Khalīūn, Mukaddima, iii, 126 ff., tr. Rosenthal, iii, 158 ff., uses the term in a more general manner and understands it scientifically as characterising one of three kinds of sorcery [see šīh]. He explains the underlying process as the transformation, by the power of the imagina-
tion, of something imaginary into imagined existence in the world of the senses; for the religious law, it would fall under forbidden sorcery, but since it is not real (and, therefore, presumably incapable of doing actual evil) and something irrelevant that is easily avoided, it was certainly in the eyes of Ibn Khalīūn, not as bad as the other kinds of sorcery (and not really forbidden).

The term's etymology has interested philologists ancient and modern. The Arabic lexicographers stress that it is not true Arabic (see Lane, 1559a). The suggested derivation from Aramaic/Syriac šawabdhīh "to subdue" is linguistically adequate (both šawabdhīh and ṭadhīh are not inconsistent with this assumption) and conceptu-
ally plausible: the final َd (form X َd) is a sorcerer's task, see Fihrīst, 309, i. 2). An Arabisation of Persian šabbāz seems less likely, as does a con-
flation with the root ʿ-ṭ-ṭh, the lexicographers' deriva-
tion from a supposed meaning "quickness" and šawabdhīh "express courier" if anything reverses the actual process.

ṣahr, ch. 25, tr. R. Khamaw, Le voile arraché, Paris 1979-80, ii, 135-142; the promised scholarly edition by S. Wild has apparently not yet appeared. See further, C. E. Bosworth, The mediaseval Islamic under-
world, Leiden 1976, i, 128, ii, 51, 299, 333, with the older literature.

(Ф. Rosenthal)

SHABAK, a heterodox religious community living in several dozen villages east of Mawil, in a triangle bounded by the Tigris and the Greater Zāb. Their numbers were in 1925 estimated at around 10,000; the 1960 'Irākī census enumerated 15,000, living in 35 villages (Vinogradov 1974: 208). Recent estimates tend to be considerably higher.

The Shabak commonly consider themselves as Kurds, but have since the 1970s been subject to concerted efforts at Arabisation, culminating in the destruction of around 20 Shabak villages in 1988. The
language of their prayers and religious ritual is Turkish. Most Shabak are multilingual, which has given rise to claims that they are really Turcomans or Kurdish speakers or even Arabs; their mother tongue, however, or at least that of most Shabak, is a dialect of the Gürani branch of Iranian languages. Their religion is closely related to that of the Anatolian ʿAlewis (Kızılbaş); one of their invocations, as given by al-Sarrāf, explicitly refers to Hādji Bektar and the adepts of Ardabil (Erdebil), the local pronunciation of which is a key word in the founders of their spiritual path. Some of the religious poems sung in their ritual meetings are attributed to Shah Ismaʿil and to the Anatolian saint Pir Sultan Ābdal. A basic tenet, expressed in several poems and invocations, is the Shabak’s belief that Allah, Muhammad and ʿAli constitute a triinity, in which “Ali appears as the dominant manifestation of the divine.

The “sacred book” of the Shabak, known as Kitāb al-Mandik or Buyarduk (Buruk, in the local pronunciation) and published integrally in al-Sarrāf’s monograph (1902), consists of two parts. The first part is a question-and-answer dialogue between Shaykh Safl al-Din and his son Āḏar al-Din on the āḏāb of the tāḏkā, in which there is now indication of extremist Shiʿi influences; the second part, the buyarduk proper, resembles in content the texts of the same title found among the Anatolian ʿAlewi communities. It consists of various teachings and instructions associated with the imāms ʿAli and ʿAbī Ḥāmid al-ʿAṣīf and discusses the relationship between teacher (mürbēḥ) and disciple (tāḏīb), and the institution of ritual brotherhood (muyṣībīk).

Their Safawi-Kızılbaş affiliation distinguishes the Shabak from neighbouring heterodox communities, the Yezdis, their relatives of the local tribe, and the Şarlı, see Şarlıyya, to their southeast. The latter are, like the Shabak, non-tribal peasants, sharecropping on land belonging to urban-based sayyid families who have great moral authority over them due to their descent from the Prophet and ʿAli. The Shabak are probably related to the Arzamians and the Mongols; or all of Shabakhtan formed part of the short-lived Khurāsān Kāmil; briefly, the Kh-visible, or most of them has been captured by a reḥber or guide, and in the major annual celebrations, twelve functionaries have to be present: ṭir, reḥber, lamp-bearer (hāmāl al-dīrāj) and a buskeeper (bahāb). The ʿAlewi communities of Anatolia also knew these twelve functionaries (a ṭir a ḡimṣ) in their annual festivities from generation to generation. All rituals have to be led by a ṭir. In most of them he has to be assisted by a reḥber or guide, and in the major annual celebrations, twelve functionaries have to be present: ṭir, reḥber, lamp-bearer (hāmāl al-dīrāj), gown-bearer (hāmāl al-miknasa), cup-bearer (ṣakkā), butcher, four attendants (ḫādīm) and two gatekeepers (bāsawād). The ʿAlewi community of Anatolia also knew these twelve functionaries (on ikh hizmet), although the names given to each vary. The Shabak themselves do not appear to use the name at all, however.

Pilgrimages are another important part of the ritual calendar. Two important local shrines, visited at the ʿid al-ʿatīf and ʿid al-adhā, are named ʿAli Rash (“Black ʿAli”) and ʿAbbās. Shabak identify the former with the Imām ʿAbī Ḥāmid al-ʿAṣīf b. Ḥusayn, the second with Ḥusayn’s younger brother ʿAbbās, who died at Karbalā. A different type of pilgrimage consists of the stoning of the alleged grave of ʿUbayd Allāh b. Ṣiyād, the Umayyad governor of ʿIrāk who was responsible for the drama at Karbalā. This takes place throughout the year.

Bibliography: Père Anastase Marie al-Karmali’s misleading but influential articles in al-Mashritt, ii (1899) and v (1902) have now been superseded; the only serious work on Shabak beliefs and practices is Ahmad Ḥāmid al-Šarrāf, al-Šarrāf min šarāf al-šāfī (Beirut, 1957); a useful study written in the local language is given in M. Leezenberg, The Shabak and the Kakais: dynamics of ethnicity in Iraqi Kurdistan (technical note, Inst. for Language, Logic and Computation, University of Amsterdam, 1994; also to appear in Studiaurdica, Paris).

(M. VAN BRUINESSEN)
SHABAKHTAN — SHA'BAN

In Morocco, on the last day of Sha'bân a festival is celebrated called the Sha'bânâ which resembles a carnival. A description of it is to be found in L. Brunot, La mer dans les traditions et les industries indigènes à Rabat et Salé, Paris, 1901, 99-108.

SHA'BÂN, the name of two Mamlûk sultans.

1. AL-MALIK AL-KÂMIL, (son of al-Nâsir Muhammad b. Kalâwûn [q.v.]), who succeeded his full brother, al-Sâlih Ismâ'il, on the latter's death on 4 Rabî' II 746/4 August 1345.

His accession was brought about by a faction headed by his stepfather, Arghûn al-'Alâî, who had been in effect regent for Ismâ'il. A rival faction led by the viceroy of Egypt, Almalik, supporting his half-brother HâdjdjâT, rapidly lost power, and Arghûn became the dominant magnate throughout the reign. His sound political advice to the sultan served as a moderating influence, but was frequently disregarded. Sha'bân's authority deteriorated rapidly from the beginning of 747/April 1346. Almalik and his colleague, Kumârî, were sent to prison in Alexandria, and their property was sequestrated. The death of Yusuf, another son of al-Nâsir Muhammad, in Rabî' II July-August, gave rise to suspicions that the sultan was implicated. The final crisis of the reign resulted from Sha'bân's determination to make a state visit to the Hidjâz, which led to heavy demands on the peasantries of Egypt for grain, and on the Arabs of Syria for camels, while it would have involved the Mamlûk military aristocracy in ruinous expenditure. A conspiracy to overthrow the sultan was hatched by the governor of Damascus, Yâlbughâ al-Yahyawî. When Sha'bân seized two of his remaining brothers, HâdjdjâT and Husayn, and placed them under guard the sultan two days previously.

2. AL-MALIK AL-ÂSHRAF, Mamlûk sultan (grandson of al-Nâsir Muhammad b. Kalâwûn [q.v.]), who succeeded his cousin, al-Mansûr Muhammad, when the latter was deposed on 15 Sha'bân 764/30 May 1366.

In this month is likewise devoted to the dead; the tombs are cleansed, religious meals (kândûrî [q.v.]) are given and it is the dead who profit from the merits of these good works. The night of the middle of Sha'bân bears a particularly sacred character, as is attested by the kândûrûs and the salâts which are called salât al-hâdîjâ or, on account of certain eulogies, salât al-tasâbîh. During the last days of the month, a market is held in the capital.

At Mecca, Raşdîb, not Sha'bân, is devoted to the dead. Here, in the night of 14th Sha'bân, religious exercises are held; in the mosque, circles are formed which under the direction of an imân recite the prayer peculiar to this night.

In Atcheh, this month is likewise devoted to the dead; the tombs are cleansed, religious meals (kândûrî [q.v.]) are given and it is the dead who profit from the merits of these good works. The night of the middle ofSha'bân bears a particularly sacred character, as is attested by the kândûrûs and the salâts which are called salât al-hâdîjîa or, on account of certain eulogies, salât al-tasâbîh. During the last days of the month, a market is held in the capital.

At Mecca, Raşdîb, not Sha'bân, is devoted to the dead. Here, in the night of 14th Sha'bân, religious exercises are held; in the mosque, circles are formed which under the direction of an imân recite the prayer peculiar to this night.

In Morocco, on the last day of Sha'bân a festival is celebrated called the Sha'bânâ which resembles a carnival. A description of it is to be found in L. Brunot, La mer dans les traditions et les industries indigènes à Rabat et Salé, Paris, 1901, 99-108.

His accession was brought about by a faction headed by his stepfather, Arghûn al-'Alâî, who had been in effect regent for Ismâ'il. A rival faction led by the viceroy of Egypt, Almalik, supporting his half-brother HâdjdjâT, rapidly lost power, and Arghûn became the dominant magnate throughout the reign. His sound political advice to the sultan served as a moderating influence, but was frequently disregarded. Sha'bân's authority deteriorated rapidly from the beginning of 747/April 1346. Almalik and his colleague, Kumârî, were sent to prison in Alexandria, and their property was sequestrated. The death of Yusuf, another son of al-Nâsir Muhammad, in Rabî' II July-August, gave rise to suspicions that the sultan was implicated. The final crisis of the reign resulted from Sha'bân's determination to make a state visit to the Hidjâz, which led to heavy demands on the peasantries of Egypt for grain, and on the Arabs of Syria for camels, while it would have involved the Mamlûk military aristocracy in ruinous expenditure. A conspiracy to overthrow the sultan was hatched by the governor of Damascus, Yâlbughâ al-Yahyawî. When Sha'bân seized two of his remaining brothers, HâdjdjâT and Husayn, and placed them under guard the sultan two days previously.

Bibliography: Notices of some leading personalities of the reign are given by their contemporaries al-Safādī; e.g. Sha'bân, Arghûn al-'Alâî, Almalik (Wâfî, xvi, 153-5; viii, 355; ix, 372-3, respectively). There are detailed accounts of the reign by the 9th/13th-century chroniclers, Makrîzî, Sulâkî, ni/3, 680-713; and Ibn Taghribîrî, Nâdîjîm, x, 116-41.

2. AL-MALIK AL-ÂSHRAF, Mamlûk sultan (grandson of al-Nâsir Muhammad b. Kalâwûn [q.v.]), who succeeded his cousin, al-Mansûr Muhammad, when the latter was deposed on 15 Sha'bân 764/30 May 1363.

Owing to Sha'bân's youth (he was born in 754/1353-4), a series of high Mamlûk amîrs held power in the early years of his reign. Yâlbughâ al-'Umârî and Taybûgha al-'Tawîl, originally Mamlûks of al-Nâsir Hasan [q.v.], at first shared the regency, until Taybûgha was ousted in Dhu 'l-Hijja 767/March 1366, when Yâlbughâ assumed sole power. In the meantime, a Crusading expedition under King Peter I of Cyprus briefly occupied Alexandria (Muharram
767/October 1365), but withdrew as Yalbugha and the sultan advanced to relieve the city. The regent thereupon set foot on the construction of a war-fleet for, he asserted, a counter-offensive. An appeal from the king of Prosecutors for aid against his usurping nephew led to the organisation of an expeditionary force (Rabi‘ I 767/December 1365), and action against Arab tribesmen who were ravaging the Aswān frontier-region. In Rabi‘ II 768/December 1366 Sha‘bān, resenting Yalbugha’s domination, concluded with him the regent’s mutinous Mamlūks to overthrow him. The sultan did not, however, finally free himself from the control of the Mamlūk magnates until 769/1370, when he recaptured his capital. This numismatic renaissance began. There was an infrastructural attack on Tripoli by Peter I in Muḥarram 769/September 1367, but otherwise the sultanate was in no danger from any foreign power. Sha‘bān’s quiet reign was disturbed in Muḥarram 775/June 1373 by a dispute with his stepfather, the atābak Uldājā al-Yuṣufi, over the inheritance from the sultan’s mother, Khawānd Baraka, who had died in the previous month. Uldājā was defeated in conflict over the crown of Mamlūk of Mamlūk and Ibn Taghribirdi disagreed as to whether the two risings were concerted. On reaching Kubbat al-Nasr outside Damascus, he asserted, for a counter-offensive. An appeal from the sultan’s household. Disregarding advice, and in spite of his recent recovery from a severe illness, he insisted on making a state pilgrimage to the Hidjaz. When he was encamped at the pass of Aya [q.v.], his Mamlūks revolted, demanding fodder and pay. The situation got out of hand, and he fled with a few companions towards Cairo (2 Dhū‘l-Ka‘ba 778/1 March 1377). While they were on their way, Mamlūk rebels gained control of the Citadel, and proclaimed Sha‘bān’s infant son, ‘Ali, as sultan. Al-Maqrīzī and Ibn Taḥrīrīdī disagreed as to whether the two risings were concerted. On reaching Kubbāt al-Nasr outside Cairo, Sha‘bān’s companions were discovered and killed. He himself was found and strangled two days later (4 Dhū‘l-Ka‘ba/15 March). His son succeeded him, as al-Malik al-Mansūr ‘Ali (778-83/1377-81).

Hol) **SHA‘BĀNIYYA**, a mystical brotherhood arising out of the Khlawatiyya [q.v.] at Kastamonu in northern Anatolia towards the middle of the 10th/16th century. Its prē, Sha‘bān Welī, born at Tāshkōprü in this same region, was initiated into the Khlawatiyya precepts by the shaykh Khayr al-Dīn Tokāldī of Bolu on his return from a period of study in Istanbul, and died in 970/1368-9 at Kastamonu, where he directed a group of his disciples after spending twelve years at the University of Edirne. There, he established two prominent sources on the origins of the Sha‘bāniyya which is the work of one of Sha‘bān Welī’s successors, ‘Omer Fu‘ādī (d. 1046/1636), the Menāṣik-i shāfi‘i-i Fīrād-i Khlawatiyya hadfati-i Sha‘bān Welī. This work on the life and miracles of the founder was printed at Kastamonu in 1294/1677 in a volume also containing the same author’s Risāla-yi türbe-nāme, which deals with the building of Sha‘bān Welī’s tomb at the beginning of the 11th/17th century. ‘Omer Fu‘ādī is also said to have written an enlarged version of the Menāṣik-nāme, unfortunately lost. Sha‘bān Welī himself left behind no works. For almost a century, the new order’s network seems to have remained an Anatolian one. However, in the capital, one of the founder’s khalīfas, Shaykh Shudja‘ (d. 1347) (q.v.) exercised his functions at the little town of Cerkesh, to the south-west of Kastamonu. More than Muhammad...
Nasühi, he seems to have set his mark on the brotherhood. He lightened the burden of the rules by introducing a mode of life which he called "tekke," a disciple's heart, in imagination, with that of his spiritual master, committing oneself to him totally; to be linked with a tekke, first recite the brotherhood's psalms (tawba), then the brother's name (sahib), and after a particular imprint to the order, notably by repeating the three formulae of the tekke, a mode of life which he considered to be in a state of degeneration (when the tekke which he headed in Istanbul was burnt down in 1833, he refused to rebuild it and settled down in a simple konak). The fourth and last person considered as founder of a branch of the Shabankara country abounded in strong places, e.g. Ig, Istabanan (or Istabanat), Burk, Tarum, Khayra, Kurm, Runluz, Lar Nurylz, which has not survived in Turkey (see Bibliography). Shabankara was reckoned among the warm countries, Shabankara was reckoned among the warm countries (garnsir); but it enclosed also regions of a moderate temperature, characterised by repetition of the three formulae Lâ ılah illâ 'llah, Allah and Hu, and then ending by standing up in a balka. According to recent publications attesting the activities of the Shabankara in Turkey (see Bibliography), these belong to the Čerkešiyya branch and consider Mustafa Čerkeşi as their second šeh. In Kastamonu there exists a "Şa'ban-ı Veli Association of Kastamonu" which looks after the ancient centre of the order. This consists of a much visited complex, including a mosque which until 1925 served als as a tekke and in which one can still see a series of small cells intended for spiritual retreat, a türbe, an incription and a fine-textured white turban falling back. The association of the Shabankara consisted chiefly in corn, cotton, dates, (dry) grapes and other fruits; at Darabdjird, mineral salt was found. Among the most fertile districts were the Nakshbandiyya and Kadiriyya), is said to have been the author of an epistle said to have been written at the request of Sultan Mahmud II (R. ft. dhikr, dhikr, unceasingly. CerkeshI made by Karabash Well, reducing the precepts for members from twenty to three: to be linked with a tekke, first recite the brotherhood's psalms (tawba), then the brother's name (sahib), and after a particular imprint to the order, notably by repeating the three formulae of the tekke, a mode of life which he considered to be in a state of degeneration (when the tekke which he headed in Istanbul was burnt down in 1833, he refused to rebuild it and settled down in a simple konak). The fourth and last person considered as founder of a branch of the Shabankara was Ibrahim Kushadali (d. 1915), a disciple of Mustafa Čerkeşi. He had numerous disciples (including some provincial governors and some women) and gave a particular imprint to the order, notably by rejecting residence in a tekke, a mode of life which he considered to be in a state of degeneration (when the tekke which he headed in Istanbul was burnt down in 1833, he refused to rebuild it and settled down in a simple konak). He was certainly influenced by malânî doctrine, but equally, he placed the shari'a in the forefront, insisting on the practice of râbi'a (liaison of the disciple's heart, in imagination, with that of his shaykh) and on that of khalifat. Under the impulse of these different persons, the Shabankara gradually became that branch of the Khalwatiyya with the most centres in the Ottoman capital. It even exceeded those of the Sunbuliya [q.v.] in the last decades of the 19th century, with 25 tekkes, of which about ten were on the Asiatic shore, mainly at Üsküdar. The tekke likewise spread vigorously in northern Anatolia, in a zone extending from Istanbul to Tokat, above all in the triangles of Fars and Kirman, of a special spurt of growth in the second half of the 19th century, notably in Bulgaria (at Nevrkop/Gocce Delcev and Trnovo), at Iskece/Xanthi in Thrace, at Bitola in Macedonia, and also in Bosnia-Hercegovina, where tekkes were founded from ca. 1865 onwards at Sarajevo, Severin, Bijeljina, Donja Tuzla and Višegrad under the stimulus of the shaykh Muhammad Sayd al-Din Ibızović. It may be noted that Ya'kub Khan Kâshgharî, who was one of the disciples of Muhammed Tewfik Boshevi, khalifat of Ibrahim Kushadali (as well as being also affiliated to the Nakâbîyana and Kâdirîyya), is said to have contributed to spreading the order in India; but it does not seem to have put down sturdy roots there. Today, the Shabankara, which has not survived in the Balkans, is represented uniquely in Turkey, where it is the most active branch of the Khalwatiyya. In Istanbul itself, there are at least fifteen mosques where the Shabâbî dervishes meet for dhikr, generally on Thursday or Sunday evening. For the ceremony, each adept wears a ghiyâr and a fine-textured white turban falling on the back. The dhikr unfolds in three phases: seated in a circle, in darkness, the dervishes first recite the brotherhood's şir, then the dhikr properly speaking, characterised by repetition of the three formulae Lâ ılah illâ 'llah, Allah and Hu, and then ending by

(Nathalie Clayer)

ŞABANKARA, the name of a Kurdish tribe and of their country in southern Persia during mediaeval Islamic times. Ibn al-Athir spells the name Şabânkârân, whilst Marco Polo rendered it as Sincona. According to Ḥamd Allâh Mustawfi, the Şabankârân country was bounded by Fârs, Kirmân and the Persian Gulf. At present, it falls within the ustan or province of Fârs, and there are still two villages, in the šehrestân of Djamhrûn and Bu Şahr respectively, bearing the name Şabankârân (Razmârâ (ed.), *Parâng-i djaqãnîf-e-i râmânî*, vii, 139). Mustawfi says that the capital was the stronghold of Ɨg or Ɨd, other localities of the province, which was divided into six districts, were: Zârkân (near Ɨg), İstâbanân (or İstâbanâ), Burk, Târum, Khâyra, Nâyriz, Tûrûntûl (q.v.) and Darâbdjîrd (q.v.). As for the ustan or province of Fârs, and there are still two villages, in the šehrestân of Djamhrûn and Bu Şahr respectively, bearing the name Şabankârân (Razmârâ (ed.), *Parâng-i djaqãnîf-e-i râmânî*, vii, 139). Mustawfi says that the capital was the stronghold of Ɨg or Ɨd; other localities of the province, which was divided into six districts, were: Zârkân (near Ɨg), İstâbanân (or İstâbanâ), Burk, Târum, Khâyra, Nâyriz, Tûrûntûl (q.v.) and Darâbdjîrd (q.v.). As for the ustan or province of Fârs, and there are still two villages, in the šehrestân of Djamhrûn and Bu Şahr respectively, bearing the name Şabankârân (Razmârâ (ed.), *Parâng-i djaqãnîf-e-i râmânî*, vii, 139). Mustawfi says that the capital was the stronghold of Ɨg or Ɨd; other localities of the province, which was divided into six districts, were: Zârkân (near Ɨg), İstâbanân (or İstâbanâ), Burk, Târum, Khâyra, Nâyriz, Tûrûntûl (q.v.) and Darâbdjîrd (q.v.). As for the ustan or province of Fârs, and there are still two villages, in the šehrestân of Djamhrûn and Bu Şahr respectively, bearing the name Şabankârân (Razmârâ (ed.), *Parâng-i djaqãnîf-e-i râmânî*, vii, 139). Mustawfi says that the capital was the stronghold of Ɨg or Ɨd; other localities of the province, which was divided into six districts, were: Zârkân (near Ɨg), İstâbanân (or İstâbanâ), Burk, Târum, Khâyra, Nâyriz, Tûrûntûl (q.v.) and Darâbdjîrd (q.v.). As for the ustan or province of Fârs, and there are still two villages, in the šehrestân of Djamhrûn and Bu Şahr respectively, bearing the name Şabankârân (Razmârâ (ed.), *Parâng-i djaqãnîf-e-i râmânî*, vii, 139).
rebuilt later on) and Burk. At the time of Mustawft, the fortifications of Darabdjird were ruinous, but the mountain-pass of Tang-i Ramba, to the east of the town, had a strong castle. In the chapter on the Muzzaffarid dynasty, intercalated in the manuscript of Mustawft’s Tārīkh-i guzīda, facets. ed. Browne, 665-6, there is also mention of the fortifications of Shabānkāra, the fertility of that country (“beautiful and cultivated like the garden of Frram”), its mills, bāzârs, etc.

The Shabānkāra tribe were Kurds; in Ibn al-Balkhi’s time (early 6th/12th century) there were five subdivisions of them, viz. the Ismā‘īlī, the Rāmānī, the Karzuwi, the Mas‘ūdī and the Shākānī. They were herdsmen, but also intrepid warriors, who more than once, in the course of history, became a power to be reckoned with. Their chiefs boasted descent from Ardakhir, the first Sāsānī, or even from the legendary king Manuchīr. Leaving aside the exploits of the Shabānkāra in Sāsānī times (as e.g. the fact that Yazdādjiird III is said to have taken refuge among them at the time of the Muslim invasion), the history of the Shabānkāra begins at the epoch of the decline of Bu‘yid power.

The Ismā‘īlīs were regarded as the most noble in descent; their chiefs are said to descend from Manučhr and to have held in Sāsānī times the function of Ismā‘īlī Amir. So far as we know, this tribe came into collision with a great Muslim power was in the days of the Ghūznawī Mas‘ūd b. Mahmūd (512-570/1001-1055), whose general Tāsh Farrāsh drove them from the environs of Isfahān, so that they were compelled to remove southward. But now they came within the sphere of Bu‘yid influence. The Bu‘yids not suffering their presence, they had to migrate once more, until they settled in the Darābdjīrī district. Ibn al-Balkhi gives the history of their ruling family at some length. It may be sufficient to state that in the course of the quarrels which arose among the kinsmen one of them, Sālk b. Muhammad b. Yahyā, called to his aid the mighty Fādūlya of the Rāmānīs [see FA‘DULLAY], at the time Ibn Balkhi wrote. Sālk’s son Husūya was the ruler of the Ismā‘īlīs, but his kinsmen contested his supremacy.

The Karzuwi Shabānkāra, taking advantage of the decline of the power of the Bu‘yids, obtained Kāzārūn [q.v.], but were driven out of it by Cāwulī when he made his expedition in Fārs. The Mas‘ūdīs also came to some power in the days of Fādūlya; the Karzuwi chief Abū Sa‘d had also served under that Rāmānī ruler. For some time, the Mas‘ūdīs possessed Fīrūzābād and part of Shāpūr Khūra, but they were no match for the Karzuwi, whose chief, Abū Sa‘d, defeated and put to death Amūrīyā, the Mas‘ūdī prince. When, later on, Cāwulī ruled Fārs, he installed Amūrīyā’s son Vīhrāsī as ruler of Fīrūzābād. The Shākmās, rapacious mountaineers of the coastland, preserved their historical interest. They also were subdued by Cāwulī.

Historically, the most important tribe was the Rāmānīs, to whom belonged Fadūlya (Ibn al-Āthīr, x. 48, calls him Fadūlī), the mightiest amīr of the Shabānkāra. This man, the son of a certain ‘Ali b. al-Hasan b. Ayyūb, who was the chief of his tribe, rose to the rank of Shāshkāl in the service of the Shāhīb-‘Adī Muhādhdhib al-Dawla Ḥībat Allāh, the wālī of the Bu‘yid ruler of Fārs. Even before this time, the Bu‘yids had been troubled by the Shabānkāra. The Ta‘rīkh-i guzīda, 432, mentions an insurrection of a certain Ismā‘īl of Shabānkāra against ‘Imād al-Dīn Abū Khādir Marzubān (415-50/1024-48). This prince was succeeded by his eldest son al-Makh al-

Rahīm Khusrū Fīrūz [q.v.], who died in 447/1055 and left the throne to his younger brother Fūlād Sūtūn, the royal master of the Shāhīb-‘Adī. Fūlād Sūtūn put to death his brother, whereupon Fadūlya rose in rebellion. He succeeded in capturing the prince himself and his mother, the Sayyida Khurṣūnīya. Fūlād Sūtūn was confined in a stronghold near Shīrāz, where he was murdered in 545/1062; the Sayyida was, by order of Fādūlya, suffocated in a bath. The Shabānkāra chief, now ruler of Fārs, soon came into collision with the Saldjūk power. After fighting without success against Kāwūr, the brother of Alp Arslān, he submitted to the latter, from whom he received the governorship of Fārs. Fādūlya afterwards revoluted; the stronghold of Khūrshāh, to which he had betaken himself, was besieged and taken by the great Nīzām al-Mulk, and Fādūlya, after many vicissitudes, captured and executed (464/1071). Such is in substance the account of Ibn al-Balkhi, a younger contemporary. Ibn al-Āthīr represents these events somewhat differently (x. 48-9; the Kūrd Fadūlī, who, according to Ibn al-Āthīr, ix. 289, held part of Adhar-baydān and raid the Khazars in 421/1030, cannot, of course, be identified with the Shabānkāra chief and was, in fact, an amīr of the local line of the Shaddādīīds [q.v.]). With the Fādūlya affair is connected without any doubt, the expedition of Alp Arslān to Shabānkāra. This commander, Fāhhr al-Dīn Cāwulī, who died in the year 510/1116 (the Ta‘rīkh-i guzīda wrongly places his death under the rule of Mas‘ūd b. Muḥammad b. Malik Shāh), governed Fārs on behalf of the Saldjūk ruler of ʿIrāk, Muḥammad b. Malik Shāh. The Shabānkāra Amir al-Ḥasan b. al-Mubārīz Khusrū refused to pay homage; thereupon, Cawulī attacked him suddenly. Khusrū had a narrow escape, being saved by the help of his brother Fađlūya. Now Cawulī subdued Fađlūya and Dжалhm in Fārs; he then besieged for some time the stronghold where Khusrū had taken refuge, but perceiving that the siege would be a long and hard one, he came to terms with the Shabānkāra chief. Later, Khusrū accompanied the Atabeg on his expedition to Kirmān, the ruler of which had sheltered the prince of Darābdjīrī, Ismā‘īlī. In this connection, Ibn al-Āthīr mentions the fact that Cawulī requested the ruler of Kirmān to hand over some Shabānkāra forces who had taken refuge to him.

After these events, the Shabānkāra seem to have kept quiet during the rule of Muḥammad b. Malik Shāh, but new troubles arose when, under the following sultans: Muḥammad b. Malik Shāh (524-538/1130-1143), the wazīr Fađlūya, who afterwards became the first independent sovereign of the Greater Lur, died in 555/1160 [see LUR-I BUZURJ], made himself formidable by a victory over the chiefs (hukkan) of Shabānkāra. In 564/1168 the Shabānkāra sheltered Zangī b. Dīklā, who was expelled from Fārs by the ruler of Khūzistān.

We now enter on the most glorious period of
Shabankara history, which, however, lasted only a few years. The Shabankara chief Kutb al-Din Mubarriz and his brother Niẓām al-Dīn Mahmūd, amirs of Iṣfahān, availed themselves of the disturbances which arose in the region after the extinction of the ruling Saljūq dynasty of that country. They responded to the call of the ważīr ʿNāṣīh al-Dīn, who solicited their aid against the Ghuzz. Contrary to the intention of the ważīr, but assisted by the citizens, they occupied, before giving battle to the Ghuzz, the capital Bārdsīr and so secured the dominion of Kirmān (507/1209-1).

The two amirs now defeated the Ghuzz, but in the sequel the Ghuzz by the aid of the records of the Atabeg of Fars compelled them to return to their realm after having appointed as their nāʿīb one of the nobles of Kirmān. At this point, the Ghuzz appeared once more to repeat their ravages. One of the nobles of Kirmān, Hurmuz Tādū ḍ al-Dīn Shāhshāh, concluded a treaty with them. Niẓām al-Dīn marched against him from Iṣfahān; in the battle which ensued Hurmuz fell and his Turkish allies were routed. Shortly after, a prince named ʿAdjam Shāh b. Malik Dīnār, a protégé of the Khārazm-shāh ᾱlāʾ al-Dīn Muḥammad, ʿAdjam Shāh had concluded an alliance with the Ghuzz, who assisted him in his attempts to secure the realm of Kirmān. In short, the course of events was as follows. The prisoner Niẓām al-Dīn was sent to the Salghūrid Atabeg of Fars, but if ʿAdjam Shāh expected to remain in the quiet possession of Kirmān, he was disillusioned by a polite message from the Atabeg, Sayd b. Ẓangi, to the effect that Sayd was sending his general ʿĪzz al-Dīn Faḍlūn to accelerate the reduction of the garrisons mentioned above (600/1203-4). The troops of Fars duly arrived in the best ms., Istanbul, Yeni Ṭamūr, 909, and in the ms. in Tabriz. An abridgement of this third recension, extant in several ms. (e.g. B.L. Add. 16,696), probably originated at a considerably later date, since none of the ms. is earlier than the 10th/16th century.

The Shabankara tribe produced a historian during the 8th/14th century, Muḥammad b. ʿAlī Shabankara3 [q.v.], author of a general history which brings considerable near-contemporary and contemporaneous information on Fars during the Il-Khānīd and Il-Khānīd periods (Maqâmāt al-anṣāb, ed. Mīrāz Ḥāšīm Muhāddith, Tehran 1363/1984, 220 ff.).

(V.F. BÜCHNER-[C.E. BOSWORTH])

SHABANKARA2, Muḥammad b. ʿAlī, Persian poet, littérateur and historian of Kurdish origin (ca. 697-759/ca. 351), to the effect that Saʿd was sending his general ʿĪzz al-Dīn Faḍlūn to accelerate the reduction of the garrisons mentioned above (600/1203-4). The troops of Fars duly arrived in the best ms., Istanbul, Yeni Ṭamūr, 909, and in the ms. in Tabriz. An abridgement of this third recension, extant in several ms. (e.g. B.L. Add. 16,696), probably originated at a considerably later date, since none of the ms. is earlier than the 10th/16th century.

The Maqâmāt al-anṣāb fi Ṭawārikh, exists in a number of versions. The first redaction, dedicated to the Il-Khānīd Abū Saʿīd the vizier Ghīyāth al-Dīn Muḥammad b. Ragḥūd al-Dīn, was produced in 733/1332-3 but was lost in the destruction of the vizier′s house in 736/1336. Shabankaraṭī completed a second redaction on 22 Djamʿād 1 738/17 December 1337; this is found in the best ms., Istanbul, Yeni Cami 909, and in the printed edition. Yet a third version, dedicated to the Ėhpānīd Pīr Ḥusayn and finished in 743/1343, is represented by the Paris ms. Supp. pers. 1278 and by a ms. in 1270/1853, an abridgment of the said redaction, extant in several ms. (e.g. B.L. Add. 16,696), probably originated at a considerably later date, since none of the ms. is earlier than the 10th/16th century.

The Maqâmāt al-anṣāb is of importance for its original material on the Ghawānids, being the sole source to supply the alleged Pand-nāma of Sebūtkī. It is also the first general history to incorporate chapters on the local dynasties of Shabankārā′s native region of southern Persia, with sections inter alia on the rulers of the Shabankārā′s Kurds [see SHABANKARA], the atabegs of Fars, and (most detailed) the princes of Hurmuz [q.v.] and the atabegs of Lūrīstān [see LUR-I BUZURG].

After Shabankārā′s death, and not later than 783/1381, a certain Ghīyāth al-Dīn b. ʿAlī Fārīyāmīd wrote, apparently in Gurgān or Khurāsān, a brief dāvīd or continuation of the Maqâmāt al-anṣāb, dealing with the Sarbadār [q.v.] and the local dynasties of Khurāsān during the mid-14th century; this is extant only in the Istanbul ms.

SHABBATAY SEBI, a Jewish mystic, pseudo-Messiah and the inspiration for a Judaeo-Muslim sect.

Born at Izmir in 1035/1626, where his father, originally from the Peloponnese, was a trader, he showed a precocious propensity for the religious sciences, and was dedicated to a rabbinical career. From his adolescence, he devoted his time to the esoteric study of the Kabbalah and led a life of asceticism, observing the Muslim religion externally whilst practicing certain Jewish rites. He is described as a wandering ascetic travelling in turn from Jerusalem to Cairo. There, during 1663-5, he was the protegé of the mystical circle of Raphael Joseph Celebi, head of the mystical circle of Khidirlik and frequently frequented in Edirne the Bektashi tekke of Khidirlik and took part in diwar sessions. He was again arrested in Rabi’I 1083/August 1672 on charges of licentious conduct, and finally deported in Shawwal 1083/January 1673 to Ulcinj in the distant province of al-Bassan (Albania). Despite visits from certain of his followers, apparently disguised as Muslims, Sebi died in solitude on 9 Radjab 1086/17 September 1676 at Ulcinj, where his unmarked tomb is still venerated in March 1678, where he was hailed as the Messiah by Nathan’s predictions, he was to seize the crown of the “Grand Turk” without having to strike a blow. Meanwhile, the Ottoman government, perhaps alarmed by the Jewish pseudo-Messiah’s own Jewish opponents, decided to put an end to this ferment of activity, considering it to be seditious. The fate of the agitator, intercepted on the high seas, was decided by the Grand Vizier Ahmed Koprulu [see KOPRULU], who, unwilling to create a martyr, imprisoned him in the fortress of Gallipoli (Shaabban 1076/February 1666). With an aura of prestige for having escaped death, Sebi continued to receive, in prison, delegates from all over. These included Nehemiah Cohen, a Polish Kabbalist, who feigned conversion to Islam in order to gain access to the Grand Vizier, to whom he presented an epistle which denounced Sebi as an imposter. Sebi was brought to Edirne and to Sultan Mehmed IV’s diwan on 16 Rabi’I 1077/16 September 1666.

Sebi escaped capital punishment by “adopting the turban”, on the advice of the apostate Mustafa Hayati-zade, alias Gid’on, the sultan’s physician. On his conversion to Islam, he took the name of ‘Aziz Mehem Efendi, saw himself receive the honorific title of kapidj bash! “chief doorkeeper of the palace”, and received a royal pension. Had the Turks spared him in order for him to act as a missionary for Islam? If the majority of his followers abandoned him, his apostasy was in fact followed by numerous of his faithful followers, including his wife Sarah, who, after arriving in Gallipoli, took the name of Fâtima Kadîn. Seeking a theological justification for the paradoxical mystery of his defection—it could allegedly be considered as a deliberate act with an esoteric aim—Sebi’s partisans continued to believe in him, adopting for themselves the Hebrew name of ma’amnim “believers”. Sebi kept up secret contacts with them and with Nathan of Gaza during his stays in now Edirne and now Istanbul, during which he led a double life, observing the Muslim religion externally whilst practicing certain Jewish rites. He is described as going now to the mosque and now to the synagogue, holding a Koran in one hand and a Tôrah scroll in the other. The Shabbatayan tradition holds that, despite this duplicity, Sebi enjoyed the favour of Mehmed Wani Efendi, the sultan’s favourite preacher, who is said to have been assigned to him as his teacher of the precepts of Islam. It seems also that during this period Sebi had contacts with Muslim sectaries like the Bektashis, and perhaps also with the Khatwâwi mystic Mehem Nîzarî [see KATWÁ]. According to certain pieces of evidence, he reportedly frequented in Edirne the Bektashi tekke of Khidirlik and took part in diwar sessions. He was again arrested in Rabi’I 1083/August 1672 on charges of licentious conduct, and finally deported in Shawwâl 1083/January 1673 to Ulcinj in the distant province of al-Bassan (Albania). Despite visits from certain of his followers, apparently disguised as Muslims, Sebi died in solitude on 9 Radjab 1086/17 September 1676 at Ulcinj, where his unmarked tomb is still venerated by the local Muslim population.

As coming it as it came at a time of eschatological expectation in the Muslim environment, where he was seen as the Daqdjdîl [p. 218], Sebi’s death stimulated the appearance of Mahdi claimants.
However, the demise of its founder did not mean the end of his messianic movement. Accepting Nathan’s teaching, according to which Ṣebi had gone into a phase of occultation—one that formed the basis of concept of ghayba—and whilst awaiting his return, several hundreds of his followers embraced Islam en masse in 1095/1683 at Salonica, which henceforth became an active centre for propaganda. Under the direction of Jacob Querido (‘Abd Allāh Ya‘qūb), the brother of Jochebed-‘Ašīgā, Ṣebi’s last wife, these apostates assumed the shape of a sect known as the dōnmes [q.v.] (Tk. “convert”). Querido was proclaimed by his sister as Ṣebi’s reincarnation; he preached the pious performance of the Islamic obligations and died at Alexandria or at Būlāk in ca. 1102/1690 when returning from the Meccan Pilgrimage. The dōnmes split into various factions, the most radical of them being headed by ʿOTHMĀN BABA (alia Berukhyah Russo, d. 1721), who also claimed to be a reincarnation of Ṣebi. They borrowed certain practices and also liturgical chants from the Bektashi circles whose tekke liturgical chants from the BektashI circles whose

ramal. Thus we have a strophic schema for the seven attested combinations:
one foot, rhyme A
one foot, rhyme A
four feet, rhyme B
four feet, rhyme B
two feet, rhyme C.

The young poet's death, at the age of 25, in a Tunisia where poets had been very few, gave him a romantic halo and a popularity verging on the mythic. This infatuation with him has engendered, for over 60 years, erroneous, contradictory or fantastic biographical statements, and peremptory, verbose or extravagant literary judgements. Whilst he was published as a literary critic at the age of 20, his collected poetry had to await publication 21 years after his death.

(A. GHEDIRA)

SHABBIR HASAN KHAN DJOSH, modern Urdu poet, born 5 December 1898, died 22 February 1982.

He was born in Mahabubâb, a town in present-day Uttar Pradesh (formerly United Provinces) in India. His parents gave him the name of Shabbir Ahmad Khan, but subsequently he adopted his existing pen-name Djosh. He was a prolific writer and has left Urdu writings which had been out of print for a long time. Djosh claimed to have begun composing poetry when he was nine years old, eventually using as his pen-name Djosh. He was outspoken both in his personal dealings as well as in his poetry. His habits were provocative; thus his taste for drinking shocked orthodox sentiments, and he seemed irreverent where religious matters were concerned, yet, at the same time, he displayed deep feelings for the Prophet Muhammad and for 'Ali and his son Husayn.

In 1924 Djosh went to Haydarabad (Deccan) and was appointed in the Translation Bureau of Osmania University, his duty being to supervise the translations of literary works from English into Urdu. Through his poetry he won access to higher social circles, and seemingly enjoyed a pleasure-loving life. He stayed in Haydarabad for some ten years, when he was expelled for reasons which are unclear but probably resulted from official disapproval of his dissolute conduct. Whatever the case may be, he was dismissed and made to leave the state summarily.

In January 1936 Djosh started a monthly magazine from Delhi, Kalim. Although the magazine was well received in literary circles, it came up against financial difficulties and ceased in 1939 as an independent publication. Thereupon it became merged with the journal Nayâ adab ("New literature"), and appeared for some time under the title Nayâ adab awr Kalim, with Djosh acting as its chief editor. Soon after the outbreak of World War II it published in its August-September 1941 issue an inflammatory poem by Djosh, entitled East India Company ke farzand ke nâm ("To the children of East India Company"), which received wide prominence, but was banned by the government for its strong anti-British content.

From 1943 till the beginning of 1948 Djosh was associated with Indian films as a songwriter, most of this time with Shâlîmâr Pictures in Pune (Poona). In 1948 he became the editor of Agâ kal ("Now"), a literary magazine published from Delhi under the auspices of India's Ministry of Information and Broadcasting, continuing in that capacity until 1955.

Djosh had strongly supported the cause of Indian nationalism. This, together with his outstanding contribution to literature, assured him a privileged place in the new set-up after India became independent in 1947. The Indian government rewarded him with one of its highest honours, the Padam Bhushan. Given all the prestige that he enjoyed in India, it came as a shock when he suddenly migrated to Pakistan towards the end of 1955. From the Indian point of view, his action amounted to a betrayal of trust, the more so because of the strained relations existing between India and Pakistan. According to Djosh's own admission, he made the choice (which he seemed to have regretted afterwards) in anticipation of better economic prospects for himself and his family. In Pakistan he was appointed in 1958 as literary consultant in the Tarakî-yi Urdu Board ("Urdu Development Board"), a Karachi-based, government-sponsored body, which was entrusted with the task of preparing a comprehensive dictionary of Urdu on the pattern of the Oxford English dictionary. Later, the Board also assumed the work of reissuing standard Urdu writings which had been out of print for a long time. Nevertheless, his contract was not renewed by the military government of President Ayub Khan, supposedly because the poet was reported to have spoken against Pakistan while on a tour to India during the previous year. In 1972 Djosh moved from Karachi to Islamabad where, in 1973, the government of Prime Minister Zulfiquar Ali Bhutto provided him with a job in the Ministry of Education. He continued in this position under President Zia-ul-Haq, but in 1981 his health began to fail and he died in February 1982, being buried in Islamabad.

Djosh remained a controversial figure throughout his life. He was outspoken both in his personal dealings as well as in his poetry. His habits were provocative; thus his taste for drinking shocked orthodox sentiments, and he seemed irreverent where religious matters were concerned, yet, at the same time, he displayed deep feelings for the Prophet Muhammad and for 'Ali and his son Husayn.

Djosh claimed to have begun composing poetry when he was nine years old, eventually using as his pen-name Djosh. He was a prolific writer and has left numerous publications in verse and prose (see Bibliography). His first collection, Raḥî adab ("The spirit of literature"), which contained his work composed since the age of nine, was published in 1920, and the entire edition quickly sold out. His other published works followed in quick succession, and a posthumous volume of his unpublished poems appeared in 1993 under the title Misrâb u mifârâb ("The niche and the spectre"). He was also a prose-writer with a distinctive style, his best-known book here being his
autobiography Yadon ki barat (“The wedding procession of memories”), which is perhaps one of the most interesting works of modern Urdu literature. Djosh’s early nazms were love and nature. Soon, however, politics also entered his verse, and became ultimately one of his most frequently employed themes. Superficial and devoid of any sustained effect, these inflammatory and topical poems were nevertheless important because they articulated the prevalent political mood of the country, and may be said to have laid the foundation of militant poetry in Urdu. One of the best-known poems reflecting this tendency, Shikasti-i zindan ka ghobar (“The dream of the breaking down of the prison”), was composed in the 1920s, and reflected the revolutionary fervour of the period against British domination.

The predominant note of Djosh’s verse is its romanticism. His poetic outlook is largely traditional, and he employs set forms for his compositions. One of his favourite verse forms is the ruba’i, in which his mastery is evidenced by the skilful treatment of varied subjects. He has also revived the traditional marthiya by using it as a medium for conveying a new social and political sensibility. Another significant aspect of his poetry is his protest against religious hypocrisy, social injustice and political expediency, though his command over language often translates itself in his poems into a mere exercise in words, adding little to the development of the thought and its content.

Djosh undoubtedly ranks among the foremost Urdu poets of modern times. In fact, he is regarded by his admirers as next only to Ikbal (d. 1938) and his poetry is his protest against religious hypocrisy, social injustice and political expediency, though his command over language often translates itself in his poems into a mere exercise in words, adding little to the development of the thought and its content. His advice (fatwa) on juridical and ritual matters was (fatwa) on juridical and ritual matters was
allegedly sought by many, and the trends he set in fashion and cosmetics, such as his habit to wear clothes of silk and dye his hair with henna, are extensively dealt with in Ibn Sa’d, vi, 176. Furthermore, al-Sha’bi’s recorded skill in arithmetic, cf. ibid., 173, l. 3, made him especially expert in the solving of inheritance problems, as is attested in Ibn Abi Shawayha’s Musannaf and al-Dārimī’s Sunan, chs. on farā’id. An explanation for Sha’bi’s supposedly frequent resorting to rā’yan, as set off against his vehement rejection of it on other occasions, may be sought in plain jalousie de métier: we may assume that he barely suffered trespassing on his patch by recently converted mauwālī who, with the exception of the Ḥudayrī, were everywhere in the majority in the Islamic domain. In their desire to find out what their new religion stood for, and, where necessary, to give it substance, they were presumably also engaged in the giving of fatwās and the dissemination of āwārid and ḥaddīth. Their mere presence in the mosque where al-Sha’bi himself held court may have prompted him to call them by highly derogatory appellation (e.g. “Persian merchants”), cf. LA, s.n. On the whole, he seems to have mistrusted mauwālī, as may be reflected in a remark attributed to him: after the mauwālī had mastered the rules of Arabic grammar, they are surely the first to corrupt them, cf. Ibn ‘Abd Rabbihi, ‘Ubd, ed. Cairo 1948-53, ii, 478; al-Dīnjārizī, Bayān, ii, 69. Mauwālī mentioned as the butt of al-Sha’bi’s vitriol were among others Hammād b. Abī Sulaymān, the celebrated teacher of Abū Ḥanīfa [q. v.], Hakam b. ‘Uṭayba, Abī Ṣāliḥ Bāḏghīj, and the self-styled Kurʿan exegete of Su’di.

Moreover, al-Sha’bi figures in the insān strands of innumerable historical figures: akhbār the majority of which deal with the early conquest history of ‘Irāq as recorded by Sayf b. ʿUmar [q. v.] and a few other historians. Among these, the disproportionately large number of reports of the āwārid [q. v.] genre is particularly striking. Appointed kābi by the governor of ‘Irāq Ibn Hubayyra [q. v.] (according to al-Ṭabarī, ii, 1347, in the year 100/718), he is said to have refused to combine his judgeship with nocturnal conversation (Ar. sāmar) with his employer. Besides, Sha’bi is recorded to have composed unusual rhymes (awā’id), as well as high-class poetry. He allegedly boasted that he could recite poetry for a month without having to resort to repeats. The ‘Umayyad caliph ‘Abd al-Malik, who had been ‘Abd al-‘Azīz, the then governor of Egypt (cf. Aqīli, xi, 20-6) as well as to the emperor of Byzantium, who is said to have been greatly impressed by al-Sha’bi (Ta’rīkh Baghdād, xii, 231). Among his contemporaries, as set off against his vehement rejection of al-Hadjdjadj [q. v.], the governor had reportedly always held al-Sha’bi in great esteem, so that he had appointed him the ‘awārid [q. v.] of his clan and the munkib (= superintendent) of the Hamdān tribe. After this insurrection was put down, al-Sha’bi fled from the governor’s revenge to the court of Kutayba b. ‘Ummāl [q. v.], where he enjoyed asylum for a time. Later, he allegedly returned to al-Hadjdjadj, apologised for his role in the rebellion and was subsequently pardoned. His confrontation with the governor has given rise to a long range of flowery anecdotes, which receive broad mention in the historical sources as well as adab sources.

Bibliography: More or less extensive sections on al-Sha’bi are given in Ibn Sa’d, vi, 171-8; Ṣa’dī, Anwār al-āwārid, vi, index s.n.; Ta’rīkh Baghdaďd, xii, 227-34; Dhahabi, Sīyar al-ālam al-nubūṭ, ed. Arna’ūt, iv, 294-319; idem, Ta’dkhirat al-ba’ṣfār, i, 79-88; Ibn Khaliḳān, Wafayāt, ed. I. ‘Abbās, iii, 12-5; Ibn Manẓūr, Muḥḥasar ta’rīkh maṣdmarat Dimashq, xi, 249-63; Ibn Ḥadjiyar, Tadhkhir al-tāḥdib, vi, 69-59; Abū Nu‘aym, Ḥibyat al-adlīya, iv, 310-38, contains a long series of traditions most of which are spuriously ascribed to al-Sha’bi. He is, furthermore, credited with numerous bon mots and aphorisms which are scattered over early historical and adab works, cf. the indices of such works as Fasawān, Aḥmad, Māṣūma, ‘Abd al-Malik, Bāḏghīj, Ṣafārī, and Ḥuyayyān; Ibn Kutayba, ‘Uṣayn al-akhbār; Ibn ‘Abd Rabbihi, ‘Īlāk, ‘Ishṭāhān, Ḥaḏīḥ, Mubārrad, Kāmi’il, etc. For al-Sha’bi’s awā’id reports, see the indices of s.n. of Abū Hīlāl al-‘Askari, K. al-Awā’il, ed. M. al-Misrī and Wālid Ḳassāb, Damascus 1975, and Djalāl al-Din al-Suyutī, al-Wasā’il ilt maṣmūrat al-awā’il, ed. As’ad Talaṣ, Bagdād 1930. For his role in mu’ammārīn in his insān, see WZKM, lxixi (1991), 155-75. For his role in ḥaddīth, see G.H.A. Juynboll, Muslim tradition. Studies in chronology, provenance and authorship of early hadith, Cambridge 1983, index s.n. (G.H.A. JUYNBOLL)

SHABBIB B. SHAYBA, Abū Maʿmar al-Minkari al-Ṭamīmī, orator, narrator of akhbār and author of many maxims preserved in various works of adab literature, was a man of high lineage of the Sa’d b. Zayd Manāṭ branch of the Banū Ṭamīm at Basra. Ḳaḥīd b. Saʿwān [q. v.], the famous orator of the late ‘Umayyad period, is said to have been related to the same family as Shabbib. According to al-Dīnjārizī (al-Ṭabarī wa l-tabyin, ed. A.ḥad al-Salām M. Ḫarīn, iii, 355), they were cousins, but biographers also note a different lineage (e.g. al-Khāṭirī, Ta’rīkh Baghdaďd, ix, 231).
274). In any case, they are often mentioned together, and it is noted that their relationship, dictated by the ties of family and profession, was not always friendly (Baghdd, i, 940; Aghbain, xx, 404-5). After serving for a short time as head of the ‘ghulat’ Banu Bayd’s (Wā‘ūs), Akhīn al-kudhā, i, 60), Shābīb went to the new capital Baghddād, where he was admitted at court as companion and lītellātār of the caliph al-Mansūr and al-Mahdī. He is said to have had some influence, and he reports himself that he was regularly invited to meetings with al-Mahdī (Tha‘lab, Maqāli, ed. Hārūn, 413), who held him in esteem for his wise and witty statements. His acquaintance with the inner circles of power made him an authority for some historical lākhbār. After about two decades, he returned to Baṣra. Ibn al-Imay includes Shābīb among the names of the deceased of the year 162/778-9, but it is more likely that he died some years later, “in the sixties” as al-Dhahābī (Ta‘rīkh al-Īlam) notes.

As a pious man, Shābīb included prophetic hadithān in his sayings. However, when the specialists of Islam’s Tradition developed their criteria of censura, his testimony did not find approval, although his merits in the literary field were acknowledged by Ibn Hībīn and others (K. al-Magdhūn, ed. Zāyid, i, 363 and Ibn Ḥaḍar, Ta‘līhāb at-ta‘līhāb, xxiv, 307). These merits are expressed in al-Dhābī in clear terms: in addition to his competent knowledge of style, Shābīb was distinguished by the dissemination of his sayings among the literati (Bayīn, i, 117-18). The reason for this was, as it is witnessed by the quotations preserved in our sources, his mastery of the short sententious expression. This art was for him the true perfection of speech (Bayīn, i, 112). Adab literature preserves examples of his eloquence in the oratory genres of admonition (maw‘oza), condoleace (ta‘ziya) and general ethical topics. His repeated recommendations for the quest of adab are early references to this literary and social concept (e.g. Maqāla Tha‘lab, 257; Ibn ‘Abd al-Barr, Boldhūr al-maqlīdī, ed. al-Khālī, i, 112; Ta‘rīkh Baghdd, ix, 276). Besides maxims of his own, older examples of aphorisms and speeches appear in literature on his authority. A considerable number of the texts quoted from Shābīb show parallels which testify to a wide transmission of his sayings. Brockelmann already mentions him as a precursor of adab literature (Suppl. I, 105), and in spite of the fact that Shābīb did not compose books—al-Nadīm only mentions the hadithān of Shābīb (Fihrist, ed. Tadjaddud, 139)—this view is confirmed by the materials preserved.

Bibliography: In addition to the literature mentioned: Ma‘ṣūdī, Marāqī, ed. Pellat, vi (Index), 409-10; W. Werkmeister, Quellenuntersuchungen zum Kiāb al-jamī‘ al-farīd, Berlin 1983, 385-7; Yākūt, Irshād, ed. Margoliouth, iv, 260; Dhahabī, Ta‘rīkh al-Īlam, ed. Tadmūrī, 257-9, years 161-70. For the events, presenting Salih’s rebellion as separate from that of Shābīb’s. Be this as it may, according to Sayf, Shābīb then led the remnant of Salih’s force through al-Mawsīl and central ‘Irāq, scoring victories at Khāmīn and al-Nahrāwān, and even appearing in al-Kūf with 200 men; he then defeated Zā’īdī b. Kudāma at Rūdhbār, and ‘Uṯmān b. Kātan at al-Ḥārijī near the village of al-Batt, which lay on the southern borders of the province of al-Mawsīl, in Dhu ‘l-Hijja 76/March 696. After 3 months of manoeuvring in early 77/mid-696, Shābīb eventually took al-Madā‘īn, and now with perhaps 600 men, defeated ‘Attābī b. Warkā al-Riyāḥ, and threatened al-Kūf. But his luck finally turned when a force of several thousand Syrians under the command of Sufyān b. al-Abraq al-Kalbi routed him near al-Kūf; after an indecisive battle at al-Anbār, he marched through Dju‘kha, Kirmān, and moved into al-Ahwāz. There, crossing the Dţujayl before the Syrians, he was drowned sometime near the end of 77/early 697. Other reports put his death in 78/697-8. Despite Shābīb’s failure, the Khāridjītes of al-Dṇa‘īra and al-Mawsīl continued to draw on the region’s restive tribesmen, and the sources record a nearly unbroken succession of rebellions against the Umayyads and early ʿAbbasīds; among these later Khāridjītes the sources identify Shābīb’s son Suhārī, who rebelled against the governor Khu‘lī al-Kasri [q.v.] in 119/737.

**SHABUSAHTI**

Al-Shabúsháti, Abu l-Hasan 'Ali b. Muhammad, littérature de Fâtimid period, and librarion and boon-companion to the caliph al-Aziz (365-86/975-96 [q. v.]), died at Fustat in 388/998 or possibly in the succeeding decade. Ibn Khalikán explains the unusual cognomen Shabúshtí as being a name of Daylamí origin, and not a náhsh; an origin in sháh pughít “he who guards the king’s back” has been somewhat fancifully suggested.

Al-Shábúsháti’s works included a K. al-Yar bád’ al-‘asz, a Marádih al-fukáhah, a K. al-Yasákíj wa l-tájühás, a K. al-Zahd wa l-mawá’ís, and collections of epistles and poetry. All these are lost, and his fame stems from his K. al-Dívádí “Book of monasteries”, extant in a Berlin ms. and now ed., with a good intro., by Gürgis ‘Awádd, *Báddíd 1386/1666*. This forms part of a minor genre of writing about monasteries, in which the author had been preceded by the Khálidíyán brothers, Abu l-Faráqíj al-lSáfíhání and al-Sári l-Ráffíz [q. v.]. It deals with 37 Christian monasteries in Irák, plus a smaller number of those in Syria and Egypt, and is of high importance for the culture historical, historical geography and literature. There emerges from it that the monasteries were places to which caliphs and other high men of state could retire for recreation, above all, for drinking parties, since the monasteries were leading centres for wine-making [see DÁYR]. A considerable amount of poetry is cited, including verses otherwise unknown.

**SHABWA**

The name of the ancient capital of the South Arabian kingdom of Hadramawt [q. v. in Suppl.].

The name of this town appears in classical sources as Sabata (Strabo, *Geographica*, XVI, 4. 2, according to Eratosthenes), Sabatha (Ptolemaios, *Geographia*, VI, 7. 38), Sabatha (Periplus maris Erythraei, 27) and Sabata (Pliny, *Natural History*, VI, 155; XII, 52). Ptolemaios calls the town a metropolis, and the Periplus additionally calls it the residence of the king, for whom silverware, horses, statues, and clothing of fine quality are imported. Pliny mentions as the chief place of the Atramiátí Sabata a walled town containing sixty temples (ibid., VI, 155), built on a high hill and situated a march of eight days away from the incense-producing region (ibid., XII, 52). That the capital was also the religious and cultic centre of the kingdom seems to be confirmed by epigraphic evidence.

Shabwa, the geographical co-ordinates of which are lat. 15° 22’ N. and long. 47° 01’ E., is located about 700 m/2,300 feet above sea-level at the eastern border of the Ramlat al-Sab‘atayn on a hill at the mouth of the Wadi ʿAfīf, the lower course of the Wadi ʿIrma. The area was already inhabited during the Stone Age, and in the middle of the second millennium B.C. a settlement existed at the southern part of the later town. Shabwa was situated at the meeting-point of important caravan routes leading from the port of Kana to the Indian Ocean in the south and from the Djawl and the Wádi Hadramawt in the east to Timna, the capital of Katabán [q. v.], and Máríb [q. v.], the capital of Saba [q. v.], as well as through the Ramlat al-Sab‘atayn and the Yemeni Djawl to...
Naghrān [q. v.] in the west and to al-ʿAbr further to the north.

The first epigraphic attestation of Hadramawt is to be found in the Old Sabean inscription RES 3945, a record of Karibṭil Watar, from Miʿmah Sabwā, in Hadramawt, and in Hadramitic inscriptions found outside of the capital (e.g. Ḫor Ṛyrt 1, 3, from the ancient town of Samārum at the coast of Ṣafār; Jamme 892 from Saʿānūn, the present-day Hānūn in the Karāt Mountains of Zafār; RES 4912 from al-ʿUkla, a fortress to the west of Shabwa) give evidence to the importance of the Sabean kingdom.

In the 5th century B.C., the first buildings on stone bases were erected in Shabwa and inscriptions in monumental script were set up. The cultural and political heyday of Shabwa was in the period between the 2nd century B.C. and the 1st century A.D. The mention of Shabwa in the epigraphic form ḥabīb, ḥabīt, ḥabbait, in Hadramitic inscriptions found outside of the capital (e.g. Ḫor Ṛyrt 1, 3, from the ancient town of Samārum at the coast of Ṣafār; Jamme 892 from Saʿānūn, the present-day Hānūn in the Karāt Mountains of Zafār; RES 4912 from al-ʿUkla, a fortress to the west of Shabwa) give evidence to the importance of the Sabean kingdom.

The extensive research work carried out by the French Archaeological Mission in the ruins of the ancient town showed that, inside the fortified walls, tower dwellings were the most common architectural type of building in Shabwa. Materials for the construction of the houses were stone slabs, wooden beams and bricks of dry mud. A complex fortress with a courtyard surrounded by columns, turned out to be the royal castle. Its name ʿākr, ʿaṣṭān, was already known from Hadramitic and Sabean inscriptions and from legends of coins, since the royal castle was also the mint of the Hadramite kingdom. Later, parts of the town and the royal castle were rebuilt, and the palace was splendidly decorated with sculptures and ornaments manifesting local traditions as well as Hellenistic influences. During the first decades of the fourth century A.D., the Himyarite kings put an end to the independent kingdom of Hadramawt, and at the beginning of the 5th century the town of Shabwa began to decay.

The Arabic geographers of the Middle Ages knew the ruins of the former metropolis only an insignificant settlement still called Shabwa, a name which has survived until today. Al-Hamdānī speaks of a province (mīḥāl) Shabwa, the inhabitants of which are the Ağḥībā (the supposed descendants of a certain Shabwā, a grandson of Hadramawt; cf. Ḫilīl, ii, ed. M. al-Akwa; Cairo 1966, 372, i, 5-373, 1.1), the Ayādī (i.e. the Yanazīds), and also ʿṢādā and Ṣubāṭ (Ṣufī, ed. Mūller, 98, 20). According to the same author, Shabwa is situated between Baybān and Hadramawt and is a town belonging to the Himyar. One of the two mountains of salt lies in its neighbourhood. When the Himyar waged war on the Madḥūbī[q. v.], the people of Shabwa emigrated from their town and settled in the Ḫādir Hadramawt, where Shabwān was allegedly named after them (Ṣufī, ed. Mūller, 97, 22-3). The fact that Shabwa is considered as belonging to the Himyar may reflect the situation of late pre-Islamic times when Hadramawt had become part of the Himyarite realm. In another passage, al-Hamdānī enumerates Shabwa among the strongholds of Hadramawt (Ḫilīl, v, viii, ed. al-Akwa; Damascus 1979, 157, 1.5). Until today, salt of good quality is mined from two mountains to the north of Shabwa, called Milḥ Maḥa and Milḥ Kḥaḥa, and from two mountains to the south-west of it, called Milḥ Khaḥa and Haṣy al-Milḥ near Ayād. Yākūṭ writes that Shabwa is a station on the main road from the Wadī Hadramawt to Mecca (Mūṣṭafā, iii, 1974, 257, 1.14), and in another passage he mentions that it is the place where the grave of the prophet Sāliḥ is supposed to be (iv, 184, ll. 17-18). The notice that in Shabwa one sells a load of dates for one dirham ( Ibn ʿAbd al-Muʿmīn al-Himyarī, al-Rauṣd al-mufār, ed. I. ʿAbbās, Beirut 1974, 37) indicates that the surroundings of the town must still have been fertile in the Islamic Middle Ages.

H. Helfritz was the first European who succeeded in reaching Shabwa during an adventurous journey in 1934. In 1936 H.-J.B. Philby, coming from the north, visited the ancient town, gave a detailed report on the existing ruins and drew a plan of Shabwa. The first small excavation in the ruins of Shabwa was undertaken in 1939 by R.A.B. Hamilton. In December 1947 a French Archaeological Mission under the direction of Jacqueline Pirenne and subsequently of J.-Fr. Breton started excavations at the site of Shabwa which have given a deep insight into the two millennia of the ancient history of this important settlement.

The extent of the ruins of Shabwa is so extensive that, within the area of the ancient town, there are the three villages of Hadjar, Maywān and Maywān, which are inhabited by members of the tribes of the Karāb and Al Bāryāk. In the former People’s Democratic Republic of Yemen and in the present Republic of Yemen, Shabwa has given its name to a governorate (muhāfaza) which reaches from the Saudi Arabian border to the Indian Ocean and includes an area of 37,910 km². The governorate of Shabwa is divided into four administrative districts (mudārijyāt), and its capital city is ʿAṣīq. In the recent past, the region around Shabwa has become economically important because of the exploitation of the oilfields which have been discovered there.

(W.W. Mūller, shortened by the Editors) SHADD (a.) either the act of girding with an initiatory belt or girdle, as practised by the chivalrous sodalities (the exponents of futuwwa [q. v.]), the trade guilds (ṣafīd, see below, 2., and ṣīf), and certain Sufi orders, or the belt or girdle itself. To the Arabic shadd in its verbal meaning correspond the Turkish expressions şel küşatmak, küşat küşatmak, and bel küşatmak, and the Persian baglamak, kamar bastan. The origin of the custom has been attributed to the kust; the sacred girdle of the Zoroastrians, for whom, however, girding on the kust was a rite of passage into manhood, not of initiation into a closed society; moreover, the
symbolism attributed to this girdle—a separation of the noble from the ignoble parts of the body—found no reflection in any of the groups practising šhadd ([J. Duescne-Guillen, *Le religion de l'Iran ancien*, Paris 1962, 114-15]. In Islam, the initiatic belt was regarded as a symbol of steadfastness and submissiveness (Şükeymnn Uludag, *Tasavvuf terimleri« sözü, Istanbul 1991, 447-8).

1. In futuwma and in Şüfism.

Handbooks of futuwma assert that the first initiatic belt was that which Adam girded on at the behest of Gabriel as a token of fidelity to his terrestrial mission as God's vicegerent (Neve, *Neve Türk tarihi*, 3/1981, 181). By way of reaffirming this primordial covenant, Gabriel wound a similar belt around the waist of the Prophet Muhammad, and he in turn girded it on ʿAli. Next, those of the Companies who came to be regarded as the patrons of various crafts and trades were invested with a šhadd, either directly by the Prophet or by ʿAli acting under his instructions. As an honorary member of the Prophet's household, Salman al-Farsi ([g.v.] is also said to have participated in this activity (Abdülbaki Gölpınarlı, *IA, art. Şeddi*). No Kurʾānic reference could be adduced to vindicate the practice of girding; however, the words of Moses referring to Aaron in XX, 31, *aşhad bihi azrī* ("strengthen my back by means of him") are sometimes cited as alluding to the šhadd ([F. Taeschner, *Zünfte und Bruderschaften im Islam*, Zürich and Munich 1979, 162). Among the fīṣān, the girding on of the šhadd was accompanied by the recitation of various prayers that always included mention of ʿAli, who was regarded as the fountain head of the tradition; mention of all Twelve Imāms was also common, particularly from the 8th/14th century onwards. A further echo of the putative ʿAlid origins of futuwma was the practice of associating one end of the belt with ʿHasan and the other with ʿHusayn; the latter was kept longer than the former, as an indication of the primacy of the Husaynid over the Ḥāsānī line of descent (Çağatay, 45-7). At the time of initiation, the belt would be handed to the candidate for futuwma by a companion (rafı), whose duty it was to assist him in his further progress; and the ceremony of girding would be concluded with the drinking of salted water (şhad), water signifying wisdom and salt, justice (Taeschner, 139). The ūlā ad circument, rather than being held together by a buckle, and it would be wound around the waist a varying odd number of times. It was usually made of wool, although other materials such as leather, rope and cloth were also acceptable; the only condition was that the šhadd should not resemble the *sunna*, the distinctive gīrdilmis were required to wear (Murudā Şarrāl, *Rasid-i-i Ebuqaimdərin*, Tehran and Paris 1973, 77). It is worth noting that despite this stipulation, Jews and Christians were permitted to join the futuwma brotherhoods, particularly if there was reason to hope they might come to accept Islam, conversion being, in fact, a condition of their proceeding beyond the stage of girding on the belt (Taeschner, 116).

The novice girded with a belt was known as *mahšfiid* ("girded") or, more fully, *mahšfiid al-wast* ("girded of waist"), and counted as a probationary member of the brotherhood; full initiation, referred to as *takmil* ("completion") and symbolised by the putting on of ritual trousers (sirvūlī /ghalawŠ) ([see šhirwaš*], came later. The ceremony of *šhadd* was said to correspond to nikāh, the conclusion of a marriage contract, and that of *takmil* to the consummation of marriage (Taeschner, 141; Şarrâl, 77).

Similar procedures accompanied the girding on of the initiatic belt in the craft guilds, except that in the accompanying prayers mention would generally be made of a Companion of the Prophet being invested with the craft belt by the Prophet, who had practised the craft in question. Although Jews and Christians sometimes organised their own guilds, they were also admitted to those established by Muslims; in 19th-century Syria, they would recite the Ten Commandments or the Lord's Prayer respectively as the šhadd was bound on (Taeschner, 385). Each guild, especially in Ottoman Turkey, had its own distinctive form of *šhadd* and method of tying and knotting it (Çağatay, 156-7; Gölpınarlı, 380).

The fraternities of brigands known as *ayyār* ([g.v.] which may be designated as a degenerate manifestation of futuwma also resorted to the girding on of initiatic belts. This is apparent from the advice given in 532/1138 by Abuʾl-Karam, the governor of Bagdad, to his nephew, Abuʾl-Kasim, that as a precautionary measure he should have himself girded with a belt by Ibn Bakrā and then threaten the city (Ibn al-ʾAjīr, xi, 24).

The custom of *šhadd* was relatively uncommon among Şüfis, for whom the major initiatic garment was the cloak or *khirka* ([g.v.]; in fact, an explicit parallel was sometimes drawn between the belt and trousers of the fīṣān and the *khirka* of the mystics (see e.g. Ibn al-Djawżī, *Talbis Iblis*, Cairo 1340/1922, 241). Nonetheless, certain Şüfi orders did use the binding on of a girdle as part of their initiatic rites, undoubtedly as a borrowing from the traditions of futuwma. It is tempting to suppose that this borrowing first took place under the auspices of Shihāb al-Dīn Abī ʿAbīs Umar al-Suhrawardī (d. 632/1234 [q.v.]), for he was simultaneously a Şüfi and an initiate of the caliph al-Nāṣir’s courtly futuwma (the assumption is made by J.S. Trimmingham, *The Şüfi orders in Islam*, Oxford 1971, 35). However, al-Suhrawardī’s only reference to *šhadd* in his celebrated manual of Şüfi practice comes in the context of travelling, where he remarks that binding up the waist (šhadd al-wast) before setting out on a journey forms part of the Prophet’s *sunna* (*Awdrif al-maʿārif*, printed as a supplement to Abū Hāmid al-Ghazālī, *Iṣlaḥ al-dīn*, Beirut n.d., v, 95). The connection between *šhadd* and travelling is confirmed by Ibn Baṭṭūṭa’s description of travelling Şüfis arriving at the khanqahs of Cairo as described by Eberhard (*Ibn Baṭṭūṭa und seine Reiseberichte*; Frankfurt 1974, 241) or those of the 8th/14th century onwards. The Mewlewls wore a woollen girdle (or *aaj_am*) during their whirling ceremonies. The principal Şüfi orders using belts or girdles for cultic purposes were the Mewlewls and the Bektâşis, a circumstance accounted for by the ubiquity of futuwma (or of *ağībik*, its Turkish equivalent) in Anatolia during the period of their genesis in the 8th/14th century. The Mewlewls wore a woollen gir- dle known as the elīf nemed, so called because with its tapering end when laid out flat it resembled the letter *a*lif. A cord long enough to be twisted around the waist twice was attached to the end of the elīf nemed (Gölpınarlı, *Mescel elīf ve erkân*, Istanbul 1963, 16-17). A second type of woolen girdle, known as the *ğhībd* (literally, "swordbelt"), was worn only
during the Mewlewi dance, in order to hold in place during its initial stages the ample skirt of the garment known as the shadd (ibid., 49).

The tīgbend held a central place in Bektāshī ritual and belief. According to their tradition, the caliphal Highīm wished to hang the Imam Muhammad al-Bākīr q.e., but the first time the rope was twisted around his neck he invoked the name of God and was saved, only a knot remaining in the rope. The second and third times the Imam invoked the names of the Prophet and 'Ali respectively, giving rise to two further knots. Whom the initiates were being made for a renewed attempt to hang the Imam, one of his followers by the name of Mu‘mīn ‘Ayyār suggested that a rope made from the wool of a freshly slaughtered ram would be more effective, as he then demonstrated by hanging himself in front of the Imam’s cell. Duly impressed, the caliphal agents went to hang the Imam using the same rope, but the Imam had peacefully breathed his last at precisely the moment. Mu‘mīn ‘Ayyār had hung himself. The Bektāshī tīgbend, also fashioned from ram’s wool, was intended to be a replica of this rope, and it thus served as a symbol of self-sacrifice and commitment. Its girding on was the second element (after the donning of a skullcap) in the Bektāshī ceremony of initiation known as škrār. The three knots tied into the tīgbend symbolised both the names of the Bektāshī trinitarian scheme (God, the Prophet and ‘Ali) and the threefold ethical injunction of Bektāshīsm (restraining the hand from stealing, the tongue from lying and the loins from sexual transgression) (Ahmed Rīfā‘ī, Mir‘āt al-ummakāsī fī dī‘ īl-mifāsīd, Istanbul 1293/1876, 67-80; J.K. Birge, The Bektashi order of dervishes, London 1937, 170, 181, 192, 234-5).

Other Śūfī orders said to have practised the shadd in Ottoman Turkey and—under Turkish influence—the Arab lands, include the Waṣṣā‘yya, Rīṣā‘yya, Sa‘dīyya, and Badawīyya (Trimingham, 105, n. 1; Pakaln, iii, 314). In Persia, the girding on of an initiatory belt is recorded for the Khāksār dervishes. The seven folds of the Khāksār girdle (kamār) signified the discarding of seven ‘insulting fetters’ (band-i nafsān), i.e. vices, and the fixing in their place of seven ‘divine fetters’ (band-i rahmdn), i.e. virtues. The fact that the Khāksār, like the Bektāshīs, girded a sword-belt on a newly-initiated student, was called for by a newly-installed sultan, first documented for Murād II (824-841/1421-44 and 850-51/1446-51) was a reflection of shadd as practised both in futuwwa and in Turkish Śūfī orders (Çağatay, 45; Mustafa Kara, Din, hayat, sanat aşırrandn tekkeler ve zaviyeler, Istanbul 1980, 166-8). It may finally be observed that the tradition of shadd may have predisposed certain Turkish Śūfīs to adopt freemasonry, with its comparable custom of initiatic girdling (Th. Zarcone, Mystiques, philosophes et francs-maçons en Islam, Paris 1983, 312).

(Hamid Algar)

2. In the trade guilds.

Under its corporate aspect, the practice of shadd was adopted from the 16th to the 19th century in the Arab lands of the Near East; the guilds in the Maghrib did not apparently know this initiation rite.

There have been numerous descriptions of the futuwwa and the shadd ceremony (with divergences over details) all through the period of the Ottoman empire. The sources are too varied to be found in the K. al-Dhahākhīr (ms. Gotha 903, studied by Goldziher, Thorning and Baer) and in four mss. of the K. al-Futuwwa, all closely related to each other and concerning, like the preceding work, Egypt (Gotha ms. 906, used by Thorning, and three B.N. mss., arabe 1375-7, used by Massignon), whose dates of copying extend between 1653 (Gotha 906) and 1735 (B.N. 1377) and which relate to the situation in the 16th and 17th centuries. These texts give lists of the guilds and their masters (pir), tracing the history of the shadd, received by Muhammad from Djibril, handed on to `Ali, and then handed on by `Ali to seventeen masters in the first place, beginning with Salmān al-Fārisī, who then proceeds to the shadd of other masters (whose number varies in the texts from 50 to 58). The texts then describe the initiation ceremony. Ewliya Celebi gives information on the guilds and the futuwwa at Istanbul and Cairo, Al-Djabartī mentions a very similar ritual (without mentioning the term shadd). The ceremony itself is described in detail, in an essentially similar form, by Jomard (Description de l’Egypte) and Lane (Modern Egyptians), and, for Damascus at the end of the 19th century, by Qoudisi.

The ceremony of the shadd took place at the point of reaching the status of master of a craft (ma‘alimin). It is unclear whether there was a shadd ceremony for the entry of the apprentice into his profession (mentioned by the K. al-Dhahākhīr); it may be that the usage fell into disuse. When the apprentice was considered expert enough in his trade to open a workshop or shop, he was brought to the shaykh of the guild, who examined him and, if he found him qualified, summoned a meeting, through the na‘ik (his assistant and the master of the ceremonies), of the masters of the trade. On a fixed day, those invited gathered together. The na‘ik brought forward the petitioner to the shaykh who, after reciting the Fātihah, proceeded to instil him according to a ritual laid down in minute detail. He tied a girdle round the upper part of the neophyte’s body, making in it knots, between three and six or seven in number, in the accounts of the various authors, according to the number of important master craftsmen of the trade then present. Each knot had a symbolic meaning and was tied by the candidate’s master, the shaykh and one of his assistants. When the ceremony, punctuated by recitations of the Fātihah, was over, the young man was considered to be ma‘ṣhūd. The shaykh gave him various pieces of advice. Then a feast (wa‘ilim) was given, at the expense of the petitioner. There may perhaps have been a similar ceremony for the elevation of someone to the office of shaykh.

This ceremony (shadd al-walad) was the corporate usage which lasted longest, but in a more and more restricted number of trades. Lane, in ca. 1830, mentions it for the carpenters, the wood-turners, the barbers, the tailors and the bookbinders. ‘Ali Paşa cites the barbers, the keepers of baths and the shoemakers. It was, in fact, amongst the shoemakers (sarmā’tāyya) (Mahmoud Sedky, La corporation des cordonniers, in Revue Egyptienne (1912) and the coppersmiths (nahhādsin) (A. Cherkes, Images, Cairo 1947) that the last echoes of it, well into the 20th century, were to be found. The inevitable decline of the trade guilds, because of the modernisation of the Egyptian economy, explains the progressive disappearance of these traditions. The same thing happened in Syria, where the very detailed picture given by E. Qoudisi in 1885 of these usages (largely similar to
those of Cairo) clearly reflects a situation largely outdated.

**SHADDAD** b. *AD*, a personage associated with the legendary town of Iram Dhāt al-īnād, to whom is attributed its foundation. For information on him, see *AD* and *I RAM*.

(T. FāHd)

**SHADDAD** b. *AMR* b. Hīd b. al-ʿAdābāb al-Kurāghī al-Fihī, *Companion of the Prophet* (ṣahīb), as also his son al-MUSTAWIRID, who transmitted on the authority of his father.

It is unknown when he was born or when he died. But since his son was also a Companion, he must have been of a certain age in the earliest Islamic period. But contrariwise, there is known a tradition of his from the Islamic period, transmitted by his son from Shaddad and going back to the Prophet Muhammad himself, "I went along to the Prophet's side. He took his hand, and lo, it was softer than silk and colder than snow" (see Ibn Ḥaḍjr, *Isāba*, ii, 141 no. 3855; on the vocalisation of the name Ḥisāl (sic) and of Fīhr, see *Caskel-Strenziok, Gharābṭ an-nasāb*, i, 324, 246, and Ḥaḥāla, *Maʿṣūmah kahb̲īl al-ʿarab*, 1 Beirut 1985, i, 271, iii, 929).

**Bibliography:** Given in the article.

**SHADDĀDIS** or BĀNĪ SHADDAD, a minor dynasty of Arrān and eastern Armenia which flourished from the 4th/10th to the 6th/12th century (ca. 340-570/ca. 951-1174), with a main line in Gandja and Dvin (q.v.) and a junior, subsequent one in Ani (q.v.) which persisted long after the end of the main branch under Saldjk and laterly Ilfezhid suzerainty.

There seems no reason to doubt the information in the history of the later Ottoman historian Münəddiğm Bāshī that the Shaddādis were in origin Kurdish. Their ethnicity was complicated by the fact that they adopted typically Daylamī names like Lāshkārī and Marzūbān and even Armenian ones like Ashot, but such phenomena merely reflect the ethnic diversity of northwestern Persia and eastern Transcaucasia at this time.

Around 340/951 the adventurer Muhammad b. Shaddād b. Kātātī established himself in Dvin whilst the Musafīrīd Daylāmi ruler of Adhābarbādjan Marzūbān b. Muhammad was preoccupied with various of his enemies, including Kurdish and other Daylamī rivals, the Arab Hāmādānis, the Rūṣ (q.v.) and the Būyīds (who eventually captured and imprisoned Marzūbān [see MUSAFĪRĪD]; but Ibn Shaddād was unable to hold on to Dvin and had to flee to the Armenian kingdom of Vaspurakan. Muḥammand’s eldest son Lāshkārī (d. 368/979-80) in 360/971 seized the Shaddādis an independent power, ending Musafirid influence in Arrān and expanding northwards into Şamkūr in Transcaucasia and eastwards to Bārdhā [q.v.]. After the short reign of Muhammad’s second son Marzūbān, the third son Fādī (I) began a long reign (375-422/986-1031) and, in general, expanded the Shaddādis territories from his base in Arrān. He combated neighbouring Armenian princes, recovered Dvin from them in ca. 413/1022, and occupied the territories of the Armenianised Hungarian Severdīk to the west of Şamkūr. His campaigns against the Armenian Bagratids of Tashīr, who had styled themselves “kings of [Caucasian] Albania”, Avānḵ and the Georgians, met with varying fortunes, but in 421/1030, after a successful foray into Georgiv, he was intercepted by the Georgian king Līparī and the Armenian prince Anholin of Tashīr and his forces disastrously defeated. He had in 418/1027 constructed a fine bridge over the Araxes river (see *AL-RASS*), possibly in anticipation of an incursion into the Rawwādīd’s [q.v.] territory of Adhābarbādjan.

By this time, the whole region was becoming confused and unstable, with strong Byzantine pressure on the Armenian princes and with increasing raids from the Turkmen Oguzh bands, who were eventually to establish Saldjk suzerainty over Adhābarbādjan and Arrān; thus the chronicles record an attack on Shaddādī Gandjā by Kūlumūbb b. Ārsān Isrāīlī (see *SALDKĪDĪS*, III. 5) in 437/1045-6, or 438/1046-7. Ali Lāshkārī b. Fādī (I) (425/1043-49) had a successful and prosperous reign; he was praised by the Persian poet Kātān [q.v.], who frequented his court at Gandjā, amongst other things for a major victory over the joint forces of the rulers of Armenia and Georgia; but towards the end of his reign, he was besieged in Gandjā by the Oguzh, mentioned above, and relief only came from the imminent approach of a Byzantine and Georgian army.

Lāshkārī’s brother Abu ‘l-ʾAswār Shāwur (I) had ruled in Dvin as a vassal of the elder members of the Shaddādī family—in effect as an autonomous prince—since 413/1022, in the face of increasing Byzantine operations against Dvin and Anī. In 441/1049-50 he took over power in Gandjā also, and ruled as the last great independent Shaddādī until 459/1067. Although married to a sister of the Armenian king of Tashīr David Anholin (whence, doubtless, the name Aghūr given to his second son), Abu ‘l-ʾAswār achieved a great contemporary reputation as a ghāzī against the infidels and he restored the Shaddādī principality to much of its former glory in Arrān and Şamkūr. But after the Saldjk Toghrīl Beg had made the Rawwādīd’s Adhābarbādjan his tributaries at Tābīz, the sultan came to Gandjā in 446/1054 and Abu ‘l-ʾAswār became his vassal also. In the latter part of his reign, he participated in the Turkmen expansion into Armenian and eastern Anatolia, and he further combated his kinsmen the Yazdī Shīrwān-Shāhs [q.v.] in Shīrwān to the north of Arrān and of the Turkmens in the south. In Shīrwān, at the end of Abu ‘l-ʾAswār’s reign, the Alans or Aš [see ALAN] of the central Caucasus...

But in the end, the Saldjūks imposed direct rule over Arrān and brought about the end of Shaddādī power there. Abu ‘l-ʾAswār’s son Fādī (II) was captured by the Georgians, and the Shīrwān-Shāh Farīburz b. Sallār invaded Arrān. When Sultan Alp
Arslan's eunuch commander Sawtigin passed through Arrân in 460/1068, the dissensions within the Shaddâdid ruling family were apparent to the Saljûq ruler, and when Sâwîtîn appeared a second time in 468/1075, the rule of Fâdîl (II) was ended and the Shaddâdicts' territories were annexed to the Great Saljûq empire.

However, the branch installed by the Sâljdâqûs at Anî continued for another century or so. Anî, the capital of the Armenian Bagratids, had been taken over from them by the Byzantines, but in 456/1064 was conquered by Alp Arslan. Certainly by 464/1072, and probably before then, the Shaddâdid Abû 'l-Abbâr Anîbûbâr b. 'Abd al-Mu'mûn (I) (d. b. 512/1118) was governing the city. The history of the Shaddâdicts of Anî is known only sketchily. We no longer have for them an Islamic source comparable to the information on the main line in Gandja found in Mûnedjîm Bâshî and going up to 468/1075-6. We do know that Mûnîçûr, with help from his Great Saljûq suzerains, had to fight off attacks by the Artûkîs (see q.v.) and by the latter's vassals. The latter (sometimes called in the Arabic sources al-Salûbî al-Absâr 'the Red Lion'), of the region to the south of Lake Van; but the Shaddâdicts seem to have held on to Dvin till 498/1104-5. In the reign of Mûnîçûr's son and successor Abu 'l-Aswâr Shâwûr (II), the Georgian king David the Restorer (1089-1125) recaptured Anî for the Christians and replaced the Muslim crescent emblem on the Armenian cathedral there by the cross, and it was recovered for the Muslims by Abu 'l-Aswâr (II)'s son Fâdîl or Fâdûn (III) (d. 524/1130), who also retook Dvin and Gandja. Nevertheless, the Shaddâdict principality of Anî remained under Georgian overlordship, and few facts are known about the Shaddâdicts âmirûn of the middle decades of the century. After internal unrest within Anî itself the Georgians occupied the city in 536/1141, carrying off Fâdûn (IV) b. Mahmûd b. Mûnîçûr, and shortly afterwards sacked Dvin and Gandja also. It was Eldîqûz or Ilî-dînîz (q. v.) who regained Anî in 559/1164, and the historian of Miyâfârîkîn al-Fârîkî records that its governorship was given by him to a Shaddâdid, Shâhânshâh (b. Mahmûd) b. Mûnîçûr; he ruled there until the Georgians once again conquered Anî in 570/1174-5. Thereafter, the Shaddâdicts fade from mention, except that a Persian inscription in Anî of 593-656/1196-1258, one of the great virgins in the Sufism of the brotherhoods. His teachings launched a tarîqa which gave birth to numerous, dynamic ramifications. These developed and have constituted a mystical tradition very widespread in North Africa and equally present in the rest of the Islamic world, as far as Indonesia.

Al-Shadhili's life is known to us through the texts compiled by his disciples, often late and in a clearly hagiographical vein, which is hard to distinguish the historic personage from what pious legend or the archetype of the wali has brought forward. Yet one can sketch out the course of life of one of the most famous saints of Maghribi Islam. The most important sources here are the Luṭâf 'al-imânîn of Ibn 'Arâ 'Ali Allâh (d. 709/1309; ed. 'A.H. Mahmûd, Cairo 1974) and the Durât al-âsâr of Ibn al-Sallâbî (d. 724/1323; Brockelmann, S II, 147, which places his work ca. 751/1350, to be corrected; ed. Tunis 1304/1886). There is also the synthesis of Ibn 'Iyâd (sometimes written Ibn 'Ayyâd and even Ibn 'Abbâd), the Majûfakîr 'al-îsâma fi 'l-ma'nîwîr al-shâdhdhîya, Cairo 1355/1937, much later than the previous two sources since it cites al-Suyûtî, Zârûkî (9th/15th century) and al-Shârîrî (10th/16th century).

Al-Shadhili was born in northern Morocco, in the Ghumâra country between Ceuta and Tangiers in ca. 558/1163 or ten years later, according to the sources. He claimed descent from the Prophet via al-Hasan. He studied the various religious sciences in Fâs, was tempted for some time to follow alchemy, but abandoned it for the mystical way in its proper sense. Seeking instruction from the great masters of his time, and seeking especially to meet the Pole [see Kûbî, he left for the East, sc. Irân, in 615/1218, where he continued his education, notably with the shaykh Abd Allah âl-Wasiti (d. 632/1234), disciple and khalifa of Ahmad al-Rîfî (see Khîyûh). One master (be'd al-a'wliya', according to Durrâ, 4), nevertheless suggested that he should return to the Maghrib to seek out the Pole of the age. Back in his homeland, Morocco, Al-Shadhili recognised the Pole in the person of the hermit of the Rif, 'Abd al-Salâm b. Mahdîh (d. 625/1228 [q. v.]). He stayed with the latter for several years, until 'Abd al-Salâm suggested that he should travel to Irîkîya; it is not impossible that Al-Shadhili's departure was motivated by local disturbances, in the course of which 'Abd al-Salâm was murdered. We do not know exactly why he decided to settle precisely in the village of Shadhîla, half-way between Tunis and Kayrânîn, nor why he henceforth began to be called by the nisba of Al-Shadhili—which a flash of divine inspiration offered him the interpretation of al-Shadhili li 'the man set apart for My service and My love'—by the title Du'ra, 10. But his worth as a spiritual influence, especially on those the Pole of the age, was said to have been in touch with al-Khadîr. His influence displeased the 'ulama' of Kayrânîn, who launch-
ed against him a campaign of denigration, accusing him of proclaiming himself a “Fātimid”—an allegation which was possibly not entirely alien to al-Shadhili’s conviction (since, as we have seen, he was of Shāfi‘ī origin) that he was the Pole of his age. He finally decided to leave Irfikīya when a Pilgrimage caravan was departing. He settled in Egypt, an attractive and welcoming land for Sufis, at Alexandria in 1244 or perhaps only as late as 1252. The success of his teaching and his prestige grew unceasingly, including in the eyes of the “ulama‘”, and numerous pupils came to Alexandria from distant parts of the Islamic world. So ran a spiritual and ascetic training from him. As a fervent observer of the duties of Islam, Abu ’l-Hasan al-Shadhili made the Pilgrimage as often as he could, and it was in the course of a journey to the Holy Places that in 656/1258 he died at al-Humayyibaha in the Upper Egyptian desert.

Al-Shadhili left behind no writings on doctrinal matters (deliberately thus, according to Luṭfī, 37-8). The only writings which we have from him are some letters, litanies and prayers. The essential core of his teachings was transmitted by his pupils (see above, in Bibl.) in the form of collections of “sayings”, words of wisdom and edifying and miraculous anec
dotes. In these he develops the themes of a moderate Sufism, attentive to the material life of his disciples and respectful of social cohesion. Basically, it is a question of a strict and unequivocal Sunni spirituality. The putting into practice of the Shari‘ah is here the indispensable framework of the faith, equally valid for Sufis and for ordinary believers; by the practice of the virtues, the Sufi purifies the mirror of his soul and becomes fit to undertake the mystical pilgrimage. The fakir who is a bad practitioner of these requirements is ipso facto severely blamed. In a more general way, the mystical should keep a deep humility in face of what has been provided by revelation. “If your mystical unveiling (kashf) diverges from the Kur‘ān and Sunna, hold fast to these last two and take no notice of your unveiling; tell yourself that the truth of the Kur‘ān and Sun
a is guaranteed by God Most High, which is not the case with unveiling inspiration and mystical percep
tions” (al-Sha‘rānī, al-Tabākāt al-kubrā, Cairo 1954, ii, 4; see also Dura, 34).

Al-Shadhili’s counsels on spiritual orientation likewise recall traditional Sufism. Recent works of themes of these words do so runnily concern the struggle against the carnal soul and acceptance of the fate which befalls one. These counsels are not directed at ascetics but at pious believers engaged in the social life; “the Way does not involve monastic life (rabbāniyya), nor living off barley or flour-siftings; the way involves patience in the accomplishing of the divine commands and the certainty of being well
guided” (al-Sha‘rānī, op. cit., ii, 6; Dura, 86). Numerous of the master’s locutions stress the necessity of a detachment essentially internal and without ostentation (see e.g. Dura, 138), at times displaying malāmāti overtones. Begging (Luṭfī, 143) and even wearing special clothing are condemned by al-Shadhili, who moreover himself chose to dress with a certain elegance. He showed himself circumspect in the use of sana‘‘ (q.v.) (Dura, 104) and did not take part in any of the so-called spiritual phenomena (walking on fire, piercing the flesh), as with the Rifa‘īyya (q.v.). The core of his Sufi practice was the constant remembrance of God by means of jaculatory prayers and litanies, plus spiritual firmness in the face of the material trials and hardships of the individual life.

The mystical experience towards which al-Shadhili endeavoured to guide his disciples was laid out in a practical way and not an abstractly doctrinal one. Although he himself had been trained in theology, he saw no spiritual value in the speculative and independ
dent exercise of reason (see e.g. Dura, 34, 91), and the hagiographical sources show us al-Shadhili combat
ting and converting Mu‘tazili disputants (ibid., 23). God is the original source of the conscience, not an object of knowledge; how could He be approached through concrete things, when it is only through Him that these things are known? (Luṭfī, 92). Al-Shadhili develops very little the doctrinal consequences of the experience of understanding: identification of the devotee with His Lord—but goes back to the ac
tual spiritual experience itself: “The Sufi sees his own existence as being like dust (hābā‘) floating in the air—neither as existence nor as annihilation, just as it is in the knowledge of God” (al-Sha‘rānī, Tabākāt, ii, 8; Dura, 90). He recommends to his disciples the greatest possible discretion concerning their spiritual conditions, so as not to become at the same time puff
ed up with pride or in regard to others and ultimately hurt the susceptibilities of ordinary believers: “If you wish to reach the irreproachable Way, speak like someone who is apart from God, at the same time keeping union with Him present in your secret heart” (al-Sha‘rānī, op. cit., ii, 7; see also Dura, 30).

Another aspect of the spiritual teaching of al-Shadhili is the number and the important function of prayers (al-‘iya) and litanies (asābā‘) which he left to his disciples. These prayers often relate to specific situa
tions, e.g. spiritual or material distress (cf. Dura, ch. iii; al-Sha‘rānī, op. cit., ii, 6, 9). The asābā‘ most often recited are the very popular hibz al-bahr (inspired directly by the Prophet, cf. Dura, 51), the h. al-kabīr (or hadījī asābīf), the h. al-mār, the h. al-
fath and the h. al-Shafī‘ Abī ‘l-Hasan. Their texts are given by Ibn al-Sabbagh, Ibn ‘Iyād and, more recent
y, ’A. H. Maḥmūd, al-Mudra al-shadhiliyya al-haditha wa-‘ināmāthu Abī ‘l-Hasan al-Shadhili, Cairo 1969). The boundary between the liturgical recitation of a prayer taught by the Pole and the magical usage of these texts is not always easy to trace; certain of these litanies in
clude formulae of a theurgical or talismanic nature, and numerous of the faithful attribute inherent virtues to these texts, independent of whatever understanding of it the one reciting it may have. But al-Shadhili is in any case blamed by some companies of Sufis for forms of superstition surrounding the cult of saints, which he condemned as a form of idolatry (al-Sha‘rānī, op. cit., ii, 10). If saints’ prayers are answered, it is because they are the theophanic locus of the divine mercy, and not because they themselves have any authority for intercession. In his own lifetime, al-Shadhili already ac
cquired a reputation as a miracle worker, marvellous happenings took place round his tomb and amongst his close disciples, for whom the Master remained, even after his death, the person for whom God answers prayers.

A more esoteric teaching of al-Shadhili’s concerns the concept of sainthood. It revolved round waša‘īya as a prophetic inheritance (see e.g. al-Sha‘rānī, op. cit., ii, 10; or Dura, 132-3), here again taking up an earlier Sufi doctrine. The fully-accomplished saint reaches the degree of knighthood (rusul), but he is inferior to them on two counts: on the one hand, his knowledge is, in the great majority of cases, less complete than theirs, and on the other, he is not sent to bring a more correct ver
ession of a ī‘rā‘ (Luṭfī, 59-60). Al-Shadhili’s teaching was nevertheless perceived by his followers as an ac
tual, living continuation of Muḥammad’s mission (cf.}
The vision of a hierarchy of saints, which is implied here, is fundamental. As we have seen, al-Shadhili was preoccupied since his youth by the Kingdom with the Pole of the universe. His disciples considered him fairly soon as being himself this kūbat (Lātā'īf, 139), and he personally openly strengthened them in this conviction (ibid., 141, 146, 165; Durra, 13-14, 111). He designated his main disciple Abu 'l-Abbas al-Mursi as his successor in this function, and Shadhili tradition confirms that the kūbat would be a member of their brotherhood, until the Judgement Day. This kūbatnīya is here to be understood in the absolute sense (or even in the bi-centric sense ibid., 9, 105-6) and not relative to a specific community; al-Shadhili himself enunciated the fifteen remarkable features or charisms which this office of the Pole involves (amongst these are the guarantee of inaccessibility to err, and knowledge of the past, present and future; cf. Lātā'īf, 163, and Durra, 71). But otherwise, it is a delicate task to isolate the original doctrine of al-Shadhili regarding the formulations of the Masters of the Sālihīyya. Nongenetic features, however, are the following: al-Shadhili related (Lātā'īf, 163-4) that Abu 'l-Hasan had received a visit from Sadr al-Dīn al-Kūnāwī [q.v.] at a time when his master Ibn 'Arabī was still alive. "[Sadr al-Dīn] expatiated on a multiplicity of sciences. The Shaykh kept his head bowed until Sadr al-Dīn had finished talking. Then he raised his head and said to him, Tell me who is at this moment the Pole of our age, who is me who is at this moment the Pole of our age, who is the acknowledgment to the Pole—whence al-Shadhilite, Beirut 1972, 26) sees in this tale no reply". P. Nwiya (Ibn 'Ata' Allāh et la naissance de l'ordre des siddik, Cairo 1934; idem, Husn al-tanka al-shadhiliyya, Hikam, dicta, the master's memory, it is perpetuated by the ancestor of the Pole—whence al-Kūnāwī's silence.

Even if al-Shadhili never envisaged the formation of a tarīqa in the strict sense of the term, his teaching nevertheless marks the evolution of Sūfism towards its manifestation in the brotherhoods and in maraboutism. There are several disciples of far-reaching influence—the Andalusian Abu 'l-Hasan al-Shadhili; numerous branches and sub-branches more or less attached to the Shadhiliyya saw the light in the strict sense of the term, his teaching codified the ritual of the dhikr, founded khānakāhs and in turn instructed disciples in the spirit of the school. This moderate form of Sūfism corresponded to a profound need in the Muslim society of the age; Shadhili khānakāhs spread and flourished in Egypt, Ifrīkiya, Morocco, as well as in Syria and the Hijāz. Numerous branches and sub-branches more or less attached to the Shadhiliyya saw the light in the course of succeeding centuries [see SHADHILIYYA]. As for the master's memory, it is perpetuated by the annual festivals on the very spot of his burial in the eastern desert of Upper Egypt, as well as in Ifrīkiya, at Tibāl Belhassen (in the outskirts of Tunis), Menzel Bouzefa (Cape Bon) and on the mount Zaghwan.

ban milieu (Alexandria, Cairo, Tunis), and counted within its ranks a good number of well-known intellectuals, such as the great 9th/15th-century polygraph Djalal al-Din al-Suyuti [q.v.]. It but also found a ready audience in rural areas, especially in the Maghrib. The affiliation to the order of the ecstatic popular saints of the 10th/16th-century ʿAlī al-Ṣanḥādji and his pupil ʿAbd al-Rahmān al-Maṣḍīḥūb is characteristic in this regard (see A.L. de Premare, Sīdī ʿAbd-er-Rahmān el-Maṣḏīḥūb, Paris-Rabat 1985, ch. III). In the Maghrib properly speaking, but equally in the Nile valley, the Shadhillīyya accompanied the development of a Sūfism which tolerated—and even encouraged—culls around saints' tombs, in which the efficacy of the baraka of the master counted for more and more.

We shall not deal here with the Sūfī currents which sometimes attached themselves to the Shadhillī spirit in a purely mythical or lateral manner, such as the Badawiyā or Dāsuqīyya; nor with those which, despite being impregnated with the Shadhillī, developed into new and independent orders (the Tijāniyya and orders derived from the Idrīsīyya).

But one should mention, amongst the brotherhoods of the Shadhillī tradition which affirmed their personality during that time, that, in Egypt, the Wafāʾiyya, founded by the Idrīsīyya Shams al-Dīn Muhammad Wafāʾ al-Bakri (d. 760/1359) and his son ʿAlī (d. 807/1404; on him, see al-Shaʿrānī’s notice, in Ṭabakāt, ii, 22–65), enjoyed a solid implantation and an undoubted spiritual and intellectual diffusion. The Ḥanāfīyya were founded by Muhammad al-Ḥanafī (d. 847/1443), a highly charismatic personality who left a strong mark on his age (cf. ʿAlī b. Umar al-Battānūnī, K. Sīr al-safī fi manākib al-saltān al-Ḥanafī, Cairo 1306/1888). In Syria, the Shadhillīyya spread under the impulse of the Moroccan ʿAlī b. Maymūn al-Fāṣi (d. 917/1311) and his disciples, affiliates of the Mādīnāyya branch.

In the Maghrib, the Shadhillī presence was even more widespread. One may mention, in particular, the Zarrūkīyya, which arose out of the teaching of Abu ʿIṣābās Ahmad al-Burnūsī, called al-Zarrūk (d. 899/1494). This Moroccan scholar had a stay in Egypt, where he became a disciple of the Wafāʾī master Ahmad al-Hadramī and probably of another Fāṭimid scholar, the Shadhillīyya of the Maghrib who travelled in various regions. He left behind an important body of written work (cf., especially, his Kawsīʿīd al-tasawwuf, Damascus 1968) and breathed fresh life into the Shadhili heritage there, raising up a fresh imp-ulse (see A.F. Khushaim, Zarrūqīy al-Sūfī, Tripoli 1976). Several Maghribi brotherhoods claimed connections with his teaching: the Darḵwāyīyya (see below), the Ḥarāšayyā Ḥarāšayyā and its own branches, the Shavkīyya, Karzāzīyya and Nāṣirīyya (on these groups, see Depont and Coppolani, Les confréries religieuses musulmanes, Algiers 1884, 457 ff.; G. Drague, Essai d’histoire religieuse du Maroc, Paris 1951, 183 ff.). Another dynamic movement of Shadhillī inspiration was stimulated by the figure of Abu ʿAbd Allāḥ Muhammad al-Dāṣūqī, a Sūfī master originally from southern Morocco. This last travelled to Egypt, where he spent a long stay (then in the years 916/1510? and finally returned to Morocco. After a period of hermitlike seclusion, he spread his teachings, which had such popular repercussions that he was persecuted by the political authorities and died—perhaps from poison—in 869/1465, the year of the fall of the Marinīd dynasty [see al-Dāṣūqī]. Later, his body was interred at Marrakech, and he became one of the seven patron saints of the city. This shaumaturge waʿl marks the origin of a new form of mass Sūfism. Membership was no longer conditional upon personal initiation rites (ṣubḥa, ṭalḥīn), and did not necessitate the taking place within a structured brotherhood, but resulted from a simple act of allegiance to a šaykh shown by a rite of transmission of baraka and devotional practice centred round reading a collection of litanies, the Daʿāʾī al-ḥayrāt. This last became extremely popular, notably because of the miraculous benefits which certain people connected with its recitation. Several later ṣaḥāʾīyya attached themselves to this way of the Dāṣūqī, including the Ārūsīyya, widespread in Ifrīqiyah (see Brunschvig, Ḥafsīyda, ii, 341 ff.), the Ḥanṣālīyya (see Depont and Coppolani, 492 ff.; Dragne, 163 ff.) or also the ʿĪsāwīyya. The latter, which owed its name to Muhammad b. ʿĪsā al-Mukhtar (d. 931/1524), added to the Shadhili-Dāṣūqī tradition shamanistic practices reminiscent of those of the Rifāʿīyya: initiates were endowed with a totem animal, practised spiritual healings and, in trance, devoured snakes or pierced their bodies with sword blades (see R. Brunel, Écouteur la conférence d’Aïssawas au Maroc, Paris 1926). Analogous practices are also found in the related Moroccan order of the Hamdushiyya (see V. Crapanzano, The Hamadsha—a study in Moroccan ethnopsychology, Berkeley, etc. 1973).

The historic success of the Shadhili Way probably depended on several factors of a historical nature. Within a North Africa engulfed in a permanent economic and political state of crisis, grouping in the bosom of a community based on initiational solidarity had a certain attraction. The political authorities, such as the Marinids in Morocco or the Hafsids in Idrīsīyya, often actively favoured the creating or expansion of the zauñāyā in their territories, and the integration of moderate Sūfism in the teaching of the madhānas—or conversely, of ṣīḥ in the zauiyā. It is true that these last also at times played the role of centres of dissidence against the central power, as with that of al-Dīlā in Morocco, which almost succeeded in seizing the sultanate power towards the middle of the 11th/17th century (see M. Hadidji, al-Zawiyah al-Dīlāyya, Rabat 1384/1964, and al-Dīlā in Suppl.). Nevertheless, they were more often regarded as centres of social stability by virtue of the allegiance given by its members to the šaykh. They were often organised on a “dynastic” manner of functioning, and to some extent regulated local and tribal particularisms. But the special success of the Shadhiliyya was due to the factors peculiar to itself. Its strictly orthodox Sunnism and the respect for all exoteric tradition which it professed, its social discreetness (absence of distinctive garb or of spectacular public festivals or of begging), all of these aroused confidence and fervour. Finally, the active role played by the brotherhoods in attempting to resist European encroachments in the Muslim lands—as e.g. that of the Shadhiliyya-Dāṣūqīyya in Morocco in the warfare against the Portuguese in the 9th-10th/15th-16th centuries—accelerated the process of cohesiveness of Sūfism and the social fabric in the Maghrib.

More recently, currents of revival attached to the Shadhili tradition have appeared. This is the case with the Darḵwāyīyya [see ṣaḥāʾīyya]. It goes back to Abu Ḥamīd al-ʿArabī al-Darḵawī (d. 1823), who is to be placed in the Zarrūkī tradition without there being any new elements added, except for a reforming zeal in combating the material and spiritual corruption of the surrounding maraboutic Sūfism. The great moral (and political) influence which he exercised from his
The Shadhiliyya order was founded in the region of Fez, in North Africa, and was closely associated with the Alawiyya, founded in 1914 in the Darkawiyya branch of the order. The Shadhiliyya order's origin can be traced back to the twelfth century, with the establishment of the Yasrutiyya by the master Abu 'l-Hasan Kuhin (d. 1220), who was associated with the Shadhiliyya order. The order's origins are also linked to the lineage of the Nasiriyya, founded by Abu l-Balagh al-qaddawi, who was a Shadhili master and a significant figure in the history of the order.

The Shadhiliyya order is characterized by its mystical teachings and practices, which are centered around the concept of dhikr (remembrance of God). The order has a strong emphasis on the devotional practices of dhikr, which involves the repetition of God's name or a particular phrase in a rhythmic and repetitive manner. This practice is intended to facilitate spiritual transformation and the development of a deeper relationship with God.

The Shadhiliyya order is also known for its distinctive dress code, with members of the order traditionally wearing white cloaks and head scarves. This dress code is symbolic of the order's commitment to simplicity and asceticism, and it reflects the order's emphasis on spiritual purity and detachment from worldly desires.

The Shadhiliyya order has had a significant impact on the development of Sufism in North Africa and beyond. It has spread to other parts of the Islamic world, including Turkey, Indonesia, and China. The order has been influential in the development of other Sufi orders, and its teachings have been disseminated through a variety of written and oral traditions.

The Shadhiliyya order has a rich history of publication and scholarship, with numerous works written in Arabic and other languages. These works include biographies of the order's masters, collections of their mystical teachings, and discussions of the order's spiritual practices. These publications have been instrumental in preserving the order's traditions and facilitating the spread of its teachings.

The Shadhiliyya order has also played a significant role in the cultural and religious life of North Africa and beyond. It has been involved in the development of educational institutions, such as the Madrasa al-Shadhiliyya al-haditha in Fes, which was founded in the late nineteenth century. The order has also been involved in the development of religious and cultural institutions, such as mosques and madrasas, which have played a significant role in the dissemination of the order's teachings.

The Shadhiliyya order continues to be an active and influential force in North Africa, and its teachings and practices are still widely practiced today. The order's emphasis on dhikr, spiritual purification, and the cultivation of a deep relationship with God continues to inspire and influence believers around the world.

The origin and first appearance of shadirwan or salsabil in Islamic architecture are not known. Nor is its place of appearance, although there are some indications that it might have been Samarra\(^2\) \[q.v.\], the transient and opulent Abbāsīd capital (221-79/836-1265), where a large number of palaces with gardens, fountains, and pools were constructed. Modern excavations and contemporary panegyric poetry describing these palaces suggest that the monumental water works in Samarra\(^2\) anticipated the later and more intimate shadirwan systems (Yasser Tabbaa, Towards an interpretation of the use of water in Islamic court-yards and courtyard gardens, in Journal of Garden History, viii/2 [July-Sept. 1987], 198-9). The earliest datable remains of a shadirwan, a marble slab (1.3 m by .37 m and .14 m thick), carved with a chevron pattern with a fish deep carving to a channel cut in the marble slab upon which water flows—perhaps in imitation of a small basin in the middle of a side hall via a shallow channel. The small basin is set under a wall recess with a spout attached to pipes in the wall from which most probably water ran over a no-longer-extant salsabil (K.A.C. Creswell, Muslim architecture of Egypt, Oxford 1952, i, 124-6, figs. 58, 61). Whether the salsabil had any mukarnas hood above it is impossible to know.

The next example of shadirwan comes from Damascus in the Madrasa al-Nuriyya (of Nūr al-Dīn, 567/1172), in the iwān \[q.v.\] facing the entrance and under a mukarnas hood, "water pours from a shadirwan into a pool, which opens into a long channel until it falls into a central pool in the courtyard" (Ibn Djuzbayt, Rhîba, Beirut 1964, 256). It was recently cut off and its channel paved over, but the 1920s plan made by Herfeld shows a typical shadirwan system (Creswell, ii, 109-10, fig. 56). The appearance of this shadirwan can be considered a novelty, since this is the first time we encounter it outside the realm of residential or palatial architecture. A little later in date is a series of Ayyūbīd and Artūkīd palaces built in the citadels of Syria and Dżazīra with elaborate water systems consisting of fountains, channels, and pools. At least three of them, the early 7th/13th-century Artūkīd palace at Dīyābākir, the Ayyūbīd palace in Aleppo (built between 617/1220 and 638/1240) and the Artūkīd al-Firdaws palace in Mārdīn (636-65/1239-60), have shadirwāns occupying the centre of an iwān’s back wall and flowing via a narrow channel into a large pool in the courtyard (Tabbaa, 208-11, figs. 11-17).

In Ayyūbīd and Mamlūk Cairo, shadirwan arrangements became a salient feature in reception halls, known as ka’āūs. Several Caieriine shadirwāns slabs with various patterns engraved on their surfaces are on display at the Islamic Art Museum in Cairo and the Dār al-Āthār al-Isliāmiyya in Kuwait, while few are still in situ. The most notable among them are the two shadirwāns in two opposite iwāns of the bīmāristān of Sultan Kālawūn (683/1284), which may have belonged to the four-iwān ka’āūs of the Fāṭimid Western Palace, or its Ayyūbīd replacement that was appropriated by Kālawūn to build his complex (Creswell, ii, 208-10, pl. 63). Wafq \[q.v.\] documents furnish a number of descriptions of Mamlūk shadirwāns which provide information on their various uses, composition, and terminology (Mona Zakarya, Deux palais du Caire médiéval, wafqūt et architecture, Marseilles 1983, 149). Thus, for example, we learn that the small receptacle in which water falls before flowing over the shadirwan had an onomatopoeic name, karkā (p. 113), the channel was called sīlāt (Ibrahim and Amin, 66). The bīmāristān of al-Mu’ayyad Shaykh (821-3/1420-8) repeated the arrangement of the bīmāristān of Kālawūn with two shadirwāns in two opposite iwāns (wafq of al-Mu’ayyad Shaykh, Dār al-Waṭiḥik, no. 938 k, 7, 1-24.5). Caieriine sabils \[q.v.\] too had shadirwāns from which water collected into small basins (fasdki, pl. of fiskiyya) (wafq of Amīr Khāyir Bīk, Dār al-Waṭiḥāk, 1962, 48). This representation and a number of references to the shadirwan in contemporary Sicilian Arabic eulogistic poetry, addressed both to Norman and Muslim patrons, suggest that the type was widespread in palatial architecture all over the Maghrib (Tabbaa, 202). This is further confirmed by the remains of large houses excavated in al-Fustāt. The plans of at least two of them (nos. iii and vi), dated to the Fāṭimid period (4th-5th/10th-11th centuries), exhibit arrangements similar to the Zīza shadirwān. They each have a big basin in the centre of the courtyard connected with a small basin in the middle of a side hall via a shallow channel. The small basin is set under a wall recess with a spout attached to pipes in the wall from which most probably water ran over a no-longer-extant salsabil (K.A.C. Creswell, Muslim architecture of Egypt, Oxford 1952, i, 124-6, figs. 58, 61). Whether the salsabil had any mukarnas hood above it is impossible to know.

Architectural terms in Mamlūk documents, Amin (K.A.C. Creswell, Muslim architecture of Egypt, Oxford 1952, i, 124-6, figs. 58, 61). Whether the salsabil had any mukarnas hood above it is impossible to know.
SHADIRWÂN — SHADŪNA

SHADJAR AL-DURR, Wālidat KHALIL AL-SALİHIYYA, also called Umm Khalil, the famous sultana of Egypt (ruled 648/1250). Shadjar(at) al-Durr (the oldest sources prefer the former, modern Arab authors the latter), a strong-minded Turkish slave, started her career as al-Salih’s sultana on 30 Muharram 648/4 May 1250 with ʿizz al-Din Aybak al-Turkmānī as commander. Though women had exercised power as royal spouses and regents before, her formal recognition as ruler in her own right was unheard-of in the Muslim Near East, the only precedent being the sultanate of Radiyya, the Ayyubid daughter and Mamluk appointed her sultana on 30 May 1250. However, her formal abdication did not put an end to her predilection in ruling the country, as is attested by all available sources; in fact, she still signed royal decrees as late as 1255. Aybak married her either the day after her tentative promotion or sometime after he deposed the child al-Aṣḥaf Mūsā, of Yemenite Ayyubid descent, in 651/1254, who had replaced him as nominal sultan five days after his installation. Having dealt with the Syrian enemy and internal Bahri opposition, she thought to challenge his wife’s position by contracting a marriage with the Zangid prince of Damascus, Shadjar al-Durr heard of his plans and had him killed on 23 Rabī’I 655/10 April 1257. But her attempts to retain influence as kingmaker came to nothing. On 11 Rabī’I 65/28 April, her naked corpse was found lying outside the Citadel. She was buried in the tomb she had built for herself. The “dāhīyat al-dahr whom no woman rivalled in beauty and no man in determination” (Barhebraeus) had finally lost the struggle for power. Her posthumous career as historical and literary character exemplifies the transformation of fragmentary evidence into ever more readable stories, into history and her story.

SHADŪNA, the Arabic name of one of the kūras or provinces of al-Andalus. It stems from Latin Asido, a Roman and then Visigothic town also called Cl. Cahen and Ibrahim Chabhour, Le Testament d’al-Malik al-Mansur, in BZ. Or., xix (1977), 97-114; Cahen, Une source pour l’histoire des Croisades: les mémoires de Sa’id al-Din ibn Hamawiyya Djuwayni, in idem, Les peuples musulmans dans l’histoire médiévale, Damascus 1977, 457-82; Ibn al-Dawādārī, Kanz al-durr, viii, Cairo 1971; Yāfī, Mir‘āt al-Ǧāḥin, Haydarābād 1918-20.

porary authors, Shaduna was divided into numerous districts, including villages, towns and fortresses (husun). Amongst these last are mentioned in the Dhikhr bi-laid al-Andalus Tota, videos, Ibn Salim, Nablab, Sanlucar, Galyana, al-Kanâtir, al-Aksâw and Ka'ât Ward. Concerning the towns, this work distinguished especially Cadiz and Jerez. Algeciras, a major centre of al-Andalus all through its long history, formed part of this kûra at an early period but soon became the chief-fieu of an independent province. According to Ibn Ghâlib and Ibn-Himyar, Shaduna was bountifully endowed with the gifts of land and sea, and covered 25 square miles.

Ibn al-Shabbât relates that Târik [g.v.] disembarked in al-Andalus and marched on the Wâdi Laokko, where he confronted the troops of King Roderic. After defeating the Visigothic ruler, the Muslims besieged Madînât Shaduna. In 127/743, the gand of Filastîne (i.e. Palestine) settled in the province; this is the first reference to Shaduna as a kûra. Towards 127/745 the Franks rebelled at Jerez by 62/1220. The Muslims remained at the Kâibs of Abu l-Djâljâr. The Mâdjuş [g.v.] or Northmen landed on the coast of Shaduna in 229/844 and occupied the port of Cadiz, although the greater part of their fleet sailed up the Guadalquivir towards Seville. Being highly fertile and productive, as noted above, the district paid tribute of 50,600 dinârs in the mid of the Talâm I, and it furthermore furnished almost the whole 20,000 cavalry which could be mobilised in 'Abd al-Râhman II’s time.

The sources are sparse about the succeeding period up to the constituting of the taifas. It was at Shaduna that the Banû Dajurân, Berbers who had come over to reinforce al-Mašûr’s army in the Peninsula, overran a land in the grip of civil warfare. Set apart in the Kara of Shaduna, they formed a taïfa around the stronghold of Arcos, and their authority was recognised by Jerez and Cadiz. Shaduna had three rulers before being absorbed by the Abhâdis of Seville, al-Mu‘tajdî: Muhammad b. Dajurân (402-20/1011-29), 'Abdân b. Muhammad (420-45/1029-53) and Muhammad b. Muhammad al-Kâ‘îm (445-51/1053-9). It belonged to the taïfa of Seville until the Almoravids took over al-Andalus in 483/1090. In the middle of the 6th/13th century, 'Alî b. 'Isâ b. Maymûn led a rising in Cadiz, as part of the generalised Almoravid movement which split the country into fragments, which are called “the taïfas”. From 540/1145 onwards he proclaimed the Almohads, and the territory of the ancient kûra remained under the new dynasty’s aegis, although soon menaced by the Castilian armies of the Reconquista. Thus ca. 572/1176 Ferdinand II attacked Arcos and Jerez. It was there that the tentative movements for expansion of Ibn Hüd were halted, defeated by Castile at Jerez in 627/1220. The Muslims remained in the region, but once Seville fell in 646/1248, they found themselves defenceless. Then Castile seized Cadiz in 660/1262. Two years later came the Mudéjar rebellion against Alfonso X, supported from Granada, as a result of which the Castilians decreed the expulsion of the Mudéjars from this region, thus subduing the populations of Jerez, Medina Sidonia, Vejer, Sanlúcar, Arcos, etc. Shaduna became henceforward a royal lord and military frontier with the Nasrid kingdom of Granada [see NASRID].

G. F. Roa-Castro
The angels are meant by the honoured servants. XL, 7 (cf. XLII, 5) is more definite: "Those who bear the blame of their and believe in Him and implore forgiveness for those who believe (saying), Our Lord; who embraces all things in mercy and knowledge; bestow forgiveness on them that repent and follow Thy path and keep them from the pains of Hell".

Such utterances paved the way for an unrestricted adoption by Islam of the principle of shafa'a. In the classical Ḥadīth which reflects the development of ideas to about 120 A.H., we already have ample material. Shafa'a is usually mentioned here in eschatological descriptions. But it should be noted that the Prophet, even in his lifetime, is said to have made intercession. ʿAyshah relates that he often slipped quietly from her side at night to go to the cemetery of Bāqī al-Ğharqad (q. e.) to beseech forgiveness of God for the dead (Muslim, Dīnāʾīz, 102; cf. al-Tirmīzhī, Dīnāʾīz, 59). Similarly, his istiqlāḥ is mentioned in the sūrat al-anbiyāʾ (e.g. Ibn Hanbal, iv, 170) and its efficacy explained (ibid., 388). The prayer for the forgiveness of sins then became or remained an integral part of this sūrat (e.g. Abū Ishāk al-Shīrāzī, Kībāt al-Tanbīh, ed. T.J.W. Juynboll, 48) to which a high degree of importance was attributed. Cf. Muslim, Dīnāʾīz, 58: "If a community of Muslims, a hundred strong, perform the sūrat al-ʿāfī over a Muslim and all pray for his sins to be forgiven him, this prayer will surely and surely attain the purpose of its prayers".

Muhammad’s intercession at the day of judgment is described in a tradition which frequently occurs (e.g. al-Bukhārī, Tawḥīd, 19; Muslim, Ḥaʾīm, 322, 326-9; al-Tirmīzhī, Tafsīr, sūra XVII, 19; Ibn Hanbal, i, 4), the main features of which are as follows. On the day of judgment, God will assemble the believers; in their need they turn to Adam for his intercession. He reminds them, however, that through him sin entered the world and refers them to Nūḥ. But he also mentions his sins and refers them to Ibrāhīm. In this way, they appeal in vain to the great apostles of God until ʿĪsā finally advises them to appeal to Muhammad for assistance. The latter will gird himself and with God’s permission throw himself before Him and say, intercession is granted thee. God will thereupon name him a definite number to be released and when he has led these into Paradise, he will again throw himself before his Lord and the same stages will again be repeated several times until finally Muhammad says, “O Lord, now there are only left in hell those who, according to the Kurʾān, are to remain there eternally”.

This tradition is in its different forms the locus classicus for the limitation of the power of intercession. In accordance with the Christian conception men- tioned above, only that shafa’a is valid for all those who do not associate anything with God (cf. al-Bukhārī, Tawḥīd, 19; al-Tirmīzhī, Ṣafāt al-kīyāma, 13), even if they have nevertheless been guilty of grave sins (of which they have not repented). A famous Ḥadīth makes the Prophet say, “My intercession will be for the grave sinners of my community (li-ādī al-kābaʾir min ʾummatī)” (Abū Dāwūd, Sunna, 21; al-Tirmīzhī, loc. cit., 11; Ibn Mājah, Zadāl, 37). Such is the position of the Sunni theologians (cf. al-Āsharī, Makālīt, Wiesbaden 1963, 474), including the Hanbalīs (cf. Laoust, La profession de foi d’Ibn Battāt, Damascus 1958, 100 ff.). For them, the Prophet’s intercession will concern all those believers who, because of their sins, would have incurred divine punishment, with God either admitting them to His Paradise immediately or else bringing them forth from Hell at the end of a period of time more or less protracted (see al-ʾRāzī, Tafsīr on Kurʾān, II, 48, beginning of the second masʿāla, ed. Tehran n.d., iii, 56). The Muʿtazila, on the other hand, as well as the Khārijījītes, reject this interpretation (see al-Baḥḍadī, Usul al-dīn, Istanbul 1928, 244; Ibn Hazm, Fisāl, Cairo 1317-21, iv, 63). For the Muʿtazila, prophetic intercession can only operate in favour of sinners who have already repented (see Mākīndī – Ps. ʿAbd al-Dāḏaršī, Sharḥ ʿal-ʾṣuūr al-ḥāʾima, Cairo 1967, 389-404). For the Muḥtarrī, however, the Muʿtazila’s position is discussed in the context of the Kurʾānic verses cited above, notably XL, 18, and XXI, 28 (cf. Mākīndī, 689; al-ʾRāzī, op. cit., iii, 56).

2. In popular piety.

Although the Throne Verse (surah II, 155) asks, "Who could intercede with Him except by His permission?" many Muslims believed that the Prophet was granted this permission, as XVII, 79 speaks of his "special rank". Another Kur'ānic verse that seems to allow intercession was XL, 7, where "those who carry the divine throne" are mentioned as constantly asking divine forgiveness. Thus the belief developed that even pious acts could serve as intercessors: the Kur'ān will intercede for those who have studied and recited it devoutly, and this hope is often expressed in prayers written at the end of manuscripts of it. Other religious works could be imagined as interceding, such as the profession of faith; even mosques were thought to be transformed into white camels or boats to carry to Paradise those who had regularly performed their prayers in them, just as Friday might appear as a beautiful youth to intercede for people who had honoured it by attending the Friday worship. It was also believed that martyrs could intercede on behalf of family and friends, and that children who had died in infancy would intercede for their parents to have them brought to Paradise, because otherwise they would feel lonely.

But the most important intercessor is Muhammad, and the numerous people in the Muslim world who are called "Muhammad Shafī" bear witness to this belief, which is based on the legend that at Doomsday, all prophets (including the sinless Jesus) will call out nafsī nafsī "I myself [want to be saved]" while Muhammad calls out ummatī ummatī "my community, my community [should be saved]". Innumerable folk-songs and also high-flown poetical descriptions tell how he will lead his community to Paradise carrying the green "banner of praise" (liwā' al-hamd), for his shafī'ī is meant, it is believed, for the grave sinners. Many prayers contain the request that God may grant His prophet the position of honour in which he can intercede for his community; typical is the prayer in al-Djazuli's Darātīr al-khayrāt, "O God, appoint our lord Muhammad as the most trusted of speakers and the most prevailing of requesters and the first of intercessors among the most favoured of those whose intercession is acceptable ... etc." There is barely a poet—"heretic, drug addict (bāngī) or wine-bibber" (as a Sindi bard sings in the 19th century)—who has not relied upon the Prophet's intercession, and to recite blessings over him was believed to attract his loving care for his community.

7th/13th to the 13th/19th century, some of which go back to Ibn Yunus, 19° is used for morning and 17° for evening twilight. Naṣīr al-Dīn al-Taṣfī (q.v.) assumed 18° for both phenomena, Ibn al-Marrakushf [q.v.] favoured 20° and 16°, but al-Khalīlī (ca. 760/1360), who otherwise relied heavily on him, used 19° and 17° in the corpus of tables that was used in Damascus from the 8th/14th to the 13th/19th century. The duration of twilight (ṣūrat al-shafāk) is a function of the solar longitude and terrestrial latitude and hence varies throughout the year as well as from one latitude to another. Its determination is a trivial extension of the general problem of determining time from solar altitude, a problem that was extremely popular amongst Muslim astronomers. The earliest table displaying this interval is due to Hābash and is based on an approximate Indian formula for time-keeping (as well as on the parameter 18°); the time is given in seasonal hours and the table serves all latitudes (up to ca. 45°). Later tables, based mainly on exact sūrat tabārān, were published as tables used for time-keeping in various localities [see Mīkhālī]. These corporuses sometimes contain in addition a table of the duration of total darkness (ṣūrat al-aylā and mā bahān al-shafāk wa ʿl-fadjr), simply determined by subtracting morning and evening twilight from the time between sunset and sunrise. The 10th/16th-century Cairene astronomer Muhammad b. Abī ʿl-Farābī (died 692/1293) [q.v.], and his official career ended when he was blinded by an arrow at the battle of Hims (680/1281) [q.v.], although he claimed to have

The sun's rays cast a shadow of the earth (aν, dian being cleverly substituted for the horizon). The depression at daybreak/nightfall below the horizon, with an astrolabe [see Astrolabe], whose markings represented the equinoxes and solstices for a series of latitudes.

(E. Wiedemann—[D.A. King])

SHAFĪʿ 8. ALI-ʿASKARĀNĪ, Naṣīr al-Dīn, historian of Mamlūk Egypt (born Dhu ʿl-Hijja 1405/February-March 1325, died 24 Shawwāl 730/12 June 1330). The son of a sister of the chancery clerk Ibn ʿAbd al-Zāhir [q.v.], he served as clerk first Baraka Khān b. Baybars, then Kalāwīn [q.v.]. His official career ended when he was blinded by an arrow at the battle of Hims (680/1281) [q.v.], although he claimed to have
played a significant part in the abrogation of the truce with the Latin kingdom (689/1290). He spent his long retirement as a litterateur, covered by the patronage of the last sultan and of his previous biographer, Ibn 'Abd al-Zahir (Kitab Husn al-mamdukh al-strisya al-muntaza'a min al-sira al-Zahiriyya, ed. 'Abd al-'Aziz al-Khuwaytir, al-Riyadh 1396/1976); and also biographies of Kalâwûn and his two sons, al-Ashraf Khalîl and al-Nâṣir Muhammad. The first is probably al-Fadil al-marâghî min sirat al-Malik al-Mansur (Bodleian, ms. Marsh 424), which appears to be a compilation of pieces finally put together ca. 693/1293.

SHAIFI' YAZDÏ, Dânîghmand Kânî, a high noble in the Mughal Empire. A Persian by birth, he studied both rational and traditional sciences in the country of his birth. He came to India as a merchant and traded at Ahmadnagar. He entered imperial service in 1060/1650 to 1065/1654-5 he was given the rank of 1,000/100. In 1065/1654-5 he was given the title of Dânîghmand Kânî which suggested the Emperor's high opinion of his intellectual talents (dânîghmand, lit. "scholar, sage") and in 1068/1665-6 to 5,000/2,500. He was appointed Mir Bakhshi but he resigned the same year. In 1070/1659-60 Awrangzîb, the new Emperor's high opinion of his intellectual talents (dânîghmand, lit. "scholar, sage") and in 1068/1665-6 to 5,000/2,500. He was appointed Mir Bakhshi but he resigned the same year. In 1070/1659-60 Awrangzîb, the new Emperor, raised his rank to 4,000/2,000, and in 1076/1665-6 to 5,000/2,000. He was appointed Governor of Dihli, but soon afterwards, in 1078/1667-8, a central administration minister (Mir Bakhshi). He died in 1081/1670.

Dânîghmand Kânî is also known to us from the letters of François Bernier who had taken his service in the 1660s. Dânîghmand Kânî showed great interest in European sciences, and had Bernier exposed to him the discoveries of Harvey and Pacquet and the philosophy of Gassendi and Descartes. The Italian traveller Manucci shares Bernier's high opinion of Dânîghmand Kânî's wisdom and learning.

Al-Shafi'î's genealogy was one of the most prestigious in that region, and are said to have been praised by al-Djahiz and others. Since, while being a Kurashi, he was a Muttalibi on his father's side, thus a distant relative of the Prophet—"The Imams are of Kuraysh", "Learn from the Kurashihs and do not seek to teach them anything", etc.—with the evident intention of stressing the fundamental superiority of al-Shafi'î, and thereby of the school which claims him, over the other Imams. Similarly, it is often considered that al-Shafi'î was the renewer (wustaddid) of religion (who, according to another hadith, is sent by God "at the beginning of each century") of the 2nd century A.H.

At the age of two (or ten according to the source which places his birth in the Yemans), orphaned of his father, al-Shafi'î was taken by his mother, who seems to have been totally without means, to Mecca where they had relatives. Living in humble style in the 2nd century A.H., al-Shafi'î seems to have become avidly interested in activities appropriate to his status as a member of the tribal aristocracy: poetry and, in particular, archery. His eloquence and his knowledge of the Arabic language—acquired, it is said (Ibn Farhûn, al-Dirbâd al-mudâthhâb, Cairo n.d., ii, 157), in the course of prolonged wanderings with Hudhayl (q.v.), a tribe of northern Arabia renowned for the beauty of its speech—have remained highly respected.

Another hypothesis, disputed by Fakhr al-Din al-’Aâmî, likewise in southern Palestine (also mentioned, less frequently, is Mina near Mecca).

His genealogy was one of the most prestigious since, while being a Quraqî, he was a Mu’talibî on his father’s side, thus a distant relative of the Prophet—"The Imams are of Kuraysh", "Learn from the Kurashihs and do not seek to teach them anything", etc.—with the evident intention of stressing the fundamental superiority of al-Shafi’î, and thereby of the school which claims him, over the other Imams. Similarly, it is often considered that al-Shafi’î was the renewer (wustaddid) of religion (who, according to another hadith, is sent by God "at the beginning of each century") of the 2nd century A.H.

At the age of two (or ten according to the source which places his birth in the Yemans), orphaned of his father, al-Shafi’î was taken by his mother, who seems to have been totally without means, to Mecca where they had relatives. Living in humble style in the 2nd century A.H., al-Shafi’î seems to have become avidly interested in activities appropriate to his status as a member of the tribal aristocracy: poetry and, in particular, archery. His eloquence and his knowledge of the Arabic language—acquired, it is said (Ibn Farhûn, al-Dirbâd al-mudâthhâb, Cairo n.d., ii, 157), in the course of prolonged wanderings with Hudhayl (q.v.), a tribe of northern Arabia renowned for the beauty of its speech—have remained highly respected.

Another hypothesis, disputed by Fakhr al-Din al-’Aâmî, likewise in southern Palestine (also mentioned, less frequently, is Mina near Mecca).
Shafi'i had demonstrated his talents as an archer, one of the spectators, 'Amr b. Sawwad, told him that he was a better scholar than an archer (anta fi 'l-ilm akbar mina fi 'l-raym); a compliment which apparently persuaded him to devote himself entirely to study (Ibn Abi Hātim, Ḍabāb, 22-3).

In Mecca, the principal masters of al-Shafi'i were Muslim b. Khālid al-Zanjī (d. 179/796), of whom little is known other than that he was the jurisconsult (muftī) of the city, and Sufyān b. 'Uyyāna (d. 198/813) who was also, later, the master, of Ibn Hambal. At fifteen (or eighteen) years old, al-Shafi'i is said to have received his master's permission to issue judicial decisions (fatwās) in his own right. At the same time, the reputation of a master of Medina, the Imām Mālik b. Anas (95-179/715-95 [q.v.]) was in the ascendant and it was to him that al-Shafi'i resolved to turn in order to complete his legal education.

According to Ibn Abi Hātim al-Rāzī, while still in Mecca al-Shafi'i obtained a copy of the Muwatta—the principal work of Mālik—and learned it by heart before introducing himself to Mālik in ca. 170/786, persistently asking his permission to recite it to him. After initial hesitation, Mālik agreed and was very pleasantly surprised by the eloquence of the other, who was to become one of his disciples (Ibn Abi Hātim, Ḍabāb, 27-8).

Al-Shafi'i remained in Medina as a pupil of Mālik until the latter's death, a period of about ten years (Fakhr al-Dīn al-Razī, Mandākib al-Imām al-Shafi'i, Cairo, 1986, 45). Al-Shafi'i was always to consider Mālik his supreme master but, being of a resolutely independent spirit, he was later to allow himself an extremely critical K. Ikhtilāfī Mālik wa'i Shafi'i, in fact a refutation of Mālik which, in the form in which it has survived, is the work of al-Rābī al-Murādī (d. 270-884), an Egyptian disciple of al-Shafi'i, a book for which the Mālikis, of Egypt especially, were not to forgive him (ed. with the K. al-Umm, vii, 177-249; see in this connection R. Brunschwig, Polémiques médiévales autour du rite de Malik, in Études d'Islamologie, ii, 65-101). In consequence, the Mālikī school was to issue a polemical literature aimed directly at al-Shafi'i himself (the K. al-Radd 'alā 'l-Shafi'i by Abū Bakr Muhammad b. al-Labbād al-Kayrawānī, d. 333/944, published Tunis 1986), which definitely deserves to be studied to the same degree as the better-known debates between Mālik and Ḥanāfī.

At Medina, al-Shafi'i had other masters including, in particular, a disturbing fact for his Sunnī biographers, Ibrāhīm b. Abī Yahyā (d. 184/800 or 191/807) of whom the heresiographers maintain that he was a follower of the Mu'tazila [q.v.]; but according to Fakhr al-Dīn al-Rāzī (Manākib, 44), this master is said to have taught him only Law (fiqh) and Tradition (hadīth) and nothing in relation to theology (irāla al-dīn).

On account of the contradictions presented by the biographers, it becomes difficult to trace with precision the life of al-Shafi'i after this first Hijāz period of his existence. Was he already in 'Irāk between 177/793 and 179/795, and did he compose there the K. al-Hadīgā (lost), as stated by Fakhr al-Dīn al-Rāzī? In which case, how can he also write that al-Shafi'i remained as a pupil of Mālik at Medina until the latter's death, i.e. until 179/795? According to al-Bayhaqī (d. 458/1066), al-Shafi'i's first period of residence in 'Irāk dated from 195/811 to 197/813; which seems improbable since he is reckoned when there to have visited al-Shaybānī, who died in 189/805. The following events, widely attested, in the life of al-Shafi'i, may however be accepted as genuine, although they cannot be dated with precision (all dates given here, with the exception of that of the death of al-Shafi'i, are hypothetical).

It appears certain that it was shortly after having completed his education that al-Shafi'i was summoned to perform some official function at Ṣan'ā in the north of Yemen and that it was during this period that he compromised himself by joining the partisans of the Ḥasanid Yahyā b. 'Abd Allāh (regarding him and the revolt which he led, see H. Laoust, Les schisms dans l'Islam, Paris 1983, 76-7). According to Ibn al-Nadīm (d. 385/995 [q.v.]), al-Shafi'i was a fervent Shī'ī (see al-Shafi'i shadībī fi 'l-tabya'ayn: Fitrīt, Beirut 1978, 295); if this was genuinely the case, it can only be understood in a strictly political sense. This episode, which the biographers call the "teet" (mīhna) or the "crisis" (fitna) of al-Shafi'i, ended, at some point in the decade following 180, with his appearance before the caliph Hārūn al-Rashīd at Raḳka. It was through the intervention of the eminent jurist Muhammad b. al-Ḥasan al-Shaybānī [q.v.]—a much favoured courtier who himself composed the first version of al-Mālik and of Abū Ḥanīfa—that al-Shafi'i was pardoned, perhaps after a spell in prison, by the caliph (although the other nine co-defendants were executed). According to the hagiographic version of this mīhna, al-Shafi'i's salvation was entirely his own achievement, obtained by his re-affirmation of loyalty to al-Rashīd and by "the strength of his argument" (ka'wat hadīgātih). Al-Shafi'i was not subsequently to occupy any official function, refusing the caliph's offer of the post of judge (kaḍī) of Yemen.

Al-Shafi'i took up a first period of residence (of two years?) in 'Irāk (either before, or just after his mīhna), during which he furthered his acquaintance with the school of fiqh which had developed there, at the initiative of Abū Ḥanīfa in particular, and which continued to flourish there largely through the efforts of his two disciples Abū Yūnus [q.v.] and al-Shaybānī (the text of the disputations (mandāzhātāt) between the latter and al-Shafi'i is preserved in the Mandākib of Fakhr al-Dīn). Al-Shafi'i was a regular frequenter of the latter's circle and was later to devote a refutation to him, the K. al-Radd 'alā Muhammad b. al-Ḥasan (K. al-Umm, vii, 277-303).

After this first period in 'Irāk, al-Shafi'i returned to Mecca where, moving gradually from the status of disciple to that of master, he stayed for some nine years. Ca. 195/811, he is again found in Baghdād for a period of approximately two years during which he composed the first version of the Risālā (lost) and various texts containing what the Shafi'is call "the ancient (doctrine)" (al-kadīm) of al-Shafi'i. In 198/813, probably after another visit to the Hijāz, he is once again in Baghdād, but for only a few months. It was during this period, probably in Mecca, that al-Shafi'i met Ibn Hambal (d. 241/855 [q.v.]), but despite the abundance in the biographies of anecdotes linking the two, it does not seem that they were well acquainted.

Little is known of the reasons which induced al-Shafi'i to emigrate and to settle definitively at Ḥiṣbāt in Egypt (according to certain sources he had already spent time there in 188/804). He was probably invited there by the governor al-ʿAbbās b. 'Abd Allāh (according to Yākūt) but it seems probable that it was in fact the isolation imposed on him, in the Hijāz, by the predominance of the disciples of Mālik and in Baghdād, by that of the disciples of al-Shaybānī, which persuaded him to attempt the foundation of a school elsewhere.

At Ḥiṣbāt, he was initially well received, regarded probably as a disciple of Mālik, by the major Mālikī
family of the Banū ʿAbd al-Hakam. Before writing a refutation of al-Shafīʿī and returning to the ranks of the Mālikīs, Muhammad b. ʿAbd Allāh b. ʿAbd al-Hakam (d. 268/881) was one of his most fervent disciples. However, al-Shafīʿī very soon became a target for the criticism of the Egyptian Mālikīs, who sought without success to have him banished by the authorities. The life of al-Shafīʿī was clearly that of an undesirable.

It was however in Egypt—he lectured in the mosque of ʿAmr—that al-Shafīʿī’s teaching had its greatest impact; his principal disciples were Egyptians and subsequently Shafīʿīsm competed successfully with Mālikism for supremacy in Egypt [see miftahīyya]. It was here that al-Shafīʿī composed the new version of his Risāla (the one which has survived) and the majority of the texts collected in the K. al-Umm.

The circumstances of his death, at 54 years old, the last day of Rajab 204/20 January 820, remain uncertain: according to some, he died as a result of a violent assault at the hands of a fanatical Mālikī while others regard the cause of death as sickness. He was buried in the tomb of the Banū ʿAbd al-Hakam at the foot of the Mukattam Hills. The architectural complex, frequently altered and restored, which surrounds his mausoleum, was erected under the Ayyubids. His tomb is today the object of particular veneration (along with the nearby Zāhirīs, which give the impression that his thinking was largely influenced by the Muʿtazila) (numerous editions since 1894, of which the best is that of A.M. Shakir, Cairo 1940 with numerous re-issues; Eng. tr. M. Khadduri, repr. Cambridge 1987; partial Fr. tr. Ph. Rancillac, in MIDEO, xi [1972], 127-328) and thus inculcated the science of usul al-fiqh, the primary purpose of which was to oppose the development of so-called “rationalist” theology (G. Makdisi, in IS, lixiv [1984], 5-47).

b. ʿUyālī al-fikr. It was, allegedly, at the request of ʿAbd al-Rahmān b. Mahdī, a traditionalist of Bara'a who died in 198/813, that al-Shafīʿī composed the Risāla (numerous editions since 1894, of which the best is that of A.M. Shākir, Cairo 1940 with numerous re-issues; Eng. tr. M. Khadduri, repr. Cambridge 1987; partial Fr. tr. Ph. Rancillac, in MIDEO, xi [1972], 127-328) and thus inculcated the science of usul al-fiqh which was later to be elevated to a privileged position in the classical canon of Islamic legal thought. The Risāla (mukaddima) there corresponds a statute (hadīth) for having founded this science should be regarded as strictly polemical. The text which is currently available, in the form of two manuscripts, was very likely composed in Egypt and reflects the final stage in the legal thinking of al-Shafīʿī, who had composed a substantially different version (al-risāla al-kadima) while resident in ʿIrāk.

As a result of the works of I. Goldziher, who had no knowledge of the Risāla (Die Zahirienn. Ihr Lehrsystem und ihre Geschichte, Leipzig 1884, Eng. tr. The Zāhiris, Leiden 1971) and of J. Schacht (Origins, and An introduction to Islamic law, Oxford 1964, Fr. tr. Introduction au droit musulman, Paris 1983), the contribution of al-Shafīʿī to Islamic legal thought—which he raised to the status of a science—is customarily regarded as a synthesis between the two major directions hitherto followed in terms of the elaboration of fiqh, with which he was thoroughly familiar: on the one hand, that of his master Mālik and on the other that of Abū Ḥanīfa, as represented by al-Shaybānī. In the depth of its inspiration, the Shafīʿīan synthesis would nevertheless be more faithful to the spirit of the former and could be placed under the rubric of traditionalism.

The fundamental idea around which the entire legal thought of al-Shafīʿī is developed in the Risāla is that, to every act performed by a believer who is subject to the Law (maḳāla) there corresponds a statute (hadīth) belonging to the revealed Law (ṣaḥīḥa). This legal statute is either presented as such in the scriptural sources (the Kurʾān and the Sunna), which al-Shafīʿī calls “the foundation” (al-aṣl), or is it possible, by means of analogical reasoning (kiyāḥ) to infer it from the aṣl, the latter being the bearer of a latent “rationally deducible content”, the maṣḥaf al-aṣl.

All the efforts of al-Shafīʿī—and herein lies his originality in comparison with his predecessors—were subsequently to be applied to defining with precision, establishing critically and ranking in order of priority these different sources (aṣl and maṣḥaf al-aṣl) and to determining the modalities of their usage. It is no doubt the critical effort characterising Shafīʿīan legal thought which explains to a large extent the open hostility or the indifference with which the Risāla was initially received among ʿudhūdīs of all persuasions. Furthermore, the fact that al-Shafīʿī had chosen to write a treatise on this subject entailed a systematisation, a codification and, up to a point, a rationalisation of understanding the Law, the fiqh, which were soon to provoke tensions which would not be resolved until much later.

The principal attainments of the legal thought of al-
Shafici consist in (1) the definition of the Sunna [q. v.], and (2) the systematisation of analogical reasoning. As regards the Sunna, it is appropriate, according to Malik and his disciples, who tended to assimilate the practice (sunnah) of Medina to that of the Prophet for the reason, theoretically indefensible, that the Medinans had directly inherited the tradition of the Prophet because he had lived there.

As for analogical reasoning, identified with idqththd [q.v.], the function of which is to fill gaps left by the Kur'an and the Sunna, al-Shafi'i distinguishes between two types: "analogy by cause (kiyds al-ma'na)—the kiyds al-filal of the post-Shafi'ian theologians—is applicable to determine "analogy by resemblance" (kiyds al-tdhabah). Common to both of them is the imperative obligation to rely upon a legal proof (daili ymara), which may sometimes be difficult for the jurist to trace but of which, through postulating, the existence is certain. The argument, this time, is directed rather against Abu Hanifa and his partisans who were reputed to rely on ra'y and istislah [q. v.], i.e. on freer forms of reasoning, less closely tied to the revealed datum. In using such reasoning, al-Shafi'i was to claim that man introduces arbitrariness (tahakkum) into the comprehension of the Law and that in so doing he substitutes himself for God and the Prophet (al-Ghazali attributes to him the maxim man istahsana fa-kud ymara'a), the only legitimate legislators of the community.

It is evident that al-Shafi'i maintains his distance from Malik, as from Abu Hanifa and his successor al-Shaybani, and that in fact he has placed the two parties side-by-side in formally addressing to them the same message "Return to the proof". Considering his work from this perspective, al-Shafi'i was anything but a traditionalist, since he profoundly modified the notion, hitherto predominant among jurists, that the community was still in direct and immediate contact with the Revelation. After the passing of al-Shafi'i, on the other hand, the role of Medina to the extent of interpreting the reception of the revealed Law by referring to a legal theory which became ever more complex.

It should be noted that the Risalah remained a dead letter for more than a century and that the science of the usul al-fikr, inherited from al-Shafi'i, was not really developed until after the 4th/10th century. But it is not certain, on the other hand, that this means that the importance traditionally accorded to this work is exaggerated (a thesis recently propounded by W.B. Hallaq in UMES, xxv [1995], 587-605, in reply to N.J. Coulson, A history of Islamic law, Edinburgh 1964, 53-61, Fr. tr. Histoire du droit islamique, Paris 1995, 52-60).

In addition to the Risalah, two other texts of al-Shafi'i's legal theory have been preserved, and these have yet to receive the attention that they deserve: the K. Ibad al-istislah (published with the K. al-Umm, vii, 267-77), and the K. Dima'a al-tulm (in ibid, 250-62, see also by A.M. Shakir, Cairo 1956). c. Fikr. In the absence of any monograph devoted to the practical law elaborated by al-Shafi'i, the present writer is obliged to confine himself to indicating the texts which could serve as a basis for such a study (the later Shafi'i texts of fikr, some of which have been translated, are the work of the major mudhahhid and do not necessarily reflect the fikr of al-Shafi'i).

Great confusion prevails among the biographers in regard to the works of fikr of al-Shafi'i (see, in this connection, the attempt at clarification of the Shafi'i bibliography by Muhammad Abû Zahra, al-Shafi'i, Cairo n.d., 134-49). Just as in the field of legal theory, two distinct periods in the activity of al-Shafi'i are to be identified here. The first took place in the Hijâz and in 'Irak and led to the production of a book intitulé K. al-Hudaij, probably a compilation, of which the transmitter reputed to be the most reliable was Abû 'Ali al-Hassan al-Za'farâni (d. 260/874), a Baghdad disciple of al-Shafi'i. This work has not survived.

The "new (doctrine)" (al-jadid) was elaborated in Egypt during the last years of al-Shafi'i's life and is to be found recorded in the monumental K. al-Umm, the edition of which cited above also contains, in vol. vii, numerous other texts of al-Shafi'i, some, according to J. Schacht (cf. Origins, 330), dating from the 'Irak period. In the current state of knowledge it is impossible to determine the nature of the text mentioned by al-Bayhakî in particular as belonging among the works of al-Shafi'i, is, as seems probable, the same book as the K. al-Umm.

Also available is an Akhâm al-Kur'an (ed. al-Kawthari, 2 vols., n.d.), a treatise dealing with the legal statutes present in the Kur'an which is not the one now lost, composed by al-Shafi'i himself. It is in fact a work of compilation undertaken by the great Shafi'i al-Bayhakî (d. 450/1066) on the basis of different texts of al-Shafi'i. d. Hadith. A promoter of the introduction of the critique of traditions into the legal sciences (J. Schacht, Introduction, 36), inasmuch as, for him, prophetic traditions are the only means of access to knowledge of the Sunna, al-Shafi'i, as a traditionist (muhaddith), is the author of a Mumad and of a K. Isla'dâl al-bâdîh (ed. with the K. al-Umm, respectively, vi, in the margins, 2-277, and vii, in the margins, 2-414).

In this domain, al-Shafi'i was the object of numerous criticisms both on the part of the Malikis and, subsequently, of the disciples of Ibn Hanbal. He was reproached in particular for having been an unreliable transmitter (nâ'ûr) (neither al-Âkhârî, nor Muslim accepted traditions transmitted by him), for having argued certain points of doctrine on the basis of the opinion of a.doubtful authority, and for having made his trust in unacceptable transmitters such as Ibrâhîm b. Abî Yahyâ. The Bayân khâta' ma akha'a a'sâli' al-Shâfi'i's "Revelation of the error of those who tax al-Shafi'i with error" (Beirut 1986) of al-Bayhakî seeks to exonerate al-Shafi'i from these accusations.

A list, incomplete, of the mawâni on whose authority al-Shafi'i transmitted hadîth and of those who relied upon his authority for transmission in their turn, is supplied by Ibn Farhân (al-Dîbâqî, ii, 157). e. Others. The biographers make frequent mention of al-Shafi'i's extensive knowledge in the fields of medicine (tibb), of physiology (fîinâs), also stating that, before turning away from it, he was interested in astrology (al-nûdûm). Bibliography (in addition to the works and articles cited in the text): 1. Biography. Arabic sources: 1. All Tabakât works: al-Âkhârî (Tabakât al-fukahâh, al-Âkhârî's own, Leiden 1964, 67-7), al-Shâfi'i (Tabakât al-fukahâh, Beitr. n.d., 60-2), etc., include a brief notice concerning al-Shafi'i; 2. Among the hagiographies, the ones most often cited, with those of Ibn Abî Hâtim and of Fâhir al-Dîn al-Râzi, are those of al-Bayhakî (Manâkib al-Shâfi'i, Cairo 1970)

3. The issue of the institution of the Shâfi'i madhhab remains poorly understood, and it poses a series of problems, fundamental as well as chronological, which are not confined to this school alone, applying in an identical manner to the emergence of other legal schools within the Islamic legal system. In reference to the Shâfi'i school, the fundamental problem is essentially the following: the Imam al-Shâfi'i is the author of a radical criticism of judicial conformism (taklîd [q. v.]), developed in his celebrated Risâla (ed. Shâkir, Cairo 1940; numerous re-editions in Cairo and in Beirut), which sought, on the one hand, to discredit the living local traditions as a source of religious law, and on the other, to insist that the doctrines of the Imams could no longer be invoked in legal issues without additional proof of the authority attributed to these great masters. Furthermore, the biographers credit al-Shâfi'i with a series of solemn declarations strictly forbidding others to claim him as a teacher or to make his doctrine, after his death, the object of a new conformism. If reference is to be made to Shâfi'i thought, the very existence of a school thus appears contradictory from the outset. There can be no doubt that this fundamental anomaly at the very heart of the institution of judicial schools was very soon perceived by Muslim jurists, who sought to resolve it in various manners (ranging from the refusal, rare and soon inadmissible, to belong to any school whatsoever, to the most blind acceptance of the undisputed superiority of the Imams, with various intermediate solutions seeking to legitimise the existence of the schools while avoiding the danger of taklîd). Unfortunately, this issue has yet to be examined in depth.

As a general rule, the question of adherence to one madhhab or to another should be further subdivided according to the nature of the adherent: whether the case of a scholar-jurist ('ilmî, or of one who is secular in religious matters ('âmmî). Every secular person is obliged to refer himself to a recognised scholar (recognition depending on a number of criteria, some of them controversial) of his choice when a question relating to the 'ilmâ'î [q. v.] is put to him and it behoves him to act in conformity with the opinion which he has solicited. For him, the only means of access to the knowledge of legal statutes is taklîd. Theoretically, the adherence of a secular Muslim to a specific judicial school is thus consequent upon the choice to act in conformity with one scholar rather than with another: he will be called a "Shâfi'i" if he appeals to the authority of a jurist claiming the legacy of Shâfi'i and the only personal effort which is (sometimes) required of him is to decide upon the relative worth of the Imams and subsequently to choose, in a logical and sincere manner, the school to which he will belong (hence the existence, in each school, of a literature, yet to be studied, directed towards a public which is educated, but insufficiently, or not at all, versed in legal matters, which seeks to prove the superiority of such an Imam over such another; thus there is, among the Shâfi'i's, the unedited Mu'âlâh al-Shâfi'i fi bâsîn al-shâfi'î al-Duwwânî). However, the adherence of a secular person to a madhhab is not necessarily definitive or strict; he may, on the one hand, change his school, and on the other, according to certain authors, he has the right, in a particular matter, to refer in an exceptional fashion to a scholar belonging to a school other than that whose doctrine he normally follows.

The question is of course whether the emergence of the madhhab(s), and in particular of the Shâfi'i one, is likewise imperfectly resolved. According to J. Schacht (Introduction to Islamic law, Oxford 1964, 58), the inception of a school laying claim to al-Shâfi'i and seeking to propagate his doctrine ("doctrine" is, alongside "way", one of the senses of the word madhhab), is to be credited to the very first generation of disciples of al-Shâfi'i and, more specifically, to al-Muzanî (see below), who, in compiling a "summary" (mukhtasar) of the doctrines of al-Shâfi'i (text edited in the margins of the K. al-Umm of al-Shâfi'i, Cairo n.d., i-vi) would allegedly have laid the foundations of the institutionalisation of this doctrine. This hypothesis is confirmed by the history of judicial science (fikh [q. v.]) in the Islamic community presented by a Shâfi'i author of the very first rank, Abû 'Îsâh al-Shârîzâ (d. 479/1083 [q. v.]). In his "list of jurists", the latter classifies the first Muslim jurists according to geographical criteria (jurists of Mecca, Medina, of Yemen, of Syria, Egypt, etc.). On the other hand, the geographic criterion is not retained for the immediate disciples of the Imams al-Shâfi'i, Abû Hanîfa (d. 150/767 [q. v.]). Ibn Hanbal (d. 241/854 [q. v.]), Mâlik (d. 179/795 [q. v.]) and Dâwûd b. 'Ali b. Khafif
level, this influence remained limited; it was to some extent a process of identification—more or less efficacious according to the times—with the activity of the jurists of a certain school, without, however, conferring secondary status on others (in relation to the interaction between political régime and judicial scholarship, see K.S. Salibi, The Banû Jamâša. A dynas-
ty of ShaficT jurists in the Mamlûk period, in SJ, IX (1958),
97-109 or idem, art. banû Jamâša in this Enc-
cyclopaedia).

The first ShaficT.

Although the career of al-Shâfi'î also included phases in the Hidjâz and in Baghdad, it was principally
towards the end of his life, at Fustâţ in Egypt, that
his teaching was most favourably accepted, and
that he had the greatest number of disciples, who played a
significant role in the diffusion of his doctrine.

It is furthermore appropriate to recall that there are
two distinct bodies of doctrine in the work of al-
Shâfi'î: the first, known as "the ancient" (al-kadîm)
having been developed before his arrival in Egypt (in 199/814, according to al-Maqrîzî, KBd, Cairo n.d.,ii, 334) and the second, known as "the new" (al-
dâdÎţî), during his residence at Fustâţ. Now the Shafi's madhhab has definitively retained only the
"new" ShaficT doctrine (with considerable modifications
over the course of the centuries), in such a way
that its diffusion could only be accomplished by these
Egyptian disciples.

The first 'Irâkî Shafi's transmitters of the ancient doctrine.

Two direct disciples of al-Shâfi'î are renowned for
having transmitted his early doctrine: Abu 'Ali al-
Hasan al-Za'farâni (d. 260/874; on him, see al-Subki,
Tabakât al-shafi'iyya al-kubra ( = T Sk K.), Cairo n.d.,ii, 114-17) and Abû 'Ali al-Husayn al-Karâbîsî (d. 249/863 or 248/862), see ibid., ii, 117-26, the
former being reckoned the more reliable. A late biographer,Dâmûl al-Dîn al-Assawî (d. 772/1370), claimed that
he still had in his possession a copy of the book transmitted by al-Karâbîsî after al-Shâfi'î (al-Assawî,
Tabakât al-shafi'iyya, Beirut 1987, i, 26). According
to various authors, including Ibn Khâşîr (d. 774/1373)
(Tabakât al-fukhâra al-shafi'iyyîn, Cairo 1994, i, 39), Ibn Hanbal [q.v.] was also an assiduous disciple of al-
Shâfi'î during the latter's second period in Baghdad
in the years following 95/811. The "new" doctrine of al-Shâfi'î was only introduced into 'Irâk by Abu 'l-
Kâsim 'Uthmân al-Annârî (d. 208/821) who was the
pupil of one of the Egyptian Shafi's disciples, al-Muzanî
and al-Râbî (see below).

The first Egyptian Shafi's transmitters of the new doctrine.

Three names stand out among the direct disciples of al-Shâfi'î in Egypt: Abû Ya'qûb Yusûf al-Bawwâyi (d.
231/846), Abu Ibrahim Ismâîl al-Muzanî (d. 264/877) and Abu Muhammad al-Râbî al-Murâdî (d.
270/883). Of the first, al-Shâfi'î said that he was
"[his] tongue" (îsâm), of the second that he was "the
one who made [his] doctrine triumph (nûsîr madhhab) and of the third that he was "the transmitter of [his] books" (rûwat kutub).

Al-Bawwâyi, a native of Buwâtî in Upper Egypt,
was, evidently, al-Shâfi'î's favourite disciple; it is he
whom the latter is said expressly to have appointed his
successor. Having contributed significantly to the dif-
fusion of his master's madhhab, al-Bawwâyi suffered
persecution at the time of the so-called "milhâ [q.v.]
of the Kurîan". He was arrested and imprisoned in
Baghdad, where he died in detention. He is the
author of a "summary of the books of al-Shâfi'î"
(Mukhtasar min kutub al-Shâfi'i), praised by the ShaficT
biographers (see al-'Abdîbî, Tabakât al-fukhâra al-
shafi'iyya, Leiden 1964, 8; the work is preserved in
manuscript form, see F. Sezgin, GAS, i, 491). Historically, the importance of al-Buwayti and of his work seems, however, to be of rather secondary importance (unless Abu 'l-Walid Al-Makki (d. 386/996) is correct in his assertion, repeated by 676/1276, as one of the masters of reference of the school, and by others, e.g. al-Rafi'i (d. 628/1230), as diverging too often from the teachings of al-Shafi'i, to such an extent that the "singularities" (tafarrud) of his fikr could no longer be counted, according to him, among the doctrines of the school. His "strange points of view and [his] numerous positions which are contrary to the madhab" (al-Shaf'iyin, usul al-fikh), have significant influence on the Malikism of North Africa are to be observed in establishing itself and, from the 4th/10th century on-

Khitat, ii, 331-44). In Egypt, see al-Makrizi, (Tabakat al-Shaf'iyin, Beirut 1981). The major Shafi'i was the kadi Abu 'l-'Abbas Ibn Surayj (d. 306/918 [q.v.]), whose activity was probably even more important for the diffusion of the madhab. He had a considerable number of disciples who are still renowned: Abu Is hak al-Marwazi (d. 340/951), Ibn Abu Hurayra (d. 345/956), al-Kaffal al-Shafi'i (d. 336/947), etc. It is also in the line of Ibn Surayj that it is appropriate to locate the works of other important authors, such as Abu Hāmid al-Isfahānī (d. 406/1015), Abu l-'Tayyib al-Farabi (d. 450/1058 [q.v.]), Abu Is hak al-Shirazi (d. 476/1083 [q.v.]), etc. The extraordinary development of Shafi'i literature in Baghdad, for as long as this city retained its full importance, should no doubt be attributed to the fact that in the city numerous madhhabs remained well represented, thus creating a climate of competition which was a catalyst for, in the best case, the fine intellectual creativity to which Shafiism and Shafi'i madhhab from which serious violence sometimes resulted.

In Kūra and, more particularly at Nisābiz and at Marw, the Shafi'is were so numerous that they constituted, according to al-Subki, "half of the madhab" (T. Sh. K., i, 326). It is with the Kūrasanī branch of Shafiism, as a general rule more speculative than that of its 'Iraki branch, that are associated the names of Abu Is hak al-Isfahānī (d. 418/1027), of Abu l-'Ma'ālī al-Djuwaynī (d. 478/1085) or indeed of the illustrious Abū Hāmid al-Ghazālī (d. 505/1111 [q.v.]). As a result of serious political-religious disorders, the 6th/12th century saw the demise of the Shafi'i presence in Kūra in favour of the Hanafi madhab, and an exodus of Shafi'i scholars towards the west, especially towards Syria, is observable at this time (see J. Sublet, in Arabia, xii/2 [1964], 188-95; for more details regarding the diffusion of the Shafi'i madhab in the rest of the Muslim world, see H. Halm, Die Ausbreitung der šafi'īschen Rechtsschule..., Wiesbaden 1974; A. Taymou, Nasrī tarih-i ilahiyye: al-madhib-i al-shafi'iyye al-arba'a, Beirut 1990, 70-80; M. Abu Zahra, Tarīkh al-madhab al-shafi'iyya, Cairo n.d., 472-8 and T. Sh. K., i, 324-9; for the geographical distribution of Shafi'i fikhris in the contemporary period, see M. Massignon, Annuaire du monde musulman, Paris 1955). An author of the 8th/14th century, al-Subki (T. Sh. K., i, 199-202), gives the following list, which cannot be considered canonical on account of the

and Andalusia, through the intermediary of Mālik scholars who travelled to the East, and were sometimes taught there by Shafi'i masters; such was the case of Abu l-'Walid al-Bādī (d. 477/1082), whose usul al-fikh, Tabakat fukrah, is transmitted from those of Abu Is hak al-Shirazi, his Shafi'i teacher in Baghdad. In the Hidjaz, Mecca and Medina included, the Shafi'is were broadly in the majority, while the Yemen was shared between Shafiism and the Zaydiyya; tensions between representatives of the two tendencies have persisted into the present day (for a history of Shafiism in the Yemen, see al-Daj'di (d. 586/1190), T. T. Sh. K., 57-82). The role of the Shafi'is, whether in the field of political-religious power or in the legal domain, has certainly been considerable, in particular in Egypt, where the Fatimid period, from 358-567/969-1171. How-
c

the Fatimid period, from 358-567/969-1171). How-
c

and an exodus of Shafi'i scholars towards the west, especially towards Syria, is observable at this time (see J. Sublet, in Arabia, xii/2 [1964], 188-95; for more details regarding the diffusion of the Shafi'i madhab in the rest of the Muslim world, see H. Halm, Die Ausbreitung der šafi'īschen Rechtsschule..., Wiesbaden 1974; A. Taymou, Nasrī tarih-i ilahiyye: al-madhib-i al-shafi'iyye al-arba'a, Beirut 1990, 70-80; M. Abu Zahra, Tarīkh al-madhab al-shafi'iyya, Cairo n.d., 472-8 and T. Sh. K., i, 324-9; for the geographical distribution of Shafi'i fikhris in the contemporary period, see M. Massignon, Annuaire du monde musulman, Paris 1955). An author of the 8th/14th century, al-Subki (T. Sh. K., i, 199-202), gives the following list, which cannot be considered canonical on account of the
Theological views of its author, the Shafi'i who, according to him, are the most important in the history of the madhhab, each of them being the "renewer (mudżaddid) of religion, whose coming each century is prophesied by a statement of the imam : the Shafi'i, Ibn Suryāy, Abū Hāmid al-Isfārāyīnī, Abū Hāmid al-Ghazālī, Fakhr al-Dīn al-Rāzī (d. 606/1209) and Taḵī al-Dīn Ibn Dākiḵ al-Ṭīd (d. 702/1302). (Regarding the major al-Shafi'īs, see also M.H. Hitū, al-Idāhīh wa-tabākāt muḏjaddīdī al-Shafi'iyya, Beirut 1988 and F. Wüstenfeld, Der Imām al-Shafā'i, seine Schüler und Anhänger bis zum j. 300 d. H., Göttingen 1890.)

The principal works of reference of the Shafi’ī school are: al-Usul al-fikhn [q.v.]. Although Shafi'īs often took pride in the fact that their Imam, the al-Shafi’ī, was the founder of the science of the usul-al-fikhn, this science was, in fact, hardly practised at all during the first two centuries of the existence of the madhhab; even if it was not totally neglected (on this point, see W. B. Hallak in JMES, xxv [1993], 587-605). On the other hand, during the 4th/10th century and, subsequently, throughout the classical period, the science of usul al-fikhn experienced an extraordinary development. It is only in the last few years that a close interest has been taken in this literature and that it has been published. In regard to the Shafi’ī usul al-fikhn, the paucity of works dealing with them demands a very schematic approach. As a general rule, all the Shafi’ī usul claim their adherence to the Risāla of the al-Shafi’ī, but this claim is very formal; it impinges upon various currents of legal thought.

The first is characterised by its very strictly legal nature and its representatives were in fact "pure" jurists; most often, they were renowned also for the quality of the treatises on fikhn, as correctly defined, which they composed. This current is principally represented by Abu Iṣhāq al-Shīrāzī (d. 476/1083) whose books al-Lumāḍ fi usul al-fikhn (numerous editions since Cairo 1326/1907) and Sharḥ al-Lumāḍ (ed. A.-M. Turki, Beirut 1983) served for a long time as models and were the subjects of frequent commentaries (see. M.H. Hitū, al-Imām al-Shīrāzī, Damascus 1989, 209).

This current, today once again highly valued, was supplanted by the works of usulīs who were definitively Shafi’īs, but who were often not jurists but theologians of generally Ash'arī allegiance. The central works of reference of this ideological-legal thought are: al-Burhdn fi usul al-fikhn by Ibn Hamīd al-Haramayn al-Djuwayni (ed. al-Dīb, Cairo 1980) and, by the same, the short and much commercialised Sharḥ al-wadjīz (numerous editions; French tr. by L.W.C. van den Berg, Le Guide des zélés croyants, Leiden 1895), constituted works of criticism tr. by L.W.C. van den Berg, Le Guide des zélés croyants, Leiden 1895), constituted works of criticism (al-Karīm al-Rāfī (d. 623/1226) (cf. al-Nawawī, Tahdhīb al-aṣma' wa l-lughāt, Beirut n.d., i, 3). It will be noted that none of the works of al-Shaфиī himself feature in this list and, judging by the number of commentaries which they engendered, it is doubtless no exaggeration to say that the Madhhab of al-Muẓam has definitively gained more importance than the al-Kāmil of al-Shafi’ī himself in the development of the Shafi’ī doctrine (concerning the divergence between the fikhn of al-Shafi’ī himself and classical Shafi’ī fikhn, see Schacht, Sur la transmission de la doctrine..., in ALEO Alger, x [1952], 401-19).

The works of al-Shīrāzī are associated with the ‘Irākī element of the Shafi’ī school: al-Tanbīh takes its inspiration from the commentary, al-Ta’līk, by Abū Hamīd al-Isfārāynī on the Madhhab of al-Muẓam, while in al-Muḥaddhab, al-Šīrāzī devised his fikhn around another commentary on the same Madhhab, also intitled al-Ta’līk but the work of his master, the Kāfī Abū Tāyib al-Tābarī (d. 450/1058). On the other hand, the work of al-Ghazālī is associated with the Khurāṣānīan element of the school; al-Wadžīz is a summary of al-Wazīl, which is itself a summary of al-Baṣīl by the same al-Ghazālī, in which he derived inspiration from the Nihāya al-maṭlaḥ of his master Abu ’l-Maṣfī al-Djuwaynī. Of somewhat later date is al-Ta’līk (ed. T. Keijzer, Leiden 1859, Fr. tr. G.H. Bousquet, Abrégé de la loi..., in R. Afr., 1935), another summary of the Nihāya al-Djuwaynī, by Ahmad b. al-Hasan Abū Shudji (still living in 500/1106 [q.v.]) which was the object of glosses and commentaries until the 13th/19th century.

In the Faith al-ṣaṣī fi ṣhār al-wad zgī, a commentary on al-Wad zgī of al-Ghazālī, Abu ’l-Kāsim al-Rāfī (628/1230) is reputed to have made the connection between one of the schools of the style and, after him, there is barely any distinction between the two. Al-Raṭfī is also the author of al-Muḥarrar, likewise inspired by al-Wad zgī, which was to be critically commercialised by Muḥyi al-Dīn al-Nawawī in his Minhāj al-tālibīn (much-criticised tr. by L.W.C. van den Berg, Le Guide des zélés croyants, Batavia 1882). which was in its turn highly regarded in the madhhab. The same al-Nawawī composed two important works based on the Sharḥ al-wad zgī of al-Raṭfī, the Rasaẓd al-tālibīn and the Zawād’ al-rasāda.

Two commentaries on the Minhāj al-tālibīn of al-Nawawī, the Tibṣ d al-muḥādībī by Ibn Ḥadaj al-Haytāmī (d. 975/1567) and the Nihāyāt al-muḥādībī by Shams al-Dīn al-Ranūf (d. 1006/1596), as well as a commentary on al-Ta’līk of Abū Shudja, the Faith al-ṭar r by al-Ghazālī (d. 918/1512) (again, a much-criticised tr. by L.W.C. van den Berg, La Révolution de l’Omniprésent, Leiden 1895), constituted works of reference for the teaching of Shafi’ism in later periods. A gloss (ṣāḥībā) on the last-named text by Ibrahim al-Bāgzīrī (d. 1276/1850) has been partially commercialised by E. Sachau (Muḥamedanisches Recht
Shafi'i, theology and Sufism

Throughout its long history, the Shafi'i school generally maintained good relations, in terms of theology (‘ilm al-kalâm [q.v.]), with Ash’arism (q.v.) and, in regard to Sufism, with its reputedly “moderate” tendency. Scholars such as Abu l-Kāsim al-Kūshayrī (d. 465/1072 [q.v.]), renowned Khurāsānī author of the Risdla fī l-taṣawwuf, who comprised the theological backbone of Ash’arī theology and of Sufī, are plentiful among the Shafi’ī ranks; Abū Hamīd al-Ghazālī remains the most eminent representative of this trend, although he is neither the most original nor the most interesting.

In regard to Sufism, envisaged as an interior struggle (maudhāda) towards the comprehension and realisation of the injunctions of the Law addressed to the consciousness of the believer (fikhr bātin al-shari‘a), Shafi’ī scholars, today, have strictly nothing to do with dispute; the contrary is the case, insofar as, on the one hand, Sufism does not eliminate the importance of fikhr as such by seeking to act as a substitute for it, and, on the other hand, it does not engender practices, “spiritual exercises”, which, from the viewpoint of fikhr, could be seen as reprehensible. But, as a more general rule and in a more essential manner, the majority of the spiritual and moral virtues—the spirit of scrupulousness (al-wans), asceticism (al-zuhd), etc.—which fikhr refuses, on principle, to take into consideration in its work of demonstration and application of legal statutes and which have been codified in the framework of Sufism, are highly valued by, in particular, the majority of biographers who do not hesitate, when the occasion arises, to attribute them to such-and-such a fakhr. Among renowned Sufis who were Shafi’īs (or at least, whom Shafi’ism claims), the most significant names are: al-Hārīrī b. Asad al-Muḥāsibī (d. 243/857 [q.v.]) whose few biographers state that he was a friend of al-Shafi’ī; Abu l-Kāsim al-Dināyān (d. 297/910 [q.v.]), although al-Kūshayrī asserts that he adhered rather to the madhhab of Abu Thawr; the ḥāfīz Abū ‘Abd Allāh b. Khāṣfī (d. 391/1001); etc.

The history of relations between Shafi’ism and Ash’arism (or see: Ash’arīyya) is, however, more problematical and has for a long time been the object of debate in Islamic studies. With regard to theology, it is appropriate first to distinguish between two tendencies among Shafi’ī jurists. The first—represented by scholars such as Abū Hātim al-Rāzī (d. 327/939), al-Bayhaqī (d. 458/1066), Ibn al-Sa‘d (d. 643/1245), al-Dhahābī (d. 748/1348) or indeed Ibn Khūṭīr (d. 774/1370)—was, for various reasons and to differing degrees, hostile to the exercise of this discipline as such. This tendency is often described as “traditionalist”, although there is doubt as to whether this adjective is well-chosen.

The second tendency was for its part enthusiastically in favour of the development of the ‘ilm al-kalâm in the Muslim community and it is represented by Shafi’īs—Abū Isḥāk al-Isfārāyīnī, Ibn Fūrāk (d. 406/1015), al-Dīnārī, Fāyḥīl b. al-Rāzī, al-Āmidī (d. 631/1233), etc.—who can include some of the best Muslim theologians. It is asserted that more than a large majority of the Shafi’īs favouring the exercise of speculative theology supported Ash’arism (with a few exceptions, including, famously, the Kātīr Abū al-Dabbāb (d. 415/1024 [q.v.]) who was a Shafi’ī in legal matters and a Mu’tazilī in theology). It seems to be accepted furthermore, among the majority of Shafi’ī biographers (see, for example, Ibn al-Salām, al-Nawawī and al-Mīzāzī, Tabātabāī al-shafī‘īyya, Beirut 1992, ii, 604-6), that the theologian al-Ash’arī (d. 324/935-6 [q.v.]) was himself a Shafi’ī. It is, however, impossible to state this categorically (see D. Gimearet, La doctrine d’al-Ash’arī, Paris 1990, 517-9; on the question of relations between Shafi’ism and Ash’arism, see, with regard to Abū Isḥāk al-Shirāzī, C. Gilliot in S.I, bxvii (1968), 170-86, and, in reply to the latter, E. Chaumont in S.I, bxix (1991), 168-77, and with regard to al-Ṭawāfi, T. Nagel, Die Festung des Glaubens (Munich 1998). It is not, however, appropriate to speak of a special relationship between Shafi’ism and Ash’arism since, on the one hand, as has been observed, numerous Shafi’īs were opposed to any speculative theology, and on the other hand, not all Ash’arīs were Shafi’īs, indeed, far from it. Furthermore, bearing in mind the fact that, over the centuries, Ash’arism tended to be regarded as the theological doctrine of Sunni Islam—at the expense of Mu’tazilism and, to a lesser degree, of creeds of the Hanbalī type—the presence of a majority of Ash’arīs among the Shafi’īs is hardly surprising (on this point, see T.S.K., iii, 377-8, where al-Subki draws up a contemporary table of the theological allegiances represented in the madhhab and stresses the fact that, while Ash’arīs constitute the majority in all the schools, with the exception of Hanbalism, it is only the Mālikīs who are exclusively Ash’arī). It is apparent, therefore, that the question of relations between Shafi’ism and Ash’arism is subordinate, by comparison with a more general enquiry, not yet undertaken, which would seek to determine the precise nature of the causes capable of explaining why and how Ash’arism was implanted in the Islamic legal system and its institutions with greater ease than other theological doctrines.

Bibliography

The majority of important references are indicated in the text. For a more extensive bibl., recourse may be had to the exhaustive and thematically classified compilation given by Schacht in his Introduction to Islamic law, 215-85. See also ASH’ARIYYA, HANABILA, HANAFIYYA, MALIKIYYA, MU’ATZILA. (E. CHAUMONT)

SHAFSHAWAN (dialect, Shāwan, usual Fr. rendering Shovain, Span. Xauen), a town of Morocco on the country of the same name. The term is said to mean “horn or horns” in Tamazight, referring to the mountain peaks (over 2,000 m/6,500 feet) which surround the town. Situated at an altitude of 600 m/2,000 feet, Shafshawan is rich in springs of water, the best-known being that of Ra’s al-Mā‘. Equally situated between Oazzane and Tetuan, with which it has always been in close contact, the town occupies a strategic position 40 km/25 miles from the coast, and in the past played the role of a crossroads for the Dībāla region.

It was founded in 876/1471-2 on the right bank of the wadi of the same name by Hasan b. Muhammad b. Rāḥīd, a descendant of the Idrīsīd saint Abū al-Salām Ibn Mashāhī [q.v.]. It was moved to the right bank by ‘Ali b. Rāḥīd. It sheltered waves of Moriscos, Muslims and Jews, expelled from al-Andalus, and still bears the imprint of this history, seen in the choice of space and its architecture, as well as the customs and patronymics testing this Andalusian grafting. The town’s history is linked with that of the founding Banū Rāḥīd, the most famous of whom being Mawlay İbrāhīm (895-946/1490-1539). The family cultivated matrimonial alliances with the powerful caids of the region;
Mawlāy Ibrahim's sister, Sayyida al-Hurra, married the kādī of Tetuan al-Mandān and, after becoming a widow, became the wife of the Wāṭṭāṣīd sultan Aḥmad. She played a leading role in the politics of the region, and Mawlāy Ibrahim himself safeguarded himself in warfare against the Portuguese of Āsīla before succeeding his father as kādī of Shafshāwan. As a splendid and faithful warrior, Sidī Brāhīm/ Mawlāy Ibrahim compelled the admiration of his enemies, who did not cease to heap praise on his great deeds and generosity (Bernardo Rodrigues, Analís de Arzīla, ed. D. Lopes, Lisbon 1915–20; R. Ricard, Moulay Ibrahim, calif de Chfèshāwan, in Sources inédites de l'histoire du Maroc, Portugal, Paris 1948, iii, 146–57, and the same article in in And. [1941]). But his family fell victim to the conflicts between the last Wāṭṭāṣīds and the Saʿdīs. After Abū Hāssid's capture of Fās in 961/1554, Shafshāwan was besieged by the minister Abū ʿAbd Allāh Muhammad ʿAbd al-Kādīr in the name of the sultan of Āsīla, and the Banū Rāṣīḥ fled in Safār 969/October 1562 and disappeared from the political scene. The kādī's essential role in the fight against the Portuguese installed at Cētūt, Tāngīrs and Āsīla, and Leo Africanus states that its citizens were "freed from taxes because they serve as cavalrymen and infantrymen in the fight against the Portuguese". The 9th/15th century was its most brilliant one, when it produced several renowned scholars, such as Abū Muḥammad ʿAbd Allāh al-Ḥabīr (d. 963/1556) and Ibn ʿAskar, the author of the Dauḥāt al-nāṣīḥ, banished by the Banū Rāṣīḥ. Once occupied by the Saʿdīs, the town lost its importance and, henceforth, is hardly even mentioned. Mawlāy ʿIsmāʿīl built a kāsba there. It was in turn held by al-Raysūnī, al-Khāḍīr Ghaylān and then by the pasha Ahmad al-Rifī (d. 1146/1734), and in October 1920 was occupied by Spain. During 1922–6 ʿAbd al-Krīm made it a base of operations for the war in the Rif [g. e.].

The surrounding region, despite its steep slopes, is fertile and well-watered and produces cereals and fruit (grapes, figs, pomegranates etc.), but the water-mills and the presses which gave the town its fame survive only vestigially. The activity recorded by G. Colin in the earlier decades of this century (Ep. art. s. c.) is only a memory, and Shafshāwan lives essentially off tourism, with many tourists attracted by the climate and beauty of its site and with handicrafts: textiles (drāż), pottery, leatherwork and copper ware. The fortified town has walls pierced by eleven gates. Its clearly individual quarters, its numerous mosques, its kāsba and the shrine of Sidī ʿAli Ben Rāṣīḥ, bear witness to a past era now completed, for the town now suffers from its cramped site. It remains a modest place, and its eccentric position and the poverty of the region have not encouraged the growth of population; the population reached 16,850 in 1969, but did not go beyond 24,000 in 1982.

**Bibliography:** Muhammad al-ʿArbi Ibn Yūsuf al-Ṭāsi, Mirāʾ al-maḥāsin, lith. Fās 1324/1906; Ibn ʿAskar, the author of the Dauḥāt al-nāṣīḥ, banished by the Banū Rāṣīḥ. It is thought to have had between 3,000 and 7,000 inhabitants before 1918. In 1953 the census counted 11,500 Muslims, 2,500 Spanish and 15 Jews. The population reached 16,850 in 1969, but did not go beyond 24,000 in 1982.
SHÂH — SHAH ʿABBâD AL-ʿAZîM AL-ḤASÂNÎ

191
tual unit with it (Mahmūd-šâh). The latter usage is the most common and, though found already in early texts (such as Firdawši’s Šâh-nâmâ), is anomalous in Neo-Persian. It might be likely that it is an isolated relic from Middle Persian or else an imitation of Turkish constructions with titles such as ḵān. Compounds with šâh (as the first or last element) or indeed šâh on its own occur quite frequently as proper names of kings, but also of commoners; the given name of the famous Šâlûdji rûlîr Malik Šâh, for example, is formed simply by combining the Arabic and Persian words for “king”. As a common noun, however (without a title) šâh is widely used in poetry and non-official prose of all periods to designate potentates who, in their official protocol, styled themselves malîk, sultan, amîr, pâddâh or whatever. It is also used with reference to the kings of pre-Islamic Persia and in works of fiction. Sometimes it is applied to princes (as already in Middle Persian; many references in F. Wolff, Glossar zu Firdosî’s Schahname, Berlin 1935, 549, 583). Its uses and others found in official or set phrases šâh means “pre-eminent, principal”, e.g. in masjîd-ı šâh “congregational mosque” (not “king’s mosque”), or šâh-râh “principal road, highway”. In the Indian subcontinent, šâh is appended to the names of persons claiming descent from the Prophet and has today become a surname.

As for the title šâhān šâh, this naturally fell into disuse with the collapse of the Šâṣîânid empire, but it remained in popular memory in its Neo-Persian form šâhānšâh (the vowels in the first and last syllables can be shortened when required by the metre; modern Western Persian has also the vulgar form šâhānšâh). This is an inseparable compound (from which is derived an adjective šâhānšâhî) and in the context of Neo-Persian it can no longer be analysed morphologically, though there has never been any doubt that its meaning is indeed “king of kings”. It was adopted as his official title by the Bûyîd ʿAdud al-Dawla (338-72/949-83) and continued to be used by his successors on their coins and in court documents, sometimes in conjunction with its Arabic equivalent malîk al-mulûk; despite the objections raised by religious authorities (for details, see Lakhân and the literature cited there), but after the fall of the Bûyîd it does not seem to have figured in official protocol until the 20th century, when it was adopted by the self-styled “Pâddâh-Shâh” of the Jâhâlî dynasty in Persia. It has, however, always been used quite freely by poets. Thus the Ghaznavid Masʿûd I, who would hardly have tolerated such a sacrilegious title in his official documents, had evidently no scruples about his court poet Manûšchîr addressing him as şâhānšâh-ı dîwân, şâh-ı malîkân and the like, and similar expressions are used by the panegyrists of the Šâlûdji rûlîr ʿAdud and others after them.

(F.C. DE BLOIS)

SHÄH ʿABBÄD AL-ʿAZîM AL-ḤASÂNÎ, Abu ʿI.-Kâsîm b. ʿAbbâd b. ʿAbbâd al-Ḥasân b. Zayd b. al-Ḥasân b. Abu-Ḥâdî Tâlîb, Şiʿî ascetic and traditionist, well-known under the name of Imâm-żâde (Šâh) ʿAbbâd al-ʿAzîm. He is buried in the principal sanctuary of Rayy [see RAYY].

1. The holy man.

Only sparse biographical data are available on ʿAbbâd al-ʿAzîm, who must have been born in Medina before 200/815 and who was a companion of the ninth and tenth Imams, Muhammad al-Ḍâjwâd al-Ṭâkî (d. 220/835) and ʿAbbâd al-Ḥâdî al-Ḥâlî (d. 254/868) [see also ASKÂRÎ]. When the latter, at the order of caliph al-Mutawakkil, was forced to go to Sâmârrawât in 233/848, ʿAbbâd al-ʿAzîm followed him there. He is said to have been ordained by al-Nâkî, apparently under the caliphate of al-Muṭawâz, to go to Persia in exile. He stayed in Tabûz and, then in Rayy, where he lived in the sikkat al-mawâlî in the quarter of Sarbânân, hidden in the house of a Šîʿî. He passed his time in prayers, ascetic practices, study and teaching, and visited the tomb of an ʿAlîd which was later reputed to be that of Hamza b. Mûsâ al-Ḵâzîm (see below). He died perhaps before al-Nâkî (towards 250/864), as Karîmîn, i, 384 ff. (though, according to some Šîʿî sources (Šârîf al-Mûrådâ, al-Ṭûsî, see Madelung, quoted in the Bibl.), he also was a companion of the eleventh Imam, Ḥasan al-ʾAskârî (d. 260/874 [q.v.]).

In the small Šâmîm community of Rayy, ʿAbbâd al-ʿAzîm occupied an important position as sayyid, companion of the Imâms, traditionist and teacher. His works, now lost, were used and quoted until the 10th/11th century: Kitâb Yâsam wa-l-layla (on the daily rituals), Risûq-ye ʿAbbâd al-ʿAzîm; Kitâb Ḵâšûs Amîr al-šâhânsâh-i Ḥasan b. Ḫâdî I, who would hardly have tolerated such a sacrilegious title in his official protocol, styled themselves malîk, sultan, ʾAbbâd al-ʿAzîm al-Ḥasânî. Under the patronage of Tahmâsî I, who in part continued ʿAbbâd al-ʿAzîm’s efforts, devoted a now lost biography to him, Abkâr ʿAbbâd al-ʿAzîm al-Ḥasânî.

2. The sanctuary.

ʿAbbâd al-ʿAzîm was buried in a garden under an apple-tree (bağ-ye taʃfâʃ), opposite the tomb of Ḥamza b. Mûsâ which was situated outside the walls, to the west of al-Rayy, in the partly Sunni quarter of Bâṭân (see Karîmîn, i, 264 ff.). The garden belonged to a certain ʿAbbâd al-Djâbûr b. Muhammad and was praised by Ibn Ṣâlih al-ʿĀkîr, the Bûyîd vizier in Rayy. The Imâmi traditionist Ibn Bâbûyû Bâbâwâyû (q.v.), who in part continued ʿAbbâd al-ʿAzîm’s efforts, devoted a now lost biography to him, Abkâr ʿAbbâd al-ʿAzîm al-Ḥasânî.

3. The mausoleum.

The holy man was buried in a garden under an apple-tree opposite the tomb of Ḥamza b. Mûsâ (see below). When Shah ʿAbbâd went to attack the Obezghs in 996/1587-8, fell ill, he recovered his health after a pilgrimage to the sanctuary (Karîmîn, i, 382). Notwithstanding the interest shown to the sanc-
tuary by notables or rulers up to the Safawids, it is quite difficult to form a picture of its importance in former days. Since it was called Mashhad or Masqijd al-Šahdžāra, and its cemetery, according to some sources, Ḫūrist ān-Šahdžāra (Karimān, 1, 328 ff.), it might have remained in use even in conjunction with the neighbouring Imāmzāda [q.v.] dedicated to Hamza b. Mūsā al-Šāhīm. The Šafawīds pretended to descend from this sayyid ḥusaynī-mudāwi, whose supposed burial place is also located at Turǧīz or in a village near Šahrāz. It is at this last site, and not at Rayy, that they caused a richly endowed mausoleum to be built (ibid., 395 ff.). Until the beginning of the 19th century, the tombs of Abd al-ʿAzīz, of Hamza and other holy men were situated comparably the km to the south (ibid., 392 ff.). The sanctuary must have included a rather important garden. On his way to Māzandārān, ʿAbbās II (1463-66) camped there with his suite for nine days in 1070/1659-60 (Muḥammad Ṭāhir Wahid Ḫaṣwīn, ʿAbbās-ndma, ed. ʿĪbrāhīm Dihgān, Arāk 1329, 263 ff.).

The administrator of the sanctuary (muṣawāʾīl) was designated and appointed by the central government. This practice continued in ʿAbbād al-Šaḥīm Zanjūkī-Zanj (see J. R. Petry, Karim Khan Zand. A history of Iran, 1747-1779, Chicago 1979, 220) and after that by the Kāḏājār. Fāṭḥ ʿAlī Šāh [q.v.], who was an assiduous guardian of the sanctuary, had it embellished (Karimān, 1, 392; Algar, 48). The same was the case with Nāṣir al-Dīn Šāh [q.v.], who in 1270/1853-4 had the cupola covered with gold and the ʿībm decorated with stalactites consisting of mirrors; the latter initiative was due, at least to a certain extent, to his vizier Mīrzā ʿAkā Ḵān Nūrī (1851-8) (Karimān, i, 391 ff.; Algar, 159).

Like other Šāhī sanctuaries, Šāh Abd al-ʿAzīz was a place of asylum repute to be inviolable for persons (or animals), lawbreakers or others, who are menaced by people in power [see natt; and J. Calmard, art. Bast (sanctuary, asylum), in EIr]. When the neighbouring town of Tehran was promoted to be the capital by Aḥṣād Muḥammad Ḵān in 1786, the pilgrimage to the sanctuary and its use for politico-religious protests, in particular against foreign influence, developed considerably. The project of constructing a railway line between Tehran and the sanctuary made people fear, erroneously, that the extension of the line to Kum would mean the end of this town. The line was indeed constructed and explored about the km to the west (ibid., 188-88) notwithstanding the fact that it was ransacked by a furious crowd in December 1888 (see Algar, 175 ff., 182). Under Nāṣir al-Dīn Šāh, the sanctuary formed the most important place of bast, criminals or debtors, as well as political opponents, finding there protection in several degrees (see E.G. Browne, A year among the Persians, London 1893, 174). The most ominous violation of the right of bast occurred in January 1891 when the Muslim reformist ʿḎámāl al-Dīn Asāḥbād-ʿAlī Ghāzā (see Calmard, loc. cit.) Nāṣir al-Dīn was murdered in the courtyard of the mausoleum on the eve of his jubilee (fifty lunar years) on 1 May 1896 by Mīrzā Ṭāḥā Kirmānī, a partisan of the Afšārī. During the events of the Constitutional Revolution (1905-11), about 20,000 ʿulamāʾ (mullahs, muḥaddīs, tāllāḥs), opposed to the authoritarian measures of the vizier ʿAfīn al-Dawla and financially supported by 500 partisans of Karim Khan Zanjūkī-Zanj, as well as political opponents, finding there protection in several places, many notables, dignitaries, ʿulamāʾ, members of the Kāḏājār family, etc., are buried at Šāh Abd al-ʿAzīz. The most renowned royal tomb is that of Nāṣir al-Dīn Šāh, situated at the western corner at a place known under the name of Masqijd-i Hūlaḡā. An imposing mausoleum dedicated to Rīdā Šāh Pahlawī [q.v.] was erected on the site of the ancient quarter of Bāḏān, south-east of the sanctuary (Karimān, i, 395). It was destroyed during the events of the Islamic Revolution.

**Shāh ʿAbd al-ʿAzīz** [see ʿAbd al-ʿAzīz al-Dihlawī].

**Shāh ʿAbd al-Ḵādīr** [see ʿAbd al-Ḵādīr Dihlawī].

**Shāh ʿĀlam II** (1142-1220/1729-1806, r. 1173-1202/1759-88, 1203-21/1788-1806), later Muḥgal emperor, son of the Muḥgal Emperor ʿAlamgīr II. His original name was Mīrzā ʿAbī Ḵāliq, the title ʿAlī Ghawhar was conferred in 1168/1754, and that of ʿĀlam in 1170/1756. As a prince, he led an unsuccessful raid into Bihar in Djamādī II 1172/February 1759, and claimed the throne in 1175/1759. He was, however, unable to rule from Dihlī. Becoming an ally of Shuḥdājāl-ḏawla and Mīr Kāsim [q.v.], he shared in their defeat at Baksar (Buxar) in 1178/1764 at the hands of the British. In 1179/1765 he granted the diwānī of Bengal, Bihar and Orissa to the East India Company, receiving in return ʿAlāhābād (as his seat) and an annual pension of 2.6 million rupees. Under ʿĀlam the Marālīs sought an alliance with the Marālīs, and through it, received by them into his capital Dihlī in Ramadān 1185/January 1772. He thereupon lost
both Allâhâbâd and his annual pension from the British. Mahdâjjî Sindicâ, who was now responsible for the safety of the Emperor, was constantly faced by local malcontents. The Rohilla chief Ghûmân Kâdir held Dîhîl from 202/1218-19 to 228/1234-5. He blinded Shâh 4Alâm, but was himself captured and put to death. In 1203/1789 Mahdâjjî Sindicâ provided Shâh 4Alâm with a daily cash pension of 300 rupees; later territories were assigned to him yielding nearly 1.7 million a year. In 1217/1803 Dîhîl provided Shâh cAlâm with a daily cash pension of 300 rupees; later territories were assigned to him yielding 335-336, 338-9, xii, 40-1, 67, 167-92; idem, T. da- Dâlwa al-âtakhâyîâ, ed. A. Tâlymâr, CAI 426, 319, 330, 364, 367, 391; Abuse 'l-Fîdâ', Mughal chron., in RHC, v, 5, 11, 17, 63, 64, 71, 8; Matthew of Edessa, tr. Doulaurier, Paris 1858, 275-285, 318, 361- 2; Michael the Syrian, tr. Chabot, Paris 1899-1914, 216; al-Mâkkîn, Chronique des Ayoubides, tr. A. M. Eddé et F. Micheau, Paris 1948, 18-19.

(Carole Hillenbrand)

SHAH BANDAR (r.), literally ‘harbour, port master’. The term was used before the Ottoman period to denote the chief of the merchants, and sometimes the representative of foreign mer- chant companies in the port cities of the Mughal Empire.

1. In the Arab world.

Here, he was not known in Mamlûk times, when there is mentioned the ra'îs or kâbî al-tudjâdîr. The frequent use of the term in the Thousand and one nights confirms the comparatively late redaction of a certain number of its stories. After the Ottoman conquest, shâh bandar is attested in all the Arab countries of the Near East in the sense of provost or overseer of the merchants, notably, at Cairo, Aleppo, Mecca and Baghûdât, and likewise at Bâbîrî which was called the port where the consis- sion bazîrîn bukhî was also used, ‘merchants of the Black Sea and of the Mediterranean’ (also found at Cairo and Aleppo). On the other hand, the term was unknown in the Mughârîb; at Tunis, the amîn al-tudjâdîr was an Andalusian, the trade organisation...
there, it appears, having been formed by these immigrants.

We are best informed about the shah bandar in the great centres of Cairo and Aleppo, where there existed an important international trade, which enriched powerful communities of merchants. In Cairo, the shah bandar was at the head of a group of around 500-600 merchants who specialised in the large-scale traffic in coffee, spices and textiles. He was a person of considerable status; in official ceremonies, he had precedence over the muhtasib. He was probably appointed by the community with ultimate control by the authorities. The office was usually for life, and in some cases, was hereditary (cf. the Sharâ'ibls in the 18th century). The shah bandar seems to have been chosen from amongst the richest tudjdjdr, which is the case for the greater part of the shah bandars whom we know, the best-known being Aḥmad al-Ruwâtī, Ismâ'īl Ābū Tâikiyya (d. 1624), Qâsim al-Dîn al-Ḍāhâbî (alive in 1630), Dāḍâ (d. 1724) and then Kásim al-ṣārâ'îbî (d. 1734), Aḥmad b. 'Abd al-Salâm (d. 1791), Mâhmûd Mubarrâm (d. 1793) and Aḥmad al-Mâhrûkî (d. 1804). The shah bandar arbitrated in disputes between merchants and was their intermediary vis-à-vis the authorities. Normally, the community of merchants lay outside the jurisdiction of the muhtasib and even outside that of the Aḡā of the Janissaries. But the shah bandar's power resided largely in his own, personal prestige; thus the Sharâ'ibls clearly exerted political influence and had links with the ruling classes. The "house of the chief of the merchants" mentioned on the plan of Cairo in the Description de l'Égypte (VII arrondissement, 85 I 4) had been the personal residence of 'Abd al-Salâm and then of al-Mâhrûkî, but does not appear to have played any "administrative" role.

The mahkâma or legal tribunal documents which have been studied for Aleppo bring some details on the functions of this dignitary, in all cases analogous to those of his counterpart at Cairo. He apparently had his seat in the khan of the custom officials (gumruk), according to the information of Thévenot (1664). He regulated disputes between the merchants. He gave expert witness in the courts where legal cases involved commercial matters, and represented the merchants vis-à-vis the administration. The position was held by local notables. Two cases are known where the holder of the office was deprived of it by the authorities at the request of the merchants, on grounds of senility (1645) or incapacity (1689). Alexander Russell (The natural history..., London 1794, i. 329) gives the specific information that he was a member of the Pasha's council (diwan) ca. 1760.

Everything leads us to believe that the importance which the shah bandar Muhammad al-Mâhrûkî assumed in Cairo during the decade beginning in 1810 (going as far as jurisdiction over the whole body of artisans and merchants in 1813), and his conflict with an especially energetic muhtasib in 1817, was linked to this person's influence with Muhammad ʿAlî, rather than to a growth in the powers of the office. However, Lane, enumerating the councils set up by Muhammad ʿAlî, mentions a "Court of the Merchants" (diwan at-tudjdjdr) presided over by the shah bandar (Manners and customs, ch. iv). In reality, the deep changes in the economy and in society in both Egypt and Syria, led in the 19th century to a new control of the traditional corporate structures, and also of the group of great merchants who had dominated international trade. Although the term itself, and the functions of the shah bandar, are still mentioned for a long time after this in Egypt (ʿAlî Pasha Mubârâk records a "Muhammad Bâshâ al-Suyûfî who is at present shah bandar al-tudjdjdr bi-Misr"), the institution had lost all importance and was considered on its way out, just like the whole of the corporate organisation.

2. In South-East Asia

This title, modern spelling in South-East Asia, sahabbandar has a long history in the Islamic lands east of India, and refers primarily to the official who directed trade in the maritime cities of Malaysia and Indonesia [q.v.]. Within this broad definition, three distinct but related uses of the term can be traced.

(1) As a member of a "Royal Council". Taking the royal court of Melaka (ca. 14th-15th centuries) [see MELAKA] as a paradigm, we find a number of named officials with specific functions and duties, such as the Bendahara (treasurer), Temenggong (in charge of public order), Laksamana (commander of warships), etc. The Šāh Bandar was intimately involved with trade at the ports (this trade being a royal monopoly), and was part of the inner circle of government, though to what exact extent is not clear. Much depended on his own personality. Some were apparently quite wealthy; it seems that the holder of the office was entitled to a proportion of the duty levied on trade goods, calculated either on place of origin of the goods or on the type of goods concerned.

(2) Administration of trade. At the apogee of the Melaka sultanate (late 15th century), the Šāh Bandar's rights and obligations were clearly defined. The laws of Melaka (Undang-Undang Melaka, see Bibl.) have various specific references. Thus he is described as the "Father and Mother" of foreign merchants. He generally determined weights and measures. He could order various punishments, up to death, for theft and murder at sea. He was responsible for public order in the ports (hence his title is sometimes translated as "harbourmaster") and for giving succour to and supervising shipwrecked sailors.

(3) Controller of trade groups. The entrepôt trade in Malaysia and Indonesia involved many different nationalities, and each had its own Šāh Bandar (thus for the Čām, the Siamese, the Javanese, the Kling (Indians), the Arabs, etc.). The function of each of these officials was to organise trade and finance within his own community, and between its members and the wider port community.

In addition to the above, there are minor references to the office, and the term is still used as a general honourific. It appears in Lingga [see BAY] in the first half of the 19th century. In the Negri Sembilan, in Malaysia, it appears as a clan title in the form "Dato Bandar", although there is no trade connection here.

SHAH BANDAR — SHAH MANSUR SHIRAZI

(M. B. Hooker)

SHAH DIAHAN (1000-76/1592-1666, r. 1037-68/1628-57). Mughal emperor, son of the Emperor Diahangir [q.v.] and his Radjit wife Manmati; his personal name was Khurram, the title of Shah Diahhan being granted to him by his father in 1025/1616.

His first responsible assignment came with his appointment to the Mewar campaign in 1022/1614. He was subsequently appointed shahadar of the Deccan in 1025/1616 and again in 1030/1621. In 1031/1622 he procured the murder of his elder brother Khusrav and afterwards rebelled in 1032/1623; driven out of the Deccan, he made his way to Bengal, but was defeated there, too, hence returned to the Deccan, where he submitted to his father (1035/1626). On Diahangir's death in 1036/1627, through the machinations of Asaf Khan, he ascended the throne in 1036/1627. He is the first Mughal emperor to have been almost continuously engaged in wars against the rival tribes of the Deccan.

He fell ill in Dhu 'l-Hijja 1067/September 1657, and his four sons Dara Shukoh, Shah Shujah, Awrangzib and Murad Baksh started making preparations to contest the throne. Awrangzib emerged victorious, and deposed and imprisoned his father in 1068/1658. In his imprisonment in the Agra fort, he was looked after by his loyal and talented eldest daughter Diahhan Arù. He died in 1076/1666, and lies buried by the side of his wife Mumtaz Mahall in the Taj Mahall.

(M. Athar Ali)

SHAH MALIK b. Ali Yabghu, the Oghuz Turkish [see OGUZ] ruler in the town of Dind [q.v. in Suppl.] on the lower Syr Darya in Transoxiana during the second quarter of the 11th century A.D.

Shah Malik, who is given by Ibn Funduk the kunya of Abu 'l-Fawārīs and the name of Husān al-Dawla and Nizām al-Milla, was the son and successor of the Oghuz Yabghu, head of a section of that Turkish tribe in rivalry with that one led by the Saljuk family of chiefs [see SALJUKS. ii]. It was this hostility that made Shāh Malik ally with the Ghaznavid Mas'ūd b. Mahmūd [q.v.] against his kinsmen the Saljūqs, and in 429/1043 the sultan appointed him as his governor over Khārazm [q.v.]. Shāh Malik successfully overran Khārazm, but with the triumph at Dandānkān [q.v. in Suppl.] in Khurasan of Toghril and Cagān Begs, et. al., was driven out of Khārazm by 435/1043-4. He fled southwards through Persia to Mātrakān and was eventually killed there, his short line being thus extinguished; by the time of his flight from Khārazm, Dind had probably already fallen into the hands of the Kıpçak [q.v.] Turks.

Bibliography: 1. Sources. These comprise mainly Bāyākī's Tā'īrī-i Mas'ūdī, Ibn Funduk's Ta'īrī, q.v. and the Malika-nāma as preserved in Ibn al-Ādhr and Mirkhwān.

(M. C. E. Bosworth)

SHAH MANSUR SHIRAZI, finance minister of the Mughal emperor Akbar (963-1014/1576-1605). Of Indian origin, he held an appointment as muṣīrīf (accountant) of the Royal khūṣkha-phānuma (perfume department), but incurred the hostility of powerful
noble and, dismissed from that post, became diwan (finance superintendent) at Djanwpur. After Khan Zaman’s rebellion and death (973/1566) he served as Mun’tim Khan’s diwan and the next bakhshi (court sergeant of troops). After Mun’tim Khan’s death (984/1576), he was again in personal difficulty, but won Akbar’s approval and was appointed uzair, sharing the control of finance ministry with Muṣaffar Khan and Tōḏar Mall. However, the latter two were soon assigned other duties, and Muṣair was mainly responsible for the new system of land revenue collection and payment of cash salaries to nobles according to their ranks or mansāb. In 986/1578 he prepared a new record of estimated revenues (girāv) based on the preceding ten years’ collections. He was himself raised to 1,000 dārī, a high rank at the time. But his rigour made him many enemies, and the rebellion of 988/1580 in Djanwpur, Bihār and Bengal was attributed to this cause. In 989/1581 later, the charge was found to be based on a forgery; but since some very high nobles (Man Singh [q.v.] and Shāhībāz Khan) were involved in it, Akbar seems to have decided to close the case. 

SHĀH MUHAMMAD B. ‘ABD AHMAD, popularly known as Mulla Shāh, a distinguished saint of the Kādirī silsila in India (992-1072/1584-1661). According to Djahān Arā, the name of his father was Mawlānā ʿAbdī, but Mulla Shāh refers to him in his mathnawī Risāla-yi niṣbat as ‘Abd Ahmad. Born in 992/1584, in Arkasa, a village of Badakhshan, he lived there for about 21 years. Later he visited Bāḥkū, Kābul and other places in search of a spiritual teacher. He was received by Bāḥkū, who made him his disciple. In 1023/1614-15 and felt close to his master, he settled in Lahore. He breathed his last in Lahore in 1072/1661, at the distance from the mausoleum of Miyan Mir. Dara Shukoh and Djalān Arā to his ward to stand surety for him, he was executed in 989/1581.

SHĀH NAWĀZ KHĀN [see MAʿĀTHIR AL-UṢMAWA].

SHĀH NĪʿĀMAT AL-LĀH [see NĪʿĀMAT-AL-LĀHĪYAH].

SHĀH RŪD, a hydronym and toponym of Persia.

1. A river of the Elburz Mountains region of northwestern Persia. It runs from the south-east northwestwards from a source in the mountains west of Tehran and joins the Kīzī Uzen [q.v.] at Mangīl, the combined waters then making up the Safīd Rūd [q.v.], which flows into the Caspian Sea. The upper reaches of the Shāh Rūd are known as the Shāh Rūd-i Tālākān, to distinguish it from its right-bank affluent the Shāh Rūd-i Alamūt. This last rises near the Taḵt-e Sulaymān peak and is hemmed in by high mountains; its flanks are dominated by the ruins of a series of Assassin fortes- ceres from mediaeval Islamic times, the most famous of which is Alamūt [q.v.]. In the wider, more fertile parts of the Shāh Rūd valleys rice and corn are grown.

The Shāh Rūd is not navigable and is little noted in mediaeval sources. The first notice seems to be that of the 8th century Armenian geography, which describes it as a river of Daylam rising in the mountains of Tālākān (see Marquart, Erdnäscher, 126). In the 19th century, it became known through the travels of W. Montel (1832) and H. Rawlinson (1838), the first to identify the ruins of the Assassins on the time of Hasan-i Sabbāh [q.v.] (see A. Gabriel, Die Er- forschung Persiens, Vienna 1952, 147, 155, 217-18).

2. A district, mentioned by Ḥamd Allāh Mustawfī, Nuṣaḥ, 82, tr. 85, as adjoining the districts
of Tālīsh [q.v.] (the Tawalish) in the north of Gilan; he states that its people were nominally Shafiʿ.

3. A town of western Khurāsān, lying just to the south of Bistām [q.v.] in lat. 36° 25' N. and long. 55° 58' E, altitude 1,360 m/4,460 feet. The town is

mentioned in unmediated social sources, but has become important since the 19th century from its position on the high road from Tehran to Khurāsān and now on the railway; there is also a road from it across the Elburz to Astārabād–Gurgān and the Caspian coastlands, which is normally passable all through winter. After the Iranian Revolution of 1979, the town was renamed Imamrud but has now reverted to the old name of Shahrud; it comes within the Sīmān province. The population in 1991 was 92,195 (Preliminary results of the 1991 census, Statistical Centre of Iran, Population Division).

miralty handbooks. Persia, London 1945, index; Research (Ed.), Pictorial and descriptive Iran, iii, 171-3; Camb. hist. of Iran, i, 42-4.

(C.E. Bosworth)

SHAH RUKH b. TIMŪR, fourth son and suc-
cessor of Timūr (Tamerlane), was born on 14 Rabiʾ I 779/20 August 1377 of one of Timūr’s concubines, Taghāy Tarkān Aghā. In 794/1392 Timur appointed him to the new fortress of Shahrudkiyā north of the Jaxartes, and in 799/1397 made him governor of Khurāsān, Sīstān, and Māzandarān. Shah Rukh was married to two prestigious women, Gawharshād b. Ghiyāḥ al-Dīn Tarkān and Malikat Agha, the Cinggisid widow of his eldest brother Ṣamarkand in late 811/Spring 1409 and installed his

Umar Shaykh’s other sons continued to be troublesome; in the autumn of 818/1415, Shah Rukh attacked them and installed his son Ibrahim Sultān as governor of Fars. In the next two years he undertook campaigns to Kandahār and Kirmān, and dismissed the rebellious governor of An-

diwān, Ahmad b. Ṣamarkand. By 821/1418 Shah Rukh had removed his nephews from all major

SHAH RUD — SHAH RUKH

197

province. Kara Yusuf Kara Koyunlu had taken Adhar-

Adharbaydān had not been strongly held by Timūr, and Shah Rukh was content with nominal overlord-

ship and the possession of Kazwīn and Sulṭāniyya. After a year pacifying the region he installed ʿAli b. Kara ʿUthmān Ak Koyunlu as governor, and put an amir with an army in Sulṭāniyya.

The rule of Shah Rukh

Shah Rukh was quite willing to use violence; he exec-

uted both insubordinate followers and religious

figures, and wrought deliberate destruction in Sīstān and Adharbaydān. He was at the same time a cautious ruler, who rarely undertook campaigns with-

out provision of his rebellion and military

superiority and of local alliances. Most of his reign he

spent in Khurāsān, going in spring to hunt in Sarakhs and to visit the Mashhad shrine. Many military ex-

peditions were entrusted to his sons and amirs. Ulugh Beg campaigned aggressively against the Moghuls and the Doqids, and Ibrahim Sulṭān campaigned in Khuzistān and southern Persia. The balance of power in the north shifted after 830/1426-7 when the Uzbekks

defeated Ulugh Beg and Muhammad Djuki b. Shah Rukh; after this Ulugh Beg stopped campaigning in person. The Moghuls became aggressive and took Kashghar in 1435, while the Uzbekks under Abu ’l-Khayr Khān raided Transoxiana for the rest of Shah Rukh’s reign. Abu ’l-Khayr invaded Khūzestān and in 834/1430-1 and 839/1435; Shah Rukh quelled a winter army in Māzandarān to protect the frontier. In the west, Shah Rukh defended his political claims. On 5 Rajab 832/10 April 1429 he set out against Iskan-
dar b. Kara Yusuf Kara Koyunlu, who had seized Sulṭāniyya. He defeated Iskandar near Salmās on 18 Dhu ’l-Hijja 832/18 September 1429, and ap-

pointed Iskandar’s brother Abu Saʿīd governor. In spring 838/1433 Shah Rukh set out again against Adharbaydān, which had fallen to Iskandar. Iskan-
dar fled and local rulers submitted with little resistance. Shah Rukh made Djiḥānshāh b. Kara Yusuf governor of the region; this arrangement lasted until Shah Rukh’s death.

Shah Rukh exchanged embassies with a large number of powers. He received homage from many

neighbouring rulers: the Ak Koyunlu, the Dīhil Sultān, the rulers of Hormuz and, at least at the begin-
ing of his reign, the Ottoman sultāns. Shah Rukh’s attempts to assert superiority over the Mamlāk sultāns evoked increasing hostility up to the accession of Čaṅkū in 842/1438; after which rela-
tions werecordial though equal. Until the death of the Yung-lo emperor in 1424, Shah Rukh exchanged fre-
cquent embassies with China (a total of 20), and estab-
lished a rare level of formal equality with the emperor (M. Rossabi, Two Ming envoys to Inner Asia, in Young Pao, ix/i-1, 1-34).

Shah Rukh governed by balancing the power of his

subordinates, allowing them to hold office for long periods. The power of his two most eminent amirs—ʿAlikā Kūkelītān and Djalāl al-Dīn Frūzghān—was kept in check by overlapping responsibilities and the administrative authority of Shah Rukh’s son Bāyānshūr. In his dīwān the two pre-
eminent viziers—Sayyid Fakhr al-Dīn Ahmad up to 819/1416-17 and Khudābād Ghiyāḥ al-Dīn Pir Ahmad thereafter—shared authority with partners, and suf-
fered periodic demotions. Shah Rukh initiated the fiscal de-centralisation of the Timurid realm by distributing numerous sayyarahs, grants of land with tax immunity. The magnificence of provincial courts suggests that not all revenues were forwarded to the centre. Nonetheless, Shah Rukh retained sufficient funds to field a large army and to undertake major
restoration works in Balkh, Marw and Harat. Provincial governors enjoyed considerable autonomy but required permission for important campaigns. Shah Rukh, more over, appropriated the revenues of the nearby cities, and interfered occasionally in provincial affairs. From 820/1417-18 until near the end of his life, he suffered little insubordination.

Shah Rukh was presented as a ruler of exceptional piety, even as a renewer of the Islamic order. In the beginning of his reign he apparently proclaimed the restoration of the Shari'a and abrogation of the yasa (Djalal al-Din Abu '1-Fawaris, Ms. Vienna, Nationalbibliothek, Ms. A.F. 112, fol. lb-2b; Hafiz-i Abru, Zubdat at-ta'arruk i Baysungh, ms. Istanbul, Fatih 4371/1, fol. 486b, letter to China). He avoided drinking and twice publicly poured away wine. He was conspicuous in his involvement with religious affairs and his patronage of shrines, but harsh towards a'lamaz whose he questioned and popular religious movements such as the Nürbakhštštviya [q.v.] movement among the Kubrawiyya. On 23 Rabi' I 830/22 January 1247, a race was held in the Harūfiyya [q.v.] sect and Shah-i Shudja was appointed as the assassināte Shah Rukh. This led to executions and the exile of the Sufi poet Kāsim al-Anwār [q.v.], whom Shah Rukh linked to this event.

Shah Rukh did not fully abandon Mongol tradition. Mongol taxes remained in force, as did the Turco-Mongolian yarghū court, and Shah Rukh claimed to punish infringements against Mongol custom. He presented his dynasty as successor to the Il-Khans; his government was styled “Il-Khānī,” and he used Il-Khānī titles earlier applied to Timūr’s Cinggisid puppet khans, with whom he no longer maintained. (Nawā't, 163, 165, 171, etc.) His major act of literary patronage was the copying and continuation of Rashīd al-Dīn’s works.

Shah Rukh’s reign initiated an upsurge of Persian and Turkic cultural activity. There was a brief revival of the Uyghur alphabet, and the beginnings of Caghatay Turkic literature. He reconstructed the city walls and bazaar of Harat and built a magnificent shrine for ʿAbd Allāh Anṣārī [q.v.] at Gāzurgāh. Gahwarshād built and endowed a shrine mosque at Mashhad, and a large mosque, madrasa and mausoleum complex outside Harat. Numerous other buildings were endowed by Shah Rukh’s amirs. His son Baysunghur [q.v.] was a major patron of book production. Provincial courts also flourished, under Ulugh Beg in Samarkand and Ibrāhīm Sultān in Shirāz, and under major amirs in Yazd and Khirāzam.

Near the end of Shah Rukh’s life, the death of several sons and amirs upset the balance of power in government. After Baysunghur died in 837/1433, and Amīr ʿAlikī in 544/1440, Firuzshāh was without equal in army and administration. His subsequent abuses led to an investigation by Shah Rukh, during which Firuzshāh died. Further financial scandals followed as well as a number of local rebellions, and increasing dissension within the dynasty. When Shah Rukh became ill in 848/1444-5, disorder broke out, particularly in Khurāsān. Gahwarshād tried to engineer the succession of her favourite grandson ʿAlāʾ al-Dawla b. Baysungh. These events encouraged Sultān Muhammad b. Baysunghur to rebel. Shah Rukh went against him, and executed several of his supporters. Shah Rukh died during a campaign, on 25 Dhu ‘l-Hijjah 850/13 March 1447.

The ensuing succession struggle ravaged Khurāsān and opened western Persia to the Kara Koyunlu. Within fifteen years, Shah Rukh’s line had largely destroyed itself, and Abū Saʿīd [q.v.], a descendant of Mirānshāh, succeeded in taking power.

Bibliography (in addition to references in the article):

SHAH-i SHUDJA, Djalāl al-Dīn Abu l-Fawāris (d. 786/1384), a prince of the Muẓaffarīd [q.v.] dynasty in Persia (for the correct form of his name, see J. Aubin, La fin de l'État sarbadar du Khurasan, in JA, celsii [1974], 101-2 n. 32). Born on 22 Dju‘ādā’ī 1335/10 March 1333, he was the son of the dynasty’s founder, Mubāriz al-Dīn Muhammad, who gave him Kirmān as his appanage in 745/1343 and recognised him as his heir. In the division of the Muẓaffarīd territories following Mubāriz al-Dīn’s deposition and blinding by his sons in 760/1359, Shah-i Shudja, the son of ‘Abbās al-Dīn Fasā Khwāfī, was made governor of the eastern territories following Mubariz al-Din’s deposition and blinding by his sons in 760/1359.

Near the end of Shah Rukh’s life, the death of several sons and amirs upset the balance of power in government. After Baysunghur died in 837/1433, and Amīr ʿAlikī in 544/1440, Firuzshāh was without equal in army and administration. His subsequent abuses led to an investigation by Shah Rukh, during which Firuzshāh died. Further financial scandals followed as well as a number of local rebellions, and increasing dissension within the dynasty. When Shah Rukh became ill in 848/1444-5, disorder broke out, particularly in Khurāsān. Gahwarshād tried to engineer the succession of her favourite grandson ʿAlāʾ al-Dawla b. Baysunghur. These events encouraged Sultān Muhammad b. Baysunghur to rebel. Shah Rukh went against him, and executed several of his supporters. Shah Rukh died during a campaign, on 25 Dhu ‘l-Hijjah 850/13 March 1447.

The ensuing succession struggle ravaged Khurāsān and opened western Persia to the Kara Koyunlu. Within fifteen years, Shah Rukh’s line had largely destroyed itself, and Abū Saʿīd [q.v.], a descendant of Mirānshāh, succeeded in taking power.
Abarkuh. Here he built up a power-base, taking Kirman from a rebel who had seized possession of it. Together with his nephew Shah Yabgh, who had submitted to him, and the latter's brother Shah Mansur, he advanced on Shiraz and routed Shah Mahmud's forces. Sultan Ahmad in turn went over to Shah-i Shudja, and Shah Mahmud abandoned the city in Dhu 'l-Ka'da 776/July 1376. The recovery of his capital, however, did not mean that Shah-i Shudja enjoyed undisturbed rule. Although in 768/1366-7 Shah Mahmud again acknowledged his overlordship, the two rulers continued to engage in periodic conflict; at one point Shah-i Shudja's eldest son Sultan Uways rebelled and took refuge with Shah Mahmud. Following the latter's death on 9 Shawwal 776/13 March 1375, however, Shah-i Shudja was able to take over Isfahan despite a faction within the city which supported Uways.

Shaykh Uways having also died in 776/1375, Shah-i Shudja sought to avenge himself on the Djalayirids. He invaded Adharbaydjan, defeated the Djalayirid army on 6 Dzumal fitr 777/3 October 1375 (Mandhid, fol. 660a), and occupied Tabriz, Karabagh and Nakchivan, but was shortly obliged to withdraw. Peace was made with Uways's son and successor, Sultan Husayn, and cemented by the marriage of Husayn's sister to Shah-i Shudja's son Zayn al-'Abidin, on whom his father now conferred Isfahan. A subsequent campaign against Yazd brought to heel Shah Yabgh, who had again rebelled, but the prince's brother Shah Mansur fled to Mardin andarun and later to Baghdad. Over the next few years Shah-i Shudja intervened once more in the upheavals afflicting the Djalayirid principality, where the governor of Sultaniyya, Sariq 'Adil, rebelled and Husayn was embroiled with his brothers. Sariq 'Adil was obliged to accept Musaffarid overlordship in 781/1379-80; and when in 784/1382 Husayn was overthrown and killed by his brother Ahmad, Shah-i Shudja encouraged another dissident Djalayirid commander to occupy Shushtar and Baghdad and to strike coins and make the khutba in his name. Although Ahmad occupied Baghdad and sent the Musaffarid prince Shah Mansur to seize Shushtar, he was soon confronted with a bid by Sariq 'Adil at Sultaniyya to seize the throne on behalf of a third brother, Bayazid, and appealed to the Shah-i Shudja for assistance. In order to attend to Shushtar, Shah-i Shudja effected a reconciliation between the Djalayirid brothers; but he was unable to make any headway against Shah Mansur, with whom he made peace.

Soon after this campaign Shah-i Shudja died on 22 Shawwal 786/9 October 1384. His son Uways had predeceased him, and he was succeeded at Shiraz by his son Zayn al-'Abidin, who proved unable to enforce his authority over his kinsmen. One of Shah-i Shudja's last actions had been to write a letter interceding with Timur-i Lang on behalf of his family (Kutubi, 104-8), but this did not prevent the conqueror invading the Musaffarid territories and eventually destroying the dynasty. The chroniclers praise Shah-i Shudja's cultural accomplishments (Kutubi, 63). Although he himself wrote indifferent verse, he studied grammar and is celebrated as the patron and friend of the famous poet Hafiz (q.v.), who hailed his accession as the dawn of a more liberal era. Yet Shah-i Shudja was not without his faults: he was so preoccupied with his blinding both of his father and, in 785/1383, of his son Sultan Shibli, whom he suspected, groundlessly, of plotting against him (Kutubi, 99-100).

(P. Jackson)
originally been established as meydis. In two fermands dated 962/1555 and 970/1562-3 Könum Süleyman accored Şah Sultan permission to upgrade these two foundations into Friday mosques. The Davutoğlu mosque today is located in the garden of the Djerrah Paşa hospital; when it was restored in 1953, the original dome was supplanted by a tiled roof. The Eyüp foundation remained in the hands of the Khalwet-T Sunbul dervishes until the tekkes were closed in 1925. After the earthquake of 1180/1766, the foundations into Friday mosques. The Davutoğlu mosque and the zdwiye had built a mosque and mausoleum in Eyüp, whose architect was Miḥārvm Sinān. According to one source, the mosque and mausoleum were Zal Mahmud Paşa’s foundations, while Şah Sultan contributed a zāwiye. The exact date of construction remains unknown, but since in 987/1579 a muqaddas was appointed to the medrese, it must have been complete or else close to completion. While both mosque and mausoleum appear in two lists of Sinan’s works, the medrese is only mentioned in a single one. During this period, Miḥārm Sinān must have spent most of his energy on Sultan Selim II’s mosque in Edirne. Therefore the medrese, built on two levels linked by a staircase, may well be at least partly the work of another architect. Both Şah Sultan and her spouse died in 988/1580 and were buried in their common mausoleum.

SURAIYA FAROQHI

ŞAH TĀHIR AL-ḤUSAYN AL-DĀKKĀNI, son of the Imām Rādi al-Dīn II, the most famous imām of the Muhammad-šahī line of post-Alamut [q.v.].

He was a theologian, a poet, a stylist, and an accomplished diplomat who gave valuable services to the Niẓām-šahī dynasty of Aḥmadnagar in southern India, hence the surname al-Dakkāni because of this affiliation. He was born and brought up in Khund near Kāzwīn, where his ancestors had settled after the fall of Alamut and had acquired a large following. He was a gifted man and attained a high reputation for his learning and piety. However, he was invited by the Sultanlar Şah Ismai‘īl I [q.v.] to join other scholars at his court; however, Şah Tāhir’s religious following aroused Şah Ismai‘īl’s suspicious mind, and only after the intercession of Mīrza Ḥusayn Isfahānī (who was an influential dignitary and might have been a secret convert and a follower of the imām)
was Shah Tahir allowed to settle down in Kashan, where he became a religious teacher. Soon his influence over the people and his popularity among them aroused the hostility of the local officials and the Twelver Shi'a scholars, who maliciously reported to the Shah, accusing Shah Tahir of heretical teaching. Hence, in 926/1520 the Imam was obliged to flee with his family.

He first went to Fars and then sailed to India. After landing in Goa he went to the court of Isma'il 5th Adil Shah in Bijapur. Disappointed with his reception, he decided to make a pilgrimage to Mecca and to the Shi'i shrines of Najaf and Karbala, which were located in the Safavid territories in the east of Persia. However, on his way to the seaport he met some high dignitaries of Burhan Nizam Shah, the ruler of Ahmadnagar, and was invited there: In 928/1522 the Imam arrived in the capital of Nizam-Shahi state and soon became the most trusted adviser of the Shah and attained a highly privileged position at his court. The Indian historian Firigha, who has given the most detailed account of his life, relates an interesting story of his miraculous healing of Burhan Nizam Shah's young son, which brought about the latter's conversion from Sunnism to Shi'ism. Shortly after his own conversion, Burhan Nizam Shah proclaimed Twelver Shi'ism as the official religion of the state. Our sources state that the form of Shi'ism propagated by Shah Tahir, himself a Nizari Imam, was Twelver Shi'ism, which may seem strange. However, one must bear in mind that Shah Tahir and his predecessors were obliged to observe takyia [q.v.], so that they propagated Nizari Isma'ilism in the guise of Twelver Shi'ism and Sufism. This explains why he wrote several commentaries on the theological and jurisprudential works of the well-known Twelver scholars and a commentary on the famous Sufi treatise Guldhan-i raza. Except for some of his poetry and excerpts of his correspondence, nothing seems to have survived. He died at Ahmadnagar between 952/1545-6, the year mentioned by the contemporary Safavid prince Sâm Mirza, and 956/1549, the date recorded by Firigha. His remains were later transferred to Karbalâ.

Bibliography: For a detailed description of his works and sources, see I. Poonawala, Bibliography of Isma'ilî literature, Malibu 1977, 271-5; F. Daffary, The Isma'ilîs: their history and doctrines, Cambridge 1972, 471, 487-90. (I. Poonawala, however, makes the town his capital and died and was buried there in 956/1549, the date recorded by Firigha. His remains were later transferred to Karbalâ.)

SHAH WALI ALLAH [see AL-TEHRAWI, SHAIKH WÂLI ALLAH].

SHAHADA (A.), the verbal noun from shahida, a verb which means successively (1) to be present (somewhere), as opposed to ghâfa “be absent”; whence (2) see with one's own eyes, be witness (of an event); whence (3) attest, certify s. th. sultân. Shahâda can thus mean in the first place “that which is there”, whence “that which can be seen”, as in the Kur'anic formula in which God is described as 'âlim al-ghayb wa 'l-shahdda “He who knows what is invisible and visible” (VI, 73; IX, 94; 105; XIII, 9; etc.). Another sense, more commonly used, is that of witnessing, the declaration by means of which the witness to an event testifies to the reality of what he has seen (or claims to have seen); this is the sense in Kur'an, II, 282-3 (in regard to a debt), V, 106-8 (in regard to a bequest), XXIV, 4, 6 (concerning adultery), LXV, 2 (at the time of a divorce), and, from this point of departure, in legal language [see SHAHIDA]. A third usage (not directly Kur'anic but implicit in III, 19, VI, 19 and LXIII, 1) is the religious sense, in which shahâda denotes the Islamic profession of faith, the act of declaring “There is no god but God, and Muhammad is the Messenger of God”. Sometimes, one speaks in this case of al-shahâdadun ‘ilâ ‘l-halâla ‘l-kabir “the two shahâdas” [see TAMAHHUN]. Finally, by extension of this third sense, shahâda can refer to the supreme manner of affirming the Islamic faith, that of the martyr in the cause of Islam [see MAZHAD and SHAHAD].

(D. GIMARET)

SHAHANSHAH [see SHAH].

SHAHARA, also commonly Shuhara, the name of a large mountain town, also known as Tamamum, in the district (nahiyah) al-Ashar in the Yemen, placed by Werdecker (Contribution, 138) at 16° 14' lat. N. and 43° 40' long. E., i.e. approximately 90 km due east of the Red Sea coast and 110 km north, slightly west, of San'ât [q.v.]. Al-Ahnâm was originally of Hāshid, one of the two divisions of Hamdân. Today, however, the majority of its tribal groups are of Bakîl, the other division, and it is counted as Bakîl territory.

The town was always a centre of learning and produced a number of famous poets and poets. Although her poetry was never assembled into a collection, it finds a respected place in Yemeni literature; she also wrote some prose.

SHAHARIDJA (much less frequently shahandj_; sing. shaharidj), Arabised form of the Persian shahrīji shahrīgan, and the name given to some local notables in provincial administration. However, the material testimony is conspicuously silent when it comes to the Shaharidja (as opposed to the shahrats), and Gyselen has argued that the Shaharidja of the Sasanid period were representatives of the dihāns, rather than administrative officials; insofar as the later evidence from northern Mesopotamia sheds any light on the Sasanid period, the Shaharidja should certainly be interpreted as local notables, but how they related to the dihāns is less clear.

The earliest attestation of the Shaharidja in the Islamic sources comes in Abu Mikhnāf’s account of the conquest of Takrit (here put in year 16/637), where they join a Byzantine force and local Arab tribes in defence of the town; al-Baladhurī also mentions the toponym Tall al-Shaharidja in his account of the conquest of Mawsil, which, if we admit it as authentic, indicates their presence in the north before Islam (for a possible parallel, see Nödeke, Geschichte der Perser und Araber, 446, on Theophylactus Simocatta). Local Nestorian sources of the 9th century portray the Shaharidja as local headmen and wealthy notables, who lived in several towns and villages in the province of Mawsil; according to Thomas of Marga, they levied onerous taxes on the dihāns. But Thomas also accuses them of holding the aberrant view that “Christ was a mere man” (barnāšī ʾishāma), and it is therefore hard to know how much of his information is polemical. Although an e x e n t u s prophecy recorded by Thomas suggests that their role in local taxation began to fade at the end of the 2nd Islamic century, they were known in the north as late as Ibn Hawkal’s time. The evidence for their presence in Irāk (as opposed to Mawsil) during the Islamic period is so thin and stereotypical that firm conclusions are impossible. 

SHAHDAÑADÍ (also shahdānād, ʒeːhɑːdːənɑːd, ʃeːhɑːdːənɑːd, ʃeːhɔrɑːdɑːnɑːd) hempseed. In Greek pharmacology and throughout the Arab counterpart, it was known as a minor simple, useful for drying out fluid in the ear by dripping its oil into it, harmful in that it caused headache and sexual dysfunction when eaten in large quantities, and the like. The word was commonly accepted as the Persian equivalent of Greek cannabis, ̬κάνναβος, and hence served as an other term for braskh (q.v.); this may explain why so many different forms were in use. 

SHĀHDJAHĀNĀBAD (see deed II)

AL-SHAHHAM, ʿABD YAʾSUM YŪNUS b. ʿAbd Allāh b. ʿIshaq, Muʿazzil the theologian of the Baṣrān school (3rd/9th century). His exact dates are unknown. His biographers only say that he was the youngest, or among the youngest, of the disciples of Abu ʿl-Hudhayl (d. 227/841 [q.v.]), that he died aged 80 and that his death was after 257/871, when he was for a while prisoner of the Zanj, until these last overran Baṣra.

As his name implies, he was a seller of fat, and under al-Wāḥibī held administrative posts in the taxation office or diwān al-ḥarāq. According to Ibn al-Nadīm (cited in Ibn Ḥaḍrāt, Liṣān, vi, 325), he is said to have even headed this department. According to other sources, he was reportedly simply charged as a “religious figure”, and in the general framework of the suppression of abuses, to oversee in this regard the conduct of al-Fadl b. Marwān [q.v.]. He was a disciple both of Abu ʿl-Hudhayl and, it seems, of Muʿammar [q.v.] (thus according to al-Khayyāt, Intiṣār, ed. Nader, 45, ii, 15-17), and eventually became head of the Muʿtazilī school in Baṣra. He was the chief master of ʿAbū ʿAlī al-Dīabhār [q.v.]. A trenchant polemist, he is said to have written numerous refutations, as well as, notably, a Kurān commentary (for all biographical details, see ʿAbd al-Dīabhār, Faḍl al-ṭalāṣā, Tunis 1974, 280-1; al-Ḥakim al-Diḥānī, Ṣabīr ʿayn al-maṣāliḥī, ms. Sanʿā’, Great Mosque, ʿilm al-kalām, no. 212, fol. 59a; Ibn al-Muṭafād, Taḥkāt al-muṭāṣilī, Beirut-Wiesbaden 1961, 71-2; and on the episode of the Zanj, ʿAbd al-Dīabhār, Ṭaḥkīt dalaʾl al-nuḥwa wa, Beirut 1966, 341).

He is characterised by two main theses:

(1) Concerning the science of God on the question whether God has knowledge from all eternity (lam yaqūl śīlim mī ṣīyāt)—a question debated at length in al-Ashʿarī, Makālīt, Wiesbaden 1963, 158-63—he was amongst those answering affirmatively (see ibid., 162, ii, 8-17). This means that he admitted that, given the fact that the universe is created, “things are things even before they come into existence”; in other words, that “what is not yet in existence is a thing” (al-μuṭāṣil šīla), a thesis which the majority of later Muʿtazīs, Baṣrans as well as Baghdādīs, made their own. A relatively late tradition holds that, within the Muʿtazī school, al-Shahhām was the first to uphold such a principle (see al-Dīwānī, Shīml, Alexandria 1969, 124, ii, 6-7; al-Shahrastānī, Niḥāya, Oxford 1934, 151, ii, 2-5).

In reality, his contemporaries and compatriot ʿAbbāb b. Sulaymān [q.v.] held the same view (see Makālīt, 158, ii, 16 ff. and 493, ii, 9 ff.). Al-Shahhām simply went further, saying that bodies even are bodies before they come into being, a viewpoint which was later taken up by the Baghdādī al-Khayyāt [q.v.] (in his Farāk, ed. ʿAbd al-Hamīd, Cairo n.d., 179, ii, 15 ff., al-Baghdādī attributes to al-Khayyāt the reasoning that, in Makālīt, 162, ii, 12-16, 504, ii, 16 ff., al-ʿAshīrī attributes to al-Shahhām).

(2) Regarding God’s power, considered in its
connection with human acts, al-Shahham upheld, against all the other Muctazills (thus in... and seals of the Shahs of Iran, Oxford 1951. (R.E. DARLEY-DORAN)

**SHAHID (A., lit. “witness”, pi. shuhadda), a word**

in 792/1390 at 5.38 gr, half the weight of the

yi nukra

Makdldt, Majmud, 549, 11. 2-3; this common possibility ap-

pares, whether it is God who produces it and it is then an act of God alone, or whether it is man, and in this case it is exclusively an act of man (see Makdldt, 199, ii. 8-9, 549, ii. 13 ff.; Majdmd, I, 379, ii. 11-12, 15-16; ‘Abd al-Djabbar, Mughni, Cairo 1963, viii, 275, ii. 16-18).

**Bibliography:** Given in the article, to which should be added Agha’ari, Makdldt, 277, ii. 3-13; 415, ii. 6-8; ‘Abd al-Djabbar, Fadl, 256, ii. 1-10; Abu ‘l-Mu‘tin al-Nasafi, Tahsmdn, Damascus 1993, ii, 548, ii. 8-10, 724, ii. 9-11; Ibn Abi ‘l-Hadld, Shahg Majdld-halagha, Cairo 1959, i, 7, ii. 6-10; J. van Ess, Theologie und Gesellschaft im 2. und 3. Jahrhundert Hicdrza, iv, § 4.1.3. (D. GIMARET)

**SHAHID (r.), lit. “royal, kingly”**. In numismatics, the name of a silver coin denomination in Safavid and post-Safavid Persia until inflation gradually drove it out of circulation. The name originated in Persia after Timur introduced his tanga-yi nukra in 792/1390 at 5.38 gr, half the weight of the Dihl Sultanate tanga, 10.76 gr. Under Shah Rukh the tanga-yi nukra’s weight was reduced to that of the mithkd, 4.72 gr, and received the popular name gharakhi. Between Shah Rukh’s death in 853/1449 and the accession of Shah Isma’1 II Safavid in 907/1501 the coinage of Persia underwent a rapid and continuing debasement. Shah Isma’il then stabilised the coinage and issued three main silver denominations during the period of his first coinage standard, 908-23/1502-17 weighing one, two and four mithkdl. On the basis of the one mithkd coin weighed the same as the gharakhi, Fragner concluded that this was the shahi which valued at 50 dinars, but Rabino and Farahbakhsh assigned the same name and dinar value of the shahi to the two mithkd weight denominations. This appears to be no contemporary historical evidence to decide this issue, although the Persian numismatic tradition may be favoured. After a series of steep devaluations in 923, 928, 938 and 945 A.H., all authorities are in agreement that the shahi of Tahmasb I was peared to be a contemporary historical evidence to decide this issue, although the Persian numismatic tradition may be favoured. After a series of steep devaluations in 923, 928, 938 and 945 A.H., all authorities are in agreement that the shahi of Tahmasb I was

weighed a half-mithkd (12 nukhd), about 2.30 gr, and continued to be valued at 50 dinars, with 200 shahi being equal to one tumdn.

A new set of denominations in which one of his new rivd was valued at 25 shahi or 1,250 dinars, 8 riydl were worth one tumdn, while the smallest circulating coin, the shahi safid, the white shahi to distinguish it from the copper, or black shahi, actually had a real value of 3.125 shahi. When the kirán standard was intro-

duced in 1214/1825, 10 kirán were valued at one tumdn, one kirán at 20 shahi or 1,000 dinars, while the circulating silver coins were issued at the value of one, half, quarter and eighth-kiran.

In 1305 the first decimal coinage was introduced at the central government mint at Tehran. Copper coins were then issued with the value of 200, 100, 50, 25 and 12 dinars, but in the year 1305 the 100 dinar coin was actually named the riydl shahi and the 50-dinar one the shahi. Between 1296/1879 and 1342/1924, the smallest silver coin was the shahi safid weighing 3.25 nukhd or 0.7 gr. These small coins, while named shahi, had an actual value of three copper shahi, and were struck for special distribution at the Na’uruz [g. v.] celebrations. Three varieties are known. One bore the shahs’ names and titles on the obverse, and the Persian lion and sun emblem and date on the reverse, and was presumably given as presents to and amongst the secular administration. The second carries the rulers’ names and titles as before, with the legend “O Master of the Age! To Thee be Greetings!” referring to the Twelfth Imam, and the third bears the same invocation to the Twelfth Imam with the Persian lion and sun and the date on the reverse. These, presumably, were intended for distribution within the religious community. With the coming of the Pahlawis, the striking of the shahi safid ceased, and privately struck tokens took its place as Na’uruz gifts.

In 1309 A.H./1930, Ridä Sháh Pahlawí [g. v.] introduced a new coin standard, valuing the tumdan at ten riydl, the roydl at 100 dinars, and the shahi at five dinars. The last appearance of the shahi denomination in the Persian coinage was in 1314 A.H./1935 when the half-riydl (50 dinars) was given the name of 10 shahi. The final fractional riydl, a 50-dinar coin, which was the last vestige of the shahi, appeared only once after the proclamation of the Islamic Republic of Iran when it was issued as part of the first republican coinage dated 1338 A.H./1959.

Elsewhere, there is evidence that the name shahi as a shortened form of gharakhi was colloquially applied to those silver coins influenced by the Persian coinage system which circulated in pre- and early Mughal India, weighing around a half-tanga or one mithkd.

**SHAHID (a., lit. “witness”, pl. shahidat), a word**
often used in the sense of “martyr”. In the Kur'ān it is attested in its primary meaning (e.g. II. 282, XXIV, 4) and also occurs as one of the divine names (e.g. V. 117). Muslims scholars maintain that in a number of verses, 

šahīd or šahīda means “martyrs”, as in III, 140 (“So that God may know those who believe and may take ṣūhādat from among you”), IV, 69 (“Whoever obeys God and the messenger—they are with those whom God has blessed, prophets, just men, šuhādat and the righteous”), XXXIX, 69 and LVII, 19; and they explain in various ways how this meaning derives from the verb ṣūhāda (see Lane, s.v.). God willing, in contrast, those who remain alive are “martyrs”. 

ṣūhāda was post-Kur'ānic and reflected the use among Christians of the Greek martyrs and Syriac sāhāda (Muslim studies, ii, 350-1; cf. Wensinck, The oriental doctrine, 1, 9; šahīdī in EP [W. Björkman]). What is not in doubt is that the Kur'ān refers to the reward for those slain in the way of God (fī sabīl Allāh) (II, 154, III, 157, 169, IV, 74, IX, 111, XLVII, 4-6).

A large body of traditions describes the bliss awaiting the saints that they have forgiven; he will be protected from the torments of the grave; a crown of glory will be placed on his head; he will be married to seventy-two houris and his intercession will be accepted for up to seventy of his relations. When the martyrs behold the delights awaiting them, they will ask to be brought back to life and killed again; but this is one request which even they will be denied. The Kur'ānic statement that the ṣūhādat are alive (āhīd) is often (but not always) interpreted literally (see D. Gimaret, Une lecture muḥāzilite du Korān, Louvain-Paris 1994, 120, 202-3). According to some traditions, the spirits of the martyrs will ascend directly to Paradise, there to reside in the craws of green birds near God's throne. During the Resurrection these spirits will be returned to the martyr's earthly bodies and the martyrs will then be given their abode in Paradise (dār al-ṣūhādat).

There are two main types of martyr, the difference between them being marked by the fact that martyrs of the first type have special burial rites while those of the second do not. The first type are ṣūhādat al-ma'raka, “battlefield martyrs”. They are referred to as “martyrs both in this world and the next” (ṣūhādat al-dunya wa l-ākhiri), meaning that they are treated as martyrs both in this world (in that they undergo the special burial rites) and in the world to come. The burial rites accorded to battlefield martyrs differ from those accorded to other Muslims in the following ways:

(i) Qaṣīl [q.v.]. There is widespread agreement among Sunni and non-Sunnī jurists that the martyr's body should not as a rule be washed. This position is based on the precedent of the Prophet's actions at Uḥud and elsewhere and on the belief that martyrdom removes the impurity which adheres to a person's body at death. A minority view was held by some early authorities, including Sa'īd b. al-Musayyab (d. ca. 94/713), al-Ḥasan al-Asbārī [q.v.] and the Baṣraī 'Ubayd Allāh b. al-Ḥasan al-Anbarī (d. 168/785). Their view is that the Prophet acted in extraordinary circumstances and that his actions should therefore not serve as a precedent; in addition, they hold that martyrs are subject to the same laws of impurity as others. A special case is the martyr who dies without having performed the qaṣīl following sexual intercourse, and it is held that his body should be washed. This view is also held by abū Hanīfā, Ibn Ḥanbal and the Isbādis. These jurists cite the precedent of the Anṣārī Ḥanāzāl b. Abī ʿAmir: he was with his wife when called upon to fight at Uḥud and was killed before he could perform the qaṣīl; the angels washed his body, and he is therefore known as ṣūhātī al-malātīka. A further point, allegedly made by Abū Ḥanīfā, is that martyrdom does not cancel an impurity which adhered to a person at the time of martyrdom; while he was killed, his body should be treated like any other battlefield martyr by not being washed include Abū Yūsuf, al-Shāybānī and some later Hanafis. Conflicting views on this point are also found among Mālikīs, Shāfīʿīs, Zaydis and Imāmīs. 

(ii) Clothes. The belief that the martyr's blood-stained clothes will constitute proof of his status on the Day of Judgment is the main reason for holding that he should be buried in the garments in which he was killed. But items of clothing which cannot normally serve as shrouds (e.g. headgear, footwear, fur or skin clothes) may not be buried with him; nor should his weapons accompany him to the grave, as this was a Dāhili custom. The Shāfīʿīs, Mālikīs and Hanbalīs maintain that if the martyr's next of kin (ādliyya) do not wish to bury him in his garments, they may use shrouds instead. 

(3) Prayers. There are conflicting accounts of the Prophet's behaviour at Uḥud: according to some he prayed over the martyrs, according to others he did not. Those who hold that the former should serve as a precedent include the Hanafis, Zaydis and Imāmīs. Opponents of prayers over the martyrs include the Shāfīʿīs and Mālikīs, as well as many of the older Meccan and Medinan authorities. Ibn Ḥazm argues that both accounts are equally reliable and that either practice may therefore be followed, while the Hanbalīs are split over the issue, depending on which of two ru'ūya's from Ibn Hanbal they choose to follow. One argument (attributed to al-Shāfīʿī) against prayers over the martyrs is that the martyrs are alive, while prayers are held only for the dead. Another argument is based on the notion that the aim of such prayers is to intercede on the dead person's behalf, as the martyr has been cleansed of all sins, he is in no need of such intercession. In contrast, supporters of such prayers claim that no-one can dispense with a request to God for His mercy and forgiveness, and that the martyrs, more than anyone else, deserve to have this request made on their behalf.

There is some difference of opinion as to who is included in the category of battlefield martyrs. While it is agreed that those who die before the battle is over are those who are killed in battle, there are divergent views as to whether a martyr in battle in order to further God's religion and in anticipation of His reward (iḥtiṣāb), there are some jurists who add that they must have died in a battle against unbelievers, whereas others maintain that their death in battle should have been caused by an act of injustice (zulm). Again, some jurists insist that these martyrs must have been killed by an army soldier, while others do not make this stipulation. All agree that death must be a direct and immediate result of the wounds received, but the interpretation of this rule varies; it is often taken to mean that the warrior must die before he has had a chance either to eat, drink, sleep, receive medical treatment, be moved away, or dictate his last will and testament. The Shāfīʿīs stipulate only that he should not have eaten during the time between his injury and his death, and that his death should have occurred either before or shortly after the battle ended. 

Tradition has recorded the names of numerous battlefield martyrs who died during the Prophet's lifetime; they include members of his immediate family, such as his paternal uncle Ḥamza b. 'Abd al-Muṭṭalib (known as sayyid al-ṣūhādat) and his cousin Djaʿfar b. Abī Tālib [q.v.] Far greater numbers fell...
during the conquests which followed the Prophet's death. Most died on land, some at sea; the latter are said to receive the reward of two martyrs who die on land. Many fought against heavy odds and their behaviour is cited as an example of the "wish for martyrdom" (talab al-shahīdā). Such zeal was also common among various Kharids groups. The number of martyrs of this kind declined with the end of the first great wave of conquests, although it rose again whenever particular historical circumstances (such as the Crusades) revived calls for dhikād (cf. E. Sivan, L'Islam et la croisade, Paris 1968, 50-2, 110, 134 and passim). At the same time, the increasing importance attached to the defence of the border areas led to the elevation of fallen murābiṭun to the rank of martyrs [see Kharid groups]. In eschatological times, martyrs will fight on the side of the Mahdī [q.v.], just as the early martyrs fought alongside the Prophet.

Battlefield martyrdom has captured the imagination of Muslims throughout the ages. A martyr's death in combat is the apotheosis of the believer's aspirations; it is the noblest way to depart this life (hence the motif of the old man who rushes forth to battle) and is a guarantee of God's approval and reward. In his willingness to lay down his life for a higher cause, the believer overcomes that most basic of instincts, fear of death. Nor is the reaction to his death necessarily one of grief: there are accounts in medieval Sunni sources of mothers who express gratitude at the news of their sons' martyrdom and forbid any mourning over them; and similar reports have appeared in modern times, most spectacularly on the Iranian side during the Iran-Iraq war (1980-8). It is the behaviour of these mothers which is so striking, regardless of whether it reflects their true feelings. The significance of the martyr's death transcends the individual; in the eyes of ordinary Muslims, he endows his entire community with purity and grace, and his immediate family are the object of admiration and support.

The second major type of martyr are the "martyrs in the next world only" (ghufradī al-ahlakhīr); they are not accorded distinctive burial rites. Among them are the murathalīhin, lit. "those who are worn out", i.e. warriors who in other respects qualify as battlefield martyrs, but whose death is not a direct and immediate result of their wounds. The question whether a person should be accorded the status of a martyr only in the next world is, however, a unique position. He has traditionally been regarded as a battlefield martyr to be emulated for his willingness to lay down his life for a higher cause. The tombs of Husayn and the other Imamis are the most important shrines in the Shi'i world; many non-Shi'i martyrs are also accorded a cult, and their burial places became centres of pilgrimage [see Mashhad].

(1) Persons who die violently or prematurely. Martyrs of this type include:

(a) Those murdered while in the service of God. Foremost among them are the caliphs 'Umar, 'Uthmān (who is sometimes regarded as a battlefield martyr) and 'Ali. The Prophet himself was occasionally described as a shahīd, since his death was supposedly precipitated by his tasting a piece of poisoned mutton offered him by Zaynab b. al-Harith at the time of the Khaybar expedition.

(b) Those killed for their beliefs. Pre-Islamic figures include various prophets, most prominently Yahyā (John the Baptist) (for whom see e.g. Ibn Abī 'l-Dunyā, Man 'ṣaḥba b'ld-maṣūl, Cairo 1352/1934, 17-8), and righteous persons such as Ḥābīb al-Nadī’dār [q.v.]. During the early years of Muhammad's mission, Sumayya, the mother of 'Ammār b. 'Yāsir [q.v.] (who himself fell at Siffin), is said in some reports to have been stabbed to death by Abū Zaid after she had openly embraced Islam; some say that she was the very first martyr in Islam. An example from the time of the mihna [q.v.] is that of Aḥmad b. Naṣr al-Khuza'ī, who refused to acknowledge that the Kur'an was created and was beheaded in 231/846 by order of the caliph al-Wathik. Such zeal was also common among various Kharids groups. The number of martyrs of this kind declined with the end of the first great wave of conquests, although it rose again whenever particular historical circumstances (such as the Crusades) revived calls for dhikād (cf. E. Sivan, L'Islam et la croisade, Paris 1968, 50-2, 110, 134 and passim). At the same time, the increasing importance attached to the defence of the border areas led to the elevation of fallen murābiṭun to the rank of martyrs [see Kharid groups]. In eschatological times, martyrs will fight on the side of the Mahdī [q.v.], just as the early martyrs fought alongside the Prophet.

Battlefield martyrdom has captured the imagination of Muslims throughout the ages. A martyr's death in combat is the apotheosis of the believer's aspirations; it is the noblest way to depart this life (hence the motif of the old man who rushes forth to battle) and is a guarantee of God's approval and reward. In his willingness to lay down his life for a higher cause, the believer overcomes that most basic of instincts, fear of death. Nor is the reaction to his death necessarily one of grief: there are accounts in medieval Sunni sources of mothers who express gratitude at the news of their sons' martyrdom and forbid any mourning over them; and similar reports have appeared in modern times, most spectacularly on the Iranian side during the Iran-Iraq war (1980-8). It is the behaviour of these mothers which is so striking, regardless of whether it reflects their true feelings. The significance of the martyr's death transcends the individual; in the eyes of ordinary Muslims, he endows his entire community with purity and grace, and his immediate family are the object of admiration and support.

The second major type of martyr are the "martyrs in the next world only" (ghufradī al-ahlakhīr); they are not accorded distinctive burial rites. Among them are the murathalīhin, lit. "those who are worn out", i.e. warriors who in other respects qualify as battlefield martyrs, but whose death is not a direct and immediate result of their wounds. The question whether a person should be accorded the status of a martyr only in the next world is, however, a unique position. He has traditionally been regarded as a battlefield martyr to be emulated for his willingness to lay down his life for a higher cause. The tombs of Husayn and the other Imamis are the most important shrines in the Shi'i world; many non-Shi'i martyrs are also accorded a cult, and their burial places became centres of pilgrimage [see Mashhad].

(c) Those who die through disease or accident. Early collections of Hadith specifically mention victims of the plague (ṣūrān [q.v.]), of puerperal or of an abdominal disease (diarrhoea or colic), those who drown, die in a fire or are struck by a falling house or wall, and
women who die in childbirth; other forms of death were added at a later date. According to al-Badji [q.v.], the elevation of these persons to the rank of martyrs is divine compensation for the painful deaths which they suffer.

(d) The "martyrs of love" (shahadāt al-bubb) and the "martyrs who died far from home" (shahadāt al-glurba) may also belong here. The former are, according to a Prophetic tradition, those who love, remain chaste, conceal their secret and die (Ibn Dawud, K. al-Zahra al-Isfahani, Cairo 1368-9, 106-7; L.A. Giffen, Theory of profane love among the Arabs, New York and London 1971, 99-115). The latter are those who leave their homes (e.g. in order to preserve their faith in times of persecution) and who die in a foreign land.

(2) Persons who die a natural death, either (a) while engaged in a meritorious act such as a pilgrimage, a journey in search of knowledge (fi talab al-trīm) or a prayer (including a prayer for death on the battlefield) (b) after leading a virtuous life. In ascetic circles, those who die after spending their lives waging war against their appetite soul (nafs) were regarded as martyrs in the "greater ḍhīḥād" [see gūtnā]; and according to some Imāmī traditions, every believer (i.e. every Imāmī Shīʿī), even if he dies in his own bed, is a ḍhīḥādī who will be treated as if he had been killed fighting alongside the Prophet. Other Imāmī traditions declare as martyrs those who in their lifetime practised mudārāt, i.e. who treated others in a friendly manner while concealing their true attitude towards them. It has been suggested that the extension of the term ḍhīḥādī to cover cases of non-violent death was a reaction against what was deemed a fanatical enthusiasm for self-sacrifice (Goldziher, Muslim studies, ii, 352).

(3) Living martyrs. They include those who, having joined the "greater ḍhīḥād" (shīhādah), successfully fight their nafs. The Sūfi author Abū ʿAbd al-Rāhmān al-Sulamī (d. 412/1021) [q.v.] declares that the battlefield martyr is a ḍhīḥādī only externally (fi ḍhīḥādī), the true martyr (fi ḍhīḥādī khābīsa) is he whose nafs has been slain while he continues to live in accordance with the Sūfī rules (Manābīd al-sīra, ed. E. Kohlberg, in JASA, i [1979], 30).

A number of questions relating to ḍhīḥādī (particularly of the military kind) were debated in theological circles. For example, a majority of Muʿtazillīs are said to have held that "no one is allowed to wish for martyrdom... A Muslim is only obliged to wish for fortitude (ṣabr) to bear the pain of wounds, should he be afflicted with them". The argument put forward was that the Muslim's wish for martyrdom could only be fulfilled by his being killed; and since killing a Muslim is an act of unbelief, it follows that the Muslim would be wishing for such an act to take place. A related question concerns God's attitude to the death of His servants as martyrs. This question was already addressed by the Ibnādī ʿAbd Allāh b. Yazīd (fl. second half of the 2nd/8th century): he argued that since martyrdom could only come about through death at the hands of a sinner, it followed that God wants (ahabba) the sinner to perform the sin which God knows he will perform. In his refutation of this view, the Ẓayyīdī Imam Ahmad al-Nāṣir (d. 922/1519) maintained that God does not want sinners to kill believers, nor does He determine that this should happen; only after a Muslim has been killed does God refer to him as a ḍhīḥādī (al-Nāṣir, K. al-Naqdī, ed. W. Madelung, Wiesbaden 1405/1985, 127-39). For ʿAbd al-Ḍhāibār [q.v.], God's wish that martyrdom should occur does not mean that He wishes His servants to die: one may wish for something without wishing for the prerequisites for its attainment. Ibn ʿAzīzī exeges, in line with their belief that God does not command evil, interpret the permission (iddīn) of Kurān, III, 166 ("And what happened to you on the day on which the two armies clashed happened with God's permission"), as meaning that God allowed the unbelievers freedom of action (takhliya) by removing any obstacles from their way; it does not mean that God decreed the death of the believers.

A general battlefield martyrry is one whose actions proceed from the right intention (niyya) [q.v.]. But people's intentions are only known to God; in this world people are treated according to their apparent state. This means that even those who went into battle for the wrong reasons (for instance, to show off their prowess or to partake of the spoils) or without true belief in their hearts (as in the case of the munākhīn) are nevertheless accorded the burial rites of the battlefield martyr (provided of course that they meet the other necessary conditions). They are known as "martyrs in this world only" (shuhada al-dunya), and will not enjoy the rewards of martyrs in the next world; indeed, some reports say that they will suffer the torments of hell. The right intention is also required of certain kinds of shuhada al-akhirā (though not, say, of victims of disease or accident); but there is no specific term to designate the pseudomartyrs among them.

[ii] Taʾṣif: interpretations of the Kurʿānic shāhīdah as martyrs are to be found in commentaries on the relevant verses, e.g. ʿAbū ʿAbd Allāh al-Qāsimī, al-Mugny, Cairo 1368/1988, iv, 106-7 (to III, 140).

References:
In Islamic law, testimony (`ashadah) is the paramount medium of legal evidence (baya'nah [p. v.]), the other means being acknowledgement (ikrdr [q.v.]) and the oath (yamin [q.v.]). Testimony is "a statement in court based on observation, introduced by the words 'I testify (`ashahda), concerning the rights of others." Giving testimony in court on what one has seen or heard is a collective obligation (fard `ala `l-kiyfsa), which becomes an individual one in case someone will lose his right if a specific person does not testify to it. This is based on Kur'ân, II, 282, "The witnesses must not refuse whenever they are summoned."

However, with regard to exceptions, it is better not to give testimony, since the Prophet said to a man who testified to such an offence: "It would have been better for you if you would have covered [the offence] under your cloak." (Abû Dâwûd, Sunan, Hudud, 7; Ibn Hanbal, Musnad, V, 217.)

In principle, testimony can only be given by a sane, adult, free, male Muslim of good morals (`adl, ph. `addl [q.v.]), i.e., capable of proving his claim by corresponding evidence. The testimonies of women are accepted e.g. with regard to facts of which in general only women are cognisant, such as menstruation, childbirth, virginity and defects of the female sexual organs, or in combination with a male witness (see below). All schools except the Hanbalis agree that slaves cannot bear witness. Nor can non-Muslims. The Hanafis, however, accept their testimony against other non-Muslims. There is some difference of opinion with regard to whether adherents of Islamic sects are accepted as witnesses. The Hanafis take the most inclusive position and allow the testimonies of practically all `ahl al-kibla. In Twelver Shî'î law, only the testimony of Twelver Shî'îs (mu`minun) is admitted.

Being `adl (of good morals) is defined as not having committed great sins or persevered in small sins and not displaying unbecoming behaviour, such as playing backgammon, walking around bareheaded, or eating or urinating in public. According to the Hanafis, unbecoming behaviour does not affect the status of being `adl but may cause the `âdî to reject someone's testimony. Before a witness is allowed to testify, the `âdî has to establish his good morals by secret and public inquiry (tazkiya, ta'dil).

Witneses must be beyond suspicion of bias. Therefore, one cannot validly testify against one's enemy. Further, testimony in favour of close relatives and, according to most legal schools, one's wife, is not admitted. The various schools differ somewhat as to who must be regarded as close relatives, but all of them include one's ascendants and descendants. Most schools do not admit a witness who would profit from his testimony. For the Twelver Shî'îs, this is the only criterion and they allow in principle testimonies in favour of relatives.

As a rule, the `âdî must find for the plaintiff if the latter can prove his claim by corresponding testimonies given by two male witnesses. In financial matters, the testimony of one man and two women is also admitted as legal evidence. The Hanafis, but not the other schools, allow such evidence also with regard to the status of persons (marriage, divorce, manumission, bequest). All schools except the Hanafis regard the testimony of one male witness corroborated by an oath of the plaintiff also as sufficient evidence in financial matters. In the trial of `âdîs issues or of manslaughter or willful grievous bodily harm where retribution is at stake, only the testimony of male witnesses is admitted. The Malikis, however, exclude here willful grievous bodily harm and allow in these cases the testimony of one man and two women. For proof of illicit sexual relations, four male witnesses are required (cf. Kur'ân, IV, 15, and XXIV, 4). The Twelver Shî'îs allow here also the testimonies of three men and two women or even two men and four women, but only if the punishment at stake is flogging, not if it is lapidation [see further, g. MAH]. The schools differ with regard to the minimum number of female witnesses testifying to facts usually known only
to women; the Hanafis and Hanballis consider one woman sufficient, the Malikis require two and the Shafiis four.

An interesting development took place in North Africa during the 16th and 17th centuries, when the practice ('anuds) came into existence of admitting as legal evidence the shahadat al-lqfif, i.e. the testimony of a group of at least twelve men, who need not be 'udil. This practice was justified by necessity (darura) deriving from the absence of 'udil, especially in rural communities. If such testimony would not be recognised, it was argued, people would not be able to enforce their rights (Sayyid Abul 'Arif Djasir, al-Tarikh al-mardinayn fe l-fishara 'ala madhab al-Malikis, Tunis n.d., 171-8).

One can only testify to what one has heard or seen. However, with regard to certain facts one can give evidence on the strength of public knowledge, without having witnessed the event or the legal act that is at the basis of it (al-shahada bi l-lisadmnah). Thus one may give evidence concerning e.g. a person's descent, martial status or death, without actually having been present at the time of his birth, his marriage contract or his decease. If a witness has a legal excuse for not attending the court session, his testimony may be transmitted by two other witnesses (al-shahada 'ala l-shahada), except in cases of 'hadl offences or retribution.

Once a testimony has been given, it can be withdrawn only before a kadi. If this occurs before the end of the proceedings, the kadi cannot give judgment. If withdrawal takes place after the verdict has been pronounced, the sentence remains valid but the witness is liable for blood-money (diya). According to the shahids, he can even be brought to death if he had wilfully borne false witness.

Already at a very early period, testimonies of legal acts were recorded in deeds in order to preserve the exact wording of the act. However, since under Islamic law documentary evidence is not admitted, the deed itself does not furnish proof, but, in cases of litigation, the testimonies given in court by the witnesses who have signed the deed. In order to avoid the risk that such testimonies might be rejected because the witnesses were not 'udil, professional witnesses, whose 'udail had been established by the court, and who were called shahid 'udal (or, briefly, shahid or 'udil), were employed for recording important transactions. They first appear in Egypt at the beginning of the 8th century A.D. These witnesses, who had a legal training, were appointed and dismissed by the kadi's authorisation, even as judges, and heard minor cases independently. The office of shahida was often regarded as a training period for future judges.

Strictly speaking, the profession of drafting deeds (muwadddih, sharif) and that of testifying to it could be separated. In practice, however, they were not, and the notary would put his signature under the deed as a witness, together with those of the other witnesses. Although the signatures of two witnesses would technically be sufficient, for greater security many more were placed in the document, sometimes up to 48. Often these testimonies were added years after the original drafting.

Nowadays, with regard to those domains of the law where the shari'a is applied, most countries have modernised the law of evidence e.g. by admitting documentary evidence. With regard to the testimony of witnesses, however, some of the classical rules are often maintained, such as the rule that the testimony of one witness does not count. In Morocco, the classical system of appointed 'udil still exists. Some of the countries that have recently expanded the application of the shari'a to fields such as criminal law, have also enacted legislation to reintroduce to some extent the classical rules of evidence (cf. the Sudanese Kana'an al-Ishlif of 1983 and the Pakistani Kana'an-e-Shahidat of 1984).

SHAHID (or perhaps better, Shuhayd) b. al-Husayn al-Baliki al-Warrak al-Mutakallim, Abu 'I-Hasan, a philosopher and a poet in Persian and Arabic, died (according to Yaktu, followed by al-Safa'di) in 319/927.

He was a contemporary and close friend of the polymath Abu Zayd al-Balkhi and of the Mu'tazili theologian Abu 'l-Kasim al-Balkhi (see Al-Balkhi), the three Balkhis were the subject of a joint biography, used by Yaktu) and a bitter rival of the famous philosopher Abu Bakr al-Razi (q.v.); the latter wrote a polemic against Shahid on the subject of pleasure (al-khuda) and another on eschatology (al-awlid), both now lost. The epitome of al-Sidgjari's Siwin al-alb appears in the former contains a short extract from a work by Shahid on the "superiority of the pleasures of the soul over those of the body", perhaps the object of al-Razi's attack.

Shahid was a professional scribe and had a reputation as a meticulous copyist. His Arabic poetry, which is quoted by al-Marghinani, Yaktu and 'Awni, includes two kif's mocking Ahmad b. Abi Rabi'a, who was the uncle of the Sa'did Amr b. al-As (q.v.) between 278/891 and 287/900. Yaktu tells us that he also satirised Ahmad b. Sahi, the famous governor of Khurasan, and had to flee his anger, but returned to Balkh after Ahmad's execution (i.e. in 307/920).

Shahid is mainly remembered as one of the earliest poets in Persian. His famous contemporary Roudaki (q.v.) wrote an elegy on his death, and he is mentioned with respect by other Persian poets of the 4th/10th to 6th/12th centuries, but afterwards his poems fell into oblivion, apart from the hundred-end verses preserved by the anthologists and lexicographers. These include an amatory poem of eight lines quoted by Djalarni, an extract from a kif's which 'Awni says he dedicated to the Sambil Nasr II (301-31/914-43), a poem with alternating Persian and Arabic verses and some couplets from a narrative poem, apparently
of romantic content. Not surprisingly, several of the stray verses cited in the dictionaries have a philo-

AL-SHAHID AL-AWVAL [see Muhammab b. 

MARK"

AL-SHAHID AL-THANI, ZAYN AL-DIN B. 'ALI (in some sources, erroneously, Zayn al-Din 'Ali) b. Ahmad

b. Muhammad al-'Amil, known like his father as Ibn

al-Hujjida (or al-Hadida), Twelver Shi'i author and jurist. He was born in the Lebanese town of

Djuba' on Tuesday, 13 Shawwal 911/9 March 1506,

and studied with his father until the latter's death in

Radjdb 925/July 1519. He then embarked on a series

of travels ft talab al-udm which took him to Mays and

Karaj Nib in his native Djabal 'Amil (925-34/1519-

28) and also (in 937/1530-1 and 942/1535) to Damas-

cus. In mid-Ra'd 942/September 1555 he left the

Syrian capital for an 18-month sojourn in Egypt,

where he studied with a number of Sunni scholars.

He returned to Djuba' after performing the pilgrim-

age to Mecca and Medina, but left it again to visit

the shrines of the Imams in 'Iraq (946/1539-40) and,

later, to visit Jerusalem (Dhu 'l-Hijdja 948/March-

April 1542).

On 17 Ra'di 952/29 May 1545 the Shahid arrived in Istanbul, where he stayed for three-and-a-half months. His purpose was to obtain a licence to teach in a madrasa. The normal procedure would have been for him to produce a petition ('ard) from his local judge (in the case of the Shahid, this would have been the kadi Ma'ruf of Sayda), addressed to the Kadi 'Askar [q.e.] of Anadolu and requesting that the bearer be given the licence in question. But instead, the Shahid presented an epistle that he himself had composed and that showed his command of ten differ-

ent branches of knowledge. The Kadi 'Askar, Muhammad b. Kuft al-Din Muhammad, known as

Mirim Kosesi (d. 957/1550) (cf. R.C. Repp, The Muf-

ti of Istanbul: a study in the development of the Ottoman learned hierarchy, Oxford 1986, 256, n. 177), was so impressed that he offered him a choice of any teaching position in Damascus or Aleppo; the Shahid opted for the Madrasa Nuriyya in Ba'tabak. Sultan

Sulayman the Magnificent (r. 926-74/1520-66) issued the necessary documents and provided a stipend for him. After a second visit to Irak, the Shahid took

up his new post in 953/1546. He held it for a number of years (five, according to some reports, two

according to others). In addition to teaching, he also issued responsa to Shi'is and to Sunnis of the four

schools, each responsum being in accordance with the

petitioner's legal affiliation. His last years were spent

in his home town, where his son, the author Djamal

d-Al-Din al-Hasan Shahid al-Ma'ali'm, was born (17

Ramadan 959/6 September 1552; he died at the

beginning of Muharram 1011/June 1602). This was

the first son to survive into adulthood, others having
died in their infancy; the Shahid's Mushtak al-fu'id

'indu/fi fa'id al-ushuna wa-Fu'idat was written follow-

ing the death in Rajab 954/August-September 1547

of one of his infant sons. The Shahid's disciples

included Husayn b. 'Abd al-Samad al-Harshd (d. 984/

1576), the father of Shaykh Bah'at [see 'AL-AMIL];

Husayn accompanied him to both Cairo and Istanbul.

The Shahid is said to have often lived in fear,

though whether of local enemies or of the Ottoman

authorities is not stated; his death, however, is attrib-

uted to the latter. According to one version, this fol-

lowed a complaint by a disgruntled litigant to the

kadi Ma'ruf. The latter wrote to Sultan Sulayman

accusing the Shahid of heresy, whereupon the Sultan

ordered that he be brought before him for interroga-

tion (al-Hurr al-'Amil, Amal al-'amil, i, 90-1). Elsewhere, it is the Grand Vizier Rustem Pasha [q.e.

who is said to have ordered the Shahid's arrest after

being told that he was actively propagating Shi'ism

(Hasan-I Rumihi, Ahsan al-tawdrikh, ed. and tr. C.N.

Seddon, Baroda 1931-4, i, 406). The Shahid, who

had escaped to Mecca, was detained there and was

kept in prison for 40 days. One account has it that

he was then sent by ship to Istanbul, where he was

killed without being brought before the sultan, and

his body thrown into the sea. According to a second

account, the Shahid's captor killed him shortly after

the two of them had landed in Anadolu. This account

adds that the Shahid was buried at the spot where

he had died and that a shrine (kaba) was erected

over his grave. The date of his death is given by:

965/1557-8 or 966/1558-9. In Ramadan 975/March

1568 he was already being referred to as al-Shahid

al-Thani (al-Madjlis, Bihav al-anwar, cvii, 181).

The Shahid is credited with over 70 works. They
deal with a variety of topics, including tafsir, hadith,

grammar and kalam; but his main contribution to

Sh'i literature was in the realm of fikr. His major

works are in the form of commentaries, particularly

on the writings of the MuhaKki', the 'Allama (see

AL-HILLI] and al-Shahid al-Awwal [see MUHAMMAB B. 

MARK]). These works are noted for the clarity of their

exposition and argument, as well as for their use of

al-ghar al-mazjadi, a method of interweaving the text

with its commentary in such a way that the two

together form a smooth and coherent whole. This

method is employed in some of his best-known works:

the early Rascl al-qinân ft ghar irgdâd al-adhdh, a

commentary on a work of the 'Allama which the

Shahid did not complete; the Muhakk, the 'Allama (see

AL-HILLI] and al-Shahid al-Awwal (see MUHAMMAB B. 

MARK). These works are noted for the clarity of their

expression and argument, as well as for their use of

al-ghar al-mazjadi, a method of interweaving the text

with its commentary in such a way that the two

together form a smooth and coherent whole. This

method is employed in some of his best-known works:

the early Rasal al-qinân ft ghar irgdâd al-adhdh, a

commentary on a work of the 'Allama which the

Shahid did not complete; the Muhakk, the 'Allama (see

AL-HILLI] and al-Shahid al-Awwal (see MUHAMMAB B. 

MARK). These works are noted for the clarity of their

expression and argument, as well as for their use of

al-ghar al-mazjadi, a method of interweaving the text

with its commentary in such a way that the two

together form a smooth and coherent whole. This

method is employed in some of his best-known works:

the early Rascl al-qinân ft ghar irgdâd al-adhdh, a

commentary on a work of the 'Allama which the

Shahid did not complete; the Muhakk, the 'Allama (see

AL-HILLI] and al-Shahid al-Awwal (see MUHAMMAB B. 

MARK). These works are noted for the clarity of their

expression and argument, as well as for their use of
al-Awwal's al-Lumca al-dimashkiyya. Among the themes which the Shahid elaborated was that of the fully qualified jurist (faqih) as a general representative (na'ib 'amm) of the Hidden Imam and the repository of judicial authority within the Twelver Shi'ite community during the Imam's occultation. In line with this position, he insisted on the jurist's right to conduct Friday prayers and to collect and distribute the Imam's shares of zakat (income). He also argued against blindly following the legal judgments of deceased jurists (utad ghadar taklid al-amwdt/al-muajtahid al-mayyit).

Bibliography (in addition to the references given in the text).

Among the themes which the Shahid elaborated was that of the fully qualified jurist (faqih) as a general representative (na'ib 'amm) of the Hidden Imam and the repository of judicial authority within the Twelver Shi'ite community during the Imam's occultation. In line with this position, he insisted on the jurist's right to conduct Friday prayers and to collect and distribute the Imam's shares of zakat (income). He also argued against blindly following the legal judgments of deceased jurists (utad ghadar taklid al-amwdt/al-muajtahid al-mayyit).

2. Studies. M.A. Meyers, History of the city of Gaza from the earliest times to the present day, New York 1907; T.E. Dowling, Gaza, a city of many battles, New York 1915; 'Abd al-Arif, T'arikh Ghaza, Jerusalem 1943; U. Heyd, Ottoman documents on Palestine 1552-963/1555 when he went as governor of Yemen, and was then in Egypt, but was dismissed from his post as governor in 973/1565 and died shortly afterwards. His habit of carrying with him a peregrine falcon gave him the name of Shahid, by which the family was subsequently known. For further details, see Musafar al-Ja, 'ara Shahin.

2. His son Ridwan took charge of Ghaza whilst his father was away from it. In 973/1565 he was appointed governor of Yemen, and combatted there the Zaydi Imam, the Isma'ilis and local tribal chiefs. His lack of success in the difficult situation led to his dismissal and imprisonment at Istanbul in 974/1566. He was later passed over as governor at Ghaza, in Habesh, at Basra and in Diyar Bakr, taking part in the war against Persia in 987/1579. Three years later he became governor of Anatolia, where he died in 993/1585. Amongst public works of his in the province of Damascus are mentioned his reconstruction of fortresses, especially that at Bayt Djibrin, for the protection of caravans and travellers.

3. His son Aymad (d. 1015/1606) governed Ghaza for ten years. Through his connections with the court at Istanbul built up a network of official posts for his family, with his son Suleyman becoming governor in the sanjad of Jerusalem, and his brother in the sanjad of Nablus. Residing in Damascus, he had a reputation as a maecenas for poets and scholars.

4. On his retirement in 1009/1600, his son Muhammad succeeded him in Ghaza. In 1022-3/1615-16 Muhammad took part in an expedition led by the governor of Damascus against the Druze chief Fakhr al-Din Ma'n II (q.v.).

5. His son Hasan (d. 1054/1644) was likewise governor in Ghaza, and was succeeded by

6. His son Husayn (d. 1071/1660), who had previously been governor of Jerusalem. Esf'afal Celebi visited Ghaza in 1059/1649, and describes Husayn as a generous man, himself a writer of poetry and history, who was tolerant towards Samaritans, Jews and Christians of the various Eastern Churches. These latter attitudes may have cast doubts on his loyalty, for in 1073/1662 he was arrested, jailed at Damascus and executed on charge that he had failed in his duties as amir al-baqidi.

7. His brother Musta replaced him, but the sources say little about him, and he appears to have been the last governor of the Al-Shahfn.

The extant sources do not specify the names of the Al-Shahfn governors, nor do they register their names amongst the 41 timar holders in Ghaza; on the other hand, the several palaces, mosques, schools and cemetery that belonged to them (some still in use today) are described at some length.

[M.A. AL-BAKHTI]

SHAHÎN DIZH [see ŞA'IN KAL'TA]

SHAHÎN, LALA, according to the early Ottoman
cronicles, the preceptor or tutor (lala) of the
Ottoman sultan Murâd I [q.v.] and the first to
occupy the post of the beşlerge [q.v.] of Rumelia.
Perhaps he can be identified with Shahîn b. 'Abd
Allâh (d. 645/1249), servant of Sultan Orkhan [q.v.]
in 1360; or also with the military leader 'osâºum, who, according to a Greek contemporary cron-
icle, supported the Lord of Yanina Thomas Preemibos against the Albanians in 1380. Shahîn crossed from
Anatolia to Thrace in the 1360s, probably accompa-
nying Murâd when he was still a prince, and fought
against the Christians successfully, especially in
Bulgaria, where he conquered several fortresses and
towns. In 1388 he invaded Bosnia and, according to
Naghî [q.v.], he died shortly afterwards.

schichte der Türkenvölker in Rumelien (14.-15. Jahr-

[ELIZABETH A. ZACHARIADOU]

SHAHÎN-I ŞİRr/RÁZI, 14th-century Judeo-
Persian epic poet, the most brilliant name in Judeo-
Persian original literature. Mawlânâ ("Our Master") Shahîn ("the Falcon", a name in common use
among the Jews of Persia at that time) wrote under one of the Mongol Ilkâns, Abu Sa'id Bahâdûr
(1316-35 [q.v.]). The comparatively numerous extant manuscripts with miniature paintings can be taken
as a sign of his popularity.

Although influenced by the great epic poets of Per-
sia, Firdawsî and Nâginâm, Shahîn was by no means
epine. The metre he used was the hâzâdî
musaddas maqâzî [—/—/—/—/—/—]. Shahîn himself
gave no titles to his epic poems, and only not very
informative words like šarh ("explanation"); taťfîr
("commentary") or [B.L. Or. 4742, fol. 3a, l. 1] Kâdâ
az taťfîr-i Šâhîn (in other manuscripts Kâdâ-i Şâhîn
and Dâstûr "Story occur). The titles chosen by Wil-
bemar Bacher have been commonly adopted, viz.
the Book of Gen (now mostly Berehî-nâm), the Book of
Moss (now commonly Mûsâ-nâm), the Book of Ardâshir,
consisting of two parts, Megillat Esther and the
story of Şêrêh and Mahzad, and the Book of Ezra. The
brief epic King Kishwar, the story of King Kishwar and
his seven pieces of advice to his son Brahâm (known
in only one manuscript, ENA 396, fols. la-b, The
Jewish Theological Seminary of America in New York)
could be by Shahîn, but it is doubtful. If we were gen-
une, it would be the only purely Persian work by
Shahîn devoid of any specific biblical influence.

The sources of Shahîn were the biblical books (as
for the Pentateuch, almost exclusively the non-lega-
Try-sacred part), non-biblical Jewish material (midrash, folk-
traditions), and Islamic elements.

SHAHîN-MEDJİ (or ŞEHîN-MEDİ) (T.), the term
for an Ottoman writer of literary-historical
works in a style inspired by the Şehîn-nâm, of the
Persian poet Firdawsî [q.v.], i.e. works composed in
Persian, in the maqâmaw form of rhymed couples in
the mutakâbir metre, describing in fulsome terms the
military exploits of the reigning sultan. The first Ot-
toman compositions in the Şehîn-nâm genre date from
the mid-9th/15th century, as occasional works writ-
ten for presentation to the sultan (cf. W.-D. Herdt,

An official, salaried post of Şehîn-medjî ("writer of
Şehîn-nâm") was established by Suleymân II (1520-66)
in the 1550s as a form of court historiographer. Of
its five incumbents, three produced between them at
least fifteen known works, largely chronicled the
military and imperial achievements of contemporary
Ottoman sultans, particularly Suleymân, Selim II
(1566-74), and Murâd III (1574-95). In line with deve-
loping literary taste, many of the later works were
composed in Ottoman Turkish prose rather than Per-
sian verse. Most of the manuscripts (few of which
have been published) were richly illustrated by palace
artists with specially commissioned miniature paintings
and were intended as objets d'art for the sultan's private
collection. The Şâhîn-nâm of the first Şehîn-medjî, "Arsîf (or "Arsîf, d. 969/1561-2), contains 62 mini-
atures (Esîn Atil, Şehîn-nâm, the illustrated history of Sultan Mohammed, New York 1986).

Principal among the works composed by the third
Şehîn-medjî, Lökmanî (in post ca. 1569-96), are: Züycâtî t-tewdrikh ("Essence of history") (completed 991/1583), a world history in Ottoman prose; the two-volumed Hüner-nâm, ("Book of accomplishments") (992/1584
and 996/1588), also in Ottoman prose, on Selim I
(1512-20) and Suleymân II respectively; the three-
volumed Şâhîn-medjî ("Book of the Şâhîn") of Shahîn-2 (991/1581-2, 1001/1592, and 1004/1596), in Per-
sian verse, on the reign of Murâd III; Kîşîfetî t-insânîyye fi şemâlî 'l-Ümânmâyû ("Description of the features of the Ottoman sultans") (987/1579), essentially an album of portraits of the sultans with accompanying text in Ottoman with physiognomical observations (facsimile text in Kîşîfetî t-insânîyye fi şemâlî t-Omânîyye, ed. M. Tayşi, Historical Research Foundation, Istanbul 1987).

Lökmanî's successor Ta'liî-kâlâm, (in post ca. 1590-
1600) composed a Şahîn-medjî ("Book of descrip-
tions") (1002/1593) in Ottoman prose on the strengths
of the Ottoman dynasty (cf. C. Woodhead, "The present
terror of the world" Contemporary views of the Ottoman
empire c. 1600, in History, lxxiii/234 [1987], 20-37; and
narratives of the Hungarian campaigns of 1593-4 and
1596, in Ottoman prose and verse respectively (for
the former, see Woodhead (ed.), Ta'liî-kâlâm's Şehîn-nâm-i hümâyûn on the Ottoman campaign into Hungary, 1593/94, Berlin 1983).

The post lapsed soon after 1600 for reasons which
are unclear but probably related to the changing role
of the sultan, which rendered the Şehîn-nâm style inap-

propietar. Ad hoc commissions of şênâmen were made by Othmân II (1618-22) and Murâd IV (1623-49), but the permanent position of şehrmandji was not revived.

(Christine Woodhead)

SHAHR (p.) “town”. The word goes back to Old Persian xiya- (cf. Avestan shrâAna, Sanskrit kṣatā-; all from the same root as New Persian xâh [q.v.], “kingdom, royal power”, hence “kingdom”. The latter meaning is still the usual one for Middle Persian xâh and it survives in the Şähnâma, especially in set phrases such as xâh-i Ėrân (used metris causa instead of Ėrân-xâh “kingdom of the Aryans”, the official name of the Sânsânid empire, etc., but already in the earliest New Persian texts, the usual meaning, and soon the only meaning, is “town”. The depreciation of xîa- / xâh from “kingdom” to “town” runs parallel to that of dehaya/ dîh /dîh from “land, country” to “village”. But it is also possible that xâh in the sense “town” is merely a curtailment of xâhristân [q.v.].

The Persian word was borrowed into Turkish as xâh / xâr and figures as the final component of the names of many Turkish towns.

Biography: See that in SAHRISTAN.

SAHRANGIZ (p.) or SHAHRANGIZ (n.) “upsetting the town”, a genre of short love poems on young craftsmen, often related to the bazaars of specific towns.

1. In Persian

In Persian literature, the genre is usually referred to under the latter name. E.J.W. Gibb’s contention that the genre was invented by the Turkish poet Mešhīf [q.v.] of Edirne (HOP, ii, 232), was challenged already by E.G. Browne who, pointing to Persian specimens mentioned by the Safawid anthologist Sâm Mîrzâ [q.v.], concluded that “though they were probably written later than Masâfî’s Turkish Şâhâr-angîz on Adriapole, there is nothing to suggest that they were regarded as a novelty or innovation in Persia” (LHP, iv, 237). Since then, many examples of medi- aeval Persian poems on craftsmen have come to light, showing that şahrangiz poems can be attributed to early poets like Rûdâf, Ksâlî and Labâf [q.v.]. The genre was very popular during the Safavid period, when it was most often used for quatrains (see the examples mentioned by Meier, Makhût, 94). The Dîdân of the 11th-12th century poet Mâsû’di Sa’dî-i Salâmân [q.v.] contains 93 short poems (mukâatâ’â) on the subject, apparently written as a coherent collection although it is not clear whether or not a particular city was envisaged.

The formula of the genre consists of three main ingredients, each of which has had a separate exis- tence in the Persian tradition. The first element is the motive of the uproar created in the city; it occurs in one of Sanât-i’s poems, each of which has a separate exist- ence in the Persian tradition. This found an echo in several later ghazals, e.g. by Anwarî (Dîdân, ii, 864: bâz dişt ãn samân-i bâda-fûrîkî xâhîr az wâl-i osûda parist-i bâh and Hâfsî (Dîdân, i, no. 3.3; lâyîk-i xistân- kâr-i xâhîrighâb). Secondly, the beloved is specified as a kind of craftsman, an artist (e.g. Sâfî’s quatrain on a butcher (kâshâb; cf. Dîdân, 1146, and J.T.P. de Brujin, Of piety and poetry, Leiden 1983, 6-7). Thirdly, there were the representations of a panegyric or a satire, of a group of people belonging to a single court or city. Early specimens of this type are Masû’di’s Sa’dî’s ma’hsâtî on the court of Lahore (Dîdân, 562-79/ii, 787-817) and Sanât-i’s Xsr-nâmâ-yi Bâlûq (in Ma’hsâtî-yi Ǝukâm Sanât-i, ed. Isfahâni-Mu’dariss-i Radwân, Tehran 1348- 69/1962, 147-78).

As a fully developed genre, the xâhrangiz became particularly fashionable in late Timurid and early Şafawî literature [q.v.]. Mîr ‘Alî Şîr Nâvâ’î [q.v.] made mention of it for the first time in his taqdîrî, the Ma’dîlîs al-nafa’tî, with reference to Sayyîf Bukhârî (d. 909/1503), who made a collection of xâhrangiz poems in ghazal form, entitled Sanât-i al-badd’î (Gulcfn-i Ma’ânî, iii, 348). Lişânî of Şîrâz was particularly renowned for his quatrains in this genre which together form a city-panegyric of Tabrîz, known as Ma’dîlî al-nafa’tî or Şahrangiz-khatî-e Tabrîz (ed. and French tr. Bricteux; ed. Gulcfn-i Ma’ânî, op. cit., 96-161). The genre was used for satire by Ǝâglî of Khrâsan (d. 932/1525-6), against Harât, and Haršt Isfahânî (d. 971/1563-4) against the province of Gîlan (cf. Ryppa, 297, 303-4, with further references). In the 11th/17th century Sâyîdâ Namefî described the crafts- men of Bâlûq in this manner (cf. A. Mîrozî, Sayyîd Namefî i yego mesto v istorii tadzhikskoj literatury, Stalinabad 1955, 143 ff., 161). Various poetical forms, and even prose, were used for writing xâhrangiz. It was also a favourite subject in the Indian Subcontinent with poets writing in Persian and Urdu (see section 3., below).

(1.J.T.P. de Brujin)

2. In Turkish

This genre was popular from the early 16th to the early 19th century in Dîdân (classical Ottoman Turkish) poetry, serving mainly to praise a major city and its beauties. In modern Turkish, it is rendered as yehren- giz. The genre is represented by about fifty major poems, of which less than forty are extant. The special place it holds in the Ottoman tradition has led numerous 20th-century Turkish scholars to the erroneous assumption that the xâhrangiz existed only in Ottoman Dîdân literature.

Usually written in the stanzaic form of the ma’hsâtî (rhyming couplets) and always in arûd metres, the xâhrangiz conforms, on the whole, to a special se-
quence of internal elements, starting with a brief munadāt (doxological supplication) and/or nā'ī (encomium of the Prophet), followed by the sabhā-i tālīf (reason for writing), descriptions of the city's natural setting and aspects of its life, general citations of the city's beautiful women or men and sometimes its notables, ending with a khaṭima (epilogue) in which the poet offers prayers to God for the protection of the city's beauties and praises his own poetic accomplishments.

Most of the major shahrangiz works in Ottoman Turkish take as their subject such principal cities as Istanbul, Bursa, and Edirne. Among other cities feature this genre are Skopje, Belgrade, Yenikız, İzmir, Rize, Şanlıurfa, Simón, Manisa, etc. The shahrangiz often provides vivid descriptions of urban life as well as information about topographical characteristics of individual cities.

Many works in this genre were commissioned by or dedicated and presented to prominent patrons. Their length ranges from 70-odd couplets (Hayrettin on Edirne) to more than 1,600 couplets (Sa’dī on Istanbul, composed in Persian) to 3,600 couplets (Dhāfī on Adrianople).

The first shahrangiz is by Mesḥīf [q.v.], who wrote it ca. 918/1512 about Adrianople. E.J.W. Gibb translated the title as "city thriller", pointing out that all such works in later periods bore the same title, whence the name of the genre, and credited Mesḥīf with the invention of the shahrangiz as a literary form. The humolous element in Mesḥīf's work, which Gibb singled out for its originality, came to be a recurring feature of most of the subsequent works in this category. Many of them contain either a romantic description of a city's beautiful young men, often cited by name and profession—less frequently, young women were listed—or humorous, sometimes satirical, characterization. Several shahrangīz (principally Fehm's work on Istanbul in the 17th century) are explicitly pornographic.

Variations of the genre include the sevābādāh-nāme (tale of adventure), where the poet tells the story of an affair with one beautiful person or stories of four people. Some concentrate on a single profession, as in the ēmīl-nāme ("Book of dancers") by Enderūnğ Fādīl (d. 1810), while others, like his zenāt-nāme ("Book of nations and ethnic groups"); describe women of a wide variety of nations and ethnic groups. A few are essentially verified lists of the names of urban neighbourhoods or musical modes or types of tulips.

The best Ottoman shahrangiz, according to von Hammer-Purgstall, was Lāmī’s [q.v.] work on Bursa written on the occasion of Sultan Süleyman the Magnificent's visit in 928/1522. Although most specimens of the genre are not notable for literary merit, Lāmī’s shahrangiz, the first substantive part of which provides vivid descriptions of Bursa, displays poetic virtuosity.

(TALAT SAIT HALMAN)

3. In Urdu

In Urdu literature, the term shahrangīz is used only rarely if at all. The most common designation, also employed in Persian and Turkish, and identical in meaning with shahrangīz, is shahr-ādgh (Persian: shahr-ādgh). The tradition of the Urdu shahr-ādgh is markedly different from the one found in Persian and Turkish poetry. The type of verse which goes by that name in the other two languages is generally a poem describing the author's attraction for handsome arti-

San boys in a city. In Urdu, the number of such poems is exceedingly small. It is limited to strands seen in the writings of Mirzā Dżā'far ‘Ali Hasrat (d. 1206/1791-2) see Kulliyat-i Hasrat, ed. Nūr al-Hasan Hāder, Lahore 1966, 382-91; Mir Hasani (d. 1201/1786), Mir Muhammad Taṣṭī Mīr (d. 1225/ 1810 [q.v.]); and a few other poets, all of whom seemed to have based their compositions, by way of imitation, upon similar models in Persian. Unlike these examples, the standard shahr-ādgh in Urdu is a socially motivated poem. Its main purpose is the portrayal of a city in disarray. The picture it paints reflects the breakdown of the established order, the dislocation of the social, economic and moral life of the people, and the topsy-turvy nature of things. One of the major conventions of the shahr-ādgh is to name a series of professions and to describe the state of affairs governing the individuals associated with each of them. The shahr-ādghs are determined by the nature of their content, rather than by any separate form, and many of them appear in the works of the poets under titles other than shahr-ādgh. They could be found in any of the tradions of the genre forms employed, though it is possible that some forms might have been favoured more than others during a particular period.

Characteristic of the genre, at least during its pre-1857 phase, is the use of satire and ridicule as weapons of criticism—a feature that makes it difficult sometimes to draw a line between a shahr-ādgh and a hadīf ("insult poem").

The real beginnings of the shahr-ādgh may be traced to the 18th century, marking the decline of Mughal power. Following the death of Awrangzib in 1707, the Mughal empire collapsed into anarchy and disintegration. In 1779 the Persian monarch Nādir Shāh (r. 1736-47 [q.v.]) invaded a weakened Mughal empire and sacked Dihlī, and it was again sacked in 1756 by Ahmad Shāh Durrānī [q.v.]. From the time of Shāh ‘Alam II (r. 1759-1806 [q.v.]), the Mughal ruler was merely a figurehead maintained by one or the other power. The poems in which the effects of these developments found direct interpretation received the name of shahr-ādgh.

Nothing can be said with certainty regarding the earliest shahr-ādgh in Urdu. It has been suggested that the first poet who attempted this kind of verse was Mir Muhammad Dżā'far, better known as Dżā'far Zalāfī (d. between 1125-28/1713-16). The latter has earned general notoriety as the author of obscene verses, which has distracted attention from the social aspect of some of his writing. His poem Naukari "Service", and Dastur al-salām dar ḥulūfiya zamāna-yi nā-hanfiya "A guide to the incompatibility of these rough times", which are cited as shahr-ādghs, represent satirical statements commenting on the hardships of employment and on the distortion of social and moral values.

With the successful efforts led by Mirzā Muhammad Rafi' Sawdā (d. 1195/1781 [q.v.]), the shahr-ādgh acquired increased recognition. His two shahr-ādghs, one in the form of a kasda and the other entitled Mukhammas dar tadāva-yi Shāhdhajhānābād "A mukhammas on the destruction of Shāhdhajhānābād", may be regarded as real masterpieces. Both are comparatively lengthy poems, and constitute a unified theme dealing with the devastation of Dihlī, the economic adversities of the people, and the contemporary social and moral decay.

Mir Muhammad Taṣṭī Mīr, who was a contemporary of Sawdā, composed several poems which resemble the shahr-ādgh. One of these poems is the Mukhammas dar ḥal-i ḥukkār "On the condition of the
army", which describes not only the plight of the soldiers but also points out, with bitterness and sorrow, the pitiable state of the court and nobles. A number of shahr-dshobs are significant because of their historical interest. These include poems by Mirzâ Qâfar 'Alî Hasrat and Kiymân al-Din Kâ'îm (d. 1208/1793-4), referred to respectively as Muhâmmad dar ahiwâl-i Dhâjanâbâd "On the condition of Dhâjanâbâd", and Mukhâmmad. The first of these poems describes the destruction of Dihlî and its citizens caused by the invasion of Aḥmad Shâh Durrânî, and the second contains a denunciation of Shâh 'Alî II for his role in conducting the battle of Sâdâtâbâd (729/1330), in which he, with the support of the Marâthas [q.v.], attacked and defeated Dîbûtâ Khân, son of Nadîjîb al-Dawla [q.v.], and leader of the Rohilla Afghânîs.

Other shahr-dshobs, which have won critical approval, comprise Zuhûr al-Dîn Hâtim's (d. 1197/1783) Muhâmmad Kalandar, Kâliyân Bâshsh Djûrât's (d. 1224/1810) Muhâmmad-i tarâf-band, and Wâlî Muhammad Nazîr Akhbarâlâbî's (d. 1246/1830) work mentioned as Dânya-yi dîn ke tamâjân "Scenes of the contemptible world". Hâtnâbâd is mentioned as an auspicious place in numerous poems dealing mainly with the trials and tribulations suffered by Dihlî during that time. These poems have been called shahr-dshob although they do not subscribe entirely to the classical pattern of the genre followed by earlier masters. An important element which is missing in them is the narrative dealing with different professions—an essential feature of previous shahr-dshobs. In fact, the shahr-dshob of 1857 are mere elegies mourning the passing away of Mughal Dihlî and the end of an era.

The poems connected with the fortunes of Dihlî at this time are contained in two collections named Fûgân-i Dihlî "The lament of Dihlî", and Inshâbâb-i Dihlî "Revolution of Dihlî", also known as Fâyûd-i Dihlî "The cry of Dihlî". The first-named work was edited by Tafaqîl al-Hasyân Kawkab, and was published in 1280/1863; the second, containing poems reproduced from the former work together with some other verses, came out in 1932. Included in Fûgân-i Dihlî is the famous musâdas by Nâwâu Mirzâ Dâgh (d. 1322/1905) regarding the demise of old Dihlî, a poem full of pathos, which may be regarded as one of the finest pieces composed upon the subject. SHAHRASUB [see SHAHRANGIZ].

AL-SHAHRASTANI, A. 'l-FATHI MUHAMMAD b. 'Abd al-Karîm b. Aḥmad, Taqî al-Dîn, thinker and historian of religious and philosophical doctrines, who lived in Persia in the first half of the 6th/12th century. He received other honorific titles such as al-Afdâl or al-Imâm. Besides a few landmarks, little is known of his life. Al-Sahrâstânî (the customary Arabic vocalisation is retained here) was born in the small town of Shahrâstânî, on the northern frontier of Khurâsân, not far from Nasî, at the edge of the desert of Kara Kum (currently in the Republican of Turkmestan) [see SHahrastanî (6)]. His contemporary al-Samî'î is supposed to have written (according to Ibn Khallikân): "I asked him the date of his birth, and he told me: 479/1086-7." Other ancient authors give the dates 467 and 469, but the testimony of al-Samî'î seems authoritative. Nothing is known of his family; however, the attribution by Yâkût of a kunyat to his father (Abu 'l-Kâsim) and to his grandfather (Abu Bakîr) could indicate a privileged background.

After what was definitely a very substantial traditional education, he was sent to the prestigious metropolis of Nîshâpûr. It was there that he embarked on his intellectual education, he was sent to the prestigious metropolis of Nîshâpûr.

SHahr-dshob, MUKHÂMMAD, Kalandar, ASSAD B. MUHAMMAD AL-MAYHANI (d. 523/1129 ac-
according to Ibn al-Athir, x, 660; but 520 according to Qalâl Humâ'î, Gazzâz-nâma, Tehran 1318/1939, 308) was then teaching at the Niâyâmî. With Mayhânî's assistance, al-Shâhrastânî obtained a post at the Niâyâmî. For three years, and with considerable success, he devoted himself to teaching, preaching, disputations. Around 514/1120 he returned to Persia.

The Saljûq ruler of Khurâsân Sandjâr had recently taken there, in 511/1118, the full title of sultan. Marw, his capital, was a magnet. Through the good offices of Naṣîr al-Dîn Abû 'l-Ḵâsim Ḍalânî, b. al-Muṣṭafâ al-Mawzî, who was from 521 to 526 the chancellor of the caliph al-Râsid I (diwdn al-râsidî), al-Shâhrastânî was appointed ndb of the chancellery (diwân al-raṣâlî). He even became a close friend of Sandjâr and "his confident" (ṣâhîb sîrîh). However, al-Shâhrastânî ultimately returned to his native village. It is not known when, or why. The fact remains that there was a succession of tragic events in the year 548/1153. The sultan was taken prisoner by the Ghuzz of Nishâpûr. He was then released, and the testimony of al-Shâhrastânî, relative to Ibn Khallîkân, that al-Shâhrastânî died in his native village "towards the end of Sha'bân 548 (November 1153)".

Al-Shâhrastânî was responsible for a score of works. See the precise and detailed study by Nâţînî, al-Shâhrastânî, dânish-nâma, Tehran 1360. Various modern editions, with some different readings, have been published.

1. al-Milâl wa 'l-nilâh, which according to the author, was written in the year 521, i.e. 1127-8 (ed. Bâdrân, i, 630 ff.; see Humâ'î, Gazzâz-nâma, 31 and 32). There are numerous editions, including two critical ones: W. Cureau, 2 vols., London 1842-6; and Muḥammad Fâth al-Âlî b. Dja'far al-Musawf, chief (ndb) of the Imâmî Shî'î community of Tîrmîz. This is a thorough criticism of Avicennan philosophy. It is supposed to comprise seven "questions", but at the end of the fifth (118), the author bemoans the serious troubles of the time and comes to an abrupt end. The circumstances evoked could be the defeat of Sandjâr by the Kara Khâṣîyân in 536/1141.

2. Maṭâ'î al-arzû wa-maṭâ'î al-âbrân, edited facsimile of the urânîs, with introduction and index, 2 vols., Tehran 1369/1990. The text comprises 343 folios, or 868 pages with 25 lines. It is a Kur'ânic commentary. After an autobiographical preface come the 12 chapters of an introduction to the study of the Kur'ân, then a simple commentary on the first two sûras. The first volume (up to II, 122) of the lost autograph manuscript had been composed between 538 and 540. It is not known whether, as is probable, the author continued beyond Sârâr al-Bâkî.

3. Maṭâ'î al-ṣawâîq, ed. A.H.S./1939. The book is divided into 20 chapters, each of which examines discussions of one of the "foundations" (ka'budât) of theological science. This classic work has been understood as reviewing the attainments of Muslim theology. In fact, it sets out to show its limits. "The furthest steps of the people of kalâm" cannot be exceeded. Should the sum total of theology not be an admission of failure?

4. Muṣâra'ât al-falâṣîfîa, ed. Suḥayr Muḥammad Muḥštâr, Cairo 1996/1976. Explicitly posterior to the Milâl (14), this little book is dedicated to Maṭâ'î al-Dîn Abû 'l-Kâsim 'Âli b. Ḍa'far al-Musawf, chief (ndb) of the Imâmî Shî'î community of Tîrmîz. This is a thorough criticism of Avicennan philosophy. It is supposed to comprise seven "questions", but at the end of the fifth (118), the author bemoans the serious troubles of the time and comes to an abrupt end. The circumstances evoked could be the defeat of Sandjâr by the Kara Khâṣîyân in 536/1141.

5. Maṭâ'î al-arzû wa-maṭâ'î al-âbrân, edited facsimile of the urânîs, with introduction and index, 2 vols., Tehran 1369/1990. The text comprises 343 folios, or 868 pages with 25 lines. It is a Kur'ânic commentary. After an autobiographical preface come the 12 chapters of an introduction to the study of the Kur'ân, then a simple commentary on the first two sûras. The first volume (up to II, 122) of the lost autograph manuscript had been composed between 538 and 540. It is not known whether, as is probable, the author continued beyond Sârâr al-Bâkî.

6. Maṭâ'î al-ṣawâîq, ed. A.H.S./1939. The book is divided into 20 chapters, each of which examines discussions of one of the "foundations" (ka'budât) of theological science. This classic work has been understood as reviewing the attainments of Muslim theology. In fact, it sets out to show its limits. "The furthest steps of the people of kalâm" cannot be exceeded. Should the sum total of theology not be an admission of failure?

12. Shârâf al-ṣawâîq, ed. A.H.S./1939. The book is divided into 20 chapters, each of which examines discussions of one of the "foundations" (ka'budât) of theological science. This classic work has been understood as reviewing the attainments of Muslim theology. In fact, it sets out to show its limits. "The furthest steps of the people of kalâm" cannot be exceeded. Should the sum total of theology not be an admission of failure?
al-Shahrastanî is hostile to philosophy. But the Milâl has yet another object. Up to and including the present day, this book owes its immense reputation to the treatment of religions external to Islam: Christians and Jews, Magyars and Manichaens, hermeticist Sabians, disciples of ancient Arab cults and of Hindu sects, etc. Not one of these chapters is of inferior quality. As a carefully crafted whole, they remained, until the 18th century, totally unique. They represent the high point of Muslim histories of religion. Finally, the rediscovery of the Maqâfîh al-asrâr should be taken into account. Each verse, before being clarified by the commentary, is a separate unit, a breathing space, a note, a parenthesis, a digression, a chapter, a passage, a commentary, which could be described as classical. This tafsîr is situated in the very first rank of Qur'anic commentaries, equal and sometimes superior to those of al-Tabarsi or al-Razzi in terms of precision, breadth, antiquity and variety of sources quoted; lists of the sîras in pre-'I'thimânîc collections, Sa'id b. DhuWAYb, al-Hasan al-BaKî, Abu 'Ubayda, al-FARRa', al-ZajîHÎdJÎdJÎd and many others.

Al-Shahrastanî does not only expound the thought of others; he has his own, which is immediately apparent in the refutation of Ibn Sînâ; he devotes numerous monographs to this purpose, attacking the philosopher from every angle. But the full expression of al-Shahrastanî's thought is to be sought elsewhere, sc. in the Maqâfîh al-asrâr. Usually, in fact, the above-mentioned long classical commentary is followed by the unfolding of “mysteries” (asrâr). The author insists on presenting them as received from a tradition, but the manner in which they are set forth bears the distinct mark both of his personal genius and of his deep-rooted conviction. These, scattered amongst consistent passages, written in a compact, sometimes vehement style, permit the reconstruction of a vision of the world.

At the summit is God, the One, of Whom we know nothing of the qualities except the ipseity (huwayya). The world of the Divine Order is prior to that of Resurrection (domain inchoative, tarattub), and the opposition of beings, and the opposition (asrâr). The author insists that his great-uncle must have been a pupil of his grandfather, his main master, who has received and accepted. Since when? A long hierarchy (taddîd), of beings, and the opposition (asrâr). But later, he was generally considered to be a maqâfîh, contemporaries of al-Shahrastanî, fully adheres there to the positions described above, and some more particular points establish beyond doubt that his thought was at that time Ismâ'îlî. He does not confine himself, either to recognising the prerogatives of the Ahl al-Bayt with regard to the Kur'ân, or to integrating Ismâ'îlî elements into a Sunnî theology. He propounds a global religious view, which he has received and accepted. Since when? A long time ago. It is not only the Maqâfîh and the Maqâfîh that are impregnated with Ismâ'îlîm, but the Milâl and the Nihâyâ also bear subtle hints of it.

Should our author therefore be seen as a secret but licensed member of the Alawî organisation? Nasîr al-Dîn al-Tusi, in a pro-Ismâ'îlî monograph (Sâyîr asrâr, in Maqâfîh al-asrâr, tehrân 1355/1936, 46) writes that his great-uncle must have been a pupil of the “‘alâh lâdî-dâr Tâjî al-Dîn Shahrastanî”. But this title does not seem to have been employed by the Ismâ'îls of Persia (cf. Daffari, 227, 336, 394). The incidental and belated statement of Tûsî is thus to be treated with caution.

(G. Monnot)

AL-SHahrastanî, Sayyid Muhammod ‘Ali al-Husaynî, known as Hibat al-Dîn al-Shahrastanî, ‘Irākî Shī‘î religious scholar and politician. He was born at Sâmarrâ’ on 20 May 1884. His pedigree, reaching back to A1I b. Abr Talib, is given by Khâkâm C, 39 and 64. The family’s descent from families with a long tradition of religious scholarship, with branches in ‘Irâk (including the ‘Al Hakîm), Persia and elsewhere. Two works by Hibat al-Dîn concerning the history of his family apparently remained unpublished (Tîhrân, 1413; Khâkâm, 78, nos. 39 and 64).

After the death of his father in 1902. In Nadjaf, he followed the death of his father in 1902. In Nadjaf, he returned with the family to his native town, Karbala’ and returned with the family to his native town, Karbala’. Hibat al-Dîn began his religious studies there, but left Karbala’ for Nadjaf following the death of his father in 1902. In Nadjaf, he studied with some of the most prominent mujâhidûns of the time, such as Sayyid Muhammod Kâzîm al-Yazdî and Sayyîh al-Shârî’s al-İsâhâni, and especially with Multa Muhammod Kâzîm al-Khurâsânî (see below), known as Akhûnd. In addition to the traditional fields of study, Hibat al-Dîn soon developed a special interest in the modern natural sciences and in the inter-
pretation of its recent findings according to some Muslim modernist writers in India and Egypt. The first and most important fruit of his endeavours in this respect was a book on astronomy [see *ilm al-hay'a*] called *Al-Hay'a wa l-Islam*. It was published in Baghdad in 1910, went into several editions, and was translated into some other languages (for the genesis of this book see Husainy, *takdim*, 13-14; for a list of translations, *ibid.*, 7). In March 1910, Hibat al-Din started the publication, in Najaf, of a monthly periodical called *al-Im*, the first Arabic journal to appear in that town (*Abd al-Razzak al-Hasani, *Ta'rikh al-shafa al-irankiya*, i, *Sidon* 1971, 30). During the short period of its publication (the number of its issues reaching only 21 in total), it became an important platform for the reformist ideas and proposals which were discussed in the circle around Khurasanī. Among these topics was that of *nakl al-dinawac*, i.e. the transference of corpses to the Shiʿī shrine towns and their burial there. This practice was sharply criticised as a *bid'a* by Hibat al-Din in *al-Im* (on the background of his criticism and on the ensuing controversy over this issue, see Nakash, esp. 192-7). Being ardently in favour of the constitutional movement in Persia [see *nurrisī*, iv], he became involved in the factional strife between its supporters and critics in Najaf (see Khakhani, 79-90; Luizard, 243 ff.).

Shortly after Khurasanī's death in December 1911, Hibat al-Din stopped publication of his journal and, in 1912, set out on a long journey to Syria and Lebanon, Egypt, the Hijāz (where he performed the pilgrimage to Mecca), Yaman and India. He returned to ʻIrāq in 1914. Already before the time when, in November 1914, Turkey entered the First World War, Hibat al-Din as well as a number of other Shiʿīs had been approached by Ottoman officials in order to find support for the common, pan-Islamic *dajihād* [q.v.] against the Allies. Hibat al-Din responded with enthusiasm (Khakhani, 69). It is in this connection that he produced, in 1915, a special *fatwa* [q.v.] concerning the friendship between the Muslims and the Germans (German tr. H. Ritter, in *Wege in modernen Irak*, in *Geschichte und Kultur des modernen Iraq*, ii, *Berlin* 1937, 45-8; see *ibid.*, 217-20, for a background, see *ibid.*, i, 128, and *Iraq*, *World War I*., in R. PETERS, ed., *Proceedings of the Ninth Congress of the Union Européenne des Arabisants et Islamisants*, Leiden 1981, 57-71).

After the British had taken Baghdad in March 1917, Hibat al-Din settled again in Karbala'. He soon became involved in the resistance against the British occupation, which culminated in the revolt of 1920 (for his role there, see, e.g. *Abd al-Razzak al-Hasani, al-Janāra al-trākhkiyya al-hubra*, *Sidon* 1972, index 302; Luizard, 405 ff.).

In September 1921, Hibat al-Din became Minister of Education in the second cabinet of *ʿAbd al-ʿRaḥmān al-Nakib*. His term of office was marked by serious tensions between him and the Director-General at the Ministry, ʿṢāfī al-Ḥusaynī (see the latter's *Mudhakirīn fa l-ʾIrāk*, i, *Beirut* 1967, esp. 147-55, and Heine, 57-65). These tensions, together with a number of other factors, led to his resignation in August 1922 (see *ʿAbd al-Razzak al-Hasani, Taʿrikh al-ʿazāzirāt al-irankiya*, 7*Baghdād* 1988, 74-115). From 1923 to 1934, Hibat al-Din served as president of the *Dijārī* Court of Cassation (*makhmāt al-tammiyya*), in spite of the fact that soon after his taking over this position he had lost his eyesight. In 1934-5 he was a deputy (for *Baghdād*) in the Parliament of ʻIrāq. After its dissolution, he chose to withdraw to ʿAziyiyah, where he established, in the early 1940s, the *Maktabat al-Šīrāzdīyay*, a rich scholarly library. On a few occasions, Hibat al-Din later on voiced his opinion in political matters. Thus his visit to Persia in 1955, where he was received by many *ulamā'ir* and a number of high government officials, was generally seen as an attempt to further strengthen the consolidation process between the *Shīʿī* clergy and the Shah after the ousting, in 1953, of the pro-British government (see *Sh. Abd al-Rahman Religion and politics in contemporary Iran*, Aleppo 1980, 75-6). He died in Baghdad on 2 February 1967.

herself was only introduced to the Western world by Galland, and remains there, in her... correspond to that of Gul-canbar. We may note here that Tavernier seems to mention the town of Altun-is to take place on the plain of Shahrazur: "on the places at Shahrazur the centre of the Zamua country, all the faithful will receive their due".

km/36 x 25 miles in area, watered by the tributaries of the Tandjaro river, which flows into the Sirwan. The reference is perhaps to the mountaineers of the Zangid Atabegs (Rich, i, 280), who "are not true Kurds". They are not a proper Kurdish one. The reference is perhaps to the mountaineers of Ahmad and Daylamastan (Yakut). Between 400 and 434/1010-13, scions of the Kurdish dynasty of the Hasanids, ruled at Shahrazur. In the 6th/12th century the Turkomans and the Zangid Atabegs held the district. In the time of Yākūṭ, Muẓaffar-dīn Kūbkūrī, Atabeg of Irīb, had settled himself there. In 623/1226 From Baghdad to Tabrīz were taken by the Hwsna(?) who "are not true Kurds". The reference is perhaps to the mountaineers of Awramān, who still occupy the western slope of the mountains. On the other hand, a Kūsā whom A. von Le Coq met in 1901 at Damascus spoke the Žaza dialect which is not a proper Kurdish one.

The numerous tumuli in the plain of Shahrazur confirm the testimony—of Theophanes as well as of Abu Dulaf—regarding the number of settlements in the region. The most persistent tradition (Ibn al-Fakfh, 130) notes a few remnants of them in this region; cf. also place-names like Kosa-madjna, Māmenī-Kosa). After 434/1049/1639 allotted to Turkey the western slope of the mountains. On the other hand, a Kūsā whom A. von Le Coq met in 1901 at Damascus spoke the Žaza dialect which is not a proper Kurdish one.

köprü under the name “Shehrazul.”

Ardilan being finally removed from Shahrazur, ... in setting forth the various doctrines concerned (resume and analysis by Husayn Diya’.)

The latest in date of the members of this prestigious line of Shāhīd’s jukād was Mahyf al-Dīn Abū Ḥāmid Muhammad b. Kamāl al-Dīn Abī 1-Fadl Muhammad b. ‘Abd Allāh al-Shahrazur. He was a disciple in fikr at Baghādād of Abū Mansūr Ībn al-Razzāz. He entered the service of Nūr al-Dīn b. Zangī (d. 569/1174 [q.v.] at Damascus, replacing his father as minister in Šafar 555/February-March 1160, and was subsequently kādī of Aleppo and then Mawsīl. He achieved fame and influence there, having, like his father, the reputation of being a generous and enlightened ruler. Before the start of the world war to the powerful Djiyāf chiefs, ‘Othman Pasha Djaf [see Sinna] had been established on Turkish territory in Kurdistan. To complete the confusion, the plain of Shahrazur was given to the kadds of Kirkūk (the kadds were: Kirkūk, Arbīl, Rāniyā, Rawandūz, Kōy and Salāḥiyā, Toptive administra- tion of Shahrazur was in the hands of the amsellīms Rawandūz and Harīr, the so-called “tribes” of which were: Kīrkuq, Arbil, Rāniyā, Rawandūz, Kōy and Salāḥiyā, but to complete the confusion, the plain of Shahrazur proper was included in the sandjak of Sulaymānīyya (see Cuinet, La Turquie d’Asie, i, 764).

From the 18th century, a branch of the tribe of Djiyāf [see sana] had been established on Turkish territory. The plain of Shahrazur, as well as many vil- lages around it, had in 1857 and the crea- tion of the vilayet of Mawsīl, the name of Shahrazur was given to the sandjak of Kirkūk (the kadds were: Kirkūk, Arbīl, Rāniyā, Rawandūz, Kōy and Salāḥiyā), but to complete the confusion, the plain of Shahrazur proper was included in the sandjak of Sulaymānīyya (see Cuinet, La Turquie d’Asie, i, 764).

After the administrative reforms of 1867 and the cre- ation of Sulaymaniyya, the name of Shahrazur was given to the sandjak of Kirkūk, Arbil, Rāniyā, Rawandūz, Kōy and Salāḥiyā.

In disguise to Mesopotamia and Iraq, the garrison of Shahrazur eydleti, which has grown steadily since its repopulation by Kurds from its main urban and administrative centre, a town that is related, he never imprisoned anyone who had not paid a debt of two dinars or less, preferring, if necessary, to pay the debt himself. His biographers attribute to him a certain number of verses judged competent, and among his poetic descriptions is that of a bat and of abundantly-falling snow, whilst other poems treat such varied themes as friendship, fidelity, etc.; on his father’s death, in 572/1176-7, he composed an elegy upon him.

The author of makāmāt, Abū l-‘Alā’ Ahmad b. Abī Bakr al-Rāzī al-Hanafi (who seems to have lived towards the end of the 6th/12th century), dedicated 30 makāmāt to the chief judge of Mawsīl, Mūhyī al-Dīn al-Shahrazur, who died at Mawsīl in Dju‘mādī I 586/June 1190 aged 62 (but al-Šafādī places his death in Dju‘mādī II 584/August 1186).

AL-SHAHRAZUR, SHAMS AL-DIN MūHAMMAD B. MAHMUD, Illuminationist philosopher of the 7th/13th century.

He has suffered by an ironical stroke of fate, in that, although he wrote a substantial work on the biographies of thinkers, sages and scholars of the times preceding his own, his own life is totally unknown. Hence neither his birth nor his death date are known; only a copyist’s note indicates that he was still alive in 687/1288 (cf. H. Corbin’s intro. to his Šamās philosophiques et mystiques d’al-Shahrourī, ii, Tehran-Paris 1976, p. bxx). His own written oeuvre was nevertheless considerable. His Nachat al-arāsh wa-rāshāt al-arifī (cf. Īmād al-Dīn al-Kāthī’s Khurshid al-kār) gives 122 biogra-phies of philosophers of Antiquity and the Islamic period, of which the notice on Šihāb al-Dīn Yahyā al-Suhrūwī [q.v.] (ed. S.H. Naṣr in his Persian intro. to Šamās philosophiques, ii, 13-30) remains our main source of information on this principal šaykh of the Ǧārīfī. His Raṣīl’ al-šahīra wa-štihkāra, dated 680/1282, are a real encyclopaedia of philosophy and the sciences, in which al-Shahrūrī’s own Illuminationist beliefs do not affect at all his objectivity in set-ting forth the various doctrines concerned (rēsumé and analysis by Ḫusayn Diyā’ī, Mu’arrifī wa barrājī-yi
al-shahrazuri — shahriyar

naskha-yi khatti-yi Shaajara-yi ildhiyya ..., in Majalla-yi Irânshindsi, ii/1 [1990]). His K. al-Rumuz wa lanâmâl is a treatise on noetics concerning the modalities of metaphysical knowledge by the Illuminative Way. But paradoxically, al-Shahrazuri seems to have revealed his most inner personal beliefs in his commentaries on the two basic works of al-Suhrawardi, the hitmat al-i'grâk and the Tâlakhât, commentaries which have very much been left out by the shaykh of the Illuminationists' thought, and which inspired other later commentaries such as Kâb al-Din al-Shârâzî [q.v.] on the first work and Ibn Kamûnû [q.v.] on the second—at least, in the opinions of Corbin and Diyâ'î. Al-Shahrazuri seems to have been totally taken up by al-Suhrawardi's Illuminatist philosophy—possibly as the result of a sudden conversion, in Corbin's conjecture, since there are no references to the shaykh in the K. al-Rumûz, ostensibly the oldest of al-Shahrazuri's works (cf. En Islam iranien, Paris 1931, ii, 347). In his commentary on the hitmat al-i'grâk, he goes so far as to describe himself as the koyyûm "upholder" of the science of that work, thus claiming a hierarchic function in the chain of Illuminationist theosophists which remains somewhat mysterious to us now (ibid., 348). At all events, one should stress the independence of mind of a scholar who proclaimed loudly the necessity of studying the philosophy of Aristotle (and of the Greek sages in general) at a time when the anti-rationalist Ash'arî reaction was gaining ground everywhere. Nevertheless, al-Shahrazuri, in his commentaries, stands out as much more than a servile glosaur on Aristotle or on al-Suhrawardi; he displays there the work of a true thinker, dialectician and philosopher.

Bibliography: Al-Shahrazûrî's works, despite their great interest for the history of Islamic thought, have only been partially edited so far. There is an ed. of his Nuzhat al-arâshîd by Khurshûd Ahmad, Hâydarâbâd Dn. 1976, a Persian tr. by Dîvâ' al-Dîn Durrî, as K. Kânq al-îšrân, Tehran 1937, and, under its original title, by M. A. Tabrîzî, ed. M. T. Dînjîh Pâshîq and M. Sáâmîr Mawliî, Tehran 1986. His comm. on the hitmat al-i'grâk also has a critical ed. by Diyâ'î, Tehran 1993, with a Fr. tr. of the Preface by Corbin in his Le Livre de la Sagesse orientale, Paris 1986, 75 ff. (P. Lory)

SHAHRIYAR, SAYYID (or Mir) MUHAMMAD HUSAYN, a modern Persian poet. He was born about 1905 at Tabrîz as the son of a lawyer, and belonging to a family of sayyids in the village of Khushgâb. In his early work he used the pen name Bahdjât, which he later changed to Shahriyâr, a name chosen from the Dîwân of Hâfiz, who was his great model as a writer of ghâzâls. He read medicine at the Dâr al-Funûn in Tehran, but left his studies unfinished to become a government clerk in Khuršân. After some time he returned to Tehran, where for many years he was employed by the Agricultural Bank, living a sober and secluded life devoted mostly to poetry and mysticism. In the 1950s he married and settled down in Tabrîz. Shahriyâr died on 18 September 1988 in a Tehran hospital. His literary success came very early; already in 1931 a volume of collected poems was published with introductions by influential men of letters like M.T. Bâhir, Pîzmân Bâhlîyâr and S. Nafsî. His Dîwân was repeatedly reprinted in amplified editions.

Shahriyâr's work consists of lyrical poetry in various forms as well as a number of larger narrative compositions. Although he was essentially a neo-classical poet, there are frequent references to the modern world both in the choice of subjects and imagery. He was a great master of the traditional literary language, but also wrote in a simple contemporary idiom. Love poetry in the classical ghâzal was his most important genre, which he revitalised with fresh psychological nuances and realistic settings, without changing much the formal rules and conventions. During a short period in the 1940s he tried his hand,

in effect as a place name, to distinguish the principal town of a given region from the eponymous province, or else to single out that part of the provincial capital in which the seat of government was located. Any of the places mentioned in classical texts that were known alternatively, or even exclusively, by this name one can mention:

(1) Sâbûr (older: Bîghâbûr) in Fârs is often referred to as Shahristân, whereby al-Mukaddasî specifies that it is the provincial capital (kâsâba) of Sâbûr which is known by this name, as opposed to the other towns (mutân) in the vicinity, such as Kâzârûn. See al-Mukaddasî, 30, 424, 432, Yâkût, 342.

(2) The city of Isfâhân (Shâhriyâr) consisted of two parts, Shahristân (also called al-Madîna and Djayû, evidently the seat of the governor) and Djâshâdûn (Arabicised: al-Yahûdîyâ, i.e. the old Jewish quarter). See Hûdûd al-âlam, 131; al-Istakhri 198-9; Yâkût, 343.

(3) The city of Dîjurûn (Gûrgân) also consisted (according to the Hûdûd al-âlam, 133) of two parts, Shahristân and Bakrâbâd, separated from one another by the river Hîrânand. See also al-Mukaddasî, 30, 354, 357; Ibn al-Fâkhî, 330.

(4) Kâṯûr, the new capital of Khârâzûm, was, according to al-Mukaddasî (30, 287), also known as Shahristân.

(5) Al-Mukaddasî (360) says that Shahristân was the name given to the seat of government in Brûn (Barûn?), the capital (kâsâba) of Daylâm.

(6) Shahristânî (al-Mukaddasî, 51), Shahristânî (îdem, 300-1 n. 1; 320) or Shahristânî (Yâkût, 343-4) was the name of a town in Khurûsân, three days' journey from Nasîrâbâd. The birth-place of the celebrated al-Shâhristânî [q.v.]. Yâkût says that he was present when it was sacked by the Mongols in 617/1220.

Modern Irân is divided into 43 shahrastans, or sub-provincial administrative districts.

Bibliography: Given in the article.
not without success, on modern poetical forms as they were propagated by his friend Nima Yushidj [q.v.], but soon he returned to classic prosody. In spite of his deep involvement in mysticism, he committed himself from time to time to political and social issues. During the Pahlawi period, he wrote nationalistic poems, like Takkii-i Djamgiid, an evocation in a mathnaw of the ancient glory of Persia as symbolised by the ruins of Persepolis (Dinâan, 626-54). In Khatrmanan-i Iastinâd he sang the praise of the heroes of the Red Army during the Second World War (Dinân, 528-36).

In many poems he expressed a great devotion to the Shahs of the Safavid dynasty. In his poetry he combined love for his beloved daughter Shahriydr with self from time to time to political and social issues. During the Pahlawi period, he wrote nationalistic poems, like Takkii-i Djamgiid, an evocation in a mathnaw of the ancient glory of Persia as symbolised by the ruins of Persepolis (Dinâan, 626-54). ruled by khan(s) appointed as el-beys (paramount chiefs) descended from Yusûr Paşa, and divided between bey-câda (nobles) and kánbâld or nütât (commoners), and they refer to an original royal grant of the pastures, lands of Ardabil and Mughan, and to the contemporary royal appointment of the chiefs. These legends, presumably originating with the nobles, thus legitimate their authority over the commoners, and their control of the pastures, the most important resource for all their nomad followers. The present author heard similar legends in the 1960s from descendants of former el-beys.

As a third version of Shahsewan origins, commonly articulated in the 20th century among ordinary tribes-people and in writings on them, states that the Shahsewan are “32 tribes” (otâz Dî tayfî), all of equal status, and each with its own independent bey or chief, and makes no mention of nobles or of el-beys. The basis of this story is obscure, but it may refer to the presumed origin of the Shahsewan from among the 16-17th century Kızîl-Bâsh tribes, which in several sources also numbered 32.

Contemporary sources record groups and individuals bearing the name Shahsewan, often as a military title in addition to Kızîl-Bâsh tribal names such as Afşâr [g.v.] and Şâmlû (and Şâmlû components such as Beydîlî, İnâlû, Adjlû), in Mughan and Ardabil in the late 17th century. Other prominent tribes in the region were the Kızîl-Bâsh Takîle/Tekeli, and the Kurdish Şâkkachi [g.v.] and Mûghiî/Mûghânî. But there is no evidence of the formation of a unified Shahsewan tribe or confederacy as such until the following century, in the time of Nâdîr Şâh Afşâr [g.v.].

In the 1720s, with the rapid fall of the Safavid dynasty to the Afghân at Isfahan, and Ottoman invasions in north-western Persia, for several crucial years Mughan and Ardabil were at the meeting-point of three empires. Records for those years, the first that mention in any detail the activities of the Shahsewan and other tribes of the region, depict them as loyal frontiersmen, struggling to restrict the Ottoman invaders and to defend the Safavid shrine city of Ardabil, especially in the campaigns of 1726 and 1728. Ottoman armies crushed the Şâkkachi in Mîshkân in autumn 1728, and then in early 1729 cornered the other tribes in Mughan. Leaving the İnâlû and Afşâr to surrender to the Ottomans, the Shahsewan and Mûghiî in the Kur river to Şâyân to take refuge with the Russians. In 1729, the Russian governor of “Afşâr Khan Shahsewan” took the title of “âl-kul Khan Shahsewan, a local landowner. They returned to Persian sovereignty in 1732, when Nâdîr Afşâr recovered the region. Thereafter, he appears to have formed the Shahsewan into a unified and centralised confederacy under Badr Khan, one of his generals in the Khûrâsân and Turkistan campaigns. Possibly a son of “Afşâr Khan, Badr Khan is linked by 19th-century legends with Yûnsûr Paşa, and there is strong evidence that Badr Khan’s family, the Şârî-Şâkkché, were from the Afşâr of Urmia. Former bey-câda (noble) tribes such as Köjджabîyî, İlâlî, Bâlbeyî, Must-Abîyî, Abîbâlû, Polâlû and Damîrdît, traced consanguinity with the Şârî-Şâkkché Afşâr, whereas many commoner tribes bear names indicating Şâmîl origins.

The Şâkkachi, İnâlû and Afşâr from Mughan who had been defeated by the Ottomans were probably among the numerous tribes whom Nâdîr exiled to his metropolitan province, Khûrâsân. After his death (1747), the Şâkkachi returned to settle around Mûiya, Şarb and Khaḍîbî, and the İnâlû and Afşâr (both now bearing the name Shahsewan too) to the Kharâsân, Khamsa and Târîm regions south and south-west of Ardabil. One of Nâdîr’s assassins, Mûsî Bey Shahsewan, was apparently from the Afşâr who settled in Târîm.

In the turbulent decades after Nâdîr’s death, Badr Khan’s son (or brother?) Nazar ‘Alî Khan Shahsewan governed the city and district of Ardabil. Towards the end of the 18th century the Sârî-Şâkkché family split, dividing the Shahsewan confederacy into two, associated with the districts of Ardabil and Mîshkân. Shahsewan khan[s] participated actively in the political rivalries and alliances of the time, with the semi-independent neighboring khans of Kara Dîgâ, Kara Bâg, Kubba, Şarâb and Gîlân, the Afşâr, Afşar, Zand and Kädîr tribal rulers of Persia, and agents and forces of the Russian Empire.

Under the early Kädîrs, two wars with Russia raged across Shahsewan territory and resulted in the Russian conquest of the best part of their winter quarters in Mughan, and considerable movements of tribes southwards. The khan[s] of Ardabil, notably Nadîr ‘Alî Khan’s [24x328] (or brother?) Nazar ‘Alî Khan Shahsewan, the Russian frontier in Mughan was finally closed

the region of Mughan and Ardabil and the nomads confined there underwent a drastic social and eco-
nomic upheaval, whose causes were to be found not simply in the closure but also the behaviour of administrative officials. The Shahsewan, numbering over 10,000 families, for nearly four decades were virtually independent of central government. Although some, such as Mīghānhūl, the largest tribe of all, pursued their pastoral life peacefully as best they could, for most nomads life was dominated by insecurity and the increasing banditry and vendettas by the warriors of the chiefly retinues; the period was known as khan-khāndān or ashtarākhān, the time of the independent khāns or rebels.

Administrative officials give a detailed and depressing picture of the upheaval, though without appreciating or admitting the degree to which Russian imperialism and 19th-century rivalry with Britain were largely responsible for both the frontier situation and the behaviour of, on average, seven to eight people. In the 1960s, groups of three to five

Economic and social organisation of the Mughān Shahsewan.

Apart from their frontier location and history, the Shahsewan differ from other nomadic tribal groups in Persia in various aspects of their culture and social and economic organisation. Most distinctive is their dwelling, the hemispherical, felt-covered yurt. In each yurt lives a household of, on average, seven to eight people. In the 1960s, groups of three to five
closely related nomad households co-operated in an *ābā*, a herding unit that camped on its own in the mountain pastures between June and early September, but joined with one or two others to form a winter camp of 10 to 15 households during the period November to April. Two or three such winter camps, linked by agnostic ties between the male household heads as a *gūbak* "navel" or descent group, would form a *tīra*, tribal section. The *gūbak*/*tīra* was usually also a *dījamāh* (from Ar. *dījamā*) community, which moved and camped as a unit during the autumn migration in October and the spring migration in May, and performed many religious ceremonies jointly. Every group, from herding unit to community, was led by a recognised *āk sākāl*, "grey-beard" or elder. The *tāyīfa* or tribe, comprising from two to over 20 *tīra* sections, was a larger community, members of which felt themselves different in subtle ways from members of other *tāyīfās*, and few contacts, and only one in ten marriages, were made between *tāyīfās*. After the abolition of the *beyās*, the government attempted to deal directly with the *tīra* and their *āk sākāls*; as a result, the "grey-beard" was a younger man from the wealthiest family in the community, with the skills and resources to deal with the authorities. But the *tāyīfa* continued to be important, and remained the main element in Shāhsewan identity, nomadic or settled.

Perhaps the most important feature distinguishing the Shāhsewan from other nomadic tribal groups in Persia was their system of grazing rights. Where other nomads operated some version of communal access to grazing, the Shāhsewan developed an unusual system whereby individual pastoralists inherited, bought or rented known proportions of the grazing rights to specific pastures, though in practice members of an *ābā* would exploit their rights jointly. This system was invalidated by the nationalisation of the pastures in the 1960s, but still operates clandestinely.

Shāhsewan nomads traditionally raised flocks of sheep and goats, the former for milk and milk products, wool, and meat, the latter only in small numbers mainly as flock leaders. Camels, donkeys, and horses were used for transport. Most families raised chickens for eggs and meat, and a few kept cows. Every family had several fierce dogs, for guarding the home and the animals against thieves and predators. Bread was their staple food. Some nomads had relatives in villages, with whom they co-operated in a dual economy, exchanging pastoral for agricultural produce. Most, however, had to sell milk, wool and surplus animals to tradesmen in order to obtain wheat flour and other supplies. Some worked as hired shepherds, paid 5% of the animals they tended for every six-month contract period. Others went to towns and villages seasonally for casual wage-labour. Every camp was visited most days by itinerant pedlars, but householders went on shopping expeditions to town at least twice a year, for example during the migrations. Most purchases were made on credit, against the next season's pastoral produce. The wealthiest nomads raised flocks of sheep commercially, and owned shares in village lands as absentee landlords.

Women too had their elders, *āk bīrāq* "grey hairs", comparable to male *āk sākāls* and consulted privately by them; among the women they exercised their influence in public, at feasts attended by guests from a wide range of communities. At feasts, men and women were segregated. While the men enjoyed music and other entertainment, in the women's tent the *āk bīrāq* discussed matters of importance to both men and women, such as marriage arrangements, disputes, irregular behaviour among community members or broader subjects bearing on economic and political affairs. Opinions were formed and decisions made, which were then spread as the women returned home and told their menfolk and friends. This unusual information network among the women served a most important function for the society as a whole.

Shāhsewan women produced a variety of colourful and intricate flatwoven rugs, storage bags and blankets, and some knotted pile carpets, but these were all for domestic use, and figured prominently in girls' trousseaux on marriage. After about 1970, however, the international Oriental Carpet trade recognised that a whole category of what had previously been regarded as "Kurdish" or "Caucasian" tribal weavings were in fact the product of Shāhsewan nomads. Meanwhile, hard times and escalating prices forced many nomads to dispose of items never intended for sale. Since the Islamic Revolution, however, Shāhsewan weavers have increasingly produced for the foreign market, adjusting their styles accordingly.

(b) The Shāhsewan of Khārkān and Khamsa.

In the 19th century there were five major Shāhsewan groups in these regions: Inālū, Bagdādī, Kurtbeylı, Dūwayrān and Afḡār-Dūwayran. These descend from groups moved from Mughān in the 18th century, except for the Bagdādī, who have a separate history: Nādir Shāh Afḡār brought them from northern Irāk (Kirkūk) to Khurāsān, and later they joined Karīm Khān Zand in Shirāz before being brought to their present location (Sāwā and Khārkān by Agha Muhammad Khān Kāḏjār). Most of these tribes were settled by 1900; the Inālū and Bagdādī provided important military contingents for the Kāḏjār army (Tapper, *The king's friends*, Appendix 2).

**SHA'IR (A.),** barley (Hordeum L., Gramineae family, the Arabic term being applied to several different species), one of the major cereals cultivated throughout the Middle East from earliest times. Mediaeval medical texts classify it among the numerous "grains" (ṣaḥāl, which, naturally, included wheat but also pulses like lentils and beans) which, in bread preparation, formed an essential part of the diet of all but the most well-off of the population. The semantic association between bread (of whatever substance), sustenance, and life itself is found in several Semitic vocabularies. Even if more widely consumed than the scarcer (and hence more expensive) and less hardy wheat cereal, barley was judged less nourishing than wheat. The term occurs in the Traditions, suggesting its use both in the baking of inexpensive bread as well as in other popular dishes like ḥattifūs, ṣailtina, ṣarrid and ṣawīk (see *ČMTUK*).

By nature it was said to be moderately cold and dry (in contrast to wheat, which was hot and moist), which made it suitable for persons of hot complexion in summer, or with a fever. Hence medical opinion held that barley bread was also convenient for young persons but not for the elderly. The medical texts describe the benefits of certain barley preparations: flour, or barley water applied to the skin was said to remove blemishes as well as providing protection against leprosy. A preparation of barley and milk (called ḥiṣk) was an antidote to fever, and washing the body with it opened the pores, a treatment also for exhaustion and for travellers. Barley water had the properties of a diuretic and emenagogue. Barley sawīk was good for fever.

These and other preparations are also found in the mediaeval cookbooks as purely food for pleasure. One barley water recipe is designated especially for Ramadān. Barley flour was also the chief ingredient in the famous condiment marūṭi. A recipe for the beverage ḥikkā (apparently intended to be alcoholic) employs barley flour, while in another similar preparation it is advised against as being harmful; it was also used in the popular drink ādīsma and in the condiment of pickled garlic. Finally, a recommended means of preventing bunches of grapes from rotting is tobury them in barley.

**SHA'IR (A.),** poet.

1. In the Arab world.

A. Pre-Islamic and Umayyad periods.

Among those endowed with knowledge and with power in ancient Arabia stands the figure of the ṣaḥār, whose role is often confused with that of the ṣaḥārān and ṣawīk having the same semantic value: cf. I. Goldziher, *Abhandlungen*, i, 5 ff., and of the kānā (q.v.). They were credited with the same source of inspiration, the djinn (Goldziher, *Die Götter der Dichter*, in *ZDMG*, xlv [1891], 685 ff.). However, the ṣaḥār was, originally, the repository of magical rather than divinatory knowledge; his speech and his rhythms were directed towards enchantment. Ḥaḍa and ṭilāf, satire and elegy respectively, were the primordial expressions of his magical power (T. Fahd, *La divination arabe*, 117, where, under n. 4, the principal references are to be found).

Like the kānā, the ṣaḥār "guided the tribe on the ways of booty and of war". Both of them "advised, arbitrated, judged, decided, to the extent that, either their roles were blended with that of the tribal chief, or they became the latter's advisers, flatterers or instigators" (ibid.). Their functions often coincided with that of the ḥatt (Goldziher, *Der Chaṭṭī in den alten Arabern*, in *WZKM*, vi [1902], 97-102, summarised in French in *Arabica*, vii [1960], 16-18).

The kānā and ṣaḥār expressed themselves in saḏī and in ṭaḏājī, a rhythmic style originally used for the enunciation of the oracle of the kānā and for the chanting of verses of the ṣaḥār at the head of a column of troops setting out for war. The two functions, united at the outset, became progressively differentiated, as their sources of inspiration diversified. Thus ṭaḏājī was the basis of secular poetry and saḏī remained the mode of expression of the kānā. This distinction appears clearly in Kurān, LXXIX, 40-3 (cf. LXXXI, 19-25), where the text reads: "This is the word of a respected Prophet and is not that of a poet (ṣaḥār), men of little faith; nor is it that of a soothsayer (kānā), men of little memory. It is a revelation (tanzīl) of the Master of the Universe" (cf. Fahd, *op. cit.*, 156, 64).

The functions of the kānā and the ṣaḥār were frequently assumed by the sayyād (q.v.). This resulted from the fact that "in the Central Arabia of the 6th century, a sayyād was chosen who, among the members of the tribe, was distinguished by his qualities of eloquence, of decision and of persuasion. The desert Arab was determined to defend his liberty and would only be induced to submit to the chief's authority through reasoning and conviction; furthermore, the sayyād was entrusted with no powers of coercion and his prerogatives were limited. His prestige depended on his ability to influence his fellow-tribesmen with wisdom, with prudence, with informed advice, on his connections with the chiefs of neighbouring tribes, on his wealth and generosity" (ibid., 118-19).

The first reference to the role of the ṣaḥār in the tribe is found in the *Ecclesiastical history* by Sozomenus (vi, 38, ll. 1-9), who was writing between 443 and 450. This author, born in a small village near Gaza, takes up what had previously been written by Rufinus, a contemporary of St. Jerome, who completed the *Church history* by Eusebius of Caesarea and translated it into Latin after 402, and Socrates, another historian of the Church, *Ecc. hist.* iv, 385, ll. 1-12. These authors speak of a "queen of the Saracen tribe (Arabs)" (saracenorum genitis regina), called Mawia, who led a stub-
born war against the Romans on the borders of Palestine and Arabia (vehementi hello Palaestini et Arabi
limitis/var. limidi), defeated them and imposed his conditions on Valens (Emperor 364-78). According to
Sozomenus, Mawia, widow of a chieftain killed in battle, played a very important role at the head of
her tribe. After repudiating the accords (æmovot) concluded between her husband and the Romans,
which were followed by excessive taxation demands, she set out to raid villages between Palestine and
Egypt. Her victories and her courage were celebrated among the Arab tribes with popular songs (qabas).
These songs were adaptations of poems in rughur (see on this subject F. Altheim-R. Stiehl, Die Araber
in der alten Welt, iii, Berlin 1966, 101 ff.; Fahd, Musawat et Dqi'üm au al'Arab wo 'l-Rümûm fi aswâkhir al-karn al-rahi',
in Actes du Congres International sur l'histoire de Bilâd al-Şâm, 'Armanî, 1988). The connections which have
been found in both Arab and Persian poetry are well known (cf. Blachère, HLA, ii, 337 ff.). It is also well known that
talented poet was widely distributed among both nomads and sedentary Arabs (ibid., 331 ff.).

Poets may be divided into two categories: the poet of the tribe and the poet of the court.

i. The poet of the tribe.

In a series of concisely written pages (ibid., 238 ff.), R. Blachère has painted a vivid and very detailed
portrait of this poet, the heir to a prestigious tradition. He is the quintessence of his tribal group, to
which he is viscerally attached, even when he breaks
with anecdotes where the poet manifests himself by
his incomparable renown and the unique
power of his speech. Such an image could not be an
observation of the function of the poet in Arab society, as
the latter glides imperceptibly from nomadism to
sedentarisation, by way of a long period of semi-seden-
.tarisation.

ii. The poet of the court.

Attracted by the glamour of urban or semi-urban society, the nomad poet, without leaving his group
and without renouncing its defence, attached himself
to a patron whose panegyrist he became, at the risk of
losing a part of his liberty and sometimes his life.

Following the disappearance of the Lakhmids and the Ghassânids, the poet of the tribe, accepted
by his Meccan adversaries (Kur'an, 183; ibid., 341). The foregoing account constitutes the permanent
conception which may be held of the poet of the tribe. This core will be found in a more
or less explicit fashion throughout the periods of evo-
uation of the function of the poet in Arab society, as
the latter glides imperceptibly from nomadism to
sedentarisation, by way of a long period of semi-seden-
.tarisation.
into his service an eminent poet who had been a protegé of the Ghassanids and of the Lakhmids, Hassan b. Thabit [q.v.], who became his accredited panegyrist. Other poets rallied around the founder of Islam, seen as a head of state unlike any other in the Arab world [as in the case of Ka'b b. Mālik, 'Abd Allāh b. Rawāhā, Abū Kayy b. al-Aslāt, Bāshīr b. Sa'd; others opposed him at the cost of their lives (as in the case of the Jewish poet of Medina Ka'b b. al-Asghar and others).

Under the first four caliphs, there was a gradual return to the appreciation of poetry, on condition that it upheld a certain ethic (muṭarrīm al-ḥājdād). The poet Suhaym was put to death, under 'Umar, on account of his amorous escapades. This was not unaccompanied by a degree of embarrassment, "a sort of bad conscience paving the way for a process of rehabilitation" (ibid., 355). Some went so far as to show the Prophet allowing improvisation and even improvising himself on the ṣa'da metre (al-Bukharī, ed. Cairo, iv, 51) or reciting a fragment from a pagan poet (ibid., iv, 32).

It was in the Umayyad period that the poet was to regain his place in his tribal group and as client of numerous patrons, caliphs, governors and prosperous merchants enriched by the wealth accruing from the tide of conquests. This was the age of prestigious poets such as al-Akhtal, Djarir and al-Farazdak [q.v.]. In accordance with the attachment of the Umayyad princes to Bedouin tradition, the poet returned to his origin, function as representative of his tribe and champion of its interests. He spoke of its past, of its glories, of its merits, either in eulogistic poems addressed to his patrons, or in contests of ṣafār (boasting) or ḫaḍī t (satire) in which he engaged with his rivals. All this was done with the aim of gaining credit for himself or for his tribe in the estimation of the one who was the subject of the eulogy. The poet of the court, in the terms previously described, was superseded by the poet of the tribe, even though his role was essentially played in the court. The vast majority of the poets who achieved eminence in this period were natives of the desert; throughout their careers, they remained in close contact with their tribes, to which they returned after the completion of their tasks in the court and in the presence of their patrons. Al-Akhtal, a Christian of the great tribal confederation of the Taghlib, began with the celebration of local spoils in the region of Kūf. His career as "cantor of the Umayyads" started when Yazīd I, still the heir presumptive, commissioned him to satirise the Anṣār of Medina who claimed to be of "Yemeni" descent; he unleashed a poetical campaign which was to earn him vehement ripostes on the part of 'Abd al-Rahmān b. Hasān, al-Nu'mān b. Bāshīr and al-Nabīgha al-Dīja'd. Thus he found himself embroiled in the perpetual dispute between the Arabs of the South (Yemenis) and Arabs of the North (Kayṣīs), the dispute which was to wreak such damage in all the phases of Arab history.

For his part, Djarir also began his career with his tribe (the Tamīm); throughout his life, he remained attached to his ancestral desert, the Yamāma, returning to it after brief periods in Baṣra or in Damascus; he, too, was the spokesman of the Kayṣīs against the Yemenis. Al-Farazdak (also of the Tamīm), born like Djarir in the Yamāma, began his career as a tribal poet, then served a number of patrons before succeeding his father as official poet of the court, under the reign of al-Walīd I. It was in Baṣra that he spent the major part of his life; it was also there that he died.

Not one of these three poets resided in the caliphal court at Damascus. While politico-religious controversies (Kayṣīs and Yemenis, Sunnīs and Shi'īs) appear in their eulogistic and satirical poems, there is no echo to be found there of the life of the court. The sumptuous palaces of Damascus could not make them forget the desert in which they had been brought up; their poetic art, which is that of the great poets of pre-Islam, bears witness to this.

Hence the poet of the Umayyad period remained in the service of his tribe, like his predecessor in the pre-Islamic era. But his audience had changed. Conquests that brought prestige and enabled the proliferation of urban centres, colonised by segments of peninsular tribes; it was in these "colonies" that young poets were accepted and helped to make their way in this evolving society. The poet, usually of modest background, sought to exploit his art as a means of acquiring wealth and distinction. On the way he encountered rivals and competitors, and also risked making deadly enemies. Hence the important role of ḫaḍī t in this period (in particular between Djarir and al-Farazdak). There would also be instances where he was caught in a vice between his ancestral group and the central or local power; it was then incumbent on him to attempt to serve the interests of both (for example, al-Farazdak reminding the caliph of the support given him by the Tamīm at the time of the suppression of the Yemenis, in revolt at the instigation of Yazīd b. al-Muhallab, Blāchère, 544 n. 4). There were instances where the poet refused to submit and appealed to his group for assistance; then, following a trivial incident, the issue grew in importance and "fire engulfed the tribe" (for example: a Sulāmi poet, insulted by al-Akhtal in the presence of the caliph, left in fury and incited his people to attack the Taghlib, ibid., 544 n. 6).

Two factors contributed greatly to the popularity of the poets in the Umayyad period. On the one hand, the large number of patrons emerging from the governmental and military aristocracy, enriched by the acquisition of large estates (as in the case of Dūnayd, governor of Sind, eulogised by Djarir and al-Farazdak); on the other, the return of the same aristocracy to its desert origins and to the chivalrous values of its ancestors. Also, panegyric (mudāl) and glorification (ṣafār) occupied an important place in the poetry of this period.

From the point of view of the court, the poet was considered to be "an auxiliary of the central power and a link with the peninsular world, the upheavals in which should not be ignored" (ibid., 546); he was "an element, if not permanent then at least influential," of the court. His talent, initially exploited politically under the Marwānids, was ultimately recognised in artistic terms, from the time of al-Walīd I (86-96/705-15 [q.v.]), himself a poet. For this caliph, the art of versification was not only a recreation; it was also "the instrument of expression of the 'self' and the source of intense emotions" (ibid., 548).

The governors of provinces (Ziyād, al-Haḍjdād, Khālid al-Kaṣrāf, etc.) also employed poets for their propaganda, keeping them in a state of dependence as a means of avoiding conflict. Those opposed to the Umayyad régime themselves had recourse to the talents of poets (al-Ḥāshā of the Hamdān paid with his life for his attachment to Ibn al-Aslāhath); numerous poets supported al-Muhallab as a supporter of the régime; others applauded his son Yazīd when he rebelled against the caliphal authority, but abandoned him immediately after his defeat. The same applied to the secessionist Zubayrids.
In this way the Umayyad poet, like the poet of the tribe in the pre-Islamic period, served the cause of his tribe and the politics which it espoused. Among the poets of the time, two themes often appear in their divāns; the quarrel between Kayšā and Yemenis and the taking of sides in the conflict then in progress between Djarār and al-Farazdāk. The dominant ideology remained the tribal affiliation which linked the two generations, that of pre-Islam and that of the Umayyad period.

An exception to this dominant current is constituted by the poetical school of the Ḥudayla. The very rigid society which then formed the upper centrepieces of the region (Mecca, Medina and Tāʾif) under the first four caliphs, allowed no place for the poet, still regarded as representing the customs of pre-Islamic times and denounced by the Prophet. But as a result of the wealth which abounded in these cities, on account of the conquests and of the isolation in which they had lived for ten years, following the uprising of ʿAbd Allah b. al-Zubayr, a perceptible evolution of custom and behavior led towards a sophisticated society in which song and poetry, favoured and cultivated by new patrons, underwent a striking development. Thus the poet was once again in service. But, remote from the centre of power and from tribal quarrels, he devoted himself to renewing an almost forgotten ancestral lyricism. So a type of literal “romanticism” was born, the hero being the poet himself, an amorous poet, deprived of his loved one on account of the rigidity of tribal morals (as in the cases of Kayšā b. Djarār, Waddah al-Yaman, Madjnut and Djamił). Thus the poet became a character of romance.

A certain degree of female emancipation is evident in this period. Some women enjoyed a social promotion such that they were enabled to maintain literary "salons" and to receive poets (as in the case of ʿAṭiba, daughter of Ṭalha, grand-daughter of Abū Bakr, the first caliph; Zaynab, daughter of Muʿayyib; Zaynab, daughter of Mū'aqyt; and most notably, Tjurayyā, daughter of a wealthy family of Tāʾif, and Sukayna, granddaughter of ʿAli b. Abī Ṭalib, the fourth caliph). These women exerted considerable influence over the poets who entertained them, in particular, over ʿUmar b. Abī Rabiʿa, Kuṭḥayyir and Nuṣayb.

The greatest poet of this period was undoubtedly ʿUmar b. Abī Rabiʿa [q.v.], a man of wealth and independence. He made a name for himself with his countless affairs with aristocratic ladies (including Fāṭima, daughter of the caliph ʿAbd al-Malik, and Umm Muḥammad, daughter of the caliph Marwān). His divān abounds with poems recounting his tempestuous loves, inspired by "a violent and mutual passion, coupled with estrangements and reconciliations" (ibid., 631). Singers both male and female borrowed his poems, and storytellers made him a legend in his own lifetime, hence his considerable renown, which eclipsed that of the other poets of his time. He opened up a new direction in courtly poetry, a direction denounced by the moralists of the time (in particular by the Shiʿa circles of Medina) but much appreciated by the new poetical movement which came into being at the end of the Umayyad period. ʿUmar b. Abī Rabiʿa is far removed from the poet of the tribe, although retaining a few of the clichés, just as he is far removed from the poet of the court. More than any other poet of the time, he is the poet of the "self."

Ahmad Shawki's time among conventional poets. High-class scholars like Hasan al-c Attar (1766-1835), who later on became the Shaykh of al-Azhar, composed elegies to honour his deceased friends, scholars or rulers, and his poems were recited at the funeral by a special reciter (mawdish) after the prayer. In his old age, he composed poetry to honour influential people, "only when necessary, and in order to show dissimulation towards them (illa bi-kad al-dararuna wa-nfik ahl al-aij). However, a poet endowed with the ability of improvisation on subjects of discussion or in praise of his patron, and who was able to answer his patron or his friends in debate by improvised verses, was admired and considered as a greater poet.

During the 19th century and the first quarter of the 20th century, poets continued to serve as an effective mass medium for the rulers, rich patrons, merchants and religious scholars. Some poets were asked to compose poetry for the purpose of encouraging common people by their praise-poems (ma'dith) to visit the shrines of Muslim saints (wa'fil, pl. awliya'). According to al-Djabarti, when al-Sayyid 'Ali the dull-witted one (ahlah), who was believed to be a saint, died on 16 RabI I 1214/17 September 1799, his brother brought poets and reciters of poetry (ghurar wa-mawdishin) to sing his praise and enumerate his miracles and blessings in order to encourage people to visit his tomb and thereby to offer their donations and offerings to the saint in order to secure the income of the shrine.

Both patrons and poets were in need of each other: the patrons for the purpose of prestige and esteem and the poets for the purpose of living and for contacts with the ruling class and social connections. The generous Mamluk amir Murad Bey Muhammad (d. 1215/1801) used to encourage poets to join his madifis and lavish presents on poets who composed poems in his honour and increased his notability. When he died, poetesses and women singers composed elegies and sang them accompanied by music to lament his death. During revolts against oppressive Ottoman pashas and other officials, poets composed critical poems and versified slogans and taught them to children to chant them in the streets and in front of the rulers' palaces.

These conditions continued as late as the beginning of the 1920s. The Greek Orthodox poet and writer Mikhail Nu 'ayma (1889-1988) [q.v.], under the influence of his Russian education and Romanticism, criticised in his book al-Ghirbal the role of the poet in the Arab society. He accused contemporary poets of being platform orators and convivial poets who were engaged in the communal and festive life of his society. He unconsciously summarised al-Djabarti's description of the role of the poet in society, saying that they only deal with subjects such as tahani' (congratulations), isquadniyat (exchanging friendly poems), musi'datal (debates) which were dedicated to other poets, madif (eulogy), nifath (elegy) for his patron, ghazal (erotic poetry), wasf (description) and celebration of a memorable occasion, an official or religious holiday, a public, political or military event, or the inauguration of public and private buildings. Nu 'ayma attacked conventional poets, calling them "versifiers and craftsmen who versified every aspect of communal life, such as birth, death, wine-drinking, greeting friends. Thus everything is versified in Arab cultural life, except feelings and thought" (al-Ghirbal, 122).

With the renaissance of the Arabic language and culture, especially among the semi-independent rulers in North Africa and the Middle East, the courts of such rulers as Amir Baṣhr II al-ShihabI (1767-1850) in Lebanon, the Egyptian Khedives from the accession of Isma'il Pasha (1863-79) onwards, the court of King Faysal I in 'Irak (1921-33), and King 'Abd Allah (1921-51) in Jordan, looked for an entourage of poets and men of letters to speak their praise and merits as well as for the purpose of entertainment and social activities. In these courts, the poet laureate (shaykh al-balad) gained a great esteem and respect with secured income. The duty of such court poets was to compose a poem to greet the ruler on feasts and holidays, birthdays, write poems of farewell when the ruler departed for a journey abroad and another at the reception on his return, greeting guests as well as on other occasions. The new courts were interested in neo-classical poets for their panegyrics in order to raise the rulers' esteem in the eyes of their people.

With the development of printing and journalism in the Arab world during the 19th century, poetry played an important role. Panegyric poems to the rulers published on the front page opened the gates of the sovereign's courts to these writers. When Fāris al-Shidyāk [q.v.] heard of the charitable deeds of Ahmad Pasha, the Bey of Tunis, in Marseilles and Paris, he composed a panegyric poem on the Bey and the latter was so impressed with it that he sent a naval vessel to London to bring him and his wife to Tunis. This generous gesture made a great impression on al-Shidyāk, who praised the famed generosity of the Arabs in his book al-Sāk 'al'a 'l-sāk fi-mā huwa al-Faryd, Paris 1855. Al-Shidyāk compared the role of the Arab poet in his society to that of European poets. He found that the main difference was that the Arab poets were eulogists who praised their patrons in exchange for their generous presents, and cited the old Arab maxim attributed to the Andalusi poet Abū Muhammad 'Abd al-Dajāl b. Wāhābn that "presents open the mouth of the poets [to praise their patrons] (al-lahā tafāshu al-lahā)."

Subsequently, Fāris al-Shidyāk converted to Islam, a step influenced also by revenge for the death of his brother who was tortured to death (1829) by the Maronite clergy because of his conversion to Protestantism. Later on, he established his newspaper al-Du'a'at and devoted most of his poems in praise of the Ottoman sultan and his officials.

The founder of al-Ahrām newspaper (Alexandria 1875), Safīm Taklē (1849-92), used to publish on the front page congratulatory poems to the Khedives Ismā'il and Tawfiq on their birthdays and the anniversaries of their ascension to the throne, as did also Ya'qūb Sānnū' [q.v.] in his newspaper Abî Ndaddar, in which he published poems in praise of the Sultan and Prince Halīf.

Ahmad Shawkī (1868-1932) [q.v.] is considered the most famous poet laureate in the modern Arab world, and he was proud of his office as a court poet of the Khedive 'Abbās Hilmi II (1892-1914), who bestowed on him the title of Bey (1895). When the British deposed 'Abbās II, Shawkī composed a poem in praise of the Sultan Ḥusayn Kamīl (d. 1917) [al-Qadriyya, i, 214-18] and the descendants of the Khedive Hilmi. For this poem, he was exiled by the British to Spain. He became a member of the Senate in the Egyptian Parliament. In 1927 he achieved the
dream of every Arab poet and was honoured by a festival (mihra‘n) of delegations of poets from all the Arab countries, in which he declared “prince of poets” (amir al-s̱hawrā‘). Less famous poets in the Arab world such as ‘Abd al-Muhsin al-Kazimi [q.v.] received pensions from the aukāf through the intervention of Shaykh Muhammad ‘Abduh [q.v.], in compensation for his panegyrics.

In ‘Irak, the poet Ma‘rūf al-Ruṣāfī [q.v.], who edited al-Amal (1923), published his poems on the front page as his main articles. In consequence of his poems criticising the King and the government, his newspaper was stopped, and a year later of his death before the court. In order to earn his living, he composed panegyrical odes to the Prime Minister, ‘Abd al-Muhsin al-Sa‘dūn, but after the latter’s suicide he lost his patron, and in his old age had to sell cigarettes to earn his living and compose verses to publicise al-Ghāzī’s Cigarettes. He also received a monthly salary of forty dinārs from his rich patron Muzhir al-Shawī, an ex-member of the ‘Irākī Parliament, and in gratitude al-Ruṣāfī would send him a panegyric poem as a receipt.

Muhammad Mahdī al-Djawāhirī (1900-) was likewise appointed for a short time (1927-30) as poet laureate at King Faysal’s court. In his successive newspapers al-Furūd (1930), al-Inkildb (1930), al-Palma (1937), and the al-‘Aqūdāt al-Māshiqū, he used to publish his poems on current political events instead of the main articles. When he joined the leftist movement in ‘Irak, he criticised the government in his poems. As a result, his newspapers were closed down and he was put in jail. His brother Dja‘far joined the demonstrations against the government and ‘Irakī poets used to recite poems during the 22-63). In order to earn his living, he composed panegyrical odes to the Prime Minister, Abd al-Muhsin al-Sa‘dūn, but after the latter’s suicide he lost his patron, and in his old age had to sell cigarettes to earn his living and compose verses to publicise al-Ghāzī’s Cigarettes. He also received a monthly salary of forty dinārs from his rich patron Muzhir al-Shawī, an ex-member of the ‘Irākī Parliament, and in gratitude al-Ruṣāfī would send him a panegyric poem as a receipt.

is such that the typology of the Andalusian sha'ir seems to have barely undergone any major transformations, in spite of a quite eventful political and military history. It is interesting to note, furthermore, that this typology follows, except in a few details, its eastern model; whatever may be said regarding this point, the fact is that the Orient, cradle of the Arabic language and of Islam, remained, for this distant province, the supreme cultural and spiritual reference. It may be recalled that the conquest of Spain was undertaken by Arabs, in 92/711, during the reign of the Umayyad caliph al-Walid I, who ruled from 86/705 to 98/713, and that al-Andalus was administered, until the 3rd/9th century, by a score of governors who successively headed this country, on behalf of the caliphs of Damascus [see al-ANDALUS. vi]. According to the sparse information which is available, poet-soldiers participated more or less directly in this expedition. Others, arriving from Syria or elsewhere, subsequently joined them. All played, to varying degrees, a not insignificant political role. By means of their poetic talents, they could advance the interests of their local masters, local governors and to the reinforcement of the prestige of the central power in Damascus. After the arrival of the 'Abbasids in the east and the profound political upheavals which ensued, the official Andalusian poets remained faithful to the "Syrian tradition".

In fact, very soon after the fall of the Umayyad caliphate, a Marwārid prince, 'Abd al-Raḥmān I, nicknamed al-Diḥāḥīl (the Immigrant), secretly arrived in Spain and succeeded in reviving the Umayyad dynasty, having himself proclaimed amīr of al-Andalus in 136/756. In order to confirm his authority and restore the grandeur of his escutcheon, he enlisted to his cause a number of propagandists and poets who celebrated the glory of his family and his own in return for favours, money or rank. All his successors adopted the same line of conduct.

It is to be noted that the majority of these poets were of Arab origin, in most cases emigrants from Syria who remained closely attached to the traditions of this country. Furthermore, many of them ultimately became absorbed into the Arab aristocracy, the ruling caste of al-Andalus. But, following the start of the 'Irākisation, came into existence at about the same period, at any rate during the 3rd/9th century. After what was in fact a long period of mutual ignorance, the two very different ethnic elements populating Muslim Spain began to come closer together, in a process which gradually culminated in a kind of fusion particularly favourable to the birth of an original literature. These two phenomena had major repercussions regarding the typology of the Andalusian poet who, from the 3rd/9th century onward, freed himself to some extent from the hegemony of the "Syrian tradition" on the one hand, and showed greater awareness of what was fashionable in the 'Irākī court of Baghdad, or what was developing before his very eyes, in his own country, on the other.

Very little information is available regarding the Hispano-Muslim poets who lived in the first centuries of Arab domination. One of the first anthologies, Kitaż al-Haddī‘ī of Ibn Farādji al-Dāyyānī (d. ca. 366/976) has not survived. That of Abu 'l-Walid al-Himyari (d. ca. 440/1048) was a selection of texts devoted to gardens and to the springtime, and gives information exclusively regarding floral poetry and the bucolic poets.

For the end of the 4th/10th century, and in particular the 5th/11th century, dearth of material is less of a problem, since there is access to a number of valuable documents and, in particular, two anthologies: Kalīd al-Dīyānī and Ma‘ṣūs al-sa‘īsī by Šayb ibn al-Dākhilīn (ca. 421/1031), and especially al-Dīyānī's Kitb ash-Shajaratīsh Charīfīn (ed. by Ibn Bassām [d. 542/1147]), [q.v.]) on the value and the importance of these anthologies, see Asīf Ben Abdesselem, La vie littéraire dans l'Espagne musulmane sous les Mūlik al-Tawā‘īf (V/XI siècle), unpubl. thesis, Sorbonne-Paris (1992). The existence of these Andalusian anthologies proves that during this period, poets were quite numerous.

The latter were highly esteemed by Umayyad sovereigns and their successors, as well as by Muslim court ministers and services in exchange for all kinds of favours. But after the collapse of the power of the Banū 'Amr (ca. 399/1009) and the outbreak of the civil war, the fima which was to bring fire and bloodshed to the land, the poets were dispossessed, enduring these troubled times without the support of patrons. Some were obliged to leave the capital, Cordova, to seek out patrons elsewhere, and to live a peripatetic life similar to that of the troubadours (see Ibn Bassām, Dhakhira [q.v.], 1/1, 67). But the most favourable period for the Andalusian poets was undoubtedly that of the Mūlik al-Tawā‘īf [q.v.], who succeeded in building on the ruins of the Umayyad caliphate of Cordova principalities, some of which were particularly dynamic and prosperous. In the interests of propaganda and for reasons of prestige, all these sovereigns made it a point of honour to attract to their courts the best artists, writers, and poets in particular. Thus poetry became a highly esteemed product. This extraordinary fascination with the rhyming game was shared—no doubt for the same reasons—by the most varied classes and levels of the population. At the summit of the social scale, were princes, sa‘ārs, senior dignitaries, etc. Marwān al-Ta‘līk, a descendant of the caliph 'Abd al-Raḥmān al-Nāṣir, may be said to have found his true royalty in poetry, after the model of the 'Abbāsīd Ibn al-Mu‘tazz, to whom he is often compared (see Ibn al-Abbāsīr, Hulīa, 1, 221). It would be tedious and unnecessary to list here all the Andalusian poet-princes and to analyse their poetical works. Suffice it to say that, in aristocratic circles, the composition of verse was learnt at a very early age. It constituted an essential element of the education of the young aristocrat.

Occasional courting of the muses was a popular pastime, practised most often for personal gratification, or in order to conform to a fashion, or to advertise a certain art of living. The poetic themes most often tackled were fahr [see MAWJUGHAR] and descriptions. The most mundane incidents of daily life were recounted in verse. The prince of Sennel al-Mu'tamid
Ibn 'Abbad [q.v.] whose life was “pure poetry in action” (see E. García Gómez, Poesía, 70), addressed himself in verse to his father al-Mu'tadid, asking for a bay horse or a shield, requesting his permission to go hunting, or begging his forgiveness in the wake of his unsuccessful attempt to seize Malaga (see Kālit 'īl, 21-2; Dakhīra, ii/1, 47-8; Bayān, iii, 275).

The circle of the elite (khāsās) was not limited to the prince and to his family; it also included dignitaries of all kinds and members of the middle classes who, having received a similar education, shared the same passion for poetry and the same ideals of culture and refinement as their masters and patrons. Also belonging to this social category were numerous poets who, as scions of prosperous families, were not obliged to market their talent in order to make a living. However, in the interests of maintaining good relations with the prince, such poets would from time to time address verse to him, with the aim of assuring him of their devotion and fidelity. A wealthy aristocrat of Seville, Abū ʿĀmmir Ibn Māslama (d. after 443/1050) compiled, for the 'Abbadid king al-Mu'tadid, Ḥadīsāt al-nīṣābī fi ʿaṣaṣ bāḥshat al-rāh, a collection of choice fragments in praise of wine. This collection includes extracts from Andalusi authors, as well as texts composed by Ibn Māslama himself (see Māmah, 203-6; Dakhīra, ii/1, 105-12; Muğribī, i, 96-7; Naft, iii, 544-5).

It is altogether remarkable that, in the time of the Mulūk al-Ta'wīf, the number of poets belonging to the lower orders (ʾummā) was considerably greater than that number belonging to the upper classes. These multitudinous versifiers were in the majority from the original population of Spain (muwalladūn) and of modest extraction. Most were of peasant origin, which would explain their intense love of nature and their passionate attachment to the land. They practiced the most diverse professions, but teaching was the commonest occupation for them. It was also the least well remunerated. Thus their living circumstances were not enviable. At the same time, they knew that generous patrons were not in short supply and that the profession of poetry could shield them from need and provide them with self-respect—and money. Also, the number of professional poets was never so great, and the career never so popular, as in this period. The multiplicity of princely courts and their constantly-growing need for ceremonies, talents and abilities of all kinds, encouraged the proliferation of rhymers for hire. In this period, poetry was subject, in fact, to the law of the market, which was particularly ebulient, since, to quote an expert judge of Andalusian poetry, E. García Gómez, "an improvisation could be worth a vizierate". To varying degrees, all the Mulūk al-Ta'wīf left behind them a reputation as protectors of literary men and of poets in particular. But in giving aid and protection to the latter, their actions were not altruistic or disinterested. On the contrary, their motivations were very precise. They reckoned that it was in their interest as well as their duty to perpetuate a tradition which appreciated the value of the role of poets in Arabo-Muslim society. Born with an Arabic literature, patronage became in effect “a mode of an average Andalusian poet, typically of humble origin, it may be noted that, after more or less thorough studies in his native village and then in a large town, he launches himself upon an errant life, offering compositions in praise of a wealthy bourgeois person, a senior official or a generous prince with the object of obtaining from him gifts in money or in kind. But success is not always assured, and the apprentice-poet must demonstrate modesty and patience if he is to surmount the obstacles liable to be placed in his path. At the outset of his career, Abū Bakr Ibn 'Ammār [q.v.], making his way to Silves [see Shilb], addressed some verses to a dignitary of this town, who sent him the princely reward of a small bag of barley (see Dakhīra, ii/1, 609-71; Ben Abdesselem, ibid., 350).

The ideal situation for the poet was to be taken into the service of a prince or invaded by some of pensioners (diqda) (see al-Dhabīl, Baghā, 148; Ibn al-Khaṭīb, Ḥātīa, ii, 71). But in order to be placed on this list, it was necessary first to pass successfully a kind of examination. The candidate presented himself at the court, where he was put into the charge of a functionary who had the responsibility of arranging accommodation for the sovereign's guests and for itinerant poets in the precincts of the palace. This accommodation officer, called ǧāhil al-qalāq, did not always have the best of relations with his charges, who tended to be hard to please, even unconventional (see Pērēs, Poète andalouse, 72 ff.). Subsequently, the candidate was obliged to wait his turn to be heard by the prince, who usually set aside one day each week for the reception of poets. This day varied from one prince to another. Under the reign of al-Mu'tadid of Seville, it was normally a Monday (see Naft, iv, 243-4). Historians have supplied detailed accounts of some of these receptions, including that of Ibn Dakhīl who so impressed al-Mu'tadid that, having heard him, he allowed him to mount the rostrum. At this time, patrons were both men of power and men of letters. They applied meticulous commentaries

and criticisms to the compositions of their poets, who were obliged constantly to take account of their literary preferences. Even after his inclusion in the list of pensioners, the official poet was almost always under pressure, since the relationships linking him to his benefactor was in fact that of master and servant. He supplied the echo to the deeds and achievements of the prince, celebrating in particular his political, diplomatic and military exploits. He was at the mercy of the smallest caprice on the part of his patron. At any moment, he might receive the order to compose a piece regarding such-and-such a subject. The poet Abu l-Walid al-Nahjī was required to be constantly at the disposal of al-Mu'tamid, the king of Seville (see Naḥī, iii, 334). On one occasion, the latter summoned Ibn Hamīdī, one of his official poets, in the middle of the night, requiring him to complete some verses which he had been drafting himself (Naḥī, iii, 616-17). The majority of patrons enjoyed putting their client-poets to the test in such ways.

But the most skilful and the luckiest acolytes found it was to their advantage to show themselves particularly successful and also to advance the price to be paid for a panegyric. Abū 'Alī Idrīs Ibn al-Yamānī composed his eulogistic poems to order and at a fee of 100 dinārs per composition (see Dhakhīrā, iii/1, 336-7). These professional poets acknowledged without the slightest scruple that it was "presenting which loosened tongues" (Pérès, ibid., 36 n. 2, 81). Furthermore, their demands were in their view amply justified, since princes found difficulty in doing without their services. In this regard, 'Abd al-Dājlīl Ibn Wabhūn, addressing al-Mu'tamid Ibn 'Abdād, said "O you who hold the glory! This would be as a beast astray were it not upheld by poetry" (see Dhakhīrā, ii/1, 502). When his abilities permitted, the poet of the court was not content with playing the role of a hired flatterer; he could rise to high office and become an ambassador, governor, minister or even chief minister (al-Dājkīl u-tsāṣrā'tam). Such was the case with Abu l-Walīd and Abu Bakr Ibn Zaydūn, Abū Bakr Ibn 'Ammār, Abū Muhammad Ibn 'Abdūn, among others (see Pérès, ibid., 84 ff.). Furthermore the word wuzūr (vizier), which had the meaning of kāthīr (secretary), became, in the 5th/11th century, a synonym of "poet". A good prose-writer was, most often, a poet as well. "Al-Mu'tamid," says al-Marrākūši, "appointed as viziers only men of letters, poets versed in all kinds of expertise, so that he had around him an assembly of minister-poets such as never had been seen before" (see Mulūjīh, 65, tr. Fagan, 90).

But even if all his hopes were realised, the court poet could not be sure of keeping his acquired privileges indeﬁnitely. Disgrace was just as likely an outcome as was promotion, and the occasions of risk were not lacking. Often, he was the victim of jealousy and treacherous attacks on the part of his colleagues, who baulked at no calumny in their efforts to dislodge him. An example of this would be the intense and prolonged rivalry between the two 'Abbādīd ministers Abu l-Walīd Ibn Zaydūn [q.v.] and Abū Bakr Ibn 'Ammār (see Dhakhīrā, ii/1, 429).

The Andalusian poets were not only hired panegyrists or shameless mendicants. The majority of them had occasions at some time or other in their lives to act as the spokesmen of their community and as interpreters of public opinion. Certain disasters which engaged the collective mind did not leave them indifferent. Events which baulked at no calumny on their part, such as the capture of Barbastro by the Normans in 456/1064, or that of Toledo by Alfonso VI in 478/1085, inspired them to compose verse sufused with profound emotion. The poem of al-Shārīf al-Rundi (9th/15th century) lamenting the fall of the last Muslim metropolises of al-Andalus into the hands of the Christians, was especially influential (see Mustapha Hassen, Recherches sur les poèmes inspirés par la perte ou la destruction des villes dans la littérature arabe du III/IXe siècle à la prise de Grenade en 897/1492, unpubl. thesis, Sorbonne-Paris 1977).

Relatively reticent and few in number until the end of the era of the Mulūk al-Tawālīf, the waṣāgīlān and the zdajīlān subsequently acquired some eminence in those minor poetic genres, muwaḥšhan and zdajal, which they practised successfully until the end of the Arab presence in the Peninsula. It may be noted that the compositions of these popular poets were principally addressed to the general public, unlike the "standard" poetry, conforming to the taste of the elite.

Although considerably more numerous than in other countries of the Arabo-Muslim world, Andalusian poetesses were decidedly less numerous in Spain than their male counterparts. In all periods there had been, in the entourage of the prince, educated women who were capable of writing in verse and in prose; but there were never court poetesses playing the role of accredited panegyrist. Women capable of composing verse belonged to several major categories. Some lived in harem, where most existed in servile conditions, bought in exchange for gold, having been instructed by experienced professionals. Others were wives or daughters of princes, such as l-Timād, the favourite legitimate wife of the king of Seville, al-Mu'tamid Ibn 'Abbād, or Umm al-Kirām, the daughter of al-Mu'tasīm Ibn Șumādīh of Almeria. Others displayed great independence and frequented literary societies and salons. Such was the case of Wallāda, the daughter of the caliph al-Mustakfī, who, after the death of her father, maintained a salon which attracted the most renowned of writers. In the Naḥī al-ṣifī, the Maṭkari supplies biographical notes and quotations concerning twenty-five Andalusian poetesses, whose poetry is generally personal and small in quantity: al-Maṭkari quotes only a hundred or so of their verses (see Naḥī, iv, 205-11).

At first sight, it would be tempting to believe that the typology of the Andalusian poet is a carbon copy of that of his Syrian, Egyptian or ʾIrāqī counterpart. There is an impression that there is a single type of standard poet, unaffected by place or time, so striking is the similarity between these different types of poets. However, on closer inspection it becomes clear that beyond a certain undeniable similarity, it is impossible not to recognise the existence of a local colour and a typically Andalusian flavour, creating an integral element of the world of the Hispano-Arabo-Muslim poet. **Bibliography:** Besides the works cited in the text of the article, see also R. Blachère, HLA, "A. Tabulsı, La critique poétique des Arabes, jusqu'au IVe siècle de l'he- gire (XIe s. de J.C.), Damas 1956; J.E. Bencheikh, Poétique arabe, Paris 1975.

(A. Ben Abdesselem)
varies from genre to genre across different regions and even within particular communities; some genres are entirely pre-composed and are typically preserved, transmitted, and performed with little change, while others are improvised in performance with little or no attempt at preservation, and still others may be the combined work of several individuals, being initially composed by one person, set to music by another, and publicly performed by still another. As the terminology and social characteristics attributed to poets, the act of poetry-making, and the performance of poetry, contrast sharply from one area to the next, regional connotations of the figure of the folk poet and his or her role in society are quite diverse.

The performances of folk poets are a widespread form of expressive art found in rural and urban areas throughout the modern Arab Middle East. The repertoire of these performances is primarily oral, composed in traditional forms, often improvised, and produced in colloquial Arabic rather than literary Arabic or fiqhū. Much of Arabic folk poetry exists as song rather than as declaimed or recited verse. Among some social groups such as the Bani Halba of Sudan, for example, poetry exists only as song, is identified directly with singing, and may be additionally associated with dance and/or other forms of coordinated movement such as Sūfī dhikr [q.v.]. In contrast, among tribesmen of the Khawālīn al-Tiyāl region of North Yemen, it is considered undignified for a man to raise his voice in song, and men’s poetry is instead recited or chanted, unless performed by professional male performers who sing publicly.

Folk poets and poetry have survived in an ambiguous and at times conflicted relationship vis-à-vis the poetic traditions of Arab “high” culture. Part of this ambiguity lies in their intimate association with music, which has held a disputed place in Islamic religious thought since the early centuries of Islam, and part in their connection to colloquial Arabic as a medium of expression, which historically has been denigrated in contrast to literary Arabic. The first known public defence of colloquial poetry as an art form possessing aesthetic merit is that penned by Ibn Khaldūn [q.v.] in the 8th/14th century in the final sections of his Mukaddima. Many of these literary and religious tensions have indirectly affected perceptions of the status and function of the folk poet; despite the negative views espoused by both literary figures and religious scholars over the centuries, Arabic folk poetry has survived as a vibrant and rich force in Arab culture.

In many communities a significant portion of the adult population is expected to display competence as composers and/or participants in various common genres of folk poetry. Such is the case with the bāla for men in North Yemen tribal areas, the women’s ghanīma among the Awlād ‘Āli Bedouin of Northern Egypt, the sāmār or sāmīr of the Arabian Gulf, and the kāfūl and zādīna song forms among women in western Algeria, among other examples. General participation in singing genres such as wedding and work songs, which include the composition of spontaneously improvised verses, is widespread in rural areas of Egypt, Palestine, Lebanon, Morocco, Saudi Arabia, Sudan, Yemen and elsewhere. In many cases, these poetic/song genres are specific to one gender or one social group. These communal forms of poetic composition and performance, however, do not usually confer the title or status of “poet” upon participants, but rather are regarded as basic social activities within the community.

The concept of shā‘ir as a distinct social category in different traditional communities is delineated by various combinations of social, economic, ethnic, and literary considerations. The term shā‘ir may refer to an ordinary individual with a particular talent, a specialised but non-professional social function within the community, a professional artisan of either high or low status, an ethnically marginal and even predatory figure, or the paid performer of a single particular genre. Depending upon the genre and the region, shā‘ir may indicate primarily a transmitter of previously composed poetry, a figure who pre-composes pieces which are then performed by himself or others, or an extemporising performer whose spontaneous creations are rarely preserved except anecdotally. In addition, in almost all rural areas and in lower-class urban settings of the modern Arab Middle East, the literary concept of “poet” exists alongside the concept of the local, traditional folk poet. To label an illiterate older man a shā‘ir in village conversation may indicate a proficiency in composing and singing a colloquial, improvised form of folk poetry; to apply the term shā‘ir to a young college-educated man, the same community may indicate an entirely different ability to compose written poetry in literary Arabic which is recited but not sung.

The distinction drawn between poet (shā‘ir), reciter (rādūt), and singer (mughannya or måžir) in literary histories is often blurred within the domain of folk poetry and song; in many communities, however, this division of labour is maintained in a highly articulated system. Such is the case in North Yemeni tribal poetry of the Khawālīn al-Tiyāl region. A spectrum of poetic forms exists there ranging from widely-practised genres such as the improvised bāla performed at weddings and other celebratory occasions by most adult males, to the kāsida which is pre-composed by an individual poet (kāsūd or shā‘ir) and then usually passed on to a dīghān (town crier) or a mulūḥīn (composer/singer) or sāḥīh (declarer of tribal poetry) who performs it publicly.

In Lebanese colloquial poetry, a poet of zajāl [q.v.] verse may be referred to as a zajājīrāh (a composer of zajāl vernacular poetry), a term which implies a lack of ability to spontaneously or extemporaneously compose when contrasted with a kawāsīl (a performer or “speaker” of zajāl) or shā‘ir. The latter term in modern times has also come to connote a literate composer of written zajāl. Amongst the Sinai and Negev Bedouin, a composer adept at spontaneous improvisation is termed a kaddīr rather than a shā‘ir. Such contrasting sets of terms gloss gradations of ability, social origin, performance roles and even gender in various regions of the Arab Middle East.

In those regions where the function of performer is distinct from that of composer, the public performers of poetry are often accorded far less respect than the original poet and are in many cases from marginal social groups. Afoil Musil’s brief but now classic description of poems among the Lāl Bedouin in Northern Arabia from the early 20th century presents such a bifurcation in the status of the tribal poet. Musil documents the Rwala’s intense love of poetry and poetry-making alongside their belief that a poet cannot be trusted, as expressed in the proverb: kāsūd kaddīhāb “a poet is a liar” (Musil, 283). In addition, he notes the general lack of esteem with which Rwala men regarded itinerant or beggar poets, who are deemed predatory social figures often suspected of lying and stealing. In North Yemen, the performing figures of dīghān, mulūḥīn, or sāḥīh mentioned above, are all granted considerably less status than the composer of a kāsida. This respect for the art of poetry-making coupled with widespread distrust...
of those persons who are either paid or seek remuneration for their public performance of that art is found in many communities of the Arab Middle East.

However, the opposite situation is also found, even among the Bedouin tribes of Jordan. Among these groups it is considered honourable to recite poetry, but not to compose it. Among the Balkš tribes of Jordan, for example, the term shārīr was traditionally applied to men who sang to the accompaniment of the rabīha (Arabian one-string spike-fiddle) for pay and who composed praise poetry for men of noble lineage or for political patrons of their clan. All men can recite poetry without having their reputation tainted, but to compose poetry implies socially sub-ervent, even slave, status and a lack of political power. The preferred situation is to have others compose poetry about you and your family, poetry which may then be recited by one and all. To compose poetry means that a man is either not powerful enough or noble enough to be the recipient rather than the producer of poems.

A social function filled by folk poets in many areas is that of oral historian. A large portion of the poetry of a community may be devoted to the preservation of historical knowledge concerning lineages, conflicts, heroic deeds, and other defining elements of the group’s present identity. The folk poet may be considered a poet not primarily for his/her ability to compose new poetry, but rather for the ability to memorise and transmit a body of poetry from the past. As communal identities are in constant flux, a folk poet may serve the key function of maintaining and performing one specific view of history, one local identity, in a market place of competing poetic traditions which document other constructs of the same historical events. Where such historical poetry is widespread, it is almost always linked to prose narratives recounting the events touched upon in the poem; indeed, it is common for the main historical information to be embedded in the accompanying narrative while the poem itself may provide only a rather cliché description of battle or some other common motif.

The two parts function as a single discursive unit each lending the other validity. The poem is thus rendered comprehensible and meaningful when performed along with its narrative; the story is given authority and historical substance by the presence of the poem. This view is documented by a statement from the Balkš Bedouin of Jordan: “A story without a poem is a lie (al-qissas tilī na’tandhī gasūla hādīh). The interactive role of poetry and narrative in the functioning of the poet as historian is also documented in the Arabic peninsula and the Sinai and Negev deserts.

In many regions, the division between professional and non-professional poets lies not only in the financial realm but also in the musical aspect of the performance. Those genres of poetry which are performed in full singing voice and/or to the accompaniment of instrumental music are nearly always the domain of professional performers. The term shārīr is often applied within a community to either the musical or non-musical performer, but rarely to both.

In areas where genres of poetry, song and/or dance are an integral part of social occasions and celebrations, folk poets at times exist as respected specialised artisans whose status as recognised craftsmen is untainted by the fact that they are professionals who perform for pay. Such is the case with performers of various genres in the Palestinian, Lebanese, and Syrian folk poetry common to weddings and other festivities. Performers of the Palestinian kisidh, hāda and karrādi, for example, are virtuoso performers of improvised verse who perform as solo singers or in poetic duels pitting one poet’s skill against other poets or audience members. Poetic duelling involving two or more poets improvising spontaneous verse is found in many other regions, including Arabia, Lebanon, Palestine and Turkey. Poetry of these genres is thus a discourse which emerges through the figure of poet in competition and contest. These exchanges may take the form of insult matches or be based upon other themes including sharp political and social commentary on local affairs. Non-professional participants at times enter into the competition, but if a regional class of recognised professional performers exist, they usually dominate the performances.

The term shārīr may refer to an ordinary person who happens to compose poetry or it may gloss a whole complex of social marginality and outsider status. In the example of North Yemen, the composing poet is understood to be an ordinary individual with a particular talent or poetic inspiration (ḥādīh). He plays a role not only in maintaining tribal honour and identity through the composition of praise poetry but may also play a political role in local dispute resolution, which is conducted in poetry, and occasionally even at the level of national politics. Similarly, in the Lebanese, Syrian and Palestinian traditions, a poet is a gifted individual. In some communities, however, professional poets may be viewed as possessing different social or even ethnic origins. Such is the case of the professional singers of the oral folk epic Strat Bani Hīlāṭ in Egypt, the Slubba of the Arabian peninsula, and to a lesser degree, the slave-poets of Jordanian Bedouin tribes.

Egyptian performers of the Strat Bani Hīlāṭ are hereditary professional performers most often from marginal social groups grouped together under the rubric of Gypsies (shaqṣaṣ). The epic singers are perceived as both the source of an appreciated art form, the epic itself, and a source of public praise or blame due to their ability to insert social commentary aimed at individuals, groups, or local political situations into their performances. This power is frequently a source of anxiety and tension in small communities and the poet is therefore often accorded great displays of respect in performances, while often denigrated and shunned outside that context. In the Nile Delta region of northern Egypt, almost all epic singers are ethnically from the Hālabī and Wālij groups commonly known as Gypsies. Since the terms Ḥalabī and ghaajar are considered derogatory, the epic singers and their families are referred to as shārīr (pl. of shārīr) whether or not the individual in question is a performing poet and whatever their current occupation; the term carries an almost ethnic significance.

Performers of other genres of folk poetry are referred by other terms such as munṣūl, maddīh, or simply shaqṣaṣ to avoid the locally-stigmatised status of the term shārīr, which has come to mean Gypsy poets who perform on the nābah (a string-fiddle and the Egyptian two-string spike-fiddle). The Egyptian munṣūl and maddīh, by contrast, are also folk poets, associated primarily with a religious repertory; neither, however, are commonly referred to as a shārīr.

Although most forms of folk poetry are oral in both composition and transmission, in some forms of folk poetry the boundaries between the written and the oral are not distinct. This is the case of the Egyptian munṣūl, who utilise both fragments of classical poetry and improvised sections in colloquial Arabic, as well as genres of folk poetry and the religious song-tales, kisas dīnjya or kisas al-mashidhīk (“religious stories” or “stories of the shaqṣaṣ”), who
often rely upon literate ghost-writers and written forms of transmission for the content of their partially-improvised performances. Whether or not these are to be treated separately as "popular" rather than purely "folk" poetry, this interactive process is not a purely modern innovation but rather has been going on for centuries.

Performers of religious folk poetry transmit a body of traditional lore which greatly shapes the views of many believers in rural and lower-class urban areas about their religion, whether they be Christians or Muslims. Though the repertory itself may at times be referred to as "poetry," or even "song," purveyors of these traditions are rarely if ever referred to as "poets.

The use of the female form of the term ghā'īr appears to be quite limited. In most folk cultures of the Arab Middle East neither the male nor the female form of the term "poet" are applied to the composition or performance of genres of communal singing or poetry-making but rather only to individual public performance or composition, and within that realm the term is most often used for the composition of pre-composed rather than improvised genres. (The ghā'īr as performer of Lebanese, Palestinian, and Syrian improvised zajal and 'abba, however, is a notable exception to this rule). Since the majority of women's poetic genres are not public performance genres, the large repertoire of memorised poems; the additional value attached to the work of other poets, alive or dead. Both, how-ever, new poetry versus a reciter who primarily performed the earlier with professional status, the musical dimension applied to a specific type of performer distin-guished respectively a poet who actively composed the performance of genres of communal singing or poetry-performance, and within that realm the term found little usage. There is still, however, regre-tably little documentation of the terminology used among women for performers of women's poetry.

In the classical Arabic literary tradition, ghā'īr has most commonly been contrasted to the term ḍā'īn, indicating respectively a poet who actively composed new poetry or a reciter who primarily performed the work of other poets, alive or dead. Both, however, were expected to be capable of performing a large repertoire of memorised poems; the additional ability to compose was the feature which distinguished the ghā'īr. This distinction is still maintained in some communities of the modern Arab world. It is, however, far more common in traditional communities to find ghā'īr applied to a specific type of performer distinguished by the financial remuneration given to a performer with professional status, the musical dimension of the performance in the form of either the use of instrumental accompaniment or simply by the use of full singing voice (in contrast to recitation or chanting), or to a specific class of performer marked by a different social origin or status. Despite the overall respect accorded literate poets and both literary and oral poetic traditions, ghā'īr in Arab folk society just as often indicates a suspect or ambiguous social figure as it does a respected artist.

Bailey, Bedouin poetry from Sinai and the Negev, Oxford 1991; S.C. Caton, "Peaks of Yemeni performance", in the emphasis is on the technical skills and the knowledge writers of poetry should command. The term was excluded from the proper behaviour in their dealings with a patron of their art picture the poets as participants in social life.
on an equal footing with other courtiers. Together with physicians, astrologers and other scholars, one finds poets mentioned among the nadims [q.v.], the personal circle of people with whom a royal patron would spend his leisure time. The Seldjuk sultan Alp Arslán even preferred the company of poets (Nizāmī 'Arūḍī, 69). To Kay Kâwûn the profession of the poets was a branch of learning, not a craft like that of the minstrels (op. cit., 157). He strictly limits minstrelsy to the serving role of a performing art and consequently does not allow the performers to mix freely with their audience. The minstrel should act as the dispenser of the poems written by others and avoid his own compositions in his repertoire (ch. xxvi, 193-7: dar āyûn-u rûm-i khamyângâr). Another classic statement of the professional qualities of poets is the second discourse in Nizāmī 'Arūḍī’s Ḍahār makâla (42-86: dar māhīyyat-i ʿim-r-i šav ʿašâtāt-i ʿadīn). In a terse description of the professional life by learning a large quantity of lines from the works of ancient and modern poets by heart. He should further subject himself to the supervision by an accomplished master (ustād) of the art. The ability to improvise poems (baddīha guftûh) was regarded as the poet’s greatest asset in social life. Equally interesting are the examples which Nizāmī ‘Arūḍī gives of incidents and situations characteristic of the profession in a series of anecdotes about the lives of famous poets. They exemplify the effects of poetry on the mind and the acts of a patron, the ways to get entrance to a court and the strategies for gaining a handsome reward, but also the mishaps in the careers of poets.

In these early reflections on the ways and conditions of the poet (often referred to by the abstract noun gūftūh), it is always understood that he was primarily a professional encomiast. To the anthologist ‘Awfî [q.v.], the literary scene was occupied by only two protagonists: on one side there were the panegyrist (madīḥkān) and on the other the patrons, the “praised ones” (mamdīkhān), who “with perishable goods bought themselves lasting remembrance” (Lubāb, i, 7). At least until the 6th/12th century, the courts of local Persian and Turkish rulers provided the normal environment for poets, who could make a living by providing these courts with poetry, both for ceremonial purposes and entertainment. The relationship between poet and patron was therefore one of mutual advantage. The idea that poetry was an important means to enhance reputations gave it a great political value, not only to rulers but to everyone who held a position of influence near the seat of power. The mechanism by which this kind of publicity could work was specifically the mentioning of a patron’s name in a panegyric discourse which was most often written in the form of a kasīdâ [q.v.]. The effectiveness of this depended on the survival of such poems and their distribution after they had fulfilled their original function. The artistic reputation of the poet was, therefore, also a matter of great advantage to his patron. Through the copying, collecting and transmission of poems in editions and anthologies, the products of the poet’s art could overcome the barriers of time and space.

To become a court poet one should not only have had the prescribed education and training; it was equally necessary to find the proper way to get introduced. The mediaeval courts, which attracted a large number of courtiers, even of the poet laureate (mālīk al-shu‘ārāʾ [q.v.]) for the selection of candidates, but this was only one of the possible approaches to the favour of a royal patron (see, e.g. the anecdote about Mu‘izzî’s entrance to the court of Sandjar as related by Nizāmī ‘Arūḍī, 65-9). The obligations of the court poet included first of all the presentation of ceremonial poems at a number of fixed occasions like the Persians’ seasonal feasts (Nawûriz and Mīhrān [q.v.] and the Islamic ‘id al-fitr ending the month of fasting, as well as every other event where formal odes were in order: at birth or death, in war or at hunting parties, at the foundation of buildings and of pleasure gardens. In addition to these occasional poems, he also wrote compositions which were meant to entertain the court. They consisted of short lyrics, from which eventually the classical Persian ghâsîl developed, and narratives in mathnawîs [q.v.]. The heroic and romantic stories represented in the latter form exemplified codes of behaviour both to rulers and courtiers. Besides, the poet was expected to provide food for thought through wisdom formulated in poetry. In a gibe at a fellow poet the Sâmānîd poet Shahîd-i Balkhî [q.v.] reproached him for not having the necessary wisdom, pleasure and elegant wit (dam) (G. Lazard, Premiers poètes, ii, 31). A poet should therefore be able to handle the entire range of forms and genres available in the literary tradition put at his disposal. The rewards he could expect were of an accidental nature and depended very much on the whims of the patrons. Lavish remunerations, mentioned in anecdotes, were usually spontaneous reactions to improvisations and show the great appreciation of verbal virtuosity and sharp wit. The gifts requested by poets in their poems consisted not only of money but also of kind, among which pieces of clothing are conspicuous. A mālīk al-shu‘ārāʾ [q.v.] could hope to receive the more regular income usually attached to an official post (cf. Nizāmī ‘Arūḍī, 66). It was not uncommon that poets fulfilled other duties at a court. By doing this they ran the normal risks of an official career, as the example of the disgrace of Masūd-i Sa’dî Salâm [q.v.], caused by his association with a rebellious Ghaznavid prince, showed in a manner which has remained exemplary. Professional rivalry was a new thing in court life. Nizāmī ‘Arūḍî (73-5) gives the example of the struggle between the poets ‘Am’āq [q.v.] and Ragḥûdî for the first position at the court of the Kara Khânîds or Ilek Khânîs [q.v.]. Fraternal animosity within the profession gave rise to a huge corpus of satire in Persian literature. The weapon of poetical invective was also effective against patrons who did not fulfill the expectations of poets.

It is too narrow a view to restrict the Persian poet, even of the earliest period, to his role as a court poet. Poetry, which was highly appreciated because of its association with eloquence [see further, gūfn], led to the erudition of every educated person. Many anthologies have special sections with poems composed by kings, viziers, scholars, shkâhs and other dilettante poets (see, e.g. ‘Awfî, Lubâb, i, 22 ff.). As is often emphasised in handbooks of poets, prose writers were also expected to have a critical knowledge of poetical techniques and to be able to use poems in Arabic or in other languages. The value attached to wisdom in poetry, a legacy from pre-Islamic Persia, gave the poet the additional dignity.
of a sage whose maxims and epigrams provided spiritual food to patrons and other readers alike. Already Rudaki, who in the 4th/10th century was the first successful court poet in the history of Persian literature, was also a poet of wisdom, representing a type of poet which the tradition used to honour with the epithet ḫakim. Among his contemporaries were the philosopher-poet Shahid-i Balkhi and Abu Shakhūr, who wrote the earliest didactic poem in Persian known to us. During the 6th/12th century, when a display of learning and knowledge of Arabic vocabulary became fashionable in Persian poetry, the type of the poet ḥaṭīṣ appeared more clearly. Anwārī and Ḵẖānḵānī [q.v.] were particularly representative of this trend, as was Niẓāmī [q.v.] of Ghur who applied it to narrative poetry. Whereas the first two had to resign themselves to the traditional role of a court poet, whether voluntary or not, Niẓāmī seems to have been able to keep a certain distance from the patrons to whom he dedicated his maḥnawī poems.

The use of Persian poetry for religious purposes is for the first time attested in the Ismāʿīlī propaganda, to which the philosopher Abu ʿl-Hayṯam Gurgānī, a contemporary of Rūdākī, was attached. Kūshūr [q.v.], whose religious denomination remains uncertain, seems to have combined the ways of a court poet with an ascetic orientation of his poetry. In the 5th/11th century the prime example of a poet distancing himself from the conventional framework of the art was Naṣīr-i Khusraw. [q.v.], another follower of the Ismāʿīlya. In strong terms he scolded the court poets for their venality and insincerity (cf. S.H. Takfzade, Diwdn, Introd., p. 1-2), These incriminations of the established ways of ḡaṭīṣ are the earliest instances of a topos which was further elaborated by many later poets, to begin with, in the early 6th/12th century by Sanāʾī [q.v.]. The remarkable turn Sanāʾī made from a probably not very successful career as a court poet to the service of patrons belonging to the religious classes, both preachers and mystics, is the first well-documented case of such a change in practice. Subsequently, dependence on secular patronage was not a matter of course in a poet’s life, although for centuries to come the courts continued to provide poets with the best opportunities for a professional career. Among the great mystical poets following in Sanāʾī’s footsteps there were many who dispensed with secular patronage altogether, like Farīd al-Dīn ʿAttār [q.v.], whose poems are free from any panegyrical references. In praise in the poems of the secular encomiast. In more recent times, the cassettes of great mystical poets following in Sana’ī’s footsteps, the cassette provided another medium which has made it possible to reach a wide and anonymous public.

Even after the rise of the Pahlavi dynasty, when the free expression of political views was curtailed, there was no return to the old ways. Poets found employment in government offices, at the newly-founded universities or in the modern news media. In their art, they took their models from contemporary Western literature rather than from the classical Persian tradition. As lyricists they used poetry as a means for expression of personal emotions and ideas, whether in only slightly modernised classical forms, or in the new poetry which was introduced by Nima Yūsufī [q.v.]. In numerous manifestos and essays, reflections on the role of the poet, both as an artist and as member of society, can be found. They show that a commitment to social and political causes has remained a generally accepted part of the modern Persian poet’s self-image. Although the democratization of literature is an avowed aim of all modern poets and prose writers, the modernisation of style and idiom which has dominated Persian poetry since the Second World War, has created a serious problem of communication with readers, to whom sophisticated modernisms are difficult to understand. Together with the negative effects of censorship or the alienation caused by living in exile, this tends to isolate the modern Persian poet from his public. Attempts to organise literary artists professionally, such as the First Congress of Iranian Writers held in 1946 or the short-lived Writer’s Union of the 1970s, have not led to permanent institutions.

3. In Turkey.

Since poetry constituted the principal literary genre in the Turkish experience from its earliest times until the latter part of the 19th century, and still holds a significant place in Turkish culture, the role of the poet, pre-Islam, Central Asia, the period of nomadic life and migrations into Asia Minor, throughout the Seldjuk era and the Ottoman centuries, was a dynamic, interactive, and influential one.

The term şair (spelt şair in modern Turkish) probably came into use no later than the middle of the 11th century. Earlier, Central Asian Turks employed several different terms for "poet", e.g. odun, bağıt (baghit), and others. Poets who functioned as shamans and performed ritualurgy were known as şamant or ham (the latter among the Uyghur Turks). In Central Asia, a larger and more precise vocabulary emerged in time, corresponding to minstrel, bard, folk poet, singer of epics, etc.

Among the Turks of Asia Minor, şair became established, and continues to be employed, as the generic term meaning "poet", especially in reference to the educated poets in the urban areas. For folk poets, the Central Asian Turkic word şair still applies; however, the minstrels of the countryside who compose (or often extemporise) their poems as lyrics of songs as they accompany themselves on a simple string instrument are called saz şairi or aşık [see aşık, aşa]. The Ottomans, however, called their city poets şair. The term is still in extensive use, although supporters of the Öztürk ("pure Turkish") movement, dedicated to the cause of ridding the language of words borrowed from Arabic and Persian, employ şair in lieu of şair. In pre-Islamic settled and nomadic Turkish society, poetry played a focal role in communication and entertainment, and strengthened solidarity and cultural cohesion. Unable to create works of architecture and other genres produced by secure sedentary nations, most Turkic communities concentrated on poetry, music and dance. Given the dominance of the spoken word among them, shamanistic poets enjoyed a special influence. Poetry was an integral part of religious experience and communal ritual; pre-hunt ceremonies (sığa) and post-fight feasts (şölen) as well as weddings and funeral services (jug) featured poetry.

The Book of Dede Korkut [q.v.], generally recognised as the Turkish national epic, with more than a third of it in poetic form in the transcriptions made several centuries after its gradual evolution in the oral tradition, has as its narrator (as well as a principal character) the sagacious religious leader as well as a poet. He stands at the wellspring of the traditional conception in the Turkish countryside of the poet as a revered figure who combines in himself such functions as moral guidance, conveying of communal values, entertainment and education, and heightened verbal communication. Many bards were close to the leadership of the community, and some leaders were poets themselves.

The first major written poetic work in Turkish (ca. 1070), a mirror for princes, is the Kutadghu bilig [see Kutadghu bilig, (The Book of Wisdom, or Rule of the glory)] by Yücef Hâddî Hâdîgî, a Karakhanid chancellor-poet. Emphasising the importance of speech ("Human be-
and by independent authors who stayed within this tradition of the educated elite's classical verse, often enabled its practitioners to enjoy prestige and influence. As E.J.W. Gibb pointed out in his A history of Ottoman poetry, two-thirds of the sultans wrote poetry. As patrons, they were favourably disposed to rewarding the poetic works presented to them. Suleyman the Magnificent (d. 1566), whose personal divan contains nearly 3,000 verses, had a close relationship with numerous poets, especially with Bâkî (d. 1600 [q.v.]), who held an esteemed position, referred to as sâlûn al-gharâ'în (“sultan of poets”), comparable to “poet laureate”, although no such title existed in the Ottoman system.

Various prominent poets occupied important positions: Shaykh al-Islâm Yahyâ (d. 1644), one of the greatest lyric poets of the Diwân tradition, served for four decades as bâkî ‘asker and shaykh al-Islâm. It is difficult, however, to determine whether Yahyâ and others rose to high positions thanks to their poetry, or if they qualified for other reasons but also happened to write verse as well. By the same token, no definite determination can be made about the awarding of the honorific title of pasha to such poet-statesmen as Râghîb Pasha (d. 1763) and Dîyâ’î Pasha (d. 1880).

Among the Ottoman educated elite, composing verses was virtually a sine qua non of being an intellectual. Poetry not only held a privileged place, but often served in ways that are normally in the realm of prose (verse chronicles and histories, internal rhyming sine qua non of being an intellectual determination can be made about the awarding of the honorific title of pasha to such poet-statesmen as Râghîb Pasha (d. 1763) and Dîyâ’î Pasha (d. 1880).

Various prominent poets occupied important positions: Shaykh al-Islâm Yahyâ (d. 1644), one of the greatest lyric poets of the Diwân tradition, served for four decades as bâkî ‘asker and shaykh al-Islâm. It is difficult, however, to determine whether Yahyâ and others rose to high positions thanks to their poetry, or if they qualified for other reasons but also happened to write verse as well. By the same token, no definite determination can be made about the awarding of the honorific title of pasha to such poet-statesmen as Râghîb Pasha (d. 1763) and Dîyâ’î Pasha (d. 1880).

Among the Ottoman educated elite, composing verses was virtually a sine qua non of being an intellectual. Poetry not only held a privileged place, but often served in ways that are normally in the realm of prose (verse chronicles and histories, internal rhyming in many prose works, even a few dictionaries and text books in verse form, etc.). Occasionally, sultans, princes, grand viziers, commanders and other notables sent or exchanged communications composed in metre and rhyme. Such occasional verse, especially in retrospect, is disqualified as poetry, which, in its proper sense, can be made about the awarding of the honorific title of pasha to such poet-statesmen as Râghîb Pasha (d. 1763) and Dîyâ’î Pasha (d. 1880).

Various prominent poets occupied important positions: Shaykh al-Islâm Yahyâ (d. 1644), one of the greatest lyric poets of the Diwân tradition, served for four decades as bâkî ‘asker and shaykh al-Islâm. It is difficult, however, to determine whether Yahyâ and others rose to high positions thanks to their poetry, or if they qualified for other reasons but also happened to write verse as well. By the same token, no definite determination can be made about the awarding of the honorific title of pasha to such poet-statesmen as Râghîb Pasha (d. 1763) and Dîyâ’î Pasha (d. 1880).

Among the Ottoman educated elite, composing verses was virtually a sine qua non of being an intellectual. Poetry not only held a privileged place, but often served in ways that are normally in the realm of prose (verse chronicles and histories, internal rhyming in many prose works, even a few dictionaries and text books in verse form, etc.). Occasionally, sultans, princes, grand viziers, commanders and other notables sent or exchanged communications composed in metre and rhyme. Such occasional verse, especially in retrospect, is disqualified as poetry, which, in its proper sense, was written by the Âlîr, a professional poet with a firm commitment to the art and with established credentials as a creative artist.

Satire and other types of criticism frequently entailed deprivation and punishment. Poetry could be a matter of life-and-death in many stages of Ottoman history. Because of their unorthodox, heretical or rebellious attitudes expressed in verse, Nesîmî (d. 1431) suffered injustice; ‘Izzet Molla, Nâmîk Kemâl [q.v.], and many others, were penalised, imprisoned or sent into exile in the last century of the Ottoman state.

Inasmuch as poetry was a principal means of communication and criticism, many poets were taken very seriously and punished as dissidents or subversives not only for their outright objections, but sometimes even for their allegorical or subtly metaphorical statements. Some classical poets renounced their own credibility: One of the foremost poets of the 16th century, Fudjûli [q.v.], wrote the famous line “Do not be deceived, the poet’s words are surely lies.”

In a sense, mystical poetry expressed a continual opposition to mainstream Islam, and often endeavoured to undermine the theocratic establishment. Through a three-level disguise, whereby they extolled the “darling-king-God”, the Âlîr’s complained of the cruelties inflicted by the “beloved”. The Âlîr’s and the ascetics of the Naqshbandi order, by their regeneration of a pantheistic, Turkic, rural value-system, seemed to maintain a frontal opposition to the Empire’s central authority as well as offering a quasi-secular challenge to Islamic culture. Tökö or dervish convent poetry, abundantly produced by poets linked with the various Anatolian sects, often functioned as an expression for the heterodoxy.

Consequently, the instance of rewards, high positions and financial gains notwithstanding, Ottoman poets were, on the whole, outside the religio-political system, often opposed to it, and sometimes in rebellion against it. Especially in the Empire’s closing decades, some foremost poets, for example, Nâmîk Kemâl (d. 1888) and Tewfîk Fikret (d. 1915 [q.v.]), played a procedural role in mobilising public opinion against the Ottoman régime.

Under the influence of accelerating Europeanisation of Turkish culture, the concept of the poet, held by the Ottoman élite, as virtually divinely-inspired or as possessing spiritual and visionary powers of an extraordinary nature, gave place to the idea that, although an apolitical stance is natural for many lyric poets, it is a respectable mission for politically-conscious poets to give expression to ideological convictions. Tewfîk Fikret championed social and governmental reforms, taking a stand against many aspects of Islam, whereas Mehmed ‘ÂrifÊrsî (d. 1936 [q.v.]) propagated the Islamic faith as a panacea for the decline of the Ottoman state. Dîyâ’î (Ziyâ) Gökâl (d. 1924 [q.v.]) and Mehmed Emîn Yurdâkul (d. 1944 [q.v.]), in their verse written in a simple, colloquial vocabulary, furthered the cause of Turkish nationalism.

The strongest voice for revolution based on Marxist-Leninist ideas came from Nazîm Hikmet Rân (d. 1963 [q.v.]) who also introduced brave new innovations to the formal structure, prosody, and tenor of 20th century Turkish poetry. Proclaiming that he conceived of art as “an active institution in society” and that “the poet is the engineer of the human soul,” he assigned to himself and other poets the task of “organising life”. As a romantic revolutionary with superlative creative talent, as a result of which he achieved extensive fame not only in Turkey but in scores of other countries as well, Nazîm Hikmet was probably the most potent Turkish voice for Communism in the 20th century. For his combative ideological poems, he spent about thirteen years of his life in prison and lived in exile for a dozen years.

Following the path opened by Nazîm Hikmet, hundreds of modern poets in Turkey, including leftists and non-leftists, produced a huge corpus of verse dedicated to political themes, social ills and evils, peace and justice. Some poets virtually functioned as journalists, frequently commenting on socio-economic problems. By the end of the 20th century, the role of the poet was established as a champion of democratic ideals. Non-political verse, however, continues to flourish as well.

and from the neighbouring regions where the Persian language represented the dominant cultural influence. In the beginning, the number of poets who came to India was comparatively small, but it multiplied sharply after the establishment of the Mughal rule in the 16th century. The Mughal court was famous for its munificence and attracted poets keen to seek their fortune outside their native land. This resulted in the influx of many gifted poets, and the centre of Persian poetry gradually shifted to India.

Persian poetry in India was an object of interest and entertainment for the Muslim upper class. The social and political conditions in which it developed may account for the hope and energies of most poets tended to gravitate. Gaining access to it signified for the poet the highest recognition of his achievements and talents. Muslim rulers, generally speaking, were men of taste and showed their appreciation for literature by surrounding themselves with poets and writers. Thus the historian Abu l-Fadl gives a list of 51 poets who were in the service of Akbar (r. 963-1015/1556-1605). However, it was not easy to obtain admission to the royal court. The poet Kalim (d. 1061/1651) [q.v.], for instance, came to India during Shah Jahan's reign (1014-67/1605-27), but had to wait a long time until he secured entry to the court of Shâh Jahân (r. 1037-68/1627-57). Very often the poet needed the help of some influential nobleman for his access to the royal court. It was customary for important noblemen, and even lesser dignitaries, to keep poets and other literary men in their employments. The name of 'Abd al-Rahîm Khá'n-i Khá'nân (d. 1036/1627), Akbar's principal dignitary, stands out in this connection. His generous patronage benefited a large number of poets and has been praised by every writer. Another source of patronage consisted of the provincial courts, some of whose rulers, such as the 'Adîl Shâhí (q.v.) of Bijnâr (895-1097/1490-1586) and the Nizâm Shâhí (q.v.) of Ahmadnâga (895-1046/1490-1636), were noted for their liberal support of art and letters.

The poets were paid a monthly allowance and could receive a robe of honour and a monetary reward for their performance on special occasions. Some poets became recipients of land grants, and some were made holders of military or civil command (manaddâr). Among the poets who came to India, several returned to their fortunes were made, while others, such as Nasirî (d. 1021/1612), Tâlib Amûlî (d. 1036/1626-7), and Kalim, stayed on the till end, and found their permanent resting place in the soil of their adopted country. There are several instances where a poet was called upon to perform duties unrelated to his vocation. Atâtîr of Khânâdâr (d. 973/ 1565-6) was a chronicler in Babur's (r. 932-7/1526-30) service, and later held high offices in the government; Shâhîkk Qâdî'î of Dihlî (d. 976/1569-9), who was a scholar and poet of Humâyûn's reign (r. 957-977/ 1530-40 and 962-3/1555-6), occupied the high position of sadr (director of religious affairs [see sadr, 5]). In Mughal India), under Akbar; Faydî (d. 1004/ 1595-6) [q.v.] was appointed tutor to Akbar's son Dâniyâl, and led government embassies to the Deccan rulers; and Dâhângîr's court poet Tâlib Amûlî acted initially as the seal-keeper of tîmâh dâlwa (d. 1621), the father-in-law of the emperor and a leading dignitary of the empire.

The court poet was supposed to dedicate his art to the service of his patron. In return for the wages received by him, or in the hope of obtaining further rewards, he composed praise poems eulogising his benefactor. This promoted the development of the kadish, whose main exponents in India were 'Urîf (d. 999/1590), Tâlib Amûlî, Kushtâ (d. 1056/1646), Kalim and Muhammad Kulf Salâm (d. 1057/1647-8). Some poets were also assigned the task of writing dynastic histories in verse—a tradition that started already with the Dihlî Sultanate (1056-1265). Amîr Khusraw (d. 725/1325) composed the Tughluk-nâma, which sheds light on the latter part of the Khâdîjî rule (689-720/1290-1320) and the early period of the Tughluk régime (720-816/1320-1413). Muhammad b. Tughluk's (r. 725-52/1325-51) poet Badr-i Câcî (d. 747/1346-7) composed the Tughluk-nama, a detailed account of the military expeditions of the sultan. 'Isâmî (b. 711/1311) was the author of a verse account of Muslim India from the Ghaznavids up to the mid-8th/14th century, entitled Fâtih al-sâlihat "Victories of the sultans", which he completed in 750/1350-50 for 'Alî b.-Dîn Abu l-Muzaffâr (d. 759/1358), the first ruler of the Bahmânî dynasty of Deccan (748-934/1347-1528). Also from the same period came the history of the Bahmânî dynasty mentioned above, started by 'Adîlî, the court poet of Ahmad Shâh Bahmânî (r. 822-39/1422-36), and subsequently expanded by Kâfirî and other poets. To the Mughal period belongs Kalim's Shah Dâhn-nâma, which deals with the Mughal rulers and their Tumûrid ancestry down to the reign of Shâh Dâhnân. Another work dealing with Shâh Dâhnân's reign is the Fuzûr-nâma "Book of victory", by Kushtâ, which gives a verse account of the emperor's exploits.

A common practice among the court poets was the composing of poems with a chronogram commemorating an event of special importance. By the time of Humâyûn, the making of chronogram poems became steadily popular. They treated of such events as the births, deaths and weddings of the members of the royal household; imperial coronations; victories in battles; hunting exploits; and launching of building projects and their completion. An interesting example of this kind of verse is a poem by Šâdî Grânî (q.v.), of which only a fragment has survived. A poem is said to have comprised 134 couples, of which each hemistich represented a chronogram.

It was the duty of the poet to defend and uphold the dignity of his royal patron as and when the need arose. Illustrative of this tendency are two examples, one by Faydî and the other by Kalim. In the first, Faydî is represented as improvising a poem of two couplets, which eulogised Akbar, and was intended to be a rebuttal of a similar poem written in praise of Shâh 'Abbâs I of Persia. The second example shows Kalim defending Shâh Dâhnân, who had been reproached by the sultan of Turkey for the audacity of calling himself the "king of the world" when he was only "king of India". "Since Hind (India) and ðâhib (world)," wrote Kalim in his reply, "are equal in their numerical value, the right of the ruler to be called "king of the world" is well-established!" Hind ðâhib zî râ râ, ðâhib-î din yâr dâlwa yâr dâlwa (shâh-i ðâhib-î hindâ mahbûr-hân ast).

The highest rank among court poets was held by the maîlîk al-qulûbî, an institution established in the Mughal period. The designation of the maîlîk al-qulûbî was perhaps a title more than anything else, and did not constitute a regular post in the government. However, it involved a number of duties. As a member of the royal train, the maîlîk al-qulûbî accompanied the ruler wherever he went. He was supposed to take part in special functions and events in the court, and to present his poem for the occasion. Every new poet sought his favour and good offices
for gaining entry into the court. He chose the poets who were to recite their verse in the royal presence, as well as those to be rewarded and honoured. His appointment was made by the ruler, and implied the official recognition of the poet's superiority over his colleagues. The tradition of appointing the *mash'ir* was started by Akbar and survived until Aurangzeb's time (1656-1707), when it was discontinued by the orders of the emperor. During this period, four poets served thus: Ghazâlî Mughhdî (d. 980/1573-74), followed by Faydî, under Akbar; Ta'lib Amuli under Dâhângir; and Kalim under Shah Dâhî.

Apart from the court, *Şûfsâm* was the next most important platform for the poet's activity. After the conquest of northern India by the Muslims, various Şûfî orders were established, such as Cîşhûyya, Suhrawardîyya, Nakshbandîyya and Kâdîrîyya. In India, poetry was the chief vehicle through which Şûfî ideas were disseminated. The preoccupation of the poet with Şûfîm went beyond mere intellectual interest; very often poets had a practical involvement with the spiritual themes of life, either with a Şîfî centre (*ţâbâkat*), or as members of an order, or as disciples of some spiritual director. Amir Khusrâw, the most eminent Persian poet of India, though serving under successive sultans, was the favourite disciple of the Cîshtî şâyâkî Nîzâm al-Dîn Awwlîyyâ (d. 723/1323 [q.v.]), and so was the poet's contemporary, Hasan Şîdî Dihlîwî (d. 736/1336), who compiled his master's utterances (*maşhîqût*) under the title *Fasâ'id al-fâ'îdâd* "Things beneficial to the heart". In the time of Frîzî Tughluk (1351-88) flourished the poet Mas'ûd Beg (d. probably in 800/1397), a relative of the ruling family, who gave up wealth and fortune to join the Cîşhî order under the guidance of his spiritual mentor Şâyîkî Naşîr al-Dîn Cîrghî Dîhlî (d. 769/1367). The reign of Sikandar Lodî (1489-1517) saw the poet Hamîd b. Fâdî Allâh Dâjmâfî (d. 943/1536), who was also a Şîfî hagiologist, and is said to have met Dâjmî in his travels to foreign lands. It is reported that Akbar's poet Faydî courted the company of dervishes and spiritual leaders, and some of the poems he composed suggest his devotion to the Şîfî luminary Farîd al-Dîn Gandj-i Dihlî (or Şâkâr Gandj, d. 1145/1733), Shah Hatîm (d. 1197/1783), and was supplanted by Urdu as a medium of literary expression. Not only did he express in his poems the aspirations and feelings shared by the majority of Indian Muslims, but he also formulated the concept of India's partition on a religious basis, which eventually materialised in the establishment of Pakistan in 1947.

The poetry of the Sufi orders was the most important platform for the poet's activity. After the conquest of northern India by the Muslims, various Şûfî orders were established, such as Cîşhûyya, Suhrawardîyya, Nakshbandîyya and Kâdîrîyya. In India, poetry was the chief vehicle through which Şûfî ideas were disseminated. The preoccupation of the poet with Şûfîm went beyond mere intellectual interest; very often poets had a practical involvement with the spiritual themes of life, either with a Şîfî centre (*ţâbâkat*), or as members of an order, or as disciples of some spiritual director. Amir Khusrâw, the most eminent Persian poet of India, though serving under successive sultans, was the favourite disciple of the Cîshtî şâyâkî Nîzâm al-Dîn Awwlîyyâ (d. 723/1323 [q.v.]), and so was the poet's contemporary, Hasan Şîdî Dihlîwî (d. 736/1336), who compiled his master's utterances (*maşhîqût*) under the title *Fasâ'id al-fâ'îdâd* "Things beneficial to the heart". In the time of Frîzî Tughluk (1351-88) flourished the poet Mas'ûd Beg (d. probably in 800/1397), a relative of the ruling family, who gave up wealth and fortune to join the Cîşhî order under the guidance of his spiritual mentor Şâyîkî Naşîr al-Dîn Cîrghî Dîhlî (d. 769/1367). The reign of Sikandar Lodî (1489-1517) saw the poet Hamîd b. Fâdî Allâh Dâjmâfî (d. 943/1536), who was also a Şîfî hagiologist, and is said to have met Dâjmî in his travels to foreign lands. Not only did he express in his poems the aspirations and feelings shared by the majority of Indian Muslims, but he also formulated the concept of India's partition on a religious basis, which eventually materialised in the establishment of Pakistan in 1947.

(MUNBUR RAHMAN)

5. In the western and central Sudan.

The poetry of the societies of the western and central Sudan, both that of religious and that of secular inspiration, may be expressed in Western languages but equally in Arabic and Negro African languages. Whilst the first type is the product of the colonial influence, that in African languages and Arabic is attested over several centuries.
Introduced into the biłād al-Sūdān with Islam, Arabic has served since the 13th century as a language of expression for West African poets. Abū ʿIshāk Irḥāmīn b. ʿAyyūb al-Kānemī, one of the first known West African poets using Arabic, was received at Marrakesh by the Almohad sultan Abū ʿUṣūf ʿAyyūb al-Manṣūr (r. 580-95/1184-99) and improvised in his presence some verses which did not fail to impress the monarch. Kanem-Borno, which was Islamised very early, produced some poets of considerable fame. As well as the al-Kānemī just mentioned above, the Imām Muhammad b. ʿAbd al-Raḥmān b. al-Marmān al-Barnawī became famous for his didactic character, written towards the end of the 17th century and the object of a commentary written in Egypt.

The surrounding Hausaland became the centre for the diffusion of Islam in the central Sudan after the 13th century, and of Arabic as a language and the Islamic sciences, which were to enjoy their great prosperity in the region. Without monopolising poetic activity, these ulamāʾ were also engaged in didacticism, exhortation, eulogy, writing panegyrics on Muhammad. Ahmadu Bamba (d. 1927), founder of the Murdiyya, was inspired by the verses of the Imam al-Tidjanī (d. 1815) for the Tijānīyya, but also by other predecessors, such as the Senegalese al-ʾIbrāhīm Niassī (d. 1975), who produced a substantial part of religious poetry is devoted to the veneration of saints, reflecting Sufi inspiration coming from the Maghrib, in which one of the modalities in the very important cult of saints was certainly the composition of poems. Veneration for the founders of the two most popular West African orders, ʿAbd al-Kādīr al-Ẓālīlīn [q.v.] for the Kādirīyya and Ahmad al-Tazīlīn (d. 1815) for the Tijānīyya, but also for the other great scholar-poets of the region. It is known that even renowned Islamic religious scholars composed secular verse. Hence Muhammad al-Amīn b. Muḥammad al-Kānemī, on his return from a military campaign in Bagirmi [q.v.] in 1821, expressed his nostalgia for his favourite wife in detailed balladry, whilst the Senegalese Dhuʾ-ʾNūn Ly (d. 1927) in his love poetry sang the praises of the gracious charmers of Saint-Louis in Senegal.

6. In Hausaland.

The Hausa Muslim poet (mai wallafa tsavoki or sometimes mai tsawka) belongs to the wider category of mala-mai (sing. malam), that is, "Muslim scholar" or "literate person" (< Ar. 'ilâm). He, and less frequently she, performs the role of Muslim teacher, moralist and guardian of Islamic social norms. He is likely to specialise in one or more of the categories of Hausa Islamic verse listed in the articles HAUSA iii. and in gî'târ, which are associated with certain Islamic institutions and festivals.

During the colonial period, the Hausa poets increasingly concerned themselves with the innovations brought in by the Europeans. Thus an anonymous writer of ca. 1920 inveighs against such features of Western life and activity as electric torches, shirt buttons, carved biscuits and an assortment of other items which aroused his ire. More recently, such poets have written against prostitution and the adoption by Hausa women of European dress styles, which they tend to regard as immoral. It seems probable that this tradition of Islamic puritanism has been influenced by a wider anti-modernist trend consequent on the Wahhabi movement beginning in Arabia (see WÂHÂBÎYA). Islamic marriage is also a favourite topic (see NIKÂRA. 6).

Since the introduction of modern, Western-style democratic political parties into Nigeria (q.v.), the Hausa Muslim poets have taken on the role of political propagandists. Thus a poet will claim the Islamic virtues for his own party e.g. the Northern People's Congress (NPC), whilst attributing the betrayal of Islam to the other main Northern Nigerian party of the pre-independence period, the Northern Elements Progressive Union (NEPU). The NEPU poet will repast, with the accusation that the NPC falsifies Islam and that only NEPU deserves the allegiance of Muslims. Such political verse has, however, much diminished in Northern Nigeria since it was banned by the military administration (see NIGERIA).

One interesting development is the emergence since Nigerian independence of women poets. The composing of verse by Hausa Muslim women has a precedent in the work of the 19th century writer Nanan Asma'u, the grand-daughter of 'Uthman b. Fadl (q.v.), but it was infrequent in subsequent decades. However, the spread of feminism within Islam (see MA'RÂA) has caused such compositions by women, interpreting women's issues in an Islamic context, to flourish.

7. In Malaysia and Indonesia.

In Malay and modern Indonesian the Arabic loan word syair refers to an extended verse form, which may run to hundreds of stanzas, each of which consists of four lines with the same end rhyme, with every line carrying four stresses and divided by a caesura. The author or creator of this form of verse is referred to as penyair.

In pre-modern Malay society the role of the poet was functional, that is, to provide material in a pleasing form for entertainment or poetry. Poets had to have specialised knowledge of their topics, because central to their work was the expression of values or information, not the outpouring of individual emotion for its own sake. The earliest evidence of the use of the form in the Malay world is from the late 16th century, and syair verse was still being composed up until World War II. The form was popular in all Malay-speaking regions and was both oral and written. The traditional mode of delivery was by singing the verses to set tunes in a way which enhanced the verbal message. Verse was considered easier to compose than prose, easier to memorise and recite, and easier for an audience to follow. The language of verse was closer to colloquial Malay in grammar and syntax, and less veiled and predictable.

A comparison of the earliest syair with those written during and after the 19th century suggests that the earlier poets were specialists and professionals, but that as literacy became more widespread so too did composing, and syair became no longer solely the domain of professionals.

(a) Pre-19th century. The first poet whose name is known is (Hamzah)Fansûr (q.v.), indicating that he came from Fansur (or Barus, an entrepôt on the northwest coast of Sumatra) and who lived in the second half of the 16th century. The syair identified as being composed by Hamzah are poems of worship in the mystical tradition of Ibn al-'Arabi, which affirms the unity of the Creator and the Created, and yearns for ultimate union with the Godhead through the seven stages of mystical ascent. Great Syif poets such as the Persian Bâlîâl al-Dîn Rûmî (q.v.), who was undoubtedly read by Hamzah, belonged in the doctrine of the Divine Word embodied in the sacred text of Revelation (the Kur'ân) and reflected in symbolically conceived and interpreted poetry (see Braginsky, 1993). In the act of creating a poem the poet became a channel through which the energy of the Creator flowed into the poem, and from the poem reached out to and inspired readers or listeners, and through which, in the reverse process, they could ascend the seven stages to unity with Him.

The poems of Hamzah are both acts of worship and instructional texts in the Syif mode. There are reports that syair are still used by members of mystical brotherhoods in Malaysia as chants after the recitation of zikr or dhikr (q.v.) in order to regain a sense of reality after intense meditation. Hamzah's poems may also have been used in this way in earlier times. Examples of written Malay before the 19th century are all too rare. One text which has survived is the long Syair Perang Mengkassar, composed in the mid-17th century, by Encik Amin. In 534 verses this syair describes the wars between the Dutch and Makassarese for control of the spice trade in Eastern Indonesia, and indicates that poets were not restricted to religious topics. The background of Encik Amin provides further detail about the poet's function in the pre-modern period. Encik Amin was a professional writer, who served as clerk or secretary to the Sultan of Goa in Sulawesi. His duties included the drafting of treaties, official correspondence, copying of manuscripts and the recording of events of significance for his patron. In his syair which relates Makassarese resistance to Dutch attacks, Encik Amin quotes verses from Hamzah Fansûr's poems, indicating the regard in which they were held even outside their area of composition. If Hamzah and Encik Amin are in any sense representative of pre-modern poets, their works suggest that poems in written form were the result of specialist training, and that literacy set them apart from their peers and made them the basis for the formation of the genre.

It is very likely that non-literate Malays used the syair form when reciting or singing for a variety of
audiences and purposes. We know, for example, that rhythmical and rhymed verse was sung or recited, and in the realm of the supernatural, syair on divination and the interpretation of dreams.

The greatest number of surviving syair texts are lengthy adventure romances, which were primarily for entertainment but were also didactic. Much of the material in these texts was adapted from Persian, Egyptian, Turkish, or Indian stories. The 19th-century Malay-Bugis court at Riau (q.v.) provides an example of an active literary centre. Prose and poetry was written by both men and women, only a few of whom, for example Raja Ali Haji, were "professional" writers. Raja Ali Haji, a religious scholar and historian, used the syair form only rarely, but his relatives wrote copiously in verse about their travels, local wars, current happenings and romances. These writers were not specialists in the sense of writing for their livelihood, and so did not need patrons. They were literate and learned, and wrote to entertain as well as to provide material that would bring moral benefit to themselves and their audience.

In urban centres, especially where there were printing presses, syair appeared in lithographed and printed form, from the late 19th century into the early 20th. There are numerous instances of syair versions of popular prose narratives, the verse forms going into more reprintings than the prose originals. However, as the numbers of secular educated Malays and Indonesians grew, western influenced verse forms gradually replaced the syair as the preferred form for poetry. Although he did not use the syair form, the Sumatran poet Amir Hamzah (1911-46) is one of the few from the early modern period who wrote verse with a religious theme. Inspired both by emotion and religion, his two volumes of verse echo the intensity and depth of the Syair Perang Mengkasar, the Hague 1963; G.L. Koster and Maier, Variation within identity in the Syair Ken Tambahkan examined with the help of a computer-made concordance, in Indonesia Circle, xxx9 (Nov. 1982), 3-17; V. arch, Mār Shimūn, who was perhaps his most serious local rival. (The Nestorians had fled their mountain fastnesses in Ḥakkārī during the war, and settled in the fertile plain of Urūmīya, with the clear intention to stay there.) During the following years, Simkō gradually extended the area under his control, and by early 1922 he de facto governed most of the Kurdish-inhabited parts of Adharbaydžan as well as the (Turkish-inhabited) Urūmīya plain. Although begun as a traditional tribal rebellion, Simkō’s movement acquired Kurdish nationalist overtones. He was in contact with Kurdish leaders in ‘Irāk and Turkey, nationalists from other parts of Kurdistan joined him, and even some of the Kurdish newspaper published in Sāvādī-Bulāk (Māhābdāb [q.v.]). In August 1922 a strengthened Iranian army finally defeated Simkō, who fled to ‘Irāk. After a final, unsuccessful, bid to establish himself as a local powerholder in 1926, he was ambushed and killed by Iranian government forces in 1929.

Paramount leadership of the Shakāk passed to Simkō’s rival ‘Amr Āghā of the Kūdār Pāshā, who had had the better of the last war. He was in a strong position but had in time transferred his loyalties to the central government. His control of the tribe was less complete than Simkō’s had been, and some sections, notably the ‘Avdō under Simkō’s son Ṭābir and the Māmādī under their own leading family, often acted independently. Under ‘Amr Āghā, the Shakāk took a half-hearted part in the short-lived Kurdish republic of Māhābdā in 1946. ‘Amr Āghā was one of the founding members of the Party of Kurdistan, and both he and Ṭābir Āghā contributed cavalry regiments to the republican army (800 and 500 men, respectively). However, these tribal regiments never took active part in the military defence of the republic against the Iranian army, and ‘Amr Āghā again in time made diplomatic overtures to the central government. The same cautious relationship with Kurdish nationalist politics has been characteristic of the Shakāk for most of the following half-century. Even in 1979, when following the Islamic revolution central authority was temporarily absent and the Kurdish nationalist cause briefly appeared successful, only a few urban-educated Shakāk became involved in it. Ṭābir Āghā, who had by then become the paramount chieflain, ruled the Shakāk territories as an independent lord, unwilling to cede authority to the Kurdish political parties. In the following years, the tribe soon again reached an accommodation with the central government.

SHAKAK (M.M. VAN BRUINESSEN) SHAKAK or qūškā, a tribe of Kurdish origin centred on Adharbaydžan. According to Yusuf Dī‘ā’ al-Dīn, the word qūškā means in Kurdish a beast which has a particular disease of the foot. According to Sharaf al-Dīn Bādī’s Sharaf-nāma (i, 148), the Shakak were one of the four warrior tribes (aḏḏirāt) in the nāḥīya of Fīnīk of the principality of the Dīżāra. According to the Ottoman sāl-nāmes, there were Kurdish Shakakī in the nāḥīya of Sheykhler in the kādā’ of Kīlis in the ʿalāṣet of Aleppo (cf. Spiegel, Iran. Altertumskunde, i, 744). The nāṭel of the Shakak of the Dīżān-nūmā (between Mūkus and Dūlāmēr) is certainly only a mis-reading for Şataḵī. As a result of certain movements, probably in the time of the Turkmens, the Shakak were driven out of the Mughān region on the frontier of Transcaucasia (see Şataḵāw). At the beginning of the 19th century, there were 8,000 families on Russian territory. Duprē speaks of 25,000 hearths of Shakak among the tribes speaking Turkish. About 1814, J. Morier numbered them at 50,000 grouped along the Tabrīz-Zandjān road in the districts of Ḥaḡṭārād, Garmārūd and Mīyānā as well as at Ardabīl. The Kāḏār prince Abbās Mīrzā drew from this tribe the main cadres of his infantry drilled in European fashion. According to Morier, the Shakāk spoke Turkish. Şuírānī puts the summer and winter quarters of the 60,000 families of Shakakī in the region of Tabrīz-Sarāb (on the road from Ardabīl) and adds that it is a Kurdish tribe speaking Turkish, which forms part of the Kīzīl-bāgū (min tawdbi-i kīzīl-bagū), which evidently means that the tribe is ʿṢṭrī’, as is also suggested by its association with the Şāhīwān. The importance of the tribe may be judged from the fact that, at the beginning of the 20th century, the Kāḏār government recruited four regiments from the Shakākī, we do not know the connections that may exist between the Shakākī and the Kurdish Shakakī, but all indications point to their being a Turkicised Kurdish tribe (like the Kurds of Gandjā). In the toponymy of the region south of Lake Urmīya [see SĀVĀDĪ-BULĀK], we find traces of the passage of the Shakākī (the village of Kishlak Şakākī at Sulūdū).

SHAKAR GANDJ (see FERD AL-DIN MAS’UD) SHAKARKHELEDA, a village of the pre-modern Indian province of Berār [q.v.], situated on an affluent of the Pengangā river. Its main claim to fame is that it was the site of the battle in 1137/1724 when Niẓām al-Mulk Čin Kīlī Kān [q.v.] defeated the deputy governor of Haydarābd Mubārāk Kān and thereby established the virtual independence of the Niẓāms of Haydarābd from the Mughal empire. Niẓām al-Mulk became the village’s name to Fathbēlkāh, and this is now a small town in the Būldān District in Maharāštā State of the Indian Union (lat. 20° 13’ N., long. 76° 29’).

SHAKAWA (A.) means misfortune or misery; equivalents are shakawā, shakā and shakā. The concept is the opposite of šalāda [q.v.]. According to Kurʿān,
XX, 122, he who follows God's "right guidance" (huda) escapes from the situation of unhappiness and "does not become unhappy". Accordingly, in the story of the Ful, Alad's explication (al-Shakwa), described as a "misfortune" (shakwa) which he endured for not fulfilling God's admonition (XX, 117 ff.). But in the kur'an the derivations from the root sh-k-w (shakwa itself is not found) are mainly used eschatologically: the "unhappy one" (shakhs) will find himself in the fire of Hell, in contrast to the "blissful" (sa'da), who will stay in Paradise (XI, 105/107 ff.).

In the hadith, this eschatological usage is taken up in the doctrine of God's predestination; following a prophetic tradition, "the blissful are placed [by God] in a position in which they are able to act as the blissful do, but the unhappy ones can only act as the unhappy do" (Muslim, Sahih, kitab al-kadar, no. 6).

The deterministic usage of shakwa is also taken up by Islamic theology, where distinction is made between the divine attributes al-kadda' wa t-kadar [q.v.], which determine the contents of the "preserved table" (al-lauh al-mahfuz [q.v.]) on the one hand, and "what is written down" (al-lawh al-mak-st) on the other; the latter is a human attribute "in the form of bliss or misfortune" (sa'data' az shakwata') which can be changed into its opposite by the acts of man (see Abu 'L-Layth al-Samarkandi, Sharh al-fikr al-abast li-Abi Hanifa, ed. H. Daiber, The Islamic concept of belief in the 4th/10th century, Tokyo 1994 [= Studia culturae islamicae], Arabic text, I, 301 ff., 319 ff.).

In his commentary on the Kur'an, the scholar al-Raghib al-Isfahani (d. 5th/11th century [q.v.]) connects the concept of shakhs in analogy with sa'da (cf. Daiber, Griechische Ethik in islamischem Gewande, in Historia philosophiae, ed. B. Mojsisch and O. Pluta, Amsterdam-Philadelphia 1991, 184-5), with the hereafter and with this world, and he divides the "unhappiness of this world" into three kinds: unhappiness of the soul (nafs), unhappiness of the body (badayyus), and existential (khudayyus) unhappiness (see Muqlid muqaddati alshik al-Kur'an, ed. Nadim Mar'ashli, n.p. 1972, 271, s.a.).

To sum up, the term shakhs is used both in the meaning of a person in this world and also of the situation in the hereafter, which is determined by God but for which man is responsible through his behaviour. The term does not therefore play a role in the Islamic discussions on theology (see E.L. Ormsby, Theodicy in Islamic thought, Princeton 1984).

In astrology, the concept of "misfortune" is described by nafs, pl. nuhas. The question is discussed whether unlucky stars (such as Saturn and Mars [see Al-Mirrikh]) dominate the hour of birth, and whether they are able to exercise their calamitous influence (nuhas). See Ras'id'il Mawaid al-Safda', ed. Zirikli, ii, Cairo 1928, 331, tr. S. Dilawar-Wilson, Arabicische Philosophie und Wissenschaft in der Enzyklopedia Kitab Ihwan as-safa' (iii), Wiesbaden 1973, 468. See also Abu Ma'shar, The Abbreviation of the Introduction to astrology, ed. and tr. Ch. Burnett, Keji Yamamoto and Michio Yano, Leiden 1994 (= IPTS, XV), index of Arabic terms. s.v. According to Abu Ma'shar, the evil as well as good) influence of the planets does not exclude chance or freedom (see R. Lernay, Abu Ma' shar and Latin Aristotelianism in the twelfth century, Beirut 1962, 125 ff.).

1. In philosophy.

Here, shakhs, pl. ashkhs, is equivalent to the Greek ἀρουγος meaning an individual, a person. Philosophically, the ashkhs are to be distinguished from ousia (genera) and ousia (species), as well as Arabic words which may have connotations of the particular or individual such as khass and adhza; Individuality may be rendered in philosophy by the term ta'khukku. The term shakhs and its plural is used not only in Islamic philosophy (e.g. by al-Kindi, al-Fârâbî, Ibn Sîna, Ibn Rushd) but also in Arabic theological commentary. When Christian theologians like John of Damascus, talk of the Trinity, held that the second "Person" (al-shakhs) is born alive or even assumed to be alive (q.v.). treated as having a legal entity that can inherit and be inherited from. Syrian Law, both the civil code (art. 31) and the law of personal status (art. 236/1, 2360/2) have incorporated an opposing legal view to that of Oxford. It has been argued that a deceased person can only be considered a person if separated from his mother’s body. The natural personality normally ends by natural death. Legally, it can be ended by a court injunction that assumes a missing person to be dead by estimating his life in comparison to his age when he disappeared. The legal responsibility (dżuma) of a deceased person can remain after his death until all his rights and duties are cleared.

Notwithstanding his Durūz origins, Arslān made his reputation as a staunch defender of Sunni Islam. He contributed regular articles to Islamic-oriented Egyptian and Le Monde Arabe journals starting from 1930. Although his status and position in the Islamic subjects. The purpose of his writings was to awaken among Muslims an awareness of their shared Islamic heritage and to summon them to political action against European imperialism in the name of Islamic unity.

More than any other figure of the era, Arslān endeavoured to bring together the leaders of the North African and Eastern Arab independence movements. He played a specially important role as political strategist and personal mentor to the group of young Moroccans associated with the Free School movement, and his orchestration of their international Islamic propaganda campaign against the French decree known as the Berber zaghr (1930) was one of the most successful interwar Arab protest movements.

Arslān’s final reputation was diminished by his association with the Axis powers. At the peak of his popularity, he endeavoured to coordinate an Italian-German alliance with the Arab world in order to generate leverage against Britain and France. His efforts generated much publicity but few results, and his continued pro-Axis stance during World War II discredited him. His death in Beirut in 1946 attracted little notice.

SHAKIB ARSLAN (1869-1946), a Duruz [q.v.] notable from the Shī'ī region of Lebanon and polemicist. During the first fifty years of his life, he established a reputation as an accomplished Arab poet and journalist and as an Islamic-oriented activist dedicated to the preservation of the Ottoman Empire. In the period between the two World Wars he became an anti-imperial agitator and a relentless spokesman for the cause of Islamic solidarity. His voluminous writings, his well-connected network of associates, and his knack for attracting publicity made him one of the most visible Arab figures of the interwar era.

The Arslāns were a powerful Durūz family whose members had the right to bear the title of amīr [q.v.]. Educated at Maronite and Ottoman secondary schools, Arslān at first eschewed the family tradition of politics in favour of literature. He published his first volume of poetry at the age of seventeen and continued to engage in literary pursuits for the next several years, earning the honorific title amīr al-bayān (“the prince of eloquence”) by which he was known for the rest of his life. Eventually, he assumed the role expected of an Arslān amīr by serving as kā'īn madīm of the Shī'ī [q.v.] on two different occasions (1902; 1906-11). He was elected to the Ottoman Parliament in 1914 and devoted the war years to defending the Ottoman cause.

With the Ottoman defeat and the imposition of the mandate system, Arslān became an exile, barred by British and French authorities from entering the states under their control. Instead of becoming marginalised by his changed circumstances, Arslān emerged as an international figure during the interwar period. His residence in Geneva served as a gathering point for Arab and Muslim activists, and his position as the unofficial representative of the Syro-Palestinian delegation to the League of Nations afforded him opportunities to present the Arab case to the European community. His influence was expanded through the journal La Nation Arabe (1930-8), that he founded and edited with his Syrian associate, Iḥṣān al-Džāhirī. La Nation Arabe attacked all aspects of European imperialism in the Arab world, but devoted special attention to French policies in North Africa and Zionist activities in Palestine.

to have been so much enraptured by the beauty of the anemone that the flower was called al-nu'man after him, while gābika is said to have preserved the name of his mother gābika. This nu'man is described as being similar to the poppy (khashkhash); the difference is said to be recognisable from the fact that the edges of the petals of the nu'man are laciniate (kadīr al-tashnf), while those of the khashkhash are only slightly dentated (kadīr al-tashnf). The anemone exists in two kinds: a cultivated one, whose petals are red, white or purple and which spreads out on the ground with long stalks, and a wild one, which is bigger and more scarlet-coloured. It opens during the day, turns towards the sun and shuts at night. 'Abd Allah b. Sālih, Ibn al-Baytār’s teacher (see Dietrich, Discourses triunphans, i, 159), rightly recognised that anemones cannot belong to the species of the poppy plants (Papaveraceae), the nearest related family. On superficial inspection, the petals of some species of the Ranunculaceae show similarity with those of the Papaveraceae.

In Arabia, the anemone at present seems hardly to be used any more. In the drug bazaar in Cairo, pulverised petals of the anemone are sold as decoctions against ailments of the eye. According to the Arab authors, the anemone is above all useful against skin diseases, and it dissolves ulcers and supports their ripening. Its juice blackens the pupil, cuts off an incipient cataract, strengthens the eye and sharpens the eyesight. Boiled together with its stalks, anemones further the formation of milk. If a woman inserts the anemone with the help of a wooden tampon (sūf), she increases the flowing of the menstrual blood (i.e. if an abortive effect is aimed at). Ibn Riddān (in Ibn al-Baytār, Ḍāmī, iii, 65, 25-7) is even of the opinion that seeds of anemones, if taken during several consecutive days, would cure leprosy.

On the anemone in Arab poetry, see al-Nuwayrī, Naḥḥa, xi, 281-5, who gives many examples.

(Α. DIETRICHS)

SHĀKĪR, ĀHMAD MUHAMMAD (1892-1958), well-known Egyptian scholar and editor of classical Arabic texts dealing with poetry, ādab [q.v.] and especially ḥadīth [q.v.]. He received his religious education at al-Azhar [q.v.], whereafter he was appointed kātib in Zaqazig. Already during his lifetime Shakir was considered as the foremost hadith expert of his generation. He was particularly famous for his alleged expertise in the relationships between transmitters featuring in insāds [q.v.]. He died just before a stormy controversy on the value of Muslim tradition broke out which was to upset religious circles in Egypt first and then, in later years, to cause ripples also in other countries of the Middle East. Already in the period leading up to this event, in the course of which a certain ḥadīth scholar, Mahmūd Abī Rayya, had been accusing the Egyptian scholar of偏离ing from orthodox ideas on various vital ḥadīth issues, Shakir had occasionally made his strictly orthodox point of view on the matter very clear. For an analysis of this controversy, see G.H.A. Juynboll, The authenticity of Muslim tradition literature. Discussions in modern Egypt, Leiden 1969, 36-46, and idem, Islam tradition etc., Cambridge 1983, 190-1, 204-6.

Shākīr’s main editorial enterprise comprised a new edition of the Musnad of Ahmad b. M. b. Hanbal (d. 241/855 [q.v.], which he did not complete: only some two-thirds of the work were eventually printed, vols. i-xv, Cairo 1946-56, with a posthumously published vol. xix of 1980. For a survey of other texts which Shakir edited, see some of them in cooperation with his brother Mahmūd or with ‘Abd al-Salām Muhammadi (d. 1392/1972, see Juynboll, Ahmad Muhammad Shakir (1892-1958), and his edition of Ibn Hanbal’s Musnad, in Id., xlix (1972), 22-47.

(Γ.H.A. JUYNBOLL)

AL-ŠĀKIRIYYA (ʿ), a term denoting private militias fighting under the patronage of princes from the ruling dynasty, or commanders belonging to the class of military nobility, during the reign of the Umayyad and ʿAbbāsid dynasties. Classical Arabic lexicography does not provide a satisfactory explanation for this term, correctly associating it with the Persian term Čet. For a discussion of possible etymologies, see C.E. Bosworth, The History of al-Ṭabarī, xxxiii, 179 and n. 506. The institution of the šākirīya, from the historical standpoint, probably existed in the Iranian lands of Central Asia during the Sāsānid period and into the period after the Islamic conquest. According to Natshākhī, the Shakiriyas in Bukhāra were not a field military unit, but rather, a bodyguard at the court of Khaṭūn, the queen of Bukhāra in the late 7th century A.D. (Taʿrikh-i Bukhārā, ed. M. Rīḍāwī, Tehran n.d. [1939], 46, tr. R.N. Frye, The history of Bukhara, 39).

After the Arab invasions of Transoxania, the Arab commanders and governors in the eastern province
followed in the footsteps of the local princes and established their own units of shakiriyya, who served as bodyguards, and the combatants.

This was the result of growing pressure on the part of the Turgesh toward the end of the 7th century and the first and second decades of the eighth, when the Arabs in Central Asia were compelled to enlist the aid of the shakiriyya which were under the command of the local nobility. Prominent among the latter were two brothers, Thabit and Hurayth, sons of Kaffa. The phenomenon did not remain limited to the eastern provinces; it also spread westward to Iraq and Syria, where shakiriyya units operated as private militias under the command of Arab commanders and princes for the purpose of putting down the insurrections of the Kharijites [q.v.] alongside the semi-regular army of the Arab munafiqin. The struggle for power and disputes within the dynasty toward the end of the Umayyad period, encouraged and expedited the existence of such private units.

Under the 'Abbasids, the institution of the shakiriyya flourished, thanks to the growing tendency of the caliphs to eliminate their dependency upon Arab tribesmen and to rely more heavily upon the mauwālī element. Decisive steps in this direction were taken by al-Ma'mūn, and also al-Mu'tās'im, during whose reign the shakiriyya became a national military institution which, along with other ethnic groups, replaced the classical structure of the Arab tribal fighters. This was expressed in the establishment of a separate office, the diwān al-shakiriyya, and the shakiriyya troops received monthly salaries which were quite high in comparison with those received by their colleagues, the Turkish troops and the Mughāribān.

Because they were subordinate to the caliphs, the shakiriyya forces were stationed in the capital Baghdād, and latter in Sāmarrā. But the establishment of the dawān al-shakiriyya did not change the nature of the shakiriyya as a private militia; military commanders, kumārī, of both Arab and non-Arab origin, continued to keep shakiriyya as their own private militias, as witness the existence of shakiriyya militias in such cities as Kūfa, Medina, Raqqā and Malatya, as well as in such provinces as Ahwāz, Fārs, Ḥīdājz and Egypt.

In contrast to other militias, Arab sources do not indicate the ethnic identity of the shakiriyya, a fact which may point to their having belonged to a variety of ethnic groups, seen in traditions which speak of shakiriyya of Arab origin as well as shakiriyya from various nations and ethnic groups which lived within the borders of the former Sāsānīd Persia. Whatever their origin, their loyalty to their patron the caliph was the common denominator which united them; manifestations of this loyalty could be seen after the murder of al-Mutawakkil (247/861) by Turkish commanders, and also in the loyalty toward the deposed caliph al-Musta'in in 252/866 and the shakiriyya's support of al-Mu'tadil in his struggle against the Turkish commanders in 256/869.

It is a state opposed to knowledge (šalāt) which is a kind of lack of seriousness (ṣalāt al-thānī) (XLIV, 9). It is a state opposed to knowledge (shāk).
Al-Tahanawi (Kashshaf, 780-1) is proof, however, that al-Ghazali's distinction did not completely find favour, since he says, quoting al-Raghib ibn Isḥāq al-Saqqātī (al-Muṣaffāt, i, 388) “ṣakk is judging equal two antithetical notions and equipping or uniting one of ṣalāh or one’s circumstances, or intention, or divorce'" (Tahdhib al-asma', ii, 166-7; Abu l-Bākār, Kulliyāt, i, 63).

There is some suggestion that ṣakk refers to the objective fact of uncertainty and another word, rayb, to the state of perplexity consequent to that fact. Abu l-Bākār’s says in his Kulliyāt, i, 63, that "şakk is the cause of rayb ... şakk is the basis (maḥdah) of rayb, as knowledge is the basis of certainty;" and al-Nawawī (ibid.) says that şakk is "a waver of the mind" (tardudd al-siyāḥa).

Al-Nawwāf (676/1278) is judging equal two antithetical notions and equipping them. This may be al-Ghazali’s distinction did not completely find favour, or from the absence of signs." Al-Nawwāf (29; Ghāzali, Bīyā, Beirūt n.d.; Nawwāf, Tahdhib al-asma’ wa l-lughāt, Cairo 1927; al-Rāghib al-Isḥāqī, al-Muṣaffāt fi ghanb al-Qur’ān, Isbāhānī, Beirūt 1980/1400, i, 83; Badjī, Kilāb al-asma’ wa l-lughāt, Beirūt n.d., ii, 131; Muhammad Dzhawar Mughniyya, al-Fikhr al-Dīn Rāzī, Maḥābīḥ al-Maṣāḥīhiyya, Haiḍarābād 1924, i, m. M. Sharif (ed.), A history of Muslim philosophy, Wiesbaden 1963, i, see esp. ch. XXX "Al-Ghazālī: Metaphysics" by M. Saeed Sheikh, and ch. XXXII "Fikhr al-Dīn Rāzī" by Seyyed Hossein Nasr.

SHAKKAZIYYA (ʃakkaζiyya), the name given to the markings of a universal stereographic projection which underlies a family of astronomical instruments serving all terrestrial latitudes.

2. In philosophy.

In one of its senses, şakk is an appropriate rendition of the Greek ἀναφορά (defined by Liddell and Scott as “want of means or resource, embarrassments, difficulty, hesitation, perplexity"), however, the Ilkhwān al-Ṣafī in their Rasā’īl considered “doubt" (al-şakk) more starkly as a sickness of the soul while its opposite “certainty" (al-yaḥi) constituted that soul’s health. For Āl-Darraghī, şakk was a hesitation between two antitheses. It is also useful to go behind such map definitions and examine what “doubt" meant in terms of the development of Islamic philosophy. While no formal school of Islamic sceptics ever established themselves after the manner of a Pyrrho or a Timon, it is clear that monolithic “certainty” was no more to be observed in Islamic philosophy than it was in theology. Fakhr al-Dīn al-Rāzī, indeed, gained a reputation as a doubter and a critic of both philosophers and theologians. Al-Ghazāli’s method has been described, detected, doubted or sceptical with antecedents both in the reductionist atomism of the Ashʿarīs and the thought of such Muʿtazīlīs as al-Nazzām and Abu l-Hudhayfī (q.v.) for whom knowledge began with doubt. As M. Saeed Sheikh puts it, "The most important thing about al-Ghazālī’s system of thought is its method which may be described as the careful re-examination of the evidence which underlay the seemingly sure foundations of the encyclopaedia of the conference and the courage to doubt. The best expression of it is given in his famous autobiographical work, al-Manṭiq fī min al-Dalāl." However, the archetypal paradigm of “doubt" in the whole of Islamic philosophy must surely be the eponymous hero of Ibn Tūfāyil’s (q.v.) Hayy b. Yaqẓān. The philosopher presents his hero intellectually “naked", free from all presuppositions, free to accept or doubt. Sāmī S. Ḥawī has put it in a nutshell: "By removing Hayy from the social situation of the desert, al-Tūfāyil had done what Descartes, Hume and Husserl did. He was attempting a hypothetical destruction of and universal doubt in the surrounding world of tradition and early education.”

(A.R. NETTON)
In spite of the research of various scholars over the past two decades, the details of the development of the various universal devices associated with Ibn al-Zarqalluh and 'Ali b. Khafaf, the relationship between them, as well as the nature of their respective contributions, remain somewhat unclear. What is clear is that Ibn al-Zarqalluh wrote treatises on two different universal instruments, both plates, and that 'Ali b. Khafaf wrote a treatise on a universal astrolabe. The safiha shakkaziyya bears a set of shakkaziyya markings with a graduated straight line drawn across it at an angle to the equator equal to the obliquity of the ecliptic (see p. 251) to represent the projection of the ecliptic. The circles of longitude for the beginning of each pair of signs are drawn for this second coordinate system. The ensemble can be used, together with a diurnal rule attached at the centre, to solve various problems of spherical astronomy, although the solution of the most important of these, the determination of time from celestial altitude, can only be achieved approximately. In other words, the instrument has some limitations. On the back are scales for finding the day of the month from the day of the solar year and others for finding shadow lengths. The safiha zarkalliyya consists of two sets of shakkaziyya markings superposed one upon the other, with their axes inclined at an angle equal to the obliquity. This results in a somewhat cluttered ensemble and these markings have but one use: to convert celestial coordinates from the ecliptic to the equatorial system and vice versa. The back of this safiha was marked with a trigonometric grid bearing an orthogonal meridional projection. This allows exact solutions to be found for all of the standard problems of spherical astronomy. There is also a curious small circle offset from the centre (see below).

The universal astrolabe consists essentially of a plate with shakkaziyya markings and a rete with the same; the latter can then rotate over the former. The combination can be used to solve any problem of spherical astronomy, since one can consider the two sets of markings as representing a horizon-based or equatorial or ecliptic coordinate grid. 'Ali b. Khafaf further restricted the shakkaziyya grid on the rete to one-half of the rete, leaving the other free for a celestial mapping of both the northern and southern halves of the ecliptic superposed one upon the other. With this problems relating to the sun and various fixed stars could be solved using the shakkaziyya plate below. The universal astrolabe is no longer an analogue computer like the standard astrolabe.

Mainly as a result of the influence of the 15th-century Libros del saber de astronomia, in which these three instruments were featured, European astronomers learned of the shakkaziyya grid and called it safra or saphea after the Arabic safiha (see Poule, 1969). It is found on several European astrolabes after the 14th century. The universal astrolabe of 'Ali b. Khalaf, called limina universal in Old Spanish, was "reinvented" in England in the late 16th century by John Blagrave of Reading. For details of the various treatises on them, as well as their rôle in the transmission of astronomical knowledge to Europe, the reader is referred to the secondary literature listed below.

The utility and aesthetic appeal of the shakkaziyya markings led to their application on a celestial map, contained in a 15th-century manuscript of the Libros del saber. On this the coordinate grid is identical with that of the shakkaziyya plate (Madrid 1992 exhibition catalogue, 229, listed under Puig, 1992 below).

On the trigonometric grid on the back of the safiha zarkalliyya there is a small circle set below the centre. Only recently has the function of this been understood (Puig, 1989). With remarkable ingenuity of conception the apparently simple device serves to calculate the lunar distance and hence the lunar parallax for any position of the moon on its orbit.

The Aleppo astronomer Ibn al-Sarrāдж also reinvented the universal astrolabe of 'Ali b. Khafaf some 250 years before Blagrave. He was clearly aware of at least the single shakkaziyya plate, but he stated that he invented the instrument himself and boldly labelled it al-Sarrāджiya. There is no (other) known direct evidence of the influence of 'Ali b. Khafaf's astrolabe west of the Maghrib. However, Ibn al-Sarrāдж then went several steps further and produced a quintuply universal plate, fitted with additional plates and astronomical markings. In short, he produced an instrument that can be used universally in five different ways. An example of this remarkable quintuply-universal astrolabe, made by Ibn al-Sarrāдж himself in 729/1328-29, is happily preserved in the Benaki Museum, Athens. It is the most sophisticated astrolabe ever made, and astronomers in Renaissance Europe would have been hard put to understand him. Fortunately a treatise on the use of this instrument survives, written by the Cairene astronomer 'Abd al-'Aziz al-Waftī (ca. 850/1450), whose mark of ownership is engraved on the Benaki astrolabe. He complained that Ibn al-Sarrāдж failed to provide any instructions on its use, and proceeded to provide these himself, admirably completing the task to the very last detail.

Other Mamlûk astronomers in the 8th/14th century wrote on the simpler variety of universal astrolabe, which they called al-asturlub al-mughni ['as al-safīhā th], "the astrolabe that does not need any plates". They also developed the single and double shakkaziyya quadrant. With the former (see Samsû, 1971 and Samsû and Català, 1971) the problem of determining time from celestial altitudes is solvable only approximately. With the latter (see King, 1974) the solution is exact for any latitude. No such Islamic instruments survive; they are known only from texts. A double shakkaziyya quadrant from late-16th-century Louvain, now in the Adler Planetarium, Chicago, shows that Renaissance European instrument-makers, if only the most ingenious, were interested in the same kind of device.

Closely related to the shakkaziyya and zarkalliyya plates, and certainly inspired by their utility, was the more flexible universal plate (al-safiha al-sidgîma li-djam al-'arîd) of Abû 'Ali al-Husayn Mahammad b. Bâgo of Granada (fl. ca. 675/1275). Only recently has it become known how this plate, a common feature on later Andalusian and Maghribi astrolabes, and occasionally also on Mamlûk Syrian and even on one Mughal Lahore astrolabes, functions (see Calvo, 1992 and 1993). The underlying notions reflect an almost incredible skill with the problems of spherical astronomy. Essentially, the plate is used with different arguments (such as terrestrial latitude, solar or stellar declination, and solar or stellar altitudes) entered on different families of circles, and the appropriate operations yield, for example, the time of day or the azimuth of the sun or a given star. A single plate of a similar kind is found on a 15th-century German astrolabe, now in Columbia University, New York City; it proves that European astronomers later approached the same problem in the same way.

The development of these universal instruments in al-Andalus in the 5th/11th century testifies to the remarkable abilities of astronomers there at that time. The interest of Muslim astronomers in universal instruments in general is part of their fascination with and
mastery of universal solutions to diverse problems of spherical astronomy (see King, 1987 and 1988). These, attested from the 3rd/9th to the 10th/16th century, represent a particularly sophisticated tradition in Islamic astronomy.

---

The usual boundaries of Shaqak were: on the east, the Gökçay which separates it from Şirwan; on the west, the Alazan (Turk. Karlık?) and its left tributary the Kasgha-çay, which separates Shaqak from Georgia (Kakhetia) and the Georgian cantons. The Alazan is said to have taken its name from a village more to the east (Sultan Nikhā in NE); its name is only found from the 18th century.

4. The front of the quintuply-universal astrolabe of Ibn al-Sarrādī, showing a semi-circle of shakkaziyya markings laid over the shakkaziyya plate. (Courtesy of the Benaki Museum, Athens.)
5. The back of an unsigned astrolabe in the tradition of Shams al-Din al-Mizzi from 8th/14th-century Damascus. The šukkāzīya markings are here without the scale for the ecliptic. (Cairo, Museum of Islamic Art, photo from the archives of Alain Brieux, courtesy of Dominique Brieux.)

6. The zarkāliyya markings on an astrolabic plate by 'Ali al-Wadā'ī (Syria, ca. 650/1250). (Time Museum, Rockford, Ill., photo courtesy of the late Alain Brieux, Paris.)
SHAKKI

onwards, unless it is connected with lekhni (name of an Albanian canton, according to the Armenian geographer). When the Arabs talk of towns of Arrán built by the Sásândids, they probably only refer to the rebuilding of ancient sites; thus Kubāb b. Fīruz (488-531) is credited with the building of Kabala (Ibn al-Faẕḥ, 288; Yākūt, iv, 32) and his son Khusraw Anūrjūrān (531-79) with Abwāb-Shakkan, Kambizān (Kamūsoy, Kambečan in Kakhetsia) and Abwāb al-Dūndiyya (al-Baladhuri, 194).

Under the caliph 'Uthmān, Salmān b. Rabi'a, having crossed the Kura, conquered Kabala, but confined himself to concluding a treaty of peace with the chiefs of Shakkan and Kambizan. Later, al-Djarādī b. 'Abd Allāh al-Hakāmi halted at Shakki on his return from the Dāghishtān campaign.

We have a certain amount of information on Shakki in mediaeval Islamic times from an anonymous history of Darband, the Te'rīdī Bāb al-Awsāb, known from citations in the late Ottoman historian Mūnīqī, Bābī's (q.v.) Qods al-dawāl (gathered together, with translation and detailed commentary, by Minorsky in his A History of Shariah and Darband). From this, it is clear that Arab control in the first centuries was only light. A revolt in 505/820-1 killed the deputy of the Ma'mūn's governor. At this time, Arrán and Shakki were controlled by the vigorous Armenian prince Sahl b. Sunbāt, who surrendered the fugitive Bābak al-Khurrami (q.v.) to the Ma'mūtān (see al-Ṭabarī, ii, 1222-6, tr. Bosworth, The History of al-Ṭabarī, xxiii. Storm and stress along the northern frontiers of the Abbasid caliphate, Albany 1991, 76-80; Minorsky, in BSOAS, xv [1953], 505-10).

The Christians of Shakki remained for a long time in the majority. According to al-Masṭūdī, loc. cit., the principality of Shakki, adjoining that of Şanūrī (Podlēmy, v, 9; Ẓavār, Dziar, in the valley of the river Samur), was inhabited by Christians and Muslims, who worked as merchants and artisans. The king was called Adarnarse b. Humān. The next district on the east was Kabala, "haunt of robbers and bad characters", the town of which had a Muslim population while the environs were inhabited by Christians. The king (Malak) of Kabala was called 'Anbasa al-'Awar (Athdr-i Daghistan; al-Baladhuri, 194), the principal of the four chief tribes of the Ulus (erist'aw). Ewliya's notes on the tribe of Kaytak to belong to Georgia, "because the Georgians had preceded its name of one of the four chief tribes of the Ulus of Çağhatāy.

A punitive expedition sent by Timur (796/1393) drove him from his office. Although a "good Muslim", he joined the Georgians and perished in a skirmish under the walls of the fortress of Alindjak (near Nakhchivan). All in 1014/1606, through the intervention of Arūm Shāhī ibn Shāhwān (who had originally been a humble landowner in Shakki), Šīdī Ahmad, son of Šīdī 'Alī, was re-established as chief of tribe and governor of Shakki. İbrahim and Ahmed afterwards acted in concert (Yazīdī, Zafar-nāma, Calcutta 1885-9, i, 731, ii, 204, 218, 222).

To judge from the dates upon tombstones found by Yanovski in the cemetery of Kabala (890-901/1474-85), this town must have no longer existed towards the period of the Kara-Koyunlu and Ak-Koyunlu dynasties.

At the beginning of the Safawīd period, Shakki was ruled by the hereditary chief Husayn Beg, a scion (according to the Gulustān-i Iram) of the Shīrwānshāh dynasty. Hard pressed by the Georgians, he appealed for help to Shāh Ismā'il, but was killed in a battle against Lewān I, king of Kakhetsia (1520-74). When Shīrwān was conquered by Shāh Tahmāp (in 945/1538), Darvāzh Muhammād, son of Husayn, availed the last Shīrwānshāh against the Persians. In 958/1551 Shāh Tahmāsp, with the help of King Lewān, besieged Kīš and the fort of Gelesin-goresin ("come and see it") near the modern Nūkhā. Shakki was then annexed by Persia.

When in 984/1578 the Ottoman troops under Lālā Muḥtafī Pāsha (q.v.) fought a battle at Kanīk against the Khāns of Gūndja, Erwān and Nakhchivān, King Alexander II of Kakhetsia, an ally of the Turks, occupied Shakki without striking a blow, and it became an Ottoman sanjak. The Turks re-established at Shakki the son of the former governor Ahmad Khān (Hammer, GÖB, ii, 494) but an Ottoman governor (Kaytās Pāsha) was placed in Ārēṣ.

When the Safawīd again became masters of Transcaucasia, Shāh 'Abbās appointed the Georgian prince Constantin Minūrä (son of Alexander II of Kakhetsia) ūdī of Shīrwān (in 1014/1606). Shāhmir Khān of Shakki became his faithful vassal. Later, the Safawīds removed their protection from the kings of Kakhetsia, who were turning towards Moscow, tried to reduce their possessions and towards 1643, Shakki fell into the power of local makhsūs and sultāns. Under 'Abbās II, Ewliyā Čelebi visited Shakki (ii, 286-93). At this time (about 1057/1647), the sultan of Shīrwān was under the Khān of Ārēṣ. The town had 3,000 houses although he puts the stronghold of Shīrwān and the āqlat of Shīrwān. Ewliyā adds that it is considered to belong to Georgia, "because the Georgians had founded it". Ewliyā's notes on the tribe of Kaytāk whom he met near Mahmūdābād (Kabala?) are very curious; these people talked pure Mongol (ii, 291), which has now completely disappeared from these regions.

Nādir Shāh (q.v.) and his troops several times traversed the territory of Shakki and Kabala (in 1147, 1154). To be able the better to resist him, the local petty chiefs chose as their leader (Ağhā-i Dāghishtān, bāshči), the former tax-collector Hādjičī Čelebi, son of Kūrbān. In 1157/1744 Nādir Shāh besieged the fortress of Gelesin-goresin without success. After the death of Nādir (1160/1747), local dynasties arose again throughout the Eastern Caucasus. Hādjičī Čelebi consolidated his position and only allowed authority to the sultans of Ārēṣ and Kabala. On two occasions he inflicted defeats on King Ikralı of Georgia. This period was marked by two remarkable features, played a considerable part in Transcaucasia (Brosset, Hist. de la Géorgie, ii, 2, 131). Hādjičī
Celebi, a grandson, we are assured, of the priest (Kara Kashfsh) of the former church of Kfsh, was a zeal-ous Muslim and converted to Islam forcibly a large number of his Christian subjects. He died in Darband (Fath Ali Khan) or Karabagh (Ibrahim Abd al-Kadir), relying alternately on their neighbours and the Turks of the region for a short time. It was recaptured in 140/757 by Alfonso I of Astuvias or his son Fruela I at the same time as Zamora, Salamanca and Avila. It was, like those towns, recaptured, but only for a very brief period, by the kadif al-Manṣūr Ibn Aḥī ʿAmir in the second half of the 4th/10th century.

After the capture of Toledo by Alfonso VI in 478/1085, Shakkūbiya, in a rearguard position facing the Muslims, was "re-peopled" by the Castilians in 1088, although recent Spanish historiography has called into question whether the region had previously been completely depopulated. It then became the seat of a small Muslim community subject to the Christian ruling power as Muđejares (q.v.), shown, in the mid-15th century, by ʿAbd al-Dāhir (Iṣa al-Gurra), author of the Suma de los principales mandamientos y devedamientos y artículos de la Ley y Cunna, the first attempt at Muslim literature in the Spanish language.

SHAKUNDA, arabised form of Secundus, name of a little town opposite Cordova on the left bank of the Guadalquivir. According to Al-Makkarf and Ibn Ghālib, it was originally surrounded by a rampart. It was here that a decisive battle was fought in 129/747 between the Maʿaddī clan under Yusuf al-Ḥifrī (q.v.) and the al-Ṣumayl b. Ḥātim (q.v.) and the Yanamī clan commanded by ʿAbd al-Qaṭār, who was defeated. Later, at the zenith of the Umayyad caliphate, Secunda became one of the richest suburbs of Cordova and was also called the "southern suburb" (al-nabād al-ḥanib). The celebrated Abu ʿL-Walid Ismāʿīl b. Muhammad al-Shakundi (q.v.), the most famous man of letters in al-Andalus in his day, was born in Secundus; he was appointed kāfī of Baeza and Lorca by the Almohad sultan Yaʿqūb al-Manṣūr and died in 629/1231-2. It was he who wrote the famous epistle (risāla) on the merits of his native country as a companion piece to that which the author Abī Yaḥyā b. al-Muʿallim of Tanger had composed on the excellence of North Africa. The text is given almost in full by Al-Makkarf in his Kitāb al-Sakkūbiyya.

(E. LEVI-PROVENÇAL)
AL-SHAKUNDI, Abu 'l-Walid Isma'il b. Muhammad (d. at Seville, 629/1231-2), scholar of al-Andalus, originally from the village of Shakunda, which faced Cordova, on the left bank of the Guadalquivir, and who functioned as kadi of Baeza, Lorca and Ubeda. He was at the court of the Almohad al-Manṣūr, and addressed to him a poem of congratulation on his victory at Alaroco (591/1195). He was a great friend of the father of Ibn Sa'id al-Maghribi [q.v.], who sought out his company and transmitted the sparse biographical information which we possess on him. He is above all known for his Risāla (see below).

His works comprise:
1. R. fī fals al-Andalus, an epic on the merits of his land and its superiority over the Maghrib. The text is cited by Ibn Sa'id, Maghrib, and by al-Maḳkārī, Naḥf, and there are mss. at Tunis (Ahmadiyya, majmu'a, 4551) and the National Library there (Ṣādiqiyah, 8845, under the title of R. fī taṣfīl barr al-Andalus 'alā barr al-‘abasa); at Madrid (Acad. de la Historia, 29), and in the Mingana collection, 1379 (same title as the preceding). Ed. S. al-Munajjed, Faddīl al-Andalus (Beirut, 1943). See also al-Makkarf, Jāmi' al-tadālib li-Ibn Hazm wa-Ibn Sa'id wa 'l-Shakundī, in Le patrimoine hispano-mauresque, M. al-Habīb, Andalucia contra Berberia, his Cazorla. The highest points are the Yelmo de Seguar (1,809 m/6,000 feet) and the Blanquilla (1,830 m/6,100 feet).

3. Jāmī' al-durar wa-mandīb al-zuhar, a famous university since the close of the Middle Ages.

5. A few verses from his poems preserved by Ibn Sa'id.

SHAKURA, a Spanish Arabic place-name corresponding to the Spanish Segura. This last name is now only applied to the river which waters Murcia and Orihuela and flows into the Mediterranean near Guardamar. In the Muslim geographers, this river is usually called the "white river" (al-nahr al-abyad). It rises, like the Guadalquivir, in the range called Djabal al-Mansur, and addressed to him a poem of congratulation on his victory at Alaroco (591/1195). He was a great friend of the father of Ibn Sa'id al-Maghribi [q.v.], who sought out his company and transmitted the sparse biographical information which we possess on him. He is above all known for his Risāla (see below).

His works comprise:
1. R. fī fals al-Andalus, an epic on the merits of his land and its superiority over the Maghrib. The text is cited by Ibn Sa'id, Maghrib, and by al-Maḳkārī, Naḥf, and there are mss. at Tunis (Ahmadiyya, majmu'a, 4551) and the National Library there (Ṣādiqiyah, 8845, under the title of R. fī taṣfīl barr al-Andalus 'alā barr al-‘abasa); at Madrid (Acad. de la Historia, 29), and in the Mingana collection, 1379 (same title as the preceding). Ed. S. al-Munajjed, Faddīl al-Andalus (Beirut, 1943). See also al-Makkarf, Jāmi' al-tadālib li-Ibn Hazm wa-Ibn Sa'id wa 'l-Shakundī, in Le patrimoine hispano-maurisqe, Rabat 1993, 47-88.

3. And Manakil al-durar wa-manābiḥ al-zuhar and al-Mu’jam, according to the very dubious attribution of al-Zirīkī.

4. A few verses from his poems preserved by Ibn Sa'id.

SHALAMANKA or SHALAMANTRA, the modern Salamanca, provincial capital in the autonomous Commune of Castile and León and the seat of a famous university since the close of the Middle Ages.

We have no information on what happened in the ancient Roman, then Visigothic town and its region at the time of the Muslim conquest of Spain. One may posit the establishment there of Berber groups, as in other parts of the Meseta of the north, who must then have fallen back southwards after 740, leaving the region depopulated, at least substantially so, if not totally. The policy of leaving a desert zone practised by the nucleus of Hispano-Christian resistance in the Asturias must also have contributed to this. Salamantica appears amongst the civitates taken and cleared of their population by Alfonso I (739-57); omnes quoque Arabes gladio interfecerunt, Xipanos autem suavis ad patrimonium ducens, according to the chronicle of Alfonso III.

Ibn al-Athfr and Ibn Khaldūn confirm the Christians' conquest of Segovia, Salamanca, Zamora and other towns of the north-west of the peninsula in the course of the 8th century, but attribute this not to Alfonso I but rather to his successor Fruela (757-68), a divergence possibly explicable by mention in the Christian texts of a Fruela, brother of Alfonso I, who is not his successor of the same name; the Arabic texts have doubts mixed the two up. Then there is total silence about Salamanca for a century and a half; a notice in the text of the Cronica Abeldense according to which Ordoño II (850-66) is said to have seized Salamanca probably results from a confusion with Talamanca, in the modern province of Madrid.

Although we have a series of names of the bishops of the town for the 9th and 10th centuries, we cannot assume a priori that they effectively occupied their see, as in the case of Dulcidius, captured in 932/933 at the battle of Valdejunquera in Navarre and brought in captivity to Cordova. However, for much of the 10th century, it is clear that the town existed and was in Christian hands, with inhabitants and with a Leonesc count. After his victory of 327/939 over 'Abd al-Rahmān III at Simancas and Alhàndega in 327/939, Ramiro II (930-51) led an expedition on the banks of the Tormes, and repopulated its deserted towns: et civitates desertae ibidem populavit, amongst which Salamanca figures prominently. In 942 Bernardo Núñez, count of Salamanca, was defeated, with 1,800 knights, by the Muslims when he attacked the Berber town whose site remains uncertain—of Saktan, at a
place called Fadjdj al-Masadjid, clearly one of the entries to the Middle Marches. In 953, Ordoño III, king of León, gave to the bishop of his capital the churches of the region of Salamanca built, in Ramiro II's time, which he received at Cordova. In the time of the hadjib ecclesias in alhauce de Salamanica quantas hediftcaverunt ibidem populatores patris 

In 360/971 the envoys of met qui juerunt de Legiones. 

In 367/977, the Muslims entered around Burgos, Soria and La Rioja, 

there to assure its reintegration in the Islamic sector. 

It is possible that al-Mansur's campaigns led to an abandonment of the town, a "second depopulation", which would explain why the Christians had, at the very end of the 11th century, to undertake a new repopulation of the town, when the capture of Toledo had repelled towards the south the danger of a Muslim counter-offensive. Whilst the authors speaking of this repopulation (Jiménez de Rada, Lucas de Tuy) give no date, the award in 1102 by Count Raymond of Burgundy to the church of Salamanca, for its restoration, which involved also the repopulation of a quarter of the town, ut populetis ilium., is a useful reference point. The gift involved mills, fisheries and fields of which the Count held seisin (aprendiciumus, accipiemus), and has been variously interpreted. Sánchez-Albornoz saw in this presura proof of a preceding depopulation; Barvero and Vigil have retorted that already the existence of these installations and agricultural workings proves the existence of a prior population, which is said precisely to have been expropriated, whilst neglecting the fact that the mills and fisheries were to be constructed (pro facie) and the fields to be ploughed and sown (pro arare et pro seminare).

The fuero of Salamanca attests the presence of Mozarabs [q.v.] in the town after the beginning of the 11th century. But the origin of these "Arabised" Christians cannot be established with certainty, and there are on the question almost as many opinions as scholars: some supposing a local origin, and others an immigration from Andalusia or the adjacent part of Extremadura before the arrival of the Almohads and then Almohads, or then from the Shark al-Andalus [q.v.] at the time of the fall of the Calif's principality at Valencia, or an arrival from the Mozarab centres of the León region, as part of a movement of Christian colonisation. The traces left by the Mozarabs of Salamanca are, moreover, minimal, and not to be compared with their equivalents in León or above all in Toledo, amounting only to a few toponyms, often of dubious interpretation, the clearest apparently being Coreses and Cordovilla, evoking a migration from the south, from the nearby Coria and from the more distant Cordova. One theory sees in the Seranos, known as an element in the repopulation of Salamanca, as also of Ávila, nor Castilians from the sierras around Burgos, Soria and La Rioja, but people from the sierras of the Middle March, who had remained in place. This accords ill with the texts' distinction between them and the Mozarabs.

Salamanca was from the first a town and military base for the Christians, the departure point for expeditions against the remaining part of al-Andalus to the south of the Middle March, until the conquest of the modern Spanish Extremadura and the definitive union of León and Castile in 1230. Thereafter, the development of the universities and laborious establishments and, from the 13th century, plus the consolidation of a nobility, gave Salamanca its constitution lasting till the verge of modern times. The subjugated Muslims (Mudéjars [q.v.]) do not figure there any more than in all the northwestern sector of modern Spain, in contrast to the Castilian lands and the modern Extremadura. But Arabic was taught at the University of Salamanca at the beginning of the 16th century.

al-azrak (another version al-ayyad al-azhar), i.e. of a ruddy complexion combined with fairness. He is also known as al-Shalawbfn al-kablr to distinguish him from another grammarian, Abū 'Abd Allah Muham- mad b. 'Ali al-Anṣārī al-Malāki, also called al-Shalawbfn al-Dibbdj, (d. 660/1262). 'Umar al-Shalawbfn was born in Seville, where his father was a baker, and from child-
hood devoted himself to the study of grammar. At the age of 22 he had mastered Sibawayhi's Kitāb al-
Marraḳuṣhī records a complete list of his teachers, two of whom, Abū l-Kāsim b. Hubaysh and Abū Bakr b. Khayr, gave him the idjahāt, together with his only non-Andalusian teacher, Abū Ẓāhir al-Silāfī of Alexandria. Al-Shalawbfn is described as naṭīs al-naḥḥīt and idmā ṣīb al-naḥḥīt in al-Andalus, and his mas-
tery of the Arabic language was such that it was said none of his contemporaries could rival him. His work and fame reached Syria and ʿIrāq in his own life-
time. He started teaching at a very young age, around the year 580/1184, and continued until 640/1242, stopping not only because of his advanced age but, especially, owing to the serious political circumstances of the moment, with the advance of the Christians, who had conquered Córdoba, Valencia and Murcia. He died in Seville during the siege of the town, which fell into Christian hands a year later (646/1248). During his life he seems to have won the favour of the Almohad rulers (he visited Marrakush in the times of the Almohad rulers (he visited Marrakush in
the year 580/1184, and continued until 640/1242,
noting centuries. Often confused with Sala
or Sale, [q.v.

SHALLA, current fort Chella, an ancient
town of Morocco, whose ruins are to be found
on a height which dominates the Bouragrag river to
the north-east of Rabat at some 3 km/2 miles from
the sea. The site, its situation, the presence of an
abundant and perennial spring, and fertile land, explain
the antiquity of habitation there. Archaeological exca-
vations have shown traces of several occupations
(Mauretanian, Phoenician, Roman and Islamic), and
the site has yielded artifacts going back to the 7th
century B.C. Shallā was a Phoenician port between
Lucus and Mogador before becoming a Roman town.
As the capital of Jāfā II, the town was given a royal
status in the year A.D. 140 and seems to have formed
part of the fortified line of the limes before being
abandoned in the 4th century.

It is difficult to follow its evolution over succeed-
ing centuries. Often confused with Salā [q.v.] or Salé,
Shallā figures in the succession of Idrīs II; Ṭūb b. Idrīs inherited it before rebelling against the ruler of Fās. Once the Idrīṣids were eliminated, Shallā became the capital of the Maghribī Banū Ifrān [q.v.], but we know nothing of its role in the warfare against the Burgbars.[4]. After the foundation of Salā,
Shalla was partially abandoned before being destroyed by the Almoravids.

At the end of the 7th/13th century, the Marinids [g.v.] transformed Shalla into a royal necropolis. The princess Unum al-'Azzī, wife of Abū Yūsuf Yaḥyā and mother of Yūsfūs, was the first to be buried there in 682/1284, and when he died at Algeciras two years later, Yūsfūs was brought back there. The first edifice was confined to a simple mosque with the tombs. It was the Marinid Abu 'l-Hasan who undertook vast works there and created the monumental necropolis; the protective wall, with its three gates, was completed in 706/1309. The whole ensemble included, funerary chapels, two mosques (one of which minaret, still surviving, is decorated with polychrome tiles), a madrasa and a library; substantial abkās were allotted for its upkeep. After he died in the mountains of the Hiniṭa, Abu 'l-Hasan was buried at Shalla, where his tomb became an object of a curious popular veneration. He was the last monarch to be buried in the necropolis.

Some Sufis installed themselves there, and Stīt al-Kalbī 'Abd Allāh al-Yahūdī founded "a ziggurat inside the necropolis of Shalla to the left, as one enters" (P. Nuyòu, Ibn 'Abd al-Rażīd al-Kānūni, Beirut 1956, 58). It was there that Ibn 'Asqīr [g.v.] settled when he entered the region. But economic crisis seems to have preceded a political one, and according to Ibn 'Abbād, commercial activity at Shalla, which had had two famous fairs each year, was only a memory (al-Rāzīd al-Kānūni, ibid. Fas 1320). The necropolis was plundered during the anarchy after the end of the Marinids. Al-Liyānī set aside some works from the library, which he stripped of their precious ornamentation. Its royal abkās were the subject of a legal consultation, giving some idea of their importance (al-Wanṣharīfī, Miʿyar, vii, 18-21). In the 17th century, the Sāḥibī tribe transformed Shalla into a fortress and used it as a base for plundering the region.

It was not till the beginning of the 20th century that excavations were undertaken at Shalla. The Roman town has largely been revealed, and the Marinid monuments, which partially cover the classical ruins, have been identified. In a remarkable article, H. Basset and E. Lévi-Provençal described the necropolis, brought to light its inscriptions and gathered together the legends and accounts of the cults, of varying degrees of orthodoxy, which have grown up around Shalla (Chella, une necropole marinide, in Hespéris (1922), 1-92, 255-316, 385-425). Despite its age, this study has never been surpassed.

At the present time, Shalla, with its gardens and its ruins inhabited by storks, has become an important tourist spot.

AL-SHALLAMAGHANI [see MUHAMMAD B. 'ALI].

SHALTISḤ. Saltés, a town of southwestern Spain (lat. 37° 12′ N., long. 6° 59′ W.), opposite Huelva, in the marshes of the mouths of the Tinto and Odiel rivers. The Island of Saltés is made up of three zones of lands and sands (El Amendaral, El Acebuchal and La Casacajera), covered with low vegetation and a quality emphasized by al-Idrīsī. The highest point (15 m) is on El Acebuchal; El Amendaral is no higher than 7 m—at the site of the Almohad fortress—despite the man-made accumulations of the Islamic town.

Shaltisḥ is not mentioned by Ibn Hayyān, al-Mukaddasī and Ibn Hawkal, although all three mention the nearby hīn of Gibrālīt (Qābal al-Uyun) or the neighbouring town of Niebla (Labla); al-Rāzīf no longer mentions the site. However, the place name appears in al-Idrīsī in the story of events during the amir 'Abd al-Raḥmān II's reign (3rd/9th century), in regard to the campaign of 219/834, during which the Norsemen, after a raid on Seville (al-Bīšībī), "swept down... as far as the Island of Saltés" (Fragmentos, 100, 175). From the end of the 4th/10th century, the position of the island and the site are known from the Arab geographers (J. Vernet, España en la geografía de Ibn Sā'id al-Maghribī, in Hesperis [1958], 314; al-Idrīsī, Los caminos de al-Andalus en el siglo XII, ed. and tr. of Dhikr bilād al-Andalus, Madrid 1983, i, 178-216) mentions the island site of the town, but also the existence of a well-used port, a market, a dense urban pattern and an iron-working industry; whereas Yākūt and Ibn Saʿīd (early 7th/13th century) mention it only as a small town (Yākūt, Baldūn, iii, 359) and an important centre for fishing, where fish was salted before being sent to Seville and other towns of al-Andalus (al-Makkārī, Analectes, i, 104; Ibn Saʿīd, Mughrib, i, 342-3, 346, 357). A little later, al-Hīmīyārī gives us a more detailed picture of the town, its agricultural hinterland and its economic life: the urban area was built up, without any empty space between buildings, but the town, which had an arsenal, lacked any protective wall (al-Rawd al-miṣrī, 44, 135-6). Shaltisḥ is still mentioned in the 8th/9th-14th/15th centuries.

At the opening of the 5th/11th century there was constituted a principality of Saltés-Huelva, which Abu Zayd Muhammad b. Ayyūb (399-402/1008-12) governed, followed by his son 'Abd al-'Azzī (403-43/1012-51). When the latter abdicated, his son 'Abd al-Azīz al-Bakrī, the great geographer, who was born at Saltés, was 30 years old [see Aṣr ʿubayd al-bakrī]. In the 'Abbāsid kingdom of Seville, Saltés was merely an administrative district (M. Alarcon and C.A. González Palencia, in Miscelanea arabe, Madrid 1915, 459-60). It was during the Almoravid period that the town saw its most splendid growth, according to al-Idrīsī and al-Hīmīyārī. From 539/1144-5 onwards, Saltés became part of a new geopolitical complex which embraced, as well as Niebla and Huelva, the mudūn or ḥarāt of Silves, Mértola, Évora and Beja, which became in Almohad times the economic bases for the new power. After a period when Saltés was closely linked with the Portuguese Algarve (6th/12th century and the first half of the succeeding one), there followed a phase of about a century (1151-1257) during which Saltés and Huelva were districts of the province of Niebla (A. Huici Miranda, Historia política del imperio almohade, Tetuán 1956, i, 240-2). However, Christian pressure increased. The Portuguese took the town in 1179 and captured numerous prisoners. It was partly destroyed, but again became active and prosperous in Almohad times, before being attached to the principality of Niebla towards 655/1257; at the time of the Christian reconquest, it became rapidly depopulated and was never re-occupied.

From 1495 to 1970, Saltés was the object of excavations aimed at discovering the site of Tartessos. Little has been published of the oldest ceramic fragments are apparently of Punic type, but most are of "Arab" type, mixed up with some Roman tegulae, the
latter recalling the fact that, according to Strabo, III. 5.5, confirmed by al-Himyarī, there was a sanctuary dedicated to Hercules. F. Wattenberg put forward the hypothesis, after several visits there, that Salṭs was possibly the mythical Tarentos, and there have been found traces of activity stretching over several hectares. At the northern point of El Almendral, the Islamic town of Shaltīsh shows traces of its last phase of occupation (end of the 6th/12th century and first half of the 7th/13th). A kasaba, of quadrangular plan (70 m by 40 m), with six bastions, including four at the angles, covers 3,500 m². Excavations made since 1988 confirm al-Idrīsī and al-Himyarī on the urban structure, with streets and lanes—1.30 m to 1.60 m wide and with a sub-orthogonal orientation—marking out the "islands" of houses; this regular urban pattern gives the lie to the "traditional" view of the anarchic structure of the Hispano-Muslim town.

In the high period, the pottery shows two phases of occupation, one 9th-10th century and the other at the end of the 10th and the beginning of the 11th century. Then traces of later building, with the Almohad houses built upon foundations of the older levels, silos, rubbish-filled ditches and workings where earth was extracted for tibāyi, mark the active period of the 11th and 12th centuries. The final stage, Almoravid and Almohad, is well preserved: a symmetrical, almost square plan, 12th and 13th-century houses built round a patio on to which open at least two large rectangular rooms with alcoves, which seem to correspond to an oriental mode of habitation. There is also a tendency towards the specialised use of space (kitchens, storerooms, latrines); brick paving and wells of sweet water and channels for running off surplus, waste dirty water complete the arrangements. Construction materials include, predominantly, earth, used in shuttering on stone bases. The Almohad level shows much re-use of earlier materials and foundations. All over the site there are numerous deposits of metallic slag and ashes showing the existence of metal-working: the workshops were situated slightly to one side (the north-east of the madīna, where the prevailing winds could carry away smoke and sulphurous emissions. The island location of Shaltīsh facilitated the transport of materials and fuel.

The Christian conquest of the mid-13th century meant the disappearance of the Muslim population, and texts are henceforth limited to mentioning the kasaba; as for the town, it was not even used for building material. To explain this abandonment, it has been suggested that there might have been an irreversible salinisation of the water in the wells of the Muslim town.

In 1957, he was appointed by presidential decree to the position of Vice-Rector (wakīl), and in October 1958 to that of Shaykh ul-Alam (tahtīb), and in October 1958 until his death on 13 December 1963, an influential author of Islamic reform [see iṣlaḥīyāt] in the tradition of Muhammad 'Abduh [q.v.] and his school of thought.

He was born on 23 April 1893 in Minyat Banī Manṣūr, a village of Lower Egypt, in the province of Buhayra [q.v.]. In 1906 he was enrolled at the muḥād dinī of Alexandria, a religious institute founded in 1903 and affiliated to al-Azhar (for details see Lemke, 34-46). He received his diploma (gihāda al-ʿālimyā) in 1918, and early in 1919 started teaching at the Shaltūt, which was transferred to Cairo in order to lecture at the Higher Division (al-bīsīn al-ʿālī) of al-Azhar.

Having developed some ideas of a reform of al-Azhar (including steps to achieve greater independence from the state) as early as 1924, Shaltūt fervently supported Shaykh Muhammad Mustafā al-Marāgī and his reform programme when the latter became rector in 1928. After Marāgī’s resignation and the appointment of Shaykh Muhammad al-Ahmād al-Zawāhrī as rector in October 1929, Shaltūt was one of those who resisted the new Shaykh al-Azhar and his course of action, which he considered to be more or less reactionary. This led to his dismissal in September 1931. Until 1935, when he was reinstated following Marāgī’s second appointment as rector (1935-45), Shaltūt worked as a lawyer in the Shārtā courts. Back at al-Azhar, he became Vice-Dean (wakīl) of the Kulliyat al-Shārtā and, in 1939, inspector of the religious institutes (mustafîth bi l-muḥād al-alimyā).

In 1937 Shaltūt was one of three scholars representing al-Azhar at the Deuxième Congrès International de Droit Comparé held at The Hague. The lecture he gave there on civil and criminal liability in Islamic law was well received, not only by many participants of the congress but also in Azhar circles. It paved the way for him to become, in 1941, a member of the Qur'ān-kāf kāf al-īslāma? (see Lemke, 116-20, and Ahmad Fātīḥ Bahnasī, Ṣāḥib wa-taṭlīk ‘alā rīsālāt al-māḥtūm al-ānim al-ṣaykh Shaltūt an al-māsī ālīyā al-mādāniyya wa l-dīnīyya fi l-ṣhārtā l-īslāmiyya, Cairo 1407/1987).

In 1946, he was elected to the Arabic Language Academy in Cairo (see the obituary by ‘Abd al-Rāżīk and Muḥammad Mahdi ‘Allām in the Academy’s journal, Muḥ. Muṣtrima’ al-Luqāwa al-ʿArabīyya, xiix [1965], 147-53 and 155-62, respectively). In November 1957, he was appointed by presidential decree to the position of Vice-Rector (wakīl), and in October 1958 to that of Shaykh al-Azhar (Zebīrī, 12). Soon after taking up office, Shaltūt announced his determination to work for a far-reaching reform of al-Azhar. He praised the Reform Law passed by the National Assembly in June 1961 (for an analysis and evaluation of that law, see Lemke, 166-232), but as a result of what he saw as constant interference in Azhar affairs by the government, he became increasingly dissatisfied with its implementation (‘Abd al-‘Azīm, 202 ff.; Zebīrī, 28-31). During the last two years of his life, poor health forced him more and more to withdraw from public life. His funeral on 14 December 1963 was attended by huge crowds of mourners.

To a considerable extent Shaltūt’s popularity was due to his outstanding oratorical skills. He is said to have been the first Azhar scholar to use broadcasting regularly for religious sermons and for answering

SHALTUT, MAHMUD, Egyptian Sunni religious scholar, rector (shāhiḍ) of al-Azhar [q.v.] from October 1928 until his death on 13 December 1963, an influential author of Islamic reform [see iṣlaḥīyāt] in the tradition of Muhammad ‘Abduh [q.v.] and his school of thought.
queries (partly printed as *Ahddith al-sabah fi 'l-midhydc*, with Muhammad Muhammad al-Madanl, i, Cairo 1959, and *Fattat, dirasa li-mughãli al-muslim al-mu'ãsir ft haybati al-ya'miniya al-'lamma*, Cairo 1964, 1991. In both publications Shaltut amply discussed problems of contemporary Muslim society such as family law (strongly defending the principle of polygamy), birth control, private property etc. (for a commentary on the first two, see a further article by Y. Linant de Bellefonds, in *Orient*, Paris, no. 19 [1961], 27-4; for details, Zebiri, index). His booklet on *dîjâd* [*q.v.*], *al-Kîlal ft 'l-islâm*, written in 1940 and published in 1948, has been translated into English (R. Peters, *Jihad in medial and modern Islam*, Leiden 1977, 26-79). Shaltut's Kur'ân commentaries, especially his *Tafsîr al-kur'ân al-karim: al-âçîz al-âçâhara al- sûla*, Cairo 1959, 1988, and its characteristics, are described by Zebiri, pp. 50-5. For further titles of Shaltut's works from 1961 (Djabal, 388-9, and Lemcke, 261-2), who in addition lists articles which appeared in *Maqallalat al-Azhar* or elsewhere (see also Zebiri, 188).

Especially among Shi'a, Shaltut is well remembered for his zeal to promote a rapprochement between the Muslim schools of law in general and between Sunnis and Shi'a in particular, i.e. to overcome misunderstandings, avoid polemics and establish a basis for discussion and cooperation—without, however, merging all the madháhib into one (Zebiri, 24-6). In this connection, he actively supported the *Qamâs al-Takrib bagn al-Madhâhib al-Islamiyya*, founded in Cairo in 1947, and its institute there, the *Dîr al-Takrib*. He kept up a correspondence with Shi'i religious leaders such as *Ayatalliâh Burjûrdî* [*q.v.*] in Suppl. In summer 1959 Shaltut issued a *fatwâ* to the effect that worship according to the doctrine of the Twelve Shi'a was valid and that this school was a recognised madhâhib within Islam (for the Arabic text, see, e.g. *'Abd al-'Azîf, 188*; for translations into other languages, Ende, 312, n. 13). The *fatwâ*—originally an answer cut out from a newspaper interview and distributed by the *Dîr al-Takrib*—was greeted with enthusiasm in the Shi'i world, but also kindled sharp criticism on the part of certain circles of the Salafiyya [*q.v.*]. Its effect at al-Azhar and elsewhere, however, was soon counteracted by both internal and external opposition as well as by international developments, such as the outbreak of a crisis between Persia and Egypt in summer 1960 (Ende, 314 ff.). For all Muslims striving for a rapprochement, however, Shaltut's *fatwâ* remains a source of inspiration [see further, *Takrib*].

**AL-SHAM, AL-SHÂM, Syria, etymologically, the “left-hand region”, because in ancient Arab usage the speaker in western or central Arabia was considered to face the rising sun and to have Syria on his left and the Arabian peninsula, with Yaman (“the right-hand region”), on his right (cf. al-Mas'ûdî, *Murâdh* iii, 140-1 = § 992; al-Mukaddasî, partial French tr. A. Miquel, *La meilleure répartition pour la connaissance des provinces*, Damascus 1963, 155-6, both with other, fanciful explanations). In early Islamic usage, the term *bi平坦 al-shâm* (cf. *al-takrib* above) denoted dynastic and political usage became known as “Greater Syria”, including the modern political entities of Syria, Lebanon, Jordan, and Israel and the West Bank of Palestine, in the north spreading into the modern Turkish *ibs* or provinces of Hatay (the former *sangîd* of Alexander [see *IKANDARUN*], Gaziantep [see *AYNÂT*] and Diyarbakr [see *DIYAR BAKR*]. As often happened in the earliest Islamic times (cf. *Mîr*—both Egypt and its capital), al-Shâm could also denote the historic administrative capital of the region, Damascus [see *ĐIMASQ*].

For the modern component countries of this Greater Syria, see *FALÂSYN, LÜBÂNân, AL-URDUNN*. The modern Syrian Republic is known as Suriyâ or Suriyya. The geographical section 1. below deals with the region of modern Syria. The historical section 2. necessarily deals with the Greater Syrian region as a whole for the earlier Islamic centuries, when the modern political divisions had little distinctive history as such until the approach of modern times. By then, however, such a region as Lebanon, with its own long-standing separate cultural, religious and political traditions, began to pursue a historical role of its own; this is considered in LÜBÂNân.

**1. Geography.**

Modern Syria falls naturally into a western, Levantine section bordering on the Mediterranean, characterised by mountain ranges and hills with valleys and depressions between them, and with a maritime climate; and an eastern one, in which these hills and valleys gradually subside into a table-land, steppes and deserts, naturally bounded by the Taurus Mountains to the north, crossed by low ridges of hills and having a more continental climate. In its north-east, it is crossed by the Euphrates [see *AL-FURAT*] and Khâbûr [*q.v.*] rivers.

The western section contains rivers running into the Mediterranean like the Orontes or al-'Âşî [*$q.v.*], the Nahr al-Kabir, the Nahr al-Sinn and the river of Hîms. Inland from the narrow coastal plain are mountains and hill ranges running roughly north-south. In the far north are the Amanus Mountains or Gavar Dağ and the Djabal al-Akrad or Kurt Dağ, then the Orontes river valley, and then the classical Cassius or Djabal al-Akrâ (*bald mountain*), from its white appearance). To the south of the Nahr al-Kabîr valley is the gently-folded limestone plateau of the Djabal al-Ansarîyya (highest point, Nabi Yûnus, 1,583 m/5,194 feet). To the south of the River of Homs the Djabal 'Akkâr marks the beginning of the much higher Lebanon Mountains (highest point, al-Karma al-Sawda, 3,086 m/10,131 feet).

To the east of these ranges lies the northermost section of the depression of the Great Rift Valley of East Africa, the Red Sea, the Dead Sea and its Syrian continuation: in the north, the *Arûk depression* [see *AL-'ÂMEÊ*], and in the classical Islamic *Bukhara Anjâkîya, modern Amûk Gölî*; the long valley of the Orontes, forming the Gháb, regulated by the Lake of
Homs, and south of Hims forming the Bika'at [q.v.] or Bekaa between the Lebanon and Anti-Lebanon Mountains. Finally, to the east of this series of valleys and depressions lies a further line of hills and mountains: the Djabal al-Zawiya to the east of the Ghâb (highest point, Djabal Ayyûb, 935 m/3,068 feet), and then south of Hims, the much higher Anti-Lebanon range, al-Djâbal al-Sharkî, culminating at its southernmost tip in Mount Hermon or Djabal al-Shaykh (2,814 m/9,232 feet).

From the eastern sides of these hills and mountains begin the steppes and deserts, with the great cities of Syria—Aleppo [see ʽAlyan], Hamâ, Hims [q.v.] and Damascus—lying in the agricultural zone of the foothills and with cultivable lands in their rain shadow. The steppelands run eastwards to the Euphrates banks and beyond, with a purely artificial frontier separating Syria and Irâk. There are various low, broken ridges within the northern part of these plains, such as the series of low hills stretching north and south of Homs, the much higher Anti-Lebanon range, al-Djâbal al-Sharkî, culminating at its southernmost tip in Mount Hermon or Djabal al-Shaykh (2,814 m/9,232 feet).

The eastern slopes of these hills and mountains begin the series of low hills stretching north-eastwards from Damascus and ending in the Djabal al-Bîghîr. Here in this semi-arid steppeland, crops have for long been possible where springs and wells can be found; but extensive dams and irrigation works along the course of the middle Euphrates have made possible a great extension of agriculture there at the present time. South of the ancient desert caravan station of Palmyra [see ʿAmmar], however, is the true Syrian Desert, the Hamâd, where springs are almost unknown and the few wells have only a limited supply of water. To the south of the agriculturally rich Damascus basin (the classical Islamic Ghûta [q.v.]), there runs from the base of Mount Hermon the Golan Heights [see al-Qawawîs] a basal-slab, volcanic zone, such as lava-fields as the Ladjât [q.v.], classical Trachonitis, to the south of Damascus; the Saftâ [q.v.] to its south-east; and then, running southwards beyond ʿAlkhkât [q.v.] into modern Jordanian territory, the Hawran [q.v.], classical Aurumús, or Djabal al-Durûz (highest point, 1,734 m/5,687 feet).

2. History.
(a) To 1918.
Syria had become a Roman province in 64-63 B.C., when Pompey annexed it after the decline of the Seleucids. It became one of the most important provinces of the Roman empire, as the key to the defence of the empire's Asiatic territories. Administratively, it was divided by Septimius Severus into the two provinces of Syria Coele in the north and Syria Phoenice in the south, but by the early 5th century, various local, hitherto autonomous principalities had been brought under direct rule, and Syria was subdivided into at least five provinces. The land frontiers of Roman and Byzantine Syria were under continuous pressure from formidable military powers of the east, first the Parthians and then, from the 3rd century onwards, the Sassanids [q.v.]. Hence the importance of the times there, an elaborate system of defences in depth, with strongholds connected by a network of roads across the country, running roughly from Bostra (Bozrah [q.v.]) in the Hawrân northeastwards to the Euphrates, crossing the river at Circumce (the later Islamic Karakshiyâ [q.v.]) and then on to the Singara (Djâbal Singjar [see ʿAyn Surq]).

For the manning of this broad defensive zone, the Romans and Byzantines relied on native auxiliaries as well as their own professional troops. These auxiliaries were in a treaty relationship with the empire, hence called foederati or symmachoi, and included various Arab tribesmen who figure in the Islamic accounts of the Arab conquests as the Mustûrîbî. Tribes represented in their ranks included the Kalb, Bai, Djuhdâm, Lakhâm, Taghûtib, Tanîkâh, Iyâd, etc., many of whom became at least superficially Christian. Especially notable here was the Arab kingdom of Ghassân, of South Arabian origin but from ca. A.D. 500 enthusiastic Monophysite Christians, who promoted and controlled much of the economic and cultural prosperity of the rural and desert fringes of Syria [see ʿUmayyad]. Their florescence was bound up with that of Byzantium, and they went down with the Byzantine cause in the Arab-Islamic conquest period, fighting in the Emperor Heraclius' forces at the Battle of the Yarmûk (see below) under their last king Djâbal b. Ahyâm [q.v.], in his last years a fugitive in Byzantium. For the detailed history of the relations between the Arabs of Syria and the Romans and Byzantines, see the works of Irfan Shahid, including his Rome and the Arabs, Washington D.C. 1984; Byzantium and the Arabs in the fourth century, Washington D.C. 1984; Byzantium and the Arabs in the fifth century, Washington D.C. 1989; Byzantium and the Arabs in the sixth century, Washington D.C. 1995.

The caravan route up the west coast of Arabia, connecting Mecca with Syria, was familiar to the Prophet Muhammad and the first Muslims. The youthful Muhammad's trading trip with his uncle Abû Tâlib to Bozrah and his alleged meeting with the Christian monk Bâjrâ, who recognised him as a future prophet, figures in the accounts of the Sîra (see, e.g. Ibn ʿIshaq, tr. in W.M. Watt, Muhammad at Mecca, Oxford 1953, 36-8, and nabîrâ). It should also be recalled that Jerusalem [see ʿAqsa] was a city of Syria and that it was the original hikmat of the new faith and traditionally identified with the masjd al-ʿašâr of the Kur'anic isra' or night journey [see mišrâq], was of great religious significance to Muhammad and the early Muslims. The whole province of Syria was in fact to be famed in subsequent Islamic times for its innumerable masjids, holy sites, tombs and places of pilgrimage, identified above all with the Old Testament prophets and patriarchs, a Holy Land par excellence (see the eulogies of al-Mukaddasî, tr. Miquel, 117-20, 145-52, 228; the minor genre of the katah al-ʿzâyîrî, such as the K. al-ʿzâyîrî of ʿAlî b. Abî Bakr al-Harawî [q.v.], French tr. Janine Sourdel-Thomine, Damascus 1957, 6-74; and the extensive faddîl al-Kuds literature [see ʿAl-kuds, II.1.3]).

Hence military probes in the direction of Syria began in the Median period of Muhammad's prophet-hood, but a large-scale expedition to Mu'ta [q.v.], to the east of the later Karak, in 8/629, was decisively defeated by Byzantine defence forces. Hence the definitive onslaught on Syria by the Muslims did not begin until the last months of Abî Bakr's caliphate and the beginning of ʿUmar's one, after the safety of Medina. At the outset, there seem to have been four main Arab leaders operating against Syria, ʿAmr b. al-ʿAs [q.v.] in southern Palestine, Surâbîbî b. Hasanî in Jordan,
Yazid b. Abü Sufyân in the Balkâ [q.v.] to the east of the Jordan, and Abü 'Ubayda [q.v.] in the Djâlân, and from the information in such sources as Ibn Aţham al-Kâfi, al-Tabâri and Ibn 'Asâkir, it seems that the Muslim forces numbered some 24,000, the siege settled Hīdajâs, from Mecca and Medina, nomads from the Hīdajâ and tribesmen from Yemen. The real breakthrough came with the arrival of a fifth group, via 'Irâk, under the Meccan general Khâlid b. al-Walid [q.v.]. The first major battle took place at Ad-Dhârijn [q.v.] between Ramla and Bayt Dhibûn in Palestine (Djumâdâ 1 I/23 July 634 or Dhû 'l-Ka'dâ 13/January 635). The defeated forces tried to reform behind the marches of Shânân. Dislodged, they crossed the Jordan, to be again defeated at Fîjîr or Fâjîr [q.v.] (Pella). Palestine was definitely lost to the empire.

In Muharram 14/March 635, the Arabs took up their position under the walls of Damascus. Abandoned by the Greek garrison, the citizens capitulated in the following Radjab/September. The army collected by Heraclius to raise the siege arrived too late. The Arabs established themselves in Djiâbiya [q.v.], then retired through the Syrian desert toward the borders of Yemen. The year 18/639 was marked by the plague of 'Arwâs [q.v.]. Abü 'Ubayda died, and Yazid b. Abü Sufyân, governor of Damascus, perished in the epidemic and was replaced by his brother, Mu'âwiya. 'Umar rigorously maintained the political inequality of the conquerors and conquered. The latter, the Abâl-Ki'tâb [q.v.] or Dhimmîs "protected peoples" [see DHIMMA], formed the majority of the population. The privileged race of Arabs, the Kâfidhûn or warriors, was to form the framework of a military and salaried aristocracy. Syria was divided into ad-Djânîd or military districts: Damascus, Hîms, Palestine and al-Urdunn or the province of Jordan. Yazid I later added the ad-Djânîd of Kinnârin for the north of Syria. From their military cantonments—the chief of which was Djiâbiya—the conquerors controlled the country and collected the taxes. Besides the land tax or dqâda [q.v.], Mu'âwiya paid a personal or poll-tax, the dqâda [q.v.]. In Syria, as in the other conquered provinces, "organisation was confined to a military occupation for the exploitation of the natives. The Arab government was confined to finance; their chancellery was an audit office" (Wellhausen, Das arabische Reich u. sein Sturz, 20, Eng. tr., The Arab kingdom and its fall, 32).

At the beginning of his administration, which under 'Uṯmân extended over all Syria, Mu'âwiya realised the necessity of giving the support of the Arab tribes of Syria, politically more developed than the Bedouins of the Arabian peninsula. For his policy and military operations, see MU'ÂWIYA.

'Ali, 'Uṯmân's successor, wanted to dismiss him, but the Syrians took the side of their governor. The encounter between Syrians and 'Irâkîs on the battlefield of Sîfin [q.v.] being indecisive, arbitrators were appointed to decide between the two parties. The conference at Adhrûh [q.v.] between Ma'ân and Petra did not reach a clear decision, but the outcome was clearly unfavourable for 'Ali. Profiting by this diplomatic success, Mu'âwiya sent 'Amr b. al-Âjî, his lieutenant, to conquer Egypt. On 17 Ramadan 40/24 January 661, 'Ali fell victim to a Khârdijî dagger, and the field was left clear for his rival. Umâyяд Syria. The field was now clear for Mu'âwiya to found a dynasty, that of the Umâyядs [q.v.].

He was acclaimed as caliph at Jerusalem by the troops and 'amîrs of Syria. By taking up his residence in Damascus, he made it the capital instead of Medina or Kûfâ. Whether deliberate or not, this step dis-
placed the centre of gravity of the caliphate to the advantage of Syria, and the Islamic capital never returned to the Arabian peninsula. Mu'āwiya made the Syrian Arabs, and especially those of the South Arabian or Kalb group, supreme, and under the early Umayyads they held all the principal offices. He tried to besiege Constantinople. For a verdict on the policy and character of the sovereign, who was with 'Umar I the real founder and organiser of the caliphate, see MUSAYYAR. He died at Damascus in Rajib 60/April 680, aged 75.

His son and successor, Yazīd I, had to face a rebellion, which the ability of his father had been able to prevent breaking out. Al-Husayn b. 'Abd Allah b. al-Zubayr [q.v.], nephew of 'Ali, the prophet's widow, refused to recognise Yazīd and took refuge in the inviolable territory of Mecca. Al-Husayn renounced allegiance and left the sanctuary, to fall in the massacre of Karbalā' [q.v.]; in 61/680 Medina quarrelled with Syria, and its inhabitants proclaimed Yazīd deposed. After futile negotiations, recourse was had to arms. Victorious on the day of al-Ḥarrā' [q.v.], the Syrians marched on Mecca, where Ibn al-Zubayr had declared himself independent. His headquarters were in the great mosque. A scaffolding of wood covered with mattresses protected the Ka'ba from the Syrian catapults. The carelessness of a Meccan set it on fire (Rābi' I 64/November 683). The news of the death of Yazīd at this point decided the Syrian army to retreat. Yazīd was not a worthless sovereign, still less the tyrant depicted by anti-Umayyad, pro-Abbāsid and Shi'i annalists. He continued his father's policy. The patron of artists and poets, and himself a poet, he completed the administrative organisation of Syria by creating the qur'tān of Kinnarīn (see above). He perfected the irrigation of the Ghūṭa of Damascus by digging a canal which was called after him. The Continuatio Byzantino-Arabica calls him iucundissimus et canenis nationibus regni quis gratissime habitus ... cum omnibus civitatis civitati. "No caliph," says Wellhausen, "ever had such praise; it comes from the heart."

His younger son, the valetudinarian Mu'āwiya II [q.v.], who was apparently carried off by the plague which was raging in 684. His brothers were all equally very young. The fact that they were minors compelled the Syrian chiefs of the Kalb to give their support to Marwān b. al-Ḥakam [q.v.], first caliph of the Marwānid branch (June 22, 684). The Kaysā of northern Syria and the Dārāṣṭra, having refused to recognise him, were defeated at Mardj Rāḥīt [q.v.]. His reign was a continual series of battles. A rapid campaign secured him Egypt. Exhausted with his exertions, the septuagenarian caliph returned to Damascus to die in Ramaḍān 65/May 685. His eldest son 'Abd al-Malik [q.v.] succeeded him. He had to retake the eastern provinces and Arabia from the anti-caliph Ibn al-Zubayr, and at the same time repel an invasion of the Mardādites of Dārāṣṭa [q.v.]. In Jerusalem, we owe him the building of the mosque of al-ʿAqṣā [see AL-MARDĀD AD-ʿAQSĀ]. 'Abd al-Malik's reign sees a shift to a more centralised form of government and uniformity in its execution, after the Second Civil War had shown the fragility of loyalty to the Umayyads even amongst the tribesmen of Syria and the Dārāṣṭra, and after there was taking place an acceleration in the numbers of the Syrian population converting to Islam and becoming mawṣūlī [see MAWLĀ] or clients of the ruling class of Arabs. For the first time, something like a standing army of loyal Syrian troops appears during the Mardānid period, additional to the older tribal contingents. At the same time, a certain process of Arabicisation in the state is observable, with the nakl al-dīnāwī or change from local languages, Greek in the case of Syria, to Arabic as the chief administrative language, although the process was not completed till some decades later [see DĪWĀN I]. Similarly, there was the appearance of a specifically Muslim, purely epigraphic form of coinage after earlier reliance, in the case of Syria and Egypt, on the older Byzantine gold coinage pattern [see SIKKA. 2], and a decisive proclamation of the triumph of Islam, seen in the inscriptions of the Dome of the Rock in Jerusalem [see AL-RUDS. I, and RUBĀṭ AL-SAQĪBA], perhaps as part of the building-up of Jerusalem as a pilgrimage centre at the side of Mecca and Medina. All in all, it now becomes possible to speak of the emergence in Syria of a distinctive Arab-Islamic state rather than what had been, in many respects, a successor-state to Byzantium.

His successor in Shawwāl 86/October 705, al-Walīd I, brought to the throne an autocratic temperament and a display of religious fervour unknown in his predecessors. He was the great builder of the dynasty. According to the earliest evidence, it seems that the Christians of Damascus had been allowed to retain the splendid Basilica of St. John the Baptist. In his reign, the Arab empire attained its greatest extent. Al-Walīd was singularly successful in his enterprises. His autocratic mood revealed itself in a diminution in tolerance to the conquered peoples. The great administrative offices were definitely taken from the Christians. By his fondness for magnificence, al-Walīd secured undisputed popularity with the Arabs of Syria. He died in Ramaḍān 127/February 715.

His brother, Sulaymān b. 'Abd al-Malik [q.v.], founder of al-Ramlā [q.v. in Palestine, succeeded him. He perished on the way back from the disastrous siege of Constantinople. He was succeeded by his cousin 'Umar II b. 'Abd al-ʿAzīz [q.v.] who was replaced by the incapable Yazīd II. From the time of al-Walīd I, the Umayyads had begun to forsake Damascus and to reside more and more on their rural estates [see UMMAYYAD]. However, in the later years, which he passed largely on his desert estates of al-Ruṣāfā near the Euphrates [see AL-RUṢĀFĀ. 3], were clouded by succession troubles. He was succeeded in 125/743 by his nephew, Walīd II, son of Yazīd II. This prince, an artist and poet, lived contentedly in the desert, where he began the building of the splendid palace of Mghāṭī [q.v.]. He died at the hands of an assassin before finishing it (126/744). His successor, Yazīd III, was the first caliph born of a slave. He died five months later, having designated as his successor his insignificant brother, Ibrāhīm, who did not succeed in getting himself acknowledged.

In the midst of the general anarchy, there came on the scene the energetic governor of Mesopotamia, Marwān b. Muhammad [q.v.], grandson of the caliph Marwān I. The victory of 'Ayn al-Djār [q.v.] or 'Angār in the Bābk broke the resistance of his adver-
saries, the Syrian Yemenis. Becoming caliph in 127/744, Marwan II moved his capital to Harran (Mesopotamia), which brought him nearer to the troubled region of the Dājrāt but alienated the Syrians from him. He exhausted himself in putting down such rebellions as those of the Khāridjīt. The ʿAbbāsids were now secretly conspiring against the Umayyad dynasty. Taking advantage of the disaffection in Syria, Abu ʿl-ʿAbbās al-Saffah [q.v.] had himself proclaimed caliph at Kufa (132/749). After his defeat on the Great Zāb (132/750), Marwan had to evacuate Mesopotamia, and then Syria. Abandoned by the Syrians, he took refuge in Egypt, where he died at Matmata in 132/June 750. The Umayyads were everywhere pursued and exterminated, their tombs desecrated, and their ashes scattered to the winds. The Syrians tried in vain to regain their lost ground. They raised the “white flag” of the Umayyads in opposition to the “black flag” of the ʿAbbāsids. They found too late that by indifference to the fall of the Umayyads they had thrown away the future and supremacy of Syria. They hoped henceforth for some chiliasm coming of al-Sufyān [q.v.], a national hero and champion of Syrian liberty. As his name shows, al-Sufyān, was to be a descendant of Abū Sufyān and the line of Muʿawiyah. He was to bring back the golden age and the happy days of the dynasty, the memory of which his name perpetuates.

The Umayyad court at Damascus, and the caliphal residences scattered up and down Syria, became lively cultural centres once Arabic literature revived after its period of quiescence during the period of the early Arab conquests [see sūra 1. (a)]. The Monophysite Christian al-Akhṭal [q.v., and Blachere, HLA, iii, 466-74; Salma Jayyusi, in Camb. hist. Arabic lit., i, Arabic literature to the end of the Umayyad period, Cambridge 1983, 396-401], the tribe from the Rabīʾa group of Taghlib [q.v.], was the eulogist of the caliphs from Muʿawiyah to al-Walid I; ʿAbd al-Malik later brought the support of Syrian and especially of his own tribe of Tamūm, under several rulers from ʿAbd al-Malik to Highmān. Their poetry also reflected the fierce tribal rivalry of South and North Arabs which at times racked the Syrian countryside and was to contribute to the fall of Umayyad power there. The achievements of Umayyad art and architecture, concentrated in Syria, are described in Umayyads, Art and architecture.

We also have the first appearance of sectarian currents within the mainstream of the Islam of the time, such as that of the Kadariyya [q.v.], which had representatives in Syria and which came to attract the wrath of Highmān and subsequent caliphs; and Damascus seems to have been a lively centre of Muslim-Christian debate and polemics, even though the correspondence allegedly between ʿUmar II and the Byzantine Emperor Leo III is presumably the work of a Syrian Muslim rather than of the caliph himself.

Agriculture remained flourishing in spite of the greed of the exchequer. As a result of the war with Byzantium, maritime trade had considerably diminished. On the other hand, the fall of the Persian empire had opened up possibilities in Persia and the east to the Syrians, but they were soon to meet the competition of the commercial cities of Irāk, notably Baghdad, during the time of Justinian, became dormant under the Arabs. When maritime relations were resumed, it was the western peoples who secured the advantage from it, at the time of the Crusades. From the time of the Marwānīs, the great towns of inland Syria—Damascus, Hims, etc.—began to be Islamized as a result of the abolition of the military cantonments. The subject races learned Arabic, without, however, abandoning Aramaic or Greek. Descended by epidemics, famine, civil strife and foreign wars, the Arab population of Syria grew slowly. If we neglect local outbreaks of fanaticism, there is no evidence of systematic persecution or proselytizing encouraged by the authorities. The latter only exercised pressure on the Christians of Arab race, the Tanūkh and Taghlib. The Kalb and other Syrian tribes had already been converted.

In spite of their position as second-class citizens, this was a period of marked tranquillity and tolerance for non-Muslims, if we compare it with the troubles that awaited them under the ʿAbbāsids. For the Arabs, paid and fed by the state, it was a golden age, a continual feast, and their chiefs, growing rich in exploiting the provinces, acquired enormous fortunes.

ʿAbbāsid and Fāṭimid Syria. With the fall of the Umayyads, Syria lost its privileged position, and ceased to form the centre of a vast empire. It found itself reduced to the rank of a simple province, and jealously watched on account of its attachment to the old régime. The capital of the caliphate was moved across the Euphrates. Straining under a power, the hostility of which they never ceased to feel, the Syrians found themselves systematically excluded from all share in government affairs, as they continued to be under the Fāṭimids and succeeding rulers. The caliphs of Baghdad only intervened in Syria to make it feel its position of inferiority by inflicting increased taxation on it. Driven to extremes by the exactations of the caliph’s agents, the Christians of Lebanon attempted without success to gain their freedom in 759-60. On the occasion of the Pilgrimage or of the war against the Byzantines, the caliphs al-ʿAnsūr, al-Mahdī, Hārūn al-Raḍīd and al-Manṣūr passed through Syria. In the midst of the troubles that preceded the accession of al-Manṣūr (813-833), the position of the Christians became intolerable and many of them migrated to Cyprus.

In the later 2nd/8th century and the early 3rd/9th one, Syria became the centre of power of the family of ʿĀli b. ʿAli [q.v.], uncle of the caliphs al-Saffah and al-Manṣūr, who took over the Umayyad estates there and married the widow of Marwan II. He and his descendants were prominent in the frontier warfare with Byzantium in northern Syria, the region of the ṣawād and ḫaghṭūr [q.v., and sāʿdīa 1]. ʿĀli’s son ʿAbd al-Malik later brought the support of Syrian troops to the side of al-ʾAmīn in the civil warfare with the latter’s brother al-Manṣūr.

The misfortunes of their country, the loss of their autonomy, could not induce ʿĀliyā and Yamanī to forget their regrettable differences, which ended by weakening the Syrians and dooming to failure their efforts to shake off the ʿAbbāsid yoke. A descendant of Muʿawiyah, ʿĀli b. ʿAbd Allāh al-Sufyānī, raised the “white standard” which had become the symbol of Syrian independence. But to get the support of the
Kalbīs, he alienated the Kaysis (193-7/809-13). Another rising was no more successful. An Arab of obscure antecedents, named Abū Ḥarb of Yamānī origin, called al-Muhārīṣī, the "veiled one" [q.v.], proclaimed himself the Sufyānī (see above). The indifference of the Kaysis once again brought about his defeat in the reign of the caliph al-Mu'taṣīm (218-27/833-47). The caliph al-Mutawakkil (232-27/847-61) thought of shifting his capital and living in Damascus. A mutiny in his guard forced him to return to Mesopotamia. His reign was a period of severe trial for the Christians of Syria. From his reign dates, for the most part, the intolerant legislation, which became traditionally but implausibly attributed to 'Umar I: the wearing of a special dress, the prohibition of riding on horseback, etc. [see GIVĀR]. Numerous churches were turned into mosques. At this date, there were no longer any Christians of Arab stock in Syria. Under the Umayyads, the Tanūḥīs had resisted all advances of the government. The caliph al-Mahdī (138-69/775-83), however, forced them to consent.

In 258/970 an agitator claiming to be the Sufyānī was arrested. This was the last attempt at an Umayyad restoration; it failed before the apathy of the demoralized Syrians. A Turkish Mamlūk, Aḥmad b. Tūlūn [q.v.], already caliphal governor of Egypt, invaded Syria under pretext of defending it against the Byzantines, and ruled it as an autonomous province. The dynasty which he founded had only an ephemeral existence (254-92/968-905), as had that of the Ḥīdhādīs (323-38/935-67), who repeated the experience of the Tūlūnīds. In the interval, the fringes of Syria and Palestine as far as Damascus and Ramla had been devastated by the Carmathians [see KARMĀṬĪ], who left behind them the germ of Ismā'īlī doctrines. From the time of the Tūlūnīds, the country may politically speaking be considered lost to the 'Abbāsids. Their power was only felt there during a few brief periods of restoration.

In their turn, the Bedouin tribes wished to take their share in plundering an empire in decay. A Taghḥūbī clan, the Banū Hamdān [see ḤAMDĀNIDS], found themselves entrusted with the reconquest of Syria for the Ḥīdhādīs and checking the Byzantine advance. They installed themselves as masters of the north of the country, without, however, breaking with the 'Abbāsīd caliphate. The most famous of these Ḥamdānīūm amīrs was Sayf al-Dawla [q.v.], who in his court at Apamea, himself a convert, patronized the arts and letters (333-56/945-67). After the fall of the Ḥamdānīūm (394/1004), in spite of a brief 'Abbāsīd reaction at Damascus (364-6/975-7), Syria fell into and remained for over a century (366-491/977-1098) in the hands of an 'Ahd, or more accurately, Ismā'īlī, dynasty, that of the Fāṭimīds [q.v.].

Having conquered Egypt, the Fāṭimid armies invaded Syria (358/969), and conquered Palestine and then Damascus, without encountering any particular resistance. In the centre and north it is difficult to say what form the Egyptian conquest took. The direct authority of the Fāṭimīds was enforced so long as their troops occupied the region. After their departure, the local amīrs did as they pleased without openly breaking with the suzerain in Cairo. Fāṭimid rule was only kept up in Syria by continually dismissing the agents to whom it was forced to delegate its authority, thus perpetuating administrative instability. In Palestine it had to reckon with the Dīṣarrībīs [q.v.]. These amīrs of the tribe of Ṭayyīr arrogated to themselves over a century a regular hegemony over the nomad Syrians. In the reign of al-Ḥākim (386/411/996-1021 [q.v.]), the Banū ʿDīṣarrībīs amused themselves by appointing an anti-caliph, and then sending him back to Mecca, whence they had brought him. In Tyre a humble boatman succeeded for a time in declaring himself independent (387/997).

Taking advantage of the anarchy, the Emperor Nicephorus Phocas (963-9) had conquered Northern Syria. His successors, John Tzimisces (969-76) and Basil II (976-1025), easily conquered the valley of the Orontes and the Phoenician coast. Of all these conquests, all that the Byzantines were able to keep for over a century was the "duchy" of Antioch, which included northern Syria, except the amirate of Aleppo. We have already mentioned that the caliph 'Abd Allāh ibn Aḥmad, from whom is connected the origin of the Druze [see AL-DURAT]. This prince quarrelled with the Christians and ordered the Basilica of the Resurrection in Jerusalem to be destroyed. Syria gradually detached itself from Egypt. In the midst of the political disorders, the pernicious influence of the Bedouins increased. In 415-1024, the Banū Mirdās [q.v.] of the Kaysī tribe of Kilībī established themselves in Aleppo, and held it with interruptions until 472/1082.

By this time the Saʿdījūkīs [q.v.] had already gained a footing in Syria. The provinces of Syria fell into their power, Damascus in 467/1075. At Jerusalem a Sādījūkī amīr, Artūk b. Ekseb, founded a local dynasty (479-80/1086-7). In 477/1084, the Greeks lost Antioch (479-80/1086-7). In 477/1084, the Greeks lost Antioch, their last possession in Syria. Syria was now divided into two Sādījūkī principalities, that of Aleppo and that of Damascus. Sādījūkī amīrs more or less independent commanded at Aleppo and Hims, all at war with one another [see SALDJUKIDS. III. 4]. At Tripoli, a humble kāfī founded the dynasty of the Banū ʿAmmār [q.v.]. To the south of this town, the towns on the coast remained in the hands of the Egyptians. Into the midst of this confusion, this piece-meal distribution of territory, came the armies of the Crusaders.

The persistent hostility shown by the 'Abbāsīds to the intellectuals of Syria, the political anarchy, the rule of Turkish adventurers, were all circumstances unfavourable to the progress of literature and learning, but a few poets gathered at the court of the Ḥamdānīūm and Mirdāsīūm of Aleppo. The patronage of Sayf al-Dawla encouraged the preparation of the celebrated Kitab al-Aghlānī and supported the poet al-Mutanabbi [q.v.]. Less tolerant than the Umayyads, the authorities began to encourage conversion to Islam. The Christians were slowly began to take the place of Aramaic as the spoken and written language of the original inhabitants, who began to speak and write in it. The end of this period coincides with the spread of the madrasas [q.v.], which appeared under the stimulus of the Sādījūkīs, especially in Aleppo and Damascus. The lack of respect into which the 'Abbāsīd caliphate had fallen adversely affected orthodox Islam; this backlash favoured the growth in Syria of sects practising imitation and following the Shiīta: the Druze, Ismā'īlīs, Naṣayriyyīn and ʿImāmīs.

The exactions of the 'Abbāsīd and Fāṭimīd agents diminished without, however, destroying the great vitality of the country. In 311/923, a governor of Damascus was sentenced to pay 300,000 dinārs to the treasury.

The northern fringes of Syria naturally suffered from the effects of the Byzantine-Arab frontier warfare there, and there were additionally the ravages of the Bedouins in northern and central parts of the land, which secured an increased ascendency in the countryside over the desert and over the population. The failure of the Fāṭimīds to establish lasting authority there. The ascendancy of the Kilībī in
Aleppo and northern Syria has been mentioned. The exactions and confiscations of the Hamdanids in northern Syria and the Ḍajzara are denounced by the traveler Ibn Hawqal, in particular, those of Nūr al-Dawla al-Ḥasan (317-58/929-69) as causes of agricultural decline. There were, however, compensatory economic trends. Al-Muḥammadī testifies to the vitality of the Syrian cities and their artisanal activities. Sugar cane cultivation was introduced into Syria in the 3rd-4th/9th-10th centuries, and became extensive along the Mediterranean coast and in the Jordan valley, with factories or refineries (matāliḥ) springing up there [see Sunnā]. Syria also became a major manufacturing centre of the Middle East for paper, and Nūr-ʾī Khuwarwī [q.v.] described the paper of Ṭripoli as even better than that of Ṣamarkand, the original centre of the industry in the Islamic world [see Kāqājād]. See in general, Muḥsin D. Yusuuf, Economic survey of Syria during the tenth and eleventh centuries, Berlin 1985. A demographic factor in the history of Syria in mediaeval times was the incidence of plague outbreaks there, and wahdāʾ azin is mentioned at such times as 469/1076-7, 537/1142-3, 558/1163 and 566-7/1258-9, culminating in the notorious Black Death of the 8th/14th century. See M.W. Dols, The Black Death in the Middle East, Princeton 1985. A demographic factor in the history of Syria in mediaeval times was the incidence of plague outbreaks there, and wahdāʾ azin is mentioned at such times as 469/1076-7, 537/1142-3, 558/1163 and 566-7/1258-9, culminating in the notorious Black Death of the 8th/14th century. See M.W. Dols, The Black Death in the Middle East, Princeton 1977, 32-5, 143 ff.

Syria under the Franks. On 21 October 1097, the army of the Crusaders appeared before the walls of Ṭabūl. After a very laborious siege, they entered it on 3 January 1098. Then following the valley of the Orontes through the mountains of the Nūṣayrūs and along the coast, the Franks, now reduced to 40,000 men, debouched before Jerusalem. The city, which the Fāṭimids had just retaken from the Artūkīs, was taken by assault on 15 July 1099, and Godfrey of Bouillon, king of Jerusalem from 1100 to 1104, formed the bold project of seizing the heritage of the Anti-Lebanon. The great cities of the interior, Aleppo, Ḥamā, Ḥims, Baʿlabakk and Damascus, which agreed to pay tribute, remained independent. The kingdom consisted of a confederation of four feudal states: 1. On the east, the county of Edessa lay along the two banks of the Euphrates. 2. In the north the principality of Antiṭioch included in its protectorate Armenian Cilicia. 3. In the centre the county of Ṭripoli stretched from the fort of Margat (al-Marjāb [q.v.]) to the Nahr al-Kalb. 4. Lastly came the royal domains, or kingdom of Jerusalem, strictly speaking. It included all cis-Jordan Palestine and, in Transjordan, the ancient districts of Moab and Edom, which became the seigneurie of Crac (Karak [q.v.]) and of Montlélé [see giwbak] “in the land of Oultre-Jouarda”. For a time it had a dependency, the port of Ayla-ʿAkaba. To defend these possessions, the Crusaders built strong castles: the Crac des Chevaliers (Ḥṣān al-ʿAkrād [q.v.]), Caesarea, Beirut and Ṭripoli (1109-10). This brave leader, the most remarkable of the crusading sovereigns, died during an expedition against Egypt (1118). His successor, Baldwin II du Bourg, captured Tyre in 1124; he failed before Damascus, but the town had to promise to pay tribute.

It was towards 1130 that the Latin kingdom attained its greatest extent, stretching from Dīyarbakr to the borders of Egypt. In Syria its frontier never crossed the valley of the Upper Orontes nor the crest of Anti-Lebanon. The great cities of the interior, Aleppo, Ḥamā, Ḥims, Baʿlabakk and Damascus, which agreed to pay tribute, remained independent. The kingdom consisted of a confederation of four feudal states: 1. On the east, the county of Edessa lay along the two banks of the Euphrates. 2. In the north the principality of Antiṭioch included in its protectorate Armenian Cilicia. 3. In the centre the county of Ṭripoli stretched from the fort of Margat (al-Marjāb [q.v.]) to the Nahr al-Kalb. 4. Lastly came the royal domains, or kingdom of Jerusalem, strictly speaking. It included all cis-Jordan Palestine and, in Transjordan, the ancient districts of Moab and Edom, which became the seigneurie of Crac (Karak [q.v.]) and of Montlélé [see giwbak] “in the land of Oultre-Jouarda”. For a time it had a dependency, the port of Ayla-ʿAkaba. To defend these possessions, the Crusaders built strong castles: the Crac des Chevaliers (Ḥṣān al-ʿAkrād [q.v.]), Caesarea, Beirut and Ṭripoli (1109-10). This brave leader, the most remarkable of the crusading sovereigns, died during an expedition against Egypt (1118). His successor, Baldwin II du Bourg, captured Tyre in 1124; he failed before Damascus, but the town had to promise to pay tribute.

During an expedition against Egypt (1118). His successor, Baldwin II du Bourg, captured Tyre in 1124; he failed before Damascus, but the town had to promise to pay tribute.

After the death of Baldwin II (1131), the decline of the Latin state began; it was hastened by the isolation of the Crusaders and their lack of unity. The Byzantines claimed the rights of a suzerain over the north of the kingdom. The Armenians sought to form a national state for themselves in the region of the Taurus. Instead of coming to an agreement, Franks, Byzantines and Armenians only succeeded in enfeebling one another to the advantage of the Muslims, who were gathered round remarkable leaders like Zangi, Nūr al-Dīn and Saḥāl al-Dīn [q.v.]. Baldwin III (1144-62) resumed the siege of Damascus (23-8 July 1148). The greatest of the Fatimids, the first to become independent in Egypt, and founded the Ayyūbid dynasty [q.v.] there, then seized Damascus from the sons of Nūr al-Dīn. On 4 July 1187, at Hāṭṭīn [q.v.], between Tiberias and Nazareth, the whole Christian army under Guy de Lusignan fell into the hands of Saḥāl al-Dīn. Jerusalem capitulated on 2 October following. Deprived of their defenders, the other cities, except Antiṭioch, Ṭripoli and Tyre, had to surrender.

The preaching of the Third Crusade brought to the camp before Acre, which the Crusaders had been besieging for two years, Philip Augustus of France and Richard Cœur-de-Lion of England. The town surrendered on 19 July 1191. A truce between the belligerents ceded the coast from Jaffa to Tyre to the Crusaders. In default of Jerusalem, which they had been unable to reconquer, Acre was henceforth the capital of the kingdom. The death of Saḥāl al-Dīn produced dissension among his numerous heirs. The Emperor Frederick II took advantage of the discord to negotiate with al-Malik al-Kāmil [q.v.], Ayyūbid sultan of Egypt, for the cession of Jerusalem and other places of no strategic importance. Threatened by the sons of Saḥāl al-Dīn, who had made an alliance with the Franks, their uncle al-Malik al-Kāmil called in the help of the Khārazmians, who crushed the combined Syrian and Frankish forces near Ghazza (1244) and enabled the Egyptians to occupy Jerusalem, Damascus and Hīmā. The Seventh Crusade brought St. Louis to Syria after the check to his expedition to Egypt. For four years (1250-4) he was engaged in fortifying the towns of the coast. It was the Mamlūk sultans, Baybars, Kālāwīn and al-Malik al-Ashraf, son of the latter, who dealt the last blow to the Latin kingdom. Acre fell (31 May 1291) after a heroic defence. In the course of the next months, Tyre, Ḥṣayfā, Ṣaydā, Beirut and Ṭartūs were taken or evacuated. Aṭṭālı[pt. q.v.], the imposing fortress between Ḥṣayfā and Caesarea, was the last to surrender (14 August 1291). The Frankish colonies in Syria were at an end.

The Crusades introduced into Syria the feudal organisation of contemporary Europe. The elective character of the kingship soon gave place to dynastic succession. The king only ruled directly the Palestinian kingdom of Jerusalem. His authority was limited by the privileges of the three orders: the clergy, nobility and bourgeoisie. "He cannot," notes Usama b. Munkārī, "be the king of a kingdom without the Court of Seigneurs." The authority of the great feudatories within their principalities was circumscribed in the same way. Agricultural servility was retained, as had
been the custom in Syria. The name "poulains" (pul-lani) was given to the issue of marriages between Franks and natives; the etymology of this word is still obscure. The army was recruited not only from Franks but also from Armenians and Maronites. The Turcopoli (q.v.) were the Muslim auxiliaries. The position of Muslims and Jews recalled that of the Dimanis in Muslim lands, with this difference that they were not so heavily taxed. According to Ibn Djubayr, his co-religionists did not conceal their satisfaction with Frankish rule.

Every singularity had its own silver coin. There were also gold ducats, "beants sarracens", or "sarrasins" with Arabic inscriptions. Commerce, more or less dormant since the Arab conquest, again became active as a result of maritime relations with the west, which were never greater. The principal ports were Acre, Tyre and Tripoli. In the principalities of the north, the terminus for continental trade was La Liche (q.v.), now called Port St. Simeon. We have to go back to the time of the Phoenicians to find a period of so great economic activity.

The state of war hampered, but did not put a stop to intellectual activity among the Muslims of Syria. In Damascus, Ibn al-Kalanis! was busy with his history, and Ibn 'Asākir finished his monumental encyclopaedia, the Ta'rikh Dimanis, devoted to individuals who had a more or less remote connection with Syria. At the end of his troubled career, the amir of Shuyayr, Usāma b. Mūsāqīh, produced an autobiography which is very valuable for the study of the relations which existed between Franks and Muslims. Barhebræus, a Syrian and Mesopotamian, wrote Arabic and Syriac with equal elegance. It was in this last language that the Jacobite cleric wrote a voluminous Chronicle [see IBN AL−IMR]. Muslims, Christians and Jews studied medicine with success. Never, except in the Roman period, had there been so much building. The fortresses built by the Crusaders are wonderful specimens of Syrian and Mesopotamian, wrote Arabic and Syriac. The majority of the able-bodied inhabitants were carried off into slavery, especially artists, architects, workers in steel and glass. They were almost all taken to Samarkand. Fire was then set to the city, to the mosque of the Umayyads and other monuments. Mīrūd led back his army and left Syria a prey to epidemics and plagues of barbarous hordes. The plateaux of Anatolia, the power of the Ottomans was gathering. The capture of Constantinople (857/1453) had increased their ambition. Death alone prevented Mehmed II Fāṭih from invading Syria. His successors did not cease preparations. Kâthābī (872−901/1468−96) and Bāyezid II (q.v.) signed a treaty of peace, but it was only to be a truce.

The destruction of Baghdis by Hulegu and the fall of the Abāsids caliphate had shifted the centre of the Muslim world to the west of the Euphrates, and the cultural and religious pre-eminence within the Arab world of Cairo and, to a lesser extent, Damascus, was irrevocably established. Arabic literature entered into one of its most active and quantitatively significant phases during the Mamluk period, although this literary production still needs fuller evaluation (as does that of Turkish writers within the ethnically Kipčak Turkish Bahri Mamluk society). See MAMLUKS. Bibl., section (i) (b). It is, however, true that it tended to be an age of epitomisers, compilers, authors of handbooks and encyclopaedists, but many were interested in collecting knowledge and learning it by heart. Among the encyclopaedists a special place must be given to Jordania). See for details, M. Gaudefoy-Demobynnes, La Syrie à l'époque des Mamelouks d'après les auteurs arabes, Paris 1921, lxxxvi, 175, 434.

The past history of Damascus assured its nāṭib, or viceroy, not only authority over his Syrian colleagues, but a special prestige of his own. This high official had little difficulty in persuading himself that he had the same rights to the throne as his suzerain in Egypt. To guard against the ambition of the Syrian nāṭib, Cairo took care to change them continually (Ṣāliḥ b. Yāḥyā, Ta'rikh al Bahar). Never did instability of government and greed of rulers, uncertain of the morrow, attain such proportions. Lebanon continued to enjoy a kind of autonomy. The dissenting Muslims of the Lebanese highlands—Druze and Imāms—took advantage of the troubles of the Mamluks, occupied with the Franks and Mongols, to proclaim their independence. All the forces of Syria had to be mobilised, and a long and bitter war followed (692-704/1293-1305), which ended in the complete destruction of the rebels and the devastation of central Lebanon.

The Mongol Il Kāhan continued to avenge the military defeats which the Mamluks had inflicted upon them. The most energetic of these sovereigns, Qhazan (694-703/1295-1304), in 698/1299 secured the support of the Armenians and Georgians as well as of the Franks of Cyprus, and routed the Mamluks near Hīmṣ. The troops occupied Damascus, and advanced up to Ghazzā. The Egyptians having again invaded Syria, Qhazan recrossed the Euphrates to meet them, but he was defeated in 502/1303 at Mādjid al−Suffar (q.v.) near Damascus. Syria had nothing to gain by the coming of the Burgīs, who in 784/1382 replaced the Bahārī dynasty. They "preserved," Ibn Iyās tells us, "the old laws", that is to say the anchracular rule of their predecessors. Sultan Faradj (801−15/1599−1412 (q.v.) had to begin the reconquest of Syria no less than seven times. The year 1401/803-4 coincided with the invasion of Tīmūr (q.v.). After the capture of Aleppo, which they sacked, his hordes appeared before Damascus. The town having agreed to surrender, the Tīmūrid forces plundered it methodically. The majority of the able-bodied inhabitants were carried off into slavery, especially artists, architects, workers in steel and glass. They were almost all taken to Samarkand. Fire was then set to the city, to the mosque of the Umayyads and other monuments. Tīmūr led back his army and left Syria a prey to epidemics and plagues of barbarous hordes. The plateaux of Anatolia, the power of the Ottomans was gathering. The capture of Constantinople (857/1453) had increased their ambition. Death alone prevented Mehmed II Fāṭih from invading Syria. His successors did not cease preparations. Kāthābī (872−901/1468−96) and Bāyezid II (q.v.) signed a treaty of peace, but it was only to be a truce.

The destruction of Baghdis by Hulegu and the fall of the 'Abbasids caliphate had shifted the centre of the Muslim world to the west of the Euphrates, and the cultural and religious pre-eminence within the Arab world of Cairo and, to a lesser extent, Damascus, was irrevocably established. Arabic literature entered into one of its most active and quantitatively significant phases during the Mamluk period, although this literary production still needs fuller evaluation (as does that of Turkish writers within the ethnically Kipčak Turkish Bahri Mamluk society). See MAMLUKS. Bibl., section (i) (b). It is, however, true that it tended to be an age of epitomisers, compilers, authors of handbooks and encyclopaedists, but many were interested in collecting knowledge and learning it by heart. Among the encyclopaedists a special place must be given to...
the worthy Shihab al-Din Ibn Fadl Allah al-Umar, author of the Ma'dlik al-ahdär, a voluminous compilation of a historical, geographical and literary character for the use of officials of the Mamluk chancellery. We may next mention Abu 'l-Fida' [q.v.], historian and geographer, and the geographer Shams al-Din al-Dimashkī (d. 727/1327), markedly inferior to his predecessor al-Mu'addasī [q.v.]. The versatile al-Dhahabī [q.v.] was born in Mesopotamia but lived and died in Damascus (784/1348 or 753/1352). Ibn 'Arabghā (d. 854/1450) was the author of a history of Timūr. Al-Safadī (d. 764/1363 [q.v.]) compiled a great biographical dictionary, Sālīḥ b. Yahyā (d. 890/1484), the champion of the Mamluk Bahrī; let us, in this work on the Amūrī of the Gharb, the best contribution to the history of the Lebanon and a valuable supplement to the annals of the Frankish states. Ibn Taymiyya and his pupil Ibn Kayyīm al-Dajwizzī [q.v.] were amongst the most original figures of this period. Their writings covered the whole field of Islamic studies. They were eager polemists and controversialists, concerned with what they viewed as both internal and external threats to Islam; they were particularly important for transmitting the Ḥanbalī legal and political heritage into later times [see ʿANĀBILA], when it was subsequently picked up by the 12th/18th century Arabian reformer Muḥammad b. Ābd al-Wahhāb [see IBN ʿĀBD AL-WAHHĀB] and by various traditionalist-inclined elements in North Africa [see SALAFIYYA. 1.], Egypt and Syria [see SALAFIYYA. 2.], and Northern India, loosely but not always entirely accurately called Nusayrīyya [see SALAFIYYA. 2.].

The departure of the Crusaders marks the end of a period of astonishing economic prosperity. Syrian commerce fell back into stagnation. Little by little, however, necessity forced the resumption of relations with Europe. The decline of Acre, Tyre and Tripoli, ruined by the Mamlūks, and the fall (748/1347) of the Little Armenian kingdom of Cilicia [see CUS].

Syria under the Ottomans. With the opening of the 10th/16th century, the rule of the Mamlūks had begun to break up. Their exactions had exacerbated the popular. The Ottoman sultan, Selim I [q.v.], resolved to take advantage of the opportunity to invade Syria. Taking the initiative, the Mamlūk sultan, Kānsūsh al-Ghawrī [q.v.], mobilised his forces, and marched via Damascus and Aleppo towards Anatolia. The two armies met at Dābik, a day's journey north of Aleppo. The Turkish artillery and the Janissary infantry scattered disorder through the Egyptian ranks. Kānsūsh disappeared in the disaster of Dābik (25 Rabī' 2/24 August 1516 [see MA'RĀSH]). Aleppo, Damascus and the towns of Syria opened their gates to the conqueror who went on to Egypt and put an end to Mamlūk rule. The Turks retained at first the territorial divisions or nīābāt. The Mamlūk Ghazālī, nāʿīb of Damascus, had gone over to the Ottoman camp after Dābik. The renegade was in return given the administration of the country except the nīāba of Aleppo, which was reserved for a Turkish Pasha.

On the death of Selim I (926/1520), Ghazālī had himself proclaimed sultan under the name of al-Malik al-Aṣghāfī. He was defeated and killed at Kābūn at the gates of Damascus (927/1521). Before the end of the 10th/16th century, Syria had become divided into three great pāghālis: 1. Damascus, comprising ten sandqāqs or prefectures, the chief of which were Jerusalem, Ḥazāza, Nābulus, Ṣāyda and Beirut; 2. Tripoli, including the sandqāq of ʿHims, Ḥamā, Salāmiyya and Dājbah, i.e. Aleppo, including the former North Syria, except ʿAyūnsh, which was included in the pāghālī of Marāṣh. In the century following, the pāghālī of Ṣāyda was created to include Lebanon. In its main outlines, this administrative division lasted till the middle of the 18th century, when the central government of Ṣāyda was moved to Acre.

The Imperial Dīwān in Istanbul was only interested in Syria in so far as it enabled it to watch Egypt, and to levies upon its resources contributions to the expenses of the palace and for foreign wars. The taxes, which were put up to auction, went to the highest bidder, who became the multazim [see DULŪZH]. According to a Venetian Consular report, the pāghālīc was worth 80,000 to 100,000 ducats (probably the silver ducat, the Venetian grosso, whence kirgh pl. kirgh or piastre = 5 francs). The Pashas only administered directly the important towns and their immediate neighbourhood. The interior of the country was left to the old feudal lords, whose number and influence had increased since the Mamlūks: Bedouin amīr, Turkomans, Mutawawīlī, Druze and Nuṣayrīs. The Porte only asked them to pay the tribute, or mīrī, without worrying if it saw them fighting with its own representatives. Every year the Turkish Pasha, at the head of his artillery and Janissaries, set out to collect the taxes. The force lived on the country and laid it waste if the inhabitants resisted. It is not therefore remarkable that agriculture, the principal resource of Syria, declined, the population diminished, and the country districts emptied in favour of the Lebanon and mountainous districts, where the harassed people could find asylum.

The instability of their position increased the rapacity of the Turkish functionaries. Damascus saw 133 Pashas in 180 years. This period saw the rise of Faḥr al-Dīn Muḥammad [q.v.], the champion of Syrian independence (1583-1635), the Mutawawīlī amīr, the Banū Rāshīd and the Banū Bākī, the Banū Manṣūr b. Fūrâykh, Bedouin sheikhs, who carved out for themselves an appanage in Palestine and in the
region of Nabulus. These feudal lords were fairly well-organised in spite of their cupidity, and they were able to defend their gains from the arbitrary Turk. By the beginning of the 19th century, the traffic of the Middle East, the Portuguese occupation of India adversely affected Syria. The harbour of Beirut remained empty. Tripoli at first, then—thanks to the initiative of Fakhr al-Din—Sidon attracted European ships, which came for cargoes of silk and cotton. Aleppo, thanks to its location between Mesopotamia, the sea, and the Anatolian provinces whose market it was, and the situation there of a factory of the English Levant Company, remained the principal depot on the direct route to the Persian Gulf and was for three centuries the chief commercial centre of Northern Syria.

The decay of the Ottoman administrative system in Syria, with its concomitant rapid turnover of governors in Damascus, had the effect of increasing the power of the Janissary garrison troops of the Ottomans there, and subsequently, by the end of the 17th century, in Aleppo also. The Janissaries came in fact to be divided into two groups, the older-established ones being designated şehr-i milli (the Janissary 'local'), whilst the new contingents sent out from Istanbul were known by various local corruptions of the Turkish term Kâpi Nişanı "slaves of the Porte".

The governorship of Naşif Pasha (1708-14) was a turning point in the history of the Ottoman province of Damascus, in that his first was a series of longer tenures of office, giving the province a degree of stability which it had previously lacked. A powerful family, the 'Azms, then emerged in the 18th century, and extended its quasi-dynastic power from Damascus as far as Tripoli, Sidon and, at times, Aleppo. The rule in Damascus of As'ad al-'Azm (1743-57) was an unprecedentedly long governorship, later to be remembered by the people as one of justice and peace.

After the fall of As'ad in 1757, the power of the 'Azms had passed its peak, and the centre of political gravity in Syria shifted westwards to the coastlands, seen in the rise of Zahir al-Umar al-Zaydanî (Syrian pronunciation of the first name, Dâhir). Dâhir, a Bedouin, lord of the land of Safad, extended his authority over Galilee, and settled at Acre, which he fortified and raised from its ruins. He resisted the Porte (1750-75) with assistance lent by the Egyptian Mamûlûk 'Ali Bey and Muhammad Bey Abu 'l-Dhahab and a Russian squadron cruising in Syrian waters. Besieged in Acre, he was forced by the Egyptian to surrender on 27 May 1832, after a siege of seven months. On 8 July at Hems, Ibrahim routed the Turks.

The new rule proved in many ways enlightened and tolerant. It admitted Christians to the communal and police and the tribunals. The reclamation of waste lands was encouraged, and agriculture was promoted, even in the semi-independent regions of the Lebanon. Rebellions broke out among the Druze of the Lebanon and of the Hawrân, among the Nusayris and in the never properly-subjected hill region of Nabulus. Ibrahim exhausted himself in suppressing these risings. The Ottomans thought the moment had come for the reconquest of Syria. They were completely defeated (27 June 1839) at Nisib, north of Aleppo. European diplomacy then intervened at the instigation of Great Britain, which was disturbed by the ambitions of Muhammad 'Ali. British policy had at this time as its aims the maintenance of the Ottoman empire, the confinement of Muhammad 'Ali to Egypt and the extension of its influence in Syria. France had since the 16th century a historic role as protector of the Maronites and Uniate Churches of the Eastern Christians, hence Britain could only try to exert a parallel influence amongst the Druze, a policy which was never, however, very successful. A further element in the Levant was Imperial Russia which, by stretching the provisions of the Russo-Turkish Treaty of Küçük Kaynarca (1774) [q.v.], claimed as its suzerainty over all the Christians in the Ottoman empire in general, which in Syria meant aid to the Orthodox communities of
the Antioch and Jerusalem Patriarchates. The European powers banded together. An allied fleet shelled Beirut (September 1840). Acre surrendered in November, and Ibrahim Pasha agreed to evacuate Syria, successfully withdrawing his army of 60,000 men from Ghazza by January 1841. Ibrahim's collaborator Bashir II Shihab fell from power at this point, being deposed and sent into exile. A period of some twenty years' internal conflict opened in Lebanon, involving inter alios the great Maronite landowners and their increasingly restive peasantry, and a growing tension between the Druze and Maronites who had migrated from Kisrawân in central Lebanon to the Druze province of Libanon al-Sharqi. From 1856 to 1860 there took place the third şimpiyya, a Maronite peasant revolt against the landlords in Kisrawân.

From the reign of Mâhmmûd II [q.v.], the Porte had inaugurated a policy of administrative centralisation, and decreed the abolition of local autonomies and feudalities. After the departure of the Egyptians, it moved to Beirut, whose importance was steadily increasing, the administrative centres of the ancient pâshâliks of Acre and Sidon, in order to prepare for the annexation of Lebanon. With the same object, it declared the old line of princes of the Lebanon, the Shihab Amirs, deposed. The only result was to perpetuate anarchy there. The Christians who had fought against the Egyptians claimed to be treated on terms of equality with the Druze. In the southern Lebanon, several had acquired the confiscated lands of the Druze chiefs banished by Ibrahim Pasha. The latter, coming back from exile, demanded a return to the status quo and the restoration of their ancient privileges. In taking their side, Turkey paved the way for new conflicts and sanguinary fighting. The Syrian Muslims showed no less animosity to the Christians, whom Egyptian rule had partly enfranchised. They took no account of the intellectual and material progress made by the Christians, nor of the political equality promised by the rescripts of the sultans as part of the Tanẓimât [q.v.] reforms. The khâlîlah tashâliyân [q.v.] of Sultan 'Abd al-Mâjid [q.v.] communicated to the Congress of Paris (1856), and tacitly placed under the guarantee of the Powers, scandalised Muslim opinion, but inspired confidence among the Christians. At Damascus and in the large towns, they took advantage of the occasion to enrich themselves commercially. A secret agitation began to stir up the Druze and Muslims, and waited for the events of 1860 to burst forth.

The Druze of the Lebanon, combining with their co-religionists of the Wâdi 'A-Taym and of the Hawrân, spread fire and death through the villages of the Maronites, who were at that moment in turmoil in the aftermath of the peasant şâmiyya of the previous year (see above). The anti-Christian movement reached Damascus, which the Muslims pillaged and then set fire to the prosperous Christian quarter, after massacring its inhabitants. In this city, in the Lebanon, and in Beirut, the Turkish authorities intervened only to disarm the Christians, and their sympathies were clearly with the Muslim and Druze perpetrators of the massacres. Amongst the Muslims, the only effective protector of the Christians in Damascus was the exiled former leader of resistance to the French in Algeria, the Amîr 'Abd al-Kâdir b. Muḥîf al-Dîn al-Ḥasanî [q.v.]. Inevitably, there was a reaction from the European powers. France landed troops at Beirut in September 1860, and the Porte sent its Foreign Minister, Fu'âd Pasha to Damascus with draconian powers to suppress disorder. Soon afterwards, an international commission began work in Beirut and then Istanbul; the aim of British and Ottoman diplomacy was now to prevent a permanent extension of Napoleon III's influence in Syria and Lebanon. The outcome was an Organic Regulation/Règlement organique in 1861, which abolished the dual khâlimânat of Christians, ámbians of northern Lebanon and Druze in the south and established an administration for Lebanon under a Christian mutasarrîf directly responsible to the sultan. The system gave Lebanon peace for over half-a-century; for the subsequent history of the region, see LUBNÂN. In Syria, Fu'âd Pasha shot or hanged a considerable number of guilty soldiers and civilians, and a collective fine of £200,000 was levied on Damascus and another £160,000 on the provinces of the Lebanon. In 1861-2, France and Beirut united in two wilâyât: Aleppo and Damascus. In 1888 Beirut, the chief port, the centre of the commercial life of Syria, was made a separate wilâyet.

Syria now gradually began to enter the modern age. The ports of Beirut and Jaffa were improved; the main ports and cities were in the 1860s linked by telegraph with Istanbul and Europe; a postal system was introduced; carriages roads were constructed between Beirut and Damascus, and a railway was laid between Beirut and Damascus, and Jaffa and Jerusalem. The improvements in communications made possible increased centralisation of the Ottoman administration, with curbs on Bedouin brigandage and increased security. Such measures as these, plus the opening in 1869 of the Suez Canal, contributed to an increase of commercial confidence and activity, although trade was temporarily affected by the American Civil War and the Austro-Prussian and Franco-Prussian Wars. Eventually, too, railways appeared; with the exception of the north Syrian section of the Berlin-Baghdad railway and the Pilgrimage line from Damascus to Medina, financed by the Sultan 'Abd al-Ḥamîd II and internal Ottoman contributions [see şuţaz RAILWAY], these were largely constructed with French capital. Nevertheless, it was in the post-1860 period that emigration—mainly of Christians—above all from Lebanon, and from Syria, grew, a good proportion of it to the New World (for the Arabic literature of this diaspora, see MâHRÎJ). Lebanon and Syria also became the focuses of the Arabic literary revival known as the Nahhâ [q.v.]. Since the 17th century, the Christians of Syria had had presses for printing works in Arabic and, for the Eastern Churches, for printing religious and liturgical works in both Arabic and Syriac; a bilingual Psalter appeared in 1610 from the press at the monastery of St. Anthony at Kûzhâyâ in Lebanon, and a Melkite press started up at Aleppo in 1706 [see maṭrân'a, B. 2]. In the 19th century organised Protestant Christian missionary work came to Syria, with American Presbyterians working from Beirut and Anglicans from Jerusalem. The Americans organised their converts into the Syrian Evangelical Church, with an Arabic press at Beirut in 1843, and their activity culminated in the foundation in 1866 of the Syrian Protestant College, after 1923 the American University of Beirut. The Jesuits, for their part, set up the Imprimerie Catholique at Beirut in 1853 and founded the Université de St.-Joseph in 1875. Both Universities were to make distinguished contributions to the revival of Arabic studies and to the training of an Arab intellectual elite throughout the Near East. Towards the end of the century, when Roman Catholic and Protestant missionary efforts amongst the Christians of Syria seemed to be reducing the Orthodox representation there, Russians interested in the Near East and, especially, in Jerusalem, founded in 1882 the Imperial Orthodox Palestine Society, which functioned until the Russian Revolution of 1917.
work included the running of village and urban elementary schools in Christian areas and some colleges; the Mahjar writer Miktahil Nu‘ayma [q.v.] received his first education at the Russian school in his Lebanese home village of Biskinta, eventually going to study in Russia itself. See on this Russian religious and cultural interest in the Near East, D. Hopwood, The Russian presence in Syria and Palestine 1843-1914. Church and politics in the Near East, Oxford 1969.

Whereas the missions and schools in Syria and Lebanon aimed at making converts from the indigenous Eastern Christian Churches or at educating them, the Anglican Mission at Jerusalem aimed at converting the Jews of Palestine. The Jews of Syria did not, in fact, experience a national, cultural and educational revival as did the Greeks, Armenians and other indigenous Christian Churches of the Ottoman empire during the 19th century, and lost social and economic ground to these last. The emancipation of the Jews in Western and Central Europe did, however, lead to the appearance of protectors for the Oriental Jewish communities. Thus Sir Moses Montefiore visited Palestine several times, and intervened in 1840 to protect the Jews of Damascus after an accusation of ritual murder; and in 1860 the Alliance Israélite Universelle was formed with the aim of promoting Jewish education, primarily in the Islamic lands. Above all, in connection with the Jews, there begin in the last two decades of the century the rise of Zionism and Zionist immigration into Palestine; and even though there were still only about 85,000 Jews in Palestine by 1914, their presence was to make itself felt. See N.A. Stillman, The Jews of Arab lands in modern times, Philadelphia and New York 1991, 3 B, 80-91, 231-5.

With the conceding of the first Ottoman constitution in 1876 [see DUSTUR. ii], Syria acquired representation in the newly-established assembly in Istanbul. In this first Medjlis-i Umûmi it was represented by nine persons: three Muslim Arabs and one Armenian Christian from the province of Aleppo, two Muslim and two Christian Arabs from the province of Haurâs and (the former province of Damascus), and one Muslim Arab from Jerusalem, all of them from leading families of Syria. Medhat Paşa [q.v.] was governor of Syria for some twenty months in 1878-80, and it was at this time that the first faint glimmerings of incipient, proto-nationalist Syrian Arab discontent against Ottoman Turkish rule became discernible, with hopes of some sort of autonomy for the region. A number of anonymous, handwritten placards appeared in the main cities of Syria at the end of Medhat's governorship, asserting some basic Arab rights. Such sentiments can nevertheless only have been those of a tiny minority, but were significant for the beginnings of Arab nationalism there, slow though this was to develop [see KAWMYYA. i]. Not long afterwards, such views were temporarily submerged by Muslim Syrian enthusiasm for 'Abd al-Ḥamîd's promotion of Pan-Islamism [q.v.], a movement in which several Syrians were prominent, such as Shâkh Abî '1-Hudût from Aleppo, who promoted the sultan's claim to the universal caliphate, and the sultan's second secretary, Ahmad 'Izzat Paşa al-'Abbâ, who became involved in the project of the Hidjaz Railway. On the other hand, the Syrians 'Abd al-Râhîm al-Kawâkibî [q.v.], from Aleppo, and Muhammad Rashîd Rîdâ [q.v.], from Tripoli, voiced from the safety of Cairo opposition to 'Abd al-Ḥamîd's religio-political claims. The Hamîdîan censorship covered all literary output, including even the textbooks used in foreign mission schools, and caused a considerable emigration of writers to Egypt and elsewhere.

Agitation for the restoration of the 1876 constitution was of course primarily associated with the "Young Turks" and the Committee of Union and Progress [see ÙÞÞÅÐ Â ÊÌÒÄÇÊ ÔØÌØÎÝÍYÊ], but the Syrian Arabs hoped for equal rights in the empire with the Turks, some degree of administrative decentralisation which would give Syria a hand in its own affairs, and recognition of the Arabic language at the side of Turkish in education and administration. The Young Turk Revolution of 1908 brought about the deposition of 'Abd al-Ḥamîd. The reinstated constitution of 1876 and its parliament were greeted in Syria with enthusiasm as the dawn of a new era, and societies were formed there to promote the Arab course within the Ottoman empire, such as the Arab-Ottoman Brotherhood (al-Ilkâh). This illusion was of short duration. The Young Turks, whom the Syrians had trusted, were not long in resuming once more the process of turkicising begun by 'Abd al-Ḥamîd. With more method and continuity, they declared war against all who were Arab by race or language. They insisted everywhere in Parliament and in the government offices on the employment of Turks only, and removed the Syrians from high offices and important military commands. This provocative policy brought together for the first time Muslims and Christians in Syria. It awakened amongst all the desire to come to an understanding in regard to a common policy, and to take joint action. Their demands were limited to reforms of a decentralising nature. They asked that, in the allotment of public offices, regard should be had to the progress which had been made by Syria, the most civilised province of the Empire, and that in the imposition and spending of taxes regard should be paid to the needs of their country. They thought the time had come to grant it a certain administrative autonomy. It was the obstinacy of the Young Turks in rejecting these moderate demands which opened the door to separatist ideas, and finally convinced the Syrian nationalists (the Muslims amongst whom for long had had a lingering sympathy for the Ottoman sultan, especially after the disaster of the Ottoman-Mussulman cause of the loss of Tripolitania to the Italians in 1911 and the loss of almost all the Ottoman Balkan provinces after the Balkan Wars) that their aspirations were unlikely to be fulfilled within the Empire.

On 29 October 1914 Turkey entered the First World War on the side of the Central Powers. It began by suppressing the administrative autonomy of Lebanon, and imposing on it a Turkish governor, Djmâl Paşa took into his own hands the government of all Syria with discretionary powers. He at once proceeded to hang the principal patriots, whether Syrian Muslim or Christian. Hundreds of others went into exile. Soon afterwards, famine and disease decimated the population, principally of the Lebanon. Energetic but presumptuous, dreaming of the conquest of Egypt, Djmâl proceeded unsuccessfully to attack the Suez Canal (February 1915). He now gave more attention to Arab opposition in Syria, suppressing and deporting to Anatolia many notables and publicly hanging eleven Muslim leaders in Beirut, until diplomatic pressure from Turkey's ally Germany brought a relenting in what might well have proved a counter-productive policy. Perhaps as a sop to Arab opinion, Djmâl in 1915 founded the Salahiyya College in Jerusalem under the Pan-Islamic enthusiast Shâkh 'Abd al-'Azîz Shâwîsh. But a second Turkish attack in August 1916 on Egypt failed, and British forces advanced into Ottoman territory as far as Ghazza, but were temporarily checked there. The Ottoman
forces in Palestine were now placed under the command of the German general Von Falkenhayn, but British forces under Allenby broke through at Beersheba.

By November 1917 the British, French and Italian forces of the Allies had become masters of the southern portion of Palestine, and on 11 December, they entered Jerusalem, which the Turks had evacuated. The latter defended themselves for a further nine months on a line extending to the north of Jaffa as far as the Jordan. The decisive action took place on 19 September 1918, on the plain of Sarona near Tel Aviv, the forces of Allenby broke the Turkish front. It was a rout. At the end of the month the British forces, without meeting with any resistance, arrived in the neighbourhood of Damascus. The advance was delayed for a few days, in order to allow the Amir Faysal, the son of the Sharif Husayn of Mecca, time to hasten from the remote end of Transjordania and to make on 1 October his entry into Damascus at the head of a body of Bedouins. On 31 October, the Turks signed an armistice. A week later, the last of their soldiers had repassed the Taurus.

(b) From the end of the First World War to the end of the Mandate.

The Sharif Husayn's son Faysal [see FAYṢAL I] hoped that the French Government in Greater Syria based on Damascus, on the basis of the exchange of correspondence in October 1915 between Husayn and Sir Henry McMahon, the British High Commissioner in Egypt, which had defined how far the British were prepared to go in conceding Arab independence. But this had in effect been superseded by the Sykes-Picot Agreement of 16 May 1916, dividing Greater Syria into British and French spheres of influence, with an internationalised Palestine. The publication of the Agreement by the triumphant Bolsheviks in 1917 had not surprisingly caused the Sharif and other Arab leaders to doubt the sincerity of the British government's undertakings, and assurances had also to be given to Husayn concerning the significance of the Balfour Declaration of November 1917.

With the outbreak of the War, the whole of Greater Syria was occupied by Allied troops, with British troops throughout the area, a small French force on the Levant coast and the Arab army of the Sharif (now King of the Hijāj) Husayn in the interior. There were already grounds for conflict between the Arabs and the French government, since the latter regarded the whole of the northern half of Greater Syria as lying within its sphere of influence, as provided for in the Sykes-Picot Agreement, and did not consider itself bound by any British promises to its ally Husayn. It was also influenced by the attitude of the Lebanese Christians, who had no desire to become part of an Arab kingdom under a Muslim monarch from the ruling family in the Hijāj. Faysal's position in Damascus was affected by the Anglo-French Agreement of September 1919, which provided for the withdrawal of British troops from Greater Syria excluding Palestine. The action of a congress of Syrian notables meeting at Damascus in March 1920 in offering the crown of Syria and Palestine to Faysal was repudiated by Britain and France in favour of a mandate [q.v.] of Britain over southern Greater Syria (i.e. Palestine) and of France over the northern part (i.e. Syria and Lebanon). French forces under General Gouraud marched on Damascus, defeated the Arabs at Maysalûn [q.v.] in the Anti-Lebanon and entered Damascus on 25 July 1920. Faysal left for exile and, eventually, a new throne in 'Irāk. The San Remo Conference duly allotted the mandates of Syria and Lebanon to France, confirmed by the League of Nations in July 1922. In the early years of the French mandate, the frontiers of Syria were gradually delimited: those with 'Irāk, Palestine and Transjordania by two Anglo-French agreements, but the more contentious northern frontier with Turkey, with its mixed population of Arabs, Turks and Kurds, was not finally settled until 1930 and was to have a substantial modification in 1939 when the so-called Sanjak of Alexandretta [see ISKANDARŪN] was ceded to Turkey (see further, below).

Under the de facto control of the French High Commissioner Gouraud, Syria was officially proclaimed to be a "federation of Syrian states": the State of Aleppo, with its dependent Sanjak of Alexandretta; the State of Damascus; the "Territory of the 'Alawis", sc. Nusayris [see NUSAYRIYYA], centred on Latakia [see AL-LĀQHĪYYA]; and a Druze state in the Djabal al-Durūz with its centre at Suwayda (1921-2). But the system never came to life, and from 1 January 1925 there was established a unitary state of Syria, which was, however, to exclude the 'Alawī and Druze territories and Greater Lebanon. Meanwhile, a preliminary census was instituted as a basis for the voting groups of the first general elections (to be conducted by indirect voting) planned by the new High Commissioner General Weygand in 1923. Excluding Greater Lebanon, the census was executed in mid-1924 and produced the following picture. The nomads in the district of Aleppo and of Damascus were not included in it. The State of Aleppo,
including the independent Sanjak of Alexandretta had 604,000 inhabitants. The number was made up as follows: 502,000 Sunnîs, 30,000 'Alawîs, 52,000 Christians of diverse denominations, 7,000 Jews and 3,000 foreigners. The state of Damascus contained 595,000 inhabitants, of which 447,000 were Sunnîs, 8,000 Isma'îllîs, 5,000 'Alawîs, 4,000 Druze, 9,000 Mutawâwîs, 67,000 Christians of different denominations, 6,000 Jews and 49,000 foreigners. In the state of the 'Alawîs, there were 60,000 Sunnîs, 153,000 'Alawîs, 3,000 Isma'îllîs and 42,000 Christians of different denominations, in all 261,000 inhabitants. The state of the Djabal al-Durûz was remarkable for the homogeneity of its population. There were 45,000 Druze against 700 Sunnîs, and about 7,000 Greek, Catholic or Orthodox Christians.

It is not easy to draw up a balance-sheet of the achievements and failures of the French mandatory power. On the positive side, there was the establishment of law and order; improvements in communications and harbour facilities; order was achieved in the public finances, with the budget generally balanced and, after 1933, the burden of the share of the Ottoman Public Debt which had fallen upon the mandated territories was at last paid off so that no public debt remained; some tentative steps towards land reform were made through the introduction of a modern system of land registration and a land survey, although the pattern of actual land ownership changed little and there was a very clear continuity in the high level of political and economic power of the Syrian landowning elite from late Ottoman times to the post-Second World War years. A system of state schools was created from almost nothing; the University of Damascus expanded and the Arab Academy in Damascus acquired a solid reputation throughout the Arab world. An Antiquities Service did sterling work in preserving both the ancient and the Islamic sites and monuments of Syria. In agriculture, there were moves to improve crops and produce, with substantial increases in cotton production and the export of citrus fruits. Irrigation works were undertaken, such as the completion of the first phase in 1938 of the Lake of Homs barrage, although achievements here lagged behind those of Ibrâîm in the same period. The world depression of the 1930s sharply reduced Syria's potential as an exporter; there was a slowing-down of Lebanese and Syrian emigration as remittances home by existing emigrants decreased sharply.

On the debit side, in the early years of the Mandate at least, France ran Syria as a colonial possession, with commercial and financial policies which benefited the mandatory power. French companies, banks and individuals were favoured by the grant of industrial concessions and the provision of subsidies, and the League of Nations' mandatory system requirements of free trade and open competition for the provision of goods and services circumvented, annoying France's European and American trade competitors and frustrating the indigenous population which suffered from the lack of competition. Local Syrian industries were not given adequate protection by the High Commissioner, and French customs policy favoured the import of French goods and furthered the decline of local industry and handicrafts, causing, e.g. unemployment in the towns amongst handloom weavers and silk spinners.

The great failure of French rule—one which was probably inevitable, whatever the mandatory power could have done or not done—was to win the approval of the bulk of the Syrian and Lebanese people. The nationalists, backbone of the movement for independence, were naturally intransigent, resenting what they saw as the encouragement of separatism and what they believed to be French financial dominance through the Banque du Syria du Grand Liban. Thus it was widely believed that the French deliberately drained the country of gold which it had possessed in Ottoman times. In 1923-5 there were local risings in northern Syria (under İbrâîhm Hanânî and in the Djabal al-Durûz (under Sultan al-Atrash), the latter spreading to the Druze areas of southern Lebanon and the district of Damascus as far as Hîmîs. The mandatory power had to revise the constitutional arrangements for Syria, although martial law, censorship and the special tribunals were not abolished till 1928, when a general amnesty was issued. An indigenous Syrian government, more acceptable to public opinion, after 1928 under the moderate nationalist Shâykh Tâdı al-Dîn al-Hasanî, was installed, with elections for a constituent assembly. The drafting of a constitution began, one on Western lines and with provision (as in Lebanon also) for the representation of minorities and a unicameral legislative assembly. Because of disagreements between the more moderate majority in the assembly and the more extremist nationalist bloc, al-Kutla al-Wataniyya, under Hanânî, a constitution for the State of Syria was finally refused by the High Commissioner Henri Ponsot.

It was also hoped to institute a Franco-Syrian Treaty, on the lines of the Anglo-Iraqi Treaty which had terminated the British mandate over 'Irâk, but the negotiations for this were likewise bedevilled by party disputes in the assembly, until in November 1934 the High Commissioner Comte Damien Charles de Martel adjourned the Chamber of Deputies sine die, with provision for rule by decree. As may be inferred from the turbulent politics of the period, there was a proliferation of political parties in Syria in the 1930s; see for these, e.g. i, at III, 522-3. Not until 1936, when there came to power in France a left-wing coalition, the Popular Front, slightly more favourably disposed to French-Syrian and Franco-Lebanese aspirations than the outgoing government, were Franco-Syrian and Franco-Lebanese Treaties achieved, defining what were to be the relations between France and the local Arab powers after the end of the mandate and, in the meantime, handing over certain administrative functions from the High Commissioner to the Syrian government. The National Bloc achieved an overwhelming majority in the 1936 elections. Soon afterwards, the 'Alawî and Druze regions were annexed to the Syrian State. But difficulties grew as Turkish claims to the Sanjak of Alexandretta were increasingly pressed; separatist movements grew (in the Djabal al-Durûz, 1937-9; in the 'Alawî region, 1939; and amongst the Kurds of the Djaizra, sc. in northeastern Syria, in 1937). The accession to power in France in 1936 of a less sympathetic government, which now feared for the long-term safety of the minorities in Syria, above all, of the Christians there, led to the failure of the French Parliament to ratify the 1936 Treaty. Within Syria, confidence in the National Bloc had ebbed, and political instability and insecurity in the country at large made it difficult to find a government acceptable to a broad spectrum of Syrian interests. Hence in July 1939 the High Commissioner Gabriel Puaux suspended the constitution and appointed a council of directors to rule by decree under his own guidance; at the same time, the separate administrations of the Druze and 'Alawî areas, abolished in 1936, were restored, and a separate
administration created for the restive Djazira.

The outbreak of the Second World War on 3 September 1939 marks the beginning of the last period in which the French could hope to do more than hold their position in Syria. The fulfilment of any of their aims as the mandatory power had to be abandoned for a policy of survival as a weak outpost of a metropolitan power soon to be largely occupied by the German enemy. The surrender of France in June 1940 found the French Army of the Levant obeying the order from Vichy to cease hostilities. The adroit and circumspect Puaux was recalled from Syria because of his tepid attitude towards Vichy's orders; he was replaced by the respected but defeatist General Henri Dentz, whose tenure of the High Commissionship was to be uniformly unfortunate. Local Syrian nationalists could not but be affected by contemplation of the French débâcle; some of the more extreme elements, as in 'Irak, began openly to look for an Axis victory as German propagandists proclaimed in Syria ostensibly pan-Arab and anti-Zionist policies. Economic hardship, involving food shortages and black market, price rises and unemployment contributed to popular discontent, with a general strike in Damascus and Aleppo and similar disorders in Lebanon in February 1941.

A leader of the nationalist movement now emerged in the person of Shukr al-Kuwatli. Meanwhile, the attitude of General Dentz, on orders from Vichy, was made clear to the British High Command in Cairo; that France would not regard the appearance of German forces or aeroplanes in Syria, en route as reinforcements for Rashid 'Ali al-Gaylani's [q.v.] pro-Axis régime in Baghdad, as a hostile act, whereas any British intervention would be opposed by force. No message could have been clearer. Britain reluctantly—because its Middle Eastern military resources were already highly stretched in opposing the Axis forces in North Africa and the eastern Mediterranean—decided to intervene, once it was clear that the French administration in Syria would not promise, as similar administrations in other parts of France's colonial empire had in fact promised, to remain neutral and to maintain a defensive stance (which would have been in accordance with the terms of the Franco-German Armistice). The Free French movement under General Charles de Gaulle had to be accommodated in any military measures, and forces under General Legentilhomme took part in the invasion of Syria which began on 8 June 1941 and was strenuously opposed by General Dentz's troops. Offers of help from the Germans and Italians were distasteful to Dentz and were refused by the Vichy government. He surrendered on 14 July, most of his troops being repatriated to France.

General Georges Catroux, de Gaulle's Délégué-Général in Cairo, had promised in leaflets dropped by air into Syria on 8 June that the mandate would be terminated and that the population would become free and independent. In fact, it was going to be difficult to say when France's mandate ended; General Catroux did not transfer power to the Syrians till early 1944, and the obligations of the mandate could still be invoked by the French in the protracted negotiations leading to the final withdrawal of French troops in 1945-6 (see below). In these years, there were also to be tensions between the more adaptable Catroux and the intransigent de Gaulle, whose mind was closed to the new political and psychological realities of the post-War years; they were also to remain bitterly critical of what they regarded as British perfidy in encouraging Syrian national aspirations in an area regarded as a purely French responsibility. Britain was regarded by de Gaulle as hopelessly Arabophile, and the French authorities in Syria fought a long-drawn out, but ultimately unsuccessful, battle to concede the minimum towards independence and to retain for France as many rights and privileges there as possible.

Meanwhile, within Syria, there was intense political activity among the parties, in which the Communists (though at this point profoundly favourable to the nationalist cause and the war effort) were making their name heard in both Syria and Lebanon. The Druze and 'Alawi territories were in February 1942 transferred to Syrian authority, this time for good. Elections were held in the summer of 1943, entailing the decisive return of the National Bloc to power, and the Assembly elected Shukr al-Kuwatli as President of the Republic of Syria (17 August). From December 1943, the French authorities ceased to challenge any constitutional changes which the governments of Syria and Lebanon might make, and in January 1944 the Assembly members took the oath of allegiance to a constitution which ignored all mandatory ties. Even so, disputes between the two sides continued, especially over Catroux's refusal to cede control of the Syrian Legion, the Troupes spéciales, recruited largely from the minorities and from rural Sunni Muslims, and over the continued existence of French regular army garrisons. The despatch of Senegalese troops by de Gaulle to Beirut in May 1945 was regarded as an attempt to reinforce the French military presence, provoking a general strike, and demonstrations and armed clashes as far as Deir al-Zor, and entailing the French shelling and bombing of Damascus with hundreds of casualties. There followed a threat of British military intervention, since Britain was still at war with Japan and the Levant lay across supply lines to the East. Only in the summer did France begin at last to withdraw troops, a process not completed until April 1946. Inevitably, there was now no hope in the foreseeable future of any Franco-Syrian Treaty favourable to France. The Syrian government had announced its adherence to the League of Arab States [see AL-ŠAM'A AL-ʿARABĪYYA, in Suppl.], formed in March 1945, and nominally declared war on Germany and Japan. But as events were to show in the post-War years, political stability was to elude the new, faction-ridden state.

(c) Independent Syria.

Syria in its contemporary borders, comprising the central parts of the historic Bilād al-Šām, was established under the French Mandate [see MANDATES]. It gained formal independence in 1943 and full sovereignty in 1946, when the last French soldiers left the country. According to its constitution, independent Syria was a parliamentary democracy. De facto, power was concentrated in the hands of the landlord and merchant monopoly, and, increasingly, of the military establishment. The upper class elite mistrusted both the first Arab-Israeli war, and it largely failed to solve the country's domestic political and social problems.
From 1949, the country experienced a series of military takeovers and attempted coups. In the mid-1950s, Syria became the focus of a regional conflict concerning the establishment of a Western-oriented military alliance, the Baghdad Pact. Syria's neutralist stance made it subject to strong Western pressures. While failing to push Syria into the Pact, these pressures destabilised the country and contributed to its hasty and ill-prepared unification with Egypt in 1958. When the leadership of the so-established United Arab Republic (UAR) embarked on an outspokenly socialist course in 1961, launching a wave of nationalisations that included some of the largest Syrian establishments, a group of conservative Syrian officers assumed power in Damascus and terminated this first unification experiment in contemporary Arab history. Syria re-emerged as a sovereign state, with the political elite of the 1950s back in power for another year and a half.

On 8 March 1963, the ancient régime was overthrown by a group of young military officers with strong Arab nationalist and in a larger part, socialist convictions. The faction connected to the Arab Socialist Ba'th Party (hizb al-ba'th al-'arabi al-ijtihādī) soon asserted its power, and the Ba'th party became the ruling party in a quasi-single-party system. The "revolution" of 1963, as it was henceforward called, was followed by an unstable period of army-and-party rule. The régime ventured to put the country on what was understood to be an Arab socialist development path, thereby trying to liquidate the economic basis of the old ruling elite which they had already removed from political power. Land reform, initially introduced under the UAR, was considerably speeded up. In 1964 and 1965, after a series of violent clashes between the régime and conservative oppositional forces, a large number of industrial and commercial establishments was nationalised. The radical social policies of the régime and a no less radical rhetoric confronting both the West and the conservative Arab states left it regionally and internationally largely isolated; only relations with the Soviet Union and the other then socialist countries were expanded.

At the same time, the political leadership was internally divided into different factions, each having their own basis in the army and the party. Internal frictions broke up along both political and sectarian lines. In February 1966, a radical wing of the party, led by officers of mainly middle class, rural and minority, particularly 'Alawi origin, gained the upper hand by military force. Caught in internal struggles, the régime had to face the 1967 war unprepared; Israeli forces were able to occupy the Golan heights [see GĂłLAN] without major resistance. In November 1970, after further years of open conflict within the power élite about internal and foreign policy directions, General Ḥāfīz al-Asad (b. 1930), an 'Alawi Ba'thist who had been Commander of the Air Force since 1964 and Minister of Defence since 1966, assumed power in another coup. In 1971, he was elected President of the Republic in an uncontested popular referendum. By the time of writing, he has been re-elected three times, last in 1991 for another seven-year term of office.

Only after Asad's takeover or "corrective movement" (al-harakah al-taṣḥiḥiyah as it had since been called) did stable political structures emerge, enabling Syria to develop into a veritable regional power. Thus a parliament (majlis 'al-taṣawwuf) was established in 1971; and the Progressive National Front (PNF) (al-djawhār al-taṣawwufiyah al-takaddumiyah), an institutionalised coalition of the Ba'th party with a group of tolerated, smaller parties, was set up in 1972. In 1973 a new constitution was promulgated, largely tailored to suit the personal rule of President Asad, who also occupies the positions of Supreme Commander of the Armed Forces, President of the PNF, and Secretary-General of the ruling party. The parliament, elected once every four years, has to share its legislative functions with the President. Aside from the PNF parties, only individual candidates are allowed to stand for election; the Ba'th party is guaranteed an absolute majority. Any constitutional amendment needs the approval of the PNF. The political system is authoritarian; no major policy decision, particularly in the fields of foreign policy and security, can be taken without the President's personal involvement and consent.

Under Asad's rule, the socialist orientation of the first Ba'thist régimes, though maintained as a tenet in the rhetoric of the ruling party, has been gradually abandoned. The state was still supposed to lead economic development, but conditions for the private sector have been considerably improved from the early 1970s onwards. Rapid economic growth rather than social reform has become the main objective of development policies. Both the state economic sector and the bureaucracy, as well as the armed forces, have grown at unprecedented speed. The new régime has also re-arranged the foreign policy orientation of the country. Good relations with the socialist bloc were maintained, but the régime sought to improve its relations with the West and with the conservative Arab states and strengthened its ties with Egypt. In October 1973, Egypt and Syria launched a coordinated military attack against Israel. Though not resulting in a military victory, the October War (harb Ṭiğrīn)—proving Arab military capabilities and their ability to coordinate military action with economic pressure, namely the imposition of an oil embargo against Israel's international allies—has generally been viewed as a political victory of the Arab States. Syria was able to regain parts of the occupied Golan heights in the course of the US-sponsored troop disengagement negotiations following the war.

The combination of internal stability, national success, and economic growth made Asad enjoy a high degree of popularity and legitimacy for several years. Only from the second half of the 1970s did the régime have to face veritable domestic threats. General disenchanted with the régime's regional policies, in particular its open military involvement, from 1976, in the Lebanese civil war [see LUBNAN], the spread of corruption and nepotism, unrestrained behaviour of the security forces, the sectarian composition of the régime's core, and growing social inequalities, all contributed to an increase of tension. Oppositional forces were not able to organise themselves politically and were thus driven into violence. In the years 1979-82 Syria experienced a situation close to civil war. The anti-régime opposition was led by Islamist forces, particularly the Syrian branch of the Muslim Brotherhood (al-İkhwan al-Muslimūn [g.5.]), who tried and partly succeeded in giving the conflict a sectarian (Sunni majority against 'Alawi minority) character. The opposition was only crushed after a brutal crescendo in Ḥamāt, where in February 1982 government troops put down a rebellion by military force, destroying large parts of the city. In the summer of the same year, the Syrian army and air force suffered a heavy blow at the hands of Israeli forces in Lebanon. Though not driven out of Lebanon, the Syrian forces were unable to prevent Israel's laying siege on the Lebanese capital Beirut. In late 1983, President Asad suddenly suffered severe
health problems, and the country seemed to face an internal military struggle for his succession.

During the later part of the 1980s, the main threat to the regime and its legitimacy came from a deep economic crisis that revealed the flawed nature of the Middle Eastern collectivisation policy change began, giving form to a more market-oriented economy and reducing the relative weight of the state sector. A major liberalisation of the political system, as some domestic quarters had expected in the course of economic liberalisation, did not occur. Minor changes included the enhancement of the role of parliament and a relaxation of political repression.

By the mid-1990s (at the time of writing), the economic situation has improved, both as a result of the reform process and of increased oil production (by 1993, Syria's oil production ranged around 550,000 b/d). President Asad's regime no longer faces any domestic opposition worth mentioning. There has been some uneasiness, both domestically and internationally, concerning the eventual succession process and the prospects of a post-Asad Syria, but the regime itself is stable. Internationally, Syria has managed to cope with the loss of its main ally and arms supplier, the Soviet Union. It has considerably improved its relations with the USA both by participating in the US-led coalition against Iraq in 1991 and by joining the US-sponsored Middle East peace process. Syria has also asserted its regional position. Its hegemony over Lebanon has been internationally tacitly accepted, and Syria is generally perceived as the key Arab state to a peaceful settlement of the Arab-Israeli conflict.

By entering into bilateral negotiations with Israel in 1991, Syria clearly stated its preparedness to peace, its main condition for a peace treaty being the full withdrawal of Israel from the occupied Golan heights.

3. The Arabic dialects of Syria. The Bilād al-Shām does not constitute, from a linguistic point of view, a genuine unity. The history of the population of the region has been such that nomadic and sedentary dialects are adjacent there or are in contact there, as is demonstrated by reciprocal borrowings of lexical and grammatical elements. Thus in zones of close contact, sedentarisation, rural exodus and urbanisation have given rise at all times to a range of dialectal varieties, and it is not always easy to determine whether it is a case of "sedentarised" Bedouin dialects, or of "Bedounised" sedentary dialects. Contacts with the major neighbouring dialectal groups (Egyptian, Arabian, Mesopotamian) are, at least on the external fringes of the domain, no less tight. Today, tourism and above all, the spectacular diffusion of radio and television, promote contacts of a different type, the effect of which is tangible.

Finally, the region has experienced the presence of languages which, while they have not in general directly affected the majority of the population, have nevertheless, to decidedly differing degrees, exerted an influence, on vocabulary at least: Turkish, in particular in the Ottoman period; and European languages, in the era of the Crusades (for a long time also through the specific intermediary of the lingua franca, at least on the shores of the Mediterranean) and more recently (French and English) during and after the colonial or mandatory period. Among others, these elements explain the wide dialectal diversity of the region; but its history and the emergence of the linguistic crucibles constituted by nation-states, and the augmented role of certain major metropolises, also confer on many Shāmī dialects, sedimented ones in particular, common elements, an intercomprehensibility which in many cases mediates to excellent effect a specificity in general immediately perceptible to those who speak them, as it is to speakers of dialects belonging to other groups.

Since pre-Christian times, and then stimulated by the Muslim conquests, "Arab" populations, admittedly most often linguistically Aramaicised, had been installed in the Fertile Crescent. It was probably from the 7th century onward that this presence became more significant; soon, apparently rapid Arabisation was definitively to establish Arabic as a majority language. Aramaic was to survive, however, in small enclaves, and is still in use today in three villages of the Anti-Lebanon: Ma'llilā, Baklā' and Dābb Adīn (Western Neo-Aramaic). If the influence of this substratum has sometimes been exaggerated, it is nevertheless real (see e.g. W. Arnold and P. Behnstedt, Arabisch-Aramäische Sprachbeziehungen im Qalamün [Syrien], Wiesbaden 1993; and see, for present-day Neo-Aramaic in Syria, ma'tola).

The dominant position of Arabic should not obscure the existence of other languages, spoken by diverse communities, in some cases long-established in the region: Kurdish and Armenian in particular, Circassian and Turkish. For the populations concerned (in most cases, when they have preserved their own language, bilingual and even trilingual), the relation between this heteroglossia and the components, religious or ethnic, of their identity, is complex, and its configurations diverse and essentially variable. Finally, the presence of Israeli Hebrew has, over several decades, created an unprecedented situation for the Palestinians "of the interior", many of them being bilingual.

Conversely, Shāmī emigrés have transplanted their dialects, into North and South America in particular, where they have thriven to varying degrees [see al-maṭara]. A particular case is that, currently moribund, of Kormaṭā in Cyprus, the last representative of the dialects imported by Maronite communities of Lebanon, in several waves, the most significant dating back to the end of the 12th century. In Turkey, while the majority of the Arabic dialects still spoken belong to the kelṭa group of Anatolian dialects, some are to be associated with Syrian dialects (Adana, Antiöch, Alexandretta).

Documentation concerning the dialects of the Bilād al-Shām in their ancient form is largely defective; it is possible to gain an impression of them through their traces, direct or indirect, in texts in "Middle Arabic" (see the studies of J. Blau, in particular, A grammar of Christian Arabic, based mainly on South Palestinian texts from the first millennium, Louvain 1966), also by means of documents of various kinds: correspondence, archives, etc., written in the same type of linguistic register, phrase-books, Turkish-Arabic for example, accounts of European travellers, manuals written by missionaries, etc. The ancient texts which have survived most often comprise a poetry of dialectal or dialectalising expression, as such composed in a dialect-
tal koine and in a literary register involving conventions and archaisms. While it is thus difficult to compose a history dialect by dialect, it is nevertheless possible to identify the major trends of their overall evolution (see, for the sedentary dialects, I. Garbell, Remarks on the historical phonology of an East Mediterranean Arabic dialect, in Word, xiv/2-3 (1958), 303-37).

Possibly in part as a result of the attraction exerted by the Holy Land, the Şâm dialects are without doubt those for which documentation is most abundant. However, for the speech of some relatively important cities (Latakia, Homs, Tyre, Baalbek, 'Akka, Nablis, etc.) and for the majority of the dialects of rural (and of mountainous) areas, it is practically nonexistent. Among the works which have appeared since the composition of the article of H. Fleisch (see 'Arabya, iii, 2. The oriental dialects), the following should be noted: for Syria, M. Cowell, A reference grammar of Syrian Arabic based on the dialect of Damascus, Washington D.C. 1964; H. Grotfeld, Syrisch-arabisch. Grammatik, Wiesbaden 1965, A. Ambros, Damascus Arabic, Malmö, Calif. 1977; A. Sabouri, Laut- und Fernsnellen des Arabischen (Frankfurt a.M. 1980); B. Lewin, Arabische Texte im Dialekt von Hama, Beirut 1966; idem, Notes on Cababi. The Arabic dialect spoken by the Alawis of "Jebel Ansariyye", Göteborg 1969; for Lebanon, H. Fleisch, Études d'arabe dialectal, Beirut 1974; F. Abu-Haidar, A study of the spoken Arabic of Baskinta, Leiden 1979; M. Jiha, Der arabischen Dialekt von Bishmizzm, Beirut 1966; idem, Motes on Cabali. The Arabic dialect spoken by the Alawis of "Jebel Ansariyye", Göteborg 1976; see also below, Bibl.

The problems of classification of the dialects of the region are far from being resolved. For the speech of sedentary populations, the division proposed by G. Bergsträsser in his Sprachatlas von Syrien und Palästina, in QDPV, xxviii (1915), 169-222, amended and supplemented on a number of points by later works, remains largely valid: three parallel bands from north to south (North Syria; Lebanon, Anti-Lebanon; and Palestine, Transjordan, Hawrân), with zones of transition of course (such as that of Galilee between the south of Lebanon and the rest of Palestine). J. Cantineau (Remarques sur les parlers de sedentaires Syro-Liban-Palestiniens, in BSL, xl [1939], 80-8) also identifies three groups, but different, since he takes as the sole criterion the realisation of the correspondent of baktob, q., or k. He has also made the observation that, on the other hand, the dialects are distinguished thus:

<table>
<thead>
<tr>
<th>Type</th>
<th>1st pers. sing.</th>
<th>3rd pers. masc. sing.</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>baktob</td>
<td>byaktab</td>
</tr>
<tr>
<td>B</td>
<td>baktob</td>
<td>baktob</td>
</tr>
</tbody>
</table>

Type A is encountered essentially in the central zone, type B elsewhere, to the north (Aleppo) but most of all in Palestine and in Jordan, in urban speech (Jerusalem) but also rural and even Bedouin speech (Negev), if only to the extent that they have borrowed the "sedentary" pre-verbal particle kâ(s). This discriminant has validated to some extent the revived division of Bergsträsser, and the following groupings are generally accepted (Handbuch, 28 [see Bibl.]): northern Syria, Lebanon/central Syria, Palestine/Jordan.

Finally, J. Cantineau has also proposed a distinction between "differential" and "non-differential" dialects; in the first group, a sound in an unaccented open syllable is better preserved than the correspondents of i and u: byaktab ("they work") v. byaktaba ("they write") in the first case, but byaktabu like byaktaba in the second (thus in the majority of Lebanese dialects of the centre-north).

But no typological feature has, any more than those mentioned above, an absolute discriminant value (especially so since, for each one, dialects can almost always be found which present a mixed system). Thus the diphthongs ay and ay are preserved in numerous Lebanese dialects but also, to the north of the Lebanese border, in a swathe of Syrian territory extending almost as far as Aleppo, or furthermore in a region of Kalamîn (Anti-Lebanon); mixed systems are common: diphthongs preserved only in open syllables (for example, lam "colour" v. la temasu "his colour" in Tripoli, or 'ansayy "my eyes" v. 'amsu "eyes" in Zaymni, an 'Alawi mountain dialect). But no typological feature has, any more than those mentioned above, an absolute discriminant value (especially so since, for each one, dialects can almost always be found which present a mixed system). Thus the diphthongs ay and ay are preserved in numerous Lebanese dialects but also, to the north of the Lebanese border, in a swathe of Syrian territory extending almost as far as Aleppo, or furthermore in a region of Kalamîn (Anti-Lebanon); mixed systems are common: diphthongs preserved only in open syllables (for example, lam "colour" v. la temasu "his colour" in Tripoli, or 'ansayy "my eyes" v. 'amsu "eyes" in Zaymni, an 'Alawi mountain dialect).
coalescence can affect /a/ and /i/ (Kfar £Abida) and many mixed systems are attested. All of this has an effect on the radical vocalisation of verbs. For the many mixed systems are attested. All of this has an effect on the radical vocalisation of verbs. For the...<br/>

The examples, taken here primarily in the domain of phonology, could easily be multiplied and extended to morphology and to syntax. They would all show that a single discriminator—were it considered typically Şāmi—is always encountered at different points of the domain (see Fleisch). In morphological terms, this could lead to a recasting of the system of nominal derivation. In dialects where interlingual spirants have coalesced with the corresponding obstruents, these borrowings have determined the integration of a new phoneme (/z/) as well as the creation of doublets of another type (dahab “gold”, zahab “going, departure”; dahr “back”, zahir “apparent”; tsh “bull”, saura “revolution”, etc.).

It is nevertheless possible to give examples of regional features which can, to a certain extent, be considered as characteristic since they are present in a sufficiently large scale, even if some of them are found episodically in other dialectal groupings, or if their presence is not general in the region. It is also possible to regard as characteristic those features which are not encountered (in the current state of knowledge) in any other dialectal group. Pronouns. In the series of personal pronouns, to be noted are forms of the type homa(n) (3rd pl.), hon (2nd pl.) and hon (3rd pl.).

Alongside the reflexive is käf-: Genitive particle. Tabd (variable or invariable) seems to be peculiar to the region, but is not alone there (gt, gīt, etc.). Preverb. The preverb (dative, progressive, of concomitance) am(mal) has numerous variants (probably of different etymologies): an, man, ma..., (am yekhō “he is writing these days”, “he is in the process of writing”, etc.). Active participle. In certain dialects an embryonic form of conjugation is found in the three persons of the feminine singular (kumīlī “she holds it”) [Hawrān]; šewīlīna “you (fem.) have seen her” [Damascus]; ana màqūtūk “I (fem.) have combed your hair” [Dūn, Lebanon].

In the other hand, the form fa‘lān is quite often used, not only for verbs of quality, where it is generally the only one possible, and can in certain cases alternate, either freely or in terms of semantic value, with fa‘ (sam‘ān-ə “I have heard it”). Negation. Alongside the forms ma, ma... (shī, also), found, although less known elsewhere, are ‘a... shī and a... shī. Among conjunctions, worth mentioning is ta (‘shtab) and its variant tan (‘soon) and personal pronoun suffix “so that”, “in such a way that”, “that”. Auxiliaries and pseudo-auxiliaries. Typical is ba‘sid-: personal pronoun suffix “to wish” (waId in its Bedouin version), also used for the expression of a type of future. Ḩisīn “to be capable, in a position to” is an equivalent of kidr, as is fī-: personal pronoun suffix: ma fina nraḥ “we cannot go there”. Alongside lassa, known elsewhere, also found is bad-: personal pronoun suffix, “still, always” and other values (Lebanon). Adverbs. Ḥallūk (and numerous variants) “now” is very widespread (it is also found, at the edge of the region, at certain points east of the...
Vocabulary. The poetry of Bedouin tradition has its own genres, among the words relatively characteristic of the region, it is possible to distinguish those which derive from the Arabic lexical stock but have become specialised, have phonological or morphological peculiarities, or are even canonical creations: *samūn* "grocer", *miswaqad* "bottle", *dâfî* "sick", *fâsî* "small change (money)", *fâl* "to enter", *mâkîn* "solid", *îwâd* "foot, leg", *timm* "mouth", *dâdhip* "to leave", *fârdh* "to show", *masârî" money" (Sing. *marîjî*, name of a coinage formerly in use in Egypt), etc., from those which derive, more or less directly, from the Aramaic (Syriac) substratum, or from borrowings from Turkish (and from Persian): *fâshâ* "to push", *zâddâ* "to die of cold", * sûm* "sausage, soup", *shâwâb* "heat (of the weather)", *fâsî* (chick), *fâshâ* "to float", *lâdîr* "late (adj.)", *nâhîg* (and *nâsî*) "late", *fâshâ* "to box", *tâf* "taint", *bûzâ* "ice", *sârîhâb* "cloth", *sâhîb* "cook", *âkîl* "lock", etc. The evolution of vocabulary often faithfully reflects social and political changes, for example: *çekele* > *şamâr* > *naşîrat* "spectacle".

Writing dialects; dialectal literature. There is no doubt that dialects have always been written down, as is confirmed by the dialectising or dialectal literary works which are available for study (in Arabic script or in the Syriac script known as *karshîf* [gaz] which has long been in use in the Maronite community in particular) and the orthographical norms (still observed today) which have controlled their putting into writing, even though variations are noticed, according to which is the dominant influence: the classical norm and etymology or a closer adherence, deliberate or not, to dialectal linguistic realities.

In parallel with its measured and to some extent ornamental utilisation in the codified genres of dialectising poetry such as the *muwashshahât* (see, e.g., M. Rahîm, *Muqawwâlât fi Bilâd al-Shâm min nashrîhât il-karn il-gâmiyya o'zaghra, Beirut 1987*), the dialectal language is, today as yesterday, the means of expression of an entire literature, "popular" and learned, and, more broadly, of an entire culture, the importance of which is partially disguised by the scant legitimacy accorded to it. Its manifestations are diverse: poetry of various types (*zâdîf*, *mu'ând*, *maswâil*/*musâîlah* and its divisions: *al-sad*/*fûjin*, etc.), sometimes (*'âbâbâ* sung (S. Jargy, *La poésie populaire chantée au Proche-Orient arabe*, Paris-The Hague 1970). The poetry of Bedouin tradition has its own genres, and remains the repository and transmitter of the memory of its society (among recent works reference may be made, besides Palva, *Narratives and poems*, which has already been mentioned, to C. Bailey, *Bedouin poetry from Sinai and the Ngeg, mirror of a culture*, Oxford 1991). In sedentary circles, to take just one example, the Lebanese *zâdîf* has a long and rich history (M.L. Wualhaya, al-*Zâdîf*-i-riqâ'ûhu, *adabahu wa-l-dâmahu kadam* (*zâdîf*), Harîsa 1952; J. Abdel-Nour, *Etude sur la poésie dialectale au Liban*, Beirut 1957, 1966). Since the beginning of this century, freed from ancient forms and from certain traditional themes which are still practiced elsewhere—including on television—this poetry has taken on a new appearance. It is also a dialectal form of expression which is used for the composition and transmission of tales and proverbs, and today the majority of theatrical pieces and the dialogues of films and serials on radio and television. The art of the song, very much alive, carries beyond the Bilad al-Shâm the dialects of the region, some-times in the texts of its best poets. Palestinians are now carrying this on with militant songs. Until not long ago, dramas of the shadow-theatre with its heroes Kharköz (*Nussîn min bâyâî al-zil*, ed. S. Kâtyâ, Damascus 1977; M. Kayyal, *Ma'llâm bâbî ma'ârîf al-zil*, Beirut 1995; see also KAYAL, *AL-ZIL*), and until more recently still the story-tellers (*hakawâtîb*), transmitters of the marathon tales which are the *sîras* (g.v.) of legendary heroes (Sayb b. Dhib Yazan, *'Antar, Bânû Hîlîl, Baybars, etc.*), perpetuated, before a generally exclusively male audience, the tradition of a living patrimony. The language of these legendary tales, some of which were partially in verse, could be dialectal or mixed. All these works were put into writing, at least in the form of *aides-mémoires* for the professionals of popular literature, also probably for the gratification of a public which had a particular liking for this kind of material. Today, the cassette and the video-cassette are the perfectly appropriate supports for this literature which is primarily oral and thus presupposes the presence of an audience. Dialectal poetry is published, however, in newspapers and magazines especially in Lebanon, sometimes in specialised journals. Since the 1960s, however, the press has only exceptionally accepted satirical columns in dialectal language, which were hitherto published in reasonable quantities. Literary prose as such in dialectal language has made little impact, in spite of a few isolated attempts in former times (Kûshî *Fâyûnâ* by Shûrîh al-Khîrî, São Paolo 1902, repr. Beirut [1929, etc., and 1952, with transcription and French tr. by E. Lator; and *Rasîîl Šâmîne* by Hâmîn al-Khîrî al-Feghîlî, published in book-form by the *al-Dabbîr* review) or more recently (*Yûsuf al-Khîl and Mûris* *Awâdî*).

Finally, attention should be drawn to the isolated attempt on the part of the Lebanese poet (in classical and dialectal languages) Sa'dî *'Alî (b. Zahlîje, 1912) to devise a transcription (in Latin characters) of the dialect, in which he published, besides certain of his own *dauta*, translations of works of universal literature, including classical Arabic, and a newspaper (see H. Grotfeld, in *Orientalia Suecana*, xxii [1973], 37-51).

syntace of Palestinian Arabic, Jerusalem 1966. The
Dictionnaire arabe-frangais. Dialectes de Syrie, Ajou, Damas, Liban, Jerusalem of A. Barthelamy, Paris 1935-69, is
supplemented by the very useful Dictionnaire des
ports arabes de Syrie, Liban et Palestine compiled by C. Denizeau, Paris 1960. Bedouin type dialects are still awaiting their dictionaries. Dictionaries or catalogues of words and dialectal expressions are regularly published in the countries of the region, where there is often concern to show that this vocabulary is largely based on sound classical origins. Also published there are collections of proverbs, of all languages, at times in dialectal poetry, encyclopaedias of popular traditions often rich in information and in dialectal texts: the Manus'at Halab al-mukdrana of M. Kh. al-Asadi (Univ. of Aleppo 1981-8), the Manus'at al-fulklar al-
Fisaliyat of N. Sirhan ("Amman 1977-81), the Me'leama li 'l-taradh al-urdui of R. Ibn Za'id al-'Aziz ("Amman 1981-) are excellent examples. For dialectal
literature, besides the older works by G. Dalmun, Palestinscher Dativus, Leipzig 1901, and E. Littmann, Neuarabische Volkspoesie, Berlin 1902, reference may be made to J. Lecerf, Litterature dialec-
tale et renaissance arabe moderne, in BEO, i (1932) and
iii (1933), 47-175 (with a Répertoire alphabetique des poètes dialectaux de Syrie [= Syria and Lebanon]); M. A. 'Awawd, al-Anfiliya li-l-hambayyiqi 'l-
'ashr ... , Beirut 1982. A collection of qa'dal-fayyi of Ibn al-Khiday (9th/15th century) has been edited by B. al-
Djumayyi, Beirut 1982. (J. LENTON)

SHAM'A (a. pl. 'ahmad) "naeves, skin blem-
isht, mole".

This term seems originally to have denoted the coloured marks on a horse's body, above all, where they are disapproved of (T'A, viii, 362 ll. 12-13). It is applied to all marks of a colour different from the main body which they mark, and to all black marks on the body or on the ground (ibid., ii. 304). But from what we know at present in our texts, there is no difference between 'ahmad and 'al-tin (sing. 'ahd), the two terms are attested in Akkadian; cf. 'ahd, Besold, Babylonisch-Assyrisches Glossar, Heidelberg 1926, 120, and sarnat, Labat, Traité académie de diagnostics et pronostics médicaux, Leiden 1951, 200 l. 7). These two terms denote the natural marks on a man's skin, on the face and the rest of the body, and the accidental marks, abceses (bashir) or freckles caused by an illness and presaging death (see R. fi 'l-kalam 'ala 'l-
khiltan, ms. Bursa, Hüseyin Celbi 882, fols. 61a-62b; Kadidy, Bukrait fi 'l-bukrbit, ms. Köprülü 1601, fols. 243b-244a, used by Ps. Dzhiizb, Bâb al-
urâsa wa 'l-qazîd wa 'l-frâsa 'ala madjâh al-Furs, ed. K. Inostracev, Materials in Arabic sources for the history of culture in Sassanid Persia [in Russian], in ZOIRAO, xvii [1907], text 3-27, Russ.
tr. and study 28-120, see 116 ff., in a section called Min kalam Bukrait fi dalil'l al-khalîn wea 'l-'ahmad). Ibn al-Nâmil, Fihrist, 314, cites a K. al-
khiltan and K. al-
khiltan, written by a Byzantine (Rumî) author called M. al-
Nâmil (Mtns/37). The first title apparently corresponds in Greek to a work called Pépi xouv, which is said to have treated the subject of beauty spots, and the second one, to a work called Pépi xon, which is said to have dealt with natural marks on the skin. We know nothing of this last, but the first is the title of one of the two chapters surviving of a treatise attributed to Melampos called Pépi xouv and Pépi xon (see the ed. J.G.P. Franz, in Scriptores physiognomoniae veteres, Altenburg 1780, 301-9). If one considers the sequence very likely—Melampos is a corrupttion of Melampus, one of the two titles mentioned in the Fihrist must correspond to Pépi xouv and be

translatable as K. al-
khiltan (see x-eslâgj), the exact term for palomancy.

In the Arabic sources, the information on the int'an al-
khâd in 'al-
khâd, which can be found in Fâhr al-Din al-Râzi (see Y. Mourad, La physiognomie arabe et le Khûb al-frâsa de Fâhr al-Dîn al-Râzi, diss. Paris 1939, 10) and in Ps. Dzhiizb (op. cit., 7) is Greek in origin. Two texts, however, show that the Arabs knew this method of divination, which comes within the sphere of frâsa (q.v.). The first is part of the ensemble of miraculous signs announcing the Prophet Muhammad's coming (on these signs, see T. Fahd, La divination arabe, Paris 1939, 10. In the course of his first trip to Syria, at the age of 12, the monk Bahîr (q.v.) is said to have recognised in him the signs of prophethood (see Ibn Sa'd, i/1, 99-100, and also 101, where it is said that, at the time of his second trip, aged 15, another monk named Nestor (allegedly recognised in Muhammad the same signs). These signs were physical ones (al-
Tabârî, i, 1124) and concerned the eye, the face and above all, the "seal of prophethood" (khalîn al-muwasset), like the impression of a cupper's scarifying instrument (athar
khâlât) according to al-
Tabân, i, 1125). But according to Ibn Hishâm, Sira, 314), cites a
khâlât wa
khâlât wa
khâlât (q.v.) as interpreted it as presaging the fact that the head of his husband would fall on to that place. Mu'awiyâ divorced her; Habîb b. Maslama married her, then divorced her; finally, al-
Nu'mân b. Bashr (q.v.), the later governor of Hims for Marwan b. al-
Hakam, married her. When al-
Nu'mân was beheaded for having joined the anti-caliph Ibn al-
Zubayr, his head was set down in his wife's lap (Ahgânî, xiv, 124). In the course of references to the text: See Fahd, La divination arabe, from which the material for this article has essentially been taken. The art of drawing omens from skin marks (umsatu), black beauty spots or moles (talâ), red birthmarks (pêdâ), warts, pimples, marks from jaundice, freckles, scars and even hairs which grew, was well known to the Assyrians and Babylonians (see F.R. Kraus, Die physiognomie der Babylonier, MVAG 40/2, Leipzig 1935). For the Byzantines, see inter alia the Book of beauty spots attributed to Leo the Wise, in J. Nicolaides, Les livres de divination, Paris 1889, 87-8.

T. FAHID

SHAM'A (a.), candle.

As a literary topos, the candle is poetically described in many "elephrastic" epigrams in Arabic, especially from the latter 'Abbâsîd and post-'Abbâsîd periods; in pre- and early Arabic poetry the topos appears to be absent. Poems by al-
Ma'mûn, al-
Râfa'i and Kushâjîm (q.v.) are among the earliest (see J.C. Bürgel, Die elephrastischen Epigramme des Abi Talib al-
Ma'mûn, Göttingen 1965, 254; Alma Giese, Waf bei Kushâyîm, Berlin 1981, 156, 263-5). A few other examples are found in al-
Shâfiq's Shanb ma'amên al-
Harârî (repr. Beirut 1979, ii, 87-8); many later examples were collected by al-
Naîçâf b. Khuwaylî (q.v.) in the chapter on candles, lanterns, lamps etc. in his al-
Kuwat al-mamayt (Cairo 1938, 204-12 on the shâm'a only; some passages in prose are included). Often the epigrams take the form of a riddle (see P. Smorod, The weeping wax candle, in ZDMG, cxxviii [1968],
A recurrent topos is the comparison of the candle to a lover, or vice versa: both are pale, thin, burning, shedding tears, being consumed, patiently and silently suffering. The same convention holds that the candle is likened to a slender girl or a bride, which alludes to the role played by candles at weddings. Several poems on the candle were made by Abu l-Fadl al-Mikāli (see Mikāli), see al-Hūrī, Zahr al-tadhīr, repr. Beirut 1972, 747-8; he may have influenced his contemporary, the Persian poet Manūchīrī (q.v.), who elaborately used the candle topos as the introduction of a well-known panegyric poem (see J.W. Manuali, Dāmghānī: a critical study, Minneapolis 1972, 31-43; Muhammad Muhammad Yūnus, Adab al-šamā in baʿna Manūchīrī al-Dāmghānī wa-Abī l-Fadl al-Mikāli, in Fusūl, iii/3 [1983], 128-38).

Another topos involving the candle is that of the moth (Ar. fardīla, P. farandīna) seeking its light and immolating itself in its flame: here the lover is not the candle (which stands for the beloved) but the moth (Ar. parwdndć, P. parwīnd); as through a veil: mystical interpretation in which the candle, the Beloved, stands for God/Truth/Reality, is found in Arabic already in al-Hallāj (q.v.), see al-Husrf, in al-Nuwayrī, Cairo 1929-, i, 124-9, Nihdyat al-arab. Handschr., Cairo 1319, 183-6. <Abd Hashiml, (d. 743/1342, see Brockelmann, S II, 220, 237) wrote in one of the diwāns (sham candlestick), a metaphor for the same phrase, it does occur in many Persian poetic texts, such as theşīkh-nāma, the divān of Anwār Katrān (q.v.), the Mathnawi, ed. Nicholson, book 1, 829; ibid., 2407, and Divān-i Shams of Rūmī (see ŠAMS AL-DIN), etc.

The following example is taken from Abū Salīkh of Gūrgān:

In this time there is no idol more beautiful than you, and for you there is no idolator more tenderly loving than your slave.

Bibliography: Given in the article.

AL-SHAMARDAL. b. Sharīk al-Yarbusī, Arab poet of the middle Umayyad period, important for the history of hunting poetry (see ṭarmīna). His life can be dated only approximately, an elegy on 'Umar b. Yazīd al-Usayyīdī (killed 109/727-8) being the sole exact reference known so far (poem no. 2, ed. Seidensticker = no. 3, ed. al-Kaysī). His poems show that he was acquainted with several persons who played a minor political role, among them two prefects of police in Basra. As reported in the akhbār, he also had a personal encounter with the famous poet al-Farazdak (died no later than 112/730 in Basra [q.v.]). No dīwān of his poetry seems to have existed; 41 poems and fragments (about 430 lines) are preserved in various sources. The most important genres are īlādāt, marābīh and ṭarīqīyyāt. The īlādāt, five in number, vary in length from 21 to 66 lines. Besides several shorter marābīh, an elegy of 43 lines on his brother Wālī, which has survived which was held in high esteem by some transmitters of his poetry. The handling of thematic and formulaic conventions in his hunting poems is reminiscent of similar episodes in the ṭarīqīyya of pre-Islamic īlādāt (Imru` al-Kays, Zuhārī, al-Abī, but the ṭarīqīyya is a new feature, as is the fact that the poems devote themselves exclusively to the one topic of hunting. The missing link between the pre-Islamic hunting episodes and the ṭarīqīyya of al-Shamardal and others in later times must be sought in ṭarīqīyyas like those of Abu l-Nadīm al-Īljī (died before 125/743 [q.v.]) in which a conventional nābī is followed by a hunting episode (cf. E. Wagner, Grundzüge der klassischen arabischen Dichtung, ii, Darmstadt 1988, 46-55).

(S. Seidensticker)

SHAMĀDINĀN, a mountainous district (lit.) in the present province of Hakkārī in southeastern Turkey (previously in the Ottoman vilayet of Vân). The name of the district and the district centre (old name: Nāwshār) is presently Turkicised as Şemdinli. The district is bounded on the north and northwest by the district of Yûksekov of the same province (comprising the previous districts of Gwar and Ormār), on the south and east by the Trāk and Persian borders. Local tradition derives the name of Shamādīnān from that of a certain Shâykh Shams al-Dīn, the alleged ancestor of the Kurdish dynasty of the 'Abbâsī Begqâda, which exercised power in the district until the mid-19th century. Four major Kurdish tribes inhabit the district: the Kūmārū (Humarî) in the north, Zarzâ in the east, Herki in the west, and Gerî in the south. The last three tribes are settled in isolated pockets in Persian and Trāk Kurdistan. Until the First World War, there
was also a significant minority of Nestorian Christians living scattered among the Kurds here. In the late 19th century, Cuinet's sources estimated the population of Shamdınan at 13,270 Kurds, 2,000 Ottoman Turks, 3,000 Nestorian Christians and 200 Jews; another source, the 1897 sâhnâme for Vân, gives the figures of 14,547 Muslims and 2,034 non-Muslims. According to the 1990 census, the present population is just over 30,000.

In the course of the 19th century, the 'Abbâsî Begzâde family lost their paramount authority over the tribes to a family of religious leaders, who had settled in the village of Nehîr (present name: Başgar) near the district centre. This family, known as the Sâdatê Nehrî, claimed descent from 'Abd al-Kâdir al-Djîfâmî [g.e.] through the latter's son, 'Abd al-'Azîz, who lies buried in 'Aqra, northeast of Mawşûl. The family was affiliated with the Kâdirîyya târîka, until the sayyids 'Abd Allah and Ahmad took initiatives in the Nakhshbandîyya from Mawlânâ Qâhilî and became his dhâlfî (ca. 1820). Like other Kurdish Nakhshbandî sayyids, the Sâdatê Nehrî increasingly acquired worldly power as well, extending their influence well beyond Shamdınan to the Kurdish tribes further south and east. Sayyid Ahmad's grandson, Şaykh 'Ubâyî Allâh, in 1880 led a large tribal rebellion, temporarily occupying a vast stretch of Persian territory to the west of Lake Urmîa, and apparently intending to establish an independent Kurdish state. The Ottomans later arrested him and sent him into exile to Mecca. His son, Muhammed Şîdîkî, soon returned to Nehîr and took his father's place as the most influential man of central Kurdistan, successfully outwitting ambitious tribal chieftains as well as rival sayyids (see Dickson; Nikitine and Soane). Another son, Sayyid 'Abd al-Kâdir, settled in Istanbul after the Young Turk revolution and became the president of the first Kurdish association there as well as the president of the Şhitâ-yi Dewlet. In 1925, following Şaykh Šâdîfî's rebellion, the Kemalîst authorities hanged him and his son Muhammed. Muhammed Şîdîkî's son, Sayyid Tâhâ, was more actively involved in Kurdish nationalistic and anti-Turkish agitation, at one time cooperating with Simko in Persia and later joining the British in 'Irâk.

Relations between the local Muslims and Christians rapidly deteriorated during the First World War, especially following the djîhâd declaration. In 1916 Russian troops occupied Shamdınan, overcoming Kurdish resistance coordinated by Sayyid Tâhâ and his cousins 'Abd Allâh and Muhammed, sons of Sayyid 'Abd al-Kâdir. Local Nestorians, recruited and armed by the Russians as advance scouts, took part in the Russian offensive. After the October revolution and the withdrawal of Russian troops, the Nestorians were expelled and fled to Urmîya. Here the British enlisted their services against the final Ottoman eastward offensive and later brought them to northern Trak. Following the Armistice (1918), a contest between the British and the Kemalîsts for control of the region continued. Sayyid Tâhâ was invited to represent the region in the Kemalîsts' First National Assembly (1920) but declined, and two years later allied himself with the British authorities in 'Irâk, who made him governor of Rawândzê [g.e.]. The tribes of Shamdınan nevertheless remained opposed to the British infidels and dear to Kurdish nationalist appeasements. There was a brief rebellion in June 1925, in response to the execution of Mustafah Dîrî, his 'Abd Allâh, aided by warriors of the Gerîf tribe, besieged the British district centre of Nâwêshâr and killed six Turkish officers. Then he too fled to British-controlled terri-

tory. At the final settlement of the border between 'Irâk and Turkey in 1926, Shamdınan came to Turkey, and the neighbouring districts of Bârzûn and Brûdêst, with which it had always had close relations, to 'Irâk.

SHAMI, NIZAM AL-DIN [or Nizîm-i Şamî], Persian litterateur and chronicler of the late 8th/14th-early 9th/15th centuries.

His nisba (Şamî < Şamî) suggests that he was born in Şamî-bâzâr, a suburb of Tûrûz. When his father, Şahîn, died in 803/1400, Şamî was detained by the authorities in Aleppo, who suspected him of spying on Tûrûz's behalf, and was thus an eye-witness of the siege (Zafar-nâmâ, i, 139). On his way to the Hijâz he did not long before the conqueror's attack on Aleppo on 803/1400, Şamî was detained by the authorities in Aleppo, who suspected him of spying on Tûrûz's behalf, and was thus an eye-witness of the siege (ibid., i, 227, ii, 160). Brought before Tûrûz a second time following the city's capture, he appears to have remained in his entourage. In 804/1401-2 Tûrûz ordered him to compose a history of his conquests in a clear, unadorned style which would render it intelligible to all readers and not merely to a select few (ibid., i, 10-11). The work was presented to Tûrûz around Şawwâl 806/April 1404. The title Zafar-nâmâ is not found in the original recension (Istanbul ms. Nuro Osmaniani 3267) utilised later in the compilations of Hîfiz-î Âbrî [g.e.], but only in a second version dedicated to Tûrûz's grandson 'Umar Bahâdûr (British Library ms. Add. 23980). Şamî, who after Tûrûz's death in 807/1405 had probably entered 'Umar's service, was dead, according to Hîfiz-î Âbrû, by 814/1411-12 (Dhayl, 430). He enjoyed a high reputation among contemporaries for his literary skills: Şarafl al-Dîn 'Ali Yâzîî, in his own Zafar-nâmâ (ii, 571), calls him one of the most accomplished writers of his age.

SHÂMÎL [1212-87/1796-1871], leader of the Muslim resistance to the Russian conquest of the Caucasus from 1250/ 1834 to 1276/1859.

Şâmîl's biography and his ghażawât

Born in the village (awul) of Gimrâh (Gimrî) to a family of an Âvâr freedman, Şâmîl was named 'Âli at birth. A sickly child, who was often ill, his original name, according to a local belief, was changed to Şâmîl (meaning "repell" sickness. This was the name Şâmîl used in letters and official documents. Contemporary sources, however, styled him Şâmîl,
or Shamil—the name under which he became known in Russia and the West. Already in his youth he overcame his ailments and grew into an exceptionally strong, tall (over six feet) and athletically young man and famed for his fencing skills, bravery, and horsemanship. In addition, he had an acute interest in, and talent for, religious learning. By the age of 20 he had successfully completed an elementary course of Arabic grammar and rhetoric under the guidance of renowned Daghistānī 'ulamāʾ. He then proceeded to study Kurʾānic interpretation, hadīth, fiqh, and kalām with his friend and distant relative Ghazar Muhammad (Kazi Mofazma), the latter author of the Sufi teachings of the Nakshbandiya-Khālidiyā tariqa, which were propagated in Daghistān by Muhammad al-Yarāghī and Sayyid Djamāl al-Dīn al-Ghāzī Qumūmī. Unlike the otherwordly-oriented and quietist Djamāl al-Dīn, Ghāzī Muhammad and his younger friend were anxious to enforce ghārī norms actively among the mountaineers committed to their tribal customs (ṭādāt). Presenting themselves as religious reformers, they attacked such widespread vices as drunkenness, the use of tobacco, "indecent" intermingling of the sexes, merry pastimes with music and dancing, etc. With the Russian forces inexorably closing in on Daghistān, Ghazar Muhammad, against the express wish of his shaykh Djamal al-Dīn, added to this programme the call for jihad [qv.] against the infidel Russians. When in late 1829 several Avar communities proclaimed him the first imām of Daghistān, Shāmil became his trusted lieutenant. In 1832, after three years of fierce fighting, Ghazar Muhammad and his closest followers, known as muridun (Russ. myarid), were surrounded and slaughtered in their stronghold at Girmār—an episode in which Shāmil was one of only two survivors. Under the second imām, Hamza(t)ī Bek, Shāmil continued to wage a pitiless struggle against the local nobility and their Russian backers. Following Hamza’s assassination in 1834 by the vengeful Avar notables, Shāmil was unanimously recognised as the third imām of Daghistān by Avar ‘ulamāʾ and dignitaries at ‘Ashīlta. In 1834-6, despite the stiff resistance of the local ruling families and the continuing Russian intervention, he managed to establish firm control over most areas of Daghistān. His inordinate military talents were recognised by the Russian command- ers, who failed to subdue the territories under his sway and on several occasions had to sue for peace. As a result, his reputation as the successful leader of ghārī spread far and wide, making him “enemy number one” of the Russian military administration of the Caucasus. Apprehensive of Shāmil’s growing influence on the warlike tribes of nearby Čečenya, the Russians launched a massive military expedition against his headquarters at Akhulgo. After a series of bloody engagements en route, the Russian expedition finally besieged Shāmil and his men in their mountain fortress. When he refused to surrender after several weeks of fierce fighting, the irate Russians ruthlessly cut his garrison to pieces. Miraculously, Shāmil again made an almost incredible escape down the lofty cliffs under the enemy’s very nose. Of the two wives with him during the siege, one was killed alongside his best men. Contrary to the Russians’ expectations, the imām’s spirit was far from broken. Moreover, he found new powerful allies among the Čečens who were disgusted at the continued Russian encroachment on their independence. In a matter of months, Shāmil recovered and even expanded his power, having successfully repelled the invaders and repulsed several shattering blows to the Russian forces in Čečenya and Avārūstān in 1840-2. Exasperated by these reversals, Tsar Nicholas I ordered an all-out campaign to crush Shāmil’s resistance in 1844. Organised and led by Prince Vorontsov, a 10,000-strong expedition against Shāmil’s stronghold at Darghīya was an almost total disaster. The imām had learned well the lessons of Akhulgo and changed his strategy accordingly. With his prestige at its peak, Shāmil endeavoured to extend his rule to Ghabarta (Kabarda) and to unify all the mountain tribes of the Caucasus against the Russians. His ambitious plans, however, were frustrated by the brilliant strategy of General Freytag, the ineptitude of his lieutenant Nūr ‘Affī, and the result was the decimation of the Russian forces and loss of life in the army. More importantly, this campaign demonstrated the vast disparity between Shāmil’s resources and those of the Russian Empire—a disparity that would eventually lead to his undoing. About the same time, the Russians realised the futility of the “one-blow” strategy they had previously pursued, and resorted to a more methodical, if less offensive strategy, known as the system of the axe.” It consisted in steadily encircling Shāmil with a network of defensive lines and military posts aimed at cutting him off from Čečenya, his major source of food supplies and manpower. From 1846 to 1849, the Russians erected fortifications in, and cut roads through, the impenetrable forests of Greater Čečenya. Simultaneously, they “pacified” the population of the fertile Čečen plains, chasing those who refused to submit into the barren mountains. In the meantime, another Russian expedi- tory force attempted to eradicate Shāmil’s strong- holds in central Daghistān, a goal for which they paid an enormous price in money, ammunition, and human lives. Their successes, however, proved short-lived. Once the Russian troops had withdrawn, the imām quickly rebuilt his fortifications and invaded southern Daghistān, whose free communities had asked for his assistance against the oppressive Russian rule. In a dramatic reversal of roles, Shāmil invested several Russian fortresses, and was poised to achieve complete success if it had not been for the heroic stand of the small Russian garrison of Akhtī (Akhhti), which allowed the Russians to regroup and to repel Shāmil’s levies. On the Čečen front, Shāmil established a line of defence and deployed against the Russian troops his cherished regular infantry units built on the model of the Ottoman niẓām-i qalīd (qv.). The latter were soundly defeated on 11 March 1851 by Colonel Baryatinskiy, forcing Shāmil to revert to guerilla tactics and thereby to relinquish any hope of defeating the Russian army in a pitched battle. Turning his attention to Daghistān, Shāmil sent his best military commander and lifelong rival Hādjdjī Murād to Russian-controlled Kaytak and Tabasarān in an attempt to rouse their “pacified” populations. This campaign yielded little result, but instead further aggra- vated the long-standing distrust between the imām and his chief lieutenant. Sentenced to death on Shāmil’s instance, Hādjdjī Murād defected to the Russians but was soon killed in an attempt to escape back to the mountains, relieving the imām of the onerous necessity to execute one of his commanders. In 1851-3, the hostilities, in which Shāmil took part personally, were centred on Čečenya with results gen- erally favourable for the Russians. Throughout 1853, faced with the prospect of war with the Ottomans, the Russians were unable to capitalise on their earlier successes and diverted their attention and main forces to the Ottoman front, giving Shāmil a much-needed respite. The latter took advantage of this to fortify head- quarters at Vedān (Vedeno). Rumours about an impending Russo-Turkish conflict infused the imām.
and his followers with determination to continue their struggle under the leadership of, and with help from, the Ottoman sultan. Shamil sent him several messages urging him to join the Ottoman troops at Tiflis. Although somewhat offended by the tone of the sultan’s replies, who treated the imām as his vassal, Shāmil remained committed to the person whom he considered the supreme ruler of all Muslims. Before and during the war, he kept the Russians on their toes by raiding the territories under their control. On 15 July 1854, the imām’s forces led by his son Ghażār Muḥammad, swept in on the “Nagaz valley” and Tarnavachi, carrying off a rich booty and many prisoners, among whom were the grand-daughters of the last Kart’lo-Kakhet’i Tsar, George XII, the princesses Tchavchadze and Orbeliani. This raid, in which Shāmil took no direct part, brought him great notoriety not only in Russia but in the West as well. On the positive side, he was able to exchange the princesses for his elder son Djamāl al-Dīn, surrendered to the Russians as a hostage during the desperate defence of Akhūnd. The Russians obtained a ransom of 40,000 silver roubles. On the other hand, this episode proved to be extremely damaging to his reputation in Europe, where his treatment of the royal captives was perceived by many as an act of “a fanatic and a barbarian with whom it will be difficult for us, and even for the Porte, to entertain any credible or satisfactory relations.” Offended by the insulting remembrances he received from the Ottomans and their European allies in the aftermath of this affair, Shāmil relinquished any hope of obtaining their support in his struggle against the Russians. The result of the Crimean War, though by no means favourable to Russia, came as a shock to Shāmil and his followers, for they could now expect no Ottoman help and were left face-to-face with their formidable foe. The Russian command, on the other hand, could now focus its undivided attention on the Caucasus. In the spring of 1857, the Russians led by the newly-appointed viceroy of the Caucasus, Prince Baryatinskiy and several talented generals, started methodically to mop up Shāmil’s strongholds in Čecnja. As a result, Shāmil’s power-base was drastically reduced, and the few Čečen warriors still loyal to him had to seek refuge in the mountains. The majority of the war weary Čečens and many Dāghistānī communities abandoned him and submitted to Russian rule. Amidst the general despondency which overcame even his most committed followers, his pleas for help to the Ottomans, the British and the French were left without reply. With the rapid collapse of the mountaineers’ resistance, the imām had no option but to retreat constantly in the face of a relentless Russian advance, abandoning one by one his fortified positions at New Darghiya and Vecdān. He made his last stand on top of Mt. Qhunīb surrounded by his family and 400 loyal murdi. In the face of inevitable destruction, he surrendered unconditionally to the Russians on 6 September (25 August Old Style) 1859.

In contrast to the earlier leaders of the anti-Russian dūbād in the Caucasus, e.g., Shāykh Muṣṭafā Shukurma and Ghażār Muḥammad, Shāmil received an unusually lenient treatment by the jubilant Tsar Alexander II and his subjects. With his “misddeeds” against the Russians all but forgotten, he was paraded through Moscow, St. Petersburg and many lesser Russian cities, repeatedly honoured by the Tsar, photographed, painted, illustrated by artists. In numerous books and articles, praised in numerous books and articles, a “cultural hero” of sorts, he was everywhere greeted by admirers and an enthusiastic nobility. For many Russians, still reeling from the Crimean debacle, Shāmil became an emblem for military and colonial victory which reaffirmed Russia’s status as an enlarged, powerful and successful nation. Shāmil, genuinely touched by the attention and hospitality accorded to him by his former foes, seems to have accepted his role and even volunteered to swear allegiance to the Tsar. He constantly marvelled at, and praised the technological and cultural achievements of Russian civilisation and wrote letters to his former supporters, urging them to stop their resistance and to recognise Russian sovereignty. Upon completing his triumphant tour of Russia, he was assigned to residence in Kalu—g—a town about 120 miles south-west of Moscow. He lived there in a luxurious mansion with his two wives, three surviving sons, four daughters and their families. In 1866, he was permitted to move to Kiev and in 1869 his request to make a pilgrimage to Mecca was finally granted. En route, he visited the Ottoman sultan ‘Abd al-Azīz and the Egyptian al-Dīn Ismā‘īl, both of whom gave him a cordial reception and rewarded him with gifts and money. He died and was buried in Medina in Dhū ’l-Hijjah 1287/March 1871. Of his three surviving sons (Djamāl al-Dīn died three years after he had returned to his father from Russian captivity), the eldest, Ghażār Muḥammad, entered the Ottoman service and fought against the Russians in the Russo-Ottoman war of 1877-8. He died in Mecca in 1903. Shāmil’s other son, Muhammad Shāfī‘ī, became a major-general in the Russian army and resided in Moscow and later in Kazan. His grandson by his youngest son Muhammad Kāmil, named Sa‘īd Shāmil, took an active part in the struggle for independence of Dāghistān from Soviet Russia in the 1920s.

Shāmil’s state, army and administration

The military-theocratic state in which Shāmil was the supreme temporal and religious authority was geared to one overriding goal: uniting the mountaineers in their struggle against the “infidel” Russians and their local cohorts. Based on the institutions and precedents established by the first two imāms of Avrāstān, Ghażār Muḥammad and Hamza, the mountaineers’ state grew much more complex and efficient under Shāmil’s able leadership. The dual title imām and amir al-mu‘minin, which featured in his letters and decrees, accurately reflected his functions as the principal interpreter and enforcer of the shari‘a on the one hand, and as the political and military leader of the other. In addition, Shāmil was his own legislator. His instructions and ordinances on matters not explicitly covered by the shari‘a formed the so-called nizām, an administrative and military code similar to, and possibly modelled on, the Ottoman kānun [q.v.]. Finally, Shāmil was also the chief justice and administrator of his state. In executing all these political, religious, legislative, administrative and judicial functions, Shāmil was assisted by a privy council, a diwān, established around 1842. Stacked with his closest followers and confidants, the diwān was convened for emergency consultations, but also relieved him of routine decision-making on matters of minor significance. Executive and judicial power in the areas under Shāmil’s control rested with his deputies (nd’īb), whose numbers grew from four in 1840 to about thirty in 1856. The nd’īb were nominated personally by Shāmil and were responsible for law and order, tax collection, and enforcement of verdicts passed by local i‘tālāts. During military campaigns, they served as field commanders and were responsible to Shāmil for fielding the required number of warriors and for general readiness for war.
The na’ib’s status varied according to the military importance of the area under his jurisdiction. In the late 1840s, Shamil introduced the post of mudhir, i.e. the senior na’ib, who, apart from running his domain, supervised and coordinated the activities of lesser na’ibs in neighbouring regions. Normally, the na’ib led up to 500 warriors into battle. Both the mudhirs and the ordinary na’ibs were closely watched by the imam’s “secret agents” (muhtasibs), who were answerable directly to Shamil and reported to him on the activities, especially misdeeds, of his lieutenants. The na’ibs were divided into smaller units administered by the na’ibs subordinates, the dhaba, or mu’tazims (Russ. muzun). These officials, in turn, had under their command village elders, elected by their respective communities. To enforce the imam’s orders, each na’ib relied on a standing force of 20 to 50 (or occasionally up to 100) loyal guards called na’ib murids as opposed to tarika murids, who were considered “men of God” and normally did not participate in fighting.

On the level of the mut’azim, the na’ib murids were paralleled by the mounted “retainers” (murtaziks), supported by their communities.

While the executive and administrative powers were vested in the na’ibs, they were not allowed to interpret the shar’a or dispense shar’i justice. For this they had muftis and kutubs attached to them. In addition, these religious officials, whom the sources generally describe as “ulama’, were responsible for maintaining the mosques, leading the prayers, delivering the Friday sermons, and for implementing the precepts in the mosques, usually at the mosques, to the young. Being at least partially independent of their na’ibs, the “ulamas’ provided a much-needed check on the broad discretionary power given to their temporal counterparts.

The core of Shamil’s army consisted of the na’ib murids, the career fighters who had sworn an oath of personal allegiance to the imam and his cause and regarded themselves as his personal disciples. Fearless and loyal, the murids were, in a sense, “warrior monks” who were always ready for martialty “in the path of God” and provided example and leadership for the less organised and often lukewarm local levies. According to different calculations, they numbered 400 to 500 men, of which 120 served as Shamil’s personal bodyguards, while the others were assigned to his na’ibs or sent on special missions. The murids were supported directly from the treasury of the imam or his deputies. This small elite corps was supplemented by the regular cavalrymen called martazikas. Under Shamil’s orders, every ten households in the territory under his control had to furnish one fully-equipped horseman, whose personal needs as well as those of his wife and children were provided for by the other nine families. The muridun and the martazikas constituted the backbone of Shamil’s army. The peasant irregulars who joined them during large-scale campaigns were poorly trained, far less reliable and therefore served primarily as auxiliaries. Finally, in imitation of the Ottoman nizam-i qasdid [q.v.], Shamil attempted to create a modern infantry corps, which, however, proved ineffective and inferior to its Russian counterpart. In an attempt to achieve logistical independence, Shamil established three gunpowder factories, which produced not only powder but mines, gunshells, and bombs. Shamil’s army also manufactured its own cannon, albeit of a rather low quality, to supplement the Russian artillery captured on the battlefield. Shamil’s 20 cannon were efficiently trained and were awarded special marks of distinction for courage. Cowards and deserters, on the other hand, were obliged to wear “marks of disgrace” until they “erased” them by military feats or loyal service.

To sustain this complex administrative and military machinery, Shamil collected from his subjects a zakat of approximately 5% to 7% in money and kind. In anticipation of a military campaign, an extraordinary tax in kind could be imposed on specific communities to meet the needs of the army on the march. Another source of state income was one-fifth of war booty, sometimes quite substantial, which under the shar’a was set aside for the ruler. All fines, popularly known as bayt al-mal, along with escheatable or forfeited property were also taken by the treasury. The same holds true for the income derived from auks. The lion’s share of the income was spent on the military, on the upkeep of ulama’ and mosques as well as on the support of Muslim emigrants who had fled from territories under Russian control (muhazdirun) and settled in Shamil’s shar’a state.

Shamil and “Myrdicism”

The issue of whether or not Shamil’s ghazawiyya was related to, or motivated by, his Sufi background has not yet found a satisfactory solution. As mentioned, Shamil, like the other imams of Daghistan Ghazi Muhammad and Hamza(t) Bek, sought to establish a theocratic state that would unite the anarcho-Caucasian mountaineers against the common enemy, the Russian Empire. Apart from being military leaders and religious reformers, all three imams were also affiliated with the Khalidi branch of the Naqshbandiya [q.v.]. Their initiatic line stretched back to the Kurdish Shaykh Dhatul-Din al-Din, a disciple of the Naqshbandi imam Khwaja Muhammad al-Yaraghf (d. 1243/1247), who, in turn, belonged to the influential Mujaddidi subdivision of the Naqshbandiya tarika, founded by the Indian Shaykh Ahmad Sirhindf (Russ. Mutsagmet) called on Daghistant Muslims to observe the sunna and the shar’a strictly, to avoid bid’at (i.e. the ‘iddat), to fight against the enemies of Islam, and, if defeated, to emigrate to Islamic lands. All these precepts were in full accord with the central tenets of the Khalidhiyya, although it is not clear whether or not Muhammad al-Yaraghf actually called his audience to ghaz’ud against the Russians. Plainly, his chief concern was to extirpate the “un-Islamic” customs and beliefs of the mountaineers and to replace them with the shar’a. Paradoxically, it was not the militant Muhammad al-Yaraghf, but his reclusive disciple, Sayyid Djamal al-Din, who initiated Ghazi Muhammad and young Shamil into the Naqshbandiya-Khalidiyya (Hamza Bek was a disciple of Ghazi Muhammad). Shamil’s emphasis on meritocratic adherence to the shar’a, his open hostility toward “the cursed Christians and the despicable Persians [i.e. the Shi’a of Iran],” his political activism and unwavering loyalty to the Ottoman sultan, seem to be in line with the Khalidhi teaching as expounded by its founder and his Turkish colleagues. As mentioned, their initiatic line stretched back to the Kurdish Shaykh Dhatul-Din al-Din, a disciple of the Naqshbandi imam Khwaja Muhammad al-Yaraghf (d. 1243/1247), who, in turn, belonged to the influential Mujaddidi subdivision of the Naqshbandiya tarika, founded by the Indian Shaykh Ahmad Sirhindf (Russ. Mutsagmet) called on Daghistant Muslims to observe the sunna and the shar’a strictly, to avoid bid’at (i.e. the ‘iddat), to fight against the enemies of Islam, and, if defeated, to emigrate to Islamic lands. All these precepts were in full accord with the central tenets of the Khalidhiyya, although it is not clear whether or not Muhammad al-Yaraghf actually called his audience to ghaz’ud against the Russians. Plainly, his chief concern was to extirpate the “un-Islamic” customs and beliefs of the mountaineers and to replace them with the shar’a. Paradoxically, it was not the militant Muhammad al-Yaraghf, but his reclusive disciple, Sayyid Djamal al-Din, who initiated Ghazi Muhammad and young Shamil into the Naqshbandiya-Khalidiyya (Hamza Bek was a disciple of Ghazi Muhammad). Shamil’s emphasis on meritocratic adherence to the shar’a, his open hostility toward “the cursed Christians and the despicable Persians [i.e. the Shi’a of Iran],” his political activism and unwavering loyalty to the Ottoman sultan, seem to be in line with the Khalidhi teaching as expounded by its founder and his Turkish followers. Yet, as Sayyid Djamal al-Din’s opposition to ghazawiyya and insistence on inward self-perfection well shows, Shamil’s interpretation of the Khalidhi tenets was not the only possible one. In the early stages of his career, Shamil acted primarily as a religious reformer, first under Gha’fi Muhammad and then on his own behalf. In contrast to the shar’a, the legal and moral code. His reformist activities inevitably set him on a collision course with the conservative Avar
nobility and, eventually, with the Russians, who, not unlike the contemporary French colonial administrators of Algeria, gave precedence to customary law over the qur'a, delaying it to be more "manageable." Hence, the Russians were suspicious of the Dagestani 'ulama' and were unwilling to accommodate them, relying instead on the corrupt and discredited nobility. The inflexibility of the Russian colonial officials was further aggravated by the Russian political and economic expansion in the Caucasus, which disrupted the traditional life-style and economy of the region, bringing about dislocation, and concomitant resentment among the mountaineers. Under these circumstances, the qar's-oriented, sober tenets of the Naḵshbandiya-Ḵalidiyya, combined with the viable institutional structure of tarṭaŞ Sufism, provided a compelling solution to the mountaineers' problems. Although formally he was neither head of a tarṭaŞ nor even the supreme šufl master of Dagestān (both titles were better applicable to Sayyid Ḫaμal al-Dīn, whose ascendancy in Šufl matters the īmām humbly acknowledged), 瑄alīm commanded the practically unconditional loyalty of his followers, the most devoted of whom viewed him as their personal murīshid [q.v.]. In a sense, 瑄alīm's whole state was an extended tarṭaŞ, complete with some trappings of a Šufl community as the collective ḡīla [q.v.] charted by him in his murīdin on the move and in battle, and the periodical khalwas [q.v.] practiced by the īmām and his disciples, the miracles (karanī[n]i [q.v.]) ascribed to him by the followers, the supererogatory prayers (up to 20 times a day, according to some testimonies) he assigned to the murīdin, the constant spiritual link (nābil[a] [q.v.]) which瑄alīm maintained with his closest disciples, and, finally, his communications with the spirit of the Prophet to solicit the latter's advice. All this, however, is true only of瑄alīm's reign in Darghāhīya and Vedān. Outside this immediate circle of followers, and for the overwhelming majority of his subjects,瑄alīm was a venerated, and often fearsome, sovereign and military leader who ruled with an iron fist over a host of diverse and recalcitrant tribal communities, traditionally opposed to any state control. It is in his ability to weld the mountaineers together for a common goal, rather than in his activities as a Šufl master (for which he had little time anyway) that one should look for his major achievement. Therefore, the Russian and Western historians who described瑄alīm's movement as "myrāsīm" were to some extent justified in setting it apart from ordinary Sufism. In many respects, his ghazzāti [g.v.] bear striking resemblance to the other contemporary Šufl-based movements, notably the Kadiyya [q.v.] of Algeria and Sudan and the Sanūsiyya [q.v.] of Cyrenaica. For each of these movements, Sufism provided a handy organisational vehicle, rather than their true motivation, which should be sought elsewhere.

瑄alīm's legacy

Already in his lifetime,瑄alīm became a great media event, which generated a vast corpus of scholarly discourse and Romantic literature. From 1854 to 1859, 38 full-size books (not to mention innumerable articles, poems and news accounts) dealing with瑄alīm were published in the West alone. In Russia, the volume of writings on瑄alīm and his movement was, of course, much greater. In line with the fashion of the day, this literature depicted瑄alīm as a "noble savage" and a typical hero of European Romanticism. As time went on, the public interest in him began to subside, giving way to a rather unbalanced evaluation of his personality and of the Caucasian wars as a whole. During the Soviet period,瑄alīm once again became an object of intense study and of heated debate over the nature of his movement. In accordance with the Marxian concept of class struggle, the Soviet historians of the 1920s and 1930s portrayed瑄alīm as a hero of revolutionary struggle, a fearless fighter against the colonisation of the Caucasus by Tsarist Russia. In the 1950s, however, the Communist Party of the Soviet Union launched a campaign against so-called "bourgeois-nationalism", as a result of which瑄alīm's role underwent a radical revision. In a remarkable volte-face, Soviet historians condemned him as the leader of a "reactionary and nationalistic movement in the service of the English capital and the Turkish sultan." They argued that by fighting against the Russians,瑄alīm became a hindrance to progress, in so far as the incorporation of the "backward" and "feudal" Caucasus into a technologically-advanced Russian Empire was an "objective historical necessity" and the only way to develop its culture and economy. The debate over瑄alīm's role reached its peak in 1956-7, when, on the one hand, it was forcibly suppressed by the official condemnation of the īmām as a thoroughly reactionary and nationalistic religious fanatic. The official view, however, was not to everyone's liking, and a covert campaign to rehabilitate瑄alīm, spearheaded by some Dagestan scholars, continued for several decades.

With the advent of perestroika and glasnost in 1986,瑄alīm's contribution to the history of the Caucasus was again drastically revised. Today,瑄alīm is totally rehabilitated and is celebrated by most of the Dagestanfs and the Četens as their greatest national hero. Symbols and slangs associated with the īmām's resistance to the Russian domination took on a new life during the Russo-Čečen conflict of 1994-5, when they were appropriated and re-defined by the supporters of President Džohar (Dzhabhar) Dudaev.

For瑄alīm's predecessors at the head of the anti-Russian struggle in the Caucasus, see A. Bennigsen,
Un mouvement populaire au Caucase au XVIIIe siècle,
in Cahiers du Monde Russe et Soviétique (Paris),
v/2 (April-June 1964), 159-205; M. Gammer, The beginnings of the Naşhpadiyya in Daghstān and the Russian conquest of the Caucasus, in Wi, xxxiv (1994), 204-17.

Of the general histories of Şāmil’s movement, J. Baddeley’s The Russian conquest of the Caucasus, London 1908, and F. Bodenstedt’s Die Völker des Kaukasus und ihre Freiheitskämpfe gegen die Russen, Frankfurt 1848, remain standard works in the field, at least as far as the military operations are concerned. A typical Soviet view of Şāmil’s ghazaot-takī, based on 19th-century Russian sources, is given in N.A. Smirnov, Myrdzidam na Kavka, Moscow 1961, cf. A. Yandarov, Sufizm i ideologia national’no-osovoboditel’nogo davleniya, Alma-Ata 1975. An illuminating, if somewhat idealised account of Şāmil and his movement, which was extensively used in the present article, is M. Gammer, Muslims resistance to the Tsar, Shamul and the conquest of Chechnia and Daghstan, London 1994. See also Čečenski, Al’-Karb, and nágrád damad (Kevmen).

ŞAMMĀH (A’), candlemaker (synonymous with şam’t). The usage of the latter term as a nisba is cited by al-Sam’āni naming some of the candlemakers who were also counted among transmitters of the 4th/10th and 5th/11th centuries. The early kubra manuals did not include a chapter on the candlemakers, who were only briefly cited by Ibn al-Ĥujwīra (d. 729/1329 [q.e.]). He noted the dishonest practice of the Şammān, who mixed beeswax with vegetable oil and other substances, thereby lowering the quality of their product.

While discussing the şammāh, some Arab writers bring forth two names among the Şakāba, namely, ’Uthmān (b. ’Affān) and Tamīm al-Dārī, the former in connection with candlemakers and the latter as the pioneer who brought a lamp (kandil) from Syria and lighted it in the Prophet’s mosque in Medina during the life of Muhammad. This is cited as the origin of the practice of lighting lamps and candles in mosques since early Islamic history. Legends aside, the Umayyad caliph al-Walid II (125-6/741-2) was credited with using candle illumination at the Umayyad court of Damascus. The common people of the ’Abbasid period used oil lamps (kandil), while the rich and powerful could afford expensive candles. Al-Ma’mūn (d. 218/833) spent a vast amount of money on candle illumination during his marriage with Bīrān b. al-Ĥasan b. Sahh, and al-Mutasukkāl (d. 247/861) spent a fabulous sum of 1.2 million dirhams for candles in royal palaces per annum. During the ’Abbasid and Fātimid periods, candles were made mainly from beeswax, which was sometimes imported from long distances, e.g. from Tunis to Egypt.

There were guilds of candlemakers in the Safavid capital city of Šāhān in the 16th/16th and 17th centuries. The members of the guild of candlemakers (şam’māh in Persian), were classified as workers of low position in society, comparable to the lowly status of barbers, bath-keepers, fortune-tellers, bricklayers, corpse-washers, porters, muleteers and so forth. Nevertheless, a modern şam’māh of North Africa attained upward social mobility by writing a history of the Hašid dynasty (cf. Şayḫk Abu ʿl-Ĥabbas al-Şam’māh, al-Hiddal al-şayḫiya al-şamsiya ’alā ma’dīk hisāb al-dawa al-Hašidiyya, Tunis 1327/1909). The candlemakers’ work was in high demand in early modern Syria, where it was customary to light candles in marriage ceremonies by all strata of people: a candle used to cost 2 liras in early 20th-century Syria.

AL-SHAMMĀKH b. DĪRĀR, true name Maʾṣūl b. Dīrār, of the Thaʿlaba b. Saʿd of the Banū Ḥuṣayn (Ghaṭṭān), a muʾkhdār damad and poet, and according to some sources, a Companion after his conversion in 9/630 (Ibn ʿAbd al-Barr, Itbāh, i, 324; Aḥfān, viii, 98; Isḥāb, iii, 210). This information is to be treated with caution: according to Ibn Sayyid al-Nis [q.e.], the author of a work on the poets of the Prophet, it was his brother Maʿṣūl al-Muzarrad who met him and composed a poem in his honour (Mināh al-madākh, Damascus 1407/1987, 310-11). Al-Shammāk must have been too young at this time.

Reliable information concerning him is extremely sparse; details relating to him have been inextricably mingled with those relating to his older brother al-Muzarrad b. Dīrār. He was allegedly ugly, one-eyed (al-Safādī, al-Shārī bi ’l-masāʾil, 206; al-Baḥdāghī, Lāḥud, ed. Hārin, iv, 257), ruddy and of small stature. Certain traditions have associated his unprepossessing appearance with his misogynistic tendencies (al-Balāghūrī, Anṣāb al-adhrāf, ms. fols. 1090b-1091a), the traces of which, clearly visible, survive in his poetry (Dīrān, 104-8, 219-23, 287-95).

After the death of the Prophet, he took part in the battle of al-Kādiyya (al-Tabari, i, 2292, 2292), in the conquest of Armenia (ibid., i, 2687) and in that of Adharbaydān (al-Balāghūrī, Futuh, 329, idem, Anṣāb, fol. 1090b). It is today generally accepted that he was martyred in Mākān ca. 30/630 (al-Hādi, 157). However, al-Balāghūrī (Anṣāb, fol. 1090b) insists that he was not involved in that episode (taʿlām yamūl Mūkānā); he mentions a lament which he is said to have composed for the occasion.

It is therefore appropriate to place his death at a later date. Al-Shammāk belonged to a family of poets. His brothers al-Muzarrad and Dājūz praised the art of the nāzim; under the name of the former a diwān has survived in a recension by Ibn al-Sikki (publ. Baghdād 1962); as regards Dājūz, al-Diżmaḥ attributes to him a diwān composed after the assassination of ʿUmar b. al-Khaṭṭāb (Tabākāt, 133; Abū Tamīmān, Hamīsā, i, 453-4). Similarly, the two sons of al-Muzarrad, Ḥasan and Kuthayyir (al-Hādi, 89), and the son of Dājūz, Qabbār, were poets; the latter composed a lament on the death of al-Shammāk. Our poet owes his cognomen “the Proud”, to the superb quality of his poems (Sāmī Makki al-ʿAnī, Muṣāfām ul-ḥudūd, Baghdād 1971, 127). Examination of his verses confirms this beyond doubt; first of all, the most eminent transmitters discussed them in their magalis; among those who collected his written poems were Ibn Ḥabbī in the 2nd/6th century (Yākūt, Qāmūs, xviii, 116-17) and al-Sukkāf in a century later (Yākūt, xiii, 98; Ibn al-Nadīm, al-Fihrist, Cairo n.d., 290). For his part, al-Diżmaḥ places him in the third category of the fahl alongside al-Nābiṣābī al-Djāʿdī and Abū Dhuʾayb (Tabākāt, 123). In more specifically literary terms, numerous critics have expressed admiration for his treatment of poetic themes (Ibn Kutayba, Shur'a;
From a thematic point of view, the poetry of al-Shammakh is unconcerned with the tribal aspect; similarly, total silence surrounds his participation in the great conquests of nascent Islam. The poetry of al-Shammakh, in accordance with his entire herd to the water, where a well-armed hunter waits, accompanied by hunting dogs. In this context, the poet innovates. According to him, the animal sees himself as endowed with sentiments such as jealousy, the preoccupation of the male responsible for a whole herd and terror in the face of imminent death; the hunter, the dogs and the natural order are presented here in prominent relief (Ditoon, ii, vii, viii, x, xi, xii, xvii, xvi, mulhak, iv, xxii, xxiv, xxxiv). In this connection, the za'yeya (Ditoon, 173-202) merits special mention; in this poem of 56 verses, the poet relates the episode of the bow. In a broad expanse of 20 verses, he evokes at length the process of its fabrication and the birth of an artistic composition, in the description of animals, human resonances are rarely attested in the poetry of the period. Ancient critics aware of it (Ibn Kutayba, al-Yusuf Atfiyash al-Djaza'irf, in Al-Kitab, xi [1952], 151-78; al-Hadif, 195-201; Yahya al-Djubunf, al-Farayya fi l-shi'd al-djazir, Baghdad 1984, 169, 184-5). A second aspect of his poetic talent deserves to be stressed. Al-Shammakh seems to have been an excellent composer of ragaz; his Ditoon contains 9 urajuzas (section on aradiz al-ditoon, 353-422), in some of which he is indebted to Khiyar b. Djaz, Djournal and al-Djubun. The poet submits this poetic form to a new treatment, which recalls that reserved for the kastda, with an opening nasih based on the memory and the episode of the savage bull (Ullmann, 27). However, the poetic language of al-Shammakh is discouraging: his language, suffused with archaisms and rare terms was and remains difficult of access (al-Djazf, Bayan, ed. Hartin, iii, 251). As early as the 2nd/8th century, al-Djumahf was stressing the stiffness of his style (kazza) and his extremely vigorous language (ghadlu mutan al-djazf), implying that it was complex. It is for this reason that his poetry is considerably more difficult than that of Labid (Tabakat, 132; Ibn Sayyid al-Nass, op. cit., 234-5), which is itself extremely complicated. Modern research has been concerned with giving him the status that he deserves; his rehabilitation, instigated by Blachere, seems today to be progressing successfully, and Thomas Bauer considers him one of the best representatives of classical poetry (Bauer, 259, esp. 273).

SHAMMAR, a nomadic tribal confederation currently found in Saudi Arabia, Syria and 'Irāk. Their oral tradition states that they are Yemenis of Kahtān origin. Their myth of descent links their ancestry to Shimmar Ibn al-
cub Yusuf b. Abl Yahya. On the conclusion of his

While the majority of the tribe remained in Djabal Shammar, some sections migrated to the area between the Tigris and Euphrates in the 18th century in search of pasture and under pressure from local tribes such as the 'Anaza and the Su'ūdī dynasty. These sections are referred to as northern Shammar or Shammar of Mesopotamia. They consist of a number of tribal lineages the most well-known of which are the Djarba, Tokah and Zakarit. In Mesopotamia, the Shammar combined pastoral nomadism with agriculture. Some became Šhī'ī under the influence of the Šhī'ī communities of the region, especially in 'Irāk. The tribe developed a history distinct from their brothers in the south.

Those who remained in Djabal Shammar are known as southern Shammar. This group attracted the attention of a number of 19th-century European travellers among whom were Wallin, Doughty, Blunt, and Guarmani. In the 20th century, the accounts of Musil and Montagne are prominent. One of the reasons behind their preoccupation with the Shammar stemmed from the fact that this nomadic tribe was at the height of its power, as it succeeded in developing a centralised authority over most of central Arabia.

Estimates of their number vary in the 19th and early 20th centuries. The Handbook of Arabia gives a figure of 4,000 tents and a total of 150,000-200,000 individuals. This excludes those who were settled in the oases of Djabal Shammar, Hā'il, Mušāq, Sab'an, Mustajjāda, Ghazala and Rawda, estimated by Montagne at 20,000 individuals.

The southern Shammar are divided into four tribal sections; Abda, Singāra, Aslam and Šāmān. In the 19th century, the Abda assumed leadership of the whole tribe. Unlike other nomadic tribes in the area, the Shammar combined their nomadism with control over an oasis settlement, Hā'il [q.v.]. From there, their chiefs, the Al Rashidi [q.v.], expanded into al-Ḵasim and southern Najd. Musil claimed that Rashidi expansion reached the borders of Aleppo, Damascus, Basra, 'Ummān and 'Aṣš by the end of the last century. However, their power base remained strongest in Djabal Shammar and the Great Naifā, the core of their tribal dīra.

The Shammar dynasty developed a complex political organisation. The Rashidi amirs, resident in Hā'il, co-existed with the Shammar šāḥids who were drawn from the chiefly families of the tribal sections. The latter participated in the amirs' raids in return for a share of the booty. They attended the nadjīd in Hā'il where they regularly received gifts and subsidies from the Rashidi amirs. These subsidies, together with a network of marriages with the oasis amirs ensured interdependence and loyalty at least until the beginning of the 20th century.

The Shammar dynasty rested on a multi-resource economy. The Shammar pastoral economy was supplemented by control over trade and pilgrimage caravans. Their tribal territory included important trade routes which linked Mesopotamia and the Gulf ports to the holy cities of the Hidjāz. Wahhābī fanaticism in the 18th and 19th centuries led to the diversion of trade routes in favour of Hā'il, which was then outside their control. Trading and pilgrimage caravans were usually accompanied by a caravan leader and a group of armed men who were responsible for its security, and this leader was appointed by the Hā'il amir who expected him to levy a toll from the caravan after keeping a sum for himself. In return for this toll, the Hā'il amirs guaranteed the safety of merchants and pilgrims, especially Šhī'ī from Persia and 'Irāk, regarded as heretics by the Wahhābī Su'ūdī dynasty in southern Najd. Taxes levied from these sources ensured a surplus in the hands of the amirs, and Hā'il developed into an important transit station where traders, craftsmen and agriculturalists coexisted and flourished.

Its prosperity was maintained as a result of an extended period of peace and security. The amirs were able to raise a "police force", drawn from among their slaves and the sedentary population, mainly the Banū Ṭalmū of Hā'il, in charge of keeping order in the oasis. Also an army consisting of a mixture of tribal people, mercenaries, sedentary groups and, above all, slaves, was sent to distant areas to pacify any rebellious Bedouin and enforce Rashidi hegemony in other oases and towns.

Towards the end of the 19th century, Rashidi expansion led to the collapse of Su'ūdī domination in al-Riyād, and for a brief period the Rashidi under the banner of Muḥammad Ibn Rashidi became the undisputed rulers of central Arabia. The Ottoman empire recognised them there and maintained good relations with them through the Šalī of Basra. They supplied the amirs with irregular subsidies and weapons to cement a fragile alliance which cost the Shammar nothing but a vague recognition of nominal Ottoman suzerainty, manifested in the mentioning of the sultan's name during the Friday prayers in Hā'il. This alliance eventually led to the collapse of their dynasty with the defeat of the Ottoman empire in the First World War.

Rashidi supremacy in Arabia began to eroded with the return of Ibn Su'ūd from his exile in Kuwait in 1902, and recapture his ancestral capital from the Rashidis. Having secured the support of Britain during the First World War, he drove them out of Hā'il in
1921, thus putting an end to their leadership and role in Arabian politics. The Rashīdf ruling group was taken hostage to his capital, al-Riyād, where some members of the family were still residing. Ibn Su‘ūd confiscated their belongings and prohibited them from returning to their land, and through a series of marriages with Rashīdf and Shammar women, incorporated them into his wide network of affinities.

After a series of fierce battles, some Shammar sections refused to become subjects of Ibn Su‘ūd, but fled to Mesopotamia to join their tribal brothers in the north at a time when Britain was establishing a protectorate in their territory. The Shimmar felt, in good conscience, that their identity had been stolen from them, and that mention of it, rare in the sources, is just a contamination from its cult by the South Arabs. This seems especially likely in that the theophoric name ‘Abd Shams, known amongst the Dhahyan, which Arab authors render by ‘Abd al-Shārīk, -recognised as the name of an idol, the sense of ‘kurn al-šams “the rising sun” (al-Tibrizī, in Hāmása, 218; Ibn Durayd, cited in T'A, vi, 392 l. 26 ff.).

Moreover, the Kor‘ān attributes the cult of the Sun to Saba’ (XXVII, 24), whilst it attributes the cult of Venus, the Moon and the Sun to Mesopotamia, the homeland of Abraham (VI, 74, cf. XXXVII, 86). The exhortation, only found occasionally (XLVII, 37), not to worship the Sun and Moon, two signs created by God, is certainly an allusion to these two instances. “For nowhere in Kor‘ānic polemics is there any emphasis on the stellar cult” (Faḥd, Le pantheon de l’Arabie Centrale à la veille de l’hégire, Paris 1968, 151).

Theophoric names including the element Shams are numerous amongst the Greek inscriptions of the Ħawrān (see D. Sourdel, Les cultes du Hauran à l’époque romaine, Paris 1952, 53 ff.), showing that the Arabs who had migrated northwards had come under the Hellenistic cult of Helios, which Strabo makes the main deity of the Nabataeans (see his Geographica, ed. C. Müller, 784; Wellhausen, Reste, 60-1; Sourdel, op. cit., 53 n. 1).

For the interpretation of the term al-Ilaha “the goddess” (applied in certain sources to the Sun), mentioned in an elegy pronounced by Amina bt. Uṣayba ca. A.D. 621 on her father fallen in battle at the Yarmūk, “I do not know the name of the Sun you proclaimed the Yarba’ (T'A, ix, 375), cf. Faḥd, op. cit., 152-3. Bibliography: This article is essentially based on Faḥd, Le pantheon, 150-3.

2. In astronomy.

In the Aristotelian view accepted by most Muslim astronomers, the sun was a ball-shaped solid body (according to early doctrines made of fire), which moved around the earth in the solar sphere. This sphere was made of crystalline or ether and occupied a central position by all the sections of Venus and Mars [see Falak].

In the geocentric representation of the heavens, which the Muslim astronomers adopted from Ptolemy [see Batiłamīyūs], the earth is assumed to be fixed in the centre of the universe. The sun moves on the ecliptic in the direction of the zodiacal signs, i.e. from west to east, and its longitude is measured from the vernal point [see Minjārāt al-burjāj]. The period of return of the sun to the vernal point is the tropical year; the period of return to a fixed star, the sidereal year. The precession of the equinoxes is the difference between the tropical and the sidereal solar motion.
In order to predict the solar position on the ecliptic, most Muslim astronomers used the Ptolemaic eccentric model or the equivalent simple epicycle model. These models were adopted by Ptolemy from his predecessor Hipparchus (Rhodes, 2nd century B.C.) and were based on the observed differences in length between the seasons.

In the eccentric model (see Fig. 1) the sun $S$ moves at a constant speed on the circle $ASP$, whose radius is taken equal to 60. The centre $C$ of this circle is removed from the earth $E$ by a distance $e$, the solar eccentricity (الْبَيْنُ الْمُرْتَزِقَةُ). The sun reaches its largest distance from the earth at the apogee $A$ (الْمَدْجُ), its smallest distance at the perigee $P$ (مَلْحَزَّةُ). The vernal point is indicated by $V$; the longitude of the apogee, angle $VEA$, is taken equal to 60. The centre $C$ can be obtained by adding the longitude of the apogee to the true anomaly: $\lambda = a + \lambda_e$.

Since the sun moves uniformly on the eccentric circle, the mean solar anomaly $a_w$ (الْمُدْرَسَةُ الْشَمْسِيَّةُ), angle $ACS$, increases linearly as a function of time. In order to determine the non-linear true solar anomaly $a$, the angle $AES$ between the apogee and the sun as seen from the earth, a correction $q$, called the solar equation (الْمُكْبَرَةُ الْشَمْسِيَّةُ), must be subtracted from or added to the mean solar anomaly. This correction, equal to angle $ESC$ in Fig. 1, can be calculated as a function of the true anomaly by applying the sine rule to the triangle $ESC$. In this way we obtain

$$q(a) = \arcsin \left( \frac{e}{60} \sin a \right).$$

In order to determine the solar equation as a function of the mean solar anomaly $a_w$, we can extend triangle $ESC$ to a right-angled triangle $ESX$, in which $\angle SXE = 90^\circ$ and hence $EX = e \cdot \sin a_w$ and $CX = e \cdot \cos a_w$. From this we find

$$q(a_w) = \arcsin \left( \frac{e \cdot \sin a_w}{\sqrt{(e \cdot \sin a_w)^2 + (60 + e \cdot \cos a_w)^2}} \right)$$

or the equivalent

$$q(a_w) = \arctan \left( \frac{e \cdot \sin a_w}{60 + e \cdot \cos a_w} \right).$$

Using these modern formulae we have $a = a_w - q$ for every value of the mean or true solar anomaly. The true solar longitude $\lambda$ (الْمَاوَدَّ الْشَمْسِيَّةُ), angle $VES$, can be obtained by adding the longitude of the apogee to the true anomaly: $\lambda = a + \lambda_e$. Instead of the mean solar anomaly, ancient and medieval astronomers usually based their calculations on another linear function of time, namely the mean solar longitude $a_m$ (الْمَاوَدَّ الْشَمْسِيَّةُ الْمَعْثُورَةُ), defined by $\lambda_m = a_m + \lambda_e$.

Using the formula for the solar equation given above (with $a$ replaced by $\lambda - \lambda_m$ and $a_w$ by $\lambda_m - \lambda_e$), we have $\lambda = \lambda_m - q$ for all values of $\lambda$ and $\lambda_m$.

In the simple epicycle model (see Fig. 2) the sun $S$ moves clockwise on a small circle, called the epicycle (الْكَيْفَةُ الْشَمْسِيَّةُ), whose radius $r$ is equal to the eccentricity $e$ of the epicycle model. The centre of the epicycle rotates in the direction of the zodiacal signs on a circle around the earth with radius 60, the deferent (الْفَلَاقُ الْحَمِيْلُ). If the angular velocities of the sun and the epicycle centre are equal to the angular velocity of the sun in the eccentric model, the two models are equivalent. In that case the sun reaches its largest distance from the earth whenever the epicycle centre passes through $A$, its smallest distance whenever the epicycle centre passes through $P$. (For more information about the Ptolemaic solar model, see O. Pedersen, A survey of the Almagest, Odense 1974, ch. 5.)

In early Islamic astronomical sources we find non-Ptolemaic planetary equations based on Persian and Indian methods (for the transmission of Persian and Indian astronomy to the Islamic world, see ʿIlm al-Hayʾa). For instance, al-Ḥaṣārāzmi [؟] calculated the solar equation according to the so-called "method of declinations":

$$\delta(a_w) = q(a_w) \delta_{AW},$$

where $\delta_{AW}$ denotes the maximum solar equation ($q_{max} = \arcsin(e/60)$), $\delta$ the solar declination [see Mayl], and $e$ the obliquity of the ecliptic [see Mintakat al-Burūq]. A treatise by al-Bīrūnī [؟] describing the method of declinations and many other methods of calculating the solar equation was discussed in E.S. Kennedy and A. Muruwwa, Birūnī on the solar equation, in JNES, xvii (1958), 112-21*.

The Muslim astronomers significantly improved upon the solar parameter values used by both Hipparchus and Ptolemy. The values of the length of the solar year, the solar eccentricity, and the position and motion of the solar apogee were repeatedly updated on the basis of fresh observations [see Marāṣid]. The length of the solar year was generally determined from solar observations at equinoxes or solstices made over periods of many centuries. For this purpose, Muslim astronomers combined the data of Ptolemy...
and Hipparchus with their own results. As early as the 3rd/9th century Muslim astronomers improved the method of determining the eccentricity and the longitude of the apogee from the lengths of the seasons by measuring the periods between the midpoints of the seasons (xajadwal al-thdbita).

The motion of the solar apogee, approximately 1° per 70 years in the direction of the zodiacal signs, had not been recognised by Ptolemy. Many Muslim astronomers made it equal to the precession of the equinoxes. The 5th/11th-century Andalusian astronomer al-Zarkallî (q.v.) was the first to discover that the two motions are different; he estimated the sidereal motion of the solar apogee to be 1° per 279 Julian years in the direction of the signs (12°54" per year; the modern value is 11°46") (see G.J. Toomer, *The solar theory of az-Zarqâlî*, in *Centaurus*, xiv [1969], 306-36).

Extensive accounts of solar observations can be found, in particular, in al-Bûnî's work (see al-Khânîn al-Mas'îdî, *Haydarâbâd* 1954-6, ii, 636 ff., and J. All, *The determination of the coordinates of cities*, Beirut 1967). Parameter values used by Hipparchus/Ptolemy and the authors of various important Islamic astronomical handbooks [see zīdîq] are presented in Table 1.

In order to perform practical computations of the solar longitude in a convenient way, practically all zīdîqgs contained the following tables:

- A table for the mean solar motion (diadwal wasat al-shams), which gave the mean motion in various periods depending on the calendar used (see ta'rikh [q.v.]: groups of years [al-sinun al-maajmu], single years [al-sinun al-maajmu], months, days, and hours). By adding the mean motion to the given mean solar longitude at a certain fixed point in time, the epoch, the mean longitude λm at any time could be calculated.

- A similar table for the determination of the longitude of the solar apogee λq. This table was usually headed harakat al-awajî, or also harakat al-kawdkib al-dhabîta (cf. above). The mean anomaly λm was found by subtracting λq from λm.

- A table for the solar equation (ta'dîl al-shami) as a function of the mean anomaly. Since no negative numbers were used, the values in the solar equation table had to be subtracted from the mean solar longitude in order to obtain the true solar longitude if the anomaly was smaller than 180°; otherwise, they had to be added.

In various Islamic astronomical handbooks the calculation of the solar position using the tables listed above was replaced by tables giving the true solar longitude directly as a function of the date [see takwim]. Some of these ephemerides could be used only during one particular year, others included yearly corrections which made them suitable for long-term use. Examples can be found in the almanac of al-Zarqallî (see J.M. Millâs Vallierosa, *Estudios sobre Azarquiel*, Madrid/Granada 1943-50, 158-65); in a treatise on astronomical instruments by al-Marrâkushî [q.v.]; (see J.J. Sedillot, *Traite des instruments astronomiques des arabs*, Paris 1834 (reprint Frankfurt 1984), 134-7); and in an 8th/14th-century Damascene corpus of tables for time-keeping by al-Kalâî (Paris Bibliothèque Nationale ms. arabe 2308, fol. 8*-9*).

Only incidental attempts were made by Muslim astronomers to improve or modify the Ptolemaic solar model. Some of these attempts aimed at an explanation of the striking variation in the solar parameters during the centuries, others at a better correspondence with cosmological principles. In the model of al-Zarqallî the centre of the eccentric solar orbit moved slowly on a small circle around the average eccentric. As a result the eccentricity varied between 1,51 and Ptolemy's 2;29,30 (expressed sexagesimally; see 'ilm al-ḥisâb). Al-Zarqallî ignored the variation of the longitude of the solar apogee also induced by his modification (see Toomer's article referred to above and J. Samsô and E. Millâs, *Ibn al-Bannâ*, *Ibn Ishâq and Ibn al-Zarqallî's solar theory*, in Samso, *Islamic astronomy in medieval Spain*, Aldershot 1994).

In the 6th/12th century various Andalusian

---

Table 1: Value of the maximum solar equation (in degrees), the longitude of the solar apogee (in degrees), the daily motion of the apogee (in sexagesimal thirds), and the length of the tropical year (in days), as used by Ptolemy and Muslim astronomers in their tables for the solar motion. All values are given in sexagesimal notation.

6 Close to 1° in 60 Persian years.
astronomers tried to make the Ptolemaic planetary models conform more closely to the Aristotelian physical principles. In the solar model of al-Bir¿aj¿ [q.v.], the pole of the solar orbit moved on a small circle around the pole of the equator. Its motion was uniform with respect to a point slightly removed from that pole, thus accounting for the different lengths of the seasons in a way similar to the Ptolemaic eccentron model (see B.R. Goldstein, Al-Bir¿aj¿: On the principles of astronomy, New Haven 1971).

In his popular Tagh¿sa fr 'ilm al-hay¿a, the 7th/13th-century Persian astronomer Na¿ir al-Din al-¿Tûsî [q.v.] attempted to give a physically more realistic representation of the solar and planetary systems and attempted to find solutions for the purported "difficulties" (i?ab?allâh) with these models: non-uniform motion and incomplete rotation. Thus he made his models mathematically equivalent to those of Ptolemy, but used solid spheres bounded by two parallel spherical surfaces instead of circles (see F.J. Ragep, Na¿ir al-Din al-¿Tûsî's memoir on astronomy, New York 1993, esp. i, 46-53, 144-9).

The 8th/14th-century Damascene astronomer Ibn al-Sb¿r (q.v.) of the most elaborate modifications to Ptolemy's models. He made the sun rotate on an epicycle, whose centre rotated on a larger epicycle moving uniformly around the earth (see V. Roberts, The solar and lunar theory of Ibn ash-Shãrâr. A pre-Copernican Copernical model, in Isi, xviii [1957], 428-32).

The sun played a crucial role in many types of observations and astronomical calculations. In particular, the time of the day and the divisions of the (solar) year were defined on the basis of the solar motion. Although the Islamic religious calendar is a lunar one, solar calendars were used intensively for agricultural and administrative purposes (see TA'R?R?R). In folk astronomy, simple arithmetical schemes for the length of the shadow cast by a man were used to determine the approximate time of the day and the prayer times (see D.A. King, A survey of medieval Islamic shadow schemes for simple time-reckoning, in Oriens, xxxii [1990], 191-249; sunrise and sunset at the equinoxes and solstices were used to establish the direction of Mecca (see MAR? 4. and MAT?L). In mathematical astronomy, extensive tables of spherical astronomical functions were used to determine the time of the day from the solar altitude and to design sophisticated sundials (see M?RT. 2. and MIZWALA).

The equation of time (w?d?l al-q?y?m bi-lay?d?h?r or w?d?l al-ram), a correction required to convert the time found from observations of the sun into mean time, was explained and tabulated in most Islamic astronomical handbooks (see Z?M?N and E.S. Kennedy, Two medieval approaches to the equation of time, in Centaurus, xxxi [1988], 1-8). Likewise, we find extensive tables for the prediction for solar and lunar eclipses (see KUSTR). In connection with such predictions, Muslim astronomers used Ptolemy's method to find the angular diameter of the sun and the solar distance from the earth from observations of eclipses. Like Ptolemy, they found a solar distance around 1,000 earth radii, more than ten times too small (see N.M. Swerdlow, Al-Batt?râ's determination of the solar distance, in Centaurus, xvii [1973], 97-105). Finally, the solar position on the ecliptic was required to predict the first visibility of the lunar crescent after new moon (see RÚY?Y AL-H?LâL). In astrology (see NÝD?M [A?RK?M ALJ.]), the sun had a large influence on the well-being of humans, animals, political affairs, etc. The characteristics attached to the sun were listed by al-Bir¿aj¿ (see R.R. Wright, The book of instruction in the elements of the art of astrology, London 1934, 240-54). The sun was assumed to change the characteristics of the moon and the planets if these were within certain small distances from the sun (ibid., 296-302). The astrological lotus [see SÄM] were calculated using the solar position on the ecliptic (ibid., 279-95). Certain astrological periods were defined in terms of the solar year (see D. Pingree, The Thousands of Abu Ma'shar, London 1968, 59-64).

On the sun in folk astronomy, see also Ch. Pellat, Le calendrier de Cordoue, Leiden 1961, and D.M. Varisco, Medieval agriculture and Islamic science, Seattle 1994. (B. van DALEN)

3. In art.

In the first centuries of Islam, the sun was mainly depicted in symbolic forms such as the sun wheel, spiral wheel, swastika, rosette and five- or six-point star. The tentative interpretation of these motifs as
solar symbols is based on their traditional meaning in the ancient Near East. At this early stage, the most important were the stylised floral devices called ǧamša in Kurʿān illumination, which marked the head of a star and the fifth or tenth day. These decorative forms developed from “tree of life” motifs, which in antiquity were closely associated with sun gods and which reached Islam in Sānāʾī and Coptic textiles.

Beginning in the 12th century A.D., however, the interest of Turkish dynasties in astrological prognostication introduced astral iconography into architecture, metalwork, ceramics and book illustrations. The sun was depicted as a disk surrounded by rays, often with human face in the centre, or as an enthroned and haloed ruler. Surrounded by an inner circle of the six planets and an outer circle of the twelve zodiac signs, the sun represents the centre of heavenly motion. Alternatively, as one of the revolving planets, it appears mounted on the back of Leo, the sign of its house, or occasionally on Aries, the sign of its exaltation. From 6th/12th-century stone reliefs of a bridge in Ḟāsur Ibn ʿUmar, the sun-lion combination was used in innumerable examples of minor arts and paintings up to the Shir-Dūr (1020/1611) madrasa in Samarkand and to the flag of Pahlavi Iran.

As a royal symbol, the sun appears adorning the sultan’s name in 7th/13th Tulūqī coins from Anatolia. It is depicted alone, with a lion, or between two lions. In the same spirit, royal shields of many periods were fashioned with a sun or some solar symbol in the centre, occasionally with the zodiacal signs around, or as a shield of the Mughul sultan Akbar. The sun formed a part of a halo in portraits of the Mughals and was depicted in the centre of their royal canopies. On the yearly pilgrimage to Mecca, other dynasties sent palanquins (mahmal [q.v.]) decorated with solar designs that symbolised their political status. A similar princely iconography underlies the composition of many metal vessels, on which an enthroned ruler replaces the sun in its cosmic setting. In other examples, mainly Mamlūk, only the ruler’s name remains, with the long letters forming a rayed disk. In architecture, the artistic evolution resulted in the unusual dome of the congregational mosque of Malātia. In the interior of this dome, a whirl of bricks creates, in the summit, a hexagram made up of the name Muḥammad. This solar symbol denotes a divine context rather than a princely one, the Muslim version of a cosmic dome, which in Christian monuments would have the Pantocrator in the summit.

In religious painting, especially during the 10th/16th century, the sun is sometimes shown reflected in a mirror or in a pool of water, symbolising the reflection of the Divine Light in the heart of the perfect Man—a prophet or a mystic lover. In other paintings, mostly profane, the sun in the upper corner serves mainly as an involved witness to dramatic events. In most instances, however, the image of the sun is confined to cosmological or astrological texts. In its astrological role it figures also in daily objects of talismanic or prophylactic nature, such as amulets, divination bowls, magical shirts and all sorts of jewelry.

**SHAMS AL-DAWLA**, Abū Ẓahir b. Fakhr al-Dawla Ḥasan, Būyid prince and ruler in Hamadhān [q.v.] 387-412/997-1021. After the death of Fakhr al-Dawla [q.v.], the amirs proclaimed as his successor in Rayy his four-year-old son Maḏjd al-Dawla [q.v.], who was also a minor. When Maḏjd al-Dawla grew up, he sought to overthrow his mother and with this object made an arrangement with the vizier al-Khaṭrī Abū ‘Alī b. ‘Alī b. al-Kāsim in 397/1006-7. But when they sought assistance from the Kurdish chief Badr b. Hasanaway, the latter set out for Rayy with Shams al-Dawla and took Maḏjd al-Dawla prisoner. The government was then given to Shams al-Dawla, and a coin of his, minted at Rayy in 397/1006-7, is extant (G.C. Miles, *The numismatic history of Rayy*, New York 1938, 180).

After he was not so pliant as Maḏjd al-Dawla, the latter was released from his prison after a year and again proclaimed ruler, while Shams al-Dawla returned to Hamadhān. After Badr had been murdered by the soldiers in 405/1014-15, Shams al-Dawla seized a portion of his territory and when the grandson of the dead man, Ẓahir b. Hilāl b. Badr, wished to dispute the possession of it, he was defeated and thrown into prison. His father Hilāl b. Badr had already been imprisoned by Sulaṭ b. al-Dawla [q.v.], but the latter released him and sent him with an army to regain the lands occupied by Shams al-Dawla. In Dhū ’l-Ka‘da 405/ April-May 1015, he came upon the enemy but the battle resulted in Hilāl’s defeat and death. After this victory, Shams al-Dawla seized the town of Rayy; Maḏjd al-Dawla and his mother took to flight, but when Shams al-Dawla wished to pursue them, his troops mutinied and forced him to return to Hamadhān, whereupon Maḏjd al-Dawla and his mother returned to Rayy. In 411/1020-1, the Turkish troops rose in Hamadhān; Shams al-Dawla appealed to Abū Ǧa’en b. Kākwāshy, governor of Isfahān, and with his help succeeded in driving the mutinous element out of the town.

One of Shams al-Dawla’s claims to fame is his connection with the great physician and philosopher Ibn Sinā [q.v.], who treated the Amir medically at Hamadhān in ca. 406/1015-16 and then became his vizier until Shams al-Dawla’s death, when he transferred to the service of the Kākkūyī ‘Alī al-Dawla in Isfahān.

(K.V. Zetterstén*)

**SHAMS AL-DIN** [see AL-DIMASHQI; Dīwān; ILENDIZ; AL-SAYDĀWI; SHAMS-I TĀREZI (1979)].

**SHAMS AL-DIN MUḤAMMAD**, the first post-Alamūt Nizārī Ismāʿīlī imām. Born in the late 640s/1240s, he was the sole surviving son of Rukn al-Dīn Khānībī (1210), the last lord of Alamūt. The youthful Shams al-Din was taken into hiding during the final months of the Nizārī state, shortly before
the surrender of Alamut to the Mongols in Dhu'l-Ka'ba 654/December 1256. He succeeded to the Nizârî imamate on the death of his father in the late spring of 655/1257.

Shams al-Dîn reportedly lived his life clandestinely in Adharbâyjân as an embroiderer, whence his nickname of Zârdû. Certain allusions in the still unpublished versified Safar-nâma of Nizârî Kuhistânî [q.v.], a contemporary Nizârî poet from Birdjân, see his Dâstân-i khawâm, ed. P. Voorhoeve, Bijdragen, iii (1943), 160-65; E. van der Grinten and J. van Berchem, “The Persian Language”, in C. Snouck Hurgronje, The Achehnese, Leiden 1906, ii, 12-13; P. Voorhoeve, In en over Nûrûdîn ar-Râdîn, in Bijdragen, civ (1943), 461-80; C. Snouck Hurgronje, The Achehnese, Leiden 1906, ii, 12-13; P. Voorhoeve, In en over Nûrûdîn ar-Râdîn, in Bijdragen, civ (1943), 461-80; C. Snouck Hurgronje, The Achehnese, Leiden 1906, ii, 12-13; P. Voorhoeve, In en over Nûrûdîn ar-Râdîn, in Bijdragen, civ (1943), 461-80; in the wider context of Islamic thought, terms such as “heterodox” and “pantheistic” no longer have a place in an historical assessment of his learning, teachings and writings, including what may be the earliest citation of the poetry of Ibn al-Fârîd (lines 355-6 from al-Târîkh al-kabîr, see van Nieuwenhuijze ed. 265) in Southeast Asian writing. Its use by a late Sufi mystic Hamza Fânsûrî [q.v.], whose work shows an affinity to an ‘Irâkî-Persian transmission of the Ibn ‘Arabî tradition as mediated by al-Dîfî.

In the literature, he is frequently referred to as a exponent of a so-called heterodox tradition of pantheistic mysticism, many scholars taking at face-value the partisan denunciation of him and his followers by Shams al-Dîn, who accused him of teaching the doctrine of wahdat al-wujûd in an absolute sense, without taking into account the concept of the grades of being as understood by adherents of the wahdat al-wujûd doctrine. In view of a deeper understanding of Ibn ‘Arabî’s ideas both in themselves and in the wider context of Islamic thought, such terms as “heterodox” and “pantheistic” no longer have a place in an historical assessment of his learning, teachings and spirituality.

SHAMS AL-DîN-I SIRADJ, historian of the Dîhil Sultanate in mediaeval Muslim India whose exact dates of birth and death are unknown but who may have been born around 751/1350-1; he certainly flourished during the later 8th/14th century.

He stemmed from a family with long traditions of service to the ruling dynasty of sultans. His father and uncle held the office of Overseer of the royal kâr-khânes or stores and workshops during the reign of Firuz Shâh Tughluq (752-90/1351-88 [q.v.]), and in his youth, Shams al-Dîn accompanied the sultan on hunting trips. His fame arises from his history, the Ta’rîkh al-Dîhil-i Khurasani, one of the few known examples of prose writings in Malay, among them Mir’ât al-mu’âminîn, a treatise on dogmatists—not all of which, thanks to al-Râdîn, are extant. Of his Arabic works, the most important is Dâstân-i haqîqî ed. by van Nieuwenhuijze, in whose dissertation (see A.H. Johns, The gift addressed to the spirit of the Prophet, Canberra 1965, 128-48; H. Kraemer, Noorder-Soematranse woorden in het Javasche mystieken, in Ququa, iv (1924), 29-33; C.A.O. van Nieuwenhuijze, Samen al-Dîn van Pasar, Leiden 1945; idem, Nûr al-Dîn al-Râdîn als beoordelaar der Wugûdi, in Bijdragen, civ (1948), 337-411; Ph. van Roswill, Râdîn’s Maleische geschript: exposé der Religies, in Bijdragen, cii (1943), 461-80; C. Snouck Hurgronje, The Achehnese, Leiden 1906, ii, 12-13; P. Voorhoeve, In en over Nûrûdîn ar-Râdîn, in Bijdragen, civi (1951), 353-68. 
of the same name, which covers the first six years of the sultan's reign, whilst Mawlahānā 'Abd al-'Azīz of Dīlū is reported to have composed a further history with the same name. There also exists an anonymous, florid and eulogistic volume on Firuz Shah written in 772/1370-1 (see Storey, i, 509), which reads like an official history. The sultan himself had his achievements inscribed on stone and affixed to the walls of the Friday Mosque of his new capital Fīrūżābād.

Shams al-Dīn 'Alī undertook the task of writing separate volumes on the Tughluids from Ghīrāth al-Dīn Tughlūk Fīrūz Shah to Muhammad b. Fīrūz Shah, reciting their virtues or ṣā'īdāt [q.v.]. Only that volume on Fīrūz Shah is extant, perhaps originally entitled Manakh-i Fīrūz Shahī, and must have been written, from an internal reference, after Timūr's invasion of the Sultanate in 801/1398, perhaps when the historian had returned to Dīlū after Nāṣir al-Dīn Mahmūd Fīrūz Shahī, Fīrūz Shahī's last descendant, had re-occupied the capital at the beginning of the 15th century A.D. It has five sections (kāms), each divided into eighteen chapters (makuddīmā) of unequal length. The last three chapters of the fifth kām (mukaddima) into eighteen chapters (makuddīmā) of unequal length. The last three chapters of the fifth kām (mukaddima) have been lost, since they do not appear in any extant ms.

Writing as he apparently did when the capital Dīlū had been devastated and the Tughlūkūt Sultanate was dissolving, Shams al-Dīn 'Alī expresses in his book a clear nostalgia for the glories of the Sultanate. He praises Fīrūz Shahī as the special recipient of divine favor. This may be a reflection of the myth that the foundation of new cities, like Fīrūżābād, and the construction of canals, water reservoirs and the encouragement of agriculture are recorded. From his own background, he was especially interested in taxation and financial topics and their interlocking with agricultural policy, and he did not fail to mention abuses which had crept into administration and army affairs. His aim seems, in fact, to have been to portray the sultan as a saintly ruler, conformable to the demands of the literary genre of Sūfī hagiography, and his reign as a golden age.

Bibliography: The surviving part of 'Alī's history was edited in the Bibl. Indica series, Calcutta 1888-91; tr. of extracts in Elliott and Dowson, History of India, iii, 269-373. Hardy, Historians of medieval India, studies in Indo-Muslim historical writing, London 1960, 40-55; Storey, i, 509-12. (I.H. Siddiqui)

SHAMS AL-MA'ĀLI [see KĀNĪS B. WUṢĀMAGĪR B. ZIYĀR].

SHAMS-I FAKHRI [see FAKHRI].

SHAMS-I KAYS, the familiar form of the name of Shams al-Dīn Muhammad b. Kāzīr, author of the oldest Persian work on poetics, al-Mu'jam fī mu'allâ źūr al-adām, which covers the full range of traditional literary scholarship. Facts about his life are only to be found in his own statements, mostly in the introduction to his sole surviving work (Mu'jam, 2-24). His native town was Rayy, where he must have been born around the beginning of the last quarter of the 12th century. For many years he lived in Transoxania, Khūzāstān and Khūzāstān. He relates an incident situated in Bukhārā and dated 601/1204-5 (Mu'jam, 456). In 614/1217-18 he was living at Marw, where he wrote the first draft of his text. When he returned to Khūzāstān Shah 'Alī al-Dīn Muhammad (596-617/1200-20) marched to the west against the caliph al-Nāṣir [q.v.], he joined the sultan's retinue. In 617/1220, during a battle with the Mongols near the fortress of Fārsāf (between Isfahān and Hamadān), he lost all his books, except the text, but was able to retrieve some parts of the manuscript of his textbook from the local peasants. About 623/1226, he took refuge in Shīrāz with Sa'd b. Zangī, the Salghurid Atabeg of Fars (599-628/1202-31), who admitted him to his court as a companion (mukarrāb). He retained this position under Sa'd's successor Abū Bakr (628-58/1231-60).

In these secure surroundings, he was able to resume the writing of his work on poetics, which had been frustrated by his constant travels and the turbulent events of the Mongol invasion. The version which he now produced was an extensive Arabic work on Arabic and Persian poetry together. However, the literati (zarrāfāt) and poets of Shīrāz did not approve of his approach because they considered a critical discussion of Persian poetry in Arabic not very useful. Giving in to this, Shams-i Kays then dealt with the two poetical traditions separately, each in its own language. Of these two books, only the Persian one has survived the fifteenth century. Only that part which deals with Persian poetry consists of two parts and a khātima. The first part contains the oldest treatment of Persian metrics still extant. The ten fundamental patterns current in Persian poetry are arranged in four circles in accordance with the system of 'arūd [q.v.] as it had been established by al-Khālidī (89 ff.; cf. Elwell-Sutton, 77-9). Remarkable, moreover, is the discussion of the metre of the rubā'ī [q.v.], which Shams-i Kays regarded as a Persian invention, tentatively attributed to Rūdakī [q.v.]; it is treated as a derivative of the hazād pattern. The more miscellaneous contents of the second part include, first, the theory of rhyme (tīm-i kāfyāt), which entails a discussion of Persian grammar as far as it is concerned with the definition of rhyming letters (204 ff., kāfyāt-i kāfyāt); attention is also given to the use of nādī and adābī, respectively the repetition of a word after or before the rhyming letter in each line, which are special features of Persian poetry (258-61). This is followed by a chapter on the embellishment of poetry (328 ff., mahbāsin-i gīr), a list of rhetorical figures in the tradition of the textbooks of badrī [q.v.]. In this section, the influence of Rashīd al-Dīn [q.v.] on Watwāt is evident, but a number of Shams's figures do not appear earlier in Persian textbooks; some can be traced back to Kudābān b. Džafar [q.v.] (cf. Storey, 63). Bonebakker, 1, 372-4 (ed. Leiden 1956, Intro. 59). The treatment of poetical genres (adāb-i gīr), which concludes this part, pays only scant attention to specifically Persian features. The khātima is devoted to the practice of poetry (gīrshār) and plagiarism (sarākāt-i gīr). The prescription for the composition of a poem at the beginning of this appendix is a translation from Ibn Tāhātabābā's ʿīrār al-ādār (ed. Cairo 1956, 4 ff.).

Shams-i Kays saw his work in the first place as a tool for literary criticism providing measures (mu'ālā) for the distinction between good and bad poetry (3, bar nakh-i nīk va bad-i kalām-i manzūm) to prose writers and poets alike. In his view, poetical technique was a creation of the Arabs, and Persian poets were merely following their example (69). Nevertheless, the Mu'jam stands out as the most important contribution to Persian literary theory, both on account of its wide scope and the quality of its discussion of detail. Among the poets dealt with, by far the most often cited is 'Abd al-'Azīz b. Anwār [q.v.], whose works appeared in the first half of the 6th/12th century. Although the book never achieved the popularity of Rashīd al-Dīn Watwāt's textbook,
its influence can be found with a number of later writers on literary theory, and a few abridgements were made (see the Introd. by Mudarris-i Radawi, pp. v-vii.xx).

**SHAMS-I TABRIZ**,

The name given to a rather enigmatic dervish who deeply influenced and transformed Djalal al-Dīn Rūmī [*q.v.*], and whose real name was, according to *Djalī*, Nafādat al-ūns, ed. Nasā'ī, 535, Shams al-Dīn Muḥammad b. 'Alī b. Malik-dād-i Tabrīz.

His prose writings, *Mokālāt*, as well as the notes by Rūmī's elder son Sulṭān Walad [*q.v.*], reveal him as a man of overwhelming spiritual power. He must have been in his forties or fifties when he reached Konya on 26 Ḍu‘l-Qa‘da 642/23 October 1244, but next to nothing about his spiritual pedigree is known. He writes that he was a disciple of Abū Bakr Sallāḥbā, a basket maker, which may point to a relation with the *futuwa* [*q.v.*] (thus Golparbā). A Kubrāwī *ṣīṣa* is sometimes mentioned, and the frequent, very positive use of the term *kalāndar* in Rūmī's poetry might indicate that Shams was close to the kalāndars. In his search for someone to understand him, Shams wandered through the world, always staying in caravansarays, not in religious establishments. In Trāk 7 he met Awhad al-Dīn-i Kirmānī, whose claim to see the reflection of the moon in a lake when looking at unbearded youths, incited him to the well-known *pīr* [*cf. SHAAMS AL-DIN MUHAMMAD*I].

For some months he stayed in Rūmī's house, married to a girl from the household, who died a few days before he disappeared (5 Shab‘ān 645/5 December 1247). Most likely he was murdered with the connivance of Rūmī's younger son; his body was thrown into a nearby well besides which the *makām-i Shams* was later built. Rūmī probably sensed what had happened, yet did not believe in the death of the "eternally radiant Sun" and went to Syria to search for him until he realised that Shams lived in him; and he signed his poetry with his name. His later friends, Šāhlāl al-Dīn Zarkūb and Ḥusām al-Dīn Čelebi were nothing but "reflections" of the "Sun". His *nwat*: *shafīr* shows the close connection between Shams and the Prophet, from whom he claimed to have received "the cloak of companionship". His love for the Prophet to the exclusion of all learned books, and his aversion from philosophy, is echoed in Rūmī's poetry.

Shams claimed to have reached the highest possible rank, that of the third degree of the beloved ones, madā'ī, or "the knb of the beloved ones", and Rūmī's descriptions of Shams are sometimes close to his "deification".

Claims have been made that Shams was an ʿImāmī, all the more as a mausoleum of Shams-i Tabriz is found in Multān. This (Indian) Shams was a contemporay of the Suhrawardī master Baha al-Dīn Zakariya (d. 1267), and the miracles ascribed to him are as outspoken and as scaring displays of tremendous power as those of Ṭawlaīn Rūmī's Shams; however, it is likely that the Multān Shams may be identical with an ʿImāmī *pīr* [*cf. SHAAMS AL-DIN MUHAMMAD*I].

But whoever Shams-i Tabriz may have been (and that he was a real person is proven by his enormous derwish hat in the museum in Konya), the world owes to his inspiration the collection of the most fiery mystical love lyrics, the *Maʿān-i Shams-i Tabriz* by Rūmī, and without his influence Rūmī's *Mathnawi* would not have been composed either, for he was the inspiring power behind every word that Rūmī wrote.

(ANNE-MARIE SCHIMMEL)

**SHAMSA**, a jewel used by the ʿAbbāsid and Fatimid [*q.v.*] caliphs as one of the insignia of kingship. According to the description of the Fatimid *gamsa*, given by Ibn Zūlūk (quoted by al-Maḥrīzī, *Ittiḥād al-ḥanafīs*, i, 140-2), it was not a sunshade, as it has been guessed (de Goeje, in al-Ṭabarī, *Glossary*, p. ccxcvii), but a kind of suspended crown, made out of gold or silver, studded with pearls and precious stones, and hoisted up by the aid of a chain. The *gamsa*, therefore, is not to be confused with the *mizalla* [*q.v.*] or sunshade which belonged also to the royal insignia. The model of the *gamsa* was probably the crown suspended above the head of the Sāsānid king (al-Ṭabarī, i, 946). It served for the ʿAbbāsid caliphs as a symbol of legitimate rule (al-Ṭabarī, iii, 1553-4) and represented the authority of the absent caliph during the Pilgrimage to Mecca, where it was suspended in front of the *Kaʿba* during the *hajj*.

(ANNEMARIE SCHIMMEL)
ceremonies. The 'Abbasid shamsa was endowed by the caliph al-Mutawakkil (232-47/847-61) and studded with precious stones by al-Mu'azzam (279-89/892-902); in gold, 20,000 dirhams (61.6 kg) of silver, and 3,600 precious stones (al-Makrufz, ii, 294). It was taken by force from the palace of Cairo at the day of 'Arafa in Dhu '1-Hijādja, was for the possession of Djawhar ibn el-Munshid (d. 1049/1639-40), and the latter accepted it. This preponderance of the successors of Kara Ahmad Shams al-Dīn in the Ottoman capital, particularly in the scholarly circles which were in the majority of them emerged—favoured the expansion of the network of the Shamsiyya. This was consolidated in Anatolia (on the eastern side, the cradle of the brotherhood, but also on the western side—Ağlaschir, Anamis, Mytilene and Çesme—as well as in central Anatolia (especially at Konya and Safranbolu), and in the Middle East (Damascus, Cyprus, Jerusalem, Cairo and Mecca). But it also extended into the provinces of Thrace and Macedonia (especially in the eastern region—in particular, in Gelibolu, Gümülcine/Komotini, Hava, Edirne, Yambol, Filibe/Plovdiv, Lofer/Lovec, Varna, Silistra/Silistra, Dobrin/Tolbuhin and Kefke—as well as in Buda and the Hungarian frontier zones) and as far as the Crimea. In Istanbul itself, the establishments directed by Shamsiyya flourished, in particular during the period of the nephew and successor of 'Abd al-Majid Siwasi, 'Abd al-Ahad Nuri Siwasi (d. 1651), who contributed so energetically to the progress of this branch of the Khalwatiyya that it became known by the name of Shamsiyya-Siwasıya or simply Siwasıya. At that time, the diffusion of the brotherhood generally proceeded according to the following pattern: arrival in Istanbul of a young student intent on pursuing his studies in the major metropolitans madrasas, affiliation to the taşka, and return to his native land with the object of propagating the latter. Despite its rapid expansion, the network remained relatively centralised, its heart being the tekke of Shaykh Yawsı—renamed Siwasi Tekkesi—situated close to the Selimiye mosque in Istanbul, and administered by the descendants of the Shaykh 'Abd al-Majid. From the beginning of the 18th century, the brotherhood went into decline, to disappear almost totally in the 19th century, often, it seems, to the advantage of other branches of the Khalwatiyya, such as the Sunnibyya and the Shabibiyya [q.v.]. In Istanbul, during the final decades of the Ottoman Empire, there were still representatives of the Shamsiyya administering a tekke in the Taşkassap quarter. According to Dähiker Şükrü, the tekke of Zimni sherif had as its şeykh a certain Mehmed Kasım al-Dağhistanı al-Khalwati al-Shemsi (d. 1328/1910), who was succeeded by his son, Yusuf Diva of al-Din. But S. Vicedomi makes it clear that, although these şeyhqs possessed a sildız linking them to 'Abd al-Ahad Nuri Siwasi, they had no tekke, and this tekke was as an establishment of the Nakshakebdinya. Today, this branch of the Khalwatiyya seems to have disappeared.
As regards the doctrine and the practices of the Shamsiya-Shandl, they were shared by the majority of the Khalwatis; the practice of spiritual retreat (hikma [g.]) and the initiation of the local movement (shams al-waqil; al-salat, al-adab) being two central elements. The Shamsiya-Shandl ḍikr was a ḍikr dewānī, with a rotating movement in a circle formed by the dervishes. ‘Abd al-Aḥad Nārī is a treatise author defending this practice, entitled Riāla fi ḍikra dewarāni ʾl-ṣāyya. As for the adoption of the doctrine of the oneness of being (wahdat al-waqil), cf. O. Tüürer, Türk musavvif ve şairi Muhammed Nazmi, which also provides further details regarding the teaching of one another of the brotherhood. The characteristic ḍikr of the Shamsiya-Shandl ḍikra—comprising forty separate pieces, as with the majority of the Khalwatis—was made of yellow fabric, half of it embroidered with Kufic script, surmounted by a red button and illuminated by a green turban.

SHAMSUN, the Biblical Samson of Judges, xii-xvi (12th century B.C. according to Biblical chronology), unmentioned in the Kurân. Al-Tabarî, i, 793-5, locates him historically in the Christian era, just before St. George (Ǧurḍîrîn); al-Thaʿlabî, ʿArāʾis al-mudâfi̇la, Cairo n.d., 392-3, situates him just after St. George and understands him to have been a Christian. The chronology is probably the result of the use of Christian sources for the story. The story of Samson was very popular in Christian circles, with Samson proclaiming an exemplar of victorious faith in Hebr. xi, 32, and, later, an allegorical figure of Christ. Samson’s status as a Nazirite (in Aramaic, nāḏāṭī or nāḏāṭī [see nāḏāṭ]) may also have suggested a Christian connection to some Muslims because of the similarity of the name of Samson’s vow (see Num. vi, 2-8) and the name Nazareth (al-Nāsirîn), the home town of Jesus, and Naṣrâr [g.], the Kurʾânic term for Christians (the linking of the names was also a tendency in Christian allegorical interpretation of the story). The individuality of Samson (contrary to the general Biblical picture of judges who lead the community into battle) becomes the focus of the Muslim development of the prophetic model in Samson. According to al-Tabarî’s information, Samson was born into a community of unbelievers but dedicated his life to God, ever fighting the idolaters. He was aided by God, specifically by being given water during battles (see Judges xv, 19). His opponents realised that they would only overcome him through his wife whom they then bribed. She tested his strength twice and subsequently nagged him until he finally revealed that he could only be subdued by his uncut hair. She bound him with his hair while he was sleeping and, when he awoke, his enemies came, mutilated his body and took him away, powerless, to be paraded in front of the enemy. There, Samson pulled the supports down, killing all the people (including his wife, according to al-Thaʿlabî, but perhaps not himself).

The purified presentation of Samson is in keeping with the Christian understanding rather than the Biblical story: Samson was a great fighter and man of faith who was betrayed by his wife. There is no lust, no prostitution, and no self-destruction within the story.

Bibliography: Given in the article. (A. Rippîn)

SHAMWIİL (also ASJAMIWIİL/ASJAMIWIİL, SHAMWIİL, SAMWIİL), the Samuel of Biblical history (I Sam.-xxviii), perhaps referred to in Kurân, II, 246-7, in connection with the appointment of Saul see [Yâlṭîr], as king over Israel (although some exegetes see the reference to be to Joshua (Yūṣûf), the “prophet after Moses”). The form of the name Shamwiıl is closer than Shamwil to the new Samwil; the name “Samwil” may be the result of some confusion between the names Simeon (Hebrew Shemīon; see Gen. xxix, 33, etc.) and Samuel, but that is unclear and confused further by attempts to incorporate etymologies of the names into the narratives. Al-Tabarî, i, 547-54, interchanges the spelling of the name throughout his account. Abû Râfaʾ al-Furâṣî, Bad al-ʾalkît wa-kīsâ al-anbâhîn, in R.G. KHOURY, “Les legèndes prophétique dans l’Islam”, Wiesbaden 1976, 80-4, however, recounts separate stories of Shamīn and Ashamwil (with the story of ʿAyālūk—probably Eli, who is called “Alt”, “Ayîl” and “Ayîl in al-Tabarî—being placed in between the two; cf. I Sam. i). H. Schwarzbain, Biblical and extra-biblical legends in Islamic folk-literature, Beiträge zur Sprach- und Kulturgeschichte des Orients, Bd. 30, Walldorf-Hessen 1982, 64, suggests that Sham’în here should be understood as Shamîn [g.], i.e. Samson, but the story is barely recognisable as speaking of him. Al-Kisâʾī, Kīsâ al-anbâhî (ed. Eisenberg, Leiden 1923, 250-1, and al-Thaʿlabî, ʿArāʾis al-mudâfi̇la, Cairo n.d., 232-9, use the name Shamwil consistently.

The stories of Samuel transmitted in the Islamic context concentrate on his birth and his selection of Saul; other elements of his nomination and career as a prophet are elaborated so as to fit within the common pattern of Muslim prophet stories, especially in his struggles with the unbelievers. Samuel is remembered today at his tomb at al-Naḥāf Samwîl near Jerusalem, where there has been a mosque since the 18th century.

The children of Israel, Albany, N.Y. 1991, 129-35, esp. the notes. (A. Rippîn)

SHANDI, a town in the Republic of the Sudan, on the east bank of the Nile, about 160 km/100 miles north-east of Khartum. Population, in 1956, 11,500; in 1980, 24,000; and in 1995 probably more than 30,000. The origins and early history of Shandl are unknown. It is situated in the central area of the ancient Kingdom of Meroë. Modern Shandi has been one of the main towns of the Dīalāʾiyûn [g.], who since at least the 16th century until 1821 maintained a small kingdom in the area. However, the town of Shandl does not appear in the historical sources before the 18th century, and then as the seat of the king (makk) and as an important trading centre.
SHANDI — AL-SHANFARA
Major caravan routes have crossed the area of Shandi
since ancient times, and trade was an important factor
in its foundation. Between 1770 and 1820 the town
witnessed a remarkable growth which was only broken
by the Egyptian invasion in 1820-1, under the command of Isma'fl Pasha [q.v.], the son of Muhammad
'All Pasha [q.v.]. Its population was then estimated at
about 5-7,000 people living in 8-900 houses. A revolt
against the invaders following the murder in Shandf
of Isma'fl Pasha in the autumn of 1822, caused the
town to be destroyed and a large part of its population
to be dispersed. Subsequently, the Egyptians moved
the district administration across the Nile to the sistertown of al-Matamma [q.v.], and Shandl did not recover
its former prosperity before the present century. In
the spring of 1884 the people of Shandf joined the
Mahdist revolt against the Egyptians [see AL-MAHDIYYA] .
By that time, the population numbered about 2,000,
a figure which was reduced to about 500 at the turn
of the century.
During the Anglo-Egyptian Condominium (18991956) and thereafter, Shandi grew into a prosperous
town. Its location in a rich agricultural area, its position
on the north-south railway, and its relative proximity
to Khartum, are all factors which have stimulated the
town's growth. Agricultural expansion in the area
based on pump irrigation started early in this century,
and local produce like grain, vegetables and fruits is
exported through Shandi. Local trades consist of
carpentry, tailoring, basketry, and cotton weaving.
Today, it is also an administrative and educational
centre, and the seat of a military garrison.

AL-SHANFARA "he who has large lips", is the
nickname, perhaps even the name (al-Zamakhsharf,
introd., 8; Sharif, 15), of one of the most famous
pre-Islamic su'luk poets. A great deal of confusion
surrounds the man and his work; for this reason it
is appropriate to handle the information concerning
him with the greatest caution.
1. Life.
Details relating to the life of al-Shanfara are sparse,
contradictory and marked by an anecdotal quality
much more pronounced than is the case with all the
other pre-Islamic poets. His name is reportedly Thabit
('Amr) b. Malik, of al-Iwas b. al-Hadjr (al-Ghawth)
b. al-Aws, a clan of the al-Harith b. RabVa, a subtribe of the al-Hinw (Azd) (Ibn Hablb, Asmd3 almughtdlin, in Nawddir al-makhtutdt, ii, 231). This
genealogy is problematical, since it renders implausible

301

the biography of the poet as it is currently accepted.
(1) According to a tradition related by al-MuJarridj
al-Sadusf and retained by Abu cAmr al-Shaybam,
al-Shanfara was allegedly captured at a very early age
by the Banu Shababa b. Fahm b. £Amr of the Kays
b. 'Aylan; he remained in a state of semi-captivity
until his liberation following an exchange of prisoners
between the Shababa and the Salaman b. Mufridj b.
Malik b. Zahran, a tribe of which the eponym was
said to be Nasr b. al-Azd. He was adopted by a
member of the latter tribe; according to some sources,
he quarrelled with the daughter of the master of the
house; according to another version, he fell in love
with the girl, al-Ku'sus (Diwdn, 53), who rejected him
as unworthy of her on account of his humble ancestry
(al-Mufaddaliyydt, ed. Lyall, 195-6; Hamdsa, Bonn 1828,
244). Offended, al-Shanfara abandoned his adoptive
clan, returned to the Banu Shababa, his erstwhile captors, and swore to avenge himself on the Salaman by
killing a hundred of them. This account is invalidated
by a number of implausibilities: (a) the efforts of the
Salaman in seeking to liberate a man whose bloodlinks with them were distant and weak, if not nonexistent; (b) the genealogical reservations of the young
Salamaniyya woman: al-Hinw b. al-Azd (eponymous
ancestor of al-Shanfara) was in no way inferior in
terms of eminence to his brother Nasr b. al-Azd
(eponymous ancestor of the Salaman); (c) resentment
as justification for the return of a captive to his former
jailers. However, it is precisely this tradition which
was subsequently taken up by the other sources as
well as by modern research (F. Gabrieli, Ta'abbata
Sharran, Shanfard, Khalaf al-Ahmar, in Atti della Accademia
Nazionale dei Lincei, cccxliii (1946), 1, 41-2; Sharif, 16;
Yusuf Khalff, 332; Safadf and Hawf, Mawsu'at al-shicr
al-cArabi, i, zl-Shi'r al-d^dhili, Beirut 1974, 61; Brockelmann, S I, 52-3; GAS, ii, 133-4; Him!, 112).
(2) A genealogical text of Ibn Hazm (d. 456/1064)
permits the presentation of a biography of the poet
which corresponds more closely to reality; it is stated
there: "To the Malik b. Zahran belong the Banu
Salaman b. Mufridj b. Malik b. Zahran, a tribe (batn]
to which the outlaw al-Shanfara belonged; he attacked
his own kinsmen incessantly, because a fellow-tribesman
of theirs had murdered his father and they refused
to apply in his case the law of retaliation; he allied
himself with the Banu [Shababa b.] Fahm b. 'Amr
b. Kays b. 'Aylan b. Mudar who were his maternal
uncles" (Ibn Hazm, D}amharat ansdb al-cArab, Cairo
1971, 386).
This text, with its wealth of information, is
supported by traditions which circulated in the 2nd/8th
century (al-Mufaddaliyydt, 196, § 1; Aghdni, xxi, 137-8),
and throws new light on them, in particular on another
tradition of al-Shaybamw in this version, the mother
of al-Shanfara returns to her own people, accompanied
by her two young sons, after the assassination of her
husband and the refusal of the tribe to avenge the
blood which has been shed; the younger of the two
sons dies soon afterwards. The poet grows up among
his maternal uncles, the Shababa b. Fahm. On coming
of age, he exacts vengeance by killing SalamanTs,
including the murderer of his father, Haram b. Djabir
al-Salamanf, although he is in a state of ihrdm at
Mina (Aghdni, xxi, Leiden 1888, 137).
He then becomes a su'luk, on amicable terms with
his maternal uncle, Ta'abbata Sharran and with 'Amr
b. Barrak (Hifnf, 112). In dangerous circumstances,
he shows great courage; his prowess as a runner is
proverbial (Ibn Sa'Id al-Andalusf, Nashwat al-tarab ft
ta'rikh ajdhiliyyat al-'Arab, 'Amman 1962, i, 434; alRaghib af-Isfahanf, Maajma' al-baldgha, 'Amman 1406/


problem. This work makes it possible to ratify, historically and on the basis of an ancient source, the arguments of the partisans of the authenticity of the Lamiyya. The author of this work, Ibn Abî Tahir Tayîfûr (d. 280/893), is a chronicler and an anthologist of exemplary integrity. Under the heading of "unique and incomparable kasîdas (al-kasîdât al-mufradât alatâ ma'd al-lakhā") he quotes in full the Lamiyya of al-Shanfara (al-Manâthir wa'l-manzûm, Beirut 1977, 69; the Lamiyya in its entirety, 69-79) which was recited to him by Abu '1-Minhâl 'Uyayna b. 'Abd al-Rahmân al-Muhallâbi, a transmitter considered reliable (Fâhirî, 157; Yâkîn, 'Udâhi 250-1) and a contemporary of Khalaf al-Åhmar, the presumed author of the poem, in the view of those who deny paternity to the Azdî poet. It may thus be affirmed that in the 2nd/8th century, in the lifetime of Khalaf, the transmitters were well acquainted with the kasîda and attributed it to al-Shanfara.

This ode, which has the rhythm of a beating drum, turns its back on the poetic conventions of the Lamiyya. It reflects a purely individual register and constitutes, thereby, a negation of tribal values (vv. 1-5). The self stresses its primacy in each verse by means of incessant use of pronouns and verbs in the first person singular (more than 30 instances in the first 50 verses); in parallel, an absolute rejection of the tribe is attested here, accompanied by an affirmation of its superiority over the clan as such. In fact, mutual relations are conceived in a multi-dimensional approach. The disowned tribe (v. 1) reacts; the disruptive element must be removed; the latter, feeling under threat of elimination, engages in conflict which ends in the triumph of the individual. He reigns over the desert dominating the malignant creatures of the night, defeating the wolf (vv. 27-35) and the sand grouse which he overtakes in the race for water (vv. 36-41). But this is a short-lived triumph; the poet has a very clear vision of this, and knows that in the end Umûm Kasîl (death) will claim him; and he asks not to be buried at all. Finally, what is observed is a total disintegration of the individual and a re-unification of the tribe. In the context of form, al-Shanfara also departs from convention; he addresses his themes directly, leaving aside the nasîb and the camel-driving section.

(b) The Ta'îyya

The Ta'îyya begins with a ghazal, a genuine love poem which has aroused the admiration of scholars (see Bibl.). Only G. Jacob, Schanfarber-Studien, i, passim; and idem, Aus Schanfarbas Dicären, Berlin 1914, introd., and Brockelmann were convinced of its authenticity, basing their conclusions on the results of internal analysis, such as the use of Yemeni terms, the mention of cows, which do not figure at all in archaic poetry, and symbolic description. S. Stetkevych, 125-6, reckons that the poem is marked by a series of signs and symbols which render incontrovertible its attribution to al-Shanfara: the relations of the poet with his own people, the Azdî, constitute an antidote to the normal affiliation of a tribesman to his tribe. In other words, this ode constitutes the typical process of regret for the past, an essential characteristic of the poetry of al-Shanfara.

The publication of a section of the K. al-Mânthir wa'l-manzûm in 1977 has cast a new light on this
and sympathy on the part of the warrior towards his companions. It is appropriate to note, in this connection, that al-Shanfarā exploits a tendency of the poetry of the šālās in describing weapons in lavish detail, thus seizing himself apart from the poetry of war; in the latter, substantive adjectives are used to denote weapons (Ibn Sallām, K. al-Shāhī, Beirut 1408/1988, where this tendency is clearly visible); according to a regular pattern, and with little variation, the poet confines himself to mentioning arms, rather than describing them. The only descriptions worthy of the name in pre-Islamic poetry are found among the šālās; al-Shanfarā stands apart on his description of weapons in opposition to the latter.

**SHANTI-ZADE MÜMEN** Ağa' Al-Ḥāfez Efendi (1769 or 1771-1826), Ottoman physician, historian and polymath. Son of the kâfif Shanti-zade Sâdîk Melyem Efendi, he pursued a religious career together with a medical education. In 1793-4 Shanti-zade attained the rank of miderris, in 1814-15 that of kâfif of Eypur, and in October 1821 that of Mollâ of Mecca and inspector of wakâfī. Shanti-zade suffered from the jealousy of the hekim-bâghi Behzît Efendi [see NASIR MÜSTAFĂ EFDENI] and never himself became chief physician. Meanwhile, after the wakâfî-nâsîk ‘Arîn [q.v.] died, Shanti-zade was appointed official historiographer (November-December 1819). As a leader in the Beshiktash Scientific Society, Shanti-zade was suspected of Bektaşi connections and, when the Janissaries were dispersed and their population considerably decreased up to the early 20th century, it is reported that a great number of the troops were converted to Islam (Râghîd al-Dîn). Under the Ming dynasty which overthrew the Yuan, Shansi Muslims were naturalised as Chinese Muslims (Hui-min). In April 1862, when a group of Taiping rebels invaded southern Shansi from Sichuan, the Ch’ing authorities who tried to attack them happened to mishandle local Muslims, between whom and the local Chinese in Shansi there had long been antagonism. At first, Muslims at Hua-chou broke out against local Chinese inhabitants, and Muslim rebellion spread over various places along the Wei River, extending to Kansu province. The Ch’ing authorities managed to suppress those Muslim rebels, and even massacred a great mass of Shansi Muslims. Consequently, they were dispersed and their population considerably decreased up to the early 20th century.

Shansi Muslims mostly belong to the Hanafī rite like other Chinese Muslims. Originally, they had about 300 mosques in Shansi but they have now 118 mosques, large and small, the most prestigious and
archaic one being His Ta-sst (West Large Mosque) at His-an. Shansi Muslims have been and are engaged in retail trade, restaurant and inn-keeping, cattle-breeding, fur-trading, farming and transport. His-an has been historically a centre of Chinese Muslim culture and learning in Shansi since Ming times. Shansi Muslims now co-exist with Han Chinese under the minority peoples' policy of Communist China, as is the case with other provinces.

**SHANT MANKASH,** the modern Simancas, a village of the Spanish province of Valladolid, some 10 km/6 miles from that town, on the Douro, known above all for its castle, in which the state archives of Castile, mainly for the 16th and 17th centuries, are preserved.

The site, situated on a bluff commandung a ford over the Douro, was occupied in Roman and Visigothic times, and "repopulated" by Alfonso III, King of León, together with other towns along the line of that River (Zamora, Toro and Dueñas), probably in the last years of the 9th century, when the Christians were able to profit from the feeble state into which the amirate of Cordova had been plunged. After the accession of 'Abd al-Rahmân III and the "restoration" of the Umayyad caliphate, the state of al-Andalus sought to regain the lost territory to the north of the Meseta.

In 927/939 the caliph personally led an expedition, the ghazwat al-hudra, especially aimed at the town of Sammûra/Zamora. But on 11-12 Shawâd/8-9 August he suffered a check before Simancas, followed by another defeat, in the course of his withdrawal, that of al-Khandak/Alhandega. This defeat was apparently to be explained by the treachery of certain officers in the caliphal army, marked by the crucifixion of 300 of them after the return to Cordova. There has been much discussion on how al-Khandak ("the trench", or a place thus named) should be understood and on the place in question, and consequently whether there were two successive battles (Simancas and Alhandega) or just one (Simancas, finishing in the trench). Dozy's theory, on the slender basis of the opinion of Spanish authors of the 16th century (cf. his Recherches, i, 161), placed al-Khandak to the west of Simancas, near Salamanca, towards the river Alhandega, an affluent of the Tormes, but this was opposed by M. Gómez Moreno, who placed it in the opposite direction, at Albendiego, in the modern province of Guadalajara, on the Roman road from Onda to Siguenza, and by Lévi-Provençal who, after having followed Dozy in his EP art. Simancas, in 1950 thought, relying on the texts of Ibn al-Khâtib and al-Himyarî which he had published, that the reference was to the trench into which Ramiro II's troops hurled down troops of 'Abd al-Rahmân al-Nâşîr at the end of the battle of Simancas.

Dozy, however, seems to have been raised since the publication of vol. v of Ibn Hayyân's Muktabis, reproducing the narrative of 'Isa al-Râzi, which agrees on this point with the most ancient Christian source, the Anales Castellanos Primeros, and since P. Chalmêta's article Simancas y Alhandega, in Hispania, xxxvi/133 (1976), 339-444. There could well have been two distinct battles separated by some fifteen days, with the second one to be situated towards the east, in the confused, mountainous zone separating the upper valley of the Douro from that of the Henares, even if a completely satisfying solution of its exact localisation has not yet been found. There is a similar divergence regarding the seriousness, and the long-term significance, of the caliphal defeat. Chalmêta reduces the event's significance, pace the Spanish historical tradition, and it is nevertheless true that 'Abd al-Rahmân III led personally two battles in Christian territory after this one, in which he was almost captured, and that the military reforms of al-Mansûr, with long-term effects in the period of the fall of the caliphate, responded, at least in part, to the lack of confidence which could be accorded to the officers of the qâdîm, as appeared on the Simancas battlefield.

The abortive attempt of 'Abd al-Rahmân III towards the Meseta del Norte was taken up later, with greater tenacity, by Ibn Abî ʿAmir al-Mansûr. In particular, in his eighteenth campaign (373/983), he captured and destroyed Simancas. But if the ḥidîb envisaged a policy of reconquest, and not merely one of devastation, in these regions, and had the intention to hold at least at the line of the Douro, with a garrison and a governor at Sammûra/Zamora, this policy collapsed with the crisis of the caliphate of Cordova in 390/999.

**SHANT YÂKUB,** the Arabic form of the place name St. James of Compostella, Span. Santiago de Compostela, at the present time in the province
of La Coruña, in Galicia.

The “discovery” in the first half of the 9th century of the grave of the Apostle St. James the Greater, who had allegedly come to evangelise the Iberian Peninsula, and the subsequent shrine, was said to have been brought, after his death in Jerusalem, to Galicia, was the origin of the town’s development and of the pilgrimage thither, its church being described by Ibn 'Idhārī as the equivalent, for the Christians, of the Ka'ba for the Muslims.

In 837/997 Ibn 'Abī 'Amīr al-Mansūr led against the shrine his 48th campaign, the most famous one, for which Ibn 'Idhārī has transmitted a fairly detailed account, probably stemming from an official bulletin according to the victory. The expedition left Cordova, passed through Coria and then through the north of modern Portugal, reaching its destination after crossing difficult mountainous regions. It was supported by a fleet which had left the great arsenal of Kasr Abf, and by the rallying to it of troops, of the lands through which it passed. Having arrived at Santiago on 2 Sha'ban/10 August, it found the town abandoned by its inhabitants; the army then destroyed it completely in the course of the following week, including the shrine, but not the tomb itself, respected on al-Mansūr’s express orders. Part of the army pushed on northwards to the outskirts of La Coruña, but the mass of troops beat a retreat and returned to Cordova, after having once more devastated the lands of the king of León but not those of the counts allied to the Muslims. According to the Christian sources, the Muslim army is said to have suffered from dysentery on its retreat.

The character of this expedition, more a demonstration of force to impress and humiliate the Christian enemy, but also to show them the possibility of a rally of forces, than a real operation for conquest, is further illustrated by the episode of the gates and bells of the shrine, brought to Cordova on the backs of captured Christians, to be placed in the roof or for service as lamps in the Great Mosque there; an episode recounted by other sources, Muslim as well as Christian (Ibn Khaldūn, al-Makkarf, Jiménez de Rada and Lucas of Tuy).

It nevertheless seems that the ‘Amrid sacking only momentarily slowed up the growth of Santiago de Compostela; Bermudo II, king of León (d. 999) immediately began rebuilding it. The building of the Romanesque basilica began in 1075.
received the submission of two of the Berber Dhu '1-Nunids, Yahya b. Miisa ... of the Muslim community, shown by at least a congregational mosque, a mosque of the quarter and a sort of assembly

Z. A. Sultan, *Kuwayt al-Nukatfi Kitdb Sibawayh* (ed. Z. A. Sultan, *Kuwayt al-Nukatfi Kitdb Sibawayh*);
Maritime activity increased in the 6th/12th century through the efforts of the Banu Hārūn, who, like other Taifas of the coastlands, had fleets and dockyards supplied by the plantations of pine on the islands and in the hinterland of the town. Its site being a lagoon, favoured fishing, an activity stimulated by the pilgrimage, and the cultivation of figs and grapes and production of oil had a commercial orientation towards Al-Andalus, the Maghrib and Egypt.

The town itself faced both landwards and seawards, being “built on the shores of the ocean, with its walls bathed by the waves of the high tide” (al-Idrīsī, *Opus geographicum*, Naples-Rome 1975, text 543, tr. Dossy and Ch. de Goeje, *Descripción de l’África y de l’Espagne*, repr. Leiden 1968, 217). The mediaeval area, largely rebuilt by the Christians in the 13th century, have retained, to the north-west of the town, traces of a gate topped by a Norman arch, leading one to think that the internal area of about 9.5 ha corresponds to the Islamic madina (B. Pavon Maldonado, *Ciudades y fortalezas musulmanas. Cronicas de viajes por el sur de Portugal*, in *Cuadernos de Arte y Arqueología*, v [Madrid 1995], 71-9). The sites of the cathedral, built two years after the reconquest of the town, and the fortress, protecting access to the seashore, correspond respectively to the sites of the Great Mosque and the Muslim kasaba.

In 1252 the town was placed under the protection of Alfonso X of Castile, protector of the Muslim ruler Ibn Mahfūz. Once it returned to Portuguese hands in 1266, endowed with charters, it speedily resumed its maritime role.

**SHANTAMARIYYAT AL-SHARK**, a name often confused in the sources with Shantamarīya, which corresponds to the depopulated modern place name Santaver in Cuenca province. Sh. al-Shark (thus to distinguish it from Sh. al-Gharb) corresponds to modern Albarracín, a small town 45 km/28 miles from Teruel, in the province of the same name in Aragon. The town derives its present name from the Hwawara Berber family of the Banū Rāzīn [q.v.], who were established at an unknown date in the Sahla, the fertile district around Albarracín. The supposed ancestor Rāziql-Burnāsi is said to have come with the Hwawara, burned and was then given land at Cordova. His alleged descendants (since Ibn Hazm seems to deny the connection) governed the Sahla with more or less loyalty to the Umayyads. After a revolt of the Sahla in 346/957-8 headed by Marwān b. Hudhāyli b. Rāzīn, the family submitted to ‘Abd al-Malik thirty years after the reconquest of the town, and the importance was conferred upon it by Alfonso X of Castile, protector of the Muslim ruler Ibn Mahfūz. Once it returned to Portuguese hands in 1266, endowed with charters, it speedily resumed its maritime role.

After Zallāka (479/1086), he ceased paying tribute to Castile-León, but three years later had to accord it to the Cid. In 1092 he annexed Murviedro (Sagonta), and concluded a treaty of friendly neutrality with the Cid. When the latter besieged Valencia, ‘Abd al-Malik tried to ally, early in 1093, with the king of Aragon in order to help him occupy the town. But the Cid, warned by the Aragonese, invaded ‘Abd al-Malik’s lands, and forced him to help in the siege of Valencia, which fell in June 1094. He then allied with the Almoravids who came to besiege Valencia (487/ autumn 1094), and took part in the battle of Cuarte, from which he fled. When ‘Abd al-Malik died in 496/1103, his son Husam al-Dawla Yahyā succeeded him. But with Valencia now in the hands of the Almoravids, the governor Abū ‘Abd Allāh Ibn Ǧāfīma deposed Yahyā and annexed his state (497/1104).

Ca. 1170 Albarracín passed into Christian control, either, according to the traditional account, handed over by Ibn Marandišā [g.v.] Lobo or Lope to the lord of Navarre, Pedro Ruiz de Azagra, or, according to J.M. Lacarra, by a Navarrese conquest. In 1172 the bishopric of Albarracín was set up, but—reflecting the lack of knowledge of the old ecclesiastical divisions and the probable disappearance by now of the Mozarabs of the district—the bishop was first given the title of the ancient bishopric of Arcavica (*Arcavicense*), then—afterwards as *Segobriga*, with the titles ‘Izz al-Dawla and Dhu ‘l-Maǧdāyan, Sulaymān al-Mustā'n, the “caliph of the Berbers”, confirmed him in his lands, but also reproached him, probably for not being able to intervene in his favour. From the next year onwards, Hudhāyli built, or rebuilt, his little capital, Shantamarīya, whose name, hitherto unknown, since only Sahla is found, suggests the presence, otherwise imperfectly known, of a Mozarab community. Hudhāyli maintained himself, staying apart from the wars of the times, enjoyed the good graces of the Muslim lords who coveted his territories. The sources praise his good qualities and the prosperity he brought to his principality.

When in 436/1044-5 he died after a reign of over 30 years, his son ‘Abd al-Malik, called in his father’s life time Husam al-Dawla and then subsequently Djabr al-Dawla, al-Ḥaǧīǧ Dhu ‘l-Riṣāyatayn, succeeded him, with an even longer reign of 58 solar years. The sources regard him harshly, but the times were certainly now less propitious. He may possibly early have suffered attacks from Castile, though the notice of Ibn al-Kardābis that Ferdinand (1037-65) is said to have taken Shantamarīya, *balad Ibn Rāzīn*, is unconfirmed elsewhere. After the capture of Toledo by Alfonso VI (478/1085), he had to accept with a good grace the insults of the Christian king, who sent him a monkey in exchange for his presents. His vacillating policy reveals the feebleness of his miniature principality.

In 1096 an old man, ‘Abd al-Malik, called Ibn al-Qasim, son of ‘Abd al-Malik’s grandson, was deposed by the Mozarabs, and the title of the town was confirmed upon Segobriga (*Segobricense*). Henceforth, the region formed a petty independent state, under Christian lords, the Azagra
and then the Laras, until Pedro III of Aragon's conquest of 1284, though Albarcín was not definitely incorporated under the Aragonese crown till 1370. During this period, the presence of Mudéjars is as hypothetical as that of Mozarabs in the preceding one. It would appear, rather, that the region's Muslim population had been evacuated for strategic reasons, to the proximity of Valencia, under Muslim control until 1238, and that the Mudéjar presence persisted at the end of the mediaeval period results, as at Teruel, from the establishment there of Muslims from other Christian zones and former captives, settled for economic reasons.

Of Appx.), Santarín is said to have benefited, together with Cóimbra, from a treaty of capitulation which guaranteed a considerable autonomy, probably analogous to the well-known concession to the Visigothic duke Theodomir/Tudmir for the territories which he controlled at the other side of the peninsula, Murcia/Mursiya. This treaty was a determining factor from the viewpoint of population patterns, given that there were not, to the north of the Tagus, in the territory now within Portugal, Arab colonists established like those in the southern districts of Beja/Badja and Ocosonoba/Ugshnuba. Consequently, Islamisation was on a much reduced scale, and the Arabisation of the indigenous people, who became Mozarabs [*Kulmiyīta*] to the south. The territory had been conquered by the Arabs at some time in 95-6/714-15, at the same time as all the far west of the Iberian peninsula. According to the lost chronicle of Ibn Muzayn (Sivès et Seville, 5th/11th century), preserved in a Moroccan source of the 11th/17th century (Dozy, *Recherches*..., i, 73-4 and iv. Of Appx.), Santarín is said to have been...
Glasgow 1993 (cf. JAL, xii [1994]); plus a master's

During the period of Christian domination, the
Muslim Madjares [q.v.] were by no means concentrated
exclusively within the mouaraia of Santarem, and they
devoted themselves to the general economic activities
of the movar of the Kingdom of Portugal.

Combining the Arabic geographical texts and the
musulman Christian sources, the configuration of
the town of Islamic times can be approximately
reconstituted. There was a strongly defended fortress
(hizn, kal'a), with ramparts and towers, perched on an
inaccessible rocky slope. The madina was there, as also
the congregational mosque (very likely built by al-Hakam I, 180-206/796-822), later turned into the church
dedicated to the Virgin Mary in the heart of the Christian Alacgoa (< al-kasaba). At the foot of the mountain, on the banks of the river, there was a suburb at least since the beginning of the 4th/10th century; this is the modern Ribeira quarter. Formerly also known as Sesserigo and the location of one of the two Muslim quarters. Certain traces could possibly reveal the existence of another urban nucleus extra muros, in the eastern part, around the Marvilia quarter, which was the heart of the Christian town and to the north-west of which was located the second and more lasting mouararia. The modest suburb called Alfange (< al-hanash "serpent"), which grew up, like the Ribeira suburb, on the banks of the river but on the other side of the projecting elevation, to the south, does not necessarily date from the Islamic period. As elsewhere in al-Andalus, this place-name could refer to a simple gate giving on to the ravine and the tortuous pathway leading up to it (Bab al-hanash). Moreover, the Eruida da N.S. do Monte, from its strategic position, its dominating role and its ancientness, could well represent the later evolution of a little nabil or castrum.

**SHAPUR** (p.), the NP form of MP Shāhpūr "king's son", usually Arabised as Shāhpr, Sābūr, Syriac Shāhhoor, Greek Ζαπόρος or Ζαβούρ (see Juste, *Iranisches Namenbuch*, 284 f.), the name of various monarchs of the Sasanid dynasty in pre-Islamic Persia. For the detailed history of their reigns, see *sānānids*. Here, only such aspects as impinging on the Arabs will be noted.

**Shāhpūr** I, son of Ardashīr Pāpākān (r. 239 or 241 to 270 or 273) is known in Arabic sources as Shāhpūr al-Dunjūd "Sh. of the armies" (e.g. in al-Tabari, i, 824, tr. Noldeke, *Gesch. der Perser und Araber*, 28). In the Arabic sources, he is particularly connected with the capture of the Romans and the sack of the Arab city-state of northern Irāk, Hatra (Ar. al-Hadr), which had been under Parthian cultural and political influence. Around this event was woven a romantic story (found in the *Khudär-i naima* transmitted by Ibn al-Muqaffa' [q.v.] and in an Arabic tradition by Ibn al-Kalbī that the city was betrayed to the Persians by the local ruler's daughter, who had become enamoured of Shāhpūr (for details, see al-Māh, and C.E. Bosworth, ch. Iran and the Arabs, *Camb. Hist. Iran*, i/1, 559-6). This Shāhpūr is also credited by the Arabic geographers and historians with the foundation of various cities and towns of Persia, with compound names which included his own, such as *Dundishāhpūr* (see *gondeshāhpūr*) (these are listed in *Et*. art. *shāhpūr*, at IV, 314a).

**Shāhpūr** II, son of Hormīzād II (r. 309-79), was one of the greatest of the Sānānd emperors, and had considerable contacts with the Arabs in his endeavours to protect the fringes of his Mesopotamian provinces from desert Arab marauders. According to Arabic authorities (including Ibn Kutayba, al-Tabari, al-Masūtī, al-Ṭalḥābī, etc.), he led a punitive expedition into eastern Arabia against such tribes as the 'Abd al-Kays and the Ṣyяд, although the story that he penetrated as far as Medina must be fictitious. Arab captives had their shoulders pierced or dislocated, whence Shāhpūr's nickname in the Arabic sources of *Dju l-ʻAkbār* "the man of the shoulder-blades". He is likewise described as constructing a line of defensive forts, walls and trenches (the *khandak Shāhpūr*) in Irāk, along the desert borders, and as garrisoning them, in the fashion of the Romans and their *limitanei*, with Arabs against the other Arabs within the desert (cf. also the role there of buffer-states like that of the *Lakhdms* of Ḥira [q.v.]). Again, the building of various cities and towns, where Roman captives were settled, is attributed to him (see *Et*. art. *shāhpūr*, at IV, 314b-316a).

**Shāhpūr** III, son of Shāhpūr II (r. 383-8), figures little in the Arabic sources, and what details are ascribed to him are probably due to confusion with the preceding Shāhpūrs.

Bibliography: In addition to references given in the article and in *sānānids*, see R.N. Frye, ch. *The political history of Iran under the Sassanians*, in *Camb. hist. Iran*, i/1, 116-80.

**SHAPUR**, the name of a river of Fārs in southern Persia and also of the mediaeval Islamic town of Fārs which was the chef-lieu of the district of Shāhpūr Khūra.

1. The river.

This is also called the Bīghawur (in Thévenot, *Suie du Voyage de Levant*, Paris 1674, 295: Boschaviar), and river of Tawwadj. It must be identical with the antique Grāns, mentioned by Arrian, *Indica*, 99; Pliny, *Nat. hist.*, vi, 99. The lower course, the proper river of Tawwadj, is formed by the junction of two streams, the Shāhpūr and the Dalākī Rūd, rising both in the southwestern border mountains of the...
Persian plateau, which extend along the Persian Gulf. The upper course is called by the Arab geographers Nahr Ratin: this name is, very likely, found in Pliny, *Nat. hist.*, vi, 111, where Dratinus (with var. Ratam) must, however, mean the river down to the mouth. This statement must be due to another source than Iuba, on whose authority the Granis was mentioned in vi, 99. In his *Nāzhat al-kulūb*, Mustawfi al-Kazwīnī seems to indicate that the Ratin, whose source is, according to him as well as to al-ʿIṣṭakhīrī, in the Upper Hamāyūnī (al-ʿIṣṭakhīrī: Khumāyūnī) district, is a tributary of the Shāpur Rūd (Le Strange, 217: "it is a great stream, and it flows into the Shāpur river, and it joins up with the Shāpur river being about 10 leagues"). By this way of putting things, he can only mean that the river of Tawāwjad originates from two different streams, one of which is the Ratin. This, then, must be the older name for either the Shāpur or the Dalāfī Rūd. Al-ʿIṣṭakhīrī (120) represents these facts in the same manner; there it is said that the Ratin flows through the district of al-Zītrīyān (with var.) before joining the Shāpur.

The other streams are the Djirra (or Djarshīk), which joins the Shāpur on the left, below Khūshān, and the Ikhsīn. The name of the latter ("blue") may have originated from the colouring property of its waters, mentioned by the mediaeval geographers. Djirshīk is the older name of the Djirra river, although in the *Nāzha Djarshīk* and Djirra are erroneously described as two different streams. The account which the later work gives of the Djirra is for the most part copied from Ibn al-Balkhī's *Fīrs-nāma*. This stream (as Le Strange, 151) that the Nahr Djirra, rising in the Māsaram district, waters the lands of Mundījān and Djirra, and part of Ghundījān, after which it joins the Shāpur. In addition, al-ʿIṣṭakhīrī mentions the bridge of Sabūk, under which the river Djarshīk flows before entering the raster of Khurra (Ibn al-Balkhī's *Djarra*); after Khurra, the stream passes into Dādīnī, where it unites with the Ikhsīn. The *Nāzha* makes the Djirra join the Shāpur and the Ikhsīn the Ikhsīn: as its author erroneously splits up the one river Djarshīk-Djirra into two, his account is here worthless.

The Ikhsīn, according to al-ʿIṣṭakhīrī and Mustawfi, rises in the Dādīnī hills, and unites with the Shāpur at al-Djunkān. The *Nāzha* calls it a great stream; at present, it is identified with a little water course to the south-west of the lake of Kāzarūn. There appears, then, to be a difference as to the question, whether the Djirshīk and the Ikhsīn join each other, and then unite with the river of Tawāwjad, or flow into that stream each apart.

Concerning the Shāpur itself, the Fīrs-nāma (152) says that it rises in the mountain region (kuhūdān) of the Bəshapur district, which it waters, as also Khūshān and Dīr Mālīk. It flows in the sea (Persian Gulf) between Djanābī and Māndistant. This account is repeated in the *Nāzha*. In Fīrs-nāma, 142, the Bəshapur district is said to have its water from "a great river, called Rūd-i Bəshapur". Owing to rice-plantations being there, its water is unwholesome (wajshīn u nāgagāz). A short description of the river in modern times is given in J. Morier's *Second Journey through Persia... between the years 1810 and 1816*, London 1818, 49: "a river which... having pierced into the plain of the Dashtistan, at length falls into the sea at Robilla. It takes its source near the site of Shapour, and when it begins to flow is fresh. But when it reaches the mountains it passes through a salt soil, and then its waters... become brackish. A lesser stream of the same river branches off before it reaches the salt soil, and flows pure to the sea". The mouth of the river is a short distance to the north of Būshahr, near the frontier of the district of Ardājān. Opposite to it lies the island of Khūshān, on the shipping route from Baṣra to India. The name Māndistant in the Persian geographers is connected by Tomaschek (*Topographische Erläuterung der Küstenfahrten Nearachs*, in *SB Ak. Wien*, xxii, 65) with the *Deccanotaini* in Pliny, *Nat. hist.*, vi, 99. According to Pliny, the river (Gravis) is navigable for small vessels. Nowadays, the principal mouth presents difficulties to navigation because of its shallows; two minor mouths can be navigated up for some distance. On the present conditions, the delta, and the bitumen wells on the left bank of the river, south of Dalāfī, see Tomaschek, *op. cit*.

In Antiquity, there was on the Granis a royal residence, Taoke, 200 stadia from the sea. This must be the same as the mediaeval Tawāwjad (or Tawwaz), from which place the Shāpur is named river of Tawāwjad. In early Islamic times it was an important trade city, which also had a considerable textile industry; the stuffs named tasawwugry were well-known (see R.B. Sergeant, *Islamic textiles*, Beirut 1972, 52-3). This town belonged to the district of Ardājān Khurra (Ibn al-Balkhī, *Fīrs-nāma*, 114). During the 6th/12th century, the place had already declined; in Mustawfi's time (8th/14th century) it was totally ruined. Its site can not exactly be determined; nowadays the coast district of the Shāpur river is called Tawāwjad. Le Strange thought that the site of the town could be identified with the present Dīk Khūnuma, "the chief town of the (modern) Shabankarā sub-district of the Daštīshīn district".

On another Shāpur or Shāwūr, a tributary of the Dīzulf Rūd, see KĀRTĪN, at IV, 675a.

2. The town.

This was the ancient capital of the district Shāpur Khurra of Fārs. According to al-Mukaddasi, it was also called Sharāhstan; its older name is Bəshapur (from Pahlavī bālaš-pūr). A naive etymology is found in the *Nāzha*, whose author, Mustawfi, says, that the word Bəshapur is a contraction of bānī-i Shāpur "building of Shāpur". Ibn al-Balkhī, on the other hand, states, that the first syllable of the original Bāshapur (with a long ū) may disappear by way of takhfīf.

Shāpur Khurra, the area watered by the system of the Shāpur-Rūd, is the smallest of the five provinces of Fārs, contained besides the town of Shāpur some other important localities, e.g. Kāzarūn (q.v.), which was regarded as its chief town after Shāpur had fallen into ruins, in addition to Naubandajān and Djirra.

The old town of Shāpur was situated on the Shāpur Rūd, at the road from Shīrāz to the sea, to the north of Kāzarūn. Mustawfi gives its situation as long. 86° 15', lat. 20°. Its climate belonged to the *garmūr* or hot region, but its atmosphere was considered not to be healthy because the territory of the city was shut in by the mountains from the northern side. The environs were fruitful; they produced, besides many kinds of fruits and flowers also silk, the mulberry tree being frequent in that region. Honey and wax also came from its territory. The town was founded by the Sāsānīd emperor Shāpur I. It was one of the three cities where he settled his captives of war. It has been supposed, with much reason, that the emperor made use of the skill of these Roman captives in the construction of his buildings and also in the execution of the various public works in the ruins. These relics relate to the campaigns of Shāpur against the Romans. Three later rulers, Bahrām...
II, Narseh and Khusraw II also added each a relief of themselves.

These works of art, already described in detail by Morier, have also been noticed by the mediaeval Islamic geographers; at least, they mention a great statue, standing in a cavern, which European travellers were able to identify.

Local authorities constructed a mythical history of the city from before the times of its Sasanid founder. It was, according to these traditions, originally built by Tahmúrâth, at a time when there existed in Fars no other town besides Iṣīkâr. Later on, it was laid waste by Alexander, to be only renovated by Shāpur I. The name of Tahmúrâth’s foundation had been Dy.x D.lâ (Ibn al-Balkhî, Fârs-nâma, 63, 142).

The Muslims subdued Shāpur Khurra in 16/637, after the conquest of Taiwâd and the battle of Rîghahr. Biāhpâr is mentioned on the occasion of the caliphates which ensued at the beginning of the ʿUthmân b. ʿAffân, the insurrection in Fars (25/643-6) against the Arabs seems to have been directed for some time by Biâhpâr by a brother of Shāpur, the governor of Fars, who had fallen in the battle of Rîghahr. After the submission of the rebels, the inhabitants of Biâhpâr once more broke the treaty; hence it was reduced by Abu ʿl-ʿMūsâ al-Asârī and ʿUthmân b. Abi ʿl-ʿAṣ.

In the time of the al-Mukaddasf (end of the 4th/10th century), the town of Shahrâstân or Shâpur was already decaying, its outskirts being ruined; the environs, however, were well cultivated. He noted the four city gates and the ditch, also the masajîd al-ajdîmī outside the city. Perhaps this may be the masajîr-dî ajdîmî mentioned by Ibn al-Balkhî, whose words seem to imply that it still existed when he wrote (beginning of the 6th/12th century). At the end of the Bûyûtî rule, the Shâhânkâra chiefstan Abû Saʿd b. Muḥammad b. Mâmâ destroyed Shâpur, but, as Ibn al-Balkhî remarks, in his time the (Seldjuk) government tried to restore the damage. These endeavours may have had an effect as regards the district as a whole, but the city of Shâpur never rose from its ruins. When Morier visited the site (1809), he found only a poor walled village, Darfî, in the neighbourhood of the remains. This opinion of that traveller, that the town may have existed till the 16th century of the Christian era because its name occurs in a table of latitudes and longitudes in the Aṭ-ṭāb îk, carries no weight, for such a table may have been composed from older sources.

On the other foundations of Shâpur I, which were called after his name, see the article Gâpûr, in addition to which it may be remarked that the town of Shâpur Khârî, according to the Fârs-nâma (63), was situated in Khûttašân, near al-Asârī.

**SHA’R**, a title of rulers in Central Asia and what is now Afghanistan during the early Islamic period and, presumably, in pre-Islamic times also. The form šâr must be an attempt to render in Arabic orthography the MP and NP form šār/šār (< OP šārātiya “ruler”, and not from šâr “lion”; see Marquart, *Ernâstân*, 29).

The title appears in early Islamic texts on the geography and history of the eastern Iranian fringes. Thus the *Hudud al-ʿalam*, tr. Minorsky 105, comm. 327-8, gives šâr as the title of the ruler of the district of Gharčistân in northern Afghanistan [see Gharčistân], and al-ʾIṣṭâḥîrî, 271, and Ibn Ḥawālî, ed. Kramers, 443-4, had already spoken of the district of Gharîd-al-Šâr “the mountainous region of the Šâr”, these rulers were vassals of first the Sâmârîdāns and then of the Ghâznâwîs (see M. Nâzîm, *The life and times of Sultan Mahmud of Ghazna*, Cambridge 1931, 60-2).

The title was also borne by the local rulers of Bâmiyân in eastern Afghanistan, with the *Hudud al-ʿalam*, tr. 109, comm. 341, giving it in the form šîr [see Šâmîyân].

Finally, the ruler of the branch of the petty dynasty of Abî Dînâdînd and Banûṭûr ādîs [e.g. in Suppl.] which ruled in Khuttal, to the north of the upper Usus [see Kruttalan], bore the title Shîr-i Khuttâlân, according to Ibn Khurrâddâdhbih, 40, cf. Marquart, *Ernâstân*, 301.

**Bibliography:** Given in the article.

(C.E. Bosworth)

**SHA’R** (ṣ.) “hair, pelt”.

1. General.

The Arab poets, pre-Islamic as well as post-Islamic, often describe the hair of the women with whom they have fallen in love (al-ʾAṣkârī, *Diwan al-maṭân*, ii, 229; al-Râfî, *al-Muḥbîb wa ṣl-mâbîḥ, i, 16-58; al-Nuwayrî, *Nâhîya, fann 2, kün 1, bâb 2; J. Sadan, *Maiden’s hair and starry skies*, in *İOS, xi* [1991], 57-88). The context in which these descriptions are found shows a fairly clear situation: the hair of the heads of beautiful women is observed by lovers away from the house, in the open air, on the public road, etc. Sometimes the belles let their hair run down to their feet, sometimes they hide their identity and that of their lover by unbraiding and letting flow their hair around their own bodies and those of their lovers. This comes from their fear of being seen with their lovers by passers-by and calumniators. This poetic reality, which reflects a residue of ancient motifs rather than scenes of everyday life, is given real shape by iconography, above all, that of the Fatimid period (a woman with long hair flowing down to, or almost to the ground, in four clearly-distinguished tresses; D.S. Rice, *A drawing of the Fatimid period*, in *BSOS, xxi* [1958], 31-9). Moreover, this iconography shows diverse manners of coiffure, like curls of hair in the form of hooks (either the letter fâ’ or râwâ, grosso modo, or other letters, or “scorpions”, in the language of the poet Abî Nuwâs; see J. Benchenikh, *Poèmes bachiquâs*, in *BEO*, xviii [1963-4], 60-1) over the temples, a style which began at the court of al-ʾAṣmân (d. 198/813; see al-Maṣʿûdî, ed. Pellat, *§ 3451: aṣbâq*). In most of these cases, it is a question of slave girls in interiors.

Nevertheless, one of the duties of a woman faithful to the Islamic law is to cover her hair and the nape of her neck whenever she goes outside [see nihâj]. This question has become one of the symbols of the struggles of contemporary Islamic fundamentalist circles for the piety and purity of the family. This symbol is strongly opposed by those circles who do not consider the teachings about female shame as an integral and rigorous part of the authentic religious tradition. Now, the restrictions imposed by Islam, such
as the prohibition for women of adding wigs or hairpieces to their natural covering of hair, are very clear, and can only develop into a fascinating clash between the ancient religious traditions and Western tastes and concepts of beauty care (see Wensinck, Concordance, s.v. wa-l; M. 'A. 'Amr, al-Lišāb wa l-tāţīna fi l-ta'ārīf al-islāmiyya, Beirut 1985, 403-7; U. A. M. al-Taby'īb, Hušm al-islām fī l-kawāsir [coif- feur] wa-hallāq al-misād, Cairo 1992, 303). In mediaeval times, the jurists permitted dyeing (qādhib) of men's hair. The licitness of this usage has become a bone of contention. In order to distance the biography of the Prophet Muhammad from all controversy of this type, one group of jurists stresses the traditions which suggest that virtually all the Prophet's hair remained black up to his death. These traditions attach great importance, not only to the hair of this great personality who serves as a model for all Muslims (the number of his locks, qādib 'in, qādib 'ar, generally given as four, the length of his hair, which, according to the textual sources, extended to his shoulders, the methods of combing, laying out, putting oil on the hair, etc.), but also to the hair on his chest, as far as the beginning of the stomach or masraba (al-Tirmidhī, Awwāf al-nabi, Beirut 1989, 37-47; Abu M. al-Shaykh, Akhālq al-nabi, Cairo 1993, 184; Ibn al-Dawār, al-Waf', Beirut 1988, 398-402; al-Baghwāf, al-Anwār, Beirut 1989, 1, 148-52; see also Muhammad al-Anwār, al-Insān, Cairo 1993, 184; Ibn al-`Aqīl, Thalāth sha`ār, Cairo 1993, 18, 35-8, 78; al-Suyūtī, Thura fi 'l-ittild, Cairo 1987, 136-7; al-Suyūtī, al-Muzā al-zahiyya, Cairo, Dar al-Djihad n.d.; 'A. M. al-Tayyib, Hadd Fikh al-Lugha, Leiden 1976, 102). The Muslims limited the size of their moustaches (shabāb, dīnār), even a partial tournure, but they allowed their beards to grow (šawār), except for certain ephebes who, by depilation (naf) of their cheeks, "prolonged" their youth for a few weeks (M. al-Hamfd, Lihya fi 'l-Isldm, Cairo, Dar al-Djihad n.d.; A. `Abd al-Hamīd, Hušm al-dīn fī l-tāţīna wa l-kaşāki, Cairo 1984; F. al-Hindawī (ed.), Wujūf šabāb fī l-lihya, Cairo 1987; 'Umar al-`Aṣ̄ah, Thalāth sha`ār, al-Adhīm, al-`Aṣ̄ahī, Lihya fi 'l-Isldm, Cairo, `Ammān 1991; a fatwā by 'A.-H. Khībīg forbidding the trimming of beards in his collected Fatwād, vi, Cairo 1988, 103-4). However, it is allowable to pluck the hair under the armpits (naf al-ibdī), and the hair on the more intimate parts of the body may be removed by using a razor (ishtābdad or haqal) or by applying nūrā, a depilatory paste (see Concordance, s.v. h-`d, h-l-k, n-t-f; al-Dījāzī, Raut` ed., Ħārin, i, 388-9; Usāmā b. Munkūsh, al-`Abd, ed. Himi, 136-7; al-Suyūtī, Al-`Aḥrār al-ma`ṣūra fī l-tiktisī, bi l-nūra (epistle on the usage of depilatories), in his al-Hārī fī l-futūrat, Cairo 1959, i, 524-51; al-Kāsimī, Khūsūl al-sinā`āt al-`aṭīrīyya, i, 37, 103-5, 107-8, ii, 435-6; Lane, Manners and customs, end of ch. XVI, since care of the hair and depilation often took place in public baths, and cf. al-`Askari, ḥa. cīt, 152-64, describing grey hair and the dyeing of hair; al-Nuwayrī, loc. cit. See also the treatises on public baths: al-Muňāfīwā, al-Nuqat al-ṣahīha, Cairo 1987, 18, 35-6, 78; al-Kawkabānī, Ḥudūd al-namāmā fī l-takāmīl `alā mā yata`allik bi l-hamāmām, Beirut 1986, 48-53, 144-50). The term sha`ār also has the sense of "skin, pelt" (human and animal). The wool of sheep is called šif [q.v.], whilst the hair of camels and dromedaries is usually called sha`ār and occasionally wabar; the nomads are called ḥal al-wabar. This hair or wool can be woven, whence the term būrat al-ši`ār for the nomads' tents. Animal pelts are also used to stuff mattresses and valued cushions (Sādān, Le mobilier, Leiden 1976, 102). (A.K. REINHART)

3. In Arabic and Persian poetry.

The ancient Arab poets were interested in two aspects of human hair: namely, woman's black splendour of thick, soft and fragrant hair (*furās*) falling over the shoulders in light waves (ādālāba), plaited or untied under Islamic influence—the young man's down.

Originally, comparison between hair styles was rather undeveloped, probably because most of the terms were of metonymical or metaphorical origin. The Bedouin poets occasionally compared women's exuberant hair (ṣe'af) with bunches of dates (Imru al-Kays b. Hudrī, *Mawlāka, 32/35) and al-Aṣṣār's description of his beloved as "a garden whose grapes (= hair) dangle down upon me" was seen as a very uncommon verse (according to Bāshīr b. Burd, see *al-Farazdak*, [q.v.], *Diwān*, ed. Radawi, Tehran 1959, i, 244, 6). A more elaborate terminology for hair came into being in the *Abbasid period, again, in particular, for the love locks, which are compared sometimes with links of a chain and with annālīs (ṣafīn), sometimes with curved objects such as a scorpion or a polo-stick or the letters nān and lām (al-'Aṣṣārī, *op. cit.*, i, 245, 247; Ibn al-Mu'tazz, *Diwān*, ed. Khayyat, 91, 1).

But the incentive for a poetical description of the hair is usually found in a complementary or contrastive reality. In the case of greying hair, black and white, which refers to the internal one between youth and old age. Antithetic metaphors are day and night, darkness and light and, linguistically speaking, there is the alliteration of ḍhābāb (youth) and ḍanab (see *al-Farazdak*, *Diwān*, ed. Beirut 1983, 148 v. 32, and Kūhādžīm, in *Nihāya*, ii, 23, 15-16). Abū Tāmmās speaks of the dazzlingly white exterior and the raven-black interior (ibid., 25, 17) and for Rūḍātī, dyeing the hair black is not feigning youth but applying colour of mourning about the loss of youth (Sa'dī *Naftīš, Aḥād al-aṣfār... Rūḍātī, Tehran 1319/1940, vv. 396-7).

In the field of the beauty of the youth of both sexes, contrasts and mental pyrotechnics are stimulated by the opposition between dark hair and white skin. Al-Aṣṣārī still compares the black hair which falls over the naked body of his beloved with his khamīsa (black garment with edging) lying on glittering gold, but to a poet of the 4th/10th century the beauty of a young youth appears "as the black of misfortune, which creeps over the white of happiness" (al-'Thā'ābi, *Yaṭima, ed. 'Abd al-Ḥamīd, Cairo 1956, i, 420, 3).

And so the field of fantasy is reached. For Ibn al-Mu'tazz, the polo-stick of the lock drives the ball of the birth-mark (*Diwān*, ed. Lewin, iii, 55, 5) and the love lock's short wavy hair comes too close to the fire of the cheek (*Diwān*, ed. Khayyat, Beirut 1332/1914, 88, 4; for al-Wawlāwī, the "lightning of the teeth", and for Ibn Ḥamīdī the "light of the forehead", become the leader when they go astray in the night of the hair (*Yaṭima, i, 291, 3, and *Diwān Ibn Hamūd*, ed. 'Abd al-Ḥamīd, *ibid.*, 52, from the poem below).

In Persian poetry, hair is completely integrated in the general symmetry of comparison between human and botanical forms of beauty. Lock/down and violet/hyacinth are opposed here, like in Arabic poetry, cheek = rose or eye = narcissus. It may be that this is a heritage of the lyrics of the minstrels (cf. M. Boyce, *The Farthian gosan and Iranian minstrel tradition, in JFARAS (1957), 36). In any case, a play is made later with the corresponding beauty-rhyme of the expressions of flowers, like for instance Kamāl al-Dīn Ḫamdīl (d. 635/1237) in the first part of the verse (*Diwān, ed. Bahr al-ʿulāmī, 343, v. 5810): In the rose-garden (the face), the violets grabbed the hem of the jasmine (the fair skin):

Your field of down countered with a most sweet chin (= "over-trumping").

Already in the most ancient material, the love locks (ṣaljī) and the down (ṣafīn) also *khasif* dominate the field of the Persian descriptions of hair. Later, they are supplemented by the combination "the arrows of the eyelashes on the bow of the eyebrows" (Anwarī, *Diwān*, ed. Radawī, Tehran 1959, i, 34, 3). Sometimes the length of the love lock is emphasised, sometimes its unity and its tousled nature. It drags on in innumerable windings, curves and knots, *ʿayn in ʿayn, as Maʿrūf says in a comparison with letters (Lazārīd, *Les premiers poètes persans, Paris-Tehran 1964, ii, 194, v. 18). It remains the "chain" of Arabic poetry, but becomes also a "trap", a "snare" and a "lasso" (*dam, kamand*) and, from the time of Rūḍātī (d. 329/1040-1), connected with the image that the hearts of the amorous have to languish in its bonds (Naftīš, *Aḥād al-aṣfār, 1038, v. 469).

The swarthiness of the hair remains, incidentally, an inexhaustible source for the invention of images in Persian poetry. Reference is made to all that is literarily or figuratively black: musk, a Hindu, Ahriman, infidelity, etc. Even in the theosophical visions of Ayn al-Kudāt Ḥamadānī *[q.v.]*, the "black light" of Iblīs appears as a forelock on the luminous head of God (Tambādīt, ed. 'Usayrī, Tehran 1341/1970, 118, ll. 8-9; cf. van Ess, *Theologie und Gesellschaft, i, Berlin 1991, 345-6).

Bibliography (in addition to references in the article): Specific chapters devoted to the theme of poetical treatment of hair are found in *Taghūdī* works, like that of Kattānī, ed. 'Abbas, Beirut 1966, 124-31; in collections of motifs, such as that by Abū Hilāl al-'Aṣṣārī, *Diwān al-maṣādīr*, Cairo 1352/ 1934-3, i, 244-50; and in encyclopaedic *adab* works such as Nuwayrī's *Nihāyat al-ʿarab*, Cairo 1923 ff., ii, 16-31. Individual verses on the theme of hair can be met on almost all places where erotic poetry is written, collected or quoted.

(B. REINHART)

SHARĀB [see MAGHRĀBuK]

SHARĀB [a.], a verbal noun from the root *ṣhr-* indicating elevation, nobility, pre-emminence in the physical and the moral senses. Hence the *sharīf* [*q.v.*] is a person who is placed above those who surround him on account of his prestigious and noble origin. In pre-Islamic Arabia and in early Islam, *sharīf* and *mahdi* both denote "illustriousness on account of birth", while *husbāb*, "individual quality, merit" (as opposed to *nasab*) and *karām* denote "illustriousness acquired by means of knowledge, virtue" (see above).

According to the historians of Islam, those among the Arabs who could claim this innate glory, this
nobility of birth, were the descendants of Kuraysh in the Lddilya and in Islam, comprising Hashim, Umayya, Nawfal, 'Abd al-Dār, Asad, Taym, Makhtum, 'Abbās, 'Umar, and 'Ali, in all, ten families (sū działa), the offspring of ten wombs (ba'tin) (cf. Ibn 'Abd Rabbiḥ, al-Ḥāfi al-fard, ed. Sādir, Beirut, fasc. xii, 8).

But this list was to be much reduced in the course of the first century of Islam, nobility of birth being concentrated in the family of the Prophet. The Prophet himself was reckoned to embody all the nobility of the Arabs, since it was said of him that he was the best of creatures, being the offspring of the best part of the best of creatures, being the offspring of the best part of the offspring of the best of the offspring of the offspring of the offspring of the offspring of the offspring of the offspring of the offspring of the offspring of the offspring of Adam, to expel al-Harith, to have forty-eight members of his family executed by his loyal retainers, and to have the man himself assassinated by his allies the Banū Kalaḥ. Such was the end of the glory of the Kinda, lamented by a grandson of al-Ḥārith, 'Imruʿ al-Kays, one of the greatest poets of pre-Islamic Arabia.

This glory was retrieved by the Lakhmids and the Ghassānids, both originating from Yemen (while the Kinda came from Ḥadramawt). But they, too, left no recognised lineage and no acknowledged nobility. All of this was based on a rivalry, the memories of which are not yet extinct, between Kays (Arabs of the North and Yamanis (Arabs of the South).

There remains prophetic nobility (ṣaraf hayt al-nabī). It is immortalised by the qaftān of Mecca (whose heir is the King of Jordan) and the Şorrīl (see Şurfwa) of Morocco (Idrīsids, Saʿiddyūs, etc.). The Umayyads tried in vain to revive the glories of Kuraysh. Only poetry has retained its memory.

**Bibliography:** The most important sources for the subject are: Abū 'Abd Allāh Muḥammad al-Zuhayrī, K. Naṣr, Kuraysh, ed. E. Lévi-Provençal, Cairo 1953; Baladhurī, Anṣāb al-aṣḥaf, an immense historical and genealogical encyclopaedia (the Cairo ms. comprises 12 vols.), of which the following vols. have been published:

The third important source is Ibn Ḥazm, Qamhārī anṣāb al-'Arab, ed. Lévi-Provençal, Cairo 1948.

For a sociological analysis of the notion of honour (ţālīf) among the pre-Islamic Arabs, see Ezouard (in the thesis) or Bišrī (in the article) Farès, L’honneur chez les Arabes. Étude de sociologie, Paris 1932, and his article on 'Al-Ḥāsif (in the Al-Šurra, see Suppl.).
SHARAF AL-DÍN

southern Lebanon, 'Abd al-Husayn came back to 'Irāk in 1892, and he pursued his studies in Nadjaf until May 1904, when he returned to his home village. Apart from a period of exile after World War I (see below) and a number of journeys abroad, he lived in Tyre until his death on 30 December, 1957, being then buried in Nadjaf.

Supported, inter alia, by Lebanese Shi'í communities in West Africa, Sharaf al-Dín was over the years able to establish a number of religious, educational and social institutions in Tyre, such as a Huqayna, a Friday mosque, schools (including one for girls), a charitable society and an orphanage. Moreover, new mosques were erected or old ones rebuilt on his initiative in a number of adjacent villages. As far as his political activities are concerned, he has been praised by many authors for his stand against the French Mandate over Lebanon [see Lubnàn], and notably for a speech he delivered at a meeting of political and religious leaders at Wāḍāt 'Al-Hujayr in Amμm 'Ammār, which has also been criticised by a few others who have interpreted his attitude at that time and in the following years somewhat differently. However, as a result of his agitation against the mandatory power, he was forced to leave southern Lebanon. First he went to Damascus, after the battle of Maysalūn [q.v.] to Egypt, and finally to Palestine, from where he was allowed to return to Tyre in June 1921 (for a book written wholly in defence of Sharaf al-Dín's political role, see Muhammad al-Kurām, al-Qādīrī fi silsilat al-Shī'īn, Beirut 1956, 626-9.

As a religious scholar, Sayyid 'Abd al-Husayn was known for his erudition in both Shī'ī and Sunnī Hadīth, for his apologetical fervour as well as for his conservative standpoint on a number of issues raised by Shi'ī modernists, such as the corpus traffic to the 'Atabāt [q.v. in Suppl.] and its paraphernalia (see Y. Nakash, The Shi'īs of Iraq, Princeton 1994, 184-201, esp. 193-7) and certain features of the t'dżīm processions (see W. Ende, The flagellants of Muhammad, in Isl., iv [1978], 19-36, esp. 31-2).

As far as his works are concerned, a history of his own family as well as of the Āl Ṣadr, who are closely linked to the Āl Sharaf al-Dín by intermarriage, was published only posthumously by one of his sons, Sayyid 'Abd Allāh, with extensive additions, i.e. Bughyāt al-rāqībah fi istilāl Āl Sharaf al-Dín, Beirut 1991 (with 'Abd al-Husayn's autobiography in ii, 63-254).

Of special fame in Shi'i circles is his book al-Manāqibāt, a work on doctrinal questions purporting to contain his correspondence with an Egyptian Sunni scholar, Sallām al-Bīghrī (d. 1917), who was Shaykh al-Azhār when Sharaf al-Dín came to Cairo in 1911. The first edition was published only in 1936 in Sidon, while the 10th appeared in 1972 in Beirut; since then there have been several reprints (as well as translations into other languages). Many Shi'i consider this work (i.e. Sharaf al-Dín's answers to al-Bīghrī's questions) as one of the most convincing expositions of the Twelver Shi'i doctrine of the imāmas [q.v.] that has ever been written (for a discussion of its rather uncertain authorship, see A. Bajbar, Annaherung...

The last of his books published in his lifetime is al-Nass wa l-iajtihād, Nadjaf 1956. It Beirut 1988, a work on early Islam and the role of the Companions of the Prophet in the development of the Sharī'a.

For lists of Sharaf al-Dín's many works, see e.g. Kubaqṣī, 53-89; Sadr, 29-52; 'Āl Yasin, 20-7; Bughyāt 'Ali, 113-14, 146-8; Fadl Allāh, 55-70; all these authors also mention unpublished writings of his lost when soldiers plundered his houses in Shī'īr and Tyre during the disturbances of 1920. See further K. 'Awādī, Mu'allim al-mu'allifin, iii, Baghdād 1969, 228-9; Y.A. Darīgh, Masādīr al-dirūsa al-adhābīya, i, ii, Beirut 1972, 626-9.

SHARAF AL-DÍN AL-ÁL YAZDI, Persian historian and poet of the Timūrid period, born at Yazd, died in 858/1454.

He was a favourite of the Timūrid ruler Shāh Rūkh [q.v.] and of his son Mirzā Abu l-Fath Ibrāhīm Sulṭān, governor of Fārs, and in 832/1429 became tutor to the captured young Čingizid Yūnus Khān, to whom he dedicated many poems. He was then in the service of the Timūrid prince Mirzā Sulṭān Muhammad in 'Irāk, 'Adjamf or western Persia, and narrowly escaped death when that prince rebelled in 850/1447. After Shāh Rūkh's death he retired to Yazd and settled in the nearby village of Tāf, where he died, being buried in the Sharafīya madrasa which he had founded.

Yazdī had a high reputation as a litterateur and poet. In addition to his poetry, written under the taḥqīlīya of Sharaf, he wrote a commentary on the Burda ode of al-Bīghrī [q.v. in Suppl.], a work on magic squares and a work on riddles (mu'amma), in which he compiled an anthology of Arabic and Persian poetry; and he left behind a collection of ināḥā. His main fame, however, stems from his Żafar-nāma, a florid and euphuistic, hence much admired at the time (with the result that a large number of ms. survive), history in Persian of Timūr and his grandson Khāliṣ Sulṭān. This was compiled from other histories of the great conqueror and from eyewitness accounts, and completed in 828/1425; further planned sections on Shah Rukh and Ibrāhīm Sulṭān were never completed.

Bibliography: Dawlat Shāh, Taḏkīrāt al-šayrān, ed. Browne, 378-81; C. Rieu, Cat. of Persian manuscripts in the British Museum, 173-5; Browne, LHP, iii, 362-5; Storey, i, 284-8, 1274; Storey-Bregel, ii, 797-807; Rypka et alii, History of Persian literature, 434, 444. The most recent eds. of the Żafar-nāma include that of M. 'Abbaṣī, Tehran 1336/1957, and facs. ed. A. Uraibaī, Taskehent 1972.

SHARAF AL-DÍN, HASAN RĀMĪ [see RĀMĪ TABRĪZĪ].
al-Sha‘rānī, ‘Abd al-Wahhab b. Ahmad (897-973/1492-1565), Egyptian Sufi, scholar, historian of Sufism, and a prolific writer about many religious subjects during a period otherwise poor in distinguished figures of learning and piety in the Arab lands.

Sources. The main sources for al-Sha‘rānī’s life are his own writings, which must, of course, be used with caution. This is especially true of Lātif al-minnān, his lengthy account of the graces bestowed upon him by God, a work that beside recounting miraculous events, also includes many autobiographical elements. Paradoxically, al-Sha‘rānī’s voluminous literary output gives us little of himself, because most of his biographies, such as his disciple ‘Abd al-Ra‘ūf al-Munāwī [q.v.], drew heavily on his works, adding little new information. An important biography, al-Manākīb al-kabūrā, was written in 1109/1697 by Muhammad Muhīr l-Dīn al-Malīdī, an affiliate of the al-Sha‘rānī order (Cairo 1350/1932).

Origins and life. According to al-Sha‘rānī, his ancestor five generations back was Māṣā Abū Imrān, son of Mūsá Abū al-Malak. Mūsá was a follower of Shāykh Abū Mādān Shuyr‘āy (d. 594/1197), the founder of the Shāhīdī Sufī tradition, who sent him to Egypt. Finally, the family settled in the village of Sākiyāt Abū Ṣa‘rā in the Minūfiyya province, hence the nāma. Al-Sha‘rānī came to Cairo at the age of twelve and settled in the Bāb al-Sha‘rīyā quarter and was raised in a Sūfī milieul. He became a student of Cairo’s best-known ulamā‘ of all the madhdhib, not only his own Shafī‘i one, and a follower of distinguished orthodox Sūfis. Yet his spiritual director was an illiterate palm-leaf platter (hence, his lākāb), named ‘Arī al-Khawwās al-Burullūsī (d. 939/1532-3). Al-Sha‘rānī became a successful and wealthy man and a popular writer thanks to his attractive personality, erudition and readable style. Inevitably, his popularity made him many enemies and rivals, the most prominent of whom was Muhammad b. Ahmad b. Karim al-Dīn (d. 985/1578), the leader of the Shadhīlī ethics and literature, but did not identify himself as causing hallucinations and not true religious experience. He never states his own tarīka affiliation, and identifies generally with the tarīka al-kūm, i.e., the orthodox way of al-Du‘aynād. His initiation into the tarīka seems to have been merely ceremonial or for the sake of obtaining baraka.

As a historian of Sufism (he compiled collections of tabakāt containing lives and sayings of Sūfis) and an apologist for it, al-Sha‘rānī insists that genuine Sūfis have never contravened the Shari‘a in word or deed, and if it seems otherwise, it is only because of a misunderstanding, misinterpretation, ignorance of the Sūfī terminology, or interpolation by enemies. In this way, al-Sha‘rānī chose to defend the orthodoxy of the great mystic Muhyī ‘l-Dīn Ibn al-‘Arabī [q.v.], whose ideas he epitomises in his al-Ya‘luki wa l-‘ajawdhir, rendering the mystic’s complicated theories in a simplified way.

His fīkh. In his al-Mīzān al-Kubrā, al-Sha‘rānī expounds a theory based on Sūfī assumptions that aims at the unification of the four madhdhib, or at least their equality and the need to narrow the gaps between them. He believed that there were no real differences between the founders of the madhdhib in contradistinction to the opinions held by their narrow-minded imitators (mukalladūn). The founders were aqīdā and thus had access to the Source of the Law (qiyā al-Sharī‘a) whence they derived the precepts of religion. According to him, there is only one Shari‘a, and it has two standards—strict (a‘zima) for those who are resolute in their religion, and lenient (mukadda) for those who are weak. Generally, al-Sha‘rānī criticised the fakāba‘ for troubling the common people with the finer points of jurisprudence, of little relevance to the essentials of Islam.

His social ideas. His weaknesses and inconsistencies notwithstanding, al-Sha‘rānī had a feeling for the essentials of Islam. He also had a genuine empathy for the weak and underprivileged elements of society, such as felthatene, labourers, and women. He paid particular attention to the relations of Sūfis with members of the ruling class and wrote a treatise advising ‘ulamā‘ and fikhrīs how to get along with amīrs. His criticism of the rulers’ injustice in general and the Ottoman rulers of Egypt in particular, is typically circumstantial, but he hints at the date 923/1517, the year of the Ottoman conquest, as a turning point for the worse, and elsewhere makes a hostile remark about the kānim, the Ottoman administrative law.

In Burckhardt’s time, the Shararāt were known for their camel herds, which they exchanged in the Havān and at Gaza for wheat. They regarded Ma‘ān, Dja‘āf and Madā‘an Sāliḥ as their former properties; Doughty suggested that they came from the Banī Hālāl and the Banī ‘Ayyūr. The Rwala and the Banī Şakhir, at the same time themselves taking al-Sha‘rānī [q.v.] from Dja‘āf and, at an earlier date, from the Hūṣay Ṭūn and the Banī ‘Ayyūr. The Rwala and Şakhir did not intermarry.

316 AL-SHARARAT — SHARARAT
with them because the Shararat paid for protection. The Shararat were subject, in Doughty's time, to the amir of the Al Rashid [g.v.] in Hayil, like most tribes. Both Doughty and Musil emphasised the excellence of the Al Rashid [r.r.] in Hayil, like most tribes. Both Doughty and Musil emphasised the excellence of the Al Rashid [r.r.] in Hayil, like most tribes.

The increasing drawing of northern Arabia into tribal and then state politics probably accounts for the politically-weak Shararat's initial impoverishment, accelerated by the declining market for camels, which had virtually disappeared by the 1940s. Many Shararat are now in the National Guard, army and police of Saudi Arabia or involved in local government, whilst their camel herds supply an urban market for their milk and flesh.

AL-SHARAT, from the Latin serra through the Spanish sierra, is the term applied by certain geographers of Muslim Spain to the mountains which stretch from east to west in the centre of the Iberian Peninsula. The best definition is given by Ibn Fa'dl Allah al-Umarf. According to this author, the mountain range called al-Sharat stretches from the country behind Madinat Salm (Medinaceli) to Coimbra. This term therefore describes the mountains now known under the names of Sierra de Guadarrama (Ar. Wadi't l-Ramla?), Sierra de Gredos and Sierra de Gata in Spain and Serra de Estrella in Portugal. In the course of al-Idrīsī, however, it was applied only to the Sierra de Guadarrama, to the north of Madrid. The geographer Abu 'l-Fida', quoting Ibn Sa'id, described the mountain system of the centre of al-Andalus under the name of Djabal al-Shara. According to him, it divided the peninsula into two well marked divisions, the north and the south.

Al-Idrīsī, in his description of al-Andalus, gives the name of al-Sharat to one of the twenty-six “climes” of this country, the twenty-second in his classification; this region, which embraced all the Sierra de Guadarrama, included the towns of Talavera de la Reina, Toledo, Madrid, al-Fahmin, Guadalajarra, Ucles and Huete.

AL-SHARJA [see AL-SHĀRIKA].

SHARH (A.), pl. sharīh, denotes in Arabic a commentary on a text of greater or lesser length, but this term by itself does not cover the entire semantic domain of “commentary”. Lexically, it refers to notions of opening, expansion, explanation and finally of commentary.

Sixty-seven sharhs appear in the Fihrist: language (29), of which two have a title; two Sharh abāyi Fihrist; a Sharh abāyi al-Fihrist; two Sharhs Sharh al-Murjān al-Fihrist; Sharh Maksūrat Ibn Dauray by Abū Sa'id al-Sṭāfī, commentary on a didactic poem; two Sharh al-mā'ānī, philosophy and sciences (16), concerning the Djabirian corpus (4); Ḥanafi fikr (5), Ḡāfīrī (4), Malikī (3), Zāhīrī (1), theology (2), ḥadīth (2) and Shafi'i (1).

Also found there are nineteen-six taṣliht: Kūr'ān (40), philosophy and sciences, whether these are translated works—they are the majority—or commentaries written directly in Arabic (25); the instances where the expression fassara al-hathār is used have not been counted; the same applies to sharahah, poetry (8), Old Testament (7), Gospels (1), language (4), language and theology (1), fikr (1), ḥadīth (1) and miscellaneous (8). In the course of time, the number of commentaries becomes impressive, to the point where this emerges as one of the characteristics of Arabic literary production. Many of them are veritable museums, as if their authors feared the loss of whole sections of the patrimony.

I. Grammar and philology.

Among the works which were the object of commentaries at a very early stage, particular distinction belongs to the fihrist of Sibawayh (d. 180/796 et al. cit.; 19 titles in Sezgin, x, no. 132; 32 names of commentators or glossators in Ḥadżdżī Khalīfa, ii, 1427-48). It is difficult to conclude whether the terminology to denote these works is contemporary; it varies between tatbīk, taṣfīr, taṣfīr, nukat, sharh (or ikhrāj) nukat and sharh (Sezgin, ix, 58-63). Besides al-Ākhfāsh al-Awṣat [g.v.], the disciple of Sibawayh, the following works are listed here: Abu 'Umar al-Djarmī (d. 225/839), Tafsīr sharh Sibawayh; al-Mazīnī (d. 248/862), K. Tafsīr K. Sibawayh; Abu Ya'la al-Zur'ī (d. 257/871), Nukat 'alā K. Sibawayh; al-Mubahhad (d. 285/898), Tafsīr mā ṣallīha inshā'ah al-ḥudjdia fihi. Of the various commentaries and glosses on the Kāfūb which have been edited, worth mentioning are: the Sharh of Abū Sa'īd al-Sṭāfī (d. 368/979; MIDEO, xviii, no. 9, xii, no. 18), that of al-Rummānī (MIDEO, xxi, no. 20), Tafsīr al-Taftāzh 'alā K. Sibawayh by Abū 'Ali al-Fārisī [g.v.] (MIDEO, xxi, no. 19).

Sharh does not invariably denote a commentary on a work; it also refers to explanations given regarding a subject within a book, especially regarding verses (abyāt) or probative quotations (gawāhidh). The monumental Kāzīnāt al-adab of 'Abd al-Kādir al-Baghḍādī [g.v.] constitutes the crowning achievement of this type of literature.

Later treatises on grammar or grammatical didactic poems were also the object of commentary, sometimes to an even greater extent. These include al-Muṣāfāṣ al-Zamakhshārī (d. 539/1144, 24 according to Brockelmann, F, 347, S I, 509-10; 18 in Ḥadżdżī Khalīfa, ii, 1774-5), al-Durr al-alifyya of Ibn Mu'tūf (d. 628/1261, MIDEO, xxi, no. 24); al-Kāfūb of Ibn Ḥādīj (51 entries in Brockelmann, F, 367-70, S I, 531-5; MIDEO, xix no. 9; Sharh of Ibn Djamā'a: cf. Makram, 61-2); al-Shaykhī (23 principal entries in Brockelmann, F, 370-1, S I, 535-7; cf. Makram, 66) of Ibn Ḥādīj (d. 694/1294); and especially al-Jāiliationi al-ālifyya (45 entries in Brockelmann, F, 359-62, x (Granada 1920), 522-6; MIDEO, x, no. 2, for the commentary of Ibn 'Akit; MIDEO, xix, no. 8; ten; cf. Makram, 176) of Ibn Mālik (d. 672/1274). Some of these commentaries were in their turn the object of commentaries or glosses, among others Awdah al-mašālik of Ibn Ḥāshīm (d. 762/1361; 11 entries in Brockelmann, S I, 523).

Numerous unedited commentaries pose a problem on account of the similarity between the titles of the works to which they refer; this applies in the case of those on the Kāfūb, the number of commentaries and glosses. The term itself does not indicate a commentary on a work; it also refers to explanations given in relation to a subject within a book, especially regarding verses (abyāt) or probative quotations (gawāhidh). The monumental Kāzīnāt al-adab of 'Abd al-Kādir al-Baghḍādī [g.v.] constitutes the crowning achievement of this type of literature.

Another problem is that of the number of commentaries and glosses. The term itself does not denote a commentary on a work; it also refers to explanations given in relation to a subject within a book, especially regarding verses (abyāt) or probative quotations (gawāhidh). The monumental Kāzīnāt al-adab of 'Abd al-Kādir al-Baghḍādī [g.v.] constitutes the crowning achievement of this type of literature.

Another problem is that of the number of commentaries and glosses. The term itself does not denote a commentary on a work; it also refers to explanations given in relation to a subject within a book, especially regarding verses (abyāt) or probative quotations (gawāhidh). The monumental Kāzīnāt al-adab of 'Abd al-Kādir al-Baghḍādī [g.v.] constitutes the crowning achievement of this type of literature.
Sarradj (d. 316/928), with commentary by one of his disciples, al-Kummâni (Sezgin, ix, 84).

In lexicography, the K. al-'Ayn of al-Kâhli b. Ahmad [q.v.] has less the object of commentary than of addenda et emendanda (Sezgin, viii, 54-6). The same applies to the Qârîb al-mu'assanah of Abû 'Ubâyda (d. 224/838), except that it was also the object of commentary strictu sensu, in particular by Ibn Sîdûh (d. 438/1046) and by Ibn 'Abbas al-Mursî (ibid., cf. 460/1066); twelve diverse entries in Sezgin, viii, 83-4; MIDEO, xx, no. 6). His K. al-'Amîdî received the same treatment (six in Sezgin, viii, 84-5). The same applied to al-Qudwa, 27 to Ibn Dâ'ûd (d. 391/997) (six entries for summaries, additions, etc., in Sezgin, viii, 103). But no work of this period has received as much attention on the part of lexicographers as the K. al-Fâṣîr of the Kifân Thâlab (d. 291/904) (42 entries, including 20 commentaries, in Sezgin, viii, 142-4; MIDEO, xix, no. 5). Major lexicographical works or dictionaries have seldom been subjected to commentary. However, the emendations, alterations, additions, elucidations, additions, glosses, corrections and even "summaries" (ta'âbîn, hawâdkh, tashîh) of which they have been the object belong more or less to the domain of "commentary". Furthermore, the more recent of them are in a relationship of "commentaries" to "texts" with regard to the earlier (see Kraemer; Sezgin, viii; introd. by A.S.A. Farâdî to T'4, ed. Kuwait; EL, art ƙârbîn). II. Poetry, adab and stylistics.

It is hardly surprising that Ibn al-Nadîm does not notice a single qârîb of collections of poetry, seeing that he mentions only twenty-eight dâ'ârûn. Al-Âmîdî (d. 371/981) refers to 59 (R. Jacoby, in GaP, ii, 11). Moreover, collections of poetry were at first called qâtîr or even khaðar (Sezgin, iii, 36-46). It should, however, be recognised that "commentaries" on poetry are not absent from the Fâṣîr, although this is only through the intermediary of the qârîb abîyâr/gâhwîh or the qârîb ma'ânî al-Bayhî of Lughâda/Lughâtha al-Istoryânî, contemporary of Ibn Kutaiba, and of Bundâr b. 'Abd al-Hamîd b. Lurra (first half of 3rd/9th century). On the other hand, Ibn al-Nadîm mentions three tafsîr of poetry by Ibn Durutawayh (d. 347/958; Sezgin, viii, 106-8): of al-Mu'adhdhînî (incomplete), of al-Sâ'î [al-Mu'alla'kât] and of the Kâfîdha of Shuhayb b. 'Azra. He also adds here the Tafsîr al-salî [al-dhâhîyya] wa-ghârîbî, of al-'Umari, judge of Takrit, and the Tafsîr al-Hamasa of Abû Tammân [q.v.] by al-'Umari (ibid. ca. 364/975, Sezgin, vii, 68).

Among the commentators on the Mu'âllakât (29 entries in Sezgin, iii, 50-3; cf. Blachère, HLA, i, 143-8), worth mentioning are: Abû Sa'id al-Dâ'îrî (d. 282/895), Ibn Kaysânî (d. 299/911), Abû Bakr Ibn al-Anbarî (d. 328/940; in fact a revision of his father's commentary), Ibn al-Nahhâs [q.v.], al-Zâwâzînî (d. 486/1093), Abû Bakr al-Bâtâyawî (d. 494/1100) and Abû Zakariyâyî al-Tibrizî (d. 502/1109). The Hamasa of Abû Tammâm was no less the object of commentaries (36 entries in Sezgin, iii, 69-72). The greatest success in these terms belongs, however, to the Bûdar Sîdî of Ka'b b. Zuhayr [q.v.] (48 in Sezgin, ii, 231-34).

Some authors distinguished themselves in the elucidation of various collections of poetry. These include Abû Sa'id al-Sukkarî (d. 275/888); Ibn al-Anzarî, disciple of Thâlab" baths" commentary on al-Mu'adhdhînî (Sezgin, ii, 54; Blachère, HLA, i, 148-50); Abû Bakr al-Sûli (d. 335/946) commentaries on the Hamasa of Abû Tammân (Sezgin, ii, 68); al-Mâarrî [q.v.], commentator especially of the Mîdhdhûnî (MIDEO, xx, no. 66); Abû 'Ali al-Kâlî (d. 356/967); Ibn Khâlîlawî (d. 370/980); Ibn Djinîn (d. 392/1002); al-Marrûkî (d. 421/1030); Abû 'l-'Hasan al-Wâhidî (d. 468/1073); al-'Alâm al-Shantamâri (d. 476/1083); commentaries on the seven Mu'âllakât; al-Tibrizî: commentaries on the Hamasa (Sezgin, ii, 71, no. 24), on the Lâmmûnî al-'Arab of Shanfârâr (Sezgin, ii, 135); Mawhûb al-Djawâlî (d. 540/1145); Ibn Hâjîm al-Ansârî (d. 761/1360).

Among works of adab, the Adab al-šâhîb of Ibn Kutayba has drawn the attention of commentators (eleven in G. Lecomte, Ibn Qutayba, 104-5). An interesting case in the domain of stylistics is that of the Mu'âlla't al-'ulâm of the Sâkkâli (626/1229), Hâjîdî Khalîfî, ii, 1762-8) which was the object of a comprehensive commentary (explicit, 742/1341) by Husâm al-Dîn al-Qârâzmi. But it was especially the third part of this work, on stylistics, which was commented on and glossed, then summarised (see A. Arazî and H. Ben Shammâi, art. Muqâtasâr, in Vol. VII, 571), the summaries in their turn being commented on and glossed. The ideas of the author are evidently modified by the commentators and glossators (Brockelmann, I, 352-6, S I, 513-19; A. Mâlîkhârî, al-Barâqî wa-shurûh al-Tafsîr, Baghdad-Paris, 1967; R. Sellheim, i, 299-317; W. Heinrichs, in GaP, ii, 184).

III. Religious sciences.

It is probable that the first "commentaries" or explanations in this area were applied to the qârîb [q.v.] of the Qur'ân and of hadîth in the form of oral explanations, of pamphlets, then of books. These were therefore not "commentaries" on a work, but explanations of a term, of a verse, or of a tradition. In fact, they most often bear the title of Qârîb al-Tafsîr al-hadîth or al-Qur'ân, or even Qârîb al-hadîth (Abû 'Ubâyda, d. 207/822, whose Madjâz al-Qur'ân is also called al-Madjâz fi qârîb al-hadîth). For commentaries on the Qur'ân, the accepted term is tafsîr [q.v.]. However, the Mustazîfî Abû Mûsîr al-Istoryânî (d. 322/934) is the author of a commentary sometimes called Qârîb al-tawîl al-Qur'ân wa-shurûh ta'âbîn (E. Kohlberg, A medieval Muslim scholar at work, Leiden 1992, 330). For the explanation of isolated passages of the Qur'ân, qârîb is sometimes applied to a few pages (al-ma'âtir), in the form: Qârîb ka'bîsî tawîl (four in the list of works of Makkî b. Abî Tâlib, in Kifîr, Inbâh, iii, 317-8) or Qârîb bi'a, ..., or even Qârîb al-Tafsîr sirî, ..., Qârîb al-Basmâ, Qârîb kalamayî al-thâbahâ. Al-Madzîfî by al-Zamakhsharî (d. 538/1144), unusually for a commentary on the Qur'ân, was frequently the object of the commentaries and glosses (Brockelmann, F, 345-6, S I, 507-9). The "commentaries on the divine names" also contain interpretations of the terms according to various theological orientations. They may bear various titles: Qârîb al-asma- l-husnî (31 in Hâjîdî Khalîfî, ii, 1031-5), but also Tafsîr, Kitûb, etc. (D. Gimaret, Les noms dows en Islam, Paris 1988, 16-29).

In the context of hadîth, qârîb is used for the commentary on a single tradition. Some traditions have been subjected to extensive commentary, in particular Qârîb hadîth 'Umm Zârî: al-Tabârî (Gilliot, Eli (see Böll), 67), al-Kâfî 'Iyâd (ibid., no. 8); Qârîb hadîth 'Umm Zârî by Ibn al-Anbarî (Sezgin, viii, 154) and Ibn al-Khalîlî (lor. ca. 1000/1591). The major collections of prophetic traditions, in particular the "six books", have been the object of an impressive number of commentaries, the majority of which are supplied with titles: 27 for al-Mawacid, all recensions combined (sometimes also Tafsîr al-Mawacid', M. Muranyi, Ein MIDEO, xx, no. 66); 56 for al-Šâhîb, 27 for Muslim (Sezgin, ii, 115 ff.), etc. In the genre of the "Forty
Prophetic Traditions", the collection of al-Nawawi (d. 676/1277), al-Abd al-Munawwir, has been the object of some forty commentaries, including one by the author himself (L. Pouzet, Une Hermenéutique de la tradition islamique, Beirut 1982, 55-7). In the terminology of hadith, pride of place probably belongs to the Mukaddima of Ibn al-Salâh [q.v.], which was commented on, glossed and summarised (Brockelmann, F', 441-2, S I, 610-12; MIDOE, xix, no. 43; xxi, no. 121).

The energy of the commentators in Muslim law is no less impressive (Spies, 238-69; Sezgin, i, 409-524). In Hanifi law (Spies, 238-47; Sezgin, i, 409-57), at least 15 manuals were known to have been made on one of the oldest Hanafi compilations offitri, al-Qāmūs al-Kabîr of al-Shaybâni (d. 189/805), including those by al-Tahawi (d. 321/933) and al-Marghânî (d. 539/1146). The latter's Taqrib al-‘ābat’id, with the commentary of al-Shârîf al-Dîjdjânî and the glosses of the Indian 'Abd al-Hâkim al-Sijâlkî (d. 1067/1657) and of Hasan Celîbi al-Fanârî (d. 886/1484) (W. Madelung, in GaP, ii, 333). As in law, there were occasions when theologians of different trends commented on one another. Thus the Muṣâṣâṣ al-‘alîr of the Aḥârî Fâhrî al-Dîn al-Râzî was the object of commentary by a Shâfi’î of Muṣâfî’s persuasions. Furthermore, Násîr al-Dîn al-Târî (d. 964/1557), later's Taqrib al-‘ābat’id, was glossed by the Zaydîs al-Amîr al-Sanjî (d. 1128). As in mysticism, numerous texts were the objects of commentary, beginning with the K. al-To’arîfîn of al-Kalâbîhî (d. 380/990), in particular by 'Alî al-Kûnâwî (d. 712/1316; Sezgin, i, 669), the Rîwâlî of the Kûshâyî (d. 465/1072) by Zakariyâ’i al-Ansârî (d. 926/1520; Brockelmann, F', 556, S I, 771-2). The standard edition of the work, with a long introduction dealing with logic and ontology, was commented on by the Şâhîf’s Aḥârî Muḥmûd al-İsľâhânî (d. 749/1349) under the title Taqrib al-‘ābat’id (‘al-Shârî al-ţadîm), then by the Sunnî astronomer and philosopher al-Kâfîrî (d. 879/1474) [see ‘Alî al-Kâfîrî (‘al-Shârî al-ţadîm)]. These two commentators were in turn the object of commentaries and glosses by Shîfî and Sunnî authors (Brockelmann, F', 670-2, S I, 925-7; W. Madelung, in GaP, ii, 333).

In mysticism, numerous texts were the objects of commentary, beginning with the K. al-To’arîfîn of al-Kalâbîhî (d. 380/990), in particular by ‘Alî al-Kûnâwî (d. 712/1316; Sezgin, i, 669), the Rîwâlî of the Kûshâyî (d. 465/1072) by Zakariyâ’î al-Ansârî (d. 926/1520; Brockelmann, F', 556, S I, 771-2). The standard edition of the work, with a long introduction dealing with logic and ontology, was commented on by the Şâhîf’s Aḥârî Muḥmûd al-İsľâhânî (d. 749/1349) under the title Taqrib al-‘ābat’id (‘al-Shârî al-ţadîm), then by the Sunnî astronomer and philosopher al-Kâfîrî (d. 879/1474) [see ‘Alî al-Kâfîrî (‘al-Shârî al-ţadîm)]. These two commentators were in turn the object of commentaries and glosses by Shîfî and Sunnî authors (Brockelmann, F', 670-2, S I, 925-7; W. Madelung, in GaP, ii, 333).
which derived in part from the scholia of their base texts or from the commentaries which were at their disposal. Numerous terms need to be taken into consideration, especially in the domain of logic, even though it is not always easy to tell them apart.

Tafsîr is a generic term which signifies literally “to bring to light, reveal” something which is hidden, and consequently “to interpret, elucidate, explain”, and sometimes even to interpret in the sense of translating. This generic sense appears under the rubric of De interpretatione, in Fihrist, 249, where the authors of writings called “synopses” or “epitomes” (summariam, @rawd, “abridgments” (maddâsâr, takhrî), or “commentaries” (sharks), were defined as exegetes (al-mufassirun). Sharh is “the commentary on a text which is not an interpretative abridgment, but which may nevertheless be of variable length” (Gutas, 35). This can be a developed commentary, ad letteram (“à la lettre”), or an interpretation according to the sense (“à la mânâa”) in the form of a paraphrase (e.g. Talkhsât Safsata, Exposition or Paraphrase of the Sophistic elenchi by Ibn Rushd). It can also have the appearance of notes on the text (e.g. Sharh K. Bûnîmîyds ‘alâ hatî al-ta’tîk of al-Fârâbî; for a full analysis, see Endress, in GaP, ii, 461-73, iii, 19-20; Gutas, 31-43.

V. Other elements of the semantic field of “commentary”.

It is appropriate to include other terms here e.g. takhrî (revision of a text, or even “edition”), a term which refers to remarks on a text of the ancients (al-ma’dâld, al-madrasa al-nahwiyya fi Misr wa ‘l-Shâm, O. Spies, in C. Burnett (ed.), Grundriss der arabischen Philologie, Beirut 1980; M. Muranyi, Shuruh al-a’la, an Arab Islamic city, London 1983, 146). “It is the Street called Straight, the main street of Damascus” in Ibn ‘Asîkîr (N. Ellisfeïf, La description de Damas d’Ibn ‘Asîkîr, Damascus 1959, 85 n. 10) (but in Ottoman times, the three main traffic arteries were called târik suldmîn). Al-shârî al-‘alam came to mean the main axis, of ‘Abbasîd Sâmrârî or the kasba of the Cairo of al-Makrî. In the course of their long history, the names for traffic routes did not necessarily express differences in width, length, form or function. Nor, with the exception of sharh, did they indicate the open and freely-circulated nature or, on the contrary, the closed nature of what they designated. To define the status of a way, legal language resorted to a single criterion, nâfîd or âlît “throughway” and qâf nujd “closed way, cul-de-sac”. A sharh was nâfîd, “it denotes a road properly open at both ends ... a public road where everyone has the right to circulate” (R. Brunschvigel, Études d’Islamologie, Paris 1976, ii, 11), and a road along which clear passage must be maintained.

At the time when cities and towns were being transformed and the vocabulary of urban patterning evolved, sharh became a key element in the new terminology, as is seen in the Khitat al-tawfikiyya al-djadida of ‘Ali Mubârâk Pâsha. Sharh was henceforth used for any road of some importance, corresponding to a “street” or to Fr. boulevard or avenue, as in Cairo, in the quarters built up since the end of the 19th century. Or it could be used only for the main arterial roads, whilst for the secondary ones, other terms, which were part of the local tradition, would be used. This was still the case in Cairo, where, in the historic centre, sharh co-exists with sâkd, hârî, dârî, nujd and zâkâk, in accordance with a terminology laid down by the city administration at the end of the last century. Similarly in Tunis, where the term co-exists with nâfîd and zanka, which are by no means exclusive to the medina.

Bibliography (in addition to references in the article): D. Deverdun, Marrekch des origines à 1912, Rabat 1959-66; J.M. Rogers, Sâmrârî, a study in medieval town planning, in A. Hourani and S.M. Stern (eds.), The Islamic city, Oxford 1970; A. Raymond and G. Wiesbaden 1976; O. Spies, Shurûh—a, pl. ‘shurûh’—“clearly-defined way, main road, highway”: “situated on a main road, at the side of the road (e.g. a house)”.

Compared with other terms having similar urban denotations, such as dârû and zûkâk, the uses of sharh as a common noun are not the most numerous in the pre-modern texts. Thus there is no chapter in al-Makrî’s Alâqîs devoted to this term: the treatise entitled devotes itself to the study of the road of the 9th century, the K. al-Fârâbî’s Alâqîs chemistry ex. “on the road of...” (see S. Denœux, Pierre le Charpentier-Plutarque d’après Ibn Daghîqî et Maqûfî, Cairo 1993, 143). But it also becomes a genuine toponym. In the geographer Ibn Rusta (p.e.), the sharh divides Sârî’s two halves (see R.B. Serjeant and L. Lewcock, Sârî, an Arabic Islamic city, London 1983, 146).

Fernandes, Hadis et prescriptions légales, in IREMAM, L'héritage traditionnel dans les pays musulmans autour de La Méditerranée, ii, L'histoire et le milieu, Cairo 1990. (J.-CH. DEPAULE)

SHAR'I (a.), derived from the root š-an'a, having a primary range of meaning in relation to religion and religious law; also SHAR', frequently synonymous. The word š-an'a is common to the Arabic-speaking peoples of the Middle East and designates a prophetic religion in its totality, generating such phrases as š-an'a Miṣ'at, š-an'a al-Maṣāb (the law/religion of Moses or the Messiah), š-an'a al-Mağfū (the Zoroastrian religion) or š-an'a-šan-nă (meaning our religion and referring to any of the monotheistic faiths). Within Muslim discourse, š-an'a designates the rules and regulations governing the lives of Muslims, derived in principle from the Kur'ān and hadīth. In this sense, the word is closely associated with š-ak [q.v.], which signifies academic discussion of divine law. The noun š-ir is used to designate a single rule is most obvious in the Old Testament into Arabic attributed to Sa'da b. Ishak Ibn Zur (d. A.D. 139). A characteristic feature of the Arabic lexicographical tradition (see 5. below).

1. Shart'a in Kur'ān and hadīth
2. Shart'a in Jewish and Christian literature
3. Shart'a in Muslim literature
4. Shart'a and š-ak
5. Shart'a in the lexicographical tradition

1. Shart'a in Kur'ān and hadīth
1.1. Shart'a occurs once in the Kur'ān, at XLV, 18 ("We have set you on a Shart'a of command, so follow it"), where it designates a way or path, divinely appointed. The cognate š-ata is also used once, at V, 48, in parallel to minhāj, meaning way or path ("To each we have appointed a š-ata and a minhāj"). The verb š-an'a occurs twice, once with God as subject (š-an'a la-kum min al-dīn ... , "He has laid down for you as religion that which he appointed also for Noah"). Shart'a occurs not more than a dozen times, mostly in locutions like š-an'a al-šarī' wa-š-ir, once in a string of terms indicating rules: inna li-'l-imān š-ir'i' wa-š-ir'i' wa-hadīth wa-sunnah. The word š-an'a does not occur with the connotation of religion or law, and the verbal form š-an'a occurs only once with these connotations, in a set of variations of the same hadīth: "God has laid down for his (var. your) Prophet the rules of guidance" (š-an'a l-nabi'hi nūn al-ḥudūd). The noun š-ir, the verb š-an'a and derivatives occur frequently with secular meanings, corresponding to those discussed in 5. below.

This paucity of usage and connotation make it unlikely that these sources constitute the beginning of the development of this term in Islam or in the other monotheistic faiths.

2. Shart'a in Jewish and Christian literature
2.1. The Jewish tradition. The translation of the Old Testament into Arabic attributed to Sa'īd b. Yūsuf al-Pā'yūmī, known as Sa'īdya Gaon (d. A.D. 933 [q.v.]), demonstrates that š-an'a had become a central component of the religious vocabulary of the Arabic-speaking Jewish community. The most commonly used term for translating Hebrew torah is Arabic š-an'a or its plural. When the Hebrew word clearly designates a single rule, or set of rules, the favoured terms are š-an'a and šarā'ī. The same is true when the Hebrew term designates the law as a totality, the law delivered to Moses. There are many instances, especially in Deuteronomy, where the Hebrew word is retained in an Arabic form, al-tauwārī. The use of š-an'a to designate a single rule is most obvious in a group of verses in Leviticus, e.g. Lev. vi, 8, "This is the law of the burnt offering (š-an'a); shara'a"; cf. vi, 14; vi, 25; vii, 1; vi, 7 etc. The plural form is found at Exod. xviii, 20, "And thou shalt teach them ordinances and laws" (al-nūmūm wa t-sharā'ī); cf. xviii, 16. The more general sense, where the word torah means the whole of the law, is exemplified at Exod. xiii, 9, "And it shall be a sign unto thee [Moses] ... that the Lord's law may be in thy mouth" (l-takun š-an'a Allāh fī fi-khā). The plural form is found at Exod. xvi, 5, "That I may prove them whether they will walk in my law, which I have given them" (l-takun š-an'a Allāh fī fi-khā). A characteristic feature of the Arabic lexicographical tradition (see 5. below).

A similar reliance on the nouns š-an'a and š-ir, and the verb š-arka, for reference to God's law-making activities, is found in Sa'īdya's theological (polemical) work, K. al-Amdndt wa 'l-i'tikād. This book, though it reflects Sa'īdya's participation in the Rabbanite-Karaite [see KARAITES] struggle, may be accepted as a reflection of the general religious vocabulary used in polemical contexts by those who shared the monotheistic traditions of the Middle East. Shart'a and its plural designate individual laws (141, 173) and also systems of law revealed by God through prophets (113). Rational laws are distinguished from revealed laws (al-shar'ī' al-akdī'ya wa t-sam'ī'ya, 115-18). Shart'a is used synonymously with š-an'a; and the verb, š-arka with God as subject, meaning to lay down a law (128-9). A context which generates multiple reference to the law (religious system promulgated by a prophet) is abrogation (nabd), the question whether the law of a later can abrogate that of an earlier prophet (131). Arabic tauwārī is used to designate the Pentateuch: š-an'a al-tauwārī, šarā'ī al-tauwārī (139).

2.2. The Christian tradition. A similar use of this vocabulary can be found in Christian writers, discussion of abrogation being particularly likely to generate systematic reference to š-an'a. A characteristic example, from the 4th/10th century, may be found in a polemical tract directed against the Jews, by the Jacobite Ḣābīb b. Iṣāh Ibn Zūrā' [q.v.]. Shart'a refers to a system of laws brought by a prophet and subject (perhaps) to abrogation by later prophets. The word sunna (pl. sunūn) [q.v.] covers the same semantic field. Both terms are extended to carry distinctions
between natural, rational and revealed laws. The Christian religion, the Law of the Messiah, is referred to as sunnat al-Masih (34) and shari'at al-Masih (35).

The question of when this cluster of Arabic terms emerged as part of the self-expression of Jews and Christians is unclear. But, whatever model is adopted for the emergence and early development of Islam, it is necessary to acknowledge the co-existence or prior existence of Arabic-speaking Jewish and Christian communities. The development of an Arabic vocabulary for the expression of concepts and ideas integral to the prophetic religions of the Middle East is perhaps best understood as the common achievement of several communities engaged in polemical encounter throughout the 7th to the 9th centuries A.D. The most radical and stimulating account of this encounter is that of J. Wansbrough (1977, 1978).

3. Shari'ah in Muslim literature.

Shari'ah and its cognates appear, in Islamic religious literature, reflecting the same range and type of reference as in Jewish and Christian literature. Shari'ah (pl. shar'iyya) designates a rule of law, or a system of laws, or the totality of the message of a particular prophet. In so far as it designates a system of laws it is synonymous with the word shar', which is probably the more common word in juristic literature for divine law. The verb shar'ah may appear with God as subject (following Kur'anic usage). More frequently, the process of demonstrating the law is a prophetic activity, and the word shar'i (law-giver) characteristically to Muhammad in his function as model and exemplar of the law. In a rare extension of meaning, the word shar'i is transferred to the jurists, thereby highlighting the creative aspect of their interpretative activity (al-Sha'ist, iv, 245). These patterns of usage may be found in all the major genres of religious literature.

3.1. Kalâm. Theological literature is likely to generate reference to shar'i wherever the message bearing activity of a prophet becomes the focus of discussion. Al-Bakillânî (d. 403/1013 [g.a.]), in a discussion of prophets as bearers of the divine message (al-kadîd al-'akliyya), phrased the phets as having the quality rule (al-shar'iyya) or laws (al-shar'at al-Ma'asû). Here shar'i functions perhaps as a plural for shar' (20). In the Mu'tazili tradition, the words shar', shar'i, etc., kept their general sense, meaning the totality of a prophet's religious activity, but were also used systematically to distinguish rational from revealed laws. The Shi'ite (Mu'tazili) scholar al-'Allâma al-Hillî (d. 726/1325 [g.a.]) accounts it a benefit of prophecy that the prophet brings rules which are not accessible to the intellect; he refers to these as shar'î or 'shartr and wâli shar'. The Shi'ites and the Sunnis both continued this usage.

3.2. Ta'fîr. Works of Kur'anic commentary draw on the conceptual structures of kalâm while developing some arguments specific to Kur'anic usage. The word shar' is usually declared to be synonymous with shar'. Comparison of Kur'ân, V, 48 ("To each [community] we have appointed a shar'ah") and XXII, 13 ("He has laid down—shar'ah—for you as religion—dîn—that which he had laid down also for Noah") prompted a systematic distinction between God-given law, and different for different prophets, and dîn, implying recognition of the one God, and the same for all prophets. From al-Tabari, citing Kätâba, ad V, 48: the Torah, the Gospels and the Kur'ân have each their own shar'ah... but dîn is one, meaning "ta'wîl and ikhlasbi fî-l-dîn," and brought by all prophets.

3.3. Juristic literature. In so far as juristic literature gives an account of or a statement of rules, it need not generate self-referring locations. When it does so, there was a considerable number of technical terms meaning rule: sunnat/sunnah, hadîm/ahkâm, fatâsfi/fatî'dîn, hadîd/hadîd, shar'ah/shar'i. The latter does not dominate in the earliest texts. Even later, general reference to the law is more likely to elicit the word shar' than shar'i. Systematic distinction between ordinary linguistic usage and technical juristic usage depends on the contrast hurûf/shar'ah. Hermeneutical literature (works of wali al-fihû) generated an increasing quantity of reference to the law, the law-giver etc., but the earliest work of this kind, the Risâla of al-Shâhidf, makes little use of the word shar'i or shar'. Later works generated numerous references. A characteristic context relates to the question whether Muslims and/or Muhammad were subject to the laws of earlier prophets. Al-Ghazâlî, in his Musta'fî, phrased the question in relation to shar'ah and shar' man kâila- nâ, our law and the law of those before us. He asked whether Muhammad was bound by the law (shar') of earlier prophets, and whether he abrogated the shar'i (sic) of Moses and Jesus. The rapid transition from shar' to shar'i suggests no distinction between these terms in this context. Espousing one of the views current in juristic circles, al-Ghazâlî affirmed that the shar'i of our Prophet (shar'at rasûl-nâ) abrogated previous systems; for, if Muhammad had been bound by any other shar', he would not deserve the title of law-giver (qâ'îf).

Most of the problems attendant on the word shar'i were perspicuous to the tradition and capable of being explained. The Hanâfi jurist Ibn 'Abîdîn (Muhammad Amin b. 'Umar, d. 1255/1836) explained it as having the meaning of a passive participle of the verb shar'a, meaning that which is laid down, or decreed. When the Prophet is identified as the law-giver, the shar', this is metaphoric usage (mudâ'îz); in truth (hâlik), it is God who is shar'. Shar' means the same as milad and din (i.e. the totality of religious beliefs), but it may be applied absolutely to the rules (ahkâm) governing human actions. Both shar'i and din may be ascribed (in a genitive construction) to God, the Prophet and the community: God's law, the Prophet's and the community's law. (Ibn 'Abîdîn, 1, 11)

4. Shar'i and fîkh.

The academic discipline whereby scholars described and explored the shar'i is called fikh. The word designates a human activity, and cannot be ascribed (in a genitive construction) to God or (under certain conditions) to Muhammad. Fikh is a genitive construction with the name of a scholar: the fikh of Mâlik, the fikh of Ibn 'Abîdîn. The shar'i, contained in God's revelation (Kur'ân and hadîlifî), is explained and elaborated by the interpretative activity of scholars, masters of fikh, the fakharî. Since this is in practice the only access to the law, the two words are sometimes used synonymously, though shar' retains the connotation of divine, and fikh which of
human. Since the late 19th century, the linguistic
caique al-kdnun al-islami (Islamic law, borrowed
from European usage) has become a part of Muslim dis-
course and carries with it connotations of legal sys-
tem, as in modern states [see KANUN]. Western studies
of fiqh are still dominated by the works of Joseph
Schacht, who produced the articles fiqh and short's
for EI, the former lightly edited for EF.

4.1. The origins of Islamic law. The earliest large-
scale and systematic expressions of the law are found
in a bundle of texts attributed to scholars of the late
2nd/8th and early 3rd/9th centuries, notably Mālik
b. Anas (d. 179/795), al-Shāfi`ī (d. 204/820), al-Shay-
bāţī (d. 189/805) and Abū Yusuf (d. 182/798 [q.v.]).
The last two are pujiers of Abū Ḥanifa (d. 150/767
[q.v.]), who, together with Mālik, al-Shāfi`ī and, later,
Aḥmad b. Ḥanbal (d. 241/855 [q.v.]) gave his name to
a broad tradition or school of madhhab (jurispru-
dent) of juristic thinking. These four schools dominated the Sunnī
community. The Imāmī Shī`a developed an inde-
pendent tradition of their own (finding literary form
only in the 4th/10th century). And there were a num-
ber of minor traditions, e.g. those of the Zaydfs
and Khurāṣīs (both alleged to be early) and the Zāhiris
(or Literalists), followers of Dāwūd al-Zāhirī (d. 269/
882 [q.v.]). The emergence of the dominant traditions
is presented inside Islam as the result of a process,
described in historical terms, but perhaps a narrative
expression of a theological conviction. The Prophet,
by virtue of his ideal practice or sunna, was exemplar
and model for his followers, whose duty it was to
conform to his sunna. To this end, his words and
deeds were preserved by his Companions in the form
of discrete narratives or hadith which were passed on
from generation to generation, giving rise to discus-
sion, debate and finally to formal juristic thinking, or
fiqh. The eponymous founders of the schools, by virtue
of their piety and commitment to Kur`ān and hadith,
together with their learning and capacity for system-
atic thought, derived from this inheritance structures
of rules which were adopted by subsequent genera-
tions, and preserved and developed in an ongoing tra-
dition of commitment and loyalty. The actual and
historical location of the juristic traditions in Islam were
thus traced back to the Prophet through the decisive
intervention of great jurists.

As an account of history, this sequence of events
was challenged already by Ignaz Goldziher (Mukh.
Stud., 1888-90). Building on his work, Schacht offered,
in his Origine, a coherent account of early Muslim jurispru-
dence. He proposed that the earliest works were reflec-
tions of a "living tradition" which had grown locally in diverse countries (Kufa, Basra, Dama-
cus, Mecca, Medina). The systematic structures that
ever emerged reflected local (and Imperial, Umayyad)
prac-
tice, and the ongoing thought of local scholars. They
were not dependent on Prophetic hadith, perhaps not
even on the legal aspects of the Kur`ān. Increasing
polemical encounter, in the early 'Abbasid period, led
to a search for justification of the law and this took
the form of appeal to Prophetic practice expressed in
the form of hadīth. The first scholar to argue sys-
tematically that law was necessarily related to Prophetic
hadith was al-Shāfi`ī, who emerges, for Schacht, as
the master architect of Islamic law. Eventually all the
schools succumbed to al-Shāfi`ī's argumentation and
developed a common hermeneutical approach to the
law, presenting it as derived, by a systematic act of
interpretation, from Kur`ān and hadith. According to
Schacht, the demand for Prophetic hadith, even before
al-Shāfi`ī, and certainly after him, ensured that they
were produced (created) in numbers appropriate to
the need. Schacht derived his theory primarily from
the study of al-Shāfi`ī's Umm and Risala, works which
not only exemplify (in marked contrast to other early
works) the principle of Prophetic authority for the law
but systematically justify the six major schools for
their failure to adhere to this principle.

All subsequent scholarship in this field has responded
to Schacht, whether to refute, to qualify, or to con-
firm and extend his findings. Several Muslim scholar-
ars (e.g. M.M. Azmi) have denied them. Both Muslim
and secular scholars have searched for qualifications
and refinements whereby to discover the antiquity and/
or authenticity of at least some Prophetic hadīth (G.H.A.
Jaysboll, D.S. Powers). J. Wansbrough has developed
Schacht's methodology, arguing that the Kur`ān too
must be recognised as the end product of two cen-
turies of community experience (1977). N. Calder
argues that the major early works of Islamic law are
not authored, but organic, texts, reflecting generations
of thinking about the law, expressed through succes-
sive redactions of school material (1993). F. Rahman
initiated a Muslim theological response to Schacht's
ideas (1965).

4.2. The literature of the law. There are a num-
ber of genres of juristic literature, of which the two
most important are furū` al-fiqh (a literature of rules)
and wasl al-fiqh (a literature that identifies the sources
of the law and the methodology for deriving rules from
revelation). It is possible to identify a number of minor
genres, but many of these can be classified as mono-
graphic developments of topics that are proper to furū`
(e.g. special studies of the rules relating to govern-
ment, or judicial practice) or wasl (special studies of
analog or consensus, etc.). Collections of fatwas (sing.
fatwa [q.v.]) and studies on the authority of mujtahīds (sec-
tion 4.3, below) may be recognised as independent
genres, the first having some affiliation to works of
furū`, the second to works of wasl.

Furū`. The genre of furū` is continuous from the
3rd/9th to the 13th/19th century. All the major works
of the genre have the same basic structure. They offer
a network of rules roughly grouped into topics. The
major topics of the law are, first, purity, prayer, alms,
fasting and pilgrimage. These, together, sometimes,
with dhimmīs, are the major 'obdāt (acts of worship).
Their importance is signalled by their being posi-
tioned at the beginning of a work of furū`. More
loosely ordered are the remaining topics of the law,
the mu'amālāt (interpersonal acts). These include
family law (marriage, divorce, inheritance, testamen-
tary bequest, slavery, etc.), mercantile law (contracts
of sale, debt, hire, loan, gift, partnership, etc.), laws
relating to agency, land ownership, compensation for
injury, killing and the usurpation of goods, penalties
(resisted to the divinely specified penalties for
adultery, false accusation of adultery, theft, wine-
drinking and highway robbery), judicial procedure
and other topics. Though various attempts were made
to devise more analytical approaches to the topics of
the law, a sequential approach based on loose groupings,
and subject to considerable variation, prevailed. Since
the topics are not a single category, the major categories
of a pious, and a social, life, and since, further,
the tendency of the jurists was to hold on to the con-
crete and to elaborate precise and distinct "cases" for
analysis, a work of furū`, formally at least, constituted
a literary depiction of social reality in normative
form. As works of literature, books of this kind were
subject to the usual tendencies of literary formal-
ism, sufficiently indicated in the notions of linguistic,
structural and conceptual virtuosity, of imaginative exploration, of realism transformed into artifice, etc. At the same time, in so far as they were intended to control and guide social life, they display also qualities of practical concern and hard-headed realism. The interplay of literary and imaginative qualities with practical and mundane ends was not predictable and varied immensely both within a work and across works and schools. The four major schools of law, and the Shi'i tradition, show a broadly similar approach to the genre and a broadly similar exploration of its possibilities.

To the casuistic and exploratory aspects of a work of furū' were added patterns of justificatory argument. These had two major forms. First, the interpretative relationship between school tradition (madhhab) and revelation (Kur'an and Sunna) was re-expressed from generation to generation, constituting a major part of the ongoing task of jurists. At the same time, loyalty and commitment to tradition were expressed through demonstration that later articulations of the law were derived from and were justifiable in terms of earlier articulations within the school. Works of furū' had thus a dual hermeneutical aspect: an interpretative relationship to the school tradition and a further interpretative relationship to Kur'an and Sunna. It is the former which dominates. Jurists did not act as independent interpreters of revelation, they submitted to the authority of the school and the eponymous founder. They were committed, by a prior act of loyalty (usually determined by birth or geography), to a discursive, hermeneutical, engagement with their past. The creative aspect of their work was termed iṣḥābāt, the duty of submission taskīlī [q.v.]. The original act of iṣḥābāt characteristic of the eponymous founders was absolute and independent, that of succeeding jurists qualified and limited.

The various components of a work of furū' can then be summarised with reference to topics and concepts, rules and "cases", and justificatory argument related to Kur'an and Sunna, and to school tradition, the whole capable of being drawn towards an exploratory and hypothetical pole or towards a pragmatic and practical pole. The literary tradition as well as the legal tradition was determined by the distance which point (perhaps not accidentally) towards an infinite concern with detail. This tendency naturally engendered the opposite need, namely that of synthesis, control and concision. The play of expansion and concision is reflected in two literary types within the genre, mukhtasar and mabsūṣ. A mukhtasar or epitome is a concise exposition of the law, often preferred, permitted, disliked and forbidden, and the distinctions between valid, defective and null (ṣaḥīh, ḥāṣīd, bātīl). The sources always include Kur'an, hadith and consensus (issāt) [q.v.], and might include intellect (limited for the Sunnis to a presumption of continuity, issāt al-bā'il), the law of earlier prophets, the opinions of the Companions, juristic preference (issāt al-bal), and public welfare (mawāla [q.v.]). The hermeneutical principles relate first to language and rhetoric (usually presented in a set of antithetical pairs: ambiguous and clarifying, the evident and the inferred, commands and prohibitions, general and particular, etc.) and secondly to the operation of analogy (iṣābāt [q.v.]).

All of these items were contained in an open-ended and modularised and exploratory and expository pattern of discourse. The body of hermeneutical principles leads to conflicting possibilities (ta'rīd) and to the exercise of preference (takhfīd), the methodology of which is explained under the heading iṣḥābāt. iṣḥābāt literally means effort. Technically, it means the exertion of the utmost possible effort by a trained jurist, taking into account all the relevant texts and principles of interpretation, to discover, for a particular human situation, a rule of law. Underlying this definition there is an important epistemological message. It conceives that most of the details of the law are not known for certain but are a matter of skilled and pious deduction, leading, however, only to opinion. Final certainty on the details of the law is not accessible, but the duty of searching for and justifying opinion by argument is absolute. Committed in this respect to argument and debate, the jurists (in this context mudājahid, these who undertake iṣḥābāt) also acknowledged a need for final decisions in particular cases, and a necessity for the jurist to argue that the result of an act of iṣḥābāt was binding both on the mudājahid and, where relevant, on those who were not trained in the law. The latter (the 'āmmīs) were required to submit to the mudājahid, becoming thereby mukāllātī (lit. followers or imitators). In so far as a mudājahid responded directly to a particular question, he was acting as a mujtihid and his decision was
a fatawa. This network of topics was a part of the hermeneutical thinking of the Sunni and Shi'i traditions, and it was capable of varied and sometimes highly individual development.

4.3. Shar'i practice. The literature and intellectual structures which were the highest expression of shar'i had their most important social realisation in the Islamic educational system. With the emergence of madrasas [q.v.] in the 5th/11th century, fikh was recognised as the chief end of education, and retained this position until the decline of the traditional system in the 19th and 20th centuries. Common to all Islamic lands, and taught almost exclusively in Arabic, the curriculum provided cultural homogeneity and fostered the emergence of a pan-Islamic cultural elite. The discipline of fikh became a powerful and flexible intellectual tool, adapted to various social needs, aesthetic, imaginative and theological as well as strictly legal. The training in this discipline was usually practical in respect of the needs of the mercantile classes and the governing bureaucracies, as well as the religious hierarchy.

The topics and concepts of the law were closely aligned to life in the community and could be made so by systematic exploratory thought. But a work of fatawa was never a set of rules governing practice in the way that regulations and statutes do. In a given city, at one time, different jurists produced different works, reflecting different concerns; intended to influence certainly, but also to provoke thought and to delight. The actual realisation of the law depended always on personal and local factors: the customs of a family or a quarter, the traditions of a city or a region, the specific rules and practices of a judge, a governor, or a sultan. The pluralist and exploratory aspects of the law had a varied and unpredictable relationship to the necessarily single and pragmatic actuality. This relationship itself became a part of the subject matter of fatawa. The interplay of legal theory and reality has become increasingly an object of scholarly study, exemplified in Heyd (1973) and Johansen (1988).

One aspect of the development was the systematic transformation into administrative structures. Central amongst these was the office of judge (kādit [q.v.]). His competence covered many aspects of family law (marriage, divorce, inheritance etc.), the administration of charitable endowments (waqf) and the property of orphans, and the adjudication of civil disputes. His appointment and terms of office were controlled by political authority. His efficiency was often thought to be limited by the stringency of shar'i rules and this led to the emergence of parallel judicial structures (called mazālim [q.v.] in early 'Abbāsid times) which had a more pragmatic attitude to the law and were closely related to government. In Ottoman times the integration of the kādit into the structures of government was nearly complete. (Tyyn, 1960)

Mediating between the law as theory (object of study and subject of literary endeavour) and law in practice was the mufīs. The mufīs was a jurist, preferably highly qualified, who made himself available to give specific answers to specific questions of the law. In many areas and periods, and notably under the Ottomans, the higher ranks of mufīs were controlled and salaried by the government (Heyd, 1969). The responsa of mufīs were called fatāwa, and, in the case of intellectually outstanding, or politically important mufīs, might be preserved either as individual items or in collections. These have been recognised as important to our understanding of the law in practice (Masud et al., 1995). Theoretical accounts of the authority and ranks of mufīs stimulated some of the most instructive general theories of Islamic law.

4.4. Modern developments. From the mid-19th century, three major factors affected the history of the Shar'i, all of them, at least in part, a result of Western influence. The first was the creation of secular educational systems, aimed initially at the needs of the military, then of the administrative and mercantile classes. This development reduced the numbers of students in the traditional system, deprived them of a career structure, undermined their social alliances, and marginalised the subject matter of the curriculum. In the Shi'i world, where the jurists had greater access to independent finance, the major centres of juristic education survived better, but even there, there was a decline in provincial centres and some loss of status. Secondly, with the emergence of modern, independent nation states, there was a rapid development of law-codes, constitutions, and statute law. In some respects, these are continuous with the procedures of government by decree that characterised older systems. But the enactment of the Magdala (see magelle) (a partial codification of Hanafi law for practical ends) in 1876, by the Ottoman authorities, initiated a long history of (selective) codification of traditional law that continued through the 20th century. The reformist ideas of theoreticians (like Muhammad 'Abduh, d. 1905 [q.v.], in Egypt) brought increased flexibility based on a renewal of ishāḥād, an abandonment (or curtailment) of school loyalties, and a patchwork approach to the juristic tradition as a whole (ulūfīk [q.v.]). Jurists and the religious-minded found it possible to accommodate themselves to the idea of constitutions. A majority even of the Shi'i jurists supported the Persian Constitution in 1906. Throughout the 20th century all modern Muslim states have acquired legal systems, suited to modern nation states, in an astonishing act of creative system building, in which the Shar'i has always been one influence (Western legal systems being another, often a dominant influence). The actual role of the Shar'i, meaning the tradition of fikh, has varied both in terms of its symbolic foregrounding and in terms of its real input (always greatest in the area of family law) (Anderson, Coulson).

A third area of development relates to political opposition. The ideology of political opposition in the Muslim world has been influenced by Western thought (by French revolutionary, or socialist and communist ideologies, etc.), but is nearly always accompanied by appeal to the Shar'i as an ideal of social justice. In these contexts, the word is characteristically deprived of detail, of complexity, and of association with the intellectual tradition of fikh. It functions instead as a constitutive element in a demand for loyalty, unity, and commitment; it represents an ideal (unreal) governmental system. With this pattern of connotation, it permeates the ideological statements of the Muslim Brothers and of more recent fundamentalist groups. It is sometimes closely associated with the name of the scholar-hero Ibn Taymiyya (q.v.) [exploited for his arguments in favour of a renewed ishrād, based on a return to the earliest generations—the salaf [see alsalaf wa 'l-khalaf, salafyyā]; or with selected items of the law which take on the disproportionate ideological burden (e.g. the hadd penalties for fornication).

Neither the practical aspects of the history of the Shar'i in the 20th century, nor its ideological aspects, take up or draw on the complex of cultural, philosophical and theological messages that are embedded in the tradition. In so far as these messages can be
recovered and translated into idioms appropriate to the 21st century, it seems likely to be the task of modern universities in the Muslim world, these being now the dominant institutions that preserve the cultural inheritance of traditional Islam.

5. Shari'a in the lexicographical tradition.

The lexicographical tradition recognises two major (and a number of minor) areas of use which are without religious connotation. In a corpus of poetry and of hadith evoking a pastoral and Bedouin environment, the verb ḥarā'a and its derivatives relate to watering animals at a permanent water-hole. The verb implies the verb and its derivatives relate to watering animals en route to or lapping at a place at which the animals drink, a place and not a road—maṣṣaf, maṣṣaf. Ḥarā'a, ḥarā'a, possibly ṣafā', all mean to drive (or lead) animals to water. Adjectival usage indicates animals en route to or lapping at a water-hole, or the point of entry to it, the place at which the animals drink, a place and not a road—maṣṣaf, maṣṣaf. Shari'a, ḥarā'a, possibly ṣafā', all mean to drive (or lead) animals to water. Adjectival usage indicates animals en route to or lapping at a water-hole, or the point of entry to it, the place at which the animals drink, a place and not a road—maṣṣaf, maṣṣaf. Shari'a, ḥarā'a, possibly ṣafā', all mean to drive (or lead) animals to water. Adjectival usage indicates animals en route to or lapping at a water-hole, or the point of entry to it, the place at which the animals drink, a place and not a road—maṣṣaf, maṣṣaf.

The language of Islam is primarily Malay and Indonesian and cognate languages. Islam dates from the late 14th century and from that time the Shari'a has been expressed in a number of different forms. In general, we can distinguish three such forms.

(l) The pre-modern texts.

These are in Malay, Javanese and Arabic, and extant mss. date mostly from the 18th and 19th centuries. The texts in Malay most usually, consist of elements of fikḥ as well as localised provisions (adat) [see 'Adat]. Commonly, these two elements are distinct and separate parts, and may easily be distinguished. However, it is not uncommon in some texts (e.g. Malacca laws, the Undang-undang Minangkabau) for explanations to be given as to different functions for each source of law. (One, adat, expresses the practice of mankind, the other, fikḥ, the will of God. Differences are always reconcilable in the texts. The Java-Muslim texts, on the other hand, are written in an Indian-adapted form (aṣwa, pepakem, javansing) in which the Islamic element is confined to references to promulgation by a Muslim ruler and to ḥukum, the law of God. There is little or no substantive fikḥ. One has Javanese laws administered under the aegis of a Muslim sovereign. Whether this was always the case in Java is uncertain because of the Dutch practice (18th-19th centuries) of revising or improving ('verbeterd') existing mss. for administrative use.

The major Arabic texts of the Shari'a circulated widely in South-East Asia. The standard works of al-Shafi'i, al-Ansārī, al-Nawawī and al-Haythami were either imported from the Middle East or were available in locally produced reprints. They were, and still are, the standard works for use by ḥaṭth and in the pesantren [q.v.]. It was common practice for interlinear translation and/or glosses to be added. There was a considerable industry in the translation of these verses, especially into Malay. In the 18th and 19th centuries, elements of each of these pre-modern laws appeared in European (Dutch and British) rationalisations of Muslim laws (see 'Anglo'). The practice was to take selected portions of the Shari'a and incorporate them into administrative manuals for colonial use. There are many examples (see below).

To sum up: there is a vast mss. source which shows the adaptation and incorporation of the Shari'a into South-East Asian laws. The forms vary wildly and, so far as context is concerned, the Shari'a is reproduced in part, re-defined and re-stated and (in some cases) exactly translated. However, by the mid-19th century, one can say that there was a definite trend toward the more classically-exact Arabic language prescription. This was a consequence of greater access to the Middle East centres of learning, brought about ironically enough by the colonial powers themselves,
but it was a trend interrupted by the imposition of colonial rule.

(II) Shari'a in the colonial period (18th-20th centuries).

In the pre-European Muslim lands, Islam was central to kingship, rule, sovereignty and morality. With European dominance from the 18th century onwards, Islam lost this function. Its status was reduced to that of a private religion and its political function was reduced to but a pale shadow, if that, of its former position. The Shari'a, likewise, was similarly limited in its scope and narrowly limited in its implementation.

(a) The Netherlands East Indies.

Islam was always an ideology of resistance to Dutch rule in the Indies and this intensified in the 19th century when V.O.C. rule was replaced by direct Netherlands State Government (1800). From this time, the N.E.I. Government adopted a consistent long-term policy toward the Shari'a in its legal administration.

N.E.I. legal policy was to introduce separate legal regimes for the various population groups. Thus for Europeans or persons assimilated to that status, the law was the law of the Netherlands. For the native population(s) it was adat (custom). There were about nineteen named adat law areas (“adatrechtskring”). The Shari’a, as such, had no place in this system. Islam was a religion only and not one which necessarily had legal consequences. This policy of separate law regimes became ever more complex throughout the 19th-20th centuries and ultimately proved unworkable.

For example, special provisions had to be made for Native Christians, provisions had to be made for assimilation, i.e. change from one group to another, there were serious difficulties in inter-racial family law as well as in commercial law, and a complex intra-racial law of conflicts of laws had to be developed.

For the Shari’a, it was realised by 1882 that Islam could not be excluded from the legal régime, whatever its status in politics might be. In that year a “Priests’ Court” (Priestertribunal) was instituted for Java and later extended.

Its competence was severely limited, mainly to family law but excluding inheritance, and its decisions had to be approved by the secular courts. Substantial revisions were made in 1937 which extended jurisdiction and also extended this competence of the courts (now the “Penghulu Courts”) to Borneo. At the same time, the 1937 law withdrew jurisdiction in specified forms of property which were also in dispute in the civil (Landraad) courts.

In short, the Shari’a was subject to very restrictive laws and its pre-colonial trend toward a more exact implementation was halted. On the other hand, it received a new form; now it was expressed in regulations and in bureaucratic practice. These are characteristics which persist into the post-colonial period (below). It is the politics of laws, rather than the Shari’a itself which determines the status of fikh.

(b) The British Territories.

These comprised the following:

(1) British Burma (1826-1947). The Islamic presence in Burma was an accident of imperial expansion. Muslims were immigrants, and the history of Shari’a is the history of Burma in Bengal. The only exception is some precedent on persons of mixed race (“Zerbadi”), one of whom was Muslim (see references).

(2) Second, the Straits Settlements and Malay States (1786-1957). It was British policy to recognise and give effect to the “manners, religions and customs” of the subject peoples. In effect, this meant the legal recognition of religious laws in the areas of family law and land ownership. To this extent, the Shari’a had recognition in purely family and religious (e.g. mosque administration, wakf) matters. However, there are some special features which should be noted. First, references were taken from the pre-modern texts, but only in relation to land, and not to religion as such.

Second, the Shari’a administered in the courts was taken from colonial experts not from the standard texts. It was only in the 1930s that standard texts from British India were commonly consulted. Third, Shari’a was never permitted to influence inheritance where land was involved; this was always a matter governed by adat.

From the late 1880s, the Shari’a gradually came to be organised in legislation and in the creation of a Shari’a court system, together with the necessary bureaucracy. Various “Muslims’ Ordinances” or legislation with a similar name were promulgated. The purpose of the legislation was to regulate marriage (by registration), define the duties of the kadi, and regulate property matters as between husband and wife. The legislation was many times amended. The point is that Shari’a, while recognised in a limited way, was a “local” law or a “personal” law for a defined group. The Shari’a was dependent on recognition by the colonial authority. It had no existence outside of its colonial dependence, and it was never the law of the country.

(3) British Borneo comprised Sarawak (1841-1963) and British North Borneo (1888-1963). In both cases, the Shari’a was only one of a number of “native laws”. There was no attempt to apply it; instead, there was a mélange of custom (adat) with some rather eclectic, mostly inaccurate, selections of fikh. This composite was not imposed by the British authority.

Instead, by taking evidence from the local Muslim populations it grew and took on a life of its own. The most striking example is the Undang-undang Mahkamah Melayu Sarawak “Laws of the Sarawak Malay Court” (1915).

(c) French Indo-China and the American Philippines.

These can be dealt with rather shortly. In the Indo-China territories, the minority Cham [see CAM] of western Vietnam and eastern Cambodia were Muslim. There were no links to Java. The only reliable information dates from 1941 (see Bibl.) and shows a sort of “Customary Islam”. For the Philippines [q.v.], the main Muslim population is in the southern islands.

Here, the Shari’a was only one element in an adat-Islam complex of prescriptions. While in respect of the Cham the French did manage a classification, that of civil asiatic assimile, in terms of private international law, the Americans attempted nothing of the sort. Islam was considered only in political terms; the Shari’a/adat was ignored.

(III) Shari’a since the Second World War.

The end of the war saw the effective end of the colonial presence in South-East Asia. For Islam, this had two important consequences. First, Islam could now have an open and legitimate political presence in what became Indonesia and Malaysia. The result was that the Shari’a immediately attained a status of something more than a personal law. Indeed, even in the transition periods, new provisions were already being made.

(a) Indonesia.

The Republic Indonesia has had a complex history since 1945, and the history of Islam has been similarly complex. The colonial courts system (now renamed Pengadilan Agama) has been retained and extended to all of Indonesia. In addition, a Department of Religious Affairs has been established for the whole
Republic. The jurisdiction of the courts has been extended somewhat, though not to the extent asked for by Islamic activists. However, the latter have been successful in preserving the position of Shari’a in the contemporary reforming legislation, such as family law. There is no Muslim or Islamic Code of law as such in Indonesia. Various drafts have been proposed and are still under discussion.

(b) Singapore and Malaysia.

The 1950s saw a considerable activity in the regulation of Shari’a. Singapore and all the states of Malaysia now have enactments (The Administration of Islamic [or Muslim] Law) in force. Generally speaking, the legislation provides mechanisms for (i) the determination of Shari’a’s entrusted to a Council (Majlis) of scholars; (ii) a system of Muslim courts; and (iii) statements of substantive principles of law, including family law, trusts and offences against religion. In Malaysia, though not in Singapore, constitutional amendments in 1988 have re-enforced the Shari’a. Since the 1980s also, the various states in Malaysia have considerably extended the scope of Shari’a.

(c) The Philippines.

After many years of neglect under the Spanish, American, and Republic of the Philippines’ governments, the Shari’a received formal recognition in 1977 with the proclamation of the “Code of Muslim Personal Laws of the Philippines”. It is in five books and covers persons and family relations, succession, disputes, legal opinions penal provisions and transition provisions. In short, the Code recognises the separateness of Islamic principle and provides for its administration in the Philippines for the first time. Data are lacking on its success or otherwise at the moment.

(d) General.

The Shari’a has been much re-defined in South-East Asia. We can trace adaptations to local form and culture as in the pre-modern texts, and its colonial redefinitions into European form. These have been continued into the post-War years. More recently, however, there has been a consistent trend toward reintroducing the rules of Shari’a in a more classically accurate formulation. If this progression is even partly implemented, for the first time, in the application of a “classical” Shari’a to South-East Asia. The legal history of Islam in the area will thus have come full circle; from its introduction in the Arabic, its social and political implications, since it favours a classless society and a revolutionary ethos. Therefore, Abü Dharr [q.v.], a “God-worshipping socialist”, and Fātimah [q.e.] are presented as role-models for modern Muslim men and women. Sharf’ati’s sometimes wretched of the earth translated and with whom he corresponded. Upon his return to Iran, in 1964, he was arrested for importing banned books and jailed for several months. After his release he taught, first in a village and then in a high school in Mashhad, and he was employed at the university of Mashhad to teach sociology and history of religion. In 1970 he was dismissed and two years later he went to Tehran, where he soon became the key figure of the Husaynīya-yi Irshad, a centre for the study of Islam, established in 1965. At the end of 1973 the centre, renowned particularly for the well-attended public lectures it organised, was shut down by the government and Sharf’atī went into hiding, but after some time he gave himself up in order to secure the release of his father, who was kept hostage. After 18 months of solitary confinement, he was allowed, in March 1975, to return to Mazinān where he was kept under constant police surveillance. In the spring of 1977 he managed to go to London, but shortly after his arrival there, he died of a heart attack on June 19.

His ideas centred around the reconstruction of true Islam, which he equated with the original Shari’a Islam, i.e. the Islam of ‘Alī and his family and their patriarchs, as opposed to the highly institutionalised and clerical (post-Šāfawī) Shī‘ism. In this original Islam, tawḥīd is central not only in its theological, but also in its social and political implications, since it favours a classless society and a revolutionary ethos. Therefore, Abū Dharr [q.v.], a “God-worshipping socialist”, and Fātimah [q.e.] are presented as role-models for modern Muslim men and women. Sharf’atī’s sometimes revolutionary approach to Islam made him popular with many young Iranians, university students in particular, as well as with some more reform-minded members of the Shī‘a clergy. In the eyes of the traditional segments of this clergy, however, he lacked the necessary qualifications to be an authoritative spokesman on Islamic affairs. Sharf’atī is often considered to be one of the most important ideologues of the process culminating in the Islamic Revolution in Iran. However, there is no real congruence between his ideas and the theoretical foundations, let alone the policy, of the ensuing Islamic Republic of Iran. Nevertheless, it is not to be denied, that his ideas have played and still play an important part in the discussions on the role and significance of Islam, both in Iran and through the translation of several of his writings, in many other countries of the Islamic world.

Bibliography: In the absence of a comprehensive and religious study of Sharf’atī’s ideas and reflections on his life and ideas are to be found in S. Akhavi, Religion and politics in contemporary Iran. Clergy-state relations in the Pahlavi period, Albany 1980, 143-50; H. Dabashi, Theology of discontent. The ideological foundation of the Islamic Revolution in Iran, New York and London 1992, 102-47; N.R. Keddie, Roots of revolution. An interpretive history of modern Iran, New Haven and London 1981, 216-25; M.M.J. Fischer and

SHARʿAT MADARĪ, ĀVAT-EH LĪHAYĀT MUSLIM- MAD KĀZĪM, a high-ranking and influential Iranian cleric (d. 1986). He was born in 1905 in Tabriz where he started his theological studies. In 1924 he continued his studies in Kūm, and in 1935 he returned to Naḍajf. His return to Tabriz was the starting-point of a career as a teacher, first in his native city and subsequently in Kūm, where he had moved toward the end of the forties, at the invitation of Ayyatullāh Būrūjirdī (q.z. in Suppl.). Here he became one of the most respected leaders of the Shiʿī community and in his capacity as Mardī-i Taklīd (q.z.) he drew his support mainly from the Ādārī-speaking part of the population. In the 1960s he started an institute for Islamic education and propaganda, called Dār al-Tablīgh. From the educational point of view, the programme offered by the institute to boys and later on also, albeit separately to girls, stood midway between the curricula of a modern school and the traditional madrāsā system. The propaganda activities of the institute included the publication of books and journals. Three of the journals were in Persian, Maksūbat-i Islām (“School of Islam”), Nasīr-i Nāv (“New Generation”) and Payām-i Ṣādī (“Glad Tidings”) for adults, for adolescents and children respectively, and one in Arabic, al-Ḥādī. The Dār al-Tablīgh also provided for the training of preachers, and finally served as an oracle for many Shiʿīs outside Iran, who consulted the institute on religious questions. The only book which Sharʿat madgānī appears to have published, was his version of the thesis that traditionally confirms a cleric’s position as muḥādīth, Taṣdiḥ al-mastāwil. His ideas, which he mainly expressed in interviews, can overall be characterised as the ideas of highly traditional Shiʿī cleric. And so, during the Islamic Revolution, he strongly supported the view that the clergy must not be directly involved in politics. He was one of those who favoured the model incorporated in the Iranian Constitution of 1906-7, that accorded to the clergy, or, to be precise, to a committee of five muḥādīth, the right to monitor the legislative process and to veto any legislation that they judged was incompatible with Islamic laws and regulations. His name and ideas were claimed by the predominantly Ādāharbāḏgānī Muslim Republican People’s Party, although he himself carefully avoided direct association with the party, as he equally carefully avoided accepting any official posts. In the discussions concerning the constitution of the Islamic Republic, Sharʿat madgānī protested against the fact that the draft constitution had not been submitted to a constituent assembly. A compromise was reached, to the effect that an Assembly of Experts, consisting of 73 elected members, was given the power to amend the draft. But when the new draft was presented and about to be submitted to a referendum, Sharʿat madgānī expressed his disagreement with the leading principle of the intended constitution, viz. the wilāyat al-fakīh, that was to give the clergy a direct and even ultimate say in politics. He even threatened that he would abstain from voting. Thereupon his house was attacked and there was even an attempt on his life (on 5 December 1979), which provoked a general strike and demonstration in his home town Tabriz. But Khumaynī and those who shared his view proved too strong for Sharʿat madgānī and his partisans. In a referendum the overwhelming majority of the Iranian people voted in favour of the draft that bears almost exclusively the stamp of Khumaynī’s ideas. The Muslim Republican People’s Party won 45 seats in the draft itself, and two years later, Sharʿat madgānī himself was silenced rather drastically. In April 1982, after his son-in-law, accused of being an accomplice of Sādīk Kūtzbāz, who had been shortly before executed, had been sentenced to prison, an orchestrated effort was made to discredit Sharʿat madgānī. Forged documents circulated that denounced him as a traitor. Members of Parliament and clerics accused him of having made common cause with the enemy of the Islamic Republic. His Dār al-Tablīgh was shut down and he was placed under house arrest. His opponents even managed, through the influential Society of Teachers of Seminaries in Kūm, to have his demoted and stripped of his title as Mardī-i Taklīd or source of emulation. Virtually no protests were heard against this, and four years later, in April 1986, he died.

SHARĪF (a.; loanword in P. and T.) (pl. ʿadrāf, sharīfīya; in the Maghrib, sharīf, q.s.), sharīf (seldom) "noble", “exalted”, “eminent” [in religious or worldly esteem], derives from the root ʿ-r-f, which expresses the idea of exaltedness and prominence. Its pre-Islamic as well as its most basic use in Islamic cultures is to denote a free man who can claim a distinguished rank because of his descent from illustrious ancestors (LA, xi, 70-1); that is, a person possessed of nobility (šarīf, or, less frequently, ṣafī; both also used in P.; in T., sharīf, šarīfīya), whether conferred by inherited or personally acquired glory and honourable conduct or, both. Possession of šarīf is expressed often by the phrase ʿdāu l-haṣāb wa l-taḥṣāb, “possessing great honour [lit. estimation] and unblemished ancestry” [see ḥāsīb wa-nasāban; nasāban]. Early in Islamic times, kindship or even "companionship" [see ṣansāra] with the Prophet became a new and special form of šarīf. To be a sharīf meant having a claim to: (i) most commonly, some type of Ḥashīmid descent—from the family or clan of the Prophet, the Banū Ḥāšim (after the Prophet’s great-grandfather, Ḥāšim b. ʿAbd Manāf [q.z.]); or, (ii) more specifically, Ḥādī—normally Ḥāsanīd or Ḥusaynīd—descent (from Muhammad’s cousin and son-in-law ‘Alī and his daughter Fāṭima, through either of their two sons, al-Ḥasan and al-Ḥusayn, or one of their daughters, or one of ‘Alī’s children by other wives); or, (iii) still more narrowly, Ḥusaynīd descent only—the term ʿṣayf “lord”, being used to denote Ḥusaynīd descent. The last two usages reflect the fact that al-Ḥasan and al-Ḥusayn were widely regarded as the noblest by birth (see al-Thaʿālībī, Lātīf al-maʿārif, ed. P. de Jong, Leiden 1867, 51 ff., tr. C.E. Bosworth, The Book of curious and entertaining information, Edinburgh 1968, 79).
SHARIF

(1) Generic (pre-Islamic and Islamic) meanings of the term.

Traditionally in the Arab, and also in the wider Islamic world, as in most cultures, it has been assumed that the meritorious qualities of forebears are transmitted to their descendants. Thus it is typically the possession of illustrious ancestors, or estimable "house" (bayt, pl. buayyad), Ibn Khaldun, Makaddima, i, 243; cf. Ibn Durayd, Lihbdhik, ed. Wüstenfeld, Göttingen 1854, 174; see also AHI. AL-BUQYgr), which is requisite for a sharif (or hasab) dakhm, a "substantial/great nobility" (I. Goldzher, Muk. St., i, 41-2; H. Lammens, Le bureau de l'Islam, Rome 1914, 289-90). Although in Islam there did develop the doctrine of the equality of all Muslims—based on Qur'an, XLIX, 13, inna akraddm in'd Allâdh akâdimm, "Truly the noblest among you in God's eyes is he who is most Godfearing" (cf. Muslim, tr. Herklots, J. Sharif, op cit., i, 50-3, 69-76), it never quite displaced the old Arab reverence for a distinguished genealogy. An oft-reported hadith of the Prophet underscores that "the most noble (abü) people are the most pious (abdûhâm), but adds that "the best (abdîr) of them in the Jbiystayi (p.3) are the best in Islam, if they have understanding in religious matters (abdîr fakhrî)" (Muslim, Sahih, ed. 'Abd al-Bâkî, Beirut 1955-6, 43 [Fad'dîr]'il, trad. 168; 44 [Fad'dîl'î al-sâhîhah], trad. 19; Al-Bukhârî, Sahîh, ed. Al-Nawâvî, 'Îbrâhîm and Khaßalî, Cairo 1378/1958, 60 [Anbîyâ].) 8.5, 14.19.1; 61 [Manâhî], 1.5,6.

Among the Arabs before and after the advent of Islam, the 'ashrîf were either persons from noble tribes or specifically the heads of prominent families—those who over time had gained recognised status vis-a-vis others and were entrusted with administering the affairs of the tribe or alliance of tribes or towns: e.g. min ash-rîf al-kaum, Ibn Hîghâm, Sra, ed. Al-Sakkââ, 'Abd al-Abîyârî and 'Îshâqî, Cairo 1355, repr. Beirut 1391/1971, i, 386,17 = ed. Wüstenfeld, 237; the 'ashrîf of Muham-mad's kaum [i.e. Kurayyî], al-Tabarî, i, 1191; the 'ashrîf of the Hîh, ibid., i, 2017; the 'ashrîf of Al-kadîlî, ibid., ii, 541,17; the 'ashrîf in Kûfa, ibid., ii, 631 ff. passim; the 'ashrîf of Khûrasân, ibid., iii, 714; the 'ashrîf of Al-Masîdî, ibid., ii, 398 ff. In Islamic times as before, 'ashrîf also meant a person strong in noble pedigree, character, and importance, in contrast to one who is "weak" (da'ff, also wusqî), especially in his or her nasab (al-Bukhârî, op. cit., i [Budî al-nasab], 6; 86 [Hûdût], 11,12; Muslim, op. cit., 33 [Imâra], trad. 16). 'Ashrîf and da'ff could also refer specifically to those able to bear arms and those "unarmed", respectively—the right to bear arms being an important social distinction in Islam as in many other societies (I. Ahmad, ch. Endogamy and status mobility among the Muslims of rural West Bengal, 1979-80). Similarly, in many other regions today, e.g. Turkey and Persia, 'ashrîf is used primarily to designate social or economic "nobility" status without reference to Prophetic descent, which is signalled by the specific use of sâyyid (see below), not 'ashrîf. One should note also the presence in Islamic societies alongside (as well as among) the blooded 'ashrîf and/or sâyid (pl. of sâyyid [p.3]) of what has been effectively a "noblesse de la robe", to use Tyan's phrase (Histoire de l'organisation judiciaire en pays d'Islam (Paris 1938), 1Leiden 1960, 552, n. 1), namely the religious scholars (išlâmîn).

(2) The Islamic meanings of the term.

The broadest specifically Islamic meaning of 'ashrîf has been "descendant of the Prophet". Early on, the ability to show kinship with the Prophet was an important claim to 'ashrîf (cf. Al-Bayhaqî, cf. [ib. ca. 300/912], Al-Mahâdsin wa 'l-masdm, tr. Herklotz, rev. ed. Cooke, London 1921, 9-13; see also irid, ii. Ethnography, at III, 41 la; and on the use of these categories also in Nepal, M. Gaborieau, Muslim minorities in Nepal, in R. Israeli, The Crescent in the East, London 1982, esp. 85-90). Similarly, in many other regions today, e.g. Turkey and Persia, 'ashrîf is used primarily to designate social or economic "nobility" status without reference to Prophetic descent, which is signalled by the specific use of sâyyid (see below), not 'ashrîf. One should note also the presence in Islamic societies alongside (as well as among) the blooded 'ashrîf and/or sâyid (pl. of sâyyid [p.3]) of what has been effectively a "noblesse de la robe", to use Tyan's phrase (Histoire de l'organisation judiciaire en pays d'Islam (Paris 1938), 1Leiden 1960, 552, n. 1), namely the religious scholars (išlâmîn).
membership in the “house of Muhammad” became a mark of special distinction in Islamic societies. There was, however, considerable variation in how such membership was defined.

The expression al-bayt [q.v.], “People of the House”, is from Qur’an, XXXIII, 33b, “God will remove the stains from you, O people of the House, and purify you completely”. Although this verse may well have referred to Muslims as people of the Ka’ba (c.f. R. Paret, in Orientalistische Studien Enno Littmann überrechts, Leiden 1935, 127-30), it was interpreted frequently among Sunnis, but especially among the Shī’īs (as early as al-Kumayt [q.v.], who died in 126/743, 39,11 ff.; cf. 92:9 ff, and R. Srothmann, Das Staatsrecht der Zaiditen, Strasbourg 1912, 19-20), as referring to Muhammad, his daughter Fatima, his son-in-law and cousin Ali, and his grandsons al-Hasan and al-Husayn. The key proof text for this is the well known “mantle hadīth” (hadīth al-kisā’/’abî’a), from which these five are also known, above all among the Shī’īs, as the “People of the Cloak”, al-bayt al-kisā’ [q.v.], and cf. Murâhala, at VII, 276b, or al-bayt al-abî’). This hadīth recounts how Muhammad one day brought the other four under his cloak (kisā’/’ubî’a), mirâj, or thawb) and called them al-bayt al-abî’, or simply “my family”, al-Mukhtar, ed. Yahyâ, Cairo 1394/1974, 230-3; Al-Makrîzî, Futuhdt, ed. Mahdawi Damghânî, Qum 1409/1988-9).

The identification of the two main Hāshimī lineages — with the al-bayt al-abî’ was based chiefly upon one version of the so-called hadīth al-thakalayn (in which thakalayn refers to the two sources of guidance that Muhammad says he is leaving behind for the Muslims: Scripture, sc. al-Kutb, and the al-bayt al-abî’). In this version, the al-bayt al-abî’ are identified as those to whom, as members of the Prophet’s family, the sharing in sadakâ [q.v.] is forbidden; specifically mentioned are the Al ‘Ali, the Al A‘īk, the Al Dja’far (i.e. descendants of Abu Taib’s sons), and the Al Al-Bâbâs (Muhammad, op. cit. 44 [Fatîd al-sâhâbâ], trad. 61 [cf. trad. 32]; Al-Mukhtar, ed. Yahyâ, ibid. 232.3 Ibn Hanbal, ii, 409-10, iv, 367; Al-Nabhanî, 35-54, 68-74; Al-Makrîzî, 30-1, 33; Ibn Hâjard al-Haytambat, 147; Lamens, Fâtima, Rome 1912, 95-100 [for references to still other groups counted as al-bayt al-abî’, see esp. 99, n. 4]; C. van Arendonk, De opkomst van het Zenditische Imamaat in Yemen, Leiden 1919, 65 ff; see also Al, on tabrîm al-sadaka, cf. e.g. Al-Sabbâb, 108, 110, 117, 121).

The tendency to equate the main Hāshimī lineages with the aghâf of the al-bayt al-abî’ appeared as early as the 2nd/8th century. The special status of the Banu Hâshim was trumpeted already by al-Kumayt, op. cit.; just as he lauds eusively the noble blood of the Prophet (14,5-15,12), he praises the Banu Hâshim as “the highest of creatures” (2,9) and “the peaks of splendid nobility (harâb)” (5,6), who are granted “a pre-eminence among all humankind” (58,8), and he celebrates them as aghâ/ and sitâ (10,4, 55,2). The editors of the Porèthe’s Sra especially bolstered the prestige of the Banû Hâshim by putting forward the idea that God, after a gradual process of elimination of others, deliberately chose the Hâshimids as the family to produce the Prophet. A tradition which occurs in several versions has the Apostle of God say: “God chose Ismaîl from the sons of Ibrahim, and from the sons of Ismaîl the Banû Kinana, and from the Banû Kinana the Keraykh, and from the Keraykh the Banû Hâshim” (Ibn Sa’d, i, 2,2; cf. Ibn Hâjâr, iv, 205 = ed. Wustenfeld, 933; Al-Nabhanî, 76-7, 172; cf. ibid., 78-9; Al-Sabbâb, 120; cf. Al-Husaynî, Fadillât, 57-148). One version concludes with the Prophet’s words, “consequently I am the best of you as regards family and the best of you as regards genealogy” (Ibn ‘Abd Rabbihî, op. cit. ii, 247. Cf. also Al-Khalâfî (d. 1069/1659), Nastîm al-rûyât fi sharîh shiykh al-Kâfiyyât, Cairo 1235-7/1790-9, i, 429 ff, ch. on the sharîf of the Prophet).

According to al-Suyûtî, R. al-Salâlî al-zunâmîyâ, fols. 4a-b (cited in Al-Sabbâb, 121; Al-Nabhanî, 82), al-sharîf designated in the earlier period (al-yadr al-aawal) anyone who belonged to the al-bayt al-abî’, whether Hasan or Husayn, ‘Alawî (a descendant of any of ‘Ali’s sons, esp. Hasan, Husayn, or Muhammad b. al-Hâshiyya), Dja’far or ‘Aâkî (a descendant of one of ‘Ali’s brothers), or ‘Abâsî (a descendant of the Prophet’s uncle al-Abbâs). He also points out that in the Tarîkh of Al-Dhahabî [q.v.], who died in 748/
SHARIF

1348, we often meet with titles like al-shanf al-abbdn, al-shanf al-cakili, al-shanf al-d^offari, al-shanf al-zaynah (which, however, proves very little for the older period).

There are indications that in 'Abbāsids times, no later than the mid-4th/10th century and probably earlier, al-shanf was said to be attributed to another that also a sign of 'Abbās's desire to identify, in contrast to the Umayyad "usurpers" before them, with the Ḥāshimī legitimacy of the abī al-bayt (J. Lassner, The shaping of 'Abbāzīd rule, Princeton 1980, 151-2). We know that the Ḥāshamīd Abū Ahmad al-Husayn b. Musa (d. 4007) was reserved especially for the descendants of al-Abbās and Abu Tālib. Al-Saffah’s (r. 132-6/750-4) nickname of Abu Ahmad al-Husayn b. Musa (d. 4007) was also the usual name for the head of the Arab Ḥāshamīd family (ibid., 61), writing of an event in 178/794-5 (iii, 29; al-NasaT, 117, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287), while their mother Fatima is lauded by the Prophet as "mistress of the women of this community/ community or "mistress of the women of the world" (sayyidat nisb, nisbat nisb, sayyidat nisb al-ilāmin) (Ibn Sa’d, viii, 17, 17; al-NasaT, 116-20, passim), and as "mistress of the women of the people of Paradise (ahl al-djann)" (al-Bukhair, 92, 201; ‘Fitan’, 22, 1). The case of Abī Ahmad al-Husayn b. Musa (d. 4007) has often been compared to the Fatimid use of the title ‘al-djann’ (ahl al-djann) for the Fatimids, the Fatimid sultans, and the Fatimid people (al-Nabi, 244; 62, 42; ‘Fitan’, 22, 14; al-NasaT, 117, 118, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287), while their mother Fatima is lauded by the Prophet as "mistress of the women of this community/ community or "mistress of the women of the world" (sayyidat nisb, nisbat nisb, sayyidat nisb al-ilāmin) (Ibn Sa’d, viii, 17, 17; al-NasaT, 116-20, passim), and as "mistress of the women of the people of Paradise (ahl al-djann)" (al-Bukhair, 92, 201; ‘Fitan’, 22, 1). The case of Abī Ahmad al-Husayn b. Musa (d. 4007) has often been compared to the Fatimid use of the title ‘al-djann’ (ahl al-djann) for the Fatimids, the Fatimid sultans, and the Fatimid people (al-Nabi, 244; 62, 42; ‘Fitan’, 22, 14; al-NasaT, 117, 118, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287), while their mother Fatima is lauded by the Prophet as "mistress of the women of this community/ community or "mistress of the women of the world" (sayyidat nisb, nisbat nisb, sayyidat nisb al-ilāmin) (Ibn Sa’d, viii, 17, 17; al-NasaT, 116-20, passim), and as "mistress of the women of the people of Paradise (ahl al-djann)" (al-Bukhair, 92, 201; ‘Fitan’, 22, 1). The case of Abī Ahmad al-Husayn b. Musa (d. 4007) has often been compared to the Fatimid use of the title ‘al-djann’ (ahl al-djann) for the Fatimids, the Fatimid sultans, and the Fatimid people (al-Nabi, 244; 62, 42; ‘Fitan’, 22, 14; al-NasaT, 117, 118, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287), while their mother Fatima is lauded by the Prophet as "mistress of the women of this community/ community or "mistress of the women of the world" (sayyidat nisb, nisbat nisb, sayyidat nisb al-ilāmin) (Ibn Sa’d, viii, 17, 17; al-NasaT, 116-20, passim), and as "mistress of the women of the people of Paradise (ahl al-djann)" (al-Bukhair, 92, 201; ‘Fitan’, 22, 1). The case of Abī Ahmad al-Husayn b. Musa (d. 4007) has often been compared to the Fatimid use of the title ‘al-djann’ (ahl al-djann) for the Fatimids, the Fatimid sultans, and the Fatimid people (al-Nabi, 244; 62, 42; ‘Fitan’, 22, 14; al-NasaT, 117, 118, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287), while their mother Fatima is lauded by the Prophet as "mistress of the women of this community/ community or "mistress of the women of the world" (sayyidat nisb, nisbat nisb, sayyidat nisb al-ilāmin) (Ibn Sa’d, viii, 17, 17; al-NasaT, 116-20, passim), and as "mistress of the women of the people of Paradise (ahl al-djann)" (al-Bukhair, 92, 201; ‘Fitan’, 22, 1). The case of Abī Ahmad al-Husayn b. Musa (d. 4007) has often been compared to the Fatimid use of the title ‘al-djann’ (ahl al-djann) for the Fatimids, the Fatimid sultans, and the Fatimid people (al-Nabi, 244; 62, 42; ‘Fitan’, 22, 14; al-NasaT, 117, 118, 123, 124; al-Sabbān, 115; al-Nabham, 143; A. Amin, Dūhā 'l-Islam, iii, Cairo 1362/1943, 287)
tion to persons regarded as holy, especially mystical masters of particular tankas or zdwiyas [q.v.] or ṣṭdfys [q.v.] in general. This can be seen in the many Muslim shrines dedicated to saintsy persons addressed as ṣāyyid, e.g. the tomb of “Ṣādī Ṣāfīyīn l-Dīn” (Muḥyī l-Dīn Bīn Ṣāfī al-Kurṭubī) in Damascus, the Husaynid Amir Ṣāfī al-Nakīb al-Adīlamī, and the Sidī Muhammad Ṣafī al-Kurṭūbī in Cairo, as well as the ṣāyyidīs of Mecca and Medina. See the Meccan madīnatī in al-Batānīn al-Ṣāfī al-Nakīb al-Adīlamī, ed. Snouck Hurgronje, Amsterdam 1933, i, 111-172, or the shrine of “Ṣādī Muḥammad Ṣafī al-Kurṭūbī” (a descendant of Ṣāfī b. al-Kurṭūbī) in Jerusalem 1950, 49-50, 167). He had to keep a watch on the behaviour of the ashrdf, to restrain them from excesses, and so that the title “ṣāyyid” is doubly earned. This is above all the case in Morocco, on which, see SNHE:47; cf. E. Gellner, Saints of the Atlas, Chicago 1969, 70-80. Ṣāyyid Aḥmad b. Ṣāfī al-Muḥājirīn, the Husaynīd Ṣāfī al-Nakīb al-Adīlamī, forefather of the prestigious Hadrências (see the Meccan madīnatī. According to Snouck Hurgronje, Mecca, i, 57 n. 1, ṣāyyid, Vergr. Gesch., iii, 163, v, 31, 40; cf. al-Nabhānī, 82-3).

(3) The Nakīb al-ṣāḥrīf and Nakīb al-ḥārīf.

In the ‘Abbasid period, the ṣāḥrīf, both ‘Abbāsid and Tālībī, were usually under the authority of a ṣāyyid al-ṣāḥrīf or “marshal of the nobility” (also nakīb al-ṣāḥt, or ra’ī al-ṣāḥīf) chosen by them. The history of this office remains largely uninvestigated (with the notable exception of M. Winter’s study of the Egyptian case). For centuries the custom to call only those ṣāyyid al-ṣāḥrīf, which is a compendium of nakībī in various cities; on both, see Bibli. below). That the nakīb already existed under the Umayyads, as per Kremer (Kulturgeschichte des Orients unter den Chāfīn, Vienna 1875, i, 449, n. 1) supposed (supported by Tyan, op. cit., 552, 4), based upon Ibn Ḥadhīl, Thar, Bulāk 1284/1867-8, i, 134, is very doubtful, as the passage at issue is probably corrupt (cf. al-Tabārī, i, 16, 17-17). The two branches of the Banū Ḥāshim were from the first ‘Abbāsid under a marshal, as was the case about 301/913-14 (‘Arīf al-Qurṭubī, Silat Kitāb al-Ṭabarī, ed. Goje, Leiden 1887, 47, 10); yet we find mention in al-Ṭabarī, iii, 1516, of an administrator of the affairs of the Tālībīs (yatawwal amr al-Tālimīyin), in the year 250/864, during al-Mutawakkil’s reign, one Ṣāfī b. Fāraḍ al-Rukhkhadjī, who was apparently not a Ḥāshimī. The ʿAlīd ʿAlī b. Muḥammas b. Ṣafī al-Ḥāmidīn (d. 280/893-4) was nakīb al-ṣāḥrīf in Kūfa (al-Ṭabarī, iii, 138-39). By this date there were apparently marshals of the local nobles who answered to a single grand marshal (nakīb or ṣayyid al-nakībī): in the late 3rd/9th century, Abu Ḥasan ʿAlī b. ʿAflāf Ibn al-Riḍā was ṣayyid al-nakībī in Baghda (al-Murwaḥ, al-Fakhri fiünst al-Tālimīyin, ed. Qādīyīn, Kum 1408/1988-9, 9; Fakhr al-Dīn al-Rażī, al-Salṭat al-walī al-muhirak, Kum 1409/ 1989, 79-80), and in Nīṣābūr in the same era, the ṣayyid al-Aḏjall al-Zabbara was an influential nakīb of the ‘Alīids and raʿīs of the town, as was his son also after him in the reign of the Sāmānid ʿAmr Abu Ḥasan Nāṣr b. Ṣāfī al-Nakīb al-Riḍā (301/914-3). Ibn Funduk, Taʾrīḫ-i Bihāsh, Tehran 1317/1938, tr. in C.E. Bosworth, The Ghaznavids, Edinburgh 1963, 196). In Fāṭimid Egypt, there was a nakīb al-tālimīyin or al-taʿṣseṣṣṣyin, who (as under the ‘Abbāsids) belonged to the political-military rather than the religious or administrative leadership; in Mamluk Egypt this figure was known as nakīb al-ṣāḥrīf and, not being of the ruling Turkish military elite, was considered a religious functional, or raʿī (Winter, 31; cf. Tyan, 550-4). In general theory, it was the duty of the nakīb, who had to possess a good knowledge of genealogical matters, to keep a register of nobility, to enter births and deaths in it and to examine the validity of alleged ʿAlīid genealogies (on which see al-Kurṭūbī, 49-50, 167). He had to keep a watch on the behaviour of the ṣāḥrīf, to restrain them from excesses, and in the late 4th/10th century to its end in 1924, the Ṣāmānid ʿAmīr of Mecca (who began as Zaydīs, but by the mid-9th/14th century had become Sunni adherents of the Ṣhāfi’i school) used the title ṣāḥīf, as did also, however, the ruling Ḫūsaynīds of Medina and Mecca (see the Meccan madīnatī in al-Batānīn al-Ṣāfī al-Nakīb al-Adīlamī, ed. Snouck Hurgronje, Amsterdam 1933, i, 111-172). At the turn of the last century, the title ṣāḥīf was reserved for Ḫūsaynīds alone, but the Meccans addressed the Ḫūsaynīd Amir of Mecca, or so-called “Grande ṣāḥīf” (a European usage), as ṣayyid, and he likewise gave his Husaynīid kin the title ṣayyid (Admiralty War Staff, Intelligence Div., A handbook of Arabia, i, London 1916, 109; Snouck Hurgronje, Mecca, i, 57 n. 1, ṣayyid, Vergr. Gesch., iii, 163, v, 31, 40; cf. al-Nabhānī, 82-3).
to remind them to do their duty and avoid anything that might injure their prestige. He had also to urge their claims, especially those on the treasury, to endeavour to prevent the women of noble blood from making mésalliances, and to see that the ashrāf trusts on the ashrāf were properly administered. He had to participate in, and to be responsible for participation of the ashrāf in special religious ceremonies. The chief nākiḥ had also other special duties, including specific and sometimes important judicial powers, which varied from era to era and region to region. See al-Mawardi, 164-71; Tyan, 550-8; von Kremer, i, 484-49; L. Massogno, Cadis et nasirs bagdadis, in WZKM, ii (1948): 106-15; Winter, 52-3; H. Bodman, Political fac tors in Almor. 1760-1826, Chapel Hill 1965, 79-102; Mez, op. cit., 145; al-Damurdiḏ, Kāṭib al-Durr al- muṣūna, tr. D. Cresceius and 'A. Bakr as al-Damurdiḏi’s chronicle of Egypt, 1688-1755, 43, n. 108; H. Halm, op. cit., 60-1, 64-5; A. Laroui, Les origines sociales et culturales du nationalisme marocain, Paris 1977, 93-4; and NAKĪB (esp. the Būl.).

If the case of Egypt (Winter, 34-9) is indicative, the social and even the religious importance of the nāka institution has waned in most areas, especially in the past two centuries, and most sharply in the present one; this goes along with the fact that today the ashrāf rarely represent the distinctive and cohesive, often élite social class that they did several centuries ago in most Islamic societies. Nor do they today typically enjoy the special tax status or other special favours they once did.

(3) Marks of Sharīf status.

Traditionally, the most common public mark of a sharīf has been the green turban that became usual for male ashrāf and sayyids to wear, especially in Egypt and Persia. Its origin may lie in a 773/1371-2 edict of the Mamluk sultan al-Ashraf Sha’ban b. Hasan (764-78/1363-77) that the male ashrāf should wear a green badge (ṣaffa) fastened to their turbans to distinguish them from other people and as an honour for their rank (ʿAli Dadah, Muḥādārat al-ʿawlī’i wa-maṣṣarat al-awshārī, Būlāk 1300/1883, 65; al-Kattānī, 95, 97; Ibn ʿIyās, Badda’l-ṣalāt, Cairo 1311/1893-4, i, 277; Snouck Ṣurīdān, al-zuḥrī, Cairo n.d., xi, 56-7; Dozy, Dict. des noms des veïnets chez les arabes, Amsterdam 1845, 308; Mez, 59; H. Algar, art. ʿĀmīma, in Ehr, i, 920a). According to the Ḥasanid Muhammad al-Kattānī (d. 1345/1927), in his treatise on the turban (97-8), this Mamluk edict, which is commemorated by the poets of the time, recalls that of the caliph al-Ma’mūn in Ramadan 201/817, which replaced the black colour of the ʿAbbadid house with green at the time when he designated the Husaynid ʿAlī b. Mūṣa al-Riḍā as his successor (cf. al-Taḥfīz, iii, 1021-13). Al-Kattānī opines that the descendants of ʿAlī and Fāṭima henceforth retained green as their colour, but confined themselves in practice to wearing a piece of green material on the turban. This, he thinks, fell in time into disuse until Sultan Sha’bān revived it by his edict. According to the Durar al-aṣṣāf, which al-Kattānī quotes (98), the wearing of an entirely green turban dates from an edict of the late 19th century. According to Snouck Ṣurīdān, the wearing of a green turban by Ottoman Pasha, governing Egypt, al- Ṣayyid Muḥammad al-Ṣarīf (cf. Muhammad al-I ḥāṣbā, Akhbār al-ʿawlī’i fi-man taṣawaf ṣaff fir mīr min arbaʿ al-duwal, Cairo 1311/1893-4, 164) in 1004/1596; when he had the kissa [q.v.] for the Kaʿba exhibited, he ordered the ashrāf to come before him, each wearing a green turban.

Al-Suyūṭi observes that the wearing of this badge is a permissible innovation (biʿa muṣḥaba) that no one, whether a sharīf or not, can be prevented from following, if he or she wishes to do so, and one that cannot be forced upon anyone who wishes to omit it, since it cannot be deduced legally. However, Ibn Ḥaḍjar al-ʿAṣḵalānī tells of a ṣarīf, Ṣafqīr al-Dīn, who lost his post of a green turban because he was said to take bribes and to have let non-ṣayyids wear green badges (inbā’ al-ṣarīf, i, Ḥaḍarābād 1387/1967, 39). At most, it can be said that the badge was introduced as a distinction for the ashrāf; it is therefore equally permissible to limit it to the Ḥasanids or Ḥusaynids and to allow it also to the Zaynābiyya and the still wider circles of the remaining Ṭalibids. An endeavour is made to connect this custom with Kurʿān XXXII, 59, in which some scholars see a suggestion that learned men should be distinguished by their dress, e.g. by long sleeves or the winding of the ṣafī-lān, so that they may be readily recognised and honoured for the sake of learning (al-Suyūṭi, fols. 5a-6a; in al-Ṣabbān, 206-7, abbreviated in Ibn Ḥaḍjar al-Ḥaytamī, Fāṭīma, 144, 23-4, and al-Nabhānī, 84-5; cf. al-Kattānī, 98-9). With regard to the aforementioned Kurʿānic verse, according to al-Ṣabbān it should be taken to imply that wearing the green badge or turban is recommended for the ashrāf and blameworthy for others than they, because the latter by wearing it would be claiming a genealogy that is not theirs, which is not permitted (206). On this account, according to al-Kattānī, even the Mālik authorities considered the wearing of a green turban as forbidden to a non-ṣarīf. With regard to a tradition transmitted by Ibn Ǧanbal, according to which, on the Day of Resurrection the Prophet will be clothed by his Lord in a green turban, ʿAshraf teachers are said to incline to the view that this headgear is desirable for the ashrāf (al-Kattānī, 98-9; cf. 95). Other authorities note that green is the colour of the garments of the dwellers in Paradise (idem, 96; cf. Kurʿān, XVIII, 30, LXXVI, 21), and that it was the Prophet’s favourite colour (idem, 95-6, with references to Ḥadīth).

The green turban has been frequently adopted, but never became the general headgear of the ashrāf throughout the world. The wearing of a green turban by men and women in India and Persia in the 19th century it was a mark of a ṣayyid/ṣarīf, many entitled to wear it, especially the more learned, often chose to wear instead the white turban of a ṣayyid or ṣūrm (E.W. Lane, Manners and customs of the modern Egyptians [1836]. New York 1973, 31, 132; Winter, 22); in Arabia several decades after (today), ṣayyids rarely wore other than white turbans (Snouck Hurgronje, Verspr. Geschr., iv/1, 63). The green colour was preferred in Morocco at the turn of this century (Westernmark, ii, 21) and, according to J. Chardin (loc. cit.) and also in late-18th-century Persia, although in this last country, according to Algar, in op. cit., i, 921a, the black turban (as opposed to white) has long been the standard sign of a ṣayyid. However, Iranian contemporaries report consistently that black is worn instead of green rarely by ṣayyids; normally, black turbans are used only by the most venerable scholars or most elderly ṣayyids; most ṣayyids wear green. In India ṣayyids traditionally have worn green; they were therefore occasionally known as ṣayyid bakhshī “green-robed” (Sharīf, 303). According to al-Nabhānī (d. 1932), 85-6, the green turban was not in his time a mark of noble blood in Istanbul. It was worn there not only by learned men and students but also by artisans and street merchants, especially in winter, as it did not show dirt so quickly. On this account, many ashrāf there were even said to avoid the colour green.
Other marks and special treatment of the Ashraf.

Those of the Prophet’s blood are also distinguished in other ways according to common Sunni views. For example, the Shanees in the hadiths (p. 72, see zarin, al-Husayn, ed. Khoury, i, Beirut 1970, 385-9, cf. 340-1). One may only enter into marriage with a Shanees if he knows he is in a position to afford her all that is due her, will obey her and will offer her his share in the gain which he has received from the action of his father, and always to remember all the deeds he has performed, but always to remember God’s watchful care for them” (al-Fatwa al-makkiiya, Cairo 1329/1911, ch. 29, i, 196, 17-8, 25, esp. 196, 31 ff.; cf. 197, 14 ff; cited also in al-Makrizi, 44; cf. al-Nabhanî, 23-4, 155-6). In a similar vein, Ibn Hadjar al-Haytamî notes that a Shanees who has received hadath (p.r.) punishment for fornication, taking intoxicants or theft may be compared with an amir or sulûh whose feet have become soiled but are wiped clean by one of his servants. He is also likened to a refractory son who is not, however, deprived of his inheritance (Fatwa, 142, 26-9; al-Nabhanî, 92).

The duty of love for the ashraf is based on Kurdistan, XII, 23, “Say, ‘I ask of you [all] no reward except love for the kinsfolk (khâlid), where khâlid is taken as kin of the Prophet (al-Sabbân, 105-4; al-Nabhanî, 154 ff; Ibn Bîriq al-Hilli, 73, 26; al-Shubrawî, 51 ff; idem, Umâa, ib. al-Makrizi, 78; al-Shubrawî, 4, 50-3, 5-8; Ibn Hadjar al-Haytamî, âlvi, 167-9). It is
further pointed out that the conclusion of the tašahhud contains a prayer for the Āl Muhammad (ibid., 145-6; al-Nabhānī, 155). A saying attributed to al-Shāfi‘ī (g.v.) is as follows: “O members of the house of the Prophet, there is a duty to God that He has placed upon you in the Qur’ān. It is that everyone who does not say the taṣliyya over you has not performed the salât (g.v.)” (ibid., 184). There are further a large number of traditions that urge this affectation, represent it as a proof of faith or a defence against Hellefire, promise in return for it the gharīf of the Prophet on the Day of Resurrection and a reward in the next world, and forbid signs of hatred towards the āhl al-karb, even describing such animosity as infidelity (al-Shubrāwī, 3-7 ff.; al-Nabhānī, 171 ff.; Ibn Ḥadżar al-Haytamī, Sawā‘ib, 153-4; al-Husaynī, Fadā‘īl, 220-40).

According to al-Shubrāwī, an 18th-century Rector of al-Azhar, reverence and respect ought therefore always to be shown to the gharīf, especially to the pious and learned among them; this is a natural result of reverence for the Prophet. One should be humble in their presence; the man who injures them should be an object of hatred. The unjust treatment from them should be patiently borne, their evil returned with good; and they should be assisted when necessary. One should refrain from mentioning their faults; on the other hand, their virtues should be lauded abroad. Good; and they should be assisted when necessary. One should refrain from mentioning their faults; on the other hand, their virtues should be lauded abroad. According to al-Shārānī, one should treat a gharīf with the same distinction as a governor or kadi al-maṭāba, keep all snkh al-tamhid li-uhur dawlat al-sādīkat. Msalāt al-sada‘īyān, ed. M. Shafī‘, Lahore 1360-8/1941-2, ii/2, 711).

According to al-Sha‘rānī, one should treat a gharīf with the same distinction as a governor or kātib al-‘asrar; one should not take a seat if a gharīf is without one. Special reverence should be paid to the gharīf; one dare hardly look at her. Anyone who really loves the children of the Prophet will present them with anything they wish to buy. Whoever has a daughter or sister to give in marriage with a rich dowry should not refuse her hand to a gharīf, even if he has no more than the bridal gift for her and can only live from hand to mouth. If one meets a gharīf or gharīfī on the street and he or she asks for a gift, one should give him or her what one can (al-Nabhānī, 185-9). Ibn Bāṭūṭa (d. 779/1377) presents a good example from East Africa of such an attitude toward the Prophet’s progeny in his remarks on the sultan of Kilwa, Abū Muṣṭafar Ḥasan: his kunya was Abū Mawālib (“father of gifts”) because of his largesse to any gharīf who approached him, even one from abroad (Rīhā, ii, 193-4, Eng. tr. Hamdun and King, Ibn Battuta in Black Africa, London 1975, 19-20).

One should not refuse marks of respect even to a gharīf who is a sinner (fiṣīk) in the eyes of the law, because one knows his sin will be forgiven him. This high esteem is his due on account of his pure origin (al-t ‘unṣur al-tahīn) and fiṣk does not affect his genealogy (ibid., 91). As Doughty reported on the Hidjaz, see Snouck Hurgronje, Mecca, i, 32 ff.; 7 ff.; for Acheh and the Indonesian Archipelago on the 19th century, see idem, Achehnes, i, 153-64; for Kilwa, see Bosworth, 194, n. 77 (citing al-Muṣaffādīs); for Morocco, Wemarck, i, 169-71.

(7) Social and political roles of the Ashraf: Sayyids and gharīfīs have been and are represented in large numbers throughout the entire Islamic world. Historically, several dynasties of Prophetic lineage have ruled in various regions for longer or shorter periods, e.g. in Egypt and North Africa (see Šafī‘īs); in Persia in general [see ŠAFAWIDS]; in Tabarestan (Māzandarān), Daylam, and Gīlān (see e.g. MAR‘ĀBIS; AL-ZAYDIYYA; B. Manz, The rise and rule of Tamerlane, Cambridge 1989, 92-5; W. Madelung, art. Alids, in Elh, i, 881-6, H.R. di Borgomale, Les dynasties locales du Gīlān et du Daylam, in JAR, xxvii (1949), 301-50; in western Arabia (see Snouck Hurgronje, Mecca, i; Admiralty War Staff, Handbook of Arabia, 107-11; cf. the articles HĀSHIMĪ at III, 262b; MARRAKA, at VI, 148a f.); in the Yemen (g.v.; see also AL-ZAYDIYYA); in modern Jordan [see HĀSHIMĪ at III, 263 ff.]; and in Morocco [see ŠURFĪ; IDRISĪS; ḤĀSHĀN; SA‘DĪS; AL‘AWĀT; TALFA‘L; AL-MACHRĪB at V, 1191-2]. The Māghribi case is especially striking, for religio-political claims have been tied strongly to Šarīfian blood lineage, and such lineage has been commonly a key qualification for temporal leadership (see M. Kably, Meshum ft ta‘ railī al-umūr li-‘izār dawla‘ al-sā‘īdīyya, in Markallat Khulayyat al-Adīb ... [Qim‘a‘t al-Muhammād al-Khālimī], al-Qāhirah [1978], 7-59; M. Combes-Schilling, Sacred performances, New York 1989; M. Garcia-Arenal, Muḥdi, Muḥti, gharīf: l’avènement de la dynastie sa’dienne, in SI, bxii [1990], 84 ff.).

Families of gharīfī have also exercised local influence even without holding overt political power, as evidenced especially in mediaeval sources by frequent, recurring references to šādūr or gharīfī as one class of the local social, political, or intellectual élite (ṣa‘īds
gathering on a given occasion alongside 'ulamā', šuyūkh, kuddt, ḥukamā, ʿabār, waṣīf al-balad, etc. (see e.g. Al-Damūraḥī, 66-7, 91, 224, 326, 331, 342, 380; Ibn Baṭṭuta, i, 188-90, tr. Gibb, ii, 377-8; J. Aubin, Maitrise pour la biographie de Shāh ʿAbd al-Raḥīm Waṭṭār bin Ṭurāb, Paris-Ṭehran 1361/1982, 174; R. Mottahedeh, Consultation and the political process, in C. Mallat (ed.), Islam and public law, London 1993, 20 (citing Miskawayh), 23 (citing Bayḥakī). Thus in many places the aʿshrāf were an influential local or regional elite—"a blood aristocracy without peer" (R. W. Bulliet, The patricians of Niepceur, Cambridge, Mass. 1972, 234)—with considerable political as well as social, power: e.g. Nṣḥāpūr (see ibid., 234-45; Bowdrew, 195, 197-5, 263-4); Harīk (cf. 'Abd Allāh Wāḥīd, Maksad al-ikbāl-i sultānīyya, (cf. C. VAN ARENDONK-[W.A. GRAHAM])

This recension of the name Nāṣir. In some other copies "Sharīf" is replaced by "Nasir-i Khusraw", while the manuscript

Despite its prestige historically, the great majority of aʿshrāf, given their constantly increasing numbers, have probably lived and still live in poor circumstances (see e.g. Snouck Hurgronje, ibid., i, 71; Burke, 98).

The genuineness of an 'Aḍid pedigree has historically often been open to question, despite efforts at regulation and authentication such as the institution of the nīkabar discussed above. See, e.g. ʿHurrā, and Westerman, i, 37, on the difficulty of distinguishing between a ḥurra or ḥurra and a ʿAḍid dynasty. In Morocco, see the refs. given above and also the handbook of Arabia, in Arabia is given in the article). However, for all their prestige historically, the great majority of aʿshrāf, given their constantly increasing numbers, have probably lived and still live in poor circumstances.

The patricians were an influential local or regional elite—"a blood aristocracy without peer" (R. W. Bulliet, The patricians of Niepceur, Cambridge, Mass. 1972, 234)—with considerable political as well as social, power: e.g. Nṣḥāpūr (see ibid., 234-45; Bowdrew, 195, 197-5, 263-4); Harīk (cf. 'Abd Allāh Wāḥīd, Maksad al-ikbāl-i sultānīyya, (cf. C. VAN ARENDONK-[W.A. GRAHAM])

The genuineness of an 'Alid pedigree has historically often been open to question, despite efforts at regulation and authentication such as the institution of the nīkabar discussed above. See, e.g. ʿHurrā, and Westerman, i, 37, on the difficulty of distinguishing between a ḥurra or ḥurra and a ʿAḍid dynasty. In Morocco, see the refs. given above and also the handbook of Arabia is given in the article). The genuineness of an 'Alid pedigree has historically often been open to question, despite efforts at regulation and authentication such as the institution of the nīkabar discussed above. However, for all their prestige historically, the great majority of aʿshrāf, given their constantly increasing numbers, have probably lived and still live in poor circumstances.
published by Fagnan retains the verse mentioning "Sharif" (three lines from the end) but adds a final verse giving the author's name as "Nāṣīr b. Ḫūsraw." It is quite obvious that (except in the version represented by Taḵawī's ms.) the text has been tampered with. The poem is clearly not by Nāṣīr-Ḥūsraw, whose pen-name was "Ḫūsraw" and not "Sharif," and whose style is quite unlike that of the Sa’dat-nāma; moreover, the latter poem contains no trace of Iṣmāʾīlī doctrines. Nothing else is known of our Sharīf, except that he must have lived before the middle of the 9th/15th century, the date of the earliest manuscripts, though he could very well have been a good deal earlier.

The modern Persian scholar M.T. Bahār (in his Sāḥib-ābān, iii, Tehran 1321/9394, 168) identified the author of the Sa’dat-nāma as one ʿAṣārīl-Ḥūsraw, who supposedly died in 735/1334-5, but in fact this person is totally fictitious. Bahār merely misconstrued the entry on the Sa’dat-nāma in the Kashf al-zunūn of Ḥājjī Khalīfa, who, following Dawlataḥ (61-4), wrongly makes ʿAṣārīl-Ḥūsraw a native of Iṣfahān (see ed. Flügel, iii, 596, ed. Yaldkaya/Bilge, ii, 990; the date "735" is evidently a misprint in the oriental edition used by Bahār). A striking feature of the poem is the vehemence with which the author denounces the "great ones" and his insistence that, after the prophets and saints, the best of mankind are the peasants, and then the artisans.

**Bibliography:** Given in the article.

(F.C. de Blois)

AL-SHARĪF ‘ABŪ MUḤAMMAD ‘IDRĪS b. ‘Alī, called Imād al-Ḍīn, a Ḥasanī sharīf of Yemen. Belonging also to the Zaydī-Rasulid struggles of the late 7th/13th century, he is usually given the nisba of Yemen. He was a Ṣaḥāḥi, was born in 673/1274 and died in 714/1314. Idrīs had a strict Zaydī background and his early days were spent under the eye of his father, Djiāmīl al-Ḍīn Ḍawrī, who played a prominent military part on the side of the Zaydīs in the Zaydī-Rasulid struggles of the late 7th/13th century. By the time his father died in 699/1299, he had made his peace with the Rasulīd sultan ʿAṣārīl-Ḥūsraw and Idrīs was left in peace of all the Ḥanīfī ʿṣūr of the Yemen. From 700/1300 onwards relations between Idrīs and the Rasulīd sultan al-Muʿayyad ʿDawwād became progressively closer. The Rasulīd granted him as fiefs (iṣṭāʿāt) al-Ḵaḥma and Mawza in Tiḥmā and the administrative and military experience which he gained during more than fifteen years of service with the Rasulīd was considerable.

Idrīs was also renowned for his learning, particularly in the fields of fiqh, poetry and history, and there is mention of numerous books composed by him. But it was in the latter discipline that he was in particular famous. Alone extant among other historical works is his Kanz al-akẖābār tāʾalīf al-muʿṣar ṭalīw ‘l-akẖābār, the Yemenite part of which has recently appeared in print (Kuwait 1992), edited by ‘Abd al-Muḥsin al-Maḍḍāj. The work begins as an abridgement (iṣṭāʿāt) of Ibn al-Aṯīr’s [g.v.] Kīmālī, treating the history of Islam from the time of the Prophet. Additional material is provided, however, on the history of ‘Īrāq, Egypt and Syria. Of great value is the final section of the third part and the whole of the fourth and final part of the work which concern the history of Yemen down to the year 714/1314, i.e. the date of the author’s death.

The Yemenite section also begins with the period of the Prophet. The chief town, Ṣanʿa [g.v.], is given fairly detailed treatment, its foundation and early development, its most important early buildings like the Great Mosque and the castle of Qummān [g.v.]. On the early history, the Kanz is an extremely useful source for the governors of the Yemen during the period of the Prophet, the Orthodox caliphs, the Umayyads and ‘Abbāsids down to the year 204/819, when the author turns his hand to the earliest dynasty in Islamic times in the Yemen, the Ziyādīs [g.v.] and thereafter to the various dynasties which ruled over different parts of the Yemen in early Islam. As we might expect, he does not neglect the history of the Zaydī imāms and chronicles too the appearance in the Yemen of the Ismāʾīlīs dawwa in the late 3rd/9th-early 4th/10th century. The work is also of value as an important source of the Rasulīds in the Yemen, and from fol. 191a of the British Library ms. Or. 4581 (ed. Maḍḍāj, 111), the author speaks as an eyewitness of the events which played out around him. The Kanz was itself the subject of a further abridgement, Naḥbat al-akẖābār ʿl-khūṣūr, composed by the Rasulīd sultan al-Afdāl ‘Abbās (d. 787/1385).

(G.R. Smith)
gramarian and a singer whose performance he did not appreciate, and corrupt officials. Another of his genres consists of rasaidiyat, i.e. descriptions of gardens, flowers, ponds and fountains. Interesting are his poems describing inanimate objects, such as a painted rawdiyyat, i.e. descriptions of garlands. The genre consists of which he regularly placed at the end of every one of his Diwan (i.e. sections of the rhyme letters alif, baa, ta, etc.).

His long poem on “Rejection of wine in the evening and praise of wine in the morning” (Muzaddida fi djam an al-qahhah wa-maddah al-sabah, in Diwan, 301-7) was intended both as an imitation and contradiction [see NAKâ’i] of an earlier poem by Ibn al-Mu’tazz, on “Rejection of wine in the morning” (Urduja fi djam an al-sabah). In general, al-‘Akhîl proved himself a late supporter of the new style which Ibn al-Mu’tazz [q.v.] had begun to advocate some one hundred years before.

**SHARIF AMULI, a Mughul noble of the 16th/17th century. Persian by birth, he spent some time at Balkh in the Khânâkah of the Shî’i Muhammed Zâhid, but allegedly because of his heretic views was driven away from there and forced to go to the Decan. But then, too, his heresies drew upon him the unfavourable attention of the local rulers, leading to his flight to Malwa, then in Akbar’s empire (984/1576-7). He was acclaimed as a great scholar by the Persian notable, and was granted audience by Akbar, whom he introduced to the doctrines of the Naqawâ’i sect founded by Mahmûd Pasîkhânî [see NUKTAYWA]. Henceforth, he became one of Akbar’s advisors in religious and legal matters. Official appointments followed (1586/1675), and in 1590, 1594 and 1595 he was made kâdi of Bihâr and Bengal (1000/1591-2); and governor of Ajmîr with the purgâna of Mohan near Lucknow in 1597-9. In 1594/1595 he had the rank of 900 dhât. His status remained high under Djahângîr, who, while recording impressions of nobles immediately after his accession (114/1605-6), praises him highly in his memoirs, and says he raised this nobles immediately after his accession (114/1605-6), praises him highly in his memoirs, and says he raised this nobles immediately after his accession (114/1605-6), praises him highly in his memoirs, and says he raised D.C. Phillott, Calcutta 1927, i, 502-4.

SHARIF AMULI, a Mughul noble of the 10th/16th century. Persian by birth, he spent some time at Balkh in the Khânâkah of the Shî’i Muhammed Zâhid, but allegedly because of his heretic views was driven away from there and forced to go to the Decan. But then, too, his heresies drew upon him the unfavourable attention of the local rulers, leading to his flight to Malwa, then in Akbar’s empire (984/1576-7). He was acclaimed as a great scholar by the Persian notable, and was granted audience by Akbar, whom he introduced to the doctrines of the Naqawâ’i sect founded by Mahmûd Pasîkhânî [see NUKTAYWA]. Henceforth, he became one of Akbar’s advisors in religious and legal matters. Official appointments followed (1586/1675), and in 1590, 1594 and 1595 he was made kâdi of Bihâr and Bengal (1000/1591-2); and governor of Ajmîr with the purgâna of Mohan near Lucknow in 1597-9. In 1594/1595 he had the rank of 900 dhât. His status remained high under Djahângîr, who, while recording impressions of nobles immediately after his accession (114/1605-6), praises him highly in his memoirs, and says he raised his mansûb from 2000 to 2500 dhât. The date of his death is not recorded.

Sharîf Amulî seems to have been possessed of exceptional learning and eloquence, and is said to have written a book called Tarâwîq-yih-i zuhâr, though neither this nor any other work from his pen has survived. He earned the bitter enmity of theologians like ‘Abd al-Kâdîr Bâdûnî [q.v.], the famous historian, who mentions his arrival in India in order to insert a diatribe against him and his heretical views. The author of the Tahâbâ’i Akbarî, however, acclaimed him as “a monotheist (mawâniqî) of the time, having a true expertise in mysticism”.

AL-SHARIF AL-IDRISI [see AL-IDRISI].

AL-SHARIF AL-MURTADÁ [see AL-MURTADÁ].

SHARIF PASHA, Muhammad (1823-87), Egyptian statesman in the reigns of the Khedives Ismá'il and Tawfik. He was of Turkish origin and was born in Cairo, where his father was then acting as ka'īd ‘l-kudrat sent by the sultan. When some ten years later the family was again temporarily in Cairo, Muhammad ‘Ali [q.v.] had the boy sent to the military school recently founded by him. Henceforth, his whole career was to be spent in the Egyptian service. Sharif was a member of the “Egyptian mission” sent to Paris for higher education which included the future Khedives Sa‘īd Pasha and Ismá’il Pasha and the statesman ‘Ali Mubārak Pasha. He then took a military course at St. Cyr (1843-5), and served for some time in the French army until the mission was recalled by ‘Abbās I in 1849. For the next four years he acted as secretary to Prince Ḥālim, then took up military duties again in 1853 and attained the rank of general under Sa‘īd Pasha. During this period, he was much associated with the commander-in-chief of the Egyptian army, Sulaymān Pasha (de Sèves [see SULAYMĀN PASHA, AL-TRANSAWĪ]), whose daughter he married.

In 1857 Sharīf Pasha began his political career as Minister of Foreign Affairs and he acted as deputy for the Khedive Ismā’il [see ISMĀ’IL PASHA] when the latter went to Istanbul in 1865. He later fell in with all the high offices of state. It was he who in 1869 drew up the plans for the new Maṣāfī al-munawwi’d [see MAṢĀFĪ, XVI].

After the inauguration of constitutional government in Egypt in 1878, three cabinets were formed by Sharīf Pasha. When in February 1879 Nūbār Pasha’s [q.v.] cabinet (which included two Europeans) had been overthrown by the nationalist parliament, a constitutionalist movement was begun under Muhammad Sharīf Pasha, the leader of which in Parliament was ‘Abd al-Salām al-Muwālīlī. This party drew up a plan of constitutional reforms, which was laid before the Khedive, who in April 1879 entrusted Sharīf Pasha with the formation of a cabinet composed of purely Egyptian elements. This new cabinet instituted a Conseil d’État and had a new organic law passed by the Chamber (promulgated on 14 June 1879). After the accession of the Khedive Tawfik Pasha [q.v.], Sharīf Pasha’s cabinet was remodelled, but the new government was not so nationalist in complexion as the preceding. In August of the same year, the new Khedive refused to approve the constitution drawn up by the Prime Minister, hence on 18 August Sharīf Pasha resigned and was succeeded by Muḥammad Riḍā Pasha. Sharīf Pasha then took part in the formation of the “National Society” or “Party” at Ḥulwān, which published a manifesto against Riḍā Pasha on 4 November.

During the two years or so of mounting tension between the Khedive and the rising influence in the state of the nationalist elements of the army led by ‘Abū Ḥadīdīlī al-Miṣawi al-‘Alawī [q.v.], Muḥammad Sharīf Pasha endeavoured to put forward the idea of constitutional reform in order to forestall an attempted putsch by the ‘Urābīists elements. He became Prime Minister in September 1881, but had to resign in January 1882 in favour of Muḥammad Sāmī Pasha al-Bārūdīlī [q.v.]. Yet in the late summer of that year, when the Khedive had been restored to power in Cairo by British force of arms and the ‘Urābī revolt crushed, Muḥammad Sharīf Pasha again became Prime Minister (August 1882). He held office during the beginning of the British occupation, but in the end came in conflict with the British government and its Consul-General in Egypt, Sir Evelyn Baring (the later Lord Cromer), when the government required the evacuation of Egyptian forces from the Sūdān in face of the rising power there of the Mahdī [see MAHDĪYYA], and resigned in January 1884. He then retired from political life, suffered ill health and died at Graz, being buried at Cairo in April 1887.

By birth, Muḥammad Sharīf Pasha stemmed from the Turco-Egyptian ruling class, so that his attitudes were bound to be more Khedivalist than nationalist, but he managed to establish a reputation for sincerity with the nationalists, who recognised his genuine desire to make Egypt a constitutional state under Muḥammad ‘Abī’s house.

(J.H. KRAMERS-[C.E. BOSWORTH])

His father Abū Ahmad al-Ṭāhir (not Abū Ṭāhir, as Krenkow writes in EI, vol. IV, 329, Duḥ ‘l-Manākīb (“the pure man of noble qualities”) as the Būyid amin dubbed him, was born in 304/916-17. He was a distinguished man who was extremely influential, both in the caliphal court and among the populace, on account of his noble ancestry and his cultural eminence. In 354/965 he was appointed nakib or marshal of the ‘Alīfs, and given responsibility for the mażālīm and for the Pilgrimage. His career was interrupted in 369/979-80, in which year he was imprisoned by the Būyid ʿAḍud al-Dawla [q.v.], with his brother ʿAbd Allāh and numerous other dignitaries, in a fortress in Ṣhirzā. He had been accused—on the basis of falsified documents—of revealing state secrets and of abuse of trust (Ibn al-Djawzi, Mināzīm, vii, 98). The real charge against him seems to have been the mounting prestige which he enjoyed, prestige which exceeded, if Ibn Ṭaghribīrdī is to be believed (Nudūm, iv, 223), that of the caliph himself. If to this is added the enormous wealth possessed by Abū Ahmad and coveted by the Būyids, the real reasons behind his detention are easily deduced. It was not until 376/986 that he was freed, following the death of ʿAḍud al-Dawla and the accession of his son Sharif al-Dawla [q.v.]. Rehabilitated, he was reinstated in his official functions and all his property was restored to him.

In the political domain, Abū Ahmad played an important role. He was entrusted with numerous missions of mediation, all of which he accomplished successfully, through his wisdom and his diplomatic skills. Such was the case, for example, when serious conflict erupted between Sunnīs and Shi’īs at al-Karkh in 380/990. The consequences could have been very grave had it not been for the intervention of the nakib, who succeeded in soothing passions and putting
an end to this confrontation (see H.F. Amedroz, Three years of Buwaihid rule in Baghdad, in JRAS [1901], 619 ff.). Towards the end of his life, Abū Ahmad suffered poor health and lost his sight. In 400/1009-10 he died, at the age of 97 years (Dīwān, ii, 293).

The mother of al-Radī, Fāṭima bt. al-Ḥusayn (d. 385/996), was also of 'Ālīf descent, more precisely from al-Ḥasan b. 'Alī, her grandfather al-Nāṣir li-l-Ḥakk, poet and man of letters, was the ruler of Daylam. Al-Radī apparently had two sisters, Khadidja and Zaynab, as well as two brothers, al-Āthar, mentioned by the poet al-Ma‘arrī (d. 449/1057) in his ode to Abū Ahmad (Ṣākī al-zand, Beirut 1957, 35), and al-Sharīf al-Murtada (355-493/967-1044 [q.v.]), renowned as a poet, writer, theologian, polemist and leading defender of Imārism. While the two brothers al-Radī and al-Murtaza are often mentioned conjointly, their contemporaries seem to have preferred the former, in particular for his poetic gifts and for his personal qualities (cf. Ibn Abī 'l-Hadīdī, Sharḥ Nahlī, 39-40).

As regards al-Radī’s own immediate family, little is known. He apparently had a son, Abū Ahmad ‘Adāmī, known like his grandfather by the cognomen of al-Ṭāhir Dhu l-Mansūk. He followed the example of his ancestors in occupying the post of nākīb. Furthermore, after his death, a second son was born, Abū Ahmad al-Mūsawi (Ibn ‘Inaba, Umda, 211).

Intellectual formation.

Al-Radī had an education worthy of his rank. While he was still at an early age, and during the absence of his imprisoned father, his mother entrusted him, with his brother al-Murtada, to the eminent Imāmī scholar al-Shaykh al-Mufīd (d. 399/1002), among others. Al-Radī was very much attached to the last-named, in particular. In fact, in 380/990, at 24 years old, he was entrusted with his father’s responsibilities (the nīkāba of the ‘Alids, the mazālim and the Pijramage), when the latter’s state of health prevented him from performing these duties himself. Sometimes, it was the two brothers together who assumed the responsibility. He was probably not officially appointed nākīb until 403/1013. Furthermore, Baha‘ al-Dawla persisted in showering him with honorific titles: al-Sharīf al-Qa‘īlī (“the venerable noble one”) (398/998), al-Radī (“the well-pleasing”) (398/1007), al-Sharīf al-Adīlī (“the most venerable noble one”) (401/1011), Dhu l-Haṣābin (“of the two nobilities”) and Dhu l-Munkataṭīn (“of two virtues”). To this writer’s knowledge, in the entire history of Islam no one has ever surpassed al-Radī in terms of official honours and distinctions.

Poetic activity.

A writer and scholar versed in various disciplines (Kūrān, Ḥadīth, language and literature), he was most appreciated and successful as a poet. His contemporary al-Thalālibī (op. cit.) asserts that he was considered, in terms of quality as well as quantity, the best poet of the Tālibīs, indeed of Kuraysh in general. Whatever the case, one thing is certain: al-Radī was passionate about his poetry. He was proud and jealous where it was concerned. He never permitted himself to utilise it for material ends, nor to obtain presents and benefits, as was the practice of innumerable poets of his time. He sought only honour and prestige as rewards for his poetry. His panegyric poems were devoted mostly to his relatives and friends; the others were addressed to certain public figures, those whom he genuinely trusted. Among the latter, worthy of mention is the caliph al-Tā‘ī (d. 393/1003 [q.v.]), to whom he dedicated numerous laudatory poems revealing sincere affection and respect for the man. One of his most moving poems is that in which he recounts the deposition of the caliph in 381/991 by Baha‘ al-Dawla (Dīwān, ii, 444-8). He continued to dedicate poems to him until the former caliph’s death twelve years later in 393/1003 (Dīwān, 197-201). But his relations with al-Ka‘dīr (d. 422/1031 [q.v.], successor to al-Tā‘ī, were not so favourable. Indeed, he wrote some eulogies addressed to him, but without much conviction. On the contrary, he composed a number of audacious, impertinent and provocative poems which sometimes roused the ire of the caliph, such as that
cism, al-Radī was open to all tendencies. He showed some sympathy for Shafi‘ism and for Mu‘tazilism (cf. Ibn ‘Abbās, al-Sharīf, 46-7). He made his own convictions clear in declaring (Hakā‘īk, v, 17) that he had been drawn, in early life, towards Mu‘tazilism, but that he had later opted for the dogma of the hadīth and was ‘ud‘ (promises and threats in the life beyond), one of the five fundamental principles dear to the Mu‘tazilīs (cf. Dīwān, ii, 270).

Political activity.

His biographers, led by Ibn Abī ‘l-Hadīdī (op. cit., i, 34), state that, from an early age, he harboured political ambitions and even aspired to the highest authority in the state, the caliphate itself; some of his verses express this unequivocally (Dīwān, i, 358, 359, ii, 167, 406-12). It seems that his friend Abī Ishāq al-Sābir encouraged him and built up his hopes (Dīwān, ii, 89-90; cf. Ibn Abī ‘l-Hadīdī, op. cit., 26). This idea, which he cherished throughout his youth, came to nothing, and many of his poems convey a sense of disappointment, of deep dejection and of acute pessimism. He was finally obliged to come to terms with reality and to be content with the honours lavished on him by the Buyids, Baha‘ al-Dawla [q.v. in Suppl.] in particular. In fact, in 380/990, at 24 years old, he was entrusted with his father’s responsibilities (the nīkāba of the ‘Alids, the mazālim and the Pilgrimage), when the latter’s state of health prevented him from performing these duties himself. Sometimes, it was the two brothers together who assumed the responsibility. He was probably not officially appointed nākīb until 403/1013. Furthermore, Baha‘ al-Dawla persisted in showering him with honorific titles: al-Sharīf al-Qa‘īlī (“the venerable noble one”) (398/998), al-Radī (“the well-pleasing”) (398/1007), al-Sharīf al-A‘ṣāfī (“the most venerable noble one”) (401/1011), Dhu l-Haṣābin (“of the two nobilities”) and Dhu l-Munkataṭīn (“of two virtues”). To this writer’s knowledge, in the entire history of Islam no one has ever surpassed al-Radī in terms of official honours and distinctions.

The portrait provided by his biographers, corroborated furthermore by his poems, is that of a man of honesty, sensitivity, sincerity and finesse, a staunch and loyal friend. He was also immensely proud and conscious of his dignity; he accepted no gift from anyone. On the contrary, he was generous and well-disposed towards scholarship and scholars. He had founded a school, the Dār al-līm (“house of knowledge”), where the students were lodged and provided for (Ibn ‘Inaba, op. cit., 209).

A committed Imāmī, but without excess or fanati-
in which he compares himself to the latter, declaring in his presence (Diwdn, i, 42):

"Alas, Amr of the Believers! We are equal, at the summit of glory ..."

Only the caliphate, of which you hold the reins, separates us.

Rahib Al-Dawla was one of the few amirs to enjoy eulogies on the part of this poet, in the guise of appreciation for all the privileges which he had accorded him (Diwdn, i, 13-18, 53-64, 277-8, 413-18 and pasim). But the poems in which al-Radfi displays innovation and skill of the highest order are those devoted to praise of his father. There are some forty of these, and no other Arab poet has ever produced anything comparable. He treated his father, whose personality fascinated him, as though he were a caliph. On the occasion of every festival, he presented him with a poem. Furthermore, it was the arrest of his personnel unique in Arabic literature—their art of the pen (Diwdn, i, 175):

“I have loved but, as God knows,
    I have only needed to see, to enjoy it ...”

His elegiac poetry is a model of sincerity and sensibility, full of wisdom, of meditation on man, life and death. Among his most moving elegies, notable are those dedicated to al-Husayn b. ‘Ali, to his mother, to his father, to his friend al-Sabi and to his master Ibn Djinni (Diwdn, i, 26-30, 44-8, 187-90, 381-6, ii, 63-7, 75-6, 290-6 and pasim). His last poem of the genre was the elegy addressed to his friend, the writer and poet Ahmad al-Battal, at the time of his death in Shaban 405/1015 (Diwdn, i, 170-1).

In this poem, al-Radfi seemed to have a sense of his own impending demise, as he declares (op. i, 170):

“After you have hurt the one whom you love,
    Misfortunes will never spare you!”

In fact, a few months later, his own death supervened. He expired on Sunday, 6 Muharram 406/26 June 1016, at 47 years old. He was buried first in his home town, al-Karkh, in the precincts of the mosque of the Anbariyin, in the absence of his brother al-Murtaḍa, who was, it is said, too distressed to attend the ceremony. It was the wazir Fakhri al-Mulk who conducted the funeral prayers. According to Ibn ‘Inba (op. cit., 210-11), the remains of al-Radfi were said to have been later transferred to Karbala’, to the mausoleum of al-Husayn unfinished, hand of his father. Numerous poets paid their respects to him, in particular, his brother al-Murtaḍa. Abu ‘l-Kasim al-Maghibi (d. 418/1027) and his disciple Mihyar al-Daylam (d. 428/1037).

Works.

Despite his relatively early death, and in spite of his weighty official responsibilities, al-Radfi had the time to compose numerous works, reflecting his extensive and varied culture. His contemporary al-Nadjash (Ráqíd, 283) has listed some fifty of them. Particularly worthy of mention are the following: (1) His Diwdn, of 10,000 verses, the poems in which are often dated (374/405-985/1015), was assembled by several compilers, his son Ahmad and Abû Ḥakim al-Khabr (d. 476/1083) among others (ed. Bombay and Baghdad 1889, Beirut 1890, 1893, and more recently ed. Dar Šādir, n.d.). (2) Rasîdî’s al-Imam ‘Ali ("Special characteristics of the Imam ‘Ali") (ed. Nadjash 1949 and Maghād 1986); written in 383/994, this work was in fact the draft of a more ambitious project. The author intended at the outset to deal with the characteristic virtues of the twelve Shi‘ī Imams (Rasîdî’s al-A’īman). He began with ‘Ali: his biography, his qualities and some extracts from his speeches and his wise aphorisms; this gave him the idea of devoting a second work exclusively to the sayings of ‘Ali, with the object of illustrating his oratorical gifts. With the study of the other Imams still unfinished, he turned immediately to this new enterprise which culminated in the celebrated Nāhī al-balâgha (cf. Nāhī, 1-3). (3) Nāhī al-balâgha ("The way of eloquence") [g.v.] (ed. Beirut 1885, Cairo 1905, 1910, 1925 and ed. M.M. ‘Abd al-Ḥamīd, n.d. and Beirut 1983): this is the anthology of the speeches, homilies and letters traditionally attributed to ‘Ali, which al-Radfi compiled in 400/1010 (see on this subject M. Djebli, Encore à propos des authentications de Nadjash al-balâgha en Isl, lixiv (1932), 36-52; (4) Ḥakīb ‘al-ta’wil fi masâlik al-tanzîl ("Interpretation of Kur‘anic images"), sometimes mentioned under the title of Ma‘ānî al-Kur‘ân al-kabîr ("Obscure meanings in the Kur‘ān") this was a monumental work, considered one of the most important exegeses of the Kur‘ān. Unfortunately, only the 5th volume has survived (ed. Nadjash 1936). (5) Talâtî al-bayyin fi ma‘âṣirat al-kur‘ân ("Summary of metaphors in the Kur‘ān") (ed. Cairo 1964, Baghdad 1965): begun on Thursday, 28 Shahrūb 401/1011 and completed on Sunday, 13 Shawwâl of the same year, this book is probably a summary of the preceding work (cf. Talâtî, 288). (6) Ma‘âṣirat al-nabawaya ("Metaphors in the Ḥadîth") (ed. Baghdad 1911, Cairo 1971). As a talented writer and an admirer of literature, the author wanted to seek out eloquence, rhetoric and metaphor in the three principal sources of the Arabic language, these being the Kur‘ān, the Ḥadîth and the sayings of ‘Ali. It was in this spirit that he composed these last two works (al-Nadjash al-balâgha, al-Talâtî al-bayyin fi ma‘âṣirat al-kur‘ân) ("Correspondence with al-Safadî"). If al-Šafadî is to be believed (Wâfi, ii, 374), this correspondence, in prose and in poetry, constituted three volumes. But unfortunately, only an infinitesimal part of it has survived, in a ms. belonging to the Tunisian scholar H.H. ‘Abd al-Wahhab (ed. Kuwait 1961). Other works, apparently no longer in existence, deserve mention, in particular: (1) Shat wâllidih Abî
Ahmad (biography of his father), composed in his youth, in 379/990. (2) Al-Mustawfi al-Sadr (An Anthology of the poems of Abū Tammādī)

Abū Tammādī, who was appointed governor of Bidjaya, where he died in 756/1355), Abu Musa al-Mashaddalr (a native of the region of Bidjaya, d. 745/1345). (3)

Al-Mansūr ordered his release in or before 379/990-90, either because of a dream-vision of the Prophet or thanks to the intervention of al-Mansūr’s pet ostrich; the supposedly supernatural cause of his release is said to have given rise to his cognomen, which in one source is said to be "Ṭa'llīk al-나’āma, "released by the ostrich".

Although he is reported to have been a prolific poet, little of his work is extant, and that only in fragmentary quotations. His friend, Ibn Ḥāmzah calls him the greatest Andalusian poet of his time and compares his rank among the poets of the Andalusian Umayyads to that of Ibn al-Mu’tazz among the ‘Abbasids because of the "gracefulness of his poetry and the beauty of his similes." Particularly appreciated was his kāf ‘īyya beginning:

ghusn yaḥāzzu fī ḍi‘āt nākā
dīdān minhu fī‘ādī ḥūrādā
("A bough, quivering on a sandy hillock/from which my heart burns burning!"; but only 41 verses, probably not the entire poem, are extant. The extant fragments deal mostly with wine and flowers.)

Ibn al-Mu‘taṣr, the name given to a distinguished group of scholars of Tlemcen.

1. MUHAMMAD B. AHMAD, Abu Ṭalib (a) Life

This scholar (al-‘ām) of Tlemcen, who was born in 710/1310 and died in 771/1369 or 1370, is the renowned ancestor (maqhsir) of a family which has produced several generations of jurists (fuqahā‘), and more specifically of "philosopher-jurists" (Abū Bakr Ibn Shu‘ayb or philosophers of law, also known as "theoreticians of law" (W.B. Hallaq), particularly distinguished among whom are his two sons.

He was nicknamed al-‘Alaw, being the native of a village situated a day’s journey from Tlemcen and called al-‘Alawiyīn.

He studied under masters of repute, including Abū Zayd (d. 743/1342) and Abū Mūsā (d. 749/1348), with whom he studied science of law (fiqā‘), sources of law (ašāl al-fikā‘) and dogmatic theology (‘ilm al-kalām). He also studied under the teacher of Abū al-‘Allām and Yahyā Ibn Khaḍīr, Abū ‘Alī Ibn al-‘Alī (d. 757/1356), a citizen of Tlemcen of Andalusian origin (from Avila), later a resident of Fās, where he became the disciple of the mathematician Ibn al-Bāna‘ (d. 721/1321). Among his other distinguished teachers were the savant and mystic Abū ‘Allām b. Ibrāhīm al-Muqāfī, nicknamed “the Weeper” (al-Bakka‘, Bustān, 121, tr. 102), the kāfī ‘Alī Muhammad al-Tanīmī (who was appointed governor of Bīdāja, where he died in 756/1355), Abū Mūsā ‘Imrān al-Maghdūdī (a native of the region of Bīdāja, d. 745/
Referring to the document for Al-Sharif al-Tilimsani, a representative of that class of Maghribi scholars who were employed by the successors to the Almohads in the training of royal functionaries responsible for the sultan's secretariat and for military, religious or judicial administration, in the context of the official teaching of the madrasas. Furthermore, the need for such functionaries was augmented by the prosperity of Tlemcen and the development of the diplomatic and commercial relations of the kingdom.

His work is situated in the movement whereby institutions and which illustrate the Organon, which correspond to the Kitab al-Shifa (death of 749/1348), which originated in the Orient and spread throughout the West, decimating the intellectual elite of North Africa. On his return to Tlemcen, and until the capture of this town in 753/1352 by the Marinid sultan Abu Inan, he gave courses which were well attended, among others by students from neighbouring countries.

Abu Inan appointed him as a member of his academic council (al-maghiṣ al-imāni) and introduced him to his court in Fas. There he gave instruction to the royal family, to the children of the nobility and to eminent individuals of the court (awral al-ṣuraqṣa wa l-ṣuqama, Busīn, 117). Some of his pupils were to become renowned, such as the notary and astronomer (muqaddam) attached to the mosque of al-Karawīyīn, Abu Zayd 'Abd al-Raḥmān al-Maḍīyūn (al-Kahfīrī, b. 777/1375-6) and the traditionist scholar Abu Zakariyya Yaḥyā al-Sarrāḍīj (d. 805/1402-3). On the death in 759/1358 of Abu Inan and with the consent of the Marinid waṣir Umar b. 'Abd Allāh, al-Ṣaḥīf al-Tīlimsānī accepted an invitation from the sultan of Tlemcen, Abu Ḥāmūtī (723/923-89), who appointed him an advisor, being impressed by his superb intellectual qualities (anfūbuhum), his methodical analyses and the clarity of his language which rendered him a proficient orator. His daily routine began with interpretation of the Qur'an, his favourite reading, the Mudawwana, and his pre-eminence in the different Malikī schools (Kayrawān, Córdoba, Baghda, Cairo, etc.), especially in regard to the Kurānī: its grammatical analysis (nahw), its readings (kāfīlāt) and its variants (ṣūqāl). Furthermore, the art of poetry, ancient history of the Arabs ("Days of the Arabs"), ayām al-'Arab, and "Days of God," ayām Allāh and Sūlim were subjects in which he excelled. In addition to his mastery of the rational and traditional sciences (al-mashayq), the jurist and his judgments (salāmāt al-akhl), he was also endowed with profound mystical knowledge which he sought to share with his pupils, initiating them especially into the rejection of material goods.

What emerges from his personality is the image of a sincere Muslim whom affluence did not deflect from the defence of the spiritual, moral and humanist values contributing to the cohesion and dynamism of the city. Among his pupils, many acquired renown: in the first place his own sons, 'Abd Allāh and 'Abd al-Raḥmān, the imām al-Ṣahīfī, Ibn Zamrak, 'Abd al-Raḥmān Ibn Khādhīn, Ibn al-Sakākī (Abū Yahyā Muḥammad, d. 816/1413), the fākh Muhammad b. 'Arif al-Maḍīyūn, the saint and preacher Ibrāhīm al-Maṣūmdī (d. 804 or 805/1401 or 1402), and the jurist Abu 'Abd Allāh b. 'Arif al-Warghāmī (716-803/1316-1400).
tutions were re-adapted to Malikism after the Almohad period. For Ibn Maryam, he was the last of the great masters of ijtihād according to this period (bābur), as is seen by this period (arba'īn). He was responsible for the revival of orthodoxy (ibid, 169, tr. 185), he resuscitated religious law and dispelled heresy (ibid., 167, tr. 185).

In reaction to the Almohad doctrine, illustrated in particular by the Mahdi Ibn Tūmart, the scholar equally versed in the sources (usūl) of law, permitting the deduction of laws from their principles, and in the applications (furūʿ) of law, exerted his critical sense while applying himself to the original texts. Two methods were combined: idīthā, personal interpretation as a means of rectifying or completing passages in the Mālikī treatises, and takhrīj, using the model of the opinions of Malikī scholars expressed in the treatises on furūʿ, the mystical sense (bātin) taking on an increasing importance in the interpretation of sources.

With al-Ŝarīf al-Tilmānsī, the development of the juristic sources is characterised by an attempt at reconciling these furūʿ with the usūl, as well as by the more profound study of theology, these various elements forming part of the education dispensed especially in madrasas. As with the Ḥafṣīd dynasty, the function of muftīs, initially private and independent, tends to be given official status, becoming an institution designed to bolster the authority of the Banū ʿAbd al-Wād. Thus in connection with the school of Biłūḥ, and under influences deriving from al-Andalus, from Tunis and from Fās, a judicial practice (ʿamal) is constituted, belonging specifically to Tlemcen and its region, which has left its mark in collections of particular cases (nawzāl), where the position of the Divine Law is expressed by an authorised religious scholar (muftī), in answer to a question put to him by the jurist (fikht, muṣafīt).

The fatwā related by Ibn Maryam (Bustān, 178-84) is not so much an example of a judicial decision, an opinion on a point of law delivered by an expert, as a concise survey of the principal issues debated in the 8th/14th century at Tlemcen in the field of usūl al-fākḥ. More specifically, this fatwā reflects the pedagogical concern of al-Ŝarīf, revealing his characteristic method of addressing the problem from different angles (bi-wuqūṭ al-nazar, ibid., 178). It gives an insight into his way of contemplating the rules of interpretation of the sources of law from which are derived the legal statutes (ahkām) which should govern the judicial problems (nawzāl) which are presented.

The doctrine of al-Ŝarīf is characterised here by:

- Insistence on the authority of the Prophet as representative of the Supreme Legislator, God;
- His concern to reconcile rules which appear to be contradictory, e.g. by linking the particular to the general case;
- The resolution of conflicts through the rule of abrogation (누드); which can concern an explicit text (nass) or a judicial decision or rule (ḥudūd);
- A technique close to that of such Ashʿāri as al-Ŝarīf himself, al-Djwāynī, al-Ğazzālī and al-Raḍī and to that of mediaeval Christian scholarship (the technique of division and of classification, reference to religious authority, the hypotheses envisaged being most often expressed in the form of the syllogism, the use of copious evidence in argumentation, refutation of the opponent through his own arguments or through argumentum ad hominem, al-taṣlīm). Directly, the accent is placed on the delimitation of the question, the de-emphasis of the controversial points, and then the reduction of divergencies by the elimination of faulty interpretations giving approbation (samāk) to the erroneous, then the recognition of the direction of probable certainty, of equitable solutions;
- A rigorous exegesis aided by an analytic logic, bordering on an apodictic logic which does not impute to the texts more than they show, proceeding through the observation of singular principles which resemble one another to the deduction and detachment of the universal rule (e.g. the Aristotelian concept revised by Ibn Sīnā). Simple allegation (ḥudūd) needs to be confirmed (yaqūlū, ibid., 183). His procedure for validating between the valid and the non-valid is close to that of the philosopher (e.g. Ibn Rushd), between the true and the false: simple notions (maḏāni mufadda) are all conceivable, it is their composition (tarbāḥ), which gives the concept (taṣawwur) which permits affirmation and negation (al-ṣīqib uwaq-sāb), and especially, truth and falsehood (al-nūk uwaqq-kadīb);
- A cautious use of analogy (al-khāṣṣ). This is a means of avoiding, on the one hand, assimilation by analogy which brings about an interpretation far removed from the basic case (ṣīqib), by stressing the resemblance to the assimilated case (ṣīqib); and on the other, personal opinion (raʾīy), especially in the absence of a clear expression of legal rules in the texts (ibārāt al-nāiss). The arguments used are non-analogical, arguments a fortiori (faḥū wa-khāṣṣ, where the themes are to be found more decisively present in the assimilated case than in the basic case), starting with the implicit meaning of the typical text (a maṣūr ad minūr or a minūr ad maṣūr, maḏām al-khāṣṣ or dawāt al-nāiss, and reductio ad absurdum, khāṣṣ al-akī);
- Utilisation of logic, in the general structure, as in the different developments of the reasoning, which adds richness to the text and clarity as well, giving it persuasive force and avoiding ambiguity. However, its presence is diffuse and takes the form in the course of the text, after the manner of Ibn Ḥazm, of stylistic features apparently not designed or intended (for example, the non-categorical syllogism, or, according to Arabic classification, of, e.g. al-Šarīf, disjunctive conditional syllogism);

The predominance of idīthā, here in the sense of judicial effort (Abū Bakr b. Ǧuʿayb) where faith and knowledge are partners, and which is tied to the notion of action, will, knowledge, truth, while servile imitation (taḥlīl) is the symbol of immobility, of passivity, or ignorance and of falsehood (al-ghalāl). But the definition of idīthā is fairly broad as applied by al-Ŝarīf, who acknowledges absolute idīthā in the case of the independent interpreter, who decides without reference to any doctrine, whereas for al-Ğazzālī, for example, the independence of this judgment is only valid within the parameters of the school to which the jurisconsult belongs.

It is the concern for just equilibrium (išdāl), and the feeling that the certainty obtained is only a probable certainty, which leads the jurist, a devout Muslim, subject to the omnipotence of the Legislator (God), to an attitude of moderation (hayʾat al-taṣawwur) and of wisdom (al-hikmah). Thus the judge becomes the arbiter, or finds his role in arbitration (since kādī is to settle a dispute, to arbitrate), as is shown by Aristotel’s definition of equity (aequitas): “Equity seems to be justice which goes beyond the written law” (Rhetoric, 1, 1574a).

(b) Works

A book on donations (al-muṣāfa al-mawṣūfa, par ex); Shurṭ Ūṣul al-Khawāṣṣ—Muḥāṣṣūṣ fr ’-olutely
or K. al-Mîṣḥâb fî 'l-fîrah or Mîṣḥâb al-wâsaiîl fi hîyâ al- farkî 'l- atâa 'l-wâsîl, dedicated to the Mârînîd sultan Abî İmân (749-59/1347-58); a work on predestination and the immutable decrees of God (Fi 'l-kâdar); poems (kâhid) composed at the time of the Mârînîd fâti-l-tîwâli; a work on mathematics, ded. to the Mârînîd sultan Abî al-Mâzûnî (d. 883/1478) and of al-Wânsârî, with some of his sons 'Abd Allâh and 'Abd al-Râhmân, as well as in al-Bûstân.

2. 'Abd Allâh b. Muhammad, sometimes called Ibn İmân, b. 748/1347-8, the elder son of the pre-}
as regards the *ism and the kunya, appears to be a combination of that of *Abd al-Rahman Ibn Khaldun and that of Abu Yahya b. al-Sukkak (kadi of Fâs, d. 816/1413), both present on the night of his birth, in his father's house. His acquaintance with the jurist *Kurān, he studied in particular, with his father, the fundamentals of law and the *Mawāṣaṭa*, then with his brother *Abd Allâh, nine years his senior, whose diligent disciple he became. He also undertook study of Ibn al-Ḥâdîjî, of the *Dîvâlîm al-Khânûdâjî* and of the *Idhâf al-Fârisî*, as a pupil of Abû *Uthmân Sa'id al-Ūqbâ (kadi of Biijlja, then of Tîlîmîn, 720-811/1320-1408). Like his brother, he had Muhammad b. *Hâvâdî al-Gharmûfî for a tutor in the study of the *Dîvâlîm al-Zâdîdâjî* and the *Mukarrârîn* of Ibn *Usfîr*. With the Andalusian Abu 'l-Kâsim b. Ridwân, he studied the *Sâkhîh* of Muslim and the *Shâfyî* of *Iya'd*. During his brother's illness, in 784/1382, he taught in his place, before leaving to give a series of lectures in Fâs. Renowned for his skill at exegesis and the analysis of the apparent and hidden (*al-sâhir wa l-bâsin*) meaning of texts, he educated numerous students under the written and printed *Abû al-Allâh*, Muhammad b. *Yâsîn al-Îshârî*, secretary of Abû Hammû II, as well as Abu 'l-'Abbâs Ahmîd Ibn Zâghû (782-845/1380-1441), himself an eminent jurist and teacher of the *kâfit* of Mâznûnî, al-Maghîlî (d. 883/1478) and of Abu 'l-Hasan 'Alî al-Kalâsâdî (d. 891-1486), an Andalusian and a resident of Tîlîmîn who was himself the teacher, in arithmetic and the science of succession of the theologian Muhammad al-Sanûsî (930 of 1481-1545-1499). He died in 826/1425. His works comprise a book on the forgiveness of sins (*Ta'llî* al-'l-maghrîfîn); *Shârîf al-asârî al-akhyâya* (of al-Muktarâh, d. 612/1215-16); and *îshârî al-îkhdîfî* (of al-Dîwâñayîn).

5. Abu 'l-Fârâdî b. Abî Yahya b. Muhammad, brother of Abu Abî 'l-Abbâs essentially followed courses given by Ibn Marzûk al-Îkhdî at al-'Ubbâdî. The details of this education with its different gradations, were typical of Mâlîkî instruction. On the occasion of the presentation of the *i'dâh* he was dressed by his master in the robe of the *Shâfs* (*al-basahu ُkhîrît al-tasâarîwiyî* in which Ibn Marzûk had himself been clad by his father and his maternal uncle. He died in Tlemcên in 868/1463.

**Bibliography** (complementary to preceding sources): Ahmad Bâbâ, 294, 297; Ibn al-Îkhdî, Rabat, ii, 1500, Cairo, iii, 1326; Ibn Maryam, al-Boustîn, 204-6, 209-10, tr. Provenzali, 234-6, 240.

The al-Îshârî al-Tîlîmîsînî family in the cultural life of their time.

The abundant biographical material concerning the al-Îshârî al-Tîlîmîsînî family gives a clear impression of the dynamism of intellectual life and of the institutions which formed its environment, in particular the elaborate system of education in Algeria in the 8th/14th century. The instructive evidence conveyed in the biographical notices show a social promotion of scholars, who are above all jurists, which was owed to their personal merit (*hasâb*) rather than to their genealogy (*nasâb*). The traditional sciences play a significant role in the career of a jurist in this period, the sources being the *Kurâ* and the Sunna. Judicial logic flourished, as did the theological logic manifested in dogmatic theology (*kalâm*), and there seems to have been, in this context, a scholastic tradition at Tlemcên, which is seen, in the following century, in al-Sanûsî, with an original synthesis between theology, logic and Sufism, as well as the jurist, logician and historian al-Tanâsî (d. 899/1494). As in Christian Europe, the work of Ibn Sînâ is one of the central pillars of education, with the huge encyclopedia constituted by the *K. al-Shâfs* (known and annotated in Latin under the title of *Sufficientia*) as a universal work of reference for the age.

This system of education was developed not only at the instigation and under the control of royal power but also in response to a prodigious appetite for knowledge and to the enthusiasm aroused by new ideas and by the growing social prestige of masters. The attraction of the allowances paid to the students admitted to courses (*al-marâsîh, Boustîn, 170*) and the social utility of studies, success in which brought privileges (*injîdâ*), honours and the guarantee of public careers in the administration or even in the diplomatic service, or confidential occupations (such as that of notary)—all these factors contributed to an increase in the numbers of students (*jalâbâh*), which created problems of accommodation and catering. The hierarchical ranking of disciplines led to the consolidation of the lucrative scholarship of the time, that of law. However, grammar did not fall into disfavour, as it did in Europe, and the epistolary art (*dictamen* or *ars dictaminis*, corresponding to the art of inditing, *injîdâ*), which is one of the *ilâm al-a'dâb* in association with the practice of rhetoric, enjoyed a revival on account of the development of commercial and diplomatic relations in the Mediterranean region, which necessitated the composition of more numerous and more complex official documents.

SHARIFA AL-TILIMSAÑI — SHARIKA

SHARIH UL-MENAR-ZADE, Ahmed (?-1067/?-1657), Ottoman historian.

The son of the Ottoman atim ‘Abd ul-Halim (d. 1051/1641-2), he was born probably in Amasya and himself followed an atem career, rising to be a middle-ranking muharris in Istanbul. His father being the author of an Ottoman commentary on an Arabic work on jurisprudence, Menar al-ammar, the son became generally known by the lakab Sharih ul-Menar-zade. He died in Istanbul in Shabir 1067/May-June 1067 (H.), Kisilgin (ed.), ‘Usaqi-zade’s Lebensbeschreibungen berather Gelehrter und Geistesmanner des Osmanischen Reiches in the 17. Jahrhundert (Zey-i Saigiiq), Wiesbaden 1965, 221-2; Mehmed Shekhyi Ef, Web ‘il-filda’a, ms. Suleymaniye, Beşir Aga 479, fol. 197a; Babinjer, GOW, 191-0; L.V. Thomas, A study of Naima, New York 1972, 136-8).

Sharih ul-Menar-zade compiled a world history from the creation to the year 1065/1655 which remained in draft form at his death (Kisilgin, op. cit.). This draft was subsequently presented to the Grand Vizier ‘Amni-i-jda Husyan [Koprulu] Paşa [q.v.], who commissioned Na‘ima [q.v.] to write a new Ottoman history based upon it. The earliest references by Na‘ima to Sharih ul-Menar-zade’s original are to 1018/1609 in the reign of Ahmed I and the latest to Mehmed Koprulu Paşa [q.v.] in 1065/1655 (Musafa Na‘ima, Ta’rikh, Istanbul 1281/1864, i, 10; Thomas, op. cit., 138). It is thought that for the intervening period Sharih ul-Menar-zade’s work was incorporated almost entirely into Na‘ima’s history and that the latter’s text is therefore heavily dependent upon it (Ta’rikh, i, 10-11, and passim; Thomas, 138-9). Sharih ul-Menar-zade’s history was never published separately; the manuscript is presumed lost.

Sharih ul-Menar-zade’s own sources appear to have been (i) for the late 16th-early 17th centuries, a written history now thought lost but possibly closely related to the chronicle of Hasan Bey-zade [q.v.]; (ii) the history by his contemporary Kara Celebi-zade [q.v.]; (iii) his own notes and information from oral informants. According to ‘Usaqi-zade, Sharih ul-Menar-zade was an avid participant in social and official gatherings and was thus well-informed; Na‘ima regarded him as a shrewd and reliable observer of events (Kisilgin, ‘Usaqi-zade, 221-2; Na‘ima, Ta’rikh, i, 10).

Bibliography: Given in the text.

CHRISTINE WOODHEAD

SHARIKA, Shurka (A.), nouns with a basic meaning of partnership, association (see Lane, Lexicon, s.v.) hence from the same root as the theological term sharik [q.v.] “associating other gods with God”, hence polytheism, and shurik, pl. sharikas “partner associated in divinity”, both frequent in the Kur’an.

As a term of Islamic law, it takes different forms according to the contents and conditions. According to al-Azhari, it signifies the mixing (khaliq) of two or more assets (mali) together with the permission of each partner that the other can trade with it. Shurika is principally divided into partnership by property (milki), and by contract (‘akdf). The former originates when two “persons” become owners of one property without a contract. This can occur by choice, when they “accept” the subject through someone’s gift. Alternatively, it may be brought about without choice; this is the case in inheritance (see mirāt). In both cases, it is not lawful for either partner to perform any act with the other partner’s share without his permission.

A partnership contract is controlled by the principle of proposal and consent (takfīb wa-kabīl). The classification of companies seems to be incompatible between the largest schools of fiqh, the incompleteness probably arising from the varying recognition of authentic sources, as well as from the question of what constitutes a valid partnership. The Hanafi school, which permits all kinds of partnerships, appears to have the most consistent and logical classification. One can observe that they divided it from a “liability” point of view into:

1. Partnership in traffic (sharikat ‘inān); this is contracted when each party contributes capital. Each partner would accordingly become an agent of the other but not his bail. Equality in capital, responsibility or profit need not result.

2. The muftiwaqa (q.v.) or equal partnership, is contracted between two persons of equivalent property, privilege and religious persuasion.

From a “subject” point of view, partnership for the Hanafis can be divided into:

1. Partnership in crafts or trades (sharikat sanda’?). This is contracted between two craftsmen in a similar trade, such as cobblers or tailors; they agree to work together and share the profit produced. The condition that Malik makes for sharikat al-sanda’? to be valid is that the partners should be in the same or related trades. The Hanbalis permit this kind of partnership, while the Shāhīis and Imāми Shī’is totally reject it on the grounds that it can only take place in regard to capital and not in regard to work.

2. Partnership of capital (sharikat amudl). This is contracted when two partners put their capital in one project and agree on certain conditions for administration, profit and loss.

3. Partnership of personal credit (sharikat waqfah). This is contracted when two well-known persons (waqfahad) ask others to sell to them goods without payment on the basis of their reputation, and then sell the goods for cash. This use of personal credit is rejected by scholars, including al-Albani and Mufīrān, on the basis that it involves work and money that are not actually present, and that it also involves uncertainty and risk (gharan) in the traded subject.

The Hanbalis do not seem to identify “liability” as an element of classification when they place both muftiwaqa and ‘inān on equal footing with other divisions based on the subject element.

The madāran (q.v.) also called by the Hidjāzis kirdā (q.v.), is another early Islamic form of sharika which has been focused upon by modern Muslim writers in Islamic banking. The main difference between the two forms lies in the instruments that each utilises. Sharika uses similar “assets”, whereas in madāran the owner of various “forms” of assets can be partners, in return for a share of the profits, in accordance with their agreement. The risk for the capitalist is his capital, while for the manager, it is his time and effort.

Sharika, together with profit-sharing, madāran, are seen by scholars of Islamic banking as the main legal structures for various school Banking. The idea of IFB has gradually evolved over the last forty years into a fairly comprehensive, though controversial, model of banking. Partnership arrangements (muftiwaqa), according to John Presley, represent a total of 7%-10% of the total financing package of IFB.

**Al-Sharika**, a shaykhdom of the Gulf, named after its capital city, since 1971 one of the seven United Arab Emirates, third in importance and wealth after Abu Dhabi and Dubai. The capital is located 14 km/8 miles north of the latter city, on the western side of the Musandam Peninsula in the lower Persian Gulf. Commonly rendered in English as Sharjah, reflecting the dialectal pronunciation al-Sharjda, the town is mentioned as early as the 15th century. The 1985 census counted 268,723 inhabitants, 75% of whom lived in the capital. With a total surface of 2,590 km², it has the most fragmented territory of any of the seven emirates. The main body stretches inland from the capital on the coast; in addition, there is an area around Khawer Fakkân, and the immediate surroundings of the town of Kalbâ—both on the Bátina coast along the Gulf of Oman—and three further small enclaves around the Kalbá area.

The precise borders are the result of boundary-drawing exercises by British officials in the 1960s, based on surveys of local loyalties to the various rulers. The Emirate also claims the island of Abû Músâ in the Persian Gulf—jointly administered with Persia since 1971, but forcibly occupied by the latter in 1992. Effective control always fluctuated between the two empires alone and their various dependencies, but since 1974 the British have been content to recognize the site of the ancient Hasta Regia, 2 km/1.2 miles from the latter's land-based power. A revival came with the establishment of the main British airfield in the Gulf (on the route to India) in al-Sharîka in 1932. Yet the commercial growth of Dubayy, as al-Sharîka's creek began to silt up, had reversed the situation again by the 1950s. A major dispute with Dubayy was solved in 1985, but a number of others (e.g. with al-Fudjîrayra) remained outstanding in 1995.

Since independence and integration into the UAE, al-Sharîka has remained a sovereign emirate, although some powers (including, since 1976, defence) have been transferred to the federal level. The Amir rules by decree, but informal consultation plays an important role. The Emirate distinguishes itself from the others by its relatively greater achievement in education (the first modern school in any of the emirates was established here in 1953, and the Amir himself holds a doctorate from Exeter University), by a relatively outspoken press, and by the fact that alcohol was banned in 1985. Development has taken off on the basis of oil revenues, initially mainly through aid from al-Kuwayt and Abû Zabî, but since 1974 also from al-Sharîka's own small oil and gas exports. Crude oil output since 1988 has totalled some 40,000 b/d.

Some light industry has developed, and agriculture and fishing retain a diminishing part of the labour force, yet their contribution to GDP has been small by comparison to hydrocarbons, construction and services. The development boom since the 1970s has also resulted in large-scale labour immigration, as in the other emirates. The foreign population exceeds the number of nationals, although its proportion is probably somewhat lower than the 80-90% which has been estimated for the UAE as a whole since the 1980s.

**Sharish**, the Spanish Arabic place name corresponding to the modern Jerez de la Frontera, in the north of the province of Cadiz. The original Islamic core of the town appeared on the site of the ancient Hasta Regia, 2 km/1.2 miles from modern Jerez. In the middle of the 6th/12th century, the population was apparently moved to a new site, where the town became firmly fixed. The anonymous author of the *Dîkhr bîldî al-Andalus* (8th-9th/14th-15th centuries) merely states that Sharîsh "was built in Islamic times".

Documentary evidence shows that Sharîsh at an early date fell within the kingdom of Shiaţtanîna [*q.v.*], whose chief-lier it was, according to some Islamic historian (e.g. al-Râzî and Ibn Ghâlîb), but it does not seem to have played any notable role in the period of the Umayyad caliphate, and we do not even have a list of governors. In the time of the Taifâs, it came under the authority of the Banû Djîrûn, Berbers who rebelled in Kâlsînâ during the time of *fitna* and who also controlled Arcos and al-Djazîra, the latter probably corresponding to Cadiz, according as British naval control increased the importance of the latter's land-based power. A revival came with the establishment of the main British airfield in the Gulf (on the route to India) in al-Sharîka in 1932. Yet the commercial growth of Dubayy, as al-Sharîka's creek began to silt up, had reversed the situation again by the 1950s. A major dispute with Dubayy was solved in 1985, but a number of others (e.g. with al-Fudjîrayra) remained outstanding in 1995.
to M.J. Viguera. They held power from 402/1011 to 461/1069, when the 'Abbadid al-Mu'tadid [q.v.] of Seville attacked them, toppled them from power and absorbed their territory into his own Taifa. This situation seems to have lasted until the arrival of the Almoravids in al-Andalus. Later, Sharfsh was one of the towns which rose against this North African dynasty; it was there that Abu 'l-Kamar Ibn 'Azzūn, who controlled this region as well as Ronda, proclaimed his independence. With other local rebels, he was one of the original members of the "second wave" of Taifas. Ibn 'Azzūn remained in charge of the administration of this region until the establishment of the Almohads in al-Andalus, to whom he retained fidelity. It was under these last rulers that the defences of the town were strengthened and that its walls were built, described by al-Ídrlī; they contained an area of 50 ha and sheltered some 16,000 inhabitants.

Towards 1176, the lands of Sharfsh and Arcos were attacked by Ferdinand II, and reached by Ibn Hūd [see Rūndūs in the course of his expansionist plans; it was in fact at Jerez that he was defeated by the Castilians in 1320. The town gradually recedes after the Castilian conquest of Seville in 1248, and it was in vassalage to Ferdinand III. After the Mudéjar revolt of 1264, the population of Jerez, Arcos, Medina Sidonia, Vejer, etc. was subdued by Alfonso X. From this time onwards, this region formed the political frontier with the Nasrid kingdom ofGranada [see Nasrīs].

Concerning the natural resources of Sharfsh, al-Rāzī (10th/16th century) states that the region was rich in all the products of land and sea, and al-Ídrlī mentions the vines and olive and fig trees of its fertile agriculture, placing the town at two days' good journey along the road from Seville. The author of the Dhikr describes its pastures and vales, indicating that it was also good for stock-rearing. A famous son of the town was the famed commentator on the Makamat al-Hārīrī, Abu 'l-'Abbas Aḥmad b. 'Abd al-Mu'mīn al-Sharghī (d. 619/1225 [q.v.]).

Finally, one should note, to avoid possible confusion, that Sharīsh appears in the Arabic sources as a place-name corresponding to Jerez de los Caballeros, in the modern Spanish province of Badajoz.

(F. Roldán Castro)

**AL-SHARISH**

**šarīsh**

**Abū 'l-'Abbās Kāmāl al-Dīn Aḥmad b. 'Abd al-Mu'mīn al-Kāfī, grammarian, philologist and littérateur of Muslim Spain (557-619/1161-1222), born at Sharīsh [q.v.], (modern Jerez de la Frontera) in the province of Cadiz and died in his natal town.

He functioned mainly as a teacher of Arabic language, but like many of his compatriots, went to the East, probably to make the Pilgrimage to Mecca and probably search of knowledge (fit talab al-'ilm). The biographies of him cite a piece of verse which he composed when resident in Egypt in which he expresses his regrets at ever having left Syria and his admiration for the land's beauty (*Naḵf al-rīḥ, ii, 116, 392; Nūṣh al-rīḥ, ii, 19).

Al-Sharghī wrote a commentary on the *İshâb* of al-Fārisī and another on the *Lhaml* of al-Zajjādī, as well as treatises on metrics, an anthology of Arabic poetry and a résumé of the *Nawādir* of Abū 'Alī al-Karrār [q.v.]. But he is above all known as author of a commentary on the *Makamat* of al-Hārīrī [q.v.], which soon became known in Spain and, from the opening of the 6th/12th century, formed part of the programme of studies for Andalusian scholars (see al-Ru'aynī, *Barnāmij*, Damascus 1962, 32-3, 44, 51, 60, 79). Al-Sharghī produced three commentaries on the *Makamat*: a large one, literary; a middle-sized one, philological; and a small one, a résumé. The first was printed at Bullāq 1284/1887, 1308/1893, and at Cairo 1306/1889. The second exists in ms. at Leiden, no. 415. Amongst some twenty commentaries produced, al-Sharghī's is undoubtedly the most complete and the most famous; thus the *Makamat* found their most productive commentator in Spain. In his *Shārīsh*, his preface, i, 8-9, al-Sharghī states, in highly respected terms, that his work is dedicated to the Almohad rulers Abū "Abd Allâh al-Nâsîr (356-60/1158-1213) and his son and heir presumptive Abū Ya’kūb al-Mustânisr (410-20/1020-1220).

The biographer Ibn al-Abbârī, i, 136-7 no. 281, mentions having met the author in ca. 616/1219 at Valencia, at the house of his master Abu 'l-Hasan b. Hârîrī, to whom al-Sharghī then submitted his commentary on al-Hârîrī. Al-Ru'aynī likewise states that he met al-Sharghī in 615/1218, followed his courses and obtained his authorisation (*ihāza* [q.v.]) to transmit the whole of his works (see *Barnāmij*, 304-1).

In his *Šahrâb*, v, 392, Ibn al-Ímād confuses Aḥmad with Muhammad al-Sharghī (d. 685/12860) and erroneously attributes to this latter person a commentary on al-Hârīrī which is the work of the former. Al-Makkarī, *Naḵf*, ii, 131-2, in fact draws attention to this confusion.

**SHĀRIYA,** one of the renowned female singers at the 'Abbāsīd court, was born ca. 200/815 in Baṣra as a musallāda of an Arab father and a non-Arab mother. She died after 256/870, probably in Sāmarrâr.

While still a young girl, she was acquired by Ibrāhīm b. al-Mahdī [q.v.], who refined her musical education and made her a competent transmitter of his own compositions. After the death of her master in 224/ 839, she first served al-Mu'tasim and she reached the zenith of her career under the caliph and musician al-Wāthīq. Under al-Mutawakkil, an open competition broke out between Shāriya as a representative of the "romanizer" school of Ibrāhīm b. al-Mahdī, and the famous "Arīṣ" who stood for the "classical" style of Išâk al-Mawsīlī [q.v.] and his school. Their violent rivalry split the public of Sāmarrâ into two camps. Shāriya was still active under al-Mu'tazz, who wrote her biography and assembled her song texts in a book entitled *Akhbār Shāriya*. It was handed down by Kurayṣ al-Mughanni (d. 324/936) to Abu 'l-Faraj al-Islahānī, who used it in his *Kitāb al-Akhbār al-kabīr*. Al-Mu'tamid was the last caliph to admire her talents, including her skill at cooking. In her songs she showed a predilec-
tion for the “light” (khQfif) form of the metre called
ramal [q.v.].

SH Ark al-Andalus, an expression which
denotes, in the mediaeval Arabic texts and also in
contemporary historical usage, the eastern region,
adjacent to the Mediterranean, of Muslim Spain.
In both cases, the term has a geographical
and not an administrative application, and it is dif-
ficult to demonstrate a priori which regions of the penin-
sula are being referred to.

The centre of the Shark al-Andalus is the region of
Valencia (Balansiya [q.v.]), but the expression prob-
ably has a wider sense than the modern one of Levante.
The unfavourable attitude of the Valencians to this
last term, which they consider “Castilocentric” and
pejorative, seems to have favoured, in contemporary
historiography, the use of Shark al-Andalus, which
spills over into, in ancient times as now, in a some-
what vague fashion, the surrounding regions.

These last are as follows. To the west, the moun-
tain zones stretching between the region of Valencia
and Toledo. They correspond, in their western part
(modern province of Cuencia) to the kÁra or region
called that of Shntabaríydt [q.v.] (Santauver), but the
neighbouring regions of Balansiya (Teruel, Albarracín,
called Shntamaríydt al-Shark [q.v.]), and above all
Alpuente (al-Bunt) are incontestably part of the Shark.
In the north, the zone ventured on the Ebro valley is
generally called al-Thqåf al-dal al-‘umrèr march”,
but the eastern part (the region of Tortosa) is also
called al-Thqåf al-shA¢rkt, and is easily included in the Shark
al-Andalus. In the south, the modern region of Murcia
traditionally has the name of Tudmir. This last includes
a good part of the province of Alicante, with the
town of the same name, Elche and Orhiabla, as far
as the mountains of the Alcoy massif which separate
the kÁras of Tudmir and Balansiya. The journal of
the Arabists of Alicante, devoted in the first place to
the history of eastern al-Andalus, has however been
given the name Sharg al-Andalus. Finally, the Balearics (al-
Dza‘ár al-Shakiryya) are more or less part of the
Shark, considered in a large sense.

It is, rather, recent historiographical considerations—
polemics concerning the history of this region—than
historical consistency over a geographical-historical
entity, which can justify an article Shark al-Andalus
in this Encyclopaedia. For, from a historical perspective,
it is not very easy to establish the specific nature of the
Shark. In the age of the Umayyads of Cordova, the
eastern part of al-Andalus, urbanised to only a small
degree, is little mentioned in the sources, and it
would seem to be, rather, this negative and “back-
wards” character which ought to be brought out. The
break with Antiquity in regard to urban life is very
striking. The town of Valencia had very little impor-
tance between the 6th and 10th centuries. It was,
from a regional point of view, on a level with Jativa
(Shdjdla [q.v.]), which is no longer today a consider-
able centre. The Balearics were only attached consti-
tively to Cordova in the first half of the 10th century,
and Mndmat Maydkra only assumed a certain impor-
tance at the end of this period. Tortosa was a fron-
tier town which only slowly came to life. Murcia,
founded for military and administrative reasons in
216/831, only became an important centre in the
11th-13th centuries.

This impression of torpor only changes perceptibly
under the crisis of the Umayyad caliphate (399/1222
-1009-31), and very likely marks an evolution already
in train: the progressive commercial reawakening of
the western Mediterranean in the course of the 10th
century probably favoured the development of urban
centres along the coasts. Taifas of Şakilíba [q.v.], sc.
military and administrative elements of servile origin,
grew up at Tortosa, Valencia and Denia (as also fur-
ther south at Almeria, which had enjoyed a considere-
able development in the 6th/10th century) between
400-3/1010-12. It is likely that these elements in the
region were reinforced after the begining of the cri-
sis of the caliphate by the expulsion from Cordova
of further Şakilíba of high rank by the caliph
Muhammad II al-Mahdi, who had been embroiled
with them. The most active and long-lasting of these
Taifas was that of MudjÁfdh [q.v.] of Denia [see DÁnydt],
who reigned there from 403/1012-13 till his death in
436/1044-5. He seized control of the Balearics,
and tried—without success—to invade Sardinia. His son ‘Alf reigned for a further thirty
years after him. The other Şaklabi Taifas were less
durable, except for the one which took shape in the
Balearics after the end of the independent power of
Denia, absorbed by the more powerful Taifa king-
dom of Saragossa in 468/1075-6. Two successive
Şaklbí amírs retained power in the “eastern islands”
until the devastating attack on the islands by a naval
expedition of Pisans and Catalans in 507/1114.

At the end of the 11th century, the greater part
of the Shark fell under the control of the Cid [see
Al-std], who seized power at Valencia in 1087. The
Almoravid conquest of the region was put back by a
decade or so compared with the rest of al-Andalus,
and only took place after the death (in 1099) of the
Castilian chief, sc. in 495/1102. During the crisis of
the years 940-2/1145-7, which ended Almoravid power
in al-Andalus, the eastern region had, like the rest
of the country, a disturbed history, with the formation
of local, autonomous powers at Valencia and Murcia,
both by now amongst the most important economic,
political and intellectual centres of Muslim Spain.
While Almohad authority was being progressively
extended over the rest of al-Andalus, this region be-
came organised into an independent amirate under a
military chief formerly of the Almoravid forces, but
originally from the north of the region of Valencia,
Muhammad b. Sa‘d b. Mardamli [see also Mardamli].

From his capital of Murcia he exercised power over
all the Mediterranean side of al-Andalus (apart from
Tortosa, conquered by the Christians in 1148). Despite
Almohad military pressure, this independent prin-
cipality, the only Muslim power to have controlled
the whole of the Shark (except for the islands), main-
tained itself all through Ibn Mardamli’s reign (542-
67/1147-72). Strongly anti-Almohad, he recognised
in principle the ‘Abbdíd caliphate in Bagdad, and
welcomed the fitihs who had fled from the Almohads,
SHARK AL-ANDALUS — SHARKAWA

... name evidence with its clan and tribal aspects (see also Guichard, in his Al-Andalus. Estructura antropológica de una sociedad islámica en Occidente, Barcelona 1976), the segmentary aspect of Muslim society in the eastern regions of the peninsula on the eve of the Reconquest—have given rise of refutations of the same kind (Epalza, Precisiones sobre instituciones musulmanas de las Baleares, in Les illes orientals d'al-Andalus, V Jornades d'estudis locals, Palma, Majorca 1987). From the archaeological point of view, the “non-feudal” characteristics of Muslim rural fortifications in eastern Spain adduced as evidence by A. Bazzana, P. Cresser and Guichard (Châteaux ruraux d'al-Andalus. Histoire et archéologie des bastins du Sud-est de l'Espagne, Madrid 1986) have also stimulated polemics. Up to a certain point, these debates, which touch on the nature of society in Muslim Spain, may be considered as marking fresh stages and a prolongation of (whilst fairly well removing them from the centre stage) the controversies between Ámero Castro and C. Sánchez Albornoz on the impact of the Arab conquest and the “orientalisation” of the peninsula in mediaeval times.

Guichard, SHARKAWA or SHRÉKAA, the common ethnoc designat of a Marabout group in central Morocco, belonging to the Shadhili-Dazâlî brotherhood through the intermediary of the mystic Aḥf Fāris ‘Abd al-Azîz al-Tâbbâ (q.v.). The singular is Shârkî, synonym of sharâk (shargh, pl. sharâq), a geographical ethnic name (cf. on the other hand Tâdlî, ethnic from Tâdla confined to the sharâgî of this name, while the geographical ethnic is Tâdlaât). The principal sharâq of the Shârkawa is in the town
of Abu 'l-Dja'd (modern form, Boujad), in the Tadla, between the Middle Atlas and the Atlantic coast. It attained importance at the end of the 11th/17th century and henceforth became one of the most frequented sanctuaries in Morocco.

Among the more notable of this Marabout family may be mentioned: 1. the founder of the zawiya of Abu 'l-Dja'd, Muhammad b. Abi 'l-Kasim al-Sharki al-Sumayri al-Za'ib al-Djaibri, d. 1. Muharram 1010/2 July 1601; a monograph was devoted to him by one of his descendants, Abü Muhammad 'Abd al-Khalik b. Muhammad al-'Arusi al-'Adili al-Sharkawi, entitled al-Murakkab fi dhūr baḍṭ manākib al-kub saryādī M. al-Sharkī, 2. the latter's son, Muhammad al-Muṭṭā, d. Rabī' II 1092/April-May 1681; 3. his son Muhammad al-Salih, who was the patron of the historian al-Ḥāfin [q. v.] (or al-Wafāri); a monograph entitled al-Raṣāl al-yāni al-fāṭīḥ fī manākib al-sharqī Abī 'Abd Allāh Muhammad al-Salīḥ, was devoted to him by a scholar of Fās who was kādī of Meknes (Mīnakāt al-Zaytūn) in the reign of the 'Alwīd sultan Majdī Ilīsa'ī, sc. by Abū 'Alī al-Ḥasan b. Rāhjīl al-Maḍānī al-'Adilī, d. 1140/1728; 4. the son of the preceding, Muhammad al-Muṭṭā, who restored the zārūṣa and wrote a collection of prayers in no fewer than 40 volumes entitled Ḍhīḥirat al-ḥāfin wa 'l-muḥāth fi sāḥib al-līwā wa 'l-tūqī (there is one volume in the Bibliothèque Générale de Rabat, no. 100, cf. E. Lèvi-Provençal, Les manuscrits arabes de Rabat, i, 36; he died in Muharram 1180/June 1766. A monograph was devoted to him by his secretary Muhammad b. 'Abd al-Karīm al-Abūnī, d. 1189/1775-6, entitled Tattmat al-'udād al-ṣawāṣa fī manākib al-sharqī al-Muṭṭā, entitled Bibliographie: Muhammad al-Mahdi al-Fāsi, Munīt 'al-asima′, lit. Fās 1313, 21; Ṣafi, Šanfar man intašar, lit. Fās 25; Ḍāhirī, Naṣr al-maṭfū Başī, lit. Fās 1310, i, 58, ii, 277; Ḍāhirī, Sabaṭ al-ansāf, lit. Fās 1316, i, 193, R. Basset, Recherches bibliographiques sur les sources de la Salouāt al-anfās, in Recueil de mémoires et de textes publiés en l'honneur du XIVe Congrès des Orientalistes, Algiers 1903, 34, no. 91, 45, no. 128; Cimitieri, La zuwaia di Boujad, in RMM, xxiv, 277 f.; E. Lèvi-Provençal, Les livres de la maqāla des Chorfa, Paris 1922, 119, 876-8; id., L. Voinot, Confréries et zouasat al Maroc. Les établissements religieux du Maroc oriental, 3. Les ordres secondaires, in Bull. de la Société de Géographie et d'Archéologie de la province d'Ouarzazate, (1937), 30-2 (the list of ṣayghik since the founder given by this author differs from that of Lèvi-Provençal in regard to dates); M. Asin Palačios, Šajīb y al-muḥārīb, in Andal., x (1945), 1-32, 255-84. (E. Lèvi-Provençal)
The third line of each stanza of the *shark!* is called *miydn* or *miydn-khdne* ("the middle" and "mid-house" respectively) and is generally the most effective line of the stanza. If repeated as a refrain, the ultimate line or the last ultimate and penultimate lines of each stanza are called *nakrti* "re refrain," literally "peckings." (Both of these terms are also used for the description of *sharkis* set to music.)

The *sharkis* are generally rather short, comprising 3-5 stanzas (whereas the other types of *musammat* are often longer). The poet states his *makktilas* (pen-name) in the last stanza (as is the case with the other types of *musammat*), though there are exceptions to this rule.

No restrictions with regard to the metres of *'arid* used in composing *sharkis* are known; the preferred metres are *neml* and *hawd*.

The *shark!* is generally about the various aspects of love (and to a lesser degree, about the pleasures of life); the tone is light. The *murabba* shows much more variety with respect to subject matter. The language of the *sharki* is not too intricate, which makes it convenient to be sung. It is simpler than that of the *ghazel*, and generally, but not always, even simpler than that of the *marabba*, yet still elevated and free from dialectal forms. Here, too, it differs from the folklore which is quite free from restrictions as regards subject matter, imagery, and phraseology.

These characteristics oblige us to consider the *shark!* not as a truly independent structure of versification but as a genre of lyric that is undeniably closely related to the *sharkh* and *sharki* as well as between al-"Haytam b. 'Adi, Frankfurt a.M. 1991, index; R. Sellheim, Die klassisch-arabischen Sprichwortersammlungen, The Hague 1985, 115-26; H.E. Cengiz, Divan *Nuzhat al-albâd*, v, 302-3, where one of al-Sharkf's stories is referred to as a "muhaddith" and "multi-khad." The third line of each stanza is called *miydn* or *miydn-khdne* ("the middle" and "mid-house" respectively) and is generally the most effective line of the stanza. If repeated as a refrain, the ultimate line or the last ultimate and penultimate lines of each stanza are called *nakrti* "re refrain," literally "peckings." (Both of these terms are also used for the description of *sharkis* set to music.)

The *sharkis* are generally rather short, comprising 3-5 stanzas (whereas the other types of *musammat* are often longer). The poet states his *makktilas* (pen-name) in the last stanza (as is the case with the other types of *musammat*), though there are exceptions to this rule.

The founder of the Sharki kingdom, Malik Sarwar [q.v.], was a eunuch in the service of Firuz Shah Tughluk [q.v.]. He was custodian of the royal jewel-ellery and *shahna-yi shahr* (City Superintendent). Sultan Muhammad Shah entrusted the eastern districts to him and conferred the title of Malik al-Šark (Lord of the East) on him. Disturbed conditions helped him in extending his territory. He brought all the rich districts of Uttar Pradesh under his control, and his authority stretched to Tirhut in north Bihar and touched the boundary of Nepal. In the west, Kanwajl was oppressing the Muslims (Maktubdt-i Nur Kutbi-i Alam, ms. author's personal collection). Ibrahim set out in the service of Firuz Shah Tughluk and Bengal were under him. Rulers of Dujangar and Bengal were his feudatories. Malik Sarwar died suddenly in Rabl' I 801/November 1399 after a brief reign of five years and six months, but he had firmly planted his dynasty. His administrative talent and political realism were extraordinary. His patronage of scholars made Dujangpur a veritable centre of culture and learning.

Malik Mubarak Shah Karanfal, who succeeded Malik Sarwar, was his adopted son. According to Yahya Sirhindi, he was a nephew of Khidr Khan, the founder of the Sayyid dynasty [q.v.], but some scholars have attributed negroid origin to him. Soon after his accession, he had to face an invasion of Mallu Ikbal [q.v.], but he successfully pushed him back. Sometimes later both Sultan Mahmud Shah Tughluk and Mallu Ikbal marched against Dujangpur. Mubarak set out to face the invaders but died suddenly on the way.

Mubarak's younger brother, Ibrahim, who succeeded him, had also to face a joint attack of Mallu Ikbal and Sultan Mahmud Shah. Mahmud occupied the city of Kannawdij [q.v.]. Ibrahim's efforts to retrieve the fort having failed, he made peace with Mahmud. The Hindu ruler of Tirhut was a tributary of the Shanks. In 1402 Malik Arslan attacked and killed its Raja, Ganisvara. Ibrahim installed his son Kirti Singh on the throne. Later, when Kirti's son Shiv Singh turned hostile, Ibrahim annexed Tirhut. In Dujmâl I 809/October 1406, Ibrahim marched against Kannawdij and conquered it, which immediately enhanced his prestige. Next year, in Dujmâl I 810/October 1407, Ibrahim marched against Kannawdij and conquered it, which immensely enhanced his prestige. Next year, in Dujmâl I 810/October 1407, Ibrahim marched against Dujhî, but when he reached the banks of the Dujmâl he heard that Sultan Muqaffar of Gujrat was moving towards Dujangpur. He hastily turned back. In Muhammam 817/April 1414, he attacked Kalpi [q.v.]. After a feigned retreat he reappeared and captured Mahoba and Ruth. Ibrahim was then conquered. Ibrahim next attacked the fort of Shaykhpur with naphtha-hurling engines and catapults. The garrison became nervous and appealed for mercy. Kadir Khan was allowed to rule over Kalpi on accepting the suzerainty of Dujangpur, but he later gave up this allegiance and conquered Iraqid.

In 817/1414 Ibrahim was invited by Shaykh Nûr Kûbi-i Alam, a distinguished Cîğiş saint of Bengal [see Cîğişyva] to march against Râdja Ganes [q.v.] of Dinâdpur, who had established himself in Bengal and was oppressing the Muslims (Maktubdt-i Nûr Kûbi-i Alam, ms. author's personal collection). Ibrahim set out with a strong army. Ganes approached Shaikh Nûr Kûbi-i Alam with the request to intercede. The saint agreed to his request, provided that his younger son accepted Islam and that Ganes promised not to harass the Muslims. Ganes's son Djuda later ascended the throne as Djâli al-Dîn.

In 840/1437 Ibrahim marched against the Sayyid Muhammad Shah of Dujhî. The latter sued for peace and arranged a matrimonial alliance, giving his daughter, Bibi Râdji, in marriage to Ibrahim's son Mahmud. Ibrahim marched against Dujhî and captured it, which immensely increased his power. But when Bahlul himself assumed royal authority, Mahmud Shah's power prevailed upon her husband to attack Dujhî and dislodge Bahlul. In 856/1452 he accordingly marched against Dujhî. But after a fierce battle at Narela, some 17 miles from Dujhî, Mahmud had to retreat. In 858/1454, however, he did capture Dawa, the capital of Udgâjn. In 859/1455 a non-intervention treaty was reached between the Lodî and the Shanks. But hardly a year had passed before hostilities started again. Mahmud Shah's sudden death in 862/1458 was a serious setback to Shanks power. Bibi Râdji raised his eldest son to the throne under the title of Sultan Muhammad. Muhammad endeavoured to patch up differences with Dujhî, but without any lasting effect, and he fell fighting at Dalmau. His successor Sultan Husayn entered into a four-year truce with Bahlul. He strengthened his hold over Tirhut, Orissa and Gwâliyâr, and in 872/1468 planned an attack on Dujhî. The battle fought at Candwa being indecisive, Husayn Shah sought the support of Bajna and Mewât. In 873/1469 he again marched against Dujhî, but was forced to take to flight, leaving behind even his *harem*. In 874/1470 for the third time he led an army against Dujhî consisting of one lakh of horsemen and a thousand elephants. Through the mediation of Khan-i Djahan Lodî [q.v.], peace was arranged and Husayn Shah returned to Etihâd, avenging his pledged words and he led his armies against Dujhî several more times. In the fifth campaign he was initially successful, but Bahlul's army made a surprise attack which turned his victory into complete rout. Driven to extremes, Husayn turned round and gave battle to Bahlul at Râdjohor, sixteen miles from Farrukhabâd. Ultimately, peace was concluded and both sides agreed to keep to their old boundaries. But in 885/1480 he marched against Dujhî.
a sixth time. In 888/1483-84 Bahlul captured Djawn-
pur, but out of generosity to a fallen enemy, allowed
Husayn to retain a small tract in Cumer which had
once constituted his family diqär [q.v.]. In 897/1492.
Husayn fought against Sikandar Lodí, at Kakhgarh,
but was defeated and had to flee to Buhara. In 909/1502
the forces of Sikandar and Husayn fought a fierce
battle at Benares, in which Husayn was completely
defeated. He fled to Cologong, a dependency of Lakh-
nawit [q.v.] in Bengal. The ruler of Lakhnawit received
him cordially and assigned the pargana of Cologong
to him and permitted him to issue his own currency.
Sikandar Lodí stayed in Djawnpur for six months and
destroyed all the Şarkí policy. When Sikandar Lodí!
was defeated. He fled to Colgong, a dependency of Lakh-
nawit [q.v.] in Bengal. The ruler of Lakhnawit received
him cordially and assigned the pargana of Cologong
to him and permitted him to issue his own currency.
Sikandar Lodí stayed in Djawnpur for six months and
destroyed all the Şarkí buildings. Sultan Husayn
died in 911/1505, and with him the last vestiges of the
Şarkí dynasty disappeared. Though he did not suc-
cceed in achieving his objectives, his tenacity of pur-
pose and mobilisation of resources were remarkable.
He never took any defeat as final but carried on his
struggle against the Lodi till the last moment. Popular
support and regional loyalties helped him in his pro-
longed struggle. He was also a cultured prince,
interested in the fine arts, poetry and music.
Under the Şarkís, Djawnpur became a renowned
centre of culture and a rendezvous of scholars. Timür's
invasion drove many ‘ulamá and distinguished scholars
of Djawnpur were included Shihab ad-din Mushtak!,
and Ansina (Antinoe), but the small number (17) of villages in the
kura of al-Sharkiyya allows us to suppose that the next

The most outstanding mosque was the Atala mosque
of al-Sharkiyya which replaced the

AL-SHARKIYYA, a traditional name for the eastern
area of the Sultanate of Oman [see 'áma], now the official Eastern Region of the Sultanate, which
lies in the inland area of the Western Hajjar, north-
west of Dja‘án and north of the Wahiba Sands [see
Wilkinson, Water, 14, Fig. 5]. The main towns of the
region are Ibrá, the largest, and Samad, al-Mu‘ádybí,
Sináw and al-Kábl. The whole area is a sandy plain
interspersed with wadis.

Today, the official, extended region of al-Şarkiyya
is made up of thirteen provinces (silâhîs), including
Ibrá, Bídijílá, al-Kábl and al-Mu‘ádybí and also
Dja‘án Baní Bú Hasan, Dja‘án Baní Bú 'Afí and the
port and centre of ship-building, Súr, plus even the
island of al-Maftúra [q.v.].

Ibrá is reckoned to have 23 villages and a popu-
lation of 30,000. It contains the regional government
offices and has a thriving commercial life. Al-Kábl
has 16 villages and a total population of about 30,000.
It is famed for its religious learning and horseman-
ship. Apart from its ship-building, Súr, with its approxi-
mately 70,000 inhabitants, is famed for its woodcarving
and the manufacture of doors, as well as daggers,
jewellery and woven fabrics. The whole region, as in
all areas of northern 'Umán, is scattered with large
and impressive strongholds and fortresses.

kura, Dallās (Nilopolis) or at least al-Kays (Kynopolis) lay on both sides of the Nile. The capital of the kura was very probably Aṭṭīf, since one of the censuses quoted by al-Makrīzī gives it in addition the name of Aḥmed or Aḥles (1690, 15, 277, 278). In the Fāṭimid division into provinces, there was a province of al-‘Aṭṭīfiyya, larger than the old kura (50 villages at the time of Ibn al-Qīṭān).

In the time of the governors of the caliph, the kura of al-Sharkiyya enjoyed at times a certain prosperity. On account of an epidemic of plague, 'Abd al-Azīz b. Marwān transferred the government offices to Hulwān; a little later and for the same reason another governor transferred them to Aṣṣūr (or Sukur) towards the south. To the north of the kura lie the quarries of Turā.

**Bibliography:** See the art. ʿAṭṭīf; Kindī, ed. Guest, index, 643; J. Maspéro and G. Wiet, *Matériaux pour servir à la géogr. de l’Égypte*, in MIFAO, xxxvi, 22, 112, 173, 175, 177, 180-2, 184, 185; Makrīzī, *Khitat*, ed. MIFAO, iv, 18, v, ch. xi, § 2.

2. The Eastern province of the Delta of Egypt, situated to the east of the province of al-Dakhlīyya and bordered towards its south-west point by that of Kalyūbiyya.

The present area of the muḥāfaẓa of al-Sharkiyya corresponds roughly to the following pagarchies of the Byzantine epoch, divisions retained by the Arabs under the name of kura; Bubaste (Baṣṭa), Arabia (Ṭarābīya) and Pharbaithos (Farbayt). The Delta was at this time divided into three large divisions, not administrative in character, which are mentioned by the historians: the Hawf al-Šahrī situated to the west of the Rosetta arm, whilst the Baṣṭ al-Rif applied to the territory lying between this arm and that of Damietta. All the land which extended to the east of the latter district was called the Hawf al-Šarkī and it is probably this name which gave rise to that of al-Sharkiyya. The Hawf al-Šarkī included 11 or 12 kūras and 529 villages.

At the time of the division into provinces under the Fāṭimids the Hawf al-Šarkī included those of al-Sharkiyya, of al-Muṭrābiyya, of al-Dakhlīyya and of al-Abwānīyya. Thus delimited, the province of al-Sharkiyya, which extended farther than at the present time in the direction of Cairo, still included 452 towns and villages (the three other provinces together accounted for 165). It brought annually to the treasury 694,121 dinārs. The southern part of al-Sharkiyya was separated from it in 715/1315 at the time of the division into provinces under the Mamluks. The capital was Bilbays in the Middle Ages, and it was also in this town that the Turkish chief, the settlement of Bedouins is reflected up to this day by the local dialects (cf. *Tübinger Atlas des Vor- deren Orientis*, TAVO, maps A, viii, 12, B, viii, 13, and B, viii, 13). The modern province (muḥāfaẓa) of al-Sharkiyya included 11 or 12 kūras and 529 villages. It was separated from it in 715/1315 at the time of the Mamluk period. The number of inhabitants was in 1879, 749,130; in 1960, 1,820,000; and in 1966, 2,125,000.

**AL-SHARRAT** (“the manufacturer of string from palm-fibre”). 'Abd ‘Abd Allāh Mūhammad b. Muḥammad b. ‘Aṭṭīf, son of a maḏūḥād, slain in battle which the Spaniards at al-Mahdīyya (al-Mahdīyya = San Miguel de Ultramar) was born at Fāṣ in 1035/1625-6 and died there in 1109/1697 after having adopted Sūfism. He is credited with the authorship of a hagiographical collection, but this has sometimes been disputed by his compatriots; this is *al-Raṣād al-ṭārīk al-anṭāf bi-ḥabār al-sāliḥīn min aḥl Fāṣ*. According to al-Kaṭṭānī, it was really the work of Mūhammad al-‘Arabī al-Kaṭṭārī. In it among the biographies is a synopsis of the monākhū of 99 saints of Fāṣ dating for the most part from the 10th-11th/16th-17th centuries. They are all included again in the *Salwāt al-anṭāf*. There is a manuscript of this work dated 1203/1788 in the Bibliothèque Générale de Rabat, no. 38.

**SHARCHA** or *Schorche*, in conventional French form *Scherche*, a town of Algeria, the chef-lieu of an arrondissement in the department of al-Asnām (formerly Orléansville). It is situated on the edge of the Miliana massif, 95 km/60 miles to the west of Algiers, in long. 2° 29’ E., lat. 36° 37’ N. The estimated population in 1994 was 22,000 (in 1930, ca. 5,500, including 1,500 Europeans). The town is built on a plateau a kilometre broad lying between the sea on the north and wooded hills, the outer buttresses of the massif of the Banū Manāsir, in the south. The calcareous rocks of the plateau provide excellent building materials, the fertility of the soil and humidity of the climate are conducive to the growth of all kinds of produce. The surrounding country is covered with gardens and vineyards. The harbour, sheltered from the west winds by a little island and from the east winds by Cape Tizirine is small but safe.

**History.** The advantages of the site of Sharchal were remarked up to very early times. The Phoenicians had a trading station here called Iol, which later passed to the Carthaginians. After the Second Punic War, Iol became the capital of the kings of Mauretania. Placed on the throne of Mauretania in 25 B.C. by Augustus, King Juba II gave the town the name of Caesarea and adorned it with monuments and works of art. When, after the death of Polemy, successor of Juba, Mauretania had been annexed to the empire the town was raised to the rank of a Roman colony (Colonia Claudia Caesarea) and was the capital
of the province of Mauretania. It was considerably extended and in the second century A.D. had perhaps 40,000 inhabitants (Leveau and Pellet, 1984). Its walls were about 5 miles round. Having previously lost its importance by the partition of the two Mauretanias in the time of Diocletian, it was burned during the rebellion of Firmus (371) and at the beginning of the next century was sacked by the Vandals.

The Byzantines reoccupied it in 585 but never restored to it its past prosperity; at a date which is not accurately known, but probably in the early years of the 8th century A.D., Caesarea fell into the hands of the Arabs. The harbour still existed in the time of Ibn Hawkal (Description de l'Afrique, tr. de Slane, in Jd [1842], 184). In the time of al-Bakrī (Mamlik, tr. de Slane, Algiers 1913, 165) it was in ruins. According to this author there was nothing left at Sharshal but an "anchorage commanded by an enormous town of ancient buildings and still inhabited". Al-Bakrī, however, mentions the existence of several nbītās where a large crowd of people assembled every year. Al-Idnfsī describes Shursal as a town of small extent but well populated (loc. cit.: 108). The surrounding country was occupied by Bedouin families who devoted themselves to cattle-rearing, to growing vines and figs, and they harvested more wheat and barley than they could consume. These circumstances explain the raid made on the town by the Normans of Sicily in 1144. According to Leo Africanus, Description de l'Afrique, Bk. iv, ed. Schefer, iii, 52, the town was continuously inhabited during the five centuries that followed the Arab conquest. During this period, Shursal was held in turn by the various dynasties which disputed the possession of central Maghrib. After the disruption of the Almohad empire, it fell to the 'Abd al-Wādīs of Tlemcen, taken from them by the Marīnids in 700/1300, became a part of the ephemeral kingdom founded about 750/1350 by the Awlād Mandīf and ultimately recognised the authority of the Zayyānids in the reign of 'Abd Thābit. In the 9th/10th century, fugitive Moors from Sīrīn settled here in large numbers and built 2,000 houses (according to Leo Africanus, loc. cit.). The newcomers devoted themselves to agriculture and industry, especially to silk growing, and commerce, but also to piracy. In the first years of the 10th/11th century a Turkish corsair named Kara Hasan settled at Sharshal but was put to death by Arūdji [q.v.], who made himself master of the town and placed a garrison in it. Temporarily liberated from the authority of the Turks as a result of the defeat of Khayr al-Dīn [q.v.] by the Kabyles, the people of Sharshal had again to recognise the Turkish government and this time, definitively, in 934/1528. An attempt made by the Spanish to seize the town and make it a base of operations against Algiers failed in 1531.

During the Turkish period, Sharshal simply stagnated. The population never exceeded 2,500-3,000 inhabitants, occupying a limited part of the old town. The depredations wrought by the corsairs who sailed out from it led to its bombardment by Duquesnes in 1682. Turkish authority was represented by a kā'īd, aided in the administration of local affairs by a council of six notables and supported by a garrison established some distance south on the Wādī al-Ḥāṣim. The mainstay of Turkish power, however, was the Marabout family of the Ghubrīnī, whose ancestors had come from Morocco at the end of the 10th/16th century and who had acquired considerable influence throughout this region. At the beginning of the 19th century, the Turks quarrelled with them. Al-Ḥādijī b. 'Awda al-Ghubrīnī was put to death by order of the Dey, and his relatives had to take refuge in al-Dahra.

The disappearance of Turkish government in 1830 enabled the Ghubrīnī to return to Sharshal and become masters of the province. But they found their influence assailed by that of another Marabout family, that of the Brākīnī who lived among the Banā Manāṣīr. Finally, 'Abd al-Kādīr who had established a khātba at Mīyāna, forced the people of Sharshal to submit to him. He tried to use the harbour for an attempt to revive piracy. An attack by a Sharshal corsair on a French warship decided the Governor-General Valée to occupy the town in 1840 and to establish there a colony of a hundred European families. The new settlement prospered rapidly, and by 1850 had over a thousand inhabitants. They began the development of the countryside around and this has been steadily continued.

Sharshal has lived through difficult times, but not without handing on to posterity authentic traditions and typically urban values. The eclipses of its prosperity have always been aggravated by the distance and the eccentric positions of the successive capitals of the central Maghrib, from Tāharīt to Tlemcen, putting up with the ephemeral 'Ashir [q.v.] or the inaccessible Kal'a Bani Hammād [q.v.], and even Bidjāya or Bougie. The present capital, Algiers, has not favoured upheavals.

The long-lastingness of the town's traditions, and also the stability of its population, are well-underlined by the role of the Ghubrīnī and Brākīnī, out of whom have arisen the present-day élite, such as the two Bērbarlī physician brothers, one of whom was in the service of the Bey of Tunis at the end of the 19th century (Sari, 1988, 225). From 1943 to 1945, Sharshal was the seat of the École Spécialle Militaire Française of St. Cyr.

The present wave of urbanisation has given rise to an unprecedented population increase, reaching 22,000 in 1993 as against 2,287 in 1954.

SHART (pl. shārīt, shārī', literally, "condition").

1. In Islamic law. Here, it has the sense of "condition, term, stipulation". The term has two major connotations. Generally, it denotes that which does not partake in the quiddity of a thing but upon which the existence of that thing hinges. Ritual cleansing (tahara), for instance, is not a constitutive part of prayer (salāt) but it is a condition for its validity. In legal theory (usul al-fikr), qātī signifies a condition in verifying the ratio legis, the 'illa. Shart requires the ruling (ḥukm) to be non-existent when this condition does not obtain, and it does not necessitate the presence of the ruling when this condition is present; for if there is a relationship of entailment between the condition and the ruling, then the condition is deemed to be its ratio legis, which it is not. Since ritual cleansing is a prerequisite (= condition) for the validity of prayer, prayer would be invalid when cleans-
ing does not obtain. Conversely, ritual cleansing may be valid when prayer may not.

The same distinction between the constitutive elements of a thing and that upon which the thing and its validity depend is likewise maintained in the area of substantive law (shart). Here, shart denotes the general prerequisites for the validity of a legal act, as opposed to its essential elements (arkân, sing. ruhû). Witnessing, for instance, is a condition for concluding matrimonial contracts, but it is not a constitutive part of it, as is offer and acceptance (kifâa and kabûl).

In contracts, the term has another specialised meaning, namely, term, condition or reservation. The insertion of these in agreements may be necessary for the agreement to be valid, as we have seen. If they contradict the established law, they render the agreement void. A contractual term that nullifies an agreement is any term that runs counter to the otherwise established conditions of the agreement and that intends to benefit one of the parties to the agreement to the exception of the other(s). A well-known option in contracts is khâydr al-shart, which is the agreement of the contracting parties to bestow on one or both of them the right to rescind the contract within a certain period of time. The majority opinion allows for three days, whereas the minority one allows four.

In its plural form, the term is normatively used to denote legal formularies. Shurût thus refers to a wide variety of prescribed model documents used in legal transactions including sales, securities, agency, partnership, loans, bankruptcy, preemption, rent, agricultural leases, waqf, bequests, inheritance, custody, oaths, aquittances, interdiction, dowry, marriage, divorce, religious conveyance to the haram and penal injuries. A specialised genre eventually developed for the purpose of providing jurists with legally-watertight formularies. The authors and compilers of these formularies became known as the shurûtíyyûn (mainly in the Hanafi and Shâfi‘î schools), al-muwâdžû’ilûn (in the Mâlikî school), and kutûb. The Hanafi scholars seem to have played a special role in the creation of shurût literature in the early period. Later on, the Shâfi‘î and Mâlikî courts seem to have been content with the former being less significant. The Hanbali legists, on the other hand, do not appear to have devoted much energy to this literature.

Although the Kur’an and the Sunna enjoin the writing down of transactions, the Muslim jurists generally did not consider written documents to be necessary for the validity of a transaction. In fact, the written instrument needs only to be duly attested by witnesses in order for it to be valid. Conversely, without a written document, an oral contract attested by witnesses is deemed both sufficient and valid. Nonetheless, in practical terms, the writing down of transactions was highly recommended, for it constituted a safeguard against distortion, misrepresentation and forgetfulness, all of which were causes for litigation.

In the light of the controversy about the correspondence, or lack of it, between doctrine and practice in Islamic law, modern scholarship draws a distinction between model formularies and those which were used in practice. The former appear in the shurût manuals, compiled in a more or less formal fashion by the jurists, often with commentaries and annotation. The latter are found in archives and documentary collections. While these contain details of social and economic significance, including specific information about the objects being sold, rented, bequeathed or otherwise, as well as about the individuals who were parties to them, model documents appear as abstracted formulas, dissociated from any specific context and having little more than strictly legal significance. Their seemingly idealistic nature may lead one to think that a gap separated them from the realities of judicial practice. However, ample evidence suggests that the relationship between model documents and documents used in judicial practice was dialectical, the former were ultimately drawn from the latter, no doubt with some alterations and improvements, including the omission of real names and objects involved in the transaction. The purpose behind the changes made in the actual documents was not only to make them legally watertight but also to provide the notary and the public with ready-made formularies to serve in legal transactions. Thus documents in judicial practice were appropriated from model documents, and these in turn were drawn from the world of practice.

and šhart propositions, and also identified two basic kinds of conditional proposition as "conjunctive" (mutaṣṭaṣl) and "disjunctive" (muṣṭaṣil). It is clear that the conditional syllogism was of considerable interest to medieval Muslim logicians in the Islamic West as well; as R. Arnaldez reminds us (El art. Manṭik; Soheil M. Afra, A philosophical lexicon in Persian and Arabic, Beirut 1969 (esp. s.v. g̣aḍż; Farabī, Rashāl al-Kāf; J. Lameer, Al-Farābī and Aristotelian syllogistics: Greek theory and Islamic practice, Leiden 1994; N. Rescher, The development of Arabic logic, Pittsburgh 1964; idem, Al-Farābī's short commentary on Aristotle's "Prior Analytics," Pittsburgh 1963; idem, Studies in the history of Arabic logic, Pittsburgh 1963; F.W. Zimmermann, Al-Farābī's commentary and short treatise on Aristotle's De Interpretatione, London 1981).

In Arabic grammar. Here, šhart denotes the protasis of a conditional sentence. The apodosis is variously referred to as g̣aḍżab "response", g̣aḍẓ or muddāżāt "requital". Both g̣aḍāẓ and muddāżāt may denote the conditional structure as such, for which the merismus šhart wa-g̣aḍāẓab is also commonly used, while g̣aḍāẓab is applied to several other kinds of clause, though never to the whole conditional sentence.

The rules state that the protasis of real (possible) conditions is introduced by the particle in, with law reserved for unreal (impossible) be-conditions and idāf̣ only being conditional to the extent that it indicates the time of occurrence of the apodosis (cf. Sibawayhi, Kitāb, Būlāk, ii, 311/Derenbourg, ii, 338: idāf̣ denotes "future time with a conditional sense"). Hence sa-azīrūka idāf̣ ḥamarr al-basrū "I shall visit you when the grapes redden" is correct but not in ḥamarr l-basrū "if the grapes redden". On the other hand in fa-lāsū al-dīmāsa "if the sun rises" is permitted because the dīmāsa is not a conditional sense. The dīmāsa is usually made known by cloud. In practice, the three particles are often confused, and likewise the accompanying verb forms, which ought to be the same in each clause, either both perfect, mādī + mādī or both imperfect, muddār + muddār (apocopated muddāẓān with in and independent marfūt with law). The canonical patterns and their many variations are reviewed by Peled, Conditional structures, where the contrast with the simplified prescriptions of pedagogical grammars becomes dramatically visible.

Other elements unanimously accepted as having conditional force are the nouns mā, maddānūm "whatever", maan, ayyūn-mā "whoever", and the particles aynāmā "wherever", matā mā "whenever" (always spelt as two words), idāf̣mā "whenever", immā (in in mā) and kāỵlumā "however". The conditional functions of kāysal-mā "however" and kullamā "every time" are disputed. On the other hand amnā, whose second clause is always introduced by fe-, is often interpreted as a true conditional particle, hence paraphrased by Sibawayhi (Kāỵl, i, 418-469) as maddānūm min mā "if Z. comes to you [then] treat him generously", with an obligatory fe- before the apodosis.

The structural relationship between conditionals and interrogatives was recognised (cf. g̣aḍāẓab for apodosis), which led to a disagreement about the conditional status of kāysa.

Whether law intrinsically denotes impossibility (mi'īn) is much debated in later grammar, though Sibawayhi defines law simply as "indicating something which would have happened when [or because] something else happened" (harf li-ma kāna sa-yakū l-liwā'īn g̣hāṛfīn, Kitāb, iii, 306/i, 334). The theological implication of being impossible even to God was not overlooked, cf. I. Goldziher, in ÆDMG, iīv (1903), 401, apud Reckendorf, Arabische Syntax, 494 n. 1.

Inversion of protasis and apodosis is generally dis-allowed. Such constructions as anā zālimān in fašalū "I would be wrong if I did this" are explained as ellip-tical, viz. in fašalū anā zālimān in fašalū "[if I did this] I would be wrong if I did this". Serial conditions have legal implications, e.g. in ašālī in šhartī anī tābītī "if you eat, if you drink are divorced" only effects a divorce if the woman first drinks and then eats, though a converse interpretation is also maintained.

In conclusion it should be noted that the situation in contemporary written Arabic is rather fluid; both law and idāf̣ appear to be encroaching on the functions of in, which is becoming correspondingly less frequent in occurrence.

SHĀRT [see TASHKENT].

SHASHMAKOM ("six modes", the Tadzhik form of a compound of the standard Persian numeral šāh and the Arabic term mašām [q.v.], a term designat-ing the modal and formal concept of art music played in the urban centres of Uzbekistan. It developed in Bukhārā from elements of the local mašām tradition and the nauba [q.v.] "suite" of Timūrid and Shāybanid court music. The earliest known text collections are said to date back to the middle of the 18th century. Up to the beginning of the 20th century, the shashmakom flourished in the Emirate of Bukhārā and the Khanate of Khiva. It consequently had to suffer from Socialist cultural policy. Modern
tendencies develop since the middle of the 20th cen-
tury. Local differences exist between the ("Uzbek-
Tadzhik") Bukhārā and the ("Uzbek") Kh'ārazm
versions. The terminology of modes, metres and gen-
res as well as the bulk of the song texts are Perso-
Tadzhik; Uzbek song texts are a rather recent novelty.

The six makom cycles are called bāzruk, rṣot, nako,
duqā, sēqāh, irīk. They bear the names of four of
the former twelve main modes (rāst, tīrāt, bāzruk,
nako), and of two former "derived" (gh'a ba) modes
(dogāh, sēqāh). In contrast to the earlier "na'ava of the
masters" that consisted of four or five vocal pieces
composed by individual musicians, the actual makom
is characterized by separate cycles of basically five
in instrumental parts and a varying number of vocal
pieces that are transmitted anonymously as a part of
a canonical repertoire. The performance of a com-
plete makom lasts about two hours.

A large part of the Kh'ārazmian version was writ-
ten down at the end of the 19th century in tabula-
tures developed for the tä'āfūr [g.v.] and the dākhūl. For
editions of both versions in staff notation, see A. Jung,
Quellen, vol. 41, 42.

(Ε. Νευραυέρ)

SHÂTÂ, a place in Egypt celebrated in the Middle
Ages, situated a few miles from Damietta, on the
Western shore of the Lake of Tinnâs, now
called Lake Manzala.

This town existed before the Arab period, since it
is mentioned as the see of a bishop (Zuta). There is
no reason for giving credence to the romantic story
of the pseudo-wālī, who gives as the founder of
this town a certain Shata b. al-Hamîn (var. al-
Hâmîrak), a relative of the famous Mukawkîs
[g.v.]. This Shâtâ is presented to us as a deserter from
the garrison of Damietta who helped to secure the pos-
session of Burullus, Damîra and Asghûn Tânâb
for the Muslim army and who was killed at the capture
of Tinnâs, on 15 Şahrâbân 21/19 July 642. Every year at
this date, it is the custom to celebrate the anniver-
sary of his death, and to this origin the writers attribute
the pilgrimage which still took place at Shatâ in the
time of Ibn Baṭṭaṣa.

To guard against the maritime attacks of the Greeks,
the Arabs stationed regiments of troops on certain
parts on the coast, and Shatâ was amongst the num-
ber. This port became in the Middle Ages a very
important, as well as the site of the port of Shata,
the place where flour is sifted by shaking. In
the first available discussion of the term, Abû Naṣr
al-Sarrâj (d. 378/988) defines šath as "a strange-
seeming expression describing an ecstasy that
flows because of its power" (Kādh al-Lumâ', ed. R.A.
Nicholson, London 1914, 375). There is no evidence to support the suggestion of
Massignon that early ecstatic sayings circulated in the
guise of divine sayings reported by the Prophet Mu-
hammad, or hadîth kudî [g.v.], the latter have as good
qualities as the former. Therefore, in the same sense as the
expression of the profoundest experience of
the (divine) truth" (anâh-ə-hâkim); for a general survey,
see C. Ernst, Words of ecstasy in Sufism, Albany 1985.

Among Sîfu authors, the chief responses to šathyyât
(sometimes held simultaneously by the same individ-
ual) were (1) to explain them away, either as mis-
quotations, or as the results of immaturity, madness,
or intoxication (subh); (2) to regard them as authentic
expressions of spiritual states, which should nonethe-
less be concealed from the unworthy; and (3) to view
them as expressions of the profoundest experience of
divine realities. Many Sîfî authors briefly address the
question of şâth, showing a strong ambivalence about
apparently blasphemous claims to divinity, mixed with
admiration for the spiritual status of their authors,
whose words are often quoted anonymously; al-Qâṣîfî
notably belongs to this category. Among those who
took these sayings seriously was Dînâyâd [g.v.], who

It was the caliph Hârûn al-Râshîd who ordered it to
be made in the year 191/807 at the tirdz of Shatâ.

We do not know the part which Shatâ played in the
two occupations of Damietta by the Franks. Certain
writers have tried to place at the spot the site of the
capture of Damietta, and as military reasons
had probably induced this destruction, Shatâ perhaps
suffered the same fate.

While the ruins of the former have survived un-
der the name of Tell Tinnâs, a small town now
bear the name of Shâykh Shâtâ. In its centre there
is the mosque in which the relics of the hero of
the Arab conquest, who became the Shâykh Shâtâ, are
venerated.

(G. Wiet-[H. Halm])

SHÂTÔH or šathiyya (A., pl. šatâhât or šathiyât, a technical term in Sufism meaning "ecsta-
tic expression", commonly used for mystical say-
ings that are frequently outrageous in character.

The root sh-t-h has the literal meaning of
movement, shaking, or agitation, and carries the sense of
overflowing or outpouring caused by agitation; thus
šāthât is a place where flour is sifted by shaking. In
the first available discussion of the term, Abû Naṣr
al-Sarrâj (d. 378/988) defines šath as "a strange-
seeming expression describing an ecstasy that
flows because of its power" (Kādh al-Lumâ', ed. R.A.
Nicholson, London 1914, 375). There is no evidence to support the suggestion of
Massignon that early ecstatic sayings circulated in the
guise of divine sayings reported by the Prophet Mu-
hammad, or hadîth kudî [g.v.], the latter have as good
qualities as the former. Therefore, in the same sense as the
expression of the profoundest experience of
the (divine) truth" (anâh-ə-hâkim); for a general survey,
see C. Ernst, Words of ecstasy in Sufism, Albany 1985.

Among Sîfu authors, the chief responses to šathyyât
(sometimes held simultaneously by the same individ-
ual) were (1) to explain them away, either as mis-
quotations, or as the results of immaturity, madness,
or intoxication (subh); (2) to regard them as authentic
expressions of spiritual states, which should nonethe-
less be concealed from the unworthy; and (3) to view
them as expressions of the profoundest experience of
divine realities. Many Sîfî authors briefly address the
question of şâth, showing a strong ambivalence about
apparently blasphemous claims to divinity, mixed with
admiration for the spiritual status of their authors,
whose words are often quoted anonymously; al-Qâṣîfî
notably belongs to this category. Among those who
took these sayings seriously was Dînâyâd [g.v.], who
composed a commentary (tasfīr) on the sayings of Abū Yazīd, partially transmitted by al-Sarrāj with his own additions (Lamā', 375-400). This may be compared with the collection of Abū Yazīd's sayings transmitted by al-Sahlākī (d. 570/1174) under the title Kitāb al-Nūr min kalāmī Abī Ṭāṣfir (ed. 'Abd al-Rahmān Badawi, Šatibāt al-Sīrī, Cairo 1949, tr. Abdelwahab Meddeh, Les Diès de Bistami: Šatibāt, Paris 1989).

The most extensive exhibition of ṣāfīd was provided by Rūzbihān al-Baḍī (q.v.); see also Ernst, Rūzbihān Baḍī: mysticism experience and the rhetoric of sainthood in Persian Sufism, London 1995). His Arabī Majālī al-sanāʿī (ed. P. Ballanfat and Ernst, forthcoming), translated into Persian by the author in 570/1174 as Šarh-i shāthīyāt (ed. H. Corbin, Tehran 1966) nearly 200 commented examples from 45 different authors (with emphasis on Abū Yazīd, al-Wāṣīf, al-Ḥurṣī, al-Shiblī, and al-Hallādī, including all of the latter's Kitāb al-Tawākī), Rūzbihān's distinctly apologetic commentary typifies the most positive Sūfī attitude toward ṣāfīd. Many of the sayings take the form of "I am" sayings, identifying with God or the divine in addition. The principal Šīfī interpretation of this variety of sayings rested on the concept of mystical annihilation of the individual ego (fannā'ī), followed by the submission of God in its place (bakā'ī); this made it possible for God to speak through the individual. Other sayings question the ultimate significance of Islamic rituals and the afterlife. Rhetorically, the audacious style of ṣāfīd partook of the form of the pre-Islamic Arab boasting contest (muḫkamāt; q.v.), among early Sūfīs, many recorded conversations and sayings show the tendency to exceed the claims of others and discredit them by hyperbole.

Because of the lack of any clear legal definition of blasphemy in Islamic law, ṣāfīdīyāt were treated inconsistently by legal authorities; some regarded them as beyond the jurisdiction of the šāfīrī, especially when subjected to interpretation, while others (e.g. Ibn al-Djawzī [q.v.]) viewed them as tantamount to the heresies of incarnation, libertinism, and unification (hulul, ṣibā'ī, ittihād) and fully deserving of punishment in terms of apostasy, the rejection of ṣāfīd to the category of zandaka [q.v.], the Zoroastrian concept of heresy as political crime, meant that ṣāfīdīyāt were only prosecuted when political authorities found it desirable to do so. The prosecution of Sūfīs such as Nūrī, the executions of al-Hallādī and 'Ayn al-Kudāt Hamadānī [q.v.], or the posthumous trial of the poet Ibn al-Fārīd [q.v.], are explicable in terms of their political context (Words of ecstasy, 97-116; Th.E. Homerin, From Arab poet to Muslim saint: Ibn al-Fārīd, his verse, and his shrine, Columbia, S.C. 1994, 63).

Non-Sūfī intellectuals regarded ṣāfīdīyāt with sceptical interest; Ibn Khallūn regarded them as unoriginal products of uncritical ecstasy, which are pardonable except (as in the case of al-Hallādī) when they are spoken deliberately (Muḥaddith, ed. 'Abd al-Wāḥid Wāfī, Cairo 1379/1960, 1079-80). The philosopher Ibn Ṭūṣī [q.v.] found the sayings of Abū Yazīd and al-Hallādī to lack intellectual vigour (Ḥayy ibn Ṭakūn, ed. L. Gauzit, Beirut 1936, 4), while his Jewish commentator Moses of Narbonne reinterpreted them to harmonise with Hebrew scripture (G. Vajda, Comment le philosophe Ḥuwawī de Narbonne, commen- teur d'Ibn Ṭūṣī, compréhensa]e les paroles ecstatices (šāthīyāt) des Šāfīrī, in Actes du premier congreso de estudios arabes e islamicos, Córdoba, 1962, Madrid 1964, 129-35).

SHATIBA, the modern Xàtiva or Jàtiva, a town of the Šarḳ al-Andalus [q.v.], to the south of Valencia. The ancient Roman town (Saetabis) was situated on the slope of the mountain, which was crowned by a powerful fortress. The surrounding region, irrigated by several rivers, was devoted to agriculture. Shatiba is situated on the Via Augusta; the Arab town saw a shift to the south of Valencia, which was crowned by a powerful fortress. The surrounding region, irrigated by several rivers, was devoted to agriculture. Shatiba is described by the Arab geographers as a commercial centre which had trading links with North Africa and with Ghīna; its location in the network of communications of the Šarḳ al-Andalus no doubt favoured this mercantile activity, and also the development of a specialised industry, that of paper. The superior quality of its defences and its strategic position strongly influenced the history of Shatiba, a place of refuge and also the bridgehead for attacks on Valencia and other towns of the Šarḳ. It appears that in the early stages the town was included in the district of Tudmir, but, at least from the 4th/10th century onward, it belonged to the kūra of Valencia. In the first half of this century, Shatiba sometimes had a governor appointed exclusively for the town, which was also under the general jurisdiction of the authorities in Valencia. Information regarding Shatiba in the period of the Arab conquest and under the Umayyads is very sparse in the historical chronicles. To the local population there should be added, as elsewhere, Arab or Berber elements such as the Bantū Mufawwīz (Ma'ṣāfrīd) or the Bantū 'Ammira (Na'frīd). However, the date of these arrivals is unknown, as is the significance of this influx in relation to the indigenous population. Later, in the
5th/11th century, the Banū Milḥān, Nafzids originally from Huelva, moved to Shāṭībā. The Banū Mufawwiz, according to Ibn Ḥaẓm, settled close to the town in the hamlet of Ṭamrā (Enova). At least a part of this clan became urbanized, provoking an impasse in the sequence of functionaries and scholars which is documented until the very end of the Islamic history of the town.

At the beginning of the 4th/10th century, Shāṭībā and Dżazrat Śhūkār (Alcira) were under the control of ʿĀmir b. ʿAbī Dżawāsh, who was one of the Ḥanawwār Berber rulers of Šḥántamāriyya or Santaver. From 312/924 onward, he resisted attacks by the armies of Cordova, sent by ʿĀbd al-Raḥmān III. Finally, in 317/929, ʿĀmir surrendered the town under favourable conditions which allowed him to settle his affairs at Santaver before making his way with his family to Cordova.

After the fall of the caliphate, Šḥāṭība acquired a new importance in the struggles for power in the eastern region of the Peninsula. ʿĀmirīd Śaḵālība [g.v.], expelled from Cordova, appropriated a piece of territory for themselves in which they sought to establish ʿĀbd al-Raḥmān, who took the title of al-Murtādā. This attempt at Umayyad restoration was of short duration and the Śaḵālība proclaimed, again in Šḥāṭība, a grandson of their former patron (al-ʾAṣmir), ʿĀbd al-ʿAzīz b. ʿĀbd al-Raḥmān al-Muʿtāman, who thus became ruler of Valencia. Furthermore, these Śaḵālība were beset by internal rivalries, fighting among themselves to extend their territories. Muqāṭāʾūd al-Dānīya (Denia), in particular, sought to dominate the region and supported the rebellion of Šḥāṭība and other towns against ʿĀbd al-ʿAzīz in 433/1041. The town was recaptured by ʿĀbd al-ʿAzīz, but as a result of this war, he lost a major portion of his territory. Both ʿĀbd al-ʿAzīz and his son and successor ʿĀbd al-Maʿālīk found themselves confronted by mounting problems and were obliged to appeal to Christians, Aragonese or Castilian, for aid. The latter, led by King Ferdinand I, began an assault on the Šahr; the ruler of Toledo al-Maʿāmūn intervened, deposed ʿĀbd al-Maʿālīk and took possession of Šḥāṭība and Valencia. After the death of al-Maʿāmūn, these territories were taken under the control of the ruler of Saragossa, al-Muʾtākardīr, and Šḥāṭība ultimately became subject to his son Mūnḫīr, King of Lārida (Lérida), Ṭūṛṭūrīa (Tortosa) and Dānīya. The last years of the 5th/11th century saw the Almoravids and the Christians in confrontation around Valencia and Šḥāṭība. Power at Šḥāṭība was in the hands of a certain Ibn Munkidh when the Almoravid governor, ʿĀbd Allāh b. ʿĀbird al-Ḥādīḍī, was appointed to coordinate, from this town, the efforts of the Almoravids against Valencia, efforts which were not to bear fruit for some years. After the conquest of Valencia by the Almoravids, Šḥāṭība entered a new phase in its history, perhaps the most splendid. The jāhir ʿAbī ʾĪsā b. ʿĪbārīm b. ʿUṣūf b. Ṭāḥušn estab-

ished himself there as governor of the Šahr and had the town's defences renovated in 510/1117.

A period of stability began but it was to be disrupted, some thirty years later, by rebellions which threatened the holding of the Almoravid power. The documenti Syrian of Valencia offered authority to the kādi Abū ʿĀbd al-Malik Marwān b. ʿĀbd Allāh Ibn ʿAbī al-ʿAzīz, while the Almoravid governor, ʿĀbd Allāh b. Mūṣammad b. Ḥanīya, took refuge with his family in Šḥāṭība. Almoravids fleeing Valencia rallied to Ibn Ḥanīya. Protected by its imposing fortress, they made forays into the surrounding countryside, destroying houses and abducting women and children. Ibn ʿAbī al-ʿAzīz was then obliged to besiege them, aided by the armies of Lārida and of Murcia, and succeeded in expelling them from Šḥāṭība in 540/1145. The same year, however, the ʿādār rebelled against Ibn ʿAbī al-ʿAzīz and recognised the authority of Ibn Mardānī [g.v.], the new ruler of the Šahr who resisted the progress of the Almohads in the Peninsula for many years. The latter did not take Šḥāṭība and towns such as Denia and Valencia until after the death of Ibn Mardānī [g.v.].

Again, a period of stability began for the town, the defences of which were repaired; the architectural and artistic remains which have survived date mostly from this period. The Almohads installed tribal contingents (Šḥālmādā and Ḥāskārā) in Šḥāṭība, as was the case with other cities of the Šahr and of the remainder of Andalus. But after the defeat of al-ʾIḫāb (Las Navas de Tolosa) in 609/1212, their power disinte-

grated. In the dynastic struggles of the Almohads, Šḥāṭība took the side of the caliph Al-Marākūsh against al-ʾĀdīl, who had himself proclaimed in Murcia. The town was then governed by the ʿṣāfīd Abū Zayd (grandson of the caliph ʿAbī al-Muʿāmūn) who also controlled Valencia, Denia and Alcira. Abū Zayd later recognised the authority of the caliph al-Maʿāmūn, but he was unable to resist the rebellions of Ibn Hūd and of Zayyān b. Mardānī. Ibn Hūd, recognised by the people of Šḥāṭība as ʿānūr, first appointed as governor of the town Yahyā b. Tāḥir, then Abu ʿI-Husayn Yahyā b. ʿĀbd al-Kházārāṯīdīr from a distin-

guished family of Denia. Yahyā held his position for six years until his death in 634/1237. His son Abū Bakr Muhammad, who was the kāʾid of the fortress, succeeded him as governor. During this time, the threat posed by the Aragonese intensified, and in 636/1238 King James I took possession of Valencia. The following year, he besieged Šḥāṭība and took Alcira. In the face of the Christian advance, sections of the population began to flee the town, making their way with migrants from Valencia and Alcira to the Mağrib, where the caliph al-Rašīd received them. In 642/1244, James I again attacked Šḥāṭība. The siege was concluded with an agreement accord-

ing to which the Aragonese king took possession of part of the fortifications (the castell menor), with a promise on the part of the Muslims to hand over the rest of the fortress after a delay of two years. The conditions also stipulated respect on the part of the Christians for the lives, property, customs and laws of the inhabitants of the town. The Christians, how-

ever, seized the castle shortly before the end of the specified interval and the population was finally expelled from the town in 645/1248. The emigration was mainly directed towards the southern regions of the Peninsula and towards North Africa.

The intellectual life of Šḥāṭība developed especially from the 5th/11th century onward, a period which saw a significant increase in the number of scholars.
Al-Shatibi wrote on grammar (Sharh Alfyyat Ibn Mālik, of which there are ms., and K. Uṣāil al-nāzir). He also wrote K. Uṣūl al-ṣiṭṭah fi 'ilm al-ṭayḥāb, K. al-Muḍallā (commentary of the chapter on ṣiyāṭ in al-Bukhārī's Ṣaḥīḥ), al-ṣiṭṭah wa l-ṭayḥāb (adapt work in which are autobiographical data, ed. M. Abu ʿl-ʿAdīfān, Beirut 1983). He also wrote poetry. He corresponded with contemporary scholars, especially mufassils, on different issues (on his mursālid, see al-Rašīf, 106-22). One of them was whether a teacher (mursāl) is necessary for the Sufi novice (mudāfiʿ). He received answers on this issue from various scholars, including Ibn Khaḍītn in his Šīṭ al-ṣaʿīl li-taḥdīth al-muṣallā. Al-Shatibi’s ābārāt are preserved in compilations like al-Ḥadīth al-mustakīla (ms. Escorial, no. 1096) and al-Wangiṣīn’s Mīrājb (see López Ortiz, Fatwāt granadinas, 83-6; Masud, Islamic legal philosophy, 119-43) and have been edited by Abu ʿl-ʿAdīfān, Tunis 1984 (2nd rev. ed., Tunis 1986/1985). In al-Shatibi’s ābārāt there is adaptation to social change and application of the concept of al-muṣallā in modern society, i.e. he accepts not only the maṣlāḥa (see maṣlāḥa) but also which have not (mursal). Al-Shatibi’s doctrine on waṣṬ al-fiḥ is developed in his al-Maṣādikāt fi waṣṬ al-ṣaṭrāt (Tunis 1902/1884, Cairo 1931/1923). Al-Shatibi also wrote a work against innovations (bādida), his K. al-ʿĪdām (ed. M. Rażīd Rida, in al-Mānān, xvii [1333/1913]; several times reprinted). Al-Shatibi himself was accused of innovation and heresy, because he opposed certain practices (see Masud, 104-5) deeply rooted in the life of the Andalusī Muslim community. One of them was the mention of the sūltān’s name in the khutba. His opposition to this attracted refutations and counter-refutations (Masud, 108-9). On al-Shatibi’s transmissives, see al-Mudjāfārī’s Bārnāma (ed. Abu ʿl-ʿAdīfān, Beirut 1994). Al-Shatibi is one of the most important scholars of the Mālikī madhhab and one of its renewers, especially through the notion of al-maṣādikāt al-mursalā, central to his doctrine on waṣṬ al-fiḥ and also in his ābārāt. For example, he allowed certain taxes not mentioned in al-sharīʿa but made necessary by the economic difficulties of the Nasrid kingdom in Granada. Al-Shatibi’s work has had an important influence in the writings of some modern Muslim thinkers, such as Rażīd Rida. Since the pioneering monograph of 1977 by M.Kh. Masud (see Bīhī), Al-Shatibi’s life and legal doctrine have in recent years been the object of several studies which show the originality and importance of his contribution to waṣṬ al-fiḥ. **MARIBEL FIERRO**

AL-SHATIBI, Abu ‘l-KASIM B. FIRRUH B. KHALAF

b. Ahmad al-Ru‘ayyni, eminent Kur’anic scholar who introduced didactic mnemotechniques in the discipline of Kur’ân reading (kird’a).

He was born in 538/1144 at Jativa (al-Shatiba) in Muslim Spain. Although blind, he took up studies in kird’a and hadith in his home town, where he also acted for one year as a preacher. He studied first with ‘Abd Allah b. Muhammad al-Nafzi, then with ‘Ali b. Muhammad b. Hughayyil at Valencia (Balansaya), concentrating on al-Dani’s Tafsir, but taking up as well grammar and adab. On his way to perform the Pilgrimage to Mecca, he attended lectures by Abu Tahir Ahmad b. Muhammad al-Salafi at Alexandria. Upon his return in 572/1175, he established himself at Cairo, where he soon became a renowned Kur’ân reader and was appointed by al-Ka’tib al-Fadil head instructor in the disciplines of kird’a, grammar and language in his new-founded al-Fadilyya madrasa. Upon Salah al-Din’s reconquest of Palestine, al-Shatibi paid him a visit at Jerusalem in 589/1193. He died from a painful illness at the age of 52 on 28 Dhul-Hijja 590/19 June 1194, and was buried at the smaller Karafa cemetery.

Through al-Shatibi, leadership in Kur’anic disciplines returned to the East from Andalusia, where it had reigned for over a century with authorities like al-Dani (d. 444/1053 [g.o.]) and Makki b. Abi Talib (d. 437/1046 [g.o.]), who had substantially developed its theoretical framework of combinatory phonetics. Al-Shatibi’s most important achievement, which has secured him widespread fame until modern times, is, however, chiefly of a mnemonic kind. Although he wrote several prose compilations on taafsir and Kur’ân readings (Brockelmann, F, 521-2, SI, 725-6), the subject of later continuous study has been his didactic poems, the *A’lait alatrab al-kird’a fi asal al-mukaddam* (printed in *Maqalsiya* fi l-kird’a, Cairo 1929), simply called al-Riya, a rhymed version of al-Dani’s handbook on Kur’anic orthography al-Mukaddam, and a poem in taafsir, *Nafiyat as-Sahih*, on the counting of Kur’ân verses. By far most prominent, however, is his Hirz al-amani fi waql il-tahdini (ed. ’Ali Muhammad al-Dabbasi, Cairo 1937), a versification of al-Dani’s compendium of the Seven Readings, al-Tafsir, known simply as al-Shatibiyya, which was to constitute the basis of kird’at teaching from al-Shatibi’s times until our day, and was also one of the sources used for the establishment of the Cairo edition of the Kur”ân in 1924. Al-Shatibi’s poem is appreciated more especially because it answers the particular need of the discipline, sc. to ease the essential task of memorisation. Not only is the Kur’ân itself transmitted almost solely through memorising, but likewise is the discourse about kird’at and even Kur’ânic orthography. The reason is evident. Since the Kur’ân constitutes itself as text, a message meant to be performed as a “speech act” addressed to listeners, the modalities of its performance, i.e. orthoepy and intonation, cannot be conveyed except through oral practice. It is, moreover, the personal presence of the instructor in this art that is considered indispensable, since he—occupying the final position within a chain of transmitters which goes back to the Prophet himself—guarantees the integrity of the tradition’s flow from the initial and immediate situation of speech unto the contemporary listeners. The particular affinity of the Kur’ân-reading discipline to orality is further enhanced by the interdependence of the elements that constitute the performance of Kur’ân reading: the particular version of the text (kird’a), the orthoepic rules (tajwid [g.o.]) and the melodical shape of the reading, the cantilena. These three parameters are constantly interacting. Any particular text version (kird’a) requires not only a rhythm of its own, but also differs in terms of tajwid, i.e. particular issues of combinatory phonetics and the location of pauses, from any of the other versions. Again, the melodicisation is conditioned by the particular kird’a’s rhythm, and may serve to enhance the formal structuring of the text or special aspects of its contents. Finally, tajwid, the rules concerning pausa location and division of verses, determine the grammatical structuring of the phrases and thus the flow of the melody. Thus the substantially oral nature of the kird’at discipline makes it understandable that, already several generations before al-Shatibi, teaching material had been put in the form of didactic poetry. Nevertheless, all of these works were superseded by al-Shatibi’s long taafsir poem, the Hirz, which adds to the kird’at discourse as such a propaedeutic chapter on general phonetics. The early recognition of the work, enhanced undoubtedly by numerous commentaries, some of which were written by the author’s own students (Bergrässer, *GDQ*, iii, 222-4), may be partly due to al-Shatibi’s personal fame as a saintly man, observant in his ritual duties, upright towards his colleagues and students, God-fearing and even credited with some miraculous powers. Undisputably, however, the poem itself possesses factual efficiency, due to a decisive new mnemonic device: the introduction of sigla into the presentation of the particular variants. These sigla, pointing at particular readers, transmitters or transmitter groups, appear in the written verse simply as initial letters of single words used within the discussion of the particular Kur’anic lemmata. In order to be recognisable in their meta-lingual function, they have to be marked by a particular colour or repeated over the word they appear in. From Noldke (*GDQ* i, 338) to Bergrässer (*GDQ*, iii, 219-24), both of whom judged the Hirz from a merely literary point of view, this practice has been denounced as unconvincing. Since, however, the poem is not meant to be read silently but recited aloud, the mnemonic function of the sigla works on the phonetic level rather than on the visual; read as denoting sounds, not letters, they constitute an important contribution to the pre-modern mnemotechnics. It is only through the recent intrusion of the new phonographic medium into the transmission of Kur’ân reading, that the system so deeply imprinted by al-Shatibi has become outdated.

The numerous problems (manštábāt, lit. "set-ups") of middle and end games were diagrammed and discussed. Unless a game (P. dast) ended in a draw or stalemate, it ended with ghāf māt "checkmate". No satisfactory Persian etymology for māt has as yet been traced. It was apparently understood as Ar. "he died" already in al-Vakībī, History, i, 103, l. 11, and this remains the preferable explanation; the strange syntax of ghāf māt is possibly explained as a calque on a corresponding Persian expression. For the extended linguistic usage specific to chess, see the lists in Pareja, II, pp. 33-44, and Krier, Der Schachbrief, Teil II, p. 215 ff., pi. V-VIII.

and al-Rāzī, who are practically unknown, and in the following century by a certain al-Ladjladj and the famous litterateur Muḥammad b. Yāḥyā al-Sūfī (Sezgin, G4, i, 300-1); this is known from later quotations and Fārisī, 153-6, where an unidentified Ibn al-Układīdī (not a son of the mathematician, see Brockelmann, S 1, 387) is added. For the dubious attributions of special essays on chess to al-Dāhīzhī, see Fārisī, tr. B. Dodge, New York 1970, 408; Yākūt, Uḍālā, vi, 78, and to Ahmad b. al-Ṭayyib al-Sarakhsī [q.v.], see Murray, 169-70.

The popularity and high standing of chess in general education stimulated the literary imagination. The stories on its origins, whose historical core, where there was one, remains obscure, were widely reported. Poets and litterateurs used references to chess in aban-
don. For instance, the ability of the pawn to trans-
form itself into a queen by traversing the board served to indicate achievement of success from lowly begin-
nings by travel and other means. Or seriousness could give way to humour: ablingdījat was coined to denote a meat pie containing bones with no meat on them like chessmen, which has the diners move their hands around the bowl (Abi Hilāl al-Askārī, Dīwān al-mafātīḥ, Cairo 1352, 298 ff.). A theological twist was injected into the story of chess by a Muṣṭafī compares-
son of the metaphysical meaning of backgammon and chess, to the supposed disadvantage of the latter (see Nārī; and Rosenthal, 165 ff., quoting Abū Zayd al-
Bālīghī’s essay).

Chess players were ranked in five (exceptionally, six) classes. The highest, that of grand master (luhpa, pl. lahāp), at times became part of a professional de-
scription. Handicaps could be given to lesser players. Prowess in the game could bring riches and, above all, admittance to high society. Chess was, after all, the royal game “invented for kings and the rich, not for the poor and mean”, as al-Sakkāwī [q.v.], in his monograph on chess, expressed the common thought. Skills like playing blindfold with the back to the board, playing a number of opponents simultaneously, spe-
cial mixed cases such as playing two opponents blind-
fold (ghālīm) and a third one open (ḥādir), and the like were much admired and no doubt rewarded; but even an ordinary player down on his luck could make a living from chess travelling around in the provinces, presumably by exhibition games and instruction (al-
Dāhīzhī, Ḥayawān, iv, 49. ed. Hārūn, iv, 147). A grand master and poet of the 8th/14th century, who was also able to teach Turkish, probably used all three qualifications to provide for his subsistence (Ibn Ḥadījī, Ibādī, v, 260; idem, Ḥayawān al-Durar, Cairo 1412/1992, 162; al-Sakkāwī, Dāwī, vi, 151-2). Playing chess forged strong social bonds; it could cement friendships (Ibn Abū ʿUṣaybī’a, ii, 68) or provide constant compan-
ionship (al-Safaṭī, Wāṭf, xv, 380; Wieber, 82). It is quite remark-
able how often obituaries from the 9th/15th century mention competence in and devo-
tion to playing chess.

Having its fanatical devotees, chess also engendered bitter enemies. An example of choice vituperation by a chess hater is found in al-Thālibī, Yāṭīma, iv, 18-19 (Wieber, 134-5). Moral objections were raised by religious scholars at an early date and continue to be repeated and refined. They stressed the danger of neglect of prayer and religious imperatives due to absorption in playing and the potentially illegal ex-
change of money often connected with it, which was probably much more extensive than the sources let on. In sum, they stressed the game’s character as “empty and wrong amusement (lahāb bāṭil)” and thus as something socially undesirable, even if it was recog-
nised as distinguished from other gambling and play activities by its intellectual foundation. Its outright prohibition was attempted by lumping it together with backgammon and other games and amusements such as music, indicated, for instance, by the title of al-
Adjurī’s work. In the absence of any express reference in the Kur’ān and the authoritative hadīth collections, al-Adjurī cited three traditions ascribed to “All (see above) and a very few others, among them Ibn Umar’s dictum that chess was worse than backgammon (cf. also J. Robson, Tracts on listening to music, London 1938, 34-5, 56-8, from the related Kīḥāb al-Malādīh of the earlier Ibn Abī Ṭ-Dūnīyah). A rather detailed survey of legal opinions by the noto-
rious editor of al-Adjurī seems to suggest to him that they were inconclusive. A grudging classification of māhrūk was attempted early and continued to be often used. In later times, the defiance of chess had to be more forceful. Ibn Abī Ṭ-Hadījī, for instance, would claim decisive support by al-
Shāhī (see Kīḥāb al-Umm, vi, 213; Wieber, 184) and basic tabrīm by the other schools, with Mālikīsm often singled out for the negative stance.

Under the right social and economic conditions, this was undoubtedly effective to put chess under a cloud, even if an official prohibition such as that stipulated in al-
Ḥakīm (q.v., see above, at vol. III, 79a) was not the rule.

The popularity of the game spilled at times over into other cultural activities. People dreamed about it; thus dream interpreters paid attention to it in their work, for instance, ‘Abd al-Ghānī al-Nābulusī, Ta’fīr, s.v. The production of chess sets often required highly skilled labour. Miniature painters created vivid chess scenes to illustrate the game’s description in the Ṣāḥīh and other works of Persian literature. A per-
manent mark on arithmetic was made by the famous story that the legendary inventor of chess asked that he be rewarded by the amount of wheat that would result from placing one grain of wheat (or some other unit) on the first field and then double it by geo-
metrical progression until the sixty-fourth field was reached. This apparently insignificant reward turned out to be more than could be found in all the world. The computation (227-8) on the last field to a total of 264-1), provided a mathematician an incentive for a variety of solutions. The story was so impres-
sive that according to Ibn Abī Ṭ-Hadījī, Shahr Nābī al-bālīgha, Beirut 1964-3, iii, 506, who refers to al-
Birūnī, the Indians used the procedure to determine the age of the world.

SHATT (A.), lit. "bank, margin of a piece of water", Fr. Form Chott, also in English conventionally Shott, a geographical term used in the high plains of the Maghrib and the northern Sahara for the saline pasturages surrounding a *sabkha* [q.v.]. It has often been confused with this latter term, especially in toponomy of the colonial period, hence one must be very careful when one meets the term. Thus there are found on the high plains the Shatt Tigrin in Morocco; in Algeria, from west to east, the Shatt al-Gharbi, the vast Chott ech-Chergui (Shatt al-Sharkfi) to the south of the town of Sa'da, the Zahres al-Gharbi and al-Sharkfi to the north of Djelfa, and finally, the Shatt al-Hudna, occupying the depression of the same name. These Chotts of the high plateaux may be found at altitudes of more than 1,000 m/3,280 feet.

In the "Lower Sahara" of the eastern part of the Saharan Atlas (in particular, the massifs of the Aurès and the Auresmentcha), the Chotts are, on the other hand, found at low levels, sometimes at below sea level in the most westerly depressions: 33 m/108 feet below at the Chott Mérouane (Shatt Marwân) and 26 m/85 feet below at the Chott Melhira (Shatt Malghira) in Algeria. Further to the east, some less important Chotts link this last to the Shatt al-Gharsa and then to the very extensive Shatt al-Djarid in Tunisia, which stretches out into the Shatt al-Fadjar as far as a few tens of kilometres from the Mediterranean in the Gulf of Gabes.

The existence of this string of Chotts (in fact, of *sabkhas*), associated with the presence of shells along their banks (especially of cockle shells, *Cerastoderma glaucum*) has fed the myth of the "Saharan Sea". It has been held that this part of the Sahara was recently invaded by the sea and that it would be possible, by excavating a canal from the Gulf of Gabes, to divert the Mediterranean's waters into the Chotts. Although it has been demonstrated that this plan is impossible to realise, it was still a major item in the programme of one Algerian politician who was a candidate in the presidential elections at the end of the 1980s.

SHATT AL-ARAB, the name given to the united stream of the lower Euphrates and Tigris rivers in Mesopotamia.

1. Definitions.

Shatt (A., pl. *šattūt, šuṭṭān, šuṭṭān*) meant, originally, one side of a camel's hump, and *šatt al-kalā* meant a canyon's or a valley's or a stream's bank or side, or the rising ground next to the bottom (*lj*), Beirut 1956, vii, 334-5; Lane, *Lexicon*, 1548-9. Eventually, *šatt* became most commonly used in the sense of a stream's bank. Occasionally, this meaning was expanded to depict a plot of land, apparently close to the bank of a stream (*Yakūt, Bulādīn, Beirut 1955-7, iii, 344*). The name Shatt al-Arab ("Bank of the Arab") is currently referring to the tidal estuary formed by the united stream of the two rivers [see AL-FURAT; DARDÁN]. It is very unusual, as it uses *šatt* in relation to the stream itself, rather than to its banks. In modern Mesopotamia-Îrāq, *šatt* has indeed often been used to describe a stream. This usage is a relatively recent one. *Yakūt*, who traded in the Persian Gulf, mentions Shatt `Uthmān in the Baṣra area as being a plot of land, but he does not mention any Shatt al-Arab in that area (loc. cit.).

The early mediaeval name used by both Arabs and Persians was "Tigris" (*Dījalā*) (*Hudud al-ʿilam*, ur., 76; al-Iṣṭakhrī, *Geogr.*, ii, 57; al-Mukaddasī, tr. B.A. Collins, London 1994, 12-13). Other Arab names were "Euphrates and Tigris" (*Ibn Bāṭṭūtā*), and "One-Eyed Tigris" (*Dījalā al-`Aurā*). The reason for the addition seems to be either an island close to the mouth of the river, by the name of *Uwāy* (*Ibn Khurādādbeh*, 60), or the sand bar at the mouth. A mediaeval Persian (Pahlavi) name for the Tigris (and the Shatt al-Arab') was Erwand Rūd ("The Sublime River").

The modern Arab name, Shatt al-Arab, which was also used by the Ottomans, seems to be the result of extending the name of the Arab (i.e., the western) bank to include the whole river. One of the earliest modern mentions of the united stream as Shatt al-Arab appears in the accounts of the English traveller J.S. Buckingham, who stayed for a few months in Baṣra in 1816-17 (Travels in Assyria, Media and Persia, London 1829, 359-60). The modern Persian name is still Erwand Rūd.

2. Geographical description.

The confluence of the Tigris and the Euphrates is just south of al-Kūrma, and this is regarded as the beginning of the Shatt, but there is another confluence, some 50 km further south, where another part of the Euphrates flows through the Hawr Ḥammār marshes into the Shatt just north of Baṣra. The united river flows into the Persian Gulf near the town of Faw. The Shatt receives also the waters of the Karūn river [q.v.] and its tributaries. The river's width ranges between 400 and 1,200 m, and its length is about 180 km. Its navigable depth is some 36 feet (six fathoms), though there are places where it is twice that depth. It is only 24 feet (four fathoms) deep at the sand bar near the confluence of the Karūn (Iraqi Port Administration, *Shatt al-Arab survey map*, Baṣra 1964). In the 1920s the sand bar at the mouth of the river was dredged.

The country on both sides is Baṣra, where the tide rises and falls some 3 m, is less than 2 m above sea level. The land along the banks is higher than further out, owing to the silt brought down by the stream. Until the mid-1970s, the land was encroaching on the sea at the rate of some 35 km every 1,000 years, but since then this rate has diminished due to much upstream damming. Rich plantations of date palms line the banks for the whole length of the river, sometimes with orange trees underneath the dates. During the Iraq-Iran War (1980-8, see 3. below), these plantations were seriously damaged.

3. Political history.

With the rise of the Šāfawī dynasty in Persia in the early 10th/16th century [see ŠĀFĀWĪS], wars between the Šafawīs and the Ottomans produced frequent boundary shifts. In 1048/1638 Sultan Murād IV finally recaptured Baghdad. The Treaty of Zuhāb of 1049/1639, which drew a frontier zone, included much of the Shatt al-Arab well within the Ottoman domain. As a result, it was not mentioned explicitly in the agreement. Subsequent Ottoman-Persian confrontations necessitated further treaties, notably those of Kurdān of 1159/1746 and Erzurūm of 1823, which repeatedly returned to the *status quo* of 1639. Those treaties, too, remained silent in regard to the Shatt (J.C. Hurewitz, *The Middle East and North Africa in world politics, a documentary record*, New Haven and London 1975, i, 25-8, 79-80, 219-21). The Shatt al-
Arab appears explicitly in the May 1847 Second Treaty of Erzurum, reached largely due to British and Russian mediation and intervention. Except for Ottoman recognition of Persian sovereignty over Khurramshahr and its port, sovereignty over the waterway was not defined specifically, but the text implies that it included the river thalweg along the eastern bank. Continued rivalry and arguments led to renewed British-Russian intervention and to the 1913 Protocol of Constantinople, followed by a demarcation commission that published its proceedings in October 1914. In the Protocol, Ottoman sovereignty was recognised over the whole Shatt al-'Arab and its islands, save only a few, mentioned by their names (including 'Abbadan [q.v.]). Opposite the port of Muhammama (Khurramshahr) [q.e.], the border ran in the thalweg, some four miles above, and one mile below the confluence of the river Kārūn. As defined in the 1914 demarcation proceedings, except for these places, the border was to follow "the low-water level of the left (sc. eastern) bank". Due to the eruption of the First World War and Ottoman reservations, the agreement was never ratified.

Following the War, the British authorities established the Basra Port Directorate which controlled all matters of maintenance, navigation and policing in the Shatt. In early 1930, the old conflict erupted again and was even brought, in 1934, before the League of Nations. Persia felt that admission of Irāk sovereignty over the waterway leading to the large port of Khurramshahr and to the fast-growing port of 'Abbdān (where the border still ran on the eastern bank) was humiliating and intolerable. As for Irāk, because it had no other meaningful outlet to the open sea (whereas Iran had a number of alternative ports), it insisted on retaining the status quo. However, in 1937, the two countries signed a new treaty in Tehran, reaffirming the 1913 Constantinople Treaty and the 1914 Proceedings with two important changes in regard to the Shatt. Firstly, five miles opposite 'Abbdān, the border was moved to the thalweg, as had been the case in regard to Khurramshahr. Secondly, a convention was to be concluded, to cover all matters of [joint?] conservancy and navigation, but because of disagreements, this was never concluded.

The outbreak of the Second World War and the British military occupation of Irāk (May-June 1941) and southern Iran (August 1941) meant that navigation on the Shatt was managed exclusively by the British-controlled Basra Port Directorate. It collected dues and appointed pilots and navigation aids, almost exclusively Irākī nationals. This state of affairs remained unchanged after the War. From the mid-1950s, Iran's main objection to the status quo shifted to the economic aspects. It protested against the inequity of choosing the pilots and accused the Irākī Basra port authorities of misuse of the funds accruing from the passage fees. In 1960-1, with the revolutionary régime of 'Abd al-Karīm Kāsīm having withdrawn from the Baghdad Pact and being completely estranged from Iran and the West, Iran demanded the moving of the whole border to the thalweg. It also tried to appoint its own pilots, but retreated when Irākī counter-measures paralysed the port of 'Abbadān.

In 1969, Iran, conscious of the international isolation of Irāk's new (1968) Ba’th régime, demanded a new agreement which would define the border as the thalweg throughout the Shatt and establish a joint commission to supervise maintenance and navigation, complaining of obstruction of Iranian shipping there. When this was refused, Iran abrogated the 1937 treaty. Between 1969 and 1975 relations of the two powers sank to a new low, with Iranian support for Kurds in Irāk and attempts to stir up Irākī Shi’īs and Irākī attempts to encourage dissidence amongst the 'Arabīstān/Khorāsān Arabs, but in 1975 the Shah and Sadām Husayn did sign a new agreement. In 1976, Irāk conceded moving the border to the thalweg line throughout the Shatt and agreed to joint maintenance and navigation control, whilst Iran agreed inter alia to cease aiding the Kurds in Irāk and inciting the Shi’īs. This agreement did not survive the Shah’s fall. With the triumph of 'Ayāt Allāh Rūh Allāh Khumaynī [q.e. in Suppl.], relations worsened, with the latter aiming to export the Iranian Revolution and to support the Kurds again. In September 1980, Sadām Husayn, now (since 1979) President of Irāk, declared the Aighers agreement null and void, and all-out war between the two powers began. Irāk aimed at securing both banks of the Shatt and at pushing the Iranian front line far enough eastwards to keep the waterway beyond artillery fire. The fighting which centred round the Shatt resulted in enormous casualties for both sides; Irāk failed to hold Khurramshahr after 1982, whilst Iran failed to capture Başra. The superior Iranian navy and its air power and artillery blocked the Shatt and put Irākī shore facilities out of action, and 62 ships were trapped in the Shatt ports for the duration of the war.

After the cease-fire, peace negotiations failed, but as part of his preparations for the invasion of Kuwait, Sadām Husayn indicated willingness to begin talks on the future of the Shatt; these, however, came to an end with the invasion. In 1993 Irāk started unilateral dredging operations, so that by 1994 ships were again able to navigate the river, but the conflict over sovereignty is unresolved, and traffic on the waterway remains (1995) far below its pre-1980 level.

(AMATZIA BARAM, shortened by the Editors)

SHATTARIYYA, a Sūfī order introduced into India by Shah 'Abd Allah (d. 890/1485), a descendant of Shāhī Shāhāb al-Dīn Suhrawardī [q.e.]. On reaching India, Shah 'Abd Allah undertook a lightning tour of the country. Himself clad in royal dress, the disciples accompanying him wore military garb, carried banners and announced his arrival by the beat of drums. In his Lāṭī,ī-ī shabhīyya he explained the basic principles of Shāṭārī discipline, which he considered to be the quickest way to attain gnosis. Shah 'Abd Allah settled at Māndū [q.e.] where he set up the first Shāṭārī Mādānī. His work was continued by his two disciples, Shāhī Muḥammad A’llā, popularity known as Shāhī Kādī of Bengal, and Shāhī Baha’ al-Dīn of Dwampur. The latter had a very dynamic khālia in Shāhī Buddhism, who popularised the sīlāla in northern India. Shāhī Rizk Allah, uncle of Shāhī 'Abd al-Haqq Muḥaddith of Dīhil, became his disciple. Shāhī Bahā’ al-Dīn, a spiritual descendant of Shāhī Buddhism, wrote a Risāla-yī Shattārīyya on the principles of the order. Later on, Shāhī...
Muhammad Ghawth of Gwaliyar (d. 970/1562-3 [q.v.]) reinforced the silsila by giving it a compact organism and an ideological direction. A prolific writer, he wrote Iswath-i khamar, Kilid-i madhkan, Darayn, Basiruh and Kanz al-ta'awid, and translated the Amrit land into Persian as Bab-e-baght. His hobby was keeping bulls and cows. His successors (like Shāh Pir of Mirath [q.v.] or Meerut) also kept cows. Among his distinguished shahādas was Shāykh Wadhīz al-Dīn ʿAlaw, whose seminary at Ahmadabad attracted students from different parts of the country.

The Shāṭarī mystic ideology was based on daʿwat-i samāʾ (control of heavenly bodies which influenced human destiny) and an interiorisation of religious rites. Their social relationship was conditioned by their faith in pantheism. Shāh Muhammad Ghawth stood up to inhuman acts, such as the Shattans established aPantheism. Shah Muhammad Ghawth attracted students from different parts of the country.

In the pantheist. Shah Muhammad Ghawth, the silsila lost its importance after Shaykh Muhammad Ghawth. Its mystical influence was overshadowed by the establishment of the Shattari silsila.

At the age of 25 he established and edited his weekly Al-Hādī ("The lamp") (1924-7). He worked as a lawyer and was advisor to the treasury of the 'Iraki Royal Family.

I. Criteria for the acceptance of probative quotations

As regards the three first above-mentioned disciplines which come under the heading of philology, the criteria of acceptance of poetry as a probative source depend on the attitude towards the language held by the Arab scholar. The general consensus is that it is acceptable to draw conclusions from the poetry of the poets of the first two categories. For the majority of philologists, it is also legitimate to draw conclusions from their verse. However, some are accepted as probative, under certain conditions; such was the case in particular of al-Zamakhshari (d. 538/1144 [q.v.]) and of al-Radi al-Astarabadhi (d. 686/1287 [q.v.]) (Kūţāna, i, 6; Gilliot, § 6).

Another problem is that of verses which have not been transmitted in their entirety or of which the "author" is unknown. The prevailing opinion is that, if the quotation is made by an authority considered trustworthy in regard to the Arabic language, they may be legitimately used as a source of linguistic argument: "This is why the verses of Sibawayh are the most reliable verse testimony" (Kūţāna, i, 16; Gilliot, § 16).

While less used by philologists, quotations in prose have given rise to an interesting debate which also involves theological considerations. Those which are drawn from the Kur'ān are recognised, whether the transmission of the various lectures (kādāt) is "interrupted" (mustawādīr) or "irregular" (shāhīdī), as declared by Ibn Dinnī (Gilliot, § 8).

Apparently more astonishing, although conforming to the Arabo-Muslim linguistic representation, is the attitude towards hadīth. The majority of scholars do not accept it as linguistic testimony, because the specialists in hadīth declare that its transmission according to the meaning (bi 'tnān) is permitted; as a result, it can never be known for certain that the current version represents the actual words of the one regarded as the best exponent of the Arabic language (asfah al-ashārī), i.e. the Prophet. Some, such as Abu Hayyān al-Ġarnāštī (d. 745/1344 [q.v.]) see an additional reason for non-acceptance: the fact that the ancient grammarians, such as Abu 'Amr b. al-'Alā', al-Khalif, Sibawayh, al-Kisāt, etc., abstained from the use of poetic traditions as sources of probative quotations. Here, as often, non-Arabs and those of mixed blood are accused of corrupting the "native purity" of the Arabs; transmitting traditions, "they committed linguistic errors (lahū) without knowing it!" Among grammarians, admittedly the latter ones, exceptions in this respect are, among others, Ibn Fārus (al-Rundi al-Ġiblings, d. 609/1212) and Ibn Mālik (d. 672/1274 [q.v.]). The latter especially made extensive use of hadīth, in particular in his Sharh al-Taḥṣil.

These two authors were criticised for this, respectively by Ibn al-Dā'ī (al-Ġiblings, d. 680/1281) and by Abu Hayyān al-Ġarnāštī (Kūţāna, i, 10-12; Gilliot, §§ 9-10). Others adopted an intermediate position, believing it possible to distinguish between the two categories of hadīth, one where transmission is known, the other where the transmitters claim word-for-word representation of the prophetic declarations, especially those which illustrate the "excellence in language (fasābā) of the Prophet". From this latter category "it is appropriate to draw probative quotations (yasābū 'l-istiḥbād bihā) in Arabic". This is the position taken by Abu 'Ishāq al-Shāhī (d. 790/1388; commentator on the Ṣafyyn) and by Ibn al-Suyūtī (Kūţāna, i, 12-13; al-Suyūtī, Ikthārāt, 52; Gilliot, §§ 11-12).

Some later authors, influenced by logic and by commentators on the third part of the Mīḥāl al-ṭalīm of al-Sakākī (d. 626/1229 [q.v.]), in particular the Ṭubsīyī al-Mīḥāl of al-Kazwīnī (d. 739/1338 [q.v.]), have considered a theoretical distinction between example (miḥāl) and probative quotation (shāhīd). In general, they place the former in the abstract category and the latter in the concrete category. Shāhīd is appropriate for establishing the rule (tībāt al-kādāt), miḥāl for illustrating it (tībāt al-kādāt) (al-Tahānawī, Kāhiba, ed. A. Sprenger, s.v. miḥāl, on the basis of al-Ṣafī al-mutaṣawwat al-taṬūṣāntī (d. 791/1389), of the gloss by Ibn 'l-Kāsim b. al-Sakār al-Samarkandī (wrote ca. 888/1483), of the article by İbrāhīm b. Muḥammad b. 'Arābghāl al-Iṣfārāntī (d. 945/1538) and of the gloss by Ḥasan Ṣelevi al-Fanārī (d. 886/1481).

II. The literature of the genre

1. In language and in literature.

Since works specialising in grammar and in philology contain a vast number of poetical quotations, the commentators and glosses composed in this domain are innumerable, the majority of them evidently applying to the Kitāb al-Sibawayh; among the score of relevant titles, six have been edited or are in manuscript-form (Sezgin, ix, 58-63; Gilliot, § 18). Al-Dīmūl by al-Zadjădıği (d. 337/949 [q.v.]) has also enjoyed favourable treatment: a dozen commentaries on his verse, of which six have been edited or are in manuscript-form. The same applies to al-Ṭāhīr by Abū 'Ali al-Fārisī (d. 377/987 [q.v.]): nine, of which four have survived (respectively, Sezgin, ix, 88-94, 104-7; Gilliot, §§ 22, 23), in particular Ibn Barīt (d. 502/1117 [q.v.], Sharh ḡunnah al-Īsafī, ed. İd Muṣṭafā Darüşş, Damascus 1985 (see P. Larcher, in Archéeb, xxxix [1992], 120-1). There have been, however, few commentaries on the verses quoted in the K. al-Luma' by Ibn al-Dinnī (d. 392/1002 [q.v.]), it being understood that they are themselves hardly numerous. Worth mentioning is that of Ibn Ḥishām al-Anṣārī (d. 761/1360 [q.v.]) entitled ḡunnah al-ḡunnah al-ṣaghrī, which has not survived. In fact, the K. al-Rawdā al-adabīyya fi ḡunnah ḩum al-adabīyya (Alīwardi 6752; Brockelmann, II, 31, no. 7) which has been identified with this commentary (see MIDEO, xx, no. 31) is nothing other than a manuscript of al-Īkhrāj by al-Suyūtī, with an introduction fabricated by a copist (Sezgin, ix, 174-7; Gilliot, § 24).

The verses quoted in the commentaries on the Ṣafyyn by Ibn Mālik have in their turn attracted the attention of numerous commentators. Examples are Ibn Ḥishām and his Taḫṣīṣ al-ḡunnah wa-taḥṣīṣ al-ṣaghrī, incomplete, also called ḡunnah ḍbn Nāzīm (i.e. the son of Ibn Mālik, Abū 'Alā Badr al-Dīn, d. 686/1287), ed. S.T. 'Abū al-Sayyid, Cairo 1987 (MIDEO, xx, no. 31), or furthermore al-Makṣūdī al-nawḥānīya by al-'Āynī (d. 855/1451 [q.v.]), printed in the margins of the Kūṭūna al-adab by al-Bağḫādī, Būlāk 1299, which comprises commentaries on the verses contained in four commentaries on the Ṣafyyn (1) al-Durr ał-madāʾa by Badr al-Dīn, son of Ibn Mālik, (2) the Ṣafyyn by Ibn Umm Kūsim al-Muṭarrī (d. 497/1398), (3) Aṣdūd aṣ-ṣaḥāfī by Ibn Ḥishām al-Ṯābī, and (4) the Ṣafyyn by Ibn 'Ākīl (d. 769/1367) (Brockelmann, F, 359-62, no. 11 and S I). The verses contained in 1 and 4 have also been the object of numerous independent commentaries (Gilliot, § 27).

The verses quoted by Ibn al-Ḥādjī (d. 646/1249 [q.v.]) and by the commentators on al-Ḳafyyn and al-Shāhīyya have also been the frequent object of
commentaries: the Khizdnat al-adab by 'Abd al-Kadir al-Baghdadi (d. 1093/1682 [q.v.]), which is the most esteemed. This work of unique quality is not only a model of the genre, but also a veritable encyclopedia of gram- mar, poetics, literature, bio-bibliography and even history. Furthermore, the new Cairo edition, now complete, with its two volumes of indices, makes it an indispensable working tool (Gilliot, §§ 1, 26).

The same al-Baghdadi is also the author of Shawk shawaidh (Sha'wahid al-Shafayya, ed. M. Nur al-Hasan, et alii, with Shawk al-Shafayya by al-Ashtarakhi (the Shawk al-Baghdadi is to be found in vol. iv), Cairo 1358/1939, repr. Beirut 1975, and of Shawk shawaidh sha'kh al-Tibh al-aswadyya, ed. N.M. Khawadja, Faculty of Letters of Istanbul.)

The verses of numerous grammatical manuals of Ibn Hisham al-Ansari have also been subjected to commentary (Gilliot, § 29): 1. Mughni 'I-l-tibby, by al-Suyuti, in Fath al-karb. Shawk shawaidh (Sha'wahid al-Shafayya, ed. M. Nur al-Hasan, et alii, with Shawk al-Shafayya by al-Ashtarakhi (the Shawk al-Baghdadi is to be found in vol. iv), Cairo 1358/1939, repr. Beirut 1975, and of Shawk shawaidh sha'kh al-Tibh al-aswadyya, ed. N.M. Khawadja, Faculty of Letters of Istanbul.)

The criteria for the acceptance of probative verses in the "literary sciences" not being the same as those in the "poetical sciences" (Gilliot, iv/C), there should also be found illustrated and elucidated, with its two volumes of indices, makes it an indispensable working tool (Gilliot, §§ 1, 26).
clash with the Franks, whose interests and ambitions were already deeply involved in Egypt. Two other campaigns followed (562/1167 and 564/1168-9). For the details of these events, see Shirkūh.

In the end, Shāwar, attempting to exploit now one and now the other of the rival outsiders, the Syrian forces and the Crusaders, was unable to maintain his independence. He had lost the support of the palace, the local élite and even of his own family, by his high-risk policy. The burning of Fustāṭ in Safar 564/November 1168, probably on his orders to deny the attacking Crusaders the city and its resources, cost him much popular goodwill, even if the damage and losses were not so catastrophic as they have been portrayed (see W. Kubisak, *The burning of Mūṣr al-Fustāṭ in 1168. A reconsideration of historical evidence*, in *Afri
cana Bulletin*, Warsaw [1976], xxv). The new dominant force in Egypt was the Syrian army of Nur al-Dīn, elements of which plotted the assassination of Shāwar on Saturday 17 Rabi' II 564/18 January 1168, and its commander Shīrkhū succeeded as Fātimid vizier.

**AL-SHAWBAK**, a fortress, originally constructed by the Crusaders, in Transjordania, now also the name of the settlement which grew up round it. It lies in lat. 30° 33’ N., long. 35° 36’ E. at an altitude of 1,362 m/4,532 feet in the south of modern Jordan, on a strategic position commanding the al-Karak-Tafta-Ma’in mountain road and the mediaval Islamic route via the Wādī ‘Arabā towards Egypt. The surrounding Djabal al-Shārā enjoys a good rainfall and winter snows, favoung woods and agricultural land; in mediaeval Islamic times, its famed apricots were exported to Egypt, according to Abu ‘l-Fīḍā’. Its strategic position made it a coveted site for both Crusaders and Arabs, and habitation there certainly goes back to the Nabataeans.

In the mid-12th century, probably between 591/1197 and 610/1218, the slopes of al-Shawbak formed part of the tributary domain of the Latin king Baldwin I of Jerusalem, under the local authority of a certain al-Asfāhīn al-Turkūmānī. Shortly thereafter, in 590/1194, Baldwin I led a military force which crossed to the site and ordered the establishment of a military fortress adjacent to two small springs, which supplied a well within the fortress that he provided with a cavalry garrison. Baldwin I gave it particular attention when he visited it the following year, and then proceeded to ‘Aṣ-Šabā, where he constructed a second fortress in order to control the traffic going to the Hijāz and Egypt. Crusader control became firmly established with the construction of the citadel of al-Karak in 537/1142 by Fulk of Anjou, the king of Jerusalem. The land east of the Jordan River constituted a barony, with al-Shawbak (Montréal in the Frankish sources) at its seat, subsequently to be moved to al-Karak. The sources furnish us with the names of the individuals who were in charge of the fortress, such Romanus de Podio/Romain de Puy, etc.

Al-Shawbak was a target of the Fātimids in Egypt, who sent a military expedition that pillaged the locality and captured some prisoners in 552/1157. The following year, the Fātimids placed the fortress under siege, which lasted over a year, to be lifted only after the king of Jerusalem sent gifts and asked for a truce of friendship (mawāḍa‘). The Fātimids under Šalāh al-Dīn maintained their aggressive policy against the Franks east of the Jordan River. In Safar 567/ October 1171, Šalāh al-Dīn laid siege to the fortress, and its garrison surrendered within ten days. However, he departed before accepting submission when he received news that Nur al-Dīn Zānkt was approaching. The fortress finally surrendered in Rabi‘ II 585/ October 1189, two years after the battle of Ḥītīn [g.v.]. Šalāh al-Dīn gave both al-Shawbak and al-Karak as an ikṭā‘ [g.v.] to his brother and successor al-Malīk al-ʿĀdī.

There were development schemes at al-Shawbak during the Ayyūbīd period. Fruit trees were planted and the area, with its rich water resources, was rejuvenated to the extent that contemporary geomographers compared it to the vicinity of Damascus. Inscriptions testify to the care that the Ayyūbīds extended to it. The Franks recognised the strategic significance of al-Shawbak, and while besieging Damietta in 615/1218, they offered to lift the siege in return for Jerusalem, al-Shawbak, and al-Karak. This request was declined. This may explain al-Malīk al-ʾĀdī’s interest in the place, for in 626/1229, he paid his nephew al-Malīk al-Naṣīr Dāwūd 16,000 Egyptian dinārs to add al-Shawbak to his possessions, which he visited three years later while on route to Syria. It was part of the domains of the last Ayyūbīd prince in southern Jordan, al-Malīk al-Muḥājīf ʿUmar, from 648/1250 until 659/1261. It then passed to the new Mamlūk rulers following their victory over the Mongols at ʿAyn Djalut. However, in 692/1292, Sultan al-ʾAshraf Khālid ordered the demolition of the fortress on the advice of the local Bedouin chieftain, for whom it had been a major irritant. Later Mamlūk sultans, and in particular Ḥusām al-Dīn Lādīn, in 697/1297-8, restored the fortress and gave it its continuous attention, as is attested by inscriptions from that period. The great flood (al-sayl al-dī‘am) and earth-
quake that struck the region in 718/1318 may explain the observation by Ibn Faḍl Allāh al-ʿUmarī that the fortress was closed at that time.

There is no consensus in the sources regarding the status of al-Shawbak, with some referring to it as a village, others as a town, and others as a city. During the Mamlūk era it constituted an ʿamal with a mutawallī, and was part of the ṣanajak of al-Karak. Its mutawallī was appointed by the sultan in Cairo but reported to the governor of al-Karak. Biographical dictionaries provide the names of some individuals who held this position. A few of them may have been assigned the region as an ikṭā‘. The citadel, which was one of the postal stations to Cairo, was occasionally the seat of a ʿādālī under the jurisdiction of the ikṭā‘ in al-Karak.

The most important Bedouin tribes in the region were the Banū Zuhayr and Banū Sunīṣiyān. There were also significant numbers of Melkite Christians, who distinguished themselves in trade. Some were rich enough to give financial support to Sultan al-Malīk al-Zāhir Barkūk. They formed the majority of the pop- ulation, which explains why in 700/1300, they and the Christians of al-Karak were exempted from the sultan’s edict to change the colour of their turbans from white to blue.

Al-Shawbak during the 10th/16th century was a seat of the nāḥiyā as part of the ṣanajak of ʿAṭājūn. Two tabū defters provide important statistics on the villages:

The revenues according to the first survey was 11,750 akēs, falling to 14,000 akēs near the end of the century. Christians paid the ḥiṣṣa at the rate of 80 akēs per head. The decline in population is explained
by the deterioration in security. Most Christians migrated to the coastal area of Gaza. The two 
ap defteri provide detailed information about the tribal groups (as 'iyan), as well as the names of the villages at that time. It is interesting to note that the villagers numbered less households than those of the nomads.
